Anat Baniel MethodSM Professional Training Program

Fact Sheet

ABOUT THE METHOD: The Anat Baniel Method is a cutting edge, science-based approach that transforms the lives of children and adults, helping them move beyond pain and limitation. By accessing the amazing powers of the brain to change itself, the method helps people, through the *Nine Essentials* of the method, discover how to acquire new skills, improve and refine existing skills, and dramatically enhance physical, cognitive, emotional and creative performance. This unique method evolved from Anat Baniel's background as a Clinical Psychologist, dancer, a student/collaborator of Dr. Moshe Feldenkrais, and her many years of providing breakthrough outcomes to the thousands of people she has worked with and trained. Through innovative movement exercises and the *Nine Essentials* of the method, new neural patterns are created in the brain that increase strength and flexibility of mind and body, creativity and vitality. Whether the client is in good health or has a limiting diagnosis, the method provides the tools to turn the seemingly impossible into the possible and to live life more fully, with greater joy and success.

MISSION STATEMENT: Our mission in the Anat Baniel Method Training Program is to train highly effective and successful practitioners who are able to powerfully transform for the better the lives of adults and of children with special needs through the groundbreaking understanding and practice of the Anat Baniel MethodSM.
