Bureau for Private Postsecondary Education
Notice of Advisory Committee WebEx Meeting Agenda

Wednesday, August 26, 2020, at 9:30 a.m.

NOTE: Pursuant to the provisions of Governor Gavin Newsom’s Executive Order N-29-20, dated March 17, 2020, neither a public location nor teleconference locations are provided.

INSTRUCTIONS FOR OBSERVATION:

WEBCAST: https://thedcapage.blog/webcasts Webcast will be available at 9:30 a.m. on August 26, 2020

FOR PUBLIC COMMENT, PLEASE LOG ON TO THIS WEBSITE
https://dca-ca.webex.com/dca-ca/onstage/g.php?MTID=ea30e3fb2aaebde50a1a7dd0f76381656

The preferred audio connection is via phone bridge. The phone number and access code will be provided as part of your connection to the meeting. General instructions for using WebEx can be found at the end of the agenda.

Important Notices to the Public: The Bureau for Private Postsecondary Education will hold a meeting via WebEx – access information is provided above. General instructions for using WebEx are attached at the bottom of the agenda.

The Advisory Committee Meeting is open to the public. Members of the public may, but are not obligated to, provide their names or personal information as a condition of observing or participating in the meeting. When signing into the WebEx platform, participants may be asked for their name and email address. Participants who choose not to provide their names will need to provide a unique identifier such as their initials or another alternative, so that the meeting moderator can identify individuals who wish to make public comment; participants who choose not to provide their email address may utilize a fictitious email address like in the following sample format: XXXXX@mailinator.com.

The Advisory Committee Meeting is accessible to the physically disabled. A person who needs a disability-related accommodation or modification in order to participate in the meeting may make a request by contacting Richie Barnard at (916) 574-8903, by emailing richie.barnard@dca.ca.gov or sending a written request to the Bureau for Private Postsecondary Education, P.O. Box 980818, West Sacramento, CA 95798-0818. Providing your request at least five business days before the meeting will help ensure availability of the requested accommodation.

Discussion and action may be taken on any item on the agenda. The time and order of agenda items are subject to change at the discretion of the Chair. In the event a quorum of the committee is unable to attend the meeting, or the committee is unable to maintain a quorum once the meeting is called to
order, the members present may, at the chair’s discretion, continue to discuss items from the agenda and make recommendations to the full committee at a future meeting.

Government Code section 11125.7 provides the opportunity for the public to address each agenda item during discussion or consideration by the committee or prior to the committee taking any action on said item. Members of the public will be provided appropriate opportunities to comment on any issues before the Advisory Committee, but the chair may, at her discretion, apportion available time among those who wish to speak. If public comment is not specifically requested, members of the public should feel free to request an opportunity to comment. Individuals may appear before the Advisory Committee to discuss items not on the agenda; however, the committee can neither discuss nor take official action on these items at the time of the same meeting (Government Code sections 11125, 11125.7(a)). The Advisory Committee plans to webcast this meeting at https://thedcapage.blog/webcasts. Webcast availability cannot, however, be guaranteed due to limited resources or technical difficulties. The meeting will not be cancelled if webcast is not available. Using the WebEx link will allow for participation and observation. Using the Webcast link will allow for observation with closed captioning.

### Agenda

The public may provide appropriate comment on any issue before the Advisory Committee at the time the item is discussed. If public comment is not specifically requested, members of the public should feel free to request an opportunity to comment.

1. Welcome, Introductions and Establishment of a Quorum

2. Public Comment on Items not on the Agenda (Note: The Advisory Committee may not discuss or take action on any matter raised during this public comment section, except to decide whether to place the matter on the agenda of a future meeting (Government Code Sections 11125 and 11125.7(a))

3. Review and Approval of February 19, 2020, Advisory Committee Meeting Minutes

4. Remarks by a Representative of the Department of Consumer Affairs, which may include updates pertaining to the Bureau’s Operations, Human Resources, Department’s Administrative Services, Enforcement, Information Technology, Communications and Outreach, as well as Regulatory and Policy Matters

5. Bureau Operations Update and Discussion related to the following:
   a. COVID-19 Update
   b. Update on Fee Audit
   c. Update on Advisory Committee Handbook Revisions
   d. Update on the Bureau’s IT System Project
   e. Annual Reports (AR) Report
   f. Quality of Education Report
   g. Compliance and Discipline Report
      i. School Inspections by the Bureau
      ii. Disciplinary Highlights and Resulting Actions Statistics
      iii. Citation and Fines
   h. Complaint and Investigation Report
      i. Complaint and Investigation Statistics
   i. Licensing Report
      i. Licensing Applications Status Statistics
      ii. Report on the Number of Institutions

2
j. Office of Student Assistance and Relief (OSAR) Report
   i. Overview of OSAR Activities Summary Report
   ii. School Closure Outreach Update
k. Student Tuition Recovery Fund (STRF) Report
   i. STRF Claims and Large Impact Closure Statistics

6. Status Updates related to the following Regulations:
   a. English as a Second Language Programs [Title 5, California Code of Regulations (CCR), Section 70000 (k)]
   b. Application for Verification of Exempt Status (CEC Sections 94874, 94874.2, 94874.7, 94874.5, and 94927.5); Title 5, CCR Section 71395)
   c. Compliance with Laws and Procedures (Title 5, CCR, Section 71755)
   d. Student Records and the Maintenance of Records (Title 5, CCR Sections 71920, 71930, 71940 and 71950)
   e. Annual Report (Title 5, CCR Section 74110)

7. Future Agenda Items

8. Adjournment
HOW TO – Join – DCA WebEx Event

The following contains instructions to join a WebEx event hosted by the Department of Consumer Affairs (DCA).

NOTE: The preferred audio connection to our event is via telephone conference and not the microphone and speakers on your computer. Further guidance relevant to the audio connection will be outlined below.

1. Navigate to the WebEx event link provided by the DCA entity (an example link is provided below for reference) via an internet browser.

Example link: https://dca-ca.webex.com/dca-ca/onstage/g.php?MTID=eb0a73a251f0201d9d5ef3aaa9e978bb5

2. The details of the event are presented on the left of the screen and the required information for you to complete is on the right.

NOTE: If there is a potential that you will participate in this event during a Public Comment period, you must identify yourself in a manner that the event Host can then identify your line and unmute it so the event participants can hear your public comment. The ‘First name’, ‘Last name’ and ‘Email address’ fields do not need to reflect your identity. The department will use the name or moniker you provide here to identify your communication line should you participate during public comment.
3. Click the ‘Join Now’ button.

   NOTE: The event password will be entered automatically. If you alter the password by accident, close the browser and click the event link provided again.

4. If you do not have the WebEx applet installed for your browser, a new window may open, so make sure your pop-up blocker is disabled. You may see a window asking you to open or run new software. Click ‘Run’.

Depending on your computer's settings, you may be blocked from running the necessary software. If this is the case, click 'Cancel' and return to the browser tab that looks like the window below. You can bypass the above process.
5. To bypass step 4, click ‘Run a temporary application’.

6. A dialog box will appear at the bottom of the page, click ‘Run’.

   The temporary software will run, and the meeting window will open.

7. Click the audio menu below the green ‘Join Event’ button.

8. When the audio menu appears click ‘Call in’.
HOW TO – Join – DCA WebEx Event

9. Click ‘Join Event’. The audio conference call in information will be available after you join the Event.

10. Call into the audio conference with the details provided.

NOTE: The audio conference is the preferred method. Using your computer’s microphone and speakers is not recommended.
Once you successfully call into the audio conference with the information provided, your screen will look like the screen below and you have joined the event.

Congratulations!

NOTE: Your audio line is muted and can only be unmuted by the event host.

If you join the meeting using your computer’s microphone and audio, or you didn’t connect audio at all, you can still set that up while you are in the meeting.

Select ‘Communicate’ and ‘Audio Connection’ from top left of your screen.
HOW TO – Join – DCA WebEx Event

The ‘Call In’ information can be displayed by selecting ‘Call in’ then ‘View’

You will then be presented the dial in information for you to call in from any phone.
Participating During a Public Comment Period

At certain times during the event, the facilitator may call for public comment. If you would like to make a public comment, click on the ‘Q and A’ button near the bottom, center of your WebEx session.

This will bring up the ‘Q and A’ chat box.

NOTE: The ‘Q and A’ button will only be available when the event host opens it during a public comment period.
To request time to speak during a public comment period, make sure the ‘Ask’ menu is set to ‘All panelists’ and type ‘I would like to make a public comment’.

Attendee lines will be unmuted in the order the requests were received, and you will be allowed to present public comment.

NOTE: Your line will be muted at the end of the allotted public comment duration. You will be notified when you have 10 seconds remaining.
WELCOME, INTRODUCTIONS AND ESTABLISHMENT OF A QUORUM

Committee Member Roster

Katherine Lee-Carey, Chair  
- Institutional Representative (Appointed by DCA Director)

Margaret Reiter, Vice-Chair  
- Consumer Advocate (Appointed by Senate Committee on Rules)

Leigh Ferrin  
- Consumer Advocate (Appointed by Speaker of the Assembly)

Natalie Lyons  
- Consumer Advocate (Appointed by DCA Director)

Diana Amaya  
- Public Member (Appointed by Senate Committee on Rules)

Thomas Wong  
- Public Member (Appointed by Speaker of the Assembly)

Dr. Robert Snowden  
- Past Student of an Institution (Appointed by DCA Director)

Joseph Holt  
- Institutional Representative (Appointed by DCA Director)

David Vice  
- Institutional Representative (Appointed by DCA Director)

Assemblymember Jose Medina (Kevin Powers)  
- Non-Voting, Ex Officio Member (Appointed by Speaker of the Assembly)

Senator Steven Glazer (Sarah Mason)  
- Non-Voting, Ex Officio Member (Appointed by the Senate Committee on Rules)
Agenda Item 2

PUBLIC COMMENT ON ITEMS NOT ON THE AGENDA

(Note: The Committee may not discuss or take action on any matter raised during this public comment section, except to decide whether to place the matter on the agenda of a future meeting (Government Code Sections 11125 and 11125.7(a).)
Agenda Item 3

REVIEW AND APPROVAL OF FEBRUARY 19, 2020, ADVISORY COMMITTEE MEETING MINUTES

ATTACHMENT:
Advisory Committee Draft Meeting Minutes from February 19, 2020
Advisory Committee Meeting Minutes  
Wednesday, February 19, 2020  

Department of Consumer Affairs  
Hearing Room, 1st Floor  
1625 North Market Blvd.  
Sacramento, CA 95834  

Advisory Committee Members in Attendance  
1. Joseph Holt  
2. Katherine Lee-Carey  
3. Margaret Reiter  
4. Kevin Powers (on behalf of Assemblymember Jose Medina)  
5. Dr. Robert Snowden  
6. Thomas Wong  
7. Natalie Lyons  
8. Diana Amaya  
9. Sarah Mason (on behalf of Senator Steven Glazer)  

Committee Members Absent  
Hanya Carbajal  
David Vice  

Bureau for Private Postsecondary Education (Bureau) and Department of Consumer Affairs (DCA) Staff in Attendance  

Dr. Michael Marion Jr., Bureau Chief  
Leeza Rifredi, Deputy Bureau Chief  
Beth Scott, Bureau Enforcement Chief  
Beth Danielson, Bureau Enforcement Chief  
Ebony Santee, Bureau Licensing Chief  
Scott Valverde, Office of Student Assistance and Relief (OSAR) Chief  
Robert Bayles, Bureau Education Administrator Chief  
Yvette Johnson, Bureau Administration Chief  
Doug Smith, Bureau Legal Counsel  
Norine Marks, DCA Legal Counsel  
Kimberly Kirchmeyer, DCA Director  
Suzanne Mayes, DCA Business Analyst
Agenda #1 - Welcome, Introductions, and Establishment of a Quorum

Committee Chair, Katherine Lee-Carey called the meeting to order at 9:36 AM.

Agenda #2 - Public Comment on Items not on the Agenda

No Public Comment.

Agenda #3 - Review and Approval of November 19, 2019, Advisory Committee Meeting Minutes

Thomas Wong moved to approve the minutes; Joseph Holt seconded the motion. (Mr. Wong: Aye; Natalie Lyons: Aye; Mr. Holt: Aye; Ms. Reiter: Aye; Ms. Lee-Carey: Aye; Robert Snowden: Aye; Diana Amaya: Aye) The motion passed.

Agenda #4 - Remarks by Representative of the Department of Consumer Affairs

Kimberly Kirchmeyer, DCA Director, provided updates on DCA. She reported on an email she sent out to all DCA employees. She outlined main areas DCA is focusing on. She stated that client service and satisfaction is a priority. She added that to achieve best practices, DCA will be working smarter together, with the boards and bureaus.

Ms. Kirchmeyer continued that data and transparency is really important to her. She stated that she wants to use data and technology to make better informed decisions and provide measurable achievements. She noted that due to the Bureau’s current IT system, Bureau staff must put in a lot of work to provide statistics to the Committee. She referenced the new IT system the Bureau is in the process of implementing and noted that the new technology will enable Bureau staff to more efficiently provide statistics to the Committee.

Ms. Kirchmeyer outlined the following main focuses: reducing the timeframe for producing regulations, streamlining the process for producing fiscal reports, decreasing the timeframes of investigations at the Division of Investigations (DOI), meeting ADA compliance standards, and ensuring all legislation is implemented by the boards and bureaus.

Ms. Kirchmeyer reported that the DCA legal office created a regulations unit to assist DCA offices in the rulemaking proposal process. She noted that a main priority of the unit is complying with AB-2138 (Licensing boards: denial of application: revocation or suspension of licensure: criminal conviction). She added that DCA is implementing a data system for boards and bureaus to track the status of regulation packages.
Ms. Kirchmeyer stated that DCA remains committed to assisting the Bureau throughout its sunset review process. She added that she met with Dr. Marion regarding the sunset review and will continue to assist in preparation of the sunset review hearings.

Ms. Kirchmeyer discussed DCA’s Organizational Improvement Office (OIO). She explained that the unit provides program change management, business process mapping, and information technology documentation services. She noted that OIO has two central focuses, including the review of centralized services and assisting boards and bureaus in implementing business modernization processes.

Public Comment

No Public Comment.

**Agenda #5 – Bureau Operations Update and Discussion**

**Update on Advisory Committee Handbook Revisions**

Doug Smith, Bureau Legal Counsel, provided an update on the Advisory Committee handbook. He explained that the Bureau is in the process of updating the handbook. He added that the intent is to create a more useful guide to help provide reference for Committee procedures, responsibilities, and recommendations. He noted that the Bureau would like suggestions or advice from the Committee, in updating the handbook.

Public Comment

No public comment.

**Update on Bureau Staffing Levels (BPPE Organization Chart)**

Dr. Michael Marion Jr., Bureau Chief, referenced attachment 5b, the Bureau’s organizational chart, in the meeting packet.

Dr. Marion also provided the Committee with a brochure that included a high overview of Bureau operations.

Ms. Lyons questioned if all the Special Enforcement Unit positions are limited term. Dr. Marion explained that the positions are limited term pending further review, to determine if the classifications are meeting the demands of what work needs to be done. He noted that it is likely that the positions will be converted to permanent. Ms. Reiter asked if there has been a request made to make the positions permanent, and the length of limited term positions. Leeza Rifredi, Deputy Bureau Chief, explained that no request has been made to make the positions...
permanent, as it is still under review. She added that the limited positions are for a duration of two years with the possibility of becoming permanent.

Mr. Holt questioned if there are plans to add more positions in the Office of Student Assistance and Relief (OSAR) Unit. Dr. Marion responded that there will be ongoing discussions on OSAR staffing levels.

Public Comment

No public comment.

Update on the Bureau’s 2020 Strategic Plan Presented by SOLID

Suzanne Mayes, DCA Business Analyst, provided an overview on the strategic planning process. She referenced a slide show containing information on the process.

Ms. Lyons questioned if the surveys being conducted for input are anonymous. Ms. Mayes responded that the surveys are anonymous. She added that there are textbox options for stakeholders to provide additional input.

Ms. Reiter asked how often the Bureau is supposed to do a strategic plan. Ms. Mayes stated that the timeframe is typically three to five years and varies depending on the organization. Dr. Marion noted that the Bureau’s current strategic plan ends in 2020.

Ms. Reiter stated that the last time she reviewed the Bureau’s strategic plan, the goals were so broad and general that one could not tell if the goals had been met. She questioned if the new strategic plan will have specific, objective, and measurable goals. Ms. Mayes responded that the process includes a focus on 3 to 5 objectives for each goal area to help with specificity. She added that there has been additional focus placed on action planning to address the question of meeting measurable outcomes. Dr. Marion added that the Bureau has worked a lot with SOLID to ensure objectives are measurable. Ms. Reiter commented that she would like to see more emphasis on quality over quantity in regard to measuring the outcome of goals.

Mr. Wong questioned if members could have an opportunity to review the current strategic plan to determine if goals have been met. Dr. Marion responded that he would look into the best approach to relay that information to the Committee.

Ms. Lee-Carey questioned if the goal is to complete the strategic planning process by the end of 2020. Dr. Marion confirmed that is the goal. Ms. Mayes added that it would be ideal to conduct the action planning session after the Bureau’s sunset review hearing, in order to incorporate any issues brought forth by the sunset review process.
Mr. Holt requested an opportunity for the Committee to engage in the strategic planning process. Dr. Marion responded that the Bureau provided the survey to Committee members and that the Bureau certainly wants input from the Committee.

Public Comment

Angela Perry, with the Institution for College Access and Success (TICAS), provided public comment.

Update on the Bureau’s IT System Project

Sean Oconnor, Project Delivery and Administrative Services Chief with DCA Office of Information Services (OIS), provided an update on the Bureau’s IT system project. He reported that the project formally kicked off on January 10, 2020. He continued to elaborate that the system integrator is InLumon. He noted that the company has implemented licensing and regulatory systems in multiple states. He added that the company has some expertise in the education space.

Mr. Oconnor reported that the goal is to have the ability submit applications online for licensure and complaints, and for this goal to be functional by Summer 2020. He explained that the process is being conducted using an agile methodology approach which allows functionality to be implemented in pieces, as opposed to using a big-bang approach with having the entire system go live at once. He noted that this allows for incremental organizational change management and for quicker access to new functionality.

Mr. Holt questioned what future capabilities the Bureau will have with data base management and generating reports from data collection. Mr. Oconnor explained that system will allow for real time configuration by creating new categories and values of data. He added that the focus will be on engineering a system that allows for the most effective and beneficial system for tracking and reporting. Mr. Holt asked about data migration from the current system to the new system. Mr. Oconnor explained that the scope of the project includes total migration from the current system to the new system before the end of the project. He added that it will be important to focus on how far back and how detailed the Bureau should be when choosing what data to migrate to the new system.

Mr. Holt asked about the project length. Mr. Oconnor stated the project will be conducted over an 18 month period with an additional year of maintenance and operational services from the vendor.

Ms. Reiter commented that she hopes aged complaint data will be secured to ensure the historical relevance will be maintained. Ms. Reiter asked about the qualifications of the company chosen to do the system integration. Mr. Oconnor commented that the company was chosen utilizing a procurement service provided through the Department of General Services, which prescreens companies.
Ms. Lyons asked if staff will have the capability to generate various reports. Mr. Oconnor responded that the ability for staff to generate reports is included in the scope of the project.

Sarah Mason questioned if the new system will be able to communicate with other outside systems. Mr. Oconnor stated that part of the requirement of the new system will be the ability to interact with other systems utilizing universal programming languages.

Ms. Mason asked for clarification on the incremental organizational change management approach. Mr. Oconnor stated that change management will correspond with the release of each new system functionality.

Ms. Reiter asked what the dollar amount is for the initial contract. Mr. Oconnor stated that market research on cost for the project was around 5 million dollars and the total project contract came in below that amount. He added that the contract is shared among four programs and will not be completely paid for by the Bureau.

Public Comment

No public comment.

Annual Reports (AR) Report

Robert Bayles, Bureau Education Administrator, provided a report on the Annuals Reports Unit. He outlined Attachment 5e of the meeting packet.

Ms. Lee-Carey questioned if there is a fine or abatement for schools that do not send a report. Mr. Bayles stated that an abatement would be issued to the school for the submission of the report. He added that if a school is nonresponsive, then a citation would be issued.

Mr. Wong questioned how the submission rate for this year compares to prior years. Mr. Bayles responded that the previous year was different due to the implementation of the online submission portal and the corresponding outreach that went along with that. He added that change in outreach could explain the difference in the submission rate(s).

Ms. Lyons questioned what happens if a school issued a citation but still does not submit a report. Mr. Bayles explained that the Enforcement Unit would handle the situation and that the issue will not be ignored. Mr. Wong asked for additional information regarding those schools who do not submit a report. Mr. Bayles explained that it depends on the situation. He continued that a school may submit the report late and/or a school may not submit a report at all. He added that some schools may submit an incomplete report, at which point an analyst will work with the school to get a complete report.

Ms. Mason questioned what process occurs during the review of the annual report submissions. She asked if analysts are just looking for completion or also looking for certain red
Mr. Bayles explained that analysts are checking for completion and red flags. He added that initially an analyst will do a quantitative review for completion, and then the analyst will look for red flags, while working in conjunction with the Compliance Unit. He noted that analysts may also be asked to review a school’s annual report prior to a school investigation to identify any red flags.

Ms. Mason questioned if the annual report analysts are trained to identify red flags. Mr. Bayles responded that analysts are trained to identify red flags. He added that they are primarily looking for disparities in the documents provided by the school. He gave the example that if a school provides data on 10 programs while only being approved for 9 programs, then that would be a red flag.

Public Comment
No public comment.

Quality of Education Report

Mr. Bayles provided a report on the Quality of Education Unit. He outlined Attachment 5f of the meeting packet.

Ms. Mason asked if there were any noticeable trends in which accrediting institutions are pursuing. Mr. Bayles stated that he could provide that information at the next meeting.

Public Comment
No public comment.

Compliance and Discipline Report

BPPE Enforcement Chief, Beth Scott, provided a report on the Compliance and Discipline Units. She referenced Attachment 5g of the meeting packet.

Ms. Lee-Carey questioned if the current trend of increased inspections will continue. Ms. Scott responded that she anticipates that the units will continue to perform at the current level and may even increase. Ms. Lee-Carey asked how many inspectors contributed to the 51 inspections conducted. Ms. Scott stated that there are 12 inspectors in the unit.

Mr. Holt asked for clarification on the change between 2018 and 2019 regarding “Notice to Comply” and “Enforcement Referrals”. Ms. Scott explained that an increase in unannounced inspections contributed to the change. She noted that there has also been an increase in collaboration with other units within the Bureau.
Mr. Holt commented that it would be helpful to track issues that are remediated during the inspection process at an institution. He stated that it would be beneficial to tabulate total issues identified, issues corrected on site, and issues resulting in a notice to comply.

Ms. Mason asked if there is an average time that an inspector spends on an announced and unannounced inspection. Ms. Scott responded that there is a lot of work that occurs in the office prior to the inspection. She continued that during an announced inspection, staff will let the school know about identified issues, so they can have ample time to attempt to correct those issues prior to the inspection. She added that staff look for the same items during an announced and an unannounced inspection. She stated that typically it takes one day to complete an inspection. She noted that occasionally an inspector will be able to conduct two inspections in one day or it can take up to two days to complete a single inspection.

Ms. Mason questioned if there is a geographical breakdown of where inspections occur. Ms. Scott responded that inspections are often based on location. For example, if multiple schools are due for an inspection and are in close proximity, then they will be scheduled to be inspected accordingly.

Ms. Mason asked how often inspections occur with collaboration from outside agencies. She asked if the collaboration would result in a violation of BPPE’s laws, in addition to laws of other agencies. Ms. Scott responded that if another agency goes to the inspection, then that agency would deal directly with the violations to its laws. She explained that collaboration with other entities is based on need but estimated that 10% of inspections are done in collaboration with outside agencies.

Ms. Reiter asked for clarification on schools who refuse an inspection. Ms. Scott stated that the citation process is prioritized for schools who refuse an inspection. She added that the goal is to have a citation completed within two weeks of a school refusing an inspection. Ms. Reiter questioned if schools comply, following the issuance of a citation. Ms. Scott stated that if a school does not comply with the requirements set forth in the citation, then they are referred to the Attorney General’s (AG) office for further action.

Ms. Reiter questioned if there are ever instances when students are given an opportunity to reevaluate the choice to attend a school following the school receiving a citation. Ms. Scott stated that has not been placed in an abatement at this point. Ms. Reiter stated that she would like to see that being considered in the rectification of a citation.

Ms. Lyons asked for clarification on the material harm requirement that must be met, in order for the Bureau to pursue certain actions. Dr. Marion explained that in order for the Bureau to take certain actions there must be proven student harm. He added that ideally the Bureau would not need to wait until harm has already occurred, but rather act before student harm occurs. Ms. Lyons questioned if student harm must be proven in order to refer a case to the AG office. Ms. Scott confirmed that the presence of evidence supporting student harm is necessary.
for a case to transfer to the AG’s office. Ms. Reiter questioned if legislative action is necessary to deal with the issue of student harm.

Dr. Marion confirmed it will require a legislative change.

*Complaint and Investigation Report*

Beth Danielson reported on the Complaint and Investigation Unit. She outlined Attachment 5H in the meeting packet.

Ms. Reiter questioned if citations are handled differently when they originate from an inspection or a complaint. Ms. Danielson responded that the goal with a complaint, is to make the student whole. She added that when identified issues in a complaint have the possibility of affecting a student or other students, staff will attempt to reach out to those students.

Mr. Holt asked if the current trend of open complaints will continue trending down or has an equilibrium been met. Ms. Danielson stated that the numbers are close to being held at a steady rate.

Mr. Holt suggested for a breakdown of the allegation categories found to be unsubstantiated. He gave the example of whether a complaint was unsubstantiated on the face or lacks evidence. He continued that would give more insight in to whether there are certain types of allegations that are typically found to be unsubstantiated. Ms. Danielson stated that might be a statistic more readily available with the new IT system. Mr. Holt added that it would be helpful for institutions to know what type of issues need to be addressed in order to better assist students.

Ms. Danielson commented on Video Symphony. She reported that the Bureau has paid out over $200,000 of STRF funds to former Video Symphony students. She added that the Bureau has no jurisdiction to assist or appear on behalf of students, related to or regarding legal matters. She noted that students are still encouraged to contact OSAR even if they have previously filed a STRF claim.

Ms. Reiter asked if the Bureau has reached out to other agencies regarding Video Symphony. Dr. Marion stated that the situation no longer falls under the Bureau’s jurisdiction. Ms. Reiter questioned if the Bureau has provided documents to any outside agencies. Dr. Marion responded that the Bureau is open to working with other law enforcement agencies, but noted that currently none have reached out to the Bureau.

Mr. Wong questioned if there is a process a school is supposed to follow upon closure. Ms. Danielson stated there is a process schools are supposed to follow. Mr. Wong questioned if there are any repercussions if a school does not follow the school closure process. Ms. Scott stated that citations will be issued if a school does not follow the process, but it is difficult to resolve the citation after the school has closed. Ms. Scott added that documentation is
maintained on what occurred. Ms. Reiter pointed out the importance of the new IT system, including that historical data will be transcribed.

Ms. Reiter questioned if the Bureau’s ability to bring a lawsuit for restitution against an institution ends once the school is no longer approved to operate by the Bureau. Dr. Marion stated he would review that scenario with legal counsel and respond at a later time.

Ms. Lyons questioned who at the Bureau works to ensure student records are acquired and maintained in the event of a school closure. Ms. Scott responded that there is a closed school analyst. She added that there is a proactive approach to collect records prior to a school closing. Ms. Lyons questioned what more is needed to ensure student records are maintained, if a school doesn’t cooperate during a closure. Dr. Marion responded that the record keeping following a school closure, is outlined in the Sunset Report and the goal is to develop a way to address the issue.

Public Comment

Angela Perry with TICAS provided public comment.

Licensing Report

Ebony Santee introduced herself as the Bureau’s new Licensing Chief. She reported on the licensing report and outlined Attachment 5I, of the meeting packet.

Public Comment

No comment.

Office of Student Assistance and Relief (OSAR) Report

OSAR Chief, Scott Valverde, provided a report on OSAR. He covered OSAR’s Report within Attachment 5J, of the meeting packet.

Ms. Mason questioned if OSAR is working with partnered agencies to utilize different mediums to reach out to students. Mr. Valverde responded that OSAR has worked with partners to expand outreach efforts to students.

Mr. Powers asked for more information on the OSAR’s mass communication system. Mr. Valverde explained that it is a customizable system that allows OSAR to send out a message to a large number of students at once. He added that there was a very high turnout at the last event when the mass communication system was utilized.

Ms. Lyons questioned when to expect the additional outreach efforts to be conducted regarding the new statute impacting past Corinthian students. Mr. Valverde responded that it
will likely be conducted in roughly 30 days and added he would be very happy to report on it at
the next Committee meeting.
Ms. Lyons asked about OSAR staffing levels. Dr. Marion responded that it is a team effort with
staff in other units assisting OSAR. Ms. Lyons suggested that OSAR will likely need more staff
following additional outreach efforts to past Corinthian students.

Student Tuition Recovery Fund (STRF) Report

Yvette Johnson, Bureau Administration Chief, provided a report on STRF. She covered
Attachment 5K in the meeting packet.

Ms. Lyons questioned how long it takes for staff to review and process a complete STRF
application. Ms. Johnson stated that depending on staff workload it can take up to 30 days.
Ms. Rifredi added that it can take between 30 to 90 days for a payment to be processed by the
State Controller’s Office. Ms. Lyons asked if when a student is notified that an application has
been approved. Ms. Rifredi responded that once the application goes to the State Controller’s
Office for payment, the student is notified by mail and includes the amount to be paid.

Ms. Lyons commented on the recommendation in the sunset report for using STRF funds for
record maintenance. She pointed out that there will likely be an increase in STRF applications
after outreach efforts to past Corinthian students regarding the new eligibility requirements
and noted the potential for more school closures that could impact the fund. She stated that
STRF was set up to assist students with economic loss and stressed the importance of
institutions being responsible for maintaining records.

Public Comment

No comment.

Agenda Item #6 - Status Updates on Regulations

Dr. Marion provided a status update on regulations. He outlined Attachment 6A of the meeting
packet.

Public Comment

Robert Johnson with the California Association of Private Postsecondary Schools provided
public comment.

Agenda Item #7 – Future Agenda Items

Ms. Reiter suggested a discussion on strategic planning in regard to the sunset review process.
Ms. Reiter requested in any input or positions on future legislation items affecting the Bureau. Ms. Lee-Carey suggested more discussion on income share agreements (ISA).

**Agenda #8 – Adjournment**

The meeting adjourned.
REMARKS BY A REPRESENTATIVE OF THE DEPARTMENT OF CONSUMER AFFAIRS

(Note: May include updates pertaining to the Bureau’s Operations, Human Resources, Department’s Administrative Services, Fees, Enforcement, Information Technology and BreEZe, Communications and Outreach, as well as Regulatory and Policy Matters)
Agenda Item 5

BUREAU OPERATIONS UPDATE RELATED TO THE FOLLOWING:

a. COVID-19 Update
b. Update on Fee Audit
c. Update on Advisory Committee Handbook Revisions
d. Update on the Bureau’s IT System Project
e. Annual Reports (AR) Report
f. Quality of Education Report
g. Compliance and Discipline Report
h. Complaint and Investigation Report
i. Licensing Report
j. Office of Student Assistance and Relief (OSAR) Report
k. Student Tuition Recovery Fund (STRF) Report
COVID-19 UPDATE

Attachment:
COVID-19 INDUSTRY GUIDANCE: Institutions of Higher Education
COVID-19 INDUSTRY GUIDANCE:
Institutions of Higher Education

August 7, 2020
covid19.ca.gov
OVERVIEW

The following guidelines and considerations are intended to help institutions of higher education (IHE) and their communities plan and prepare to resume in-person instruction.

This guidance is interim. These guidelines and considerations are based on the best available public health data at this time, international best practices currently employed, and the practical realities of managing operations; as new data and practices emerge, the guidance will be updated. Additionally, the guidelines and considerations do not reflect the full scope of issues that institutions of higher education will need to address.

Implementation of this guidance as part of a phased reopening will depend on local conditions including epidemiologic trends (such as new COVID-19 case and hospitalization rates consistently stable or decreasing over at least 14 days), availability of IHE and community testing resources, and adequate IHE preparedness and public health capacity to respond to case and outbreak investigations. All decisions about following this guidance should be made in collaboration with local public health officials and other authorities.

Implementation of this guidance should be tailored for each setting, including adequate consideration of programs operating at each institution and the needs of students and workers. Administrators should engage relevant stakeholders—including students, their families, staff and labor partners in the school community—to formulate and implement plans.

The guidance is not intended to revoke or repeal any worker rights, either statutory, regulatory or collectively bargained, and is not exhaustive, as it does not include local public health orders, nor is it a substitute for any existing safety and health-related regulatory requirements such as those of Cal/OSHA. IHEs should stay current on changes to public health guidance and state/local orders as the COVID-19 situation evolves. In particular:

- Cal/OSHA provides more comprehensive guidance for protecting workers on their [Cal/OSHA Interim General Guidelines on Protecting Workers from COVID-19 webpage](#).

- The California Department of Public Health and Cal/OSHA has additional relevant guidance for institutions of higher education including, but not limited to, fitness facilities, retail and childcare.

Finally, as this guidance is implemented, institutions should assess and mitigate any equity and access issues that might arise in resuming in person instruction.
Required Use of Face Coverings

On June 18, CDPH issued Guidance on the Use of Face Coverings, which broadly requires the use of face coverings for both members of the public and workers in all public and workplace settings where there is a high risk of exposure.

People in California must wear face coverings when they are in the high-risk situations listed below:

- Inside of, or in line to enter, any indoor public space;
- Obtaining services from the healthcare sector in settings including, but not limited to, a hospital, pharmacy, medical clinic, laboratory, physician or dental office, veterinary clinic, or blood bank;
- Waiting for or riding on public transportation or paratransit or while in a taxi, private car service, or ride-sharing vehicle;
- Engaged in work, whether at the workplace or performing work off-site, when:
  - Interacting in-person with any member of the public
  - Working in any space visited by members of the public, regardless of whether anyone from the public is present at the time;
  - Working in any space where food is prepared or packaged for sale or distribution to others;
  - Working in or walking through common areas, such as hallways, stairways, elevators, and parking facilities;
  - In any room or enclosed area where other people (except for members of the person’s own household or residence) are present when unable to physically distance;
  - Driving or operating any public transportation or paratransit vehicle, taxi, or private car service or ride-sharing vehicle when passengers are present. When no passengers are present, face coverings are strongly recommended.
- While outdoors in public spaces when maintaining a physical distance of six feet from other persons is not feasible.

The CDPH Guidance Document also identifies individuals exempt from wearing a face covering, including but not limited to persons with a medical condition, mental health condition, or disability that prevents wearing a face covering, and persons who are hearing impaired, or communicating with a person who is hearing impaired, where the ability to see the mouth is essential for communication.
Complete details, including all requirements and exemptions to these rules, can be found in the guidance. Face coverings are strongly encouraged in other circumstances, and employers can implement additional face covering requirements in fulfilling their obligation to provide workers with a safe and healthful workplace. Employers must provide face coverings to workers or reimburse workers for the reasonable cost of obtaining them.

Employers should develop an accommodation policy for any worker who meets one of the exemptions from wearing a face covering. If a worker who would otherwise be required to wear a face covering because of frequent contact with others cannot wear one due to a medical condition, the worker should be provided with a non-restrictive alternative, such as a face shield with a drape attached to the bottom edge, if feasible, and if the medical condition permits it.

Businesses that are open to the public should be cognizant of the exemptions to wearing face coverings in the CDPH Face Covering Guidance and may not exclude any member of the public for not wearing a face covering if that person is complying with the guidance. Businesses will need to develop policies for handling these exemptions among customers, clients, visitors, and workers.

Institutions of higher education must require and reinforce use of face coverings amongst students in line with requirements for workers and members of the public, including exemptions to the requirement for persons with a medical condition, mental health condition, or disability that prevents wearing a face covering, and for persons who are hearing impaired or communicating with persons who are hearing impaired. During in-person classes, instructors in a lecture hall who maintain a distance of six feet or more may wear a face shield with a drape.

The California Governor’s Office of Emergency Services (CalOES) and the Department of Public Health (CDPH) are working to support procurement and distribution of face coverings. Additional information can be found here.

The following areas have been identified as overarching issues that must be addressed in campus repopulation planning.
1. COVID-19 Prevention Plan

- Establish a written, campus-specific COVID-19 prevention plan, perform a
  comprehensive risk assessment of all work areas, work tasks, and student
  interactions, and designate a person at each campus to implement the
  plan.
  
  - Incorporate the CDPH Guidance for the Use of Face Coverings, into
    the Workplace Specific Plan that includes a policy for handling
    exemptions.

- Identify contact information for the local health department where the
  facility is located for communicating information about COVID-19
  outbreaks among students and workers.

- Train and communicate with workers and students on the plan. Make the
  plan available and accessible to workers and their representatives.

- Regularly evaluate the facility for compliance with the plan and
  document and correct deficiencies identified.

- Investigate any COVID-19 illness and determine if any factors could have
  contributed to risk of infection. Update the plan as needed to prevent
  further cases.

- Implement the processes and protocols when a workplace has an
  outbreak, in accordance with CDPH guidelines.

- Identify close contacts (within six feet for 15 minutes or more) of an
  infected worker or student and take steps to isolate COVID-19 positive
  worker(s) and close contacts.

- Adhere to the guidelines below. Failure to do so could result in workplace
  illnesses that may cause operations to be temporarily closed or limited.

- Ensure that vendors, independent contractors and others performing
  services in the establishment are knowledgeable about these guidelines,
  are provided or obtain their own supplies and PPE, and that they adhere
  to these guidelines.
2. General Measures

- Establish and continue communication with local and State authorities to determine current disease levels and control measures in your community. For example:
  - Consult your local health department website, or with your local health officer, or designated staff, who are best positioned to monitor and provide advice on local conditions. A directory can be found here.
  - Regularly review updated data and guidance from state agencies, including the California Department of Public Health.

- Limit, to the greatest extent permitted by law, external community members from entering the site and using campus resources, as the number of additional people onsite and/or intermixing with students, faculty, and staff increases the risk of virus transmission.

- Develop a plan for the possibility of repeated closures of classes, groups, or entire facilities when persons associated with the facility or in the community become ill with COVID-19. See Section 10 below.

3. Promote Healthy Hygiene Practices

- Promote and reinforce washing hands, avoiding contact with one's eyes, nose, and mouth, and covering coughs and sneezes among students and staff.
  - Recommend to students, faculty, and staff to frequently wash their hands for 20 seconds with soap, rubbing thoroughly after application. Using “antimicrobial” soap is not necessary or recommended.
  - Encourage students, faculty, and staff to cover coughs and sneezes with a tissue or use the inside of the elbow. Used tissues should be thrown in the trash and hands washed immediately with soap and water for at least 20 seconds.
  - Students and staff should use hand sanitizer when hand washing is not practicable. Sanitizer must be rubbed into hands until completely dry.
  - Do not use any hand sanitizer that may contain methanol per FDA advisory. Methanol is dangerous to both children and adults.

- Ensure adequate supplies to support healthy hygiene, including sanitation stations, soap, hand sanitizer containing at least 60 percent alcohol, paper towels, tissues, disinfectant wipes, and no-touch/foot pedal trash cans.
• Require or strongly recommend that all students and staff be immunized each autumn against influenza unless contraindicated by personal medical conditions, to help:
  o Protect the campus community
  o Reduce demands on health care facilities
  o Decrease illnesses that cannot be readily distinguished from COVID-19 and would therefore trigger extensive measures from the IHE and public health authorities.

• Post signs in highly visible locations (e.g., building entrances, restrooms, dining areas) that promote everyday protective measures and describe how to stop the spread of germs (such as by properly washing hands, physical distancing, and properly wearing a cloth face covering).

• Include messages (for example, videos) about behaviors that prevent the spread of COVID-19 when communicating with faculty, staff, and students (such as on IHE websites, in emails, and on IHE social media accounts) in accordance with the Clery Act.

4. Intensify Cleaning, Disinfection and Ventilation

Cleaning and disinfection

• As described below, clean and disinfect frequently touched surfaces (e.g., door handles, light switches, sink handles, drinking fountains, grab bars, handrailings, bathroom stalls, dining hall tables, elevator controls) within IHE facilities throughout the day.

• Use of shared objects (e.g., lab equipment, computer equipment, desks) should be limited when possible, or disinfected between use. If transport vehicles (e.g., buses) are used by the IHE, drivers should practice all safety actions and protocols as indicated for other staff (e.g., hand hygiene, cloth face coverings). To clean and disinfect IHE buses, vans, or other vehicles, see guidance for bus transit operators. Drivers should be provided disinfectant wipes and disposable gloves to support disinfection of frequently touched surfaces during the day.

• Develop a schedule for increased, routine cleaning and disinfection that avoids both under- and over-use of cleaning products.
• Ensure proper ventilation during cleaning and disinfecting. Introduce fresh outdoor air as much as possible, for example, by opening windows where possible.

• Plan cleaning only when occupants are not present; fully air out the space before people return. If the surface or object is visibly soiled, start with soap and water or an all-purpose, asthma-safer cleaning product certified by the U.S. Environmental Protection Agency (EPA) Safer Choice Program.

• Choose disinfectant products approved for use against the virus that causes COVID-19 from the EPA-approved List “N”.
  o To reduce the risk of asthma and other health effects related to disinfecting, programs should aim to select disinfectant products on EPA List “N” with asthma-safer ingredients (hydrogen peroxide, citric acid or lactic acid).
  o Avoid products that contain peroxyacetic (peracetic) acid, sodium hypochlorite (bleach) or quaternary ammonium compounds, which can cause asthma.
  o Follow disinfectant product label directions for appropriate dilution rates and contact times. Provide workers training on the hazards associated with the product, manufacturer’s directions, ventilation requirements, and on Cal/OSHA requirements for safe use.
  o Use disinfectants in accordance with instructions from the California Department of Pesticide Regulation.
  o Custodial staff and other workers who clean and disinfect the campus site should be equipped with proper protective equipment, including protective gloves, eye protection, respiratory protection and other appropriate protective equipment as required by the product instructions.
  o Establish a cleaning and disinfecting schedule in order to avoid both under- and over-use of cleaning products.

• Encourage students, faculty, and staff to keep their personal items (e.g., cell phones, other electronics) and personal work and living spaces clean. Encourage students, faculty, and staff to use disinfectant wipes to wipe down shared desks, lab equipment, and other shared objects and surfaces before use.
### Ventilation

- Introduce as much fresh outdoor air as possible:
  
  - Open windows where possible, optimally with two or more openings on opposite sides of the room to induce good natural ventilation. In addition to opening windows or when opening windows poses a safety or health risk (e.g., allowing in truck exhaust or pollens) to facility occupants, use room air conditioners or blowers on “fresh air” setting, and room HEPA (high-efficiency particulate air) cleaners.

  - For mechanically ventilated buildings, increase outdoor air ventilation by disabling demand-controlled ventilation and opening outdoor air dampers to 100% or the greatest amount feasible as indoor and outdoor conditions permit.

  - Mechanical ventilation systems in buildings must be operated continuously when persons are in the building.

  - Improve building mechanical ventilation filtration to MERV-13 or the highest feasible level.

  - If possible, add portable room air cleaners with HEPA filters taking into account the recommend indoor space covered by portable air cleaners.

  - For additional information, consult ASHRAE recommendations for reopening school.

### Disinfection of Water Systems

- Take steps to ensure that all water systems and features (for example, drinking fountains and decorative fountains) are safe to use after a prolonged facility shutdown to minimize the risk of Legionnaires’ disease and other diseases associated with water.

- Use of drinking fountains is prohibited. Faculty, staff and students are encouraged to bring their own water and to use water refilling stations where available for personal water bottles. Water refilling stations should be cleaned and disinfected regularly. Post signs at refilling stations that encourage users to wash or sanitize their hands after refilling.
5. Implement Distancing on Campus

Modified Layouts

- Space seating/desks at least six feet apart. Hold smaller classes in larger rooms.
- For counties on the State County Data Monitoring List for three consecutive days, indoor lectures are prohibited. Courses offered in specialized indoor settings (e.g., labs, studio arts), whose design imposes substantial physical distancing on participants based on the nature of work performed in the space, are permitted. For up to date Information about the State County Data Monitoring List, which counties are on it, and what activities are impacted by it, see the California COVID-19 website.
- Consider use of non-classroom space for instruction, including regular use of outdoor space, weather permitting.
- When practical, offer synchronous distance learning in addition to in-person classes to help reduce the number of in-person attendees.
- Provide adequate distance between individuals engaged in experiential learning opportunities (e.g., labs, vocational skill building activities).
- Maximize the distance between students in IHE vehicles (e.g., skipping rows) to the extent possible and ensure that face coverings are worn. Introduce fresh outdoor air by opening windows where possible and/or via the vehicle’s ventilation system.
- Consider redesigning activities for smaller groups and rearranging spaces to maintain separation.

Physical Barriers and Guides

- Install impermeable physical barriers, such as sneeze guards and partitions, particularly in areas where it is difficult for individuals to remain at least six feet apart (e.g., cash registers).
- Provide physical guides and cues, such as tape on floors or sidewalks and signs on walls, to ensure that individuals remain at least six feet apart in lines and at other times.
- Consider designating routes for entry and exit, using as many entrances as feasible. Put in place other protocols to limit direct contact with others as much as practicable.
• Maintain or expand procedures for turning in assignments that minimize contact.

Communal Spaces

• Limit, to the greatest extent permitted by law, any nonessential visitors or volunteers from accessing campus. In-person activities or meetings involving external groups or organizations – especially with individuals who are not from the local geographic area (e.g., community, town, city, or county) are not allowed at this time.

• Close nonessential shared spaces, such as game rooms and lounges; for essential shared spaces, stagger use and restrict the number of people allowed in at one time to ensure everyone can stay at least six feet apart, and clean and disinfect between use. Develop systems to enforce this.

• Set up study spaces available for individual study so students are seated at least six feet apart and install physical barriers where possible. Such spaces must limit occupancy to 25% of room capacity or 100 people, whichever is less.

• Add physical barriers, such as plastic flexible screens between bathroom sinks, especially when they cannot be at least six feet apart. When sinks are closer than six feet, disable every other sink to create more distance.

• Encourage students to consistently use the same bathroom and shower facilities to contain any possible transmission to within that cohort.

Gyms, Pools and Fitness Facilities

• Refer to the guidance on fitness facilities and pools on the COVID-19 Resilience Roadmap website.

• As referred to in the guidance on college athletics, athletic facilities must limit occupancy to essential personnel, such as players, coaches, trainers, etc.

Food Service & Dining Halls

• Provide grab-and-go options for meals. If a dining hall is typically used, if possible, serve individually plated meals (versus buffet or any self-serve stations).

• Use disposable food service items (e.g., utensils, dishes). If disposable items are not feasible or desirable, ensure that all non-disposable food service items are handled with gloves and washed with dish soap and
hot water or in a dishwasher. Individuals should wash their hands before putting on and after removing their gloves, and after directly handling used food service items.

- If food is offered at any event, have pre-packaged boxes or bags for each attendee instead of a buffet or family-style meal. Avoid sharing food and utensils and consider the safety of individuals with food allergies.

- Food courts should follow the relevant guidance in accordance with the reopening approvals of the facility’s local health officer, as follows:
  - For counties that have not passed attestation, follow the restaurant guidance for take-out and delivery.
  - For counties that have passed attestation, follow the restaurant guidance for dine-in activities.
  - For counties that have passed attestation but have been added to California’s watchlist, follow the restaurant guidance for outdoor dining and takeout activities.

- Follow additional guidance on the COVID-19 County Roadmap website for additional campus services such as bookstores, libraries, childcare, food courts, etc.

### 6. Limit Sharing

- Discourage sharing of items that are difficult to clean or disinfect, as described above.

- Ensure adequate supplies to minimize sharing of high-touch materials to the extent possible (e.g., assigning each student their own art supplies, lab equipment, computers) or limit use of supplies and equipment by one group of students at a time and clean and disinfect between use, as described above.

- Avoid sharing electronic devices, books, pens, and other learning aids.
7. Housing Under Authority of the IHE

- Review on-campus guidelines elsewhere in this document and current CDC COVID-19 Guidance for Shared or Congregate Housing regarding:
  - IHE should assess and mitigate any equity and access issues when prioritizing limited housing for students and faculty.
  - Frequent reminders of COVID-19 prevention, including proper hand hygiene (verbally, posters, videos) with hand sanitizer widely available in common areas and rooms.
  - Cleaning and disinfection of common areas and high-touch surfaces throughout the day, consistent with Section 3.
  - Requiring face coverings in common areas.
  - Training on public health measures and signs and symptoms of COVID-19 for all live-in professionals, graduate hall directors, resident advisors (RA), and others in similar roles.
  - No social events or activities as per current local and state health officer orders.
  - Reconfiguring seating in common areas to permit proper physical distancing.

- It is difficult to maintain physical distancing in on-campus housing, and even modified guidelines may be difficult to achieve. However, every effort should be made to decrease the risk for exposure at on-campus housing arrangements by reducing occupancy, including:
  - Establishing allowable occupancy and developing plans to monitor and enforce.
  - Prioritizing single room occupancy wherever possible, except for family housing. This may be feasible if the college/university has a limited number of students on campus for in-person instruction. When there must be two students per room, ensure at least six feet between beds, and require students sleep in opposite directions (head to foot).
  - Minimizing the number of residents per bathroom. When shared bathrooms are used, increase the frequency of cleaning.
  - Restricting building access by non-residents, including outside guests, non-residential staff, and others. These restrictions may not apply to some people, such as personal care attendants for students with disabilities.
8. Train Staff & Students

- Provide effective training to faculty, staff, and students on preventing COVID-19, including:
  
  o Information on COVID-19, how to prevent it from spreading, and which underlying health conditions may make individuals more susceptible to contracting the virus.
  
  o The facility’s COVID-19 prevention plan.
  
  o Self-screening at home, including temperature and/or symptom checks using CDC guidelines.
  
  o To seek medical attention if their symptoms become severe, including persistent pain or pressure in the chest, confusion, or bluish lips or face. Updates and further details are available on CDC’s webpage.
  
  o Enhanced sanitation practices
  
  o Physical distancing guidelines
  
  o Use of PPE and proper use, removal and washing of cloth face coverings, including:
    
    ▪ Face coverings are not personal protective equipment (PPE).
    
    ▪ Face coverings can help prevent exposure of people near the wearer and the wearer, but do not replace the need for physical distancing and frequent handwashing.
    
    ▪ Face coverings must cover the nose and mouth.
    
    ▪ Hands should be washed or sanitized before and after using or adjusting face coverings.
    
    ▪ Avoid touching eyes, nose, and mouth.
    
    ▪ Face coverings must not be shared and should be washed or discarded after each use.
    
  o Information contained in the CDPH Guidance for the Use of Face Coverings, which mandates the circumstances in which face coverings must be worn and the exemptions, as well as any policies, work rules, and practices the IHE has adopted to ensure the use of face coverings. Training should also include how the IHE’s policies on how people who are exempted from wearing a face covering will be handled.
o Information on employer or government-sponsored leave benefits workers may be entitled to receive that would make it financially easier to stay at home. See additional information on government programs supporting sick leave and worker’s compensation for COVID-19, including worker’s sick leave rights under the Families First Coronavirus Response Act and worker’s rights to workers’ compensation benefits and presumption of the work-relatedness of COVID-19 pursuant to the Governor’s Executive Order N-62-20 while that Order is in effect.

o The importance of not coming to work or attending class:
  ▪ If a worker or student has symptoms of COVID-19 as described by the CDC, such as a fever or chills, cough, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea, vomiting, or diarrhea, OR
  ▪ If a worker or student was diagnosed with COVID-19 and has not yet been released from isolation, OR
  ▪ If, within the past 14 days, a worker or student has had contact with someone who has been diagnosed with COVID-19 and is considered potentially infectious (i.e. still on isolation).

  • To return to work or class after a worker or student receives a COVID-19 diagnosis only if 10 days have passed since symptoms first appeared, their symptoms have improved, and the worker or student has had no fevers (without the use of fever reducing medications) for the last 24 hours. A worker or student without symptoms who was diagnosed with COVID-19 can return to work or class only if 10 days have passed since the date of the first positive COVID-19 test.

  • Ensure any independent contractors, temporary or contract workers, and volunteers are also properly informed about campus COVID-19 prevention policies and have necessary supplies and PPE. Alert organizations supplying temporary and/or contract workers ahead of time of these responsibilities, and ensure that workers have training.

  • Consider conducting the training virtually, or, if in-person, ensure six-foot physical distancing is maintained.
9. Check for Signs and Symptoms

- COVID-19 symptoms, as described by the CDC, include:
  - Fever or chills
  - Cough
  - Shortness of breath or difficulty breathing
  - Fatigue
  - Muscle or body aches
  - Headache
  - New loss of taste or smell
  - Sore throat
  - Congestion or runny nose
  - Nausea or vomiting
  - Diarrhea

- If feasible, conduct daily health screenings or ask faculty, staff, and students to conduct self-checks (e.g., temperature screening and/or symptom checking).

- Health checks should be done safely in accordance with physical distancing recommendations and respectfully, and in accordance with any applicable federal or state privacy and confidentiality laws and regulations. IHE administrators may use examples of screening methods found in CDC's General Business FAQs.

10. Plan for When a Staff Member, Student or Visitor Becomes Sick

🏠 Advise Sick Individuals of Home Isolation Criteria

- Remind staff and students who are sick or who have recently had close contact with a person with COVID-19 to stay home or, if they live in campus housing, to follow isolation procedures.

- For serious injury or illness, call 9-1-1 without delay.
• Sick faculty, staff, or students should not return to in-person classes or IHE facilities, or end isolation until they have met CDC’s criteria to discontinue home isolation. Develop a plan to provide services including food and healthcare to students living on campus who are diagnosed with or have symptoms of COVID-19.

• Develop policies that encourage and remind sick staff and students to stay at home without fear of reprisal and ensure staff and students are aware of these policies.

Isolate and Transport Those Who are Sick

• Make sure that faculty, staff, and students know they should not come to the IHE if they feel sick, and should notify college officials (e.g., IHE designated COVID-19 point of contact) if they become sick with COVID-19 symptoms, test positive for COVID-19, or have been exposed to someone with COVID-19 symptoms or a confirmed case.

• Immediately separate faculty, staff, and students with COVID-19 symptoms (as listed above). Individuals who are sick should:
  o wear a mask or face covering,
  o go home, or if they live in campus housing follow isolation procedures, or go to a local or campus-based health care facility, depending on how severe their symptoms are, and
  o follow CDC Guidance for caring for oneself and others who are sick. IHEs may follow CDC’s Guidance for Shared or Congregate Housing for those that live in IHE housing.

• Work with IHE administrators and health care providers to identify an isolation room, area, or building/floor (for on-campus housing) to separate anyone who has COVID-19 symptoms or tests positive but does not have symptoms. IHE health care providers must be protected in accordance with Title 8, Section 5199 when caring for sick people. See: The California Workplace Guide to Aerosol Transmissible Diseases.

• Establish procedures for safely transporting anyone who is sick to their home or to a health care facility in compliance with Title 8, Section 5199. If you are calling an ambulance or bringing someone to the hospital, call first to alert them that the person may have COVID-19.
IHE-Affiliated Student Health Services

- See CDC and Cal/OSHA detailed guidance on safety
  - providing health care services to persons symptoms of COVID-19 and
  - protecting staff and students from COVID-19 while receiving care.

Clean and Disinfect

- Close off areas used by a sick person and do not use these areas until after cleaning and disinfecting, as described above.
- Wait at least 24 hours before cleaning and disinfecting. If 24 hours is not feasible, wait as long as practicable. Ensure a safe and correct application of disinfectants with trained staff using personal protective equipment and ventilation recommended for cleaning, as described above. Keep disinfectant products away from children. Consider third party cleaning services specializing in decontaminating infected areas.

Notify Health Officials and Close Contacts

- Notify local health officials and appropriate members of the campus community immediately of any positive case of COVID-19 while maintaining confidentiality as required by state and federal laws, including FERPA and the ADA. Additional guidance can be found here.
- Inform those who have had close contact with COVID-19 to stay home or in their living quarters and self-monitor for symptoms, and follow CDC guidance if symptoms develop.
- Document/track incidents of possible exposure and notify local health officials, appropriate staff, and families immediately of any possible case of COVID-19 while maintaining confidentiality, as required under FERPA and state law related to privacy of educational records. Additional guidance can be found here. The staff liaison can serve a coordinating role to ensure prompt and responsible notification.
- Advise sick staff and students not to return until they have met CDC criteria to discontinue home isolation, including 24 hours with no fever, symptom improvement, and 10 days since symptoms first appeared.
- Ensure non-discrimination against students and staff who were or are diagnosed with COVID-19.
11. Maintain Healthy Operations

Protections for Persons at Higher Risk for Severe Illness from COVID-19

- Offer options for faculty and staff at higher risk for severe illness (including older adults and people of all ages with certain underlying medical conditions) that limit their exposure risk (e.g., telework, remote course delivery, and modified job responsibilities).
- Offer options for students at higher risk for severe illness that limit their exposure risk (e.g., virtual learning opportunities).
- Provide all staff opportunities for telework, and students opportunities for virtual learning, independent study and other options, as feasible, to minimize transmission risk.

Regulatory Awareness

- Be aware of current state or local regulatory agency policies related to group gatherings to determine if events can be held.

Activities

- For IHE-specific student activities, pursue virtual group events, gatherings, or meetings, if possible. In counties on the State County Data Monitoring List for three consecutive days, indoor gatherings are prohibited. For counties that are not on the State County Data Monitoring List, limit occupancy at the venue to 25% of room capacity or 100 people, whichever is fewer, and comply with any more restrictive local restrictions. For up to date Information about the State County Data Monitoring List, which counties are on it, and what activities are impacted by it, see the California COVID-19 website.
- Follow guidance applicable to sporting events and participation in sports activities in ways that reduce the risk of transmission of COVID-19 to players, families, coaches, and communities. (See guidance on collegiate athletics below.)
- For all other gatherings, such as public performances, follow current published state and local health officer orders of guidance applicable to gatherings.
• Limit, to the greatest extent permitted by law, any nonessential visitors or volunteers from accessing campus. In-person activities or meetings involving external groups or organizations – especially with individuals who are not from the local geographic area (e.g., community, town, city, or county) are not allowed at this time.

Telework and Virtual Meetings and Services

• Encourage telework for as many faculty and staff as possible, especially workers at higher risk for severe illness from COVID-19.

• Replace in-person meetings with video- or tele-conference calls whenever possible.

• Provide student support services virtually, as feasible.

• When possible, use flexible work or learning sites (e.g., telework, virtual learning) and flexible work or learning hours (e.g., staggered shifts or classes) to help establish policies and practices for social distancing.

Travel and Transit

• Consider options for limiting non-essential travel in accordance with state and local regulations and guidance.

• Encourage students, faculty, and staff who use mass transit to consider using other transportation options (e.g., walking, biking, driving, or riding by car alone or with household members only) if feasible.

Designated COVID-19 Point of Contact

• Designate an administrator or office to be responsible for responding to COVID-19 concerns. All IHE students, faculty, and staff should know who they are and how to contact them. The liaison should be trained to coordinate the investigation, documentation and tracking of possible COVID-19 exposures, in order to appropriately instruct close contacts to quarantine, and notify local health officials, staff, and families in a prompt and responsible manner.
Participation in Community Response Efforts

- Consider participating with state or local authorities in broader COVID-19 community response efforts including pursuit of delegated authority for contact tracing, sitting on community response committees, and utilizing IHE labs and resources, when available, to increase testing capacity.

Communication Systems

- Maintain communication systems that
  - Allow students, faculty, and staff to
    - report to the IHE if they have symptoms of COVID-19, a positive test for COVID-19, or were exposed to someone with COVID-19 in accordance with health information sharing regulations for COVID-19, and
    - receive prompt notifications of exposures and closures while maintaining confidentiality, as required by FERPA and state law related to privacy of educational records. Additional guidance can be found here.
  - Notify faculty, staff, students, families, and the public of IHE closures and any restrictions in place to limit COVID-19 exposure (e.g., limited hours of operation).

Leave and Excused Absence Policies

- Develop policies for returning to classes and IHE facilities after COVID-19 illness. CDC’s criteria to discontinue home isolation and quarantine can inform these policies.

Back-up Staffing Plan

- Monitor absenteeism of workers and students, cross-train staff, and create a roster of trained back-up staff.

Affiliated Organizations

- Ensure that any organizations affiliated with the IHE, such as off-campus clubs, Greek organizations, etc., also follow these guidelines. Develop systems to enforce and hold affiliated organizations accountable for adhering to this guidance.
Support Coping and Resilience

- Encourage workers and students to take breaks from watching, reading, or listening to news stories, including social media if they are feeling overwhelmed or distressed.
- Promote eating healthy, exercising, getting sleep and finding time to unwind.
- Encourage workers and students to talk with people they trust about their concerns and how they are feeling.
- Consider posting signage for the national distress hotline: 1-800-985-5990, or text TalkWithUs to 66746.
- Post signage for on-campus resources to help students manage stress and attend to their mental health.

Testing

- Consider routine systematic testing of staff or students for current COVID-19 infection, and procure resources to test exposed IHE student and staff if exposed. The benefit of initial or routine testing for the presence of antibodies in serum after infection is currently unclear.

12. Considerations for Partial or Total Closures

- Check State and local health officer orders and health department notices frequently about transmission in the area or closures and adjust operations accordingly.
- When a student, faculty, or staff member tests positive for COVID-19 and has exposed others at the school, implement the following steps:
  - Consult the local public health department regarding additional follow-up needed to identify close contacts, and recommended actions, closures, or other measures to protect your community.
  - Give standard guidance for isolation at home for 10 days for COVID-19 infected persons.
  - Give standard guidance for quarantine at home for at least 14 days after close contact, parts or all of the campus might need to close temporarily as students or staff quarantine. Refer to local health department website or CDPH Isolation & Quarantine Guidance.
o Additional close contacts outside of the residence and classroom should also quarantine for 14 days at their residence.

o Develop communication plans for exposure notifications or school closure to include outreach to students, parents, faculty, staff, and the community.

o Include information for workers regarding labor laws, information regarding Disability Insurance, Paid Family Leave, and Unemployment Insurance, as applicable.

o Provide guidance to students, parents, faculty, and staff reminding them of the importance of community physical distancing measures while some or all of campus is closed, including discouraging students or staff from gathering elsewhere.

o Develop or review plans for continuity of education.

o Monitor local public health department website and maintain regular communications.
Specific Interim Guidance for Collegiate Athletics

The following guidelines and considerations are intended to help institutions of higher education (IHE) and their communities plan and prepare for resumption of college athletic training, and to resume competition when conditions warrant.

The risk of transmitting the COVID-19 virus depends on several factors germane to sports, including:

- Number of people in a location
- Type of location (indoor versus outdoor)
- Distance or physical contact between people
- Length of time at location
- Touching of shared objects
- Use of face coverings
- Mixing of people from locations with different levels of community transmission

The length of time, proximity of contact and use of shared equipment increases the potential risk for athletes. To help mitigate those risks, colleges who wish to resume competition should provide strong protections for their student athletes, including allowing them the choice to opt-out of the season without the risk of a scholarship being revoked, reduced or cancelled, or any other kind of retaliatory activity. College athletic departments are also expected to vigorously enforce the testing and reporting protocols described below.

As general guidance, smaller groups are safer than larger; outdoor locations are safer than indoor; sports that can ensure distance of six feet or more are safer than close contact; and shorter duration is safer than longer. For most sports activities, this guidance assumes that use of face coverings while playing is not feasible, although they should be worn by players and others while on the side lines. Athletic directors and coaches need to consider all these factors as they plan to resume training and conditioning.

In addition, student-athletes train, study, and potentially live on campus, and travel to compete in other geographies, increasing the risk of transmission. IHEs need to consider these factors as they resume practicing, develop protocols for the use of fitness facilities on campus, and develop guidance for student-athlete housing. Allowing teams to come to the campus from other geographic areas also increases risk of disease transmission.

As stay-at-home orders are modified, it is essential that all possible steps be taken to ensure the safety of student-athletes, workers, and the public.
Collegiate athletic teams are permitted to begin a return to practice only if:

- The institution of higher education adopts, and its teams follow, an institution-specific “return to play” safety plan, and

- Regular periodic COVID-19 testing of athletes and support staff is established and implemented by the IHE. For example, teams could consider testing at least 25% of their team and staff population every week. PCR testing is the preferred method at this time.

- Consistent with requirements imposed by the National Collegiate Athletic Association (NCAA), athletes are not required to waive their legal rights regarding COVID-19 as a condition of athletics participation.

- The institution of higher education adheres to the general guidance for institutions of higher education related to isolation and quarantine of individuals who test positive for COVID-19 and close contacts of those individuals.

Competition between teams without spectators is permitted to begin only if:

- IHE can provide COVID-19 testing and results within a 72 hour period in advance of competition in high contact risk sports.\(^4\)

- Athletics departments have considered how best to secure reasonable assurance that the same risks have been adequately considered and addressed by other teams. This includes consideration of how to share testing results and related safety assurances to opposing teams before the start of an event in a manner consistent with applicable health information and education privacy laws. Further, in conjunction with local public health officials and contact tracers, schools must have in place a mechanism for notifying other schools should an athlete from one team test positive within 48 hours after competition with another team.

- Athletics departments, in consultation with institutional leadership, must evaluate the availability of, and accessibility to, local contact tracing resources. Where the availability of local contact tracing resources is inadequate, schools must train on-site personnel or procure contact tracing resources. Staff who complete formal training in contact tracing can be an invaluable resource with respect to institutional risk-management efforts and resources.

This guidance is interim. These guidelines and considerations are based on the best available public health data at this time, international best practices currently employed, and the practical realities of managing operations; as new data and practices emerge, the guidance will be updated. Additionally, the guidelines and considerations do not reflect the full scope of issues that collegiate athletic programs will need to address.

Institutions of higher education and athletic departments must also follow standards adopted by the NCAA, including the NCAA’s guidelines for resocialization of sports,\(^5\) and their athletic conference, if applicable. To the extent those guidelines impose
additional restrictions or requirements beyond this guidance, are stricter than these guidelines, institutions of higher education and athletic departments must adhere to the stricter requirements.

Implementation of this guidance as part of a phased reopening will depend on improving or favorable local epidemiologic trends and health care capacity availability of IHE and community testing resources, and adequate IHE preparedness to respond to case and outbreak investigations. All decisions about following this guidance should be made in collaboration with local public health officials and other authorities.

Implementation of this guidance should be tailored for each setting, including adequate consideration of programs operating at each institution and the needs of student-athletes and workers. Administrators should engage relevant stakeholders—including student-athletes, their families, staff and labor partners in the school community—to formulate and implement plans.

Even with adherence to physical distancing, convening in a setting that brings multiple different communities to engage in the same activity, particularly indoors or with close contact, carries a higher risk for widespread transmission of the COVID-19 virus, and may result in increased rates of infection, hospitalization, and death, especially among more vulnerable populations.

Athletic facilities must therefore limit occupancy to essential personnel, such as players, coaches, trainers, security, and event staff. The California Department of Public Health, in consultation with local departments of public health, will review and assess the impact of these imposed limits on public health and provide further direction as part of a phased-in restoration of leisure activities.

### Required Use of Face Coverings

On June 18, CDPH issued [Guidance on the Use of Face Coverings](https://covid19.cdph.ca.gov/guidance/facecoverings/index.html), which broadly requires the use of face coverings for both members of the public and workers in all public and workplace settings where there is a high risk of exposure. All of those involved in collegiate athletics, including coaches, staff, media and players not engaged in play, are subject to these requirements. Details on face coverings can be found on page 3 of this guidance.

The following areas have been identified as overarching issues that must be adhered to in planning for the resumption of collegiate athletics.
1. Athletic Facility-Specific Plan

- Establish a written, facility-specific COVID-19 prevention plan at every facility, perform a comprehensive risk assessment of all work and athletic areas, and designate a person at each facility to implement the plan.

- Designate a person responsible for responding to COVID-19 concerns for athletics overall, and for each team or sport. All coaches, staff, and student-athletes should know who their COVID-19 contact person is and how to contact them.

- Incorporate the CDPH Guidance for the Use of Face Coverings into the Athletic Facility-Specific Plan that includes a policy for handling exemptions.

- Identify contact information for the local health department where the facility is located for communicating information about COVID-19 outbreaks among workers or student-athletes.

- Train and communicate with workers, worker representatives, and student-athletes on the plan and make the plan available to workers and their representatives.

- Regularly evaluate the facility for compliance with the plan and document and correct deficiencies identified.

- Investigate any COVID-19 illness and determine if any work-related or athletic-related factors could have contributed to risk of infection. Update the plan as needed to prevent further cases.

- Implement the processes and protocols when a workplace has an outbreak, in accordance with CDPH guidelines.

- Adhere to the guidelines below. Failure to do so could result in illnesses that may cause operations to be temporarily closed or limited.

2. Additional Topics for Student-Athlete and Worker Training

Student-athletes, staff, and coaches should be provided an education session on COVID-19 upon or before return to campus, including additional topics such as:

- Risks COVID-19 poses for athletes

- Proper use of face coverings, including:
Face coverings are not personal protective equipment (PPE).

Face coverings can help prevent exposure of people near the wearer and the wearer, but do not replace the need for physical distancing and frequent handwashing.

Face coverings must cover the nose and mouth.

Workers should wash or sanitize hands before and after using or adjusting face coverings.

Avoid touching eyes, nose, and mouth.

Face coverings must not be shared and should be washed or discarded after each shift.

- Information contained in the **CDPH Guidance for the Use of Face Coverings**, which mandates the circumstances in which face coverings must be worn and the exemptions, as well as any policies, work rules, and practices the employer has adopted to ensure the use of face coverings. Training should also include the IHE’s policies on how people who are exempted from wearing a face covering will be handled.

- Information on employer or government-sponsored leave benefits workers may be entitled to receive that would make it financially easier to stay at home. See additional information on **government programs supporting sick leave and worker’s compensation for COVID-19**, including worker’s sick leave rights under the **Families First Coronavirus Response Act** and worker’s rights to workers’ compensation benefits and presumption of the work-relatedness of COVID-19 pursuant to the Governor’s **Executive Order N-62-20 while that Order is in effect**.

- Importance of physical distancing
- Protocols for reporting any symptoms
- Any facility specific changes

### 3. Individual Control Measures and Screening

- Establish effective procedures for regular periodic testing of athletes and workers that work with athletes for COVID-19 in accordance with any published CDC guidance and in discussion with the local health department.

- Limit building or facility entry points when possible.

- Provide symptom and health screenings for all workers and student-athletes entering the facility or event. Make sure the
temperature/symptom screener avoids close contact with workers or student-athletes to the extent possible.

- If requiring self-screening at home, which is an appropriate alternative to providing it at the establishment, ensure that screening was performed prior to the worker leaving home for their shift and follows CDC guidelines.
- Workers should wear gloves when handling items contaminated by body fluids.
- Coaches or referees moving items used by athletes (e.g., balls) or handling trash bags should use disposable gloves (and wash hands before putting them on and after removing them) or wash hands before and after handling shared items.
- Limit any nonessential visitors, staff, and volunteers as much as possible. No spectators are currently permitted during training or competition.

**Testing**

- Regular periodic COVID-19 testing of athletes and support staff must be established and implemented by the IHE.
- Competition between teams without spectators is permitted to begin only if:
  - IHE can provide COVID-19 testing and results within 72 hours of competition in high contact risk sports.6
  - Based on current evidence and standards, PCR is the standard testing method for both baseline and ongoing surveillance testing. Testing strategies are always contingent on the availability of ample testing supplies, laboratory capacity, efficient turnaround time and convenient access to testing. If PCR testing in a community is prioritized for symptomatic individuals (updated testing priority criteria on CDPH website), if PCR supplies/turnaround time are compromised, or as testing technology evolves, alternative strategies may need to be considered.
- Note that the test only indicates if there is a current viral infection at that point in time. It is possible to test negative if the sample is collected early in an infection.
4. Cleaning and Disinfecting Protocols

- Perform thorough cleaning and disinfection of surfaces in high-traffic areas, including locker rooms, dugouts, benches, stairwell handrails, chairs, doors/door handles, etc., as appropriate.

- Use of shared objects and equipment (e.g., balls, bats, gymnastics equipment, golf flags) should be avoided, or cleaned between use by each individual if possible. Do not let players share towels, clothing, or other items they use to wipe their faces or hands.
  
  - Avoid sharing equipment or balls as much as possible. For applicable sports, balls should be rotated on a regular basis to limit contact by multiple users until disinfected. For example, in baseball and softball umpires should limit their contact with the ball unless wearing gloves, and catchers should retrieve foul balls and passed balls where possible. Balls used in infield/outfield warm-up should be isolated from a shared ball container.

- Make sure there are adequate supplies of items to minimize sharing of equipment to the extent possible, for example by labeling and assigning them to individuals (e.g., protective gear, balls, bats, water bottles); otherwise, limit use of supplies and equipment to one group of players at a time and clean and disinfect between use.

- Identify a staff member or volunteer to ensure proper cleaning and disinfection of objects and equipment, particularly for any shared equipment or frequently touched surfaces.

- Clean touchable surfaces between shifts or between users, whichever is more frequent, including but not limited to game clocks, scoreboards, rakes, counters, common pens for sign-in sheets, etc.

- Avoid sharing audio equipment, phones, tablets, pens, and other work supplies wherever possible.

- Discontinue shared use of audio headsets and other equipment between workers unless the equipment can be properly disinfected after use. Consult equipment manufacturers to determine appropriate disinfection steps, particularly for soft, porous surfaces such as foam earmuffs.

- Develop and implement a schedule for increased, routine cleaning and disinfection.

- Provide time for workers to implement cleaning practices during their shift. Cleaning assignments should be assigned during working hours as part of the workers’ job duties.
• Procure options for third-party cleaning companies to assist with the increased cleaning demand, as needed.

• Ensure sanitary facilities always stay operational and stocked, and provide additional soap, paper towels, and hand sanitizer when needed.

• When choosing disinfecting chemicals, athletic departments should use products approved for use against COVID-19 on the Environmental Protection Agency (EPA)-approved list and follow product instructions. Use disinfectants labeled to be effective against emerging viral pathogens, diluted household bleach solutions (5 tablespoons per gallon of water), or alcohol solutions with at least 70% alcohol that are appropriate for the surface. Provide workers training on the chemical hazards, manufacturer’s directions, ventilation needed, and Cal/OSHA requirements for safe use. Workers using cleaners or disinfectants should wear gloves and other protective equipment as required by the product instructions. The California Department of Pesticide Regulation’s requirements for safe use of disinfectants must be followed. Follow the asthma-safer cleaning methods recommended by the Department of Public Health.

• Indoor facilities should increase fresh air circulation by opening windows or doors, if possible. Do not open windows and doors if doing so poses a safety or health risk (e.g., risk of falling or triggering asthma symptoms) to players or others using the facility.

• Consider installing portable high-efficiency air cleaners, upgrading the building’s air filters to the highest efficiency possible, and making other modifications to increase the quantity of outside air and ventilation in all working areas.

• Install hand sanitizer dispensers, touchless if possible, at entrances and high contact areas.

• Follow CDC guidelines to ensure that all water systems are safe to use after a prolonged facility shutdown to minimize the risk of Legionnaires’ disease and other diseases associated with water.

5. Physical Distancing Guidelines

• Prioritize outdoor practice and play, as much as possible.

• Train in Cohorts. IHEs should establish cohorts as a strategy to minimize the potential spread of COVID-19. A cohort may be composed of six to 12 individuals, all members of the same team, who consistently work out and participate in activities together. Cohorts should avoid mixing with other groups.
• Keep different cohorts separate. Consider using signs, cones, or tape to make dividing lines clear.

• Particularly for athletes in high contact risk sports as defined previously, to the greatest extent practicable provide dedicated on-campus housing and classrooms separate from the rest of campus to minimize transmission risks during training and conditioning.

• Athletes and coaches should maintain at least six feet of separation from others when not on the field of play or otherwise engaged in play/activity, where feasible.
  o Create distance between players when explaining drills, rules of the game, or huddling.
  o Limit the number of players sitting in confined player seating areas (e.g., dugouts) by allowing players to spread out into spectator areas if more space is available.
  o Prohibit unnecessary physical contact such as high fives, handshake lines, and other physical contact with teammates, opposing teams, coaches, umpires, and fans. Coaches should regularly review physical distancing rules with athletes.
  o Consider providing physical guides, such as signs and tape on floors or playing fields, to make sure that coaches and players remain at least six feet apart.
  o Maintain at least six feet of distance between players while participating in the sport whenever possible (e.g., during warm-up, skill-building activities, simulation drills).

• Officials should maintain six feet of separation from others and when interacting with athletes and coaches off the field of play. Officials should avoid exchanging documents or equipment with players and coaches. This may require digital entry of lineups, and other adjustments.

• If practice or competition facilities must be shared, consider increasing the amount of time between practices and competitions to allow for one group to leave before another group enters the facility. For facilities that may be shared with the broader campus community, dedicate separate time for team use. If possible, allow time for cleaning and/or disinfecting.

• Physical distancing protocols should be used in any high-density, high-traffic areas.

• Meetings and trainings should be conducted virtually, or outdoors, and in areas that allow for appropriate physical distancing between staff, athletes or other workers.
• Stagger breaks, in compliance with wage and hour regulations where relevant, to maintain physical distancing protocols.
• Consider offering workers who request modified duties options that minimize their contact with athletes, coaches, officials, and other workers.

6. Food and Dining
• All players, coaches, and referees should bring their own individual water or drinks. Drinks should be labeled to indicate whom the drink is intended for. Do not provide team water coolers or shared drinking stations. Teams may also provide bottled water.
• If food is provided, have pre-packaged boxes or bags for players instead of a buffet or family-style meal.
• Prohibit the use of:
  o Self-service condiment caddies, utensil caddies, napkins, lids, straws, water pitchers, to-go containers, etc.
  o Self-service machines, including ice, soda, frozen yogurt dispensers, etc.
  o Self-service food areas, such as buffets, salsa bars, salad bars, etc.
• Follow the California Department of Public Health and Cal/OSHA safety guidance set out for dine-in restaurants.

7. Travel During Competition
• Travel should be limited to essential personnel (e.g., athletes, coaches, medical staff).
• When possible, teams should drive to events.
  o If using more than one vehicle, travel parties should be split according to those already with the closest contact (e.g., cohorts).
  o Face coverings must be worn and removed only minimally for eating or drinking.
  o If traveling by bus, try to keep seats open in front of and behind each person (e.g., using a “checkerboard” pattern).
• When air travel is necessary, it should be on a carrier with robust infection control methods (e.g., required face coverings for all passengers and flight personnel), and handwashing or using hand sanitizer should occur frequently, per CDC guidelines.
8. Return to Facility or Training After a Positive Test

- Advise sick staff and student-athletes not to return until they have met CDC criteria to discontinue home isolation, including 24 hours with no fever (without fever reducing medication), symptom improvement, and 10 days since symptoms first appeared or since test conducted.
- Student-athletes should work with their medical provider and any team medical staff member to determine how to be cleared to safely return to training.
- Return to activity in all cases should allow an acclimatization process.

---

1 The Centers for Disease Control and Prevention provides additional information specific to universities and colleges.
2 Unless exempted by state guidelines for specific public settings
3 Unless directed otherwise by a worker or healthcare provider
4 This guidance adopts the “high risk sport” classification specified in the National Collegiate Athletic Association’s guidelines for resocialization of sports which include: basketball, field hockey, football, ice hockey, lacrosse, rowing, rugby, soccer, squash, volleyball, water polo, and wrestling.
5 NCAA: Resocialization of Collegiate Sport: Developing Standards for Practice and Competition, 7/16/20.

#### Pending Caseload (Jan. 2018 - Jun. 2020)

![Pending Caseload Chart](image)

Source: BPPE Complaint Caseload Tracking Log
STUDENT IMPACT (January June 2020)

Investigators’ advocacy on behalf of students resulted in the following:

- Total of $84,634.83 in refunds to students or to their federal student aid account.
- Students received degree, diploma, proofs-of-training, certificate, license, and transcripts.
- Students re-enrolled in program.
- Students allowed to retake course at no additional cost.
- Student accounts transferred from collections back to the school.
- Students referred for Student Tuition Recovery Fund.
- Students placed in externships.
- Compliance obtained or school policy updated.
