

SCHOOL PERFORMANCE FACT SHEET

Medical Career Services

2012

The Reform Act requires that all institutions offering a degree or diploma program designed to prepare students for a particular vocational, trade or career field provide prospective students with a "school performance fact sheet" that discloses:

- The number and percentage of students that begin the institution's program and successfully complete the entire program.
- The passage rate(s) of program graduates on any licensing preparation examinations or any licensure or certification examinations required by the state for employment in a particular vocational, trade, or career field.
- The number and percentage of students who begin the program and secure employment in the field for which they were trained.
- The average starting wages or salary of graduates of the institution's program(s) if the institution makes a claim to prospective students regarding the starting salaries of its graduates or the starting salaries or local availability of jobs in the field.

Medical Career Services programs do not require graduates on any licensing preparation examinations or any licensure or certification examinations required by the state for employment in a particular vocational, trade, or career field.

Medical Career Services does not make a claim to prospective students regarding the starting salaries of its graduates or the starting salaries or local availability of jobs in a field.

For the program of Medical Assistant

55 and 55 Students that begin the institution's program and 48 successfully completed the entire program.

55 and 48 Students who begin the program and 90 % secure employment in the field for which they were trained.

I have read and understood the graduation rate, licensing or certification examination pass rate, and job placement rate information provided above.
