Completion Rate

The completion rate is calculated by dividing the number of graduates by the number of students available for graduation.

¹“Number of Students Who Began Program” is the number of students who began the program who are scheduled to complete the program within the reporting calendar year.

²“Students Available For Graduation” is the number of students who began the program minus the number of “students unavailable for graduation,” which means those students who have died, been incarcerated, or called to active military duty.

³“Graduates” is the number of students who complete a program within 100 percent of the published program length. An institution may separately state completion information for students completing the program within 150 percent of the original contracted time.

⁴“Completion Rate” is the number of graduates divided by the Number of Students Available for Graduation.

All students completed their program within 100% of the published program length.

Placement Rate

¹"Number of Students Who Began Program" means the number of students who began the program who are scheduled to complete the program within the reporting calendar year.

²"Number of Graduates" is the number of students who have completed the program within 100% of the published program length.

³"Graduates Available for Employment" means the number of graduates minus the number of graduates unavailable for employment. "Graduates unavailable for employment means graduates who, after graduation, die, become incarcerated, are called to active military duty, are international students that leave the United States or do not have a visa allowing employment in the United States, or are continuing their education in an accredited or bureau-approved postsecondary institution

⁴"Graduates Employed in the Field" means graduates who are gainfully employed within six months of graduation in a position for which the skills obtained through the education and training provided by the institution are required or provided a significant advantage to the graduate in obtaining the position.

“Graduates unavailable for employment” means graduates who, after graduation, die, become incarcerated, are called to active military duty, are international students that leave the United States or do not have a visa allowing employment in the United States, or are continuing their education at an accredited or bureau-approved postsecondary institution.

⁵Placement rate is calculated by dividing the number of graduates gainfully employed in the field by the number of graduates available for employment.

Initials: _____ Date: _____ I have read and understand the above completion and placement rates.

Licensure Rate

The license examination passage rates for the immediately preceding two years for programs leading to employment for which passage of a state licensing examination is required, calculated by dividing the number of graduates who pass the examination by the number of graduates who take the licensing examination the first time that the examination is available after completion of the educational program. The institution shall use state agency licensing data to calculate license examination passage rates. If those data are unavailable, the institution shall calculate the license examination passage rate in a manner consistent with regulations adopted by the bureau. The school only offers licensing examinations that are continuously administered.

Calendar Year	Program	Number of Students Taking Exam ¹	Number Who Passed First Exam Taken ²	Number Who Failed First Exam Taken	Passage Rate ³
2011	Certified Phlebotomy Technician I	114	94	20	82%

¹“Number of Students Taking Exam” is the number of students who completed the program within 150% of the published program length and who took the exam in the reported calendar year for the first time.

²“Number Who Passed First Exam Taken” is the number of students who took and passed the licensing exam in the reported calendar year on the first attempt.

³“Passage Rate” is calculated by dividing the number of graduates who pass the exam the first time that they take it by the number of graduates who took the licensing exam for the first time after completion of the program.

Completion Rate

The completion rate is calculated by dividing the number of graduates by the number of students available for graduation.

¹“Number of Students Who Began Program” is the number of students who began the program who are scheduled to complete the program within the reporting calendar year.

²“Students Available For Graduation” is the number of students who began the program minus the number of “students unavailable for graduation,” which means those students who have died, been incarcerated, or called to active military duty.

³“Graduates” is the number of students who complete a program within 100 percent of the published program length. An institution may separately state completion information for students completing the program within 150 percent of the original contracted time.

⁴“Completion Rate” is the number of graduates divided by the Number of Students Available for Graduation.

All students completed their program within 100% of the published program length.

Placement Rate

¹"Number of Students Who Began Program" means the number of students who began the program who are scheduled to complete the program within the reporting calendar year.

²"Number of Graduates" is the number of students who have completed the program within 100% of the published program length.

³"Graduates Available for Employment" means the number of graduates minus the number of graduates unavailable for employment. "Graduates unavailable for employment means graduates who, after graduation, die, become incarcerated, are called to active military duty, are international students that leave the United States or do not have a visa allowing employment in the United States, or are continuing their education in an accredited or bureau-approved postsecondary institution

⁴"Graduates Employed in the Field" means graduates who are gainfully employed within six months of graduation in a position for which the skills obtained through the education and training provided by the institution are required or provided a significant advantage to the graduate in obtaining the position.

“Graduates unavailable for employment” means graduates who, after graduation, die, become incarcerated, are called to active military duty, are international students that leave the United States or do not have a visa allowing employment in the United States, or are continuing their education at an accredited or bureau-approved postsecondary institution.

⁵Placement rate is calculated by dividing the number of graduates gainfully employed in the field by the number of graduates available for employment.

Initials: _____ Date: _____ I have read and understand the above completion and placement rates.

Licensure Rate

The license examination passage rates for the immediately preceding two years for programs leading to employment for which passage of a state licensing examination is required, calculated by dividing the number of graduates who pass the examination by the number of graduates who take the licensing examination the first time that the examination is available after completion of the educational program. The institution shall use state agency licensing data to calculate license examination passage rates. If those data are unavailable, the institution shall calculate the license examination passage rate in a manner consistent with regulations adopted by the bureau. The school only offers licensing examinations that are continuously administered.

Calendar Year	Program	Number of Students Taking Exam ¹	Number Who Passed First Exam Taken ²	Number Who Failed First Exam Taken	Passage Rate ³
2012	Certified Phlebotomy Technician I	180	133	47	74%

¹“Number of Students Taking Exam” is the number of students who completed the program within 150% of the published program length and who took the exam in the reported calendar year for the first time.

²“Number Who Passed First Exam Taken” is the number of students who took and passed the licensing exam in the reported calendar year on the first attempt.

³“Passage Rate” is calculated by dividing the number of graduates who pass the exam the first time that they take it by the number of graduates who took the licensing exam for the first time after completion of the program.
