CSSH Graduate Programs General Regulations (http://www.northeastern.edu/cssh/graduate/current_students)

This is an interdisciplinary social science program that combines several social science and legal theoretical perspectives with both quantitative and qualitative research methodologies. The wide-ranging faculty in the School of Public Policy and Urban Affairs can support students' research and dissertations in many fields—urban policy and regional economic development; sustainability and climate change; health policy; crime, social justice, and inequality; and the intersection of law and policy. Students work with faculty members to formulate a plan of study within their field of concentration by choosing courses from graduate programs offered in the policy school, the College of Social Sciences and Humanities, and in other colleges and schools at Northeastern University. Students also study a common body of knowledge developed in core courses on policy, research methods, and law. The school's research centers and faculty members' research projects provide opportunities for students to develop insight, experience, and synergies to help with their own research goals. The college and school offer a high level of support allowing all students to be devoted full-time to their studies and research.

Doctoral Degree Candidacy

Complete all required course work with a minimum 3.500 grade-point average (GPA) in the core courses and pass the comprehensive examinations. Students entering with a JD or master's degree must complete 47 semester hours.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Comprehensive examination
Seminars
Annual review
PhD candidacy
Dissertation committee
Dissertation proposal
Dissertation defense

Core Requirements

A grade of B+ or higher is required in each course.

Code	Title	Hours
Seminar		
POLS 7204	Seminar in Public Policy	4
PPUA 7976	Directed Study	1-4
Research and Statistical Methods		
INSH 6500	Statistical Analysis	4
INSH 6302	Qualitative Methods	4
INSH 6300	Research Methods in the Social Sciences	4
Advanced Methods		
Complete one of the following. An additional concentration elective may be taken in lieu of the advanced methods elective:		4
INSH 7500 or INSH 7600	Advanced Quantitative Analysis Advanced Methodological and Quantitative Techniques	

Experiential Research Residency

A PhD research residency or waiver is required.

Code	Title	Hours
PPUA 9980	Experiential PhD Research Residency	0

Concentrations

Complete one of the following concentrations:

- Sustainability and Resilience (p. 440)
- Health Policy and Management (p. 440)
- Urban and Regional Policy (p. 440)

SUSTAINABILITY AND RESILIENCE

CSSH Graduate Programs General Regulations (http://www.northeastern.edu/cssh/graduate/current_students)

We live in an increasingly interconnected global environment where people, goods, ideas, and conflicts traverse borders with rising frequency. Leaders in the activist, policy, and academic spheres must learn not only how to critically analyze these phenomena but also to envisage harnessing their constructive potential. The Master of Arts in International Affairs is an interdisciplinary graduate program dedicated to preparing tomorrow's global citizens.

A holistic approach to enhancing our understanding of the world must span the limits of any one academic field and embrace cross-disciplinary analytical competencies. Spanning several social sciences and humanities, our courses are taught by leading scholars who research democratization, gender, globalization, ethnic conflict and cooperation, human rights and international law, international relations, social activism, social justice, and many other topics. Through its core courses, its two thematic emphases—globalization, development, and social justice and international public policy—as well as global, policy, and methodological electives, this graduate program allows students to pursue a variety of themes.

The master's program offers an optional cooperative education experience ("co-op") to eligible students. Cooperative education is central to both the Northeastern experience and to the College of Social Sciences and Humanities experiential liberal arts framework. Northeastern's

signature co-op ecosystem provides qualified master's students with six-month work experiences in businesses, nonprofits, and government agencies in Boston and across the United States. Graduate students take their work from campus learning spaces, apply their knowledge outside of the classroom, and then bring knowledge and skills gained in community learning spaces back to our campus learning spaces during the cocurricular experiential integration course.

Academic Standing/Progress

Students in the program are monitored for academic progress. Those students whose grade-point average (GPA) falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours

CSSH Graduate Programs General Regulations (https://www.northeastern.edu/cssh/graduate/current_students)

The Master of Public Administration (MPA) is the management and leadership degree for those seeking to serve the public good. The program seeks to equip its students with skills in policy analysis, program evaluation, research methods, and written and verbal communications. Students have an opportunity to develop competencies in budgeting and human resources, organizational management and leadership, and the interplay between ethics and accountability in a diverse society. Throughout the degree program, students gain career-oriented experience through internships, small group projects, and other interactions with professionals in the field. These experiences are designed to enable the Northeastern MPA graduate to move into a wide array of public and nonprofit sector positions at the local, state, national, and international levels.

Mission Statement

The mission of the MPA program at Northeastern University is to serve the needs of the public affairs community, including students, working professionals, faculty, and researchers, by providing a practice-oriented and research-based graduate educational experience. The faculty pledges the best instruction available in a set of courses designed to integrate theoretical foundations with practical skills. The MPA program will prepare students to be effective in a dynamic and increasingly diverse

professional environment. We also commit ourselves to assisting students in every possible way to secure internships, postgraduate employment, and overall career advancement. Students, in turn, are expected to meet high levels of academic excellence combined with ethical and professional integrity. Committed to the ideals of public service and advancing the public interest, we seek students who share the same enthusiasm.

The MPA program offers an optional cooperative education experience ("co-op") to eligible students. Cooperative education is central to both the Northeastern experience and to the College of Social Sciences and Humanities experiential liberal arts framework. Northeastern's signature co-op ecosystem provides qualified master's students with six-month work experiences in businesses, nonprofits, and government agencies in Boston and across the United States. Graduate students take their work from campus learning spaces, apply their knowledge outside of the classroom, and then bring knowledge and skills gained in community learning spaces back to our campus learning spaces during the cocurricular experiential integration course.

The Northeastern University MPA program is nationally accredited by NASPAA.

Academic Standing/Progress

Students in the program are monitored for academic progress. Those students whose grade-point average (GPA) falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

CSSH Graduate Programs General Regulations (http://www.northeastern.edu/cssh/graduate/current_students)

The Master of Public Policy (MPP) is the recognized industry standard for those seeking careers in public policy analysis and design. As such, a typical MPP degree emphasizes the analysis of data and other relevant information to enable graduates to assess public problems, develop appropriate policy responses, and evaluate program effectiveness. MPP graduates enter careers as policy analysts, researchers, consultants, program evaluators, and policymakers in a broad range of public and nonprofit settings, ranging from the local to the international, and in the private sector. At Northeastern, the MPP joins our long-established and nationally accredited Master of Public Administration (MPA) as well as our Master of Science in Urban and Regional Policy (MURP), Urban

Informatics, and International Affairs. As such, MPP students will be part of a larger School of Public Policy and Urban Affairs community of great intellectual and policy area diversity.

The MPP program offers an optional cooperative education experience (co-op) to eligible students. Cooperative education is central to both the Northeastern experience and to the College of Social Sciences and Humanities experiential liberal arts framework. Northeastern's signature co-op ecosystem provides qualified master's students with six-month work experiences in businesses, nonprofits, and government agencies in Boston and across the United States. Graduate students take their work from campus learning spaces, apply their knowledge outside of the classroom, and then bring knowledge and skills gained in community learning spaces back to our campus learning spaces during the cocurricular experiential integration course.

CSSH Graduate Programs General Regulations (https://www.northeastern.edu/cssh/graduate/current_students)

The STEM-designated Master of Science in Urban Informatics (MSUI) degree couples comprehensive data analytics skills with an understanding of the big questions faced by cities in the 21st-century city. This cutting-edge program is built upon a unique cross-college

initiative, which offers comprehensive state-of-the-art training in the core skills of data analytics—including quantitative analysis, data mining, machine learning, and data visualization. Urban informatics students supplement training in these foundational skills with a specialized sequence of courses that address how data and technology are being used to tackle key social, infrastructural, and environmental challenges.

By combining a theoretically informed perspective of cities with advanced skills in accessing, managing, analyzing, and communicating insights from large complex, data sets, graduates are a part of the next wave of urban professionals ready to lead in the public, private, and nonprofit sectors. Given the continuous growth in urban data and technology, these professionals are essential to shaping the future of urban areas around the globe.

This program provides a uniquely integrated urban and informatics degree with a substantial experiential education component. The focus throughout is on practical application, and students have multiple opportunities to apply what they are learning.

The master's program offers an optional cooperative education experience ("co-op") to eligible students. Cooperative education is central to both the Northeastern experience and to the College of Social Sciences and Humanities experiential liberal arts framework. Northeastern's signature co-op ecosystem provides qualified master's students with six-month work experiences in businesses, nonprofits, and government agencies in Boston and across the United States. Graduate students take their work from campus learning spaces, apply their knowledge outside of the classroom, and then bring knowledge and skills gained in community learning spaces back to our campus learning spaces during the cocurricular experiential integration course.

Urban Planning and Policy, MS

The Master of Science in Urban Planning and Policy (MUPP) program trains leaders interested in building just and sustainable solutions to today's critical urban problems, including challenges of affordable housing provision, equitable and sustainable economic growth, sustainable transportation, and climate change adaptation and mitigation. This innovative program combines the expertise in urban planning and policy analysis and data analytics of the School of Public Policy and Urban Affairs with expertise in physical planning, design, and data visualization at the School of Architecture. The core curriculum of the program provides students with a solid foundation in essential skills and concepts, including research design and statistics, economic analysis, legal foundations of urban planning and policy, and the history of urban development and urban planning. Students also have the opportunity to develop substantial expertise in a specialization area, including urban analytics, urban sustainability and resilience, urban design and physical planning, and urban development policy and planning.

The optional cooperative education experience (co-op) is available to eligible students. Cooperative education is central to both the Northeastern experience and to the College of Social Sciences and Humanities experiential liberal arts framework. Northeastern's signature co-op ecosystem provides qualified master's students with six-month work experiences in businesses, nonprofits, and government agencies in Boston and across the United States. Graduate students take their work from campus learning spaces, apply their knowledge outside of the classroom, and then bring knowledge and skills gained in community learning spaces back to our campus learning spaces during the cocurricular experiential integration course.

In addition to the co-op option, students in the MUPP program have opportunities to gain experience in the application of their knowledge and skills via internships, class projects, and a capstone research report. They graduate prepared for careers working for state and local government, federal agencies, community development corporations and other nonprofit organizations, research institutes, and as private-sector planning consultants.

This program is not accepting applicants until spring 2019.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Planning and Policy		
LPSC 5201		4
PPUA 6201	The 21st-Century City: Urban Opportunities and Challenges in a Global Context	4
PPUA 6502	Economic Institutions and Analysis	4
SUEN 6340	Topics in Urban Environmental Design	4
Research Design		
PPUA 6205	Research Design and Methodology in Urban and Regional Policy	4
Quantitative Techniques		
Students in the urban analytics focus area are encouraged to take PPUA 5301.		
Choose one from the following:		4
LPSC 7305	Research and Statistical Methods	
or INSH 6500	Statistical Analysis	
or POLS 7202	Quantitative Techniques	
or PPUA 5301	Introduction to Computational Statistics	

Focus Areas

Complete one of the following focus areas:

- Urban Design and Physical Planning (p. 67)
- Urban Analytics (p. 67)
- Sustainability and Resilience (p. 67)
- Urban Development Policy and Planning (p. 68)

URBAN DESIGN AND PHYSICAL PLANNING

Code	Title	Hours
Gateway Course		
ARCH 6340	Graduate Topics in Architecture	4
Tracks		
Complete one of the following tracks:		8
<i>Urban Design and Real Estate</i>		
ARCH 5310	Design Tactics and Operations	
ARCH 5530	Innovative Models in Real Estate Development and Design	
<i>Physical Planning and Design for Sustainable Urbanism</i>		
SUEN 7230	Urban Ecologies and Technologies 1	
SUEN 7240	Urban Ecologies and Technologies 2	
<i>Urban Experience Track</i>		
ARTG 5150	Information Visualization Principles and Practices	
ARTG		
Capstone		
SUEN 6120	Graduate Studio 2: Sustainable Urban Systems	6

URBAN ANALYTICS

Code	Title	Hours
Gateway Course		
PPUA 5262	Big Data for Cities	4
Required Courses		
ARTG 5150	Information Visualization Principles and Practices	4
PPUA 5263	Geographic Information Systems for Urban and Regional Policy	4
Capstone		
PPUA 7673	Capstone in Public Policy and Urban Affairs	4

SUSTAINABILITY AND RESILIENCE

Code	Title	Hours
Gateway Course		
LPSC 7312	Cities, Sustainability, and Climate Change	4
or SUEN 6310	Cities, Nature, and Design in Contemporary History and Theory	
Methods		
Complete one of the following:		4
PPUA 5261	Dynamic Modeling for Environmental Decision Making	
PPUA 5263	Geographic Information Systems for Urban and Regional Policy	
SUEN 7230	Urban Ecologies and Technologies 1	
Capstone		
PPUA 7673	Capstone in Public Policy and Urban Affairs	4
Elective		
Complete one of the following:		4
PPUA 5260	Ecological Economics	
PPUA 5261	Dynamic Modeling for Environmental Decision Making	
PPUA 7231	Transportation Policy	
PPUA 7234	Land Use and Urban Growth Policy	
PPUA 7249	Urban Coastal Sustainability	
SUEN 6110	Graduate Studio 1: Sustainable Urban Sites	
SUEN 6120	Graduate Studio 2: Sustainable Urban Systems	
SUEN 6220	Implementation and Visualization for Urban Environments 2	
SUEN 6310	Cities, Nature, and Design in Contemporary History and Theory	
SUEN 6340	Topics in Urban Environmental Design	
SUEN 7230	Urban Ecologies and Technologies 1	
SUEN 7240	Urban Ecologies and Technologies 2	
SUEN 7320	Pro-Seminar: Issues in Designed Urban Environments	

URBAN DEVELOPMENT POLICY AND PLANNING

Code	Title	Hours
Gateway Course		
Complete one of the following:		4
PPUA 7230	Housing Policy	

PPUA 7231	Transportation Policy	
PPUA 7233	Contemporary Community Development	
Methods		
PPUA 5263	Geographic Information Systems for Urban and Regional Policy	4
or PPUA 7236	Introduction to Real Estate Development for Urban Policy Makers	
Capstone		
PPUA 7673	Capstone in Public Policy and Urban Affairs	4
Elective		
Complete one of the following:		4
PPUA 5270	Food Systems and Public Policy	
PPUA 6506	Techniques of Policy Analysis	
PPUA 6530	State and Local Public Finance	
PPUA 6551	Nonprofit Organizations and Social Change	
PPUA 7230	Housing Policy	
PPUA 7231	Transportation Policy	
PPUA 7232	Immigration and Urban America	
PPUA 7233	Contemporary Community Development	
PPUA 7234	Land Use and Urban Growth Policy	
PPUA 7236	Introduction to Real Estate Development for Urban Policy Makers	
SUEN 6110	Graduate Studio 1: Sustainable Urban Sites	
SUEN 6120	Graduate Studio 2: Sustainable Urban Systems	
SUEN 6340	Topics in Urban Environmental Design	

Electives

Code	Title	Hours
Complete two of the following:		8
ARCH 5310	Design Tactics and Operations	
ARCH 5530	Innovative Models in Real Estate Development and Design	
ARCH 6100	Graduate Skills Studio	
ARCH 6330	Seminar in Modern Architecture	
ARCH 6340	Graduate Topics in Architecture	
ARTG 5100	Information Design Studio 1: Principles	
ARTG 5120	Research Methods for Design	
ARTG 5130	Visual Communication for Information Design

CSSH Graduate Programs General Regulations (http://www.northeastern.edu/cssh/graduate/current_students)

The Master of Science in Urban and Regional Policy (MURP) seeks to equip students with the skills to solve today's critical urban problems through the use of policy analysis, research, and strategic action. Many of the major issues that societies face today—issues of climate change and sustainability, equity and social justice, and economic growth—have their roots in urban growth and change. Solutions to these issues require a multisystem approach that coordinates interventions in economic, environmental, sociocultural, political, spatial, and infrastructural systems in order to maximize impact. For example, revitalizing a distressed community requires connecting it to economic opportunity through transportation and economic development interventions, providing good-quality affordable housing, fostering social interaction through the creation of public space, encouraging the development of strong social institutions, and dealing with environmental concerns.

The MURP degree marries training in theories and frameworks of urban development with an understanding of urban politics and the way in which different policy strategies evolve through the interplay between branches and levels of government. Students have an opportunity to learn skills of policy analysis, economic analysis, quantitative and qualitative research, and oral and written communication. Moreover, students have opportunities to gain experience in the application of their knowledge and skills through internships, co-op, class projects, and a capstone research report. Students graduate and enter the workforce with a unique set of perspectives, skills, experiences, and professional connections. Many go on to careers working for state and local government, federal agencies, community development corporations and other nonprofit organizations, research institutes, and as private-sector policy consultants.

The optional cooperative education experience ("co-op") is available to eligible students. Cooperative education is central to both the Northeastern experience and to the College of Social Sciences and Humanities experiential liberal arts framework. Northeastern's signature co-op ecosystem provides qualified master's students with six-month work experiences in businesses, nonprofits, and government agencies in Boston and across the United States. Graduate students take their work from campus learning spaces, apply their knowledge outside of the classroom, and then bring knowledge and skills gained in community learning spaces back to our campus learning spaces during the cocurricular experiential integration course.

The program is not accepting applicants for Spring 2019.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Quantitative Techniques		
LPSC 7305 or POLS 7202 or INSH 6500	Research and Statistical Methods Quantitative Techniques Statistical Analysis	4
Policy		
PPUA 6201	The 21st-Century City: Urban Opportunities and Challenges in a Global Context	4
PPUA 6204	Urban Development and Politics	4
PPUA 6502	Economic Institutions and Analysis	4

Evaluation and Research

PPUA 6205	Research Design and Methodology in Urban and Regional Policy	4
or INSH 6300	Research Methods in the Social Sciences	

Research Toolkits

Complete 4 semester hours from the following. An additional elective from the Course List may be taken in lieu of Research Toolkits. 4

Minimum 3.000 GPA required

Environmental Science and Policy, MS

The Master of Science in Environmental Science and Policy program emphasizes a broadly interdisciplinary and synthetic approach that integrates knowledge in the environmental sciences (conservation biology, climate change, fisheries science, ecosystem function, biodiversity, restoration ecology) with the social sciences (policy, economics, sociology, political science, and development) and humanities (environmental history, philosophy, and ethics). The goal of the program is to equip professionals with substantive breadth in knowledge and skills at the intersection of environmental science and policy. The program focuses on training students to think critically about the underlying causes of environmental problems and understanding the reciprocal relationships between coupled human-natural ecosystems and the interconnections between social and technological innovations. The program explores practical approaches and potential solutions that decision makers need to evaluate in policy debates related to promoting environmental sustainability.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Seminars		
PPUA 6101	Environmental Science and Policy Seminar 1	4
ENVR 6102	Environmental Science and Policy Seminar 2	4

Skills Courses

Complete 6-8 semester hours from the following. At least one course needs to be taken from the College of Science Skills Course List and one course from the College of Social Sciences and Humanities Skills Course List. 6-8

College of Science Skills Course List

EEMB 5130	Ecological Dynamics
EEMB 5522	Experimental Design Marine Ecology
ENVR 5210	Environmental Planning
ENVR 5250	Geology and Land-Use Planning
ENVR 5260	Geographical Information Systems
ENVR 5400	Marine Science Policy and Ethics
ENVR 6500	Biostatistics

College of Social Sciences and Humanities Skills Course List

LPSC 6313	Economic Analysis for Law, Policy, and Planning
LPSC 7215	Advanced Quantitative Techniques
LPSC 7305	Research and Statistical Methods
LPSC 7311	Strategizing Public Policy
POLS 7201	Research Design
PPUA 5260	Ecological Economics
PPUA 5261	Dynamic Modeling for Environmental Decision Making
PPUA 5263	Geographic Information Systems for Urban and Regional Policy
PPUA 5301	Introduction to Computational Statistics

PPUA 6205	Research Design and Methodology in Urban and Regional Policy
PPUA 6207	Research Toolkit for Urban and Regional Policy: Survey Techniques
PPUA 6209	Research Toolkit for Urban and Regional Policy: Working with Datasets
PPUA 6210	Research Toolkit for Urban and Regional Policy: Cost/Benefit Analysis
PPUA 6212	Research Toolkit for Urban and Regional Policy: Project Management
PPUA 6213	Research Toolkit for Urban and Regional Policy: Data Visualization
PPUA 6216	Research Toolkit for Urban and Regional Policy: Grant Writing
PPUA 6502	Economic Institutions and Analysis
PPUA 6506	Techniques of Policy Analysis
PPUA 6509	Techniques of Program Evaluation
PPUA 7237	Advanced Spatial Analysis of Urban Systems
SOCL 7211	Research Methods

Electives

Any skills course not taken to fulfill the skills courses requirement can be taken as an elective. Students must take three electives from the College of Science and three from the College of Social Science and Humanities. Students may petition to enroll in other relevant graduate courses offered by other schools at Northeastern University.

COLLEGE OF SCIENCE ELECTIVE LIST

Code	Title	Hours
Complete three from the following:		12
EEMB 5518	Ocean and Coastal Processes	
EEMB 5528	Marine Conservation Biology	
EEMB 5536	Ocean and Coastal Sustainability	
EEMB 5548	Sociobiology	
ENVR 5210	Environmental Planning	
ENVR 5250	Geology and Land-Use Planning	

COLLEGE OF SOCIAL SCIENCES AND HUMANITIES ELECTIVE LIST

Code	Title	Hours
Complete three from the following:		12
LPSC 7311	Strategizing Public Policy	
LPSC 7312	Cities, Sustainability, and Climate Change	
PHTH 5214	Environmental Health	
PHTH 5230	Global Health	
PHTH 5440	Community-Based Participatory Research: Environmental Health	
PPUA 5260	Ecological Economics	
PPUA 5262	Big Data for Cities	
PPUA 5264	Energy Transitions and Climate Resilience: Technology, Policy, and Social Change	
PPUA 5266	Urban Theory and Science	
PPUA 5270	Food Systems and Public Policy	
PPUA 5275	Philanthropy and Civil Society	
PPUA 5302	Information Design and Visual Analytics	

PPUA 5390	Special Topics in Public Policy and Urban Affairs
PPUA 6201	The 21st-Century City: Urban Opportunities and Challenges in a Global Context
PPUA 6204	Urban Development and Politics
PPUA 6505	Public Budgeting and Financial Management
PPUA 6506	Techniques of Policy Analysis
PPUA 6522	Administrative Ethics and Public Management
PPUA 6551	Nonprofit Organizations and Social Change
PPUA 6552	The Nonprofit Sector in Civil Society and Public Affairs
PPUA 6553	Nonprofit Financial Resource Development
PPUA 6862	Internship with Research
PPUA 6966	Practicum
PPUA 7225	The Open Classroom: Public Debates on Public Policy
PPUA 7230	Housing Policy
PPUA 7234	Land Use and Urban Growth Policy
PPUA 7239	Problems in Metropolitan Policymaking
PPUA 7249	Urban Coastal Sustainability
PPUA 7231	Transportation Policy
PPUA 7336	Social Capital and Resilience
PPUA 7346	Resilient Cities
PPUA 7673	Capstone in Public Policy and Urban Affairs
SOCL 7211	Research Methods
SOCL 7230	Political Ecology of Global Capitalism
SOCL 7235	Urban Sociology
SOCL 7243	Sociology of Health and Illness
SOCL 7257	Contemporary Issues in Sociology
SOCL 7267	Environment, Health, and Society
SOCL 7287	Social Movements in Health

Program Credit/GPA Requirements

Note: Typically, students will complete 12–16 semester hours of seminar and skills courses and 18–24 semester hours of electives.

36 total semester hours required

Minimum 3.000 GPA required

Engineering and Public Policy with Concentration in Infrastructure Resilience, MS

The purpose of this degree is to provide students with a background in engineering with the tools necessary to conduct robust policy analysis. It includes required core courses from the Department of Civil and Environmental Engineering and the School of Public Policy, complemented by electives in engineering and public policy, which can be met by two courses and a master's report (recommended), or by one course and a thesis, or by three courses. A minimum of 16 semester hours must be taken in the College of Engineering.

Degree Requirements	With Report	With Thesis	Course Work Only
Required core courses	20 SH	20 SH	20 SH
Other electives	8 SH	4 SH	12 SH
Master of Science report/thesis	4 SH	8 SH	
Minimum semester hours required	32 SH	32 SH	32 SH

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 229).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Engineering and Public Policy with Concentration in Infrastructure Resilience with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Engineering and Public Policy with Concentration in Infrastructure Resilience in addition to earning a Graduate Certificate in Engineering Leadership. Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16 semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require 20 hours of advisor-approved infrastructure resilience technical courses.

Engineering Leadership (p. 222)

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Infrastructure Resilience		
CIVE 7110	Critical Infrastructure Resilience	4
Environmental Systems Modeling		
Complete 4 semester hours from the following:		4
CIVE 5261	Dynamic Modeling for Environmental Investment and Policymaking	
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
CIVE 5280	Remote Sensing of the Environment	
CIVE 5699	Special Topics in Civil Engineering (Climate Science and Technology Adaptation and Policy)	
CIVE 7388	Special Topics in Civil Engineering (Informatics in Civil Engineering)	
CIVE 7392	Special Topics in Environmental Engineering (Agent-based Modeling)	
Economics		
Complete 4 semester hours from the following:		4
ECON 7210	Applied Microeconomic Policy Analysis	

LPSC 6313	Economic Analysis for Law, Policy, and Planning	
Public Policy and Analysis		
Complete 4 semester hours from the following:		4
LPSC 7311	Strategizing Public Policy	
PPUA 6506	Techniques of Policy Analysis	
PPUA 6509	Techniques of Program Evaluation	
Statistics		
Complete 4 semester hours from the following:		4
CIVE 7100	Time Series and Geospatial Data Sciences	
IE 6200	Engineering Probability and Statistics	
IE 7280	Statistical Methods in Engineering	
LPSC 7215	Advanced Quantitative Techniques

CSSH Graduate General Regulations (https://www.northeastern.edu/cssh/graduate/current_students)

The Graduate Certificate in Public Policy Analysis seeks to provide current Northeastern students in a variety of graduate programs outside of the Master of Public Policy program with the tools necessary to analyze and to shape public policy at the local, state, and national levels. Students have an opportunity to gain an understanding of the political and legal processes of policymaking, develop skills central to conducting research on policy questions, and learn techniques for evaluating the effectiveness of competing policies.

Academic Standing/Progress

Students in the program are monitored for academic progress. Those students whose grade-point average (GPA) falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

Program Requirements

Core Requirements *

Code	Title	Hours
Analysis Methods and Skills		
Complete 8 semester hours from the following:		8
PPUA 6502	Economic Institutions and Analysis	
LPSC 7311	Strategizing Public Policy	
or PPUA 6506	Techniques of Policy Analysis	
PPUA 5260	Ecological Economics	
PPUA 5261	Dynamic Modeling for Environmental Decision Making	
PPUA 5262	Big Data for Cities	
PPUA 5263	Geographic Information Systems for Urban and Regional Policy	
PPUA 5302	Information Design and Visual Analytics	
PPUA 6205	Research Design and Methodology in Urban and Regional Policy	
PPUA 6509	Techniques of Program Evaluation	
PPUA 7237	Advanced Spatial Analysis of Urban Systems	

Policy

Complete 4 semester hours from the following:		4
PPUA 5264	Energy Transitions and Climate Resilience: Technology, Policy, and Social Change	
PPUA 5270	Food Systems and Public Policy	
PPUA 6525	Institutions and Public Policy	
PPUA 7230	Housing Policy	
PPUA 7231	Transportation Policy	
PPUA 7232	Immigration and Urban America	
PPUA 7234	Land Use and Urban Growth Policy	
PPUA 7239	Problems in Metropolitan Policymaking	
PPUA 7240	Health Policy and Politics	
PPUA 7244	Comparative Public Policy and Administration	
PPUA 7245	Education Policy in the United States

CSSH Graduate Programs General Regulations (https://www.northeastern.edu/cssh/graduate/current_students)

The Graduate Certificate in Nonprofit Sector, Philanthropy, and Social Change is a response to recent developments in social change theory, practice, and funding that are placing new demands and expectations on social change actors in the nonprofit, public, and private sectors, including nonprofit leaders, philanthropists, policymakers, and corporate social responsibility managers. These developments include the emergence of hybrid, cross-sector business models and new intermediary mechanisms for channeling the flow of capital into social change; new expectations and standards for performance measurement, transparency, and accountability; more sophisticated use of data and technology to support decision making, evaluation, and continual improvement; decreased public funding for traditional nonprofit activities; and the emergence of social media as a vehicle for mobilizing people and resources. The certificate enables social change professionals in all sectors to respond to these changes more effectively and will distinguish itself from other nonprofit certificate programs by focusing on the relationship between social program implementation and funding.

The certificate is a professionally oriented, application-based program for students seeking leadership positions in nonprofit organizations or in a public agency that deals extensively with nonprofits. The curriculum is designed to address the distinctive features and practices of the nonprofit sector and emphasizes management techniques helpful to nonprofit leaders.

Academic Standing/Progress

Students in the program are monitored for academic progress. Those students whose GPA falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

CSSH Graduate General Regulations (https://www.northeastern.edu/cssh/graduate/current_students)

With 75 percent of the world's population projected to be living in cities by 2050, the need for professionals in urban planning and related careers will only increase. The Graduate Certificate in Urban Analytics seeks to prepare students outside of the Master of Science in Urban Informatics program to manage the progressively complex issues involved with rapidly expanding data and technological resources in cities. As Claire Lane of the City of Boston recently noted, "The blueprints for great cities are increasingly anchored in big data, expressed in GIS [Geographic Information Systems] and codified in coherent policy." Successful graduates with an urban analytics certificate have skills in each of these areas, which prepares them to be professionals ready to shape the future of cities across the globe.

Students are trained with the practical and theoretical knowledge necessary to understand the intricacies of interconnected urban systems and to analyze how these systems work together to create sustainable, resilient, and just cities. The curriculum emphasizes the expertise needed to bridge emerging technological capacities and traditional policymaking processes. Students cultivate applied skills in visual presentation, analysis, and modeling of new data sets—all of which helps to inform investment and policymaking. Inspired by Northeastern's leadership in experiential education, students use Boston and cities around the world as learning labs.

ACADEMIC STANDING/PROGRESS

Students in the program are monitored for academic progress. Those students whose grade-point average (GPA) falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled

that if their GPA does not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

CSSH Graduate Programs General Regulations (https://www.northeastern.edu/cssh/graduate/current_students)

The Graduate Certificate in Urban Studies provides a foundation in the fundamentals of urban and regional policy theory for students outside the Master of Science in Urban and Regional Policy degree. It also allows students to pursue course work in a range of areas of concentration, including housing and community development, urban environmental sustainability, economic development, international comparative urban policy, and transportation. The certificate is not a stand-alone program but is anchored by and incorporated into participating graduate programs.

Academic Standing/Progress

Students in the program are monitored for academic progress. Those students whose grade-point average (GPA) falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

CSSH Graduate Programs General Regulations (http://www.northeastern.edu/cssh/graduate/current_students)

The JD/MS in Law and Public Policy (LPP) is a joint program with and open only to students in the Northeastern University School of Law designed to equip graduates with a unique blend of skills for navigating a complex and rapidly changing policy landscape. The program builds on students' legal training with a compelling blend of skills in applied public policy analysis, policy design, and strategic policy formation. Students also gain career-relevant experience through internships, small group capstone projects, and other interactions with professionals in the field. All are part of a learning process designed to enable the Northeastern law and public policy graduates to navigate, and to redefine, diverse policy areas.

Ideally, students apply to the joint LPP simultaneously. Those who apply and are admitted complete the MS in LPP after completing the first year in the School of Law. Applicants will also be considered once enrolled in the JD, provided the student applies for entry to the MS in LPP in the fall of year two or the fall of year three of the JD program. In these cases, permission of the School of Law is required.

Please note that the School of Public Policy and Urban Affairs offers approximately 20 MS graduate courses in the fall and spring semesters.

CSSH Graduate Programs General Regulations (<https://www.northeastern.edu/cssh/socant/wp-content/uploads/sites/19/2014/11/GENREGS.pdf>)

Uncertainty about the economy, healthcare, and the labor market. Ethnic conflicts in an era of rapid globalization. Concern for the environment.

Shifting gender arrangements as work and family come into conflict. Violence in school and even in houses of worship.

Never has there been a greater need for sociological research focused on the problems and issues of our time.

The Department of Sociology and Anthropology at Northeastern University offers a PhD degree in sociology within a flexible program attractive to students interested in both academic and nonacademic careers. Students pursuing the PhD degree earn an MA degree en route to completing the doctorate, unless they earned the MA in sociology elsewhere. The program seeks to provide students with the theoretical foundation and research skills needed to engage in a career in teaching and research, in the public sector, or in industry. Thirty-two faculty members bring a wide range of substantive interests, organized around four specialization areas: the sociology of gender; globalization; environment and health; and urban sociology. Apart from these formal areas of concentration, the department has extraordinary strengths in inequality and social movements.

Our faculty have won numerous prizes for excellence in the classroom, and many have also played leadership roles in establishing prestigious centers and interdisciplinary programs on Northeastern's campus.

The Department of Sociology and Anthropology is a founding unit of Northeastern's School of Public Policy and Urban Affairs, which is dedicated to providing advanced research opportunities in a multidisciplinary environment. The department also maintains strong ties with the Brudnick Center for the Study of Conflict and Violence; the Women's, Gender, and Sexuality Studies program; the Kitty and Michael Dukakis Center for Urban and Regional Policy; the Northeastern Environmental Justice Research Collaborative; the Social Science Environmental Health Research Institute; and PhD in Public Policy program.

Programs

Doctor of Philosophy

- Sociology (p. 455)
- Sociology—Advanced Entry (p. 457)

Sociology, PhD

The PhD program is designed to attract students who wish to develop a broad base of sociological knowledge, such as would equip students to embark on academic careers in leading institutions of higher education. The PhD program boasts a wide array of curricular strengths and diverse methodological offerings, all of which draw upon the department's emphasis on the study of social inequalities along lines of race, class, and gender. Faculty expertise ranges widely from domestic U.S. concerns to issues that affect groups, regions, and societies on a global scale.

The PhD program is organized around four key areas of specialization:

- Globalization (<http://www.northeastern.edu/cssh/socant/graduate/globalization>)
- Urban Sociology (<http://www.northeastern.edu/cssh/socant/graduate/urban-sociology>)
- Sociology of Gender (<http://www.northeastern.edu/cssh/socant/graduate/sociology-of-gender>)
- Environment and Health (<http://www.northeastern.edu/cssh/socant/graduate/environment-and-health>)

In addition to the graduate courses offered in the areas of specialization, the program offers a strong foundation in both theory (classical and

contemporary) and methods (quantitative and qualitative). Reflecting the program's distinctive emphasis on social inequalities, students are required to select a core elective in this field, choosing from a list of approved courses maintained by the department (e.g., Social Psychology of Stratification (SOCL 7263) and Class Structure and Social Inequality (SOCL 7252)). As students complete their core requirements, they also work closely with individual faculty members to advance their work within one of the department's standing areas of specialization. Students also have the right to petition to construct their own areas of specialization (pending departmental approval) and have completed area examinations in a host of subfields. Among these are environmental justice, political economy of global capitalism, theoretical criminology, feminist theory, political sociology, social psychology, sociology of violence, and immigration, among many others.

The PhD program is designed to admit relatively small numbers of graduate students each year, which affords students the opportunity to forge close working relationships with the faculty. Our faculty and graduate students work together in a number of interdisciplinary research projects, programs, and centers, including the Social Science Environmental Health Research Institute (<http://www.northeastern.edu/environmentalhealth>); the Brudnick Center on Violence and Conflict (<http://www.northeastern.edu/brudnickcenter>); the Dukakis Center for Urban and Regional Policy (<http://www.northeastern.edu/dukakiscenter>); the (<http://catalog.northeastern.edu/graduate/social-sciences-humanities/sociology/sociology-phd/Institute%20on%20Urban%20Health%20Research%20and%20Practice>) Institute on Urban Health Research and Practice (<http://www.northeastern.edu/iuhrp>); the Environmental Justice Research Collaborative (<http://www.northeastern.edu/nejrc>); the Institute on Race and Justice (<http://www.northeastern.edu/irj>); and the Women's, Gender, and Sexuality Studies Program (<https://www.northeastern.edu/cssh/wgss>). Many of the faculty in the Department of Sociology and Anthropology have additional interests and are affiliated with other departments on campus, including environmental studies; law and public policy; Latino, Latin American, and Caribbean studies; African-American studies; international affairs, Jewish studies; and criminal justice. Students who wish to work with faculty in other disciplines are encouraged to enlist the aid of the sociology graduate director or their advisors in contacting individual faculty members.

Admissions

Students interested in the PhD apply directly to that program. Students admitted without a master's degree earn the MA in sociology en route once PhD course work is completed. Please note that all applicants for the doctoral program are required to submit a writing sample that should consist of written materials that demonstrate their capacity for scholarship at the doctoral level. (Copies of several course or term papers or a copy of a master's thesis or paper are appropriate.)

Theory Examination

Students entering the graduate program must take a theory qualifying examination at the conclusion of their first year of study during the spring semester. The theory qualifying examination is a standard exam taken by all students in the same cohort. The exam is graded on a pass/fail basis. Students who fail the examination may take it a second time but will not be allowed to enroll for course work beyond the 30-semester-hour MA requirement or their first year of PhD residence (whichever case applies) until successfully completing the qualifying exam. Students who fail the examination on their second attempt will be asked to leave the program. In the latter case, a student may petition the graduate committee for a review of the student's record and performance in the program.

Course Requirements

As prerequisites, all doctoral candidates are expected to have completed the core methodology and theory requirements for the Master of Arts in Sociology:

- (SOCL 7210)
- Research Methods (SOCL 7211)
- Foundations of Social Theory 1 (SOCL 7200)
- Foundations of Social Theory 2 (SOCL 7201)

Doctoral candidates are also required to complete two advanced methods classes from a list of approved courses maintained by the department. Finally, doctoral students must take a course in the area of social inequality, choosing from a list of approved courses maintained by the department.

Students entering with a bachelor's degree complete 60 semester hours. Students entering with a master's degree complete a minimum of 28 semester hours beyond the master's degree.

Degree Candidacy

To enter into degree candidacy, the student must have earned a Master of Arts degree or its departmental semester-hour equivalent, passed the qualifying examination, established a graduate committee of three faculty members from the sociology department, and successfully completed the candidacy examination.

Once students complete doctoral course work, they will register for the following courses in the following sequence:

- Exam Preparation—Doctoral (SOCL 8960) The semester following completion of course work, students will register for Exam Preparation. During this semester, students should complete their first comprehensive exam. Students only register for Exam Preparation once. Even if a student is unable to complete their first comprehensive exam during this time frame, they will not register for Exam Preparation again.
- Research (SOCL 9986) The next semester, students will register for Research, during which their second comprehensive examination should be completed. Upon completion of both comprehensive examinations, students will have achieved PhD degree candidacy, be certified by the graduate school, and will have five years to complete the dissertation.
- Dissertation (SOCL 9990) Upon achieving PhD degree candidacy, students will register for two consecutive semesters of Dissertation, during which they should complete and defend their dissertation proposal.
- Dissertation Continuation (SOCL 9996) Following the successful defense of their dissertation proposal, students will register for Dissertation Continuation for their remaining semesters until the dissertation is approved by the graduate school and submitted electronically to Proquest. Students do not have to register for Dissertation Continuation during the summer unless that is when their dissertation defense occurs.

Sociology, PhD—Advanced Entry

The PhD program is designed to attract students who wish to develop a broad base of sociological knowledge, such as would equip students to embark on academic careers in leading institutions of higher education. The PhD program boasts a wide array of curricular strengths and diverse

methodological offerings, all of which draw upon the department's emphasis on the study of social inequalities along lines of race, class, and gender. Faculty expertise ranges widely from domestic U.S. concerns to issues that affect groups, regions, and societies on a global scale.

The PhD program is organized around four key areas of specialization.

- Globalization (<http://www.northeastern.edu/cssh/socant/graduate/globalization>)
- Urban Sociology (<http://www.northeastern.edu/cssh/socant/graduate/urban-sociology>)
- Sociology of Gender (<http://www.northeastern.edu/cssh/socant/graduate/sociology-of-gender>)
- Environment and Health (<http://www.northeastern.edu/cssh/socant/graduate/environment-and-health>)

In addition to the graduate courses offered in the areas of specialization, the program provides a strong foundation in both theory (classical and contemporary) and methods (quantitative and qualitative). Reflecting the program's distinctive emphasis on social inequalities, students are required to select a core elective in this field, choosing from a list of approved courses maintained by the department (e.g., a course on the social psychology of stratification or a seminar in social inequality). As students complete their core requirements, they also work closely with individual faculty members to advance their work within one of the department's standing areas of concentration. Students also have the right to petition to construct their own areas of specialization (pending departmental approval) and have completed area examinations in a host of subfields. Among these are environmental justice, political economy of global capitalism, theoretical criminology, feminist theory, political sociology, social psychology, sociology of violence, and immigration, among many others.

The PhD program is designed to admit relatively small numbers of graduate students each year, which affords students the opportunity to forge close working relationships with the faculty. Our faculty and graduate students work together in a number of interdisciplinary research projects, programs, and centers, including the Social Science Environmental Health Research Institute (<http://www.northeastern.edu/environmentalhealth>); the Brudnick Center on Violence and Conflict (<http://www.northeastern.edu/brudnickcenter>); the Dukakis Center for Urban and Regional Policy (<http://www.northeastern.edu/dukakiscenter>); the Institute on Urban Health Research and Practice (<http://www.northeastern.edu/iuhrp>); Environmental Justice Research Collaborative (<http://www.northeastern.edu/nejrc>); the Institute on Race and Justice (<http://www.northeastern.edu/irj>), and the Women's, Gender and Sexuality Studies Program (<https://www.northeastern.edu/cssh/wgss>). Many of the faculty in the Department of Sociology and Anthropology have additional interests and are affiliated with other departments on campus, including environmental studies; law, policy, and society; Latino, Latin American, and Caribbean studies; African-American studies; international affairs; Jewish studies; and criminal justice. Students who wish to work with faculty in other disciplines are encouraged to enlist the aid of the sociology graduate program director or their advisers in contacting individual faculty members.

Admissions

Students admitted with a master's degree in sociology from another institution may be exempt from taking the theory exam but may be required to do some additional course work in theory and methods. For students admitted with a master's degree in a field other than sociology, the theory exam requirement and supplementary course work requirements will be determined on a case-by-case basis. Please note that all applicants for the doctoral program are required to submit a

writing sample. The writing sample should consist of written materials that demonstrate students' capacity for scholarship at the doctoral level. (Copies of several course or term papers or a copy of a master's thesis or paper are appropriate.)

Theory Examination

Students entering the graduate program must take a theory qualifying examination at the conclusion of their first year of study during the spring semester. The theory qualifying examination is a standard exam taken by all students in the same cohort. The exam is graded on a pass/fail basis. Students who fail the examination may take it a second time but will not be allowed to enroll for course work beyond the 30-semester-hour MA requirement or their first year of PhD residence (whichever case applies) until successfully completing the qualifying exam. Students who fail the examination on their second attempt will be asked to leave the program. In the latter case, a student may petition the graduate committee for a review of the student's record and performance in the program.

Degree Candidacy

To enter into degree candidacy, the student must have earned a Master of Arts degree or its departmental semester hour's equivalent, passed the qualifying examination, established a graduate committee of three faculty members from the sociology department, and successfully completed the candidacy examination.

Course Requirements

Students entering the PhD program from another university will be required to take the core requirements courses unless they can provide evidence of the completion of equivalent courses during their master's degree work. Credits earned for master's-level core requirements cannot be counted toward the doctorate.

- (SOCL 7210)
- Research Methods (SOCL 7211)
- Foundations of Social Theory 1 (SOCL 7200)
- Foundations of Social Theory 2 (SOCL 7201)

Doctoral candidates are also required to complete two advanced methods classes from a list of approved courses maintained by the department. Finally, doctoral students must take a course in the area of social inequality, choosing from a list of approved courses maintained by the department.

A minimum of 28 semester hours of graduate work beyond the master's degree is required.

Once students complete doctoral course work, they will register for the following courses in the following sequence:

- Exam Preparation—Doctoral (SOCL 8960) The semester following completion of course work, students will register for Exam Preparation. During this semester, students should complete their first comprehensive exam. Students only register for Exam Preparation once. Even if a student is unable to complete their first comprehensive exam during this time frame, they will not register for Exam Preparation again.
- Research (SOCL 9986) The next semester, students will register for Research, during which their second comprehensive examination should be completed. Upon completion of both comprehensive examinations, students will have achieved PhD degree candidacy, be certified by the graduate office, and will have five years to complete the dissertation.

- Dissertation (SOCL 9990) Upon achieving PhD degree candidacy, students will register for two consecutive semesters of Dissertation, during which they should complete and defend their dissertation proposal.
- Dissertation Continuation (SOCL 9996) Following the successful defense of their dissertation proposal, students will register for Dissertation Continuation for their remaining semesters until the dissertation is approved by the graduate office and submitted electronically to Proquest.

Students do not have to register for Dissertation Continuation during the summer unless that is when their dissertation defense occurs.

College of Social Sciences and Humanities and College of Computer and Information Science

Network Science Program

177 Huntington Avenue, 10th Floor

617.373.8856

617.373.5884 (fax)

networkscience@northeastern.edu

The PhD program in network science aims to enhance our understanding of networks arising from the interplay of human behavior, sociotechnical infrastructures, information diffusion, and biological agents. This is an intrinsically multidisciplinary activity, with members of the network science community representing a wide range of fields including computer science, information science, complexity, physics, sociology, communication, organizational behavior, political science, and epidemiology. This is an interdisciplinary doctoral program focused on training students in network science across several colleges—including the College of Science, the College of Computer and Information Science, the College of Social Sciences and Humanities, Bouvé College of Health Sciences, the College of Engineering, and the College of Arts, Media and Design—with several research areas, including computational sciences, information sciences, health and life sciences, social sciences, and theoretical physics. See other collaborating colleges' catalog sections for possible concentration courses.

Course work is dependent on a student's area of research and subject to prior approval by their faculty advisor. Required course work includes the following: three foundational courses in network science

—Complex Networks and Applications (PHYS 5116); Network Science Data (PHYS 7331); and Social Networks (POLS 7334)—at least one supplemental course in network science—Network Science Data 2 (PHYS 7332); Social Networks (POLS 7334); or Data Mining Techniques (CS 6220)—12 semester hours of elective course work defined by their area of research; and two research courses with core faculty of the program. A minimum of 32 credit hours of course work is required, though the graduate program committee may recommend additional course work based on student research interests.

Satisfactory progress in the program will be ongoing and formally evaluated at the end of both the first and second years of the program. Students are expected to maintain a cumulative GPA of 3.000 or better in all course work. Students are not allowed to retake courses. A student who does not maintain the 3.000 GPA, or is not making satisfactory progress on their dissertation research, may be recommended for termination by the graduate program committee.

Each student will have one primary research advisor from the network science doctoral program faculty.

Students will be expected to select their research advisor by the end of the spring semester of their second year in the program.

The dissertation committee consists of at least four members: the dissertation advisor, one additional network science doctoral program faculty member, one member expert in the specific topic of research (can be from outside the university), and one additional tenured/tenure-track faculty member from the concentration department/conferring college. The dissertation advisor must be a full-time tenured or tenure-track member of the Northeastern University faculty. Students may repeat the comprehensive examination once if they are unsuccessful.

Degree Candidacy

A student is considered a PhD candidate upon completion of all required course work with a minimum cumulative GPA of 3.000, satisfactory completion of the qualification exam, and satisfactory completion of the comprehensive exam.

Qualifying Examination

The qualification exam will be an oral examination of the material during the students' course work. The exam will be an hour in length and consist of questions selected by network science faculty who comprise the qualifying examination and dissertation committee. Students will receive 50 to 80 potential questions, which they must be prepared to answer, one month before the exam. The exam will consist of a subset of these questions. The qualifying exam will be offered twice annually, in the fall and spring term. All students are required to initially sit for the exam in the fall, typically in their third year of the PhD program. Students who do not pass the qualifying exam on their first attempt are expected to retake the exam in the spring term. Students may sit for the qualifying exam no more than twice.

Students who fail to complete the qualifying examination but who have completed all the PhD program's required course work with a cumulative GPA of 3.000 or better will be awarded a terminal Master of Science in Network Science degree. Note that no students will be admitted directly into the network science program for receipt of a master's degree.

Comprehensive Examination

Students must submit a written dissertation proposal to the qualifying examination and dissertation committee. The proposal should identify relevant literature, the research problem, the research plan, and the potential impact on the field. A presentation of the proposal will be made in an open forum, and the student must successfully defend it before the

qualifying examination and dissertation committee. The comprehensive exam must precede the final dissertation defense by at least one year.

Dissertation Defense

A PhD student must complete and defend a dissertation that involves original research in network science. The dissertation defense must adhere to the College of Science policies.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

- Annual review
- Qualifying exam
- Dissertation committee
- Dissertation proposal
- Dissertation defense

Core Requirements

Code	Title	Hours
Networks		
PHYS 5116	Complex Networks and Applications	4
PHYS 7331	Network Science Data	4
PHYS 7335	Dynamical Processes in Complex Networks	4
Choose one of the following:		4
PHYS 7332	Network Science Data 2	
CS 6220	Data Mining Techniques	
POLS 7334	Social Networks	
Research		
Complete the following (repeatable) course twice:		
NETS 8984	Research	1-4

Specializations

Choose one of the following specializations or 12 semester hours of elective course work from the electives course list:

- Computer Science (p.)
- Political Science (p.)
- Epidemiology (p. 228)
- Physics (p. 228)
- Math (p. 228)
- Electives (p. 228)

COMPUTER SCIENCE

Code	Title	Hours
Choose three from the following:		12
CS 6140	Machine Learning	
CS 6220	Data Mining Techniques	
CS 6240	Large-Scale Parallel Data Processing	
CS 7800	Advanced Algorithms	

POLITICAL SCIENCE

Code	Title	Hours
POLS 7200	Perspectives on Social Science Inquiry	4

PTH 5202	Introduction to Epidemiology	3
PTH 5224	Social Epidemiology	3
Electives: Choose two from the elective course list below.		6-8

PHYSICS

Code	Title	Hours
Choose three from the following:		12
PHYS 5318	Principles of Experimental Physics	
PHYS 7305	Statistical Physics	
PHYS 7731	Biological Physics 1	
PHYS 7321	Computational Physics	

MATH

Code	Title	Hours
Choose three from the following:		12
MATH 7241	Probability 1	
MATH 7233	Graph Theory	
MATH 7375	Topics in Topology	
MATH 7733	Readings in Graph Theory	

ELECTIVES

Complete a minimum of 12 semester hours of elective course work related to your area of research. Common electives include the following:

Code	Title	Hours
NETS 7341	Network Economics	4
NETS 7345	The Practice of Interdisciplinary Scholarship	4
NETS 7350	Bayesian and Network Statistics	4
NETS 7983	Topics	4
NETS 8941	Network Science Literature Review Seminar	2
MATH 7233	Graph Theory	4
CS 5800	Algorithms	4
CS 6140	Machine Learning	4
CS 7180	Special Topics in Artificial Intelligence	4
CS 7295	Special Topics in Data Visualization	4
PHYS 7337	Statistical Physics of Complex Networks	4
PPUA 5301	Introduction to Computational Statistics	4

Dissertation

Code	Title	Hours
Complete one of the following (repeatable) course twice:		
NETS 9990	Dissertation

 Minimum 3.000 GPA required

Environmental Science and Policy, MS

The Master of Science in Environmental Science and Policy program emphasizes a broadly interdisciplinary and synthetic approach that integrates knowledge in the environmental sciences (conservation

biology, climate change, fisheries science, ecosystem function, biodiversity, restoration ecology) with the social sciences (policy, economics, sociology, political science, and development) and humanities (environmental history, philosophy, and ethics). The goal of the program is to equip professionals with substantive breadth in knowledge and skills at the intersection of environmental science and policy. The program focuses on training students to think critically about the underlying causes of environmental problems and understanding the reciprocal relationships between coupled human-natural ecosystems and the interconnections between social and technological innovations. The program explores practical approaches and potential solutions that decision makers need to evaluate in policy debates related to promoting environmental sustainability.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Seminars		
PPUA 6101	Environmental Science and Policy Seminar 1	4
ENVR 6102	Environmental Science and Policy Seminar 2	4

Skills Courses

Complete 6-8 semester hours from the following. At least one course needs to be taken from the College of Science Skills Course List and one course from the College of Social Sciences and Humanities Skills Course List.

College of Science Skills Course List

EEMB 5130	Ecological Dynamics	6-8
EEMB 5522	Experimental Design Marine Ecology	
ENVR 5210	Environmental Planning	
ENVR 5250	Geology and Land-Use Planning	
ENVR 5260	Geographical Information Systems	
ENVR 5400	Marine Science Policy and Ethics	
ENVR 6500	Biostatistics	

College of Social Sciences and Humanities Skills Course List

LPSC 6313	Economic Analysis for Law, Policy, and Planning	
LPSC 7215	Advanced Quantitative Techniques	
LPSC 7305	Research and Statistical Methods	
LPSC 7311	Strategizing Public Policy	
POLS 7201	Research Design	
PPUA 5260	Ecological Economics	
PPUA 5261	Dynamic Modeling for Environmental Decision Making	
PPUA 5263	Geographic Information Systems for Urban and Regional Policy	
PPUA 5301	Introduction to Computational Statistics	
PPUA 6205	Research Design and Methodology in Urban and Regional Policy	
PPUA 6207	Research Toolkit for Urban and Regional Policy: Survey Techniques	
PPUA 6209	Research Toolkit for Urban and Regional Policy: Working with Datasets	

PPUA 6210	Research Toolkit for Urban and Regional Policy: Cost/Benefit Analysis	
PPUA 6212	Research Toolkit for Urban and Regional Policy: Project Management	
PPUA 6213	Research Toolkit for Urban and Regional Policy: Data Visualization	
PPUA 6216	Research Toolkit for Urban and Regional Policy: Grant Writing	
PPUA 6502	Economic Institutions and Analysis	
PPUA 6506	Techniques of Policy Analysis	
PPUA 6509	Techniques of Program Evaluation	
PPUA 7237	Advanced Spatial Analysis of Urban Systems	
SOCL 7211	Research Methods	

Electives

Any skills course not taken to fulfill the skills courses requirement can be taken as an elective. Students must take three electives from the College of Science and three from the College of Social Science and Humanities. Students may petition to enroll in other relevant graduate courses offered by other schools at Northeastern University.

COLLEGE OF SCIENCE ELECTIVE LIST

Code	Title	Hours
Complete three from the following:		12
EEMB 5518	Ocean and Coastal Processes	
EEMB 5528	Marine Conservation Biology	
EEMB 5536	Ocean and Coastal Sustainability	
EEMB 5548	Sociobiology	
ENVR 5210	Environmental Planning	
ENVR 5250	Geology and Land-Use Planning	

COLLEGE OF SOCIAL SCIENCES AND HUMANITIES ELECTIVE LIST

Code	Title	Hours

PPUA 7673	Capstone in Public Policy and Urban Affairs
SOCL 7211	Research Methods
SOCL 7230	Political Ecology of Global Capitalism
SOCL 7235	Urban Sociology
SOCL 7243	Sociology of Health and Illness
SOCL 7257	Contemporary Issues in Sociology
SOCL 7267	Environment, Health, and Society
SOCL 7287	Social Movements in Health

Program Credit/GPA Requirements

Note: Typically, students will complete 12–16 semester hours of seminar and skills courses and 18–24 semester hours of electives.

36 total semester hours required

Minimum 3.000 GPA required

Engineering and Public Policy with Concentration in Energy & Environment, MS

The purpose of this degree is to provide students with a background in engineering with the tools necessary to conduct robust policy analysis. It includes required core courses from the Department of Civil and Environmental Engineering and the School of Public Policy, complemented by electives in engineering and public policy, which can be met by two courses and a master's report (recommended), or by one course and a thesis, or by three courses. A minimum of 16 semester hours must be taken in the College of Engineering.

Degree Requirements	With Report	With Thesis	Course Work Only
Required core courses	20 SH	20 SH	20 SH
Other electives	8 SH	4 SH	12 SH

Master of Science report/thesis	4 SH	8 SH	
Minimum semester hours required	32 SH	32 SH	32 SH

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 229).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Engineering and Public Policy with Concentration in Energy and Environment with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Engineering and Public Policy with Concentration in Energy and Environment in addition to earning a Graduate Certificate in Engineering Leadership. Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16 semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require 20 hours of advisor-approved energy and environment technical courses.

Engineering Leadership (p. 222)

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Energy and Environment		
CIVE 7272 or ENGR 5670	Air Quality Management Sustainable Energy: Materials, Conversion, Storage, and Usage	4
Environmental Systems Modeling		
Complete 4 semester hours from the following:		4
CIVE 5261	Dynamic Modeling for Environmental Investment and Policymaking	
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
CIVE 5699	Special Topics in Civil Engineering (Climate Science and Technology Adaptation and Policy)	
CIVE 7388	Special Topics in Civil Engineering (Agent-Based Modeling)	
Economics		
Complete 4 semester hours from the following:		4
PPUA 5260	Ecological Economics	
ECON 7210	Applied Microeconomic Policy Analysis	
LPSC 6313	Economic Analysis for Law, Policy, and Planning	
Public Policy and Analysis		
Complete 4 semester hours from the following:		4
LPSC 7311	Strategizing Public Policy	

PPUA 6506	Techniques of Policy Analysis
PPUA 6509	Techniques of Program Evaluation
Statistics	
Complete 4 semester hours from the following:	
CIVE 7100	Time Series and Geospatial Data Sciences
IE 6200	Engineering Probability and Statistics
IE 7280	Statistical Methods in Engineering
LPSC 7215	Advanced Quantitative Techniques

Data Analytics, Graduate Certificate

The interdisciplinary Graduate Certificate in Data Analytics is offered through a collaboration between the College of Computer and Information Sciences and the College of Social Sciences and Humanities. The certificate curriculum emphasizes the skills needed to bridge between emerging technological capacities and traditional policymaking processes. The program is designed to provide students with foundational knowledge in data science—including data management, machine learning, data mining, statistics, and visualizing and communicating data—that can be applied to data-driven decision making in any discipline.

For more information on the certificate, refer to the program's website (<http://www.northeastern.edu/datascience>).

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
DA 5020	Collecting, Storing, and Retrieving Data	4
DA 5030	Introduction to Data Mining/Machine Learning	4

PPUA 5301	Introduction to Computational Statistics	4
PPUA 5302	Information Design and Visual Analytics	4

CSSH Graduate Programs General Regulations (https://www.northeastern.edu/cssh/graduate/current_students)

The Graduate Certificate in Digital Humanities allows students to pursue an organized course of study in digital humanities with the interdisciplinary faculty of the NULab for Texts, Maps, and Networks (<http://www.northeastern.edu/nulab>) while completing requirements for their degrees in existing Northeastern University doctoral and master's programs. *This is not a stand-alone certificate*; rather, it will be completed by students in the course of their existing program of study.

Digital humanities (DH) is an emerging field of research that is interdisciplinary in scope and collaborative in nature. The field is developing in relation to new digital technologies that have changed the objects of study, methods, and opportunities for research and teaching in existing humanities fields. Digitized texts are now read and accessed in new ways; digitized corpora of texts make possible new modes of quantitative and qualitative analysis (including "distant reading," text mining, mapping, and network analysis); born digital objects constitute new primary sources in need of humanistic theorization, approaches, and critical vocabularies; and modes of encoding, aggregating, and connecting texts enabling the creation of new archival resources that are changing our understanding of the archive itself as well revealing new historical, literary, and cultural patterns.

The field is new and developing rapidly and many students are eager for training in this area—both because DH is at the cutting edge of disciplinary work and because it offers new opportunities for employment within the academy and outside of it.

Academic Standing/Progress

Students in the program are monitored for academic progress. Those students whose GPA falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

Final Project

The student will complete a final independent DH research project located in the student's home program (such as a thesis, or a portion thereof) or participation in a collaborative DH project with substantial

student participation. The final project will be overseen by the NULab faculty members teaching the NULab Project Seminar during its development; NULab workshop instructors will advise students on their projects and help students get guidance from other faculty as appropriate. Final projects will be submitted with three components: the project itself, a written project description of about 2,000 words, and a presentation to the NULab community. The DH certificate committee will formally approve all final projects.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Topics/Readings/Methods		
ENGL 7370	Topics in Digital Humanities (Introduction to Digital Humanities)	4

The Graduate Certificate in Women's, Gender, and Sexuality Studies (WGSS) is designed for students currently enrolled in a Northeastern University master's or doctoral program. The certificate aims to provide enhanced competency by:

- Analyzing contemporary feminist theoretical frameworks, methodologies, issues, and topics and their relation to established disciplines
- Focusing on the intersection of gender with sexuality, race, class, and other vectors of power and identity
- Broadening and enriching analytical skills in one or more disciplines while drawing on the interdisciplinary perspectives of WGSS
- Challenging the traditional separation of academic theory from political and professional practice

Prospective certificate students are advised initially to consult with the WGSS program director to develop a plan for completing the certificate.

WGSS also offers a specific path for master's of public health students to complete a graduate certificate in WGSS. MPH students are able to apply theories, concepts, and methods gained from the WGSS certificate to urban health issues. Certificate students will work with an advisor in the public health program to develop a plan for completing the certificate.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirement

Code	Title	Hours
Complete one of the following:		4
WMNS 6100	Theorizing Gender and Sexuality	
WMNS 7615	Feminist Inquiry	
WMNS 7100	Queer Theory: Sexualities, Genders, Politics	
or SOCL 7100	Queer Theory: Sexualities, Genders, Politics	

Electives

Code	Title	Hours
Complete two of the following. At least one course must come from outside the student's home discipline. Any course not taken to complete the required course work may be taken as an elective. Electives outside this list may be chosen in consultation with program director. Students may also consider courses at the Graduate Consortium for Studies of Gender, Culture, Women, and Sexuality (located at MIT).		8
CAEP 6380	Seminar in Feminist Psychology	
HIST 7304	Research Seminar in Gender and Society in the Modern World	
SOCL 7222	Gender and Globalization	
SOCL 7225	Gender and Social Movements	
SOCL 7265	Sociology of Gender	
SOCL 7273	Gender and Social Policy	
WMNS 7635	Understanding the Pornographic and the Obscene	
WMNS 7900	Special Topics in Women's, Gender, and Sexuality Studies	

WMNS 7976 Directed Study

The following courses are required for MPH students, in addition to one elective from the list above. Non-MPH students may not use these courses as electives.

PHTH 5120	Race, Ethnicity, and Health in the United States
PHTH 6204	Society, Behavior, and Health

The course below is an elective for MPH students only and must incorporate a project focused on gender and/or sexuality into the selected urban public health issue. A WGSS faculty member must serve on the capstone committee.

PHTH 6910	Public Health Capstone
-----------	------------------------

Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

Faculty

Mehdi Abedi

Assistant Teaching Professor, Mechanical and Industrial Engineering; Northeastern University, PhD

Emad Aboelela

Associate Teaching Professor, Electrical and Computer Engineering; University of Miami, PhD

Max Abrahms

Assistant Professor, Political Science; University of California, Los Angeles, PhD

Ali Abur

Professor, Electrical and Computer Engineering; Ohio State University, PhD

Laurie Achin

Visiting Lecturer, American Sign Language; Gallaudet University, MA

Daniel Adams

Associate Professor, Architecture; Harvard University, MArch

George G. Adams

College of Engineering Distinguished Professor, Mechanical and Industrial Engineering; University of California, Berkeley, PhD

Jeffrey Agar

Associate Professor, Chemistry and Chemical Biology and Pharmaceutical Sciences; University of Georgia, PhD

Rajesh Aggarwal

Professor, Finance; Harvard University, PhD

Christina Agostinelli-Fucile

Assistant Teaching Professor, World Languages Center; State University of New York, Buffalo, PhD

Ruth Aguilera

Distinguished Professor, International Business and Strategy; Harvard University, PhD

Amal Ahmed

Associate Professor, Computer and Information Science; Princeton University, PhD

Amira Ahmed Mohamed

Visiting Scholar, International Affairs; University of East London (United Kingdom), PhD

Jaehan Ahn

Assistant Professor, Accounting; University of Oklahoma, PhD

Sophia Ainslie

Lecturer, Art + Design; School of the Museum of Fine Arts/Tufts University, MFA

Mohammad Alam

Professor, Economics; University of Western Ontario (Canada), PhD

Noor E. Alam

Assistant Professor, Mechanical and Industrial Engineering; University of Alberta (Canada), PhD

Brian Albrecht

Associate Cooperative Education Coordinator, College of Engineering; Carnegie Mellon University, MS

Len Albright

Assistant Professor, Sociology and Anthropology and Public Policy and Urban Affairs; University of Chicago, PhD

Daniel Aldrich

Professor, Political Science and Public Policy and Urban Affairs; Harvard University, PhD

Todd M. Alessandri

Associate Professor, International Business and Strategy; University of North Carolina, Chapel Hill, PhD

Jacques Alexis

Assistant Academic Specialist, College of Professional Studies; University of Wisconsin, Platteville, MS

Nicole Aljoe

Associate Professor, English; Tufts University, PhD

Kristen Allison

Assistant Professor, Communication Sciences and Disorders; University of Wisconsin, Madison, PhD

Michael Allshouse

Assistant Professor, Mechanical and Industrial Engineering; Massachusetts Institute of Technology, PhD

Meryl Alper

Assistant Professor, Communication Studies; University of Southern California, PhD

Shannon Alpert

Assistant Teaching Professor, College of Professional Studies; University of North Carolina, Charlotte, EdD

Akram N. Alshawabkeh

George A. Snell Professor of Engineering, Civil and Environmental Engineering; Louisiana State University, PhD

Sari Altschuler

Assistant Professor, English; City University of New York, PhD

George O. Alverson

Associate Professor, Physics; University of Illinois, Urbana-Champaign, PhD

Christopher Amato

Assistant Professor, Computer and Information Science; University of Massachusetts, Amherst, PhD

Steven Amato

Associate Teaching Professor, College of Professional Studies; Boston College, PhD

Saurabh Ambulkar

Assistant Professor, Supply Chain and Information Management; Iowa State University, PhD

Jane Amidon

Professor, Architecture; Harvard University, MLA

Mansoor M. Amiji

University Distinguished Professor, Pharmaceutical Sciences; Purdue University, PhD

Mahshid Amirabadi

Assistant Professor, Electrical and Computer Engineering; Texas AM University, PhD

Ghita Amor-Tijani

Lecturer, Computer and Information Science; George Washington University, PhD

Teiichi Ando

Professor, Mechanical and Industrial Engineering; Colorado School of Mines, PhD

Jonathan Andrew

Associate Cooperative Education Coordinator, College of Social Sciences and Humanities; SIT Graduate Institute, MA

Edwin C. Andrews

Associate Professor, Art + Design; Indiana University, MFA

Jose Annunziato

Assistant Teaching Professor, Computer and Information Science; University of Massachusetts, Amherst, PhD

Javier Apfeld

Assistant Professor, Biology; University of California, San Francisco, PhD

Carmen G. Armengol

Associate Professor, Applied Psychology; Pennsylvania State University, PhD

Richard Arrowood

Associate Teaching Professor, College of Professional Studies; Massachusetts School of Law, JD

Cheryl Arruda

Assistant Cooperative Education Coordinator, College of Engineering; Northeastern University, MED

Lori Ashline

Assistant Teaching Professor, College of Professional Studies; Western New England University, JD

Javed A. Aslam

Professor, Computer and Information Science; Massachusetts Institute of Technology, PhD

Yernat Assylbekov

Zelevinsky Research Professor, Mathematics; University of Washington, PhD

Anand Asthagiri

Associate Professor, Bioengineering; Massachusetts Institute of Technology, PhD

Polly Attwood

Associate Teaching Professor, College of Professional Studies; Harvard University, EdD

Debra Auguste

Professor, Chemical Engineering; Princeton University, PhD

Earlene Avalon

Assistant Teaching Professor, College of Professional Studies; Simmons College, PhD

Emily Avery-Miller

Assistant Teaching Professor, English; Emerson College, MFA

Cheryl Avitabile

Assistant Clinical Professor, Nursing; Massachusetts General Hospital Institute of Health Professions, DNP

Hava Avraham

Research Assistant Professor, Center for Drug Discovery; Hebrew University of Jerusalem (Israel), PhD

Joseph L. Ayers

Professor, Marine and Environmental Sciences; University of California, Santa Cruz, PhD

Sophie Bacq

Assistant Professor and Mark L. and Karen D. Vachon Faculty Fellow, Entrepreneurship and Innovation; Louvain School of Management (Belgium), PhD

Robert Baginski

Assistant Clinical Professor, Physician Assistant Program; University of Connecticut, DSc

Jianqui Bai

Assistant Professor, Finance; University of Southern California, PhD

Rekha Bai

Lecturer, Mathematics; University of Iowa, PhD

Moya Bailey

Assistant Professor, Cultures, Societies, and Global Studies and Women's, Gender, and Sexuality Studies; Emory University, PhD

Richard H. Bailey

Professor, Marine and Environmental Sciences; University of North Carolina, Chapel Hill, PhD

Ambika Bajpayee

Assistant Professor, Bioengineering; Massachusetts Institute of Technology, PhD

Allison K. Baker

Lecturer, Psychology; Northeastern University, PhD

Shalanda Baker

Professor, Law and Public Policy and Urban Affairs; Northeastern University, JD; University of Wisconsin, LLM

Apostolia Baki

Research Assistant Professor, Pharmaceutical Sciences; University of Athens (Greece), PhD

Ilter Bakkal

Assistant Teaching Professor, Economics; Northern Illinois University, PhD

Charles Bame-Aldred

Associate Academic Specialist, Accounting; University of Massachusetts, Amherst, PhD

Benita Bamgbade

Assistant Professor, Pharmacy and Health Systems Sciences; University of Texas, Austin, PhD

Elitsa Banalieva

Associate Professor and Gary Gregg Faculty Fellow, International Business and Strategy; Indiana University, PhD

Debra Bangs

Assistant Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Massachusetts General Hospital Institute of Health Professions, DPT

Brendan Bannister

Associate Professor, Management and Organizational Development; Kent State University, DBA

Arun Bansil

University Distinguished Professor, Physics; Harvard University, PhD

Albert-Laszlo Barabasi

Robert Gray Dodge Professor and University Distinguished Professor, Physics and Computer and Information Science; Boston University, PhD

Emanuela Barberis

Associate Professor, Physics; University of California, Santa Cruz, PhD

Gia Barboza

Assistant Professor, Cultures, Societies, and Global Studies and International Affairs and Political Science; Michigan State University, PhD

Gloria Barczak

Professor, Marketing; Syracuse University, PhD

Sumner Barenberg

Professor of the Practice, Bioengineering; Case Western Reserve University, PhD

Emily S. Barnard

Zelevinsky Research Professor, Mathematics; North Carolina State University, PhD

Cynthia Baron

Associate Academic Specialist, College of Professional Studies; Northeastern University, MBA

Amilcar Barreto

Associate Professor, Cultures, Societies, and Global Studies and International Affairs; State University of New York, Buffalo, PhD

Lisa Barrett

University Distinguished Professor, Psychology; University of Waterloo (Canada), PhD

Margarita Barrios Ponce

Assistant Teaching Professor, Art + Design; Yale University, MFA

Carey Barry

Assistant Clinical Professor, Physician Assistant Program; Quinnipiac University, MS

Yakov Bart

Associate Professor and Thomas Moore Faculty Fellow, Marketing; University of California, Berkeley, PhD

Stefano Basagni

Associate Professor, Electrical and Computer Engineering; University of Texas, Dallas, PhD

Marla Baskerville

Associate Professor, Management and Organizational Development; Tulane University, PhD

John Basl

Assistant Professor, Philosophy and Religion; University of Wisconsin, Madison, PhD

Maureen Basmajian

Senior Cooperative Education Coordinator, D'Amore-McKim School of Business; Boston College, MBA

Kayla Bassett

Assistant Cooperative Education Coordinator, D'Amore-McKim School of Business; Northeastern University, MS

Linnea Basu

Associate Cooperative Education Coordinator, College of Social Sciences and Humanities; Northeastern University, MS

Oleg Batishchev

Professor of the Practice, Physics; Moscow Institute of Physics and Technology (Russia), PhD

Christopher E. Beasley

Associate Professor, Mathematics; Princeton University, PhD

Nicholas Beauchamp

Assistant Professor, Political Science; New York University, PhD

Michelle A. Beauchesne

Associate Professor, Nursing; Boston University, DNSc

Mike Beaudet

Professor of the Practice, Journalism; Northeastern University, MA

Laura Beerits

Assistant Teaching Professor, English; University of Texas, Austin, PhD

Gail S. Begley

Teaching Professor, Biology; Boston University, PhD

Mehdi Behroozi

Assistant Professor, Mechanical and Industrial Engineering; University of Minnesota, PhD

Edward Beighley

Associate Professor, Civil and Environmental Engineering; University of Maryland, PhD

Chiara Bellini

Assistant Professor, Bioengineering; University of Calgary (Canada), PhD

Lynda Beltz

Assistant Teaching Professor, College of Professional Studies; Indiana University, Bloomington, PhD

Sidi Bencherif

Assistant Professor, Chemical Engineering; Carnegie Mellon University, PhD

Jonathan Benda

Associate Teaching Professor, Writing Program; Syracuse University, PhD

Elisabeth Bennett

Associate Teaching Professor, College of Professional Studies; University of Georgia, PhD

James C. Benneyan

Professor, Mechanical and Industrial Engineering; University of Massachusetts, Amherst, PhD

Iris Berent

Professor, Psychology; University of Pittsburgh, PhD

Dionisio Bernal

Professor, Civil and Environmental Engineering; University of Tennessee, PhD

Eugene A. Bernstein

Associate Teaching Professor, Pharmaceutical Sciences; Ivanovo Medical Institute (Russia), PhD

Baktybek Beshimov

Professor of the Practice, College of Professional Studies; Kyrgyz National University (Kyrgyzstan), PhD

Craig T. Bettinson

Director of Cooperative Education, College of Arts, Media and Design; Northeastern University, MEd

Penny Beuning

Associate Professor, Chemistry and Chemical Biology; University of Minnesota, PhD

Peter J. Bex

Professor, Psychology; Cardiff University (United Kingdom), PhD

Dapeng Bi

Assistant Professor, Physics; Brandeis University, PhD

Timothy Bickmore

Professor, Computer and Information Science; Massachusetts Institute of Technology, PhD

Brian Bicknell

Assistant Teaching Professor, College of Professional Studies; University of Massachusetts, EdD

Allan Bird

Darla and Frederick Brodsky Trustee Professor in Global Business, International Business and Strategy; University of Oregon, PhD

Priyanka Bishnoi

Assistant Cooperative Education Coordinator, College of Computer and Information Science; University of Southern California, MS

Scott Bishop

Professor of the Practice, Architecture; University of Pennsylvania, MArch

Deborah Blackwell

Associate Clinical Professor, Nursing; University of Texas, DNP

Nathan Blake

Associate Teaching Professor, Media and Screen Studies; University of California, PhD

Samuel J. Blank

Professor, Mathematics; Brandeis University, PhD

Robert J. Blaser

Associate Cooperative Education Coordinator, Pharmacy and Health Systems Sciences; Massachusetts College of Pharmacy, MS

Martin Blatt

Professor of the Practice, History; Boston University, PhD

John Bleakney

Assistant Cooperative Education Coordinator, Graduate School of Engineering; State University of New York, Albany, MA

Francis Blessington

Professor, English; Brown University, PhD

Cameron Blevins

Assistant Professor, History; Stanford University, PhD

Aaron Block

Associate Teaching Professor, English; Emerson College, MFA

Barry Bluestone

Russell B. and Andrée B. Stearns Trustee Professor of Political Economy, Public Policy and Urban Affairs; University of Michigan, PhD

Linda Blum

Professor, Sociology and Anthropology; University of California, Berkeley, PhD

Rhonda M. Board

Associate Professor, Nursing; Ohio State University, PhD

Janet Bobcean

Associate Professor, Theatre; Ohio University, MFA

Erika Boeckeler

Assistant Professor, English; Harvard University, PhD

Geoff Boeing

Assistant Professor, Public Policy and Urban Affairs; University of California, Berkeley, PhD

Ioana Corina Bogdan

Assistant Teaching Professor, Electrical and Computer Engineering; University of Metz (France), PhD

Charles Bognanni

Senior Cooperative Education Coordinator, D'Amore-McKim School of Business; Northeastern University, MEd

Christopher Bolick

Assistant Academic Specialist, College of Professional Studies; Western Carolina University, MS

Paul J. Bolster

Professor, Finance; Virginia Polytechnic Institute, PhD

Tamara Bonaci

Lecturer, Computer and Information Science; University of Washington, PhD

Andrea Bonezzi

Assistant Professor, Marketing; Northwestern University, PhD

Lorraine A. Book

Assistant Clinical Professor, Communication Sciences and Disorders; Florida State University, PhD

Raymond G. Booth

Professor, Pharmaceutical Sciences and Chemistry and Chemical Biology; University of California, San Francisco, PhD

Monica Borgida

Assistant Teaching Professor, College of Professional Studies; University of Pisa and Bologna (Italy), PhD

Michelle Borkin

Assistant Professor, Computer and Information Science; Harvard University, PhD

Natalie Bormann

Teaching Professor, Political Science; University of Newcastle upon Tyne (United Kingdom), PhD

Jeffery A. Born

Professor, Finance; University of North Carolina, Chapel Hill, PhD

Christopher Bosso

Professor, Public Policy and Urban Affairs; University of Pittsburgh, PhD

Ekaterina Botchkovar

Associate Professor, Criminology and Criminal Justice; North Carolina State University, PhD

Kevin Boudreau

Associate Professor, Entrepreneurship and Innovation; Massachusetts Institute of Technology, PhD

Alma Bournazian

Associate Academic Specialist, American Sign Language; Western Maryland College, MS

Stacey Bourns

Professor, World Languages Center; University of Texas, Austin, PhD

Carla Bouwmeester

Associate Clinical Professor, Pharmacy and Health Systems Sciences; Massachusetts College of Pharmacy, PharmD

Jennifer L. Bowen

Associate Professor, Marine and Environmental Sciences; Boston University, PhD

James Boyer

Assistant Academic Specialist, Accounting; Northeastern University, MBA

Nicole M. Boyson

Professor, Finance; Ohio State University, PhD

Kara Braciale

Lecturer, Art + Design; University of Illinois, Chicago, MFA

Anthony Braga

Distinguished Professor, Criminology and Criminal Justice; Rutgers University, PhD

Maxim Braverman

Professor, Mathematics; Tel Aviv University (Israel), PhD

Heather C. Brenhouse

Assistant Professor, Psychology; Northeastern University, PhD

Janet Briand-McGowan

Assistant Clinical Professor, Nursing; Northeastern University, DNP

Becky A. Briesacher

Associate Professor, Pharmacy and Health Systems Sciences; University of Maryland, Baltimore, PhD

Amy M. Briesch

Associate Professor, Applied Psychology; University of Connecticut, PhD

Elizabeth Britt

Associate Professor, English; Rensselaer Polytechnic Institute, PhD

Sharon M. Britton

Assistant Cooperative Education Coordinator, College of Engineering; Massachusetts Institute of Technology, MS

Oscar Brookins

Associate Professor, Economics; State University of New York, Buffalo, PhD

Dana H. Brooks

Professor, Electrical and Computer Engineering; Northeastern University, PhD

Cammy Brothers

Associate Professor, Architecture and Art + Design; Harvard University, PhD

Craig Brown

Visiting Associate Professor, Finance; University of Michigan, PhD

Nicholas Brown

Associate Teaching Professor, Architecture and History; University of Illinois, Urbana-Champaign, PhD

Nicholas Brown

Assistant Teaching Professor, Graduate School of Engineering; University of California, Los Angeles, PhD

Philip M. Brown

University Distinguished Professor, Sociology and Anthropology and Health Sciences; Brandeis University, PhD

Ronald Brown

Assistant Teaching Professor, College of Professional Studies; Harvard University, EdD

Timothy Brown

Professor, History; University of California, Berkeley, PhD

Todd A. Brown

Clinical Instructor, Pharmacy and Health Systems Sciences; Northeastern University, MHP

James Browning

Assistant Teaching Professor, Engineering; University of Colorado, Boulder, PhD

Maria Brucato

Assistant Teaching Professor, World Languages Center; University of Texas, PhD

Elizabeth Bucar

Associate Professor, Philosophy and Religion; University of Chicago, PhD

David E. Budil

Associate Professor, Chemistry and Chemical Biology; University of Chicago, PhD

Jamie G. Bunce

Lecturer, Behavioral Neuroscience; University of Connecticut, PhD

Lucy Bunning

Assistant Teaching Professor, College of Professional Studies; Lesley University, PhD

Jeffrey Burds

Associate Professor, History; Yale University, PhD

Lynn H. Burke

Senior Cooperative Education Coordinator, College of Arts, Media and Design; University of Massachusetts, Amherst, MEd

Pamela J. Burke

Clinical Professor, Nursing; Boston College, PhD

Jose Buscaglia

Professor, Cultures, Societies, and Global Studies; University of Buffalo, PhD

Jeremy Bushnell

Associate Teaching Professor, Writing Program; University of Arizona, Tucson, MFA

Ahmed A. Busnaina

University Distinguished Professor, William Lincoln Smith Professor of Mechanical Engineering, Mechanical and Industrial Engineering; Oklahoma State University, PhD

Bobette Buster

Professor of the Practice, Journalism; Northwestern University, MFA

Michael Butera

Clinical Instructor, Nursing; Northeastern University, MS

Qinghong Cai

Associate Teaching Professor, World Languages Center; University of Kansas, MS

Victoria Cain

Assistant Professor, History; Columbia University, PhD

Paula Caligiuri

Distinguished Professor of Global Leadership, International Business and Strategy; Pennsylvania State University, PhD

Lisa M. Campagnoni

Assistant Cooperative Education Coordinator, College of Science; Northeastern University, MA

Octavia Camps

Professor, Electrical and Computer Engineering; University of Washington, PhD

Yanet Canavan

Assistant Academic Specialist, World Languages Center; Salem State College, MA

Kristopher Cannon

Assistant Teaching Professor, Media and Screen Studies; Georgia State University, PhD

Mira Cantor

Professor, Art + Design; University of Illinois, Urbana-Champaign, MFA

Luca Caracoglia

Associate Professor, Civil and Environmental Engineering; University of Trieste (Italy), PhD

Benjamin Caras

Lecturer, Art + Design; University of Massachusetts, Amherst, MFA

Peter Cardillo

Assistant Cooperative Education Coordinator, Graduate School of Engineering; Boston College, MS

Joelle Carlo

Assistant Teaching Professor, Pharmaceutical Sciences; State University of New York, Buffalo, PhD

Alexa A. Carlson

Associate Clinical Professor, Pharmacy and Health Systems Sciences; Butler University, PharmD

Mary Carney

Associate Cooperative Education Coordinator, Bouvé College of Health Sciences; Boston College, MSN

Heather Carpenter-Oliveira

Assistant Cooperative Education Coordinator, College of Engineering; Northeastern University, MS

Jonathan Carr

Associate Teaching Professor, Theatre; Columbia University, MFA

Michelle Carr

Lecturer, Communication Studies; Kingston University (United Kingdom), MA

Sara Carr

Assistant Professor, Architecture; University of California, Berkeley, PhD

Rebecca L. Carrier

Professor, Chemical Engineering; Massachusetts Institute of Technology, PhD

Matthew Carroll

Professor of the Practice, Journalism; Northeastern University, BS

Patricia Case

Assistant Teaching Professor, Health Sciences; Harvard University, PhD

Bonnie Jo Casey

Assistant Clinical Professor, Physician Assistant Program; University of New England, MS

Cristian Cassella

Assistant Professor, Electrical and Computer Engineering; Carnegie Mellon University, PhD

Ana-Maria Castravet

Associate Professor, Mathematics; Massachusetts Institute of Technology, PhD

Smajl Cenjic

Assistant Cooperative Education Coordinator, College of Computer and Information Science; Cambridge College, MA

Jana Cephas

Assistant Professor, Architecture; Harvard University, PhD

Robert J. Cersosimo

Associate Professor, Pharmacy and Health Systems Sciences; University of Utah, PharmD

Christopher Cesario

Assistant Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, DPT

Yunrong Chai

Assistant Professor, Biology; Cornell University, PhD

Paul M. Champion

Professor, Physics; University of Illinois, Urbana-Champaign, PhD

Chee Chan

Associate Academic Specialist, Marketing; Michigan State University, PhD

Katherine Chan

Assistant Teaching Professor, Music; University of Minnesota, PhD

Changyan Chen

Research Professor, Center for Drug Discovery; Columbia University, PhD

Qin Chen

Professor, Civil and Environmental Engineering and Marine and Environmental Sciences; Old Dominion University, PhD

Yi-Da Chen

Assistant Professor, Supply Chain and Information Management; University of Arizona, PhD

Esther Chewning

Senior Cooperative Education Coordinator, D'Amore-McKim School of Business; Suffolk University, MS

Cherese Childers-McKee

Assistant Teaching Professor, College of Professional Studies; University of North Carolina, PhD

Elizabeth A. Chilvers

Associate Professor, Cooperative Education, D'Amore-McKim School of Business; Northeastern University, MEd

W. Paul Chiou

Assistant Teaching Professor, Finance; Rutgers University, PhD

David R. Choffnes

Assistant Professor, Computer and Information Science; Northwestern University, PhD

Sam S. Choi

Associate Teaching Professor, Architecture; Harvard University, MArch

Sunho Choi

Assistant Professor, Chemical Engineering; University of Minnesota, PhD

Bartłomiej Chomanski

Visiting Lecturer, Philosophy and Religion; University of Miami, PhD

Chun-An Chou

Assistant Professor, Mechanical and Industrial Engineering; Rutgers University, PhD

Kaushik Roy Chowdhury

Associate Professor, Electrical and Computer Engineering; University of Cincinnati, MS

Ken Y. Chung

Assistant Teaching Professor, Chemistry and Chemical Biology; Michigan State University, PhD

Samuel Chung

Assistant Professor, Bioengineering; Harvard University, PhD

Hillary Chute

Professor, English and Art + Design; Rutgers University, PhD

Dawn M. Cisewski

Assistant Teaching Professor, Psychology; Indiana University of Pennsylvania, PsyD

Bruce H. Clark

Associate Professor, Marketing; Stanford University, PhD

Edmund L. Clark

Associate Academic Specialist, Entrepreneurship and Innovation; Clark University, MBA

Heather Clark

Professor, Bioengineering and Chemistry and Chemical Biology; University of Michigan, PhD

Sean I. Clark

Zelevinsky Research Professor, Mathematics; University of Virginia, PhD

Stephen B. Clark

Assistant Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, DPT

Alan Clayton-Matthews

Associate Professor, Public Policy and Urban Affairs and Economics; Boston College, PhD

Sandra S. Cleveland

Associate Clinical Professor, Communication Sciences and Disorders; Pennsylvania College of Optometry, AuD

William D. Clinger

Associate Professor, Computer and Information Science; Massachusetts Institute of Technology, PhD

Paul Closas

Assistant Professor, Electrical and Computer Engineering; Universitat Politècnica de Catalunya (Spain), PhD

Emily Clough

Assistant Professor, Political Science and International Affairs; Harvard University, PhD

Ricardo Coelho Guerreiro Da Silva Camacho

Visiting Lecturer, Architecture; Harvard University, MArch

Dennis Cokely

Professor, American Sign Language; Georgetown University, PhD

Maxine Cokely

Associate Academic Specialist, College of Professional Studies; Bowie State University, MA

Stephanie Colbry

Assistant Teaching Professor, College of Professional Studies; Eastern University, PhD

John D. Coley

Associate Professor, Psychology; University of Michigan, PhD

Greg Collier

Professor of the Practice, Entrepreneurship and Innovation; Eastern Michigan University, MBA

Randall C. Colvin

Associate Professor, Psychology; University of Illinois, Urbana-Champaign, PhD

Sally Conant

Assistant Cooperative Education Coordinator, College of Engineering; Salve Regina University, MA

Michael Conley

Assistant Clinical Professor, Pharmacy and Health Systems Sciences; Northeastern University, PharmD

Richard Conley

Associate Cooperative Education Coordinator, College of Social Sciences and Humanities; Boston University, JD

Kelly Conn

Associate Teaching Professor, College of Professional Studies; Boston University, PhD

Adam I. Cooper

Senior Lecturer, Linguistics; Cornell University, PhD

Seth Cooper

Assistant Professor, Computer and Information Science; University of Washington, PhD

Gene D. Cooperman

Professor, Computer and Information Science; Brown University, PhD

Ryan Cordell

Assistant Professor, English; University of Virginia, PhD

Marie B. Corkery

Associate Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, DPT

Patricia Corrigan

Assistant Cooperative Education Coordinator, College of Science; Suffolk University, MA

Felipe Cortes

Assistant Professor, Finance; Washington University, St. Louis, PhD

Xavier Costa

Professor, Architecture; University of Pennsylvania, PhD

Hugh G. Courtney

Professor, International Business and Strategy; Massachusetts Institute of Technology, PhD

Arthur J. Coury

University Distinguished Professor, Chemical Engineering; University of Minnesota, PhD

Erin J. Cram

Professor, Biology; University of California, Berkeley, PhD

Frederick Crane

Senior Academic Specialist, Entrepreneurship and Innovation; Bradford University, PhD

Justin D. Crane

Assistant Professor, Biology; McMaster University (Canada), PhD

Steven Cranford

Assistant Professor, Civil and Environmental Engineering; Massachusetts Institute of Technology, PhD

William F. Crittenden

Professor, International Business and Strategy; University of Arkansas, PhD

Maia Cross

Associate Professor, Political Science and International Affairs; Princeton University, PhD

Robert Cross

Assistant Teaching Professor, History; Princeton University, PhD

Pedro Miguel Cruz

Assistant Professor, Art + Design; Universidade de Coimbra (Portugal), PhD

Alvaro Cuervo-Cazurra

Professor and Robert Morrison Fellow, International Business and Strategy; Massachusetts Institute of Technology, PhD

Carlos Cuevas

Associate Professor, Criminology and Criminal Justice; Alliant International University, PhD

Meng Cui

Research Associate Professor, Pharmaceutical Sciences; Jilin University (China), PhD

Thomas P. Cullinane

Professor, Mechanical and Industrial Engineering; Virginia Polytechnic Institute and State University, PhD

Derek Curry

Assistant Professor, Art + Design; University of California, Los Angeles, MFA

Mary Ellen Cushman

Professor, English; Rensselaer Polytechnic Institute, PhD

Julia Cybularz

Visiting Associate Teaching Professor, Art + Design; School of Visual Arts, MFA

Kamran Dadkhah

Associate Professor, Economics; Indiana University, PhD

Guohao Dai

Associate Professor, Bioengineering; Massachusetts Institute of Technology, PhD

Elise J. Dallimore

Associate Professor, Communication Studies; University of Washington, PhD

James Dana Jr.

Professor, Economics and International Business and Strategy; Massachusetts Institute of Technology, PhD

Luis Dau

Associate Professor, International Business and Strategy; University of South Carolina, PhD

Geoffrey Davies

Matthews Distinguished University Professor, Chemistry and Chemical Biology; Birmingham University (United Kingdom), PhD, DSc

Duncan Davis

Assistant Teaching Professor, Engineering; North Carolina State University, PhD

Frederick C. Davis

Professor, Biology; University of Texas, Austin, PhD

Nicole Davis

Assistant Clinical Professor, Applied Psychology; Simmons College, MS

Theo Davis

Professor, English; Johns Hopkins University, PhD

Leslie Day

Associate Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, PhD

Anthony P. De Ritis

Professor, Music; University of California, Berkeley, PhD

Michael Dean

Assistant Teaching Professor, College of Professional Studies; Columbia University, PhD

Adenekan (Nick) Dedeke

Lecturer, Supply Chain and Information Management; Technische Universität Kaiserslautern (Germany), PhD

Mohammad Dehghanimohammadabadi

Assistant Teaching Professor, Mechanical and Industrial Engineering; Western New England University, PhD

Candice Delmas

Assistant Professor, Philosophy and Religion and Political Science; Boston University, PhD

John Dencker

Professor, Management and Organizational Development; Harvard University, PhD

Jack Dennerlein

Professor, Physical Therapy, Movement, and Rehabilitation Sciences; University of California, PhD

Megan Denver

Assistant Professor, Criminology and Criminal Justice; University at Albany, PhD

Alexander DePaoli

Visiting Assistant Professor, Marketing; Stanford University, PhD

Leila F. Deravi

Assistant Professor, Chemistry and Chemical Biology; Vanderbilt University, PhD

Nate Derbinsky

Associate Teaching Professor, Computer and Information Science; University of Michigan, Ann Arbor, PhD

Marco Deseriis

Assistant Professor, Media and Screen Studies; New York University, PhD

Peter J. Desnoyers

Associate Professor, Computer and Information Science; University of Massachusetts, Amherst, PhD

David A. DeSteno

Professor, Psychology; Yale University, PhD

H. William Detrich

Professor, Marine and Environmental Sciences; Yale University, PhD

Darin Detwiler

Assistant Teaching Professor, College of Professional Studies; Northeastern University, PhD

John W. Devlin

Professor, Pharmacy and Health Systems Sciences; University of Toronto (Canada), PharmD

James Dew

Visiting Lecturer, Economics; Texas AM University, PhD

Janet Dewan

Assistant Clinical Professor, Nursing; Northeastern University, PhD

Alessandra Di Credico

Lecturer, Physics; University of Rome (Italy), PhD

Panagoula Diamanti-Karanou

Visiting Lecturer, Political Science and International Affairs; Northeastern University, PhD

Jacqueline Diani

Senior Cooperative Education Coordinator, Bouvé College of Health Sciences; University of Virginia, MEd

Martin Dias

Associate Teaching Professor, Supply Chain and Information Management; Bentley University, PhD

Amy DiBattista

Lecturer, Psychology; Northeastern University, PhD

William Dickens

Professor, Economics and Public Policy and Urban Affairs; Massachusetts Institute of Technology, PhD

Elizabeth Dillon

Professor, English; University of California, Berkeley, PhD

Charles DiMarzio

Associate Professor, Electrical and Computer Engineering; Northeastern University, PhD

Aidong A. Ding

Associate Professor, Mathematics; Cornell University, PhD

Kathleen C. Dioli

Associate Cooperative Education Coordinator, Chemistry and Chemical Biology; Bowling Green State University, MA

Brandon Dionne

Assistant Clinical Professor, Pharmacy and Health Systems Sciences; University of New England, PharmD

Daniel L. Distel

Research Professor, Marine and Environmental Sciences; University of California, San Diego, PhD

Margarita V. DiVall

Clinical Professor, Pharmacy and Health Systems Sciences; Northeastern University, PharmD

Mary Kate Dodgson

Assistant Professor, Accounting; University of Massachusetts, Amherst, PhD

Lisa Cantwell Doherty

Associate Cooperative Education Coordinator, College of Social Sciences and Humanities; Northeastern University, MA

Silvia Dominguez

Associate Professor, Sociology and Anthropology; Boston University, PhD

Hua Dong

Associate Academic Specialist, World Languages Center; Emerson College, MA

Pamela Donlan

Assistant Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, PhD

Margaret Dougherty

Assistant Teaching Professor, College of Professional Studies; University of Massachusetts, EdD

Brenda Douglas

Associate Clinical Professor, Nursing; Northeastern University, DNP

Daniel C. Douglass

Lecturer, Marine and Environmental Sciences; University of Wisconsin, PhD

Mark Douglass

Associate Clinical Professor, Pharmacy and Health Systems Sciences; University of Michigan, PharmD

Kevin Drakulich

Associate Professor, Criminology and Criminal Justice; University of Washington, PhD

Andrea Dropkin

Assistant Cooperative Education Coordinator, D'Amore-McKim School of Business; Bentley University, MBA

Laura Dudley

Assistant Clinical Professor, Applied Psychology; Northeastern University, PhD

Lisa Duffy

Assistant Professor, Nursing; Boston College, DNP

Tara Duffy

Lecturer, Marine and Environmental Sciences; Stony Brook University, PhD

Molly Dugan

Assistant Teaching Professor, College of Professional Studies; Boston College, PhD

Michael Dukakis

Distinguished Professor, Political Science; Harvard University, JD

Daniel M. Dulaski

Teaching Professor, Civil and Environmental Engineering; University of Massachusetts, Amherst, PhD

Catherine Dunand

Assistant Academic Specialist, World Languages Center; Boston University, MA

Jill Dupree

Visiting Lecturer, Economics; University of Colorado, Boulder, PhD

Joanne Dupuis

Assistant Clinical Professor, Nursing; Massachusetts School of Law, PhD

Kathleen Durant

Assistant Teaching Professor, Computer and Information Science; Harvard University, PhD

Jennifer G. Dy

Professor, Electrical and Computer Engineering; Purdue University, PhD

Eno Ebong

Assistant Professor, Chemical Engineering; Rensselaer Polytechnic Institute, PhD

Stephanie Eby

Lecturer, Marine and Environmental Sciences; Syracuse University, PhD

Rajagopal Echambadi

Professor, Entrepreneurship and Innovation; University of Houston, PhD

Matthew Eckelman

Assistant Professor, Civil and Environmental Engineering; Yale University, PhD

Kimberly Eddleston

Professor and Daniel and Dorothy Grady Faculty Fellow, Entrepreneurship and Innovation; University of Connecticut, PhD

Scott Edmiston

Professor of the Practice, Theatre; Boston University, MFA

Laurie Edwards

Associate Teaching Professor, Writing Program; Emerson College, MFA

Jessica Edwards George

Associate Clinical Professor, Applied Psychology; Northeastern University, PhD

Christopher L. Egan

Assistant Cooperative Education Coordinator, College of Science; Boston University, MA

Jean Egan

Senior Cooperative Education Coordinator, College of Social Sciences and Humanities; Northeastern University, MEd

Robert C. Eidson

Lecturer, Psychology; Northeastern University, PhD

Stanley J. Eigen

Professor, Mathematics; McGill University (Canada), PhD

Adam Ekenseair

Assistant Professor, Chemical Engineering; University of Texas, Austin, PhD

Ehsan Elhamifar

Assistant Professor, Computer and Information Science; Johns Hopkins University, PhD

Tina Eliassi-Rad

Associate Professor, Computer and Information Science; University of Wisconsin, Madison, PhD

B. Parker Ellen

Assistant Professor, Management and Organizational Development; Florida State University, PhD

Ryan Ellis

Assistant Professor, Communication Studies; University of California, San Diego, PhD

Constance Emerson

Assistant Academic Specialist, College of Professional Studies; Purdue University, West Lafayette, MS

John R. Engen

Distinguished Professor, Chemistry and Chemical Biology and Barnett Institute; University of Nebraska, Lincoln, PhD

Christen Enos

Associate Teaching Professor, Writing Program; Emerson College, MFA

Slava S. Epstein

Distinguished Professor, Biology; Moscow State University (Russia), PhD

Randall Erb

Assistant Professor, Mechanical and Industrial Engineering; Duke University, PhD

Deniz Erdogmus

Professor, Electrical and Computer Engineering; University of Florida, PhD

Ozlem Ergun

Professor, Mechanical and Industrial Engineering; Massachusetts Institute of Technology, PhD

Cuneyt Eroglu

Associate Professor, Supply Chain and Information Management; Ohio State University, PhD

Bilge Erten

Assistant Professor, International Affairs and Economics; University of Massachusetts, Amherst, PhD

Rhea T. Eskew

Professor, Psychology; Georgia Institute of Technology, PhD

Jonathan Esole

Assistant Professor, Mathematics; Leiden University (Netherlands), PhD

Abigail Evans

Lecturer, Computer and Information Science; University of Washington, PhD

Sara Ewell

Associate Teaching Professor, College of Professional Studies; University of North Carolina, Chapel Hill, PhD

William Ewell

Associate Teaching Professor, College of Professional Studies; University of North Carolina, PhD

Daniel Faber

Professor, Sociology and Anthropology; University of California, Santa Cruz, PhD

Mary Lynn Fahey

Clinical Instructor, Nursing; Simmons College, MS

Olubunmi Faleye

Professor and Donald F. Harding Professor of Finance and Insurance, Finance; University of Alberta (Canada), PhD

Hui Fang

Assistant Professor, Electrical and Computer Engineering; University of California, Berkeley, PhD

Qianqian Fang

Assistant Professor, Bioengineering; Dartmouth College, PhD

David Fannon

Assistant Professor, Architecture and Civil and Environmental Engineering; University of California, Berkeley, MS

Nasser S. Fard

Associate Professor, Mechanical and Industrial Engineering; University of Arizona, PhD

Amir Farhat

Associate Teaching Professor, Electrical and Computer Engineering; University of Pennsylvania, PhD

Amy Farrell

Associate Professor, Criminology and Criminal Justice; Northeastern University, PhD

Yunsi Fei

Professor, Electrical and Computer Engineering; Princeton University, PhD

Adrian E. Feiguin

Assistant Professor, Physics; Universidad Nacional de Rosario (Argentina), PhD

Allen G. Feinstein

Teaching Professor, Music; New England Conservatory of Music, MM

Nathan I. Felde

Professor, Art + Design; Massachusetts Institute of Technology, MS

Lisa Feldman Barrett

University Distinguished Professor, Psychology; University of Waterloo (Canada), PhD

Matthias Felleisen

Trustee Professor, Computer and Information Science; Indiana University, PhD

Samuel Felton

Assistant Professor, Mechanical and Industrial Engineering; Harvard University, PhD

Carol Femia

Clinical Instructor, Nursing; Massachusetts General Hospital Institute of Health Professions, MS

Hicham Fenniri

Professor, Chemical Engineering; Université de Strasbourg (France), PhD

Loretta A. Fernandez

Assistant Professor, Civil and Environmental Engineering and Marine and Environmental Sciences; Massachusetts Institute of Technology, PhD

Waththage N. Fernando

Lecturer, Mathematics; University of South Florida, PhD

Lori Ferrins

Research Assistant Professor, Chemistry and Chemical Biology; Monash University, PhD

Craig F. Ferris

Professor, Psychology and Pharmaceutical Sciences; New York Medical College, PhD

Kirsten Fertuck

Assistant Teaching Professor, Biochemistry; Michigan State University, PhD

Susan F. Fine

Clinical Instructor, Communication Sciences and Disorders; New York University, MA

Sarah Finn

Associate Teaching Professor, Writing Program; University of Massachusetts, Amherst, PhD

Branden Fitelson

Distinguished Professor, Philosophy and Religion; California Institute of Technology, PhD

Brian Fitzgerald

Assistant Professor, Accounting; Texas AM University, PhD

Joan Fitzgerald

Professor, Public Policy and Urban Affairs; Pennsylvania State University, PhD

Diane F. Fitzpatrick

Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, DPT

Josephine Flanagan

Assistant Cooperative Education Coordinator, College of Engineering; Suffolk University, JD

Julia Flanders

Professor of the Practice, English and Library Systems; Brown University, PhD

Laure B. Flapan

Zelevinsky Research Professor, Mathematics; University of California, Los Angeles, PhD

Eric Folmar

Assistant Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Quinnipiac University, MS

Paul Fombelle

Associate Professor and Thomas Moore Faculty Fellow, Marketing; Arizona State University, PhD

Murray Forman

Professor, Media and Screen Studies; McGill University (Canada), PhD

Lisa M. Foster

Assistant Cooperative Education Coordinator, Bouvé College of Health Sciences; Northeastern University, MS

Dimitrios Fotiadis

Lecturer, Supply Chain and Information Management; Northeastern University, MS

Brooke Foucault Welles

Assistant Professor, Communication Studies; Northwestern University, PhD

Charles F. Fountain

Professor, Journalism; Columbia University, MS

James Fox

Lipman Family Professor of Criminology, Law, and Public Policy, Criminology and Criminal Justice and Law and Public Policy; University of Pennsylvania, PhD

Laura Frader

Professor, History; University of Rochester, PhD

Debra L. Franko

Professor, Applied Psychology; McGill University (Canada), PhD

Peter Fraunholtz

Assistant Teaching Professor, History and International Affairs; Boston College, PhD

Susan Freeman

Teaching Professor, Engineering; Northeastern University, PhD

Clark Freifeld

Lecturer, Computer and Information Science; Boston University, PhD

Michael Frengel

Associate Academic Specialist, Music; City University London (United Kingdom), PhD

John H. Friar

Senior Academic Specialist, Entrepreneurship and Innovation; Massachusetts Institute of Technology, PhD

Natasha Frost

Professor, Criminology and Criminal Justice; City University of New York, PhD

Yun (Raymond) Fu

Associate Professor, Electrical and Computer Engineering and Computer and Information Science; University of Illinois, Urbana-Champaign, PhD

Carolyn Fuchs

Teaching Professor, World Languages Center; Justus-Liebig Universität Gießen (Germany), PhD

Brian Fulton

Lecturer, Chemistry and Chemical Biology; Iowa State University, PhD

Peter G. Furth

Professor, Civil and Environmental Engineering; Massachusetts Institute of Technology, PhD

Timothy Gagnon

Associate Academic Specialist, Accounting; Sacred Heart University, MBA

Sean Gallagher

Assistant Clinical Professor, College of Professional Studies; Northeastern University, EdD

Susan Gallagher

Clinical Instructor, Nursing; Massachusetts General Hospital Institute of Health Professions, MS

Joshua Galloway

William O. DiPietro Assistant Professor, Chemical Engineering; Columbia University, PhD

Auroop Ganguly

Professor, Civil and Environmental Engineering; Massachusetts Institute of Technology, PhD

Lori Gardinier

Teaching Professor, Human Services; Northeastern University, PhD

Julie Garey

Assistant Teaching Professor, Political Science; Northeastern University, PhD

Karen Garneau

Associate Teaching Professor, Writing Program; Northeastern University, PhD

Shytierra Gaston

Assistant Professor, Criminology and Criminal Justice; University of Missouri, St. Louis, PhD

Wolfgang Gatterbauer

Associate Professor, Computer and Information Science; Vienna University of Technology (Austria), PhD

Edward Geisinger

Assistant Professor, Biology; New York University, MD, PhD

Prasanth George

Assistant Teaching Professor, Mathematics; State University of New York, Buffalo, PhD

Francis Georges

Assistant Teaching Professor, Economics; Boston College, PhD

Roger W. Giese

Professor, Pharmaceutical Sciences; Massachusetts Institute of Technology, PhD

Joseph M. Giglio

Senior Academic Specialist, International Business and Strategy; Northeastern University, PhD

Thomas R. Gilbert

Associate Professor, Chemistry and Chemical Biology; Massachusetts Institute of Technology, PhD

Laurance Ginsberg

Assistant Academic Specialist, Accounting; Bentley University, MST

Karen Giuliano

Associate Professor, Nursing; Boston College, PhD

Daniel G. Glasscock

Zelevinsky Research Professor, Mathematics; Ohio State University, PhD

Leonard J. Glick

Senior Academic Specialist, Management and Organizational Development; Harvard University, EdD

Elizabeth Glowacki

Postdoctoral Teaching Associate, Communication Studies; University of Texas, Austin, PhD

Daniel Godfrey

Professor, Music; University of Iowa, PhD

Veronica S. Godoy-Carter

Associate Professor, Biology; Tufts University, PhD

Kevin Gold

Assistant Teaching Professor, Computer and Information Science; Yale University, PhD

Natalia Gold

Assistant Teaching Professor, International Business and Strategy; Saint Petersburg State University of Engineering (Russia), PhD

Stephen Golden

Lecturer, Entrepreneurship and Innovation; Suffolk University, MBA

William Goldman

Lecturer, Accounting; Northeastern University, MBA

Ann C. Golub-Victor

Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, DPT

Edgar D. Goluch

Associate Professor, Chemical Engineering; University of Illinois, Urbana-Champaign, PhD

Kathleen Gonso

Associate Teaching Professor, Writing Program; Emerson College, MFA

Michael J. Gonyeau

Clinical Professor, Pharmacy and Health Systems Sciences; Albany College of Pharmacy, PharmD

Frankie Gonzalez

Assistant Cooperative Education Coordinator, D'Amore-McKim School of Business; Northeastern University, BS

Gregory Goodale

Associate Professor, Communication Studies; University of Illinois, Urbana-Champaign, PhD

Teresa Goode

Assistant Teaching Professor, College of Professional Studies; Columbia University, EdD

Patricia Goodman

Assistant Teaching Professor, College of Professional Studies; George Washington University, EdD

Matthew Goodwin

Associate Professor, Health Sciences and Computer and Information Science; University of Rhode Island, PhD

Mark Gooley

Lecturer, Finance; Northeastern University, PhD

Ian Gorton

Professor of the Practice, Computer and Information Science; Sheffield Hallam University (United Kingdom), PhD

Gary Goshgarian

Professor, English; University of Wisconsin, Madison, PhD

Tarik C. Gouhier

Assistant Professor, Marine and Environmental Sciences; McGill University (Canada), PhD

Robson Goulart

Assistant Cooperative Education Coordinator, College of Engineering;
Boston University, MS

Andrew Gouldstone

Associate Professor, Mechanical and Industrial Engineering;
Massachusetts Institute of Technology, PhD

Jonathan H. Grabowski

Associate Professor, Marine and Environmental Sciences; University of
North Carolina, Chapel Hill, PhD

Jennifer Gradecki

Assistant Professor, Art + Design; University of California, Los Angeles,
MFA

Steve Granelli

Assistant Teaching Professor, Communication Studies; Syracuse
University, MS

Laura Green

Professor, English; University of California, Berkeley, PhD

Kristin Curry Greenwood

Associate Clinical Professor, Physical Therapy, Movement, and
Rehabilitation Sciences; Northeastern University, EdD, DPT

Brent Griffin

Assistant Teaching Professor, College of Professional Studies;
Northeastern University, PhD

Jacqueline Griffin

Assistant Professor, Mechanical and Industrial Engineering; Georgia
Institute of Technology, PhD

Joseph Griffin

Associate Teaching Professor, College of Professional Studies; Gordon
Conwell Theological Seminary, PhD

John Griffith

Clinical Professor, Health Sciences; Boston University, PhD

Amir Grinstein

Associate Professor, Mark L. and Karen D. Vachon Faculty Fellow,
Marketing; Hebrew University of Jerusalem (Israel), PhD

Francesca Grippa

Associate Teaching Professor, College of Professional Studies; University
of Salento (Italy), PhD

Craig Gruber

Associate Teaching Professor, College of Professional Studies; Clark
University, PhD

Tiantian Gu

Associate Professor, Finance; University of Wisconsin, Madison, PhD

Jason J. Guo

Research Associate Professor, Barnett Institute; University of
Connecticut, PhD

Surendra M. Gupta

Professor, Mechanical and Industrial Engineering; Purdue University, PhD

Andrei Guschin

Assistant Teaching Professor, Graduate School of Engineering; Russian
Academy of Sciences (Russian Federation), PhD

Philip Gust

Clinical Instructor, Computer and Information Science; University of
Arizona, MS

Barbara Guthrie

Professor, Nursing; New York University, PhD

Mohamed Habibullah

Assistant Teaching Professor, Supply Chain and Information
Management; University of Missouri, Columbia, PhD

David Hagen

Assistant Teaching Professor, College of Professional Studies; New
England School of Law, JD

Michelle Hagopian

Assistant Cooperative Education Coordinator, College of Arts, Media and
Design; University of Illinois, MS

Jerome F. Hajjar

CDM Smith Professor in Civil Engineering, Civil and Environmental
Engineering; Cornell University, PhD

Golnoosh Hakimdavar

Associate Teaching Professor, College of Professional Studies; University
of Turin (Italy), PhD

Danielle Haley

Assistant Professor, Health Sciences; Emory University, PhD

Judith A. Hall

University Distinguished Professor, Psychology; Harvard University, PhD

James Halverson

Assistant Professor, Physics; University of Pennsylvania, PhD

Pauline Hamel

Associate Clinical Professor, Health Sciences; Boston University, EdD

Paul Hand

Assistant Professor, Mathematics and Computer and Information
Science; New York University, PhD

Michael Handel

Associate Professor, Sociology and Anthropology; Harvard University,
PhD

Nancy Hanrahan

Professor, Nursing; Boston College, PhD

Robert N. Hanson

Matthews Distinguished University Professor, Chemistry and Chemical
Biology; University of California, Berkeley, PhD

Sharon Harlan

Professor, Health Sciences and Sociology and Anthropology; Cornell
University, PhD

Kelly Harrington

Associate Cooperative Education Coordinator, D'Amore-McKim School of
Business; Suffolk University, MBA

Shaunna Harrington

Associate Academic Specialist, College of Professional Studies; Boston
University, MA

Vincent Harris

University Distinguished Professor, William Lincoln Smith Professor of Electrical and Computer Engineering, Electrical and Computer Engineering; Northeastern University, PhD

Vanecia Harrison

Associate Cooperative Education Coordinator, College of Science; Emmanuel College, MA

Casper Harteveld

Assistant Professor, Game Design; Delft University of Technology (Netherlands), PhD

Woodrow Hartzog

Professor, Law and Computer and Information Science; University of North Carolina, Chapel Hill, PhD

Christopher Hasson

Assistant Professor, Physical Therapy, Movement, and Rehabilitation Sciences; University of Massachusetts, Amherst, PhD

Heather Hauck

Senior Cooperative Education Coordinator, D'Amore-McKim School of Business; Northeastern University, MS

Claudia Haupt

Associate Professor, Law and Political Science; Columbia University, JSD; University of Cologne (Germany), PhD

Thomas Havens

Professor, History; University of California, Berkeley, PhD

Lorna Hayward

Associate Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Boston University, EdD

Haikun He

Assistant Academic Specialist, College of Professional Studies; Columbia University, MEd

Julia Hechtman

Lecturer, Art + Design; University of Illinois, Chicago, MFA

Meghan Heckman

Assistant Professor, Journalism; Northeastern University, MA

Gretchen Heefner

Associate Professor, History; Yale University, PhD

Donald E. Heiman

Professor, Physics; University of California, Irvine, PhD

Amy Helburn

Lorraine C. Snell Visiting Professor, Health Sciences; University of Massachusetts, PhD

Brian Helmuth

Professor, Marine and Environmental Sciences and Public Policy and Urban Affairs; University of Washington, PhD

Jason Hemann

Lecturer, Computer and Information Science; Indiana University, PhD

Carlene Hempel

Associate Teaching Professor, Journalism; University of North Carolina, Chapel Hill, MA

Dale Herbeck

Professor, Communication Studies; University of Iowa, PhD

Angela Herbert

Assistant Academic Specialist, American Sign Language; Northeastern University, BS

David A. Herlihy

Teaching Professor, Music; Boston College, JD

Catalina Herrera Almanza

Assistant Professor, Economics and International Affairs; Cornell University, PhD

Carie Hersh

Assistant Teaching Professor, Sociology and Anthropology; Duke University, JD

Kelsey Hersh

Assistant Cooperative Education Coordinator, D'Amore-McKim School of Business; Northeastern University, MS

Joshua Hertz

Assistant Teaching Professor, Engineering; Massachusetts Institute of Technology, PhD

Benjamin Hescott

Teaching Professor, Computer and Information Science; Boston University, PhD

Kamber Hetrick

Assistant Professor, Accounting; University of Illinois, Urbana-Champaign, PhD

Babak Heydari

Associate Professor, Mechanical and Industrial Engineering; University of California, Berkeley, PhD

Mary J. Hickey

Associate Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, DPT

Carlos Hidrovo Chavez

Assistant Professor, Mechanical and Industrial Engineering; Massachusetts Institute of Technology, PhD

Logan M. Higgins

Lecturer, Biology; Massachusetts Institute of Technology, PhD

Malcolm D. Hill

Associate Professor, Marine and Environmental Sciences; University of California, Santa Cruz, PhD

Charles H. Hillman

Professor, Psychology and Health Sciences; University of Maryland, College Park, PhD

Robin Hillyard

Associate Teaching Professor, Graduate School of Engineering; Cambridge University (United Kingdom), PhD

John Hinson

Assistant Teaching Professor, Theatre; Brandeis University, MFA

Tad Hirsch

Professor, Art + Design; Massachusetts Institute of Technology, PhD

Hubert Ho

Lecturer, Music; University of California, Berkeley, PhD

Marie Odile Hobeika

Postdoctoral Teaching Associate, Communication Studies; University of Pittsburgh, PhD

Lynda Hodgson

Associate Teaching Professor, College of Professional Studies; Virginia Commonwealth University, PhD

Timothy Hoff

Professor, Management and Organizational Development and Public Policy and Urban Affairs; State University of New York, Albany, PhD

Jessica Hoffman

Associate Professor, Applied Psychology; Lehigh University, PhD

Uwe Hohgrawe

Assistant Teaching Professor, College of Professional Studies; University of Wuppertal (Germany), PhD

Udi Hoitash

Associate Professor and Cowan Research Professor, Accounting; Rutgers University, PhD

Trenton Honda

Assistant Clinical Professor, Physician Assistant Program; Northeastern University, PhD

Michael J. Hoppmann

Associate Teaching Professor, Communication Studies; University of Tübingen (Germany), PhD

Adam Hosein

Associate Professor, Philosophy and Religion; Massachusetts Institute of Technology, PhD

Elizabeth M. Howard

Associate Professor, Nursing; Boston College, PhD

Jeffrey P. Howe

Assistant Professor, Journalism; Boston University, MFA

Hanchen Huang

Donald D. Smith Professor in Mechanical Engineering, Mechanical and Industrial Engineering; University of California, Los Angeles, PhD

Anne R. Hughes

Associate Professor, Marine and Environmental Sciences; University of California, Davis, PhD

Francisco Hung

Associate Professor, Chemical Engineering; North Carolina State University, PhD

Matthew Hunt

Professor, Sociology and Anthropology; Indiana University, PhD

Patrick Hurley

Assistant Professor, Accounting; University of Wisconsin, Madison, PhD

Mark Huselid

Distinguished Professor of Workforce Analytics, International Business and Strategy; State University of New York, Buffalo, PhD

Roxana E. Iacob

Research Associate Professor, Chemistry and Chemical Biology; Konstanz University (Germany), PhD

Anthony Iarrobino

Professor, Mathematics; Massachusetts Institute of Technology, PhD

Patricia Illingworth

Professor, Philosophy and Religion; University of California, San Diego, PhD; Boston University, JD

Jennifer Ingemi

Assistant Teaching Professor, Behavioral Neuroscience; University of Massachusetts, PhD

Vinay K. Ingle

Associate Professor, Electrical and Computer Engineering; Rensselaer Polytechnic Institute, PhD

Francesca Inglese

Assistant Professor, Music; Brown University, PhD

Rei Inouye

Associate Teaching Professor, World Languages Center; Temple University, PhD

Stephen S. Intille

Associate Professor, Computer and Information Science and Health Sciences; Massachusetts Institute of Technology, PhD

Efstratios Ioannidis

Assistant Professor, Electrical and Computer Engineering; University of Toronto (Canada), PhD

Roderick Ireland

Distinguished Professor, Criminology and Criminal Justice; Harvard University, LL.M.; Northeastern University, PhD

Derek M. Isaacowitz

Professor, Psychology; University of Pennsylvania, PhD

Jacqueline A. Isaacs

Professor, Mechanical and Industrial Engineering; Massachusetts Institute of Technology, PhD

Michelle L. Israel

Associate Cooperative Education Coordinator, College of Science; Northeastern University, MS

Nathan E. Israeloff

Associate Professor, Physics; University of Illinois, Urbana-Champaign, PhD

Alexander R. Ivanov

Associate Professor, Chemistry and Chemical Biology; Russian Academy of Science, Institute of Bioorganic Chemistry (Moscow), PhD

Maura Daly Iversen

Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Harvard University, SD; Massachusetts General Hospital Institute of Health Professions, DPT

Julia Ivy

Associate Teaching Professor, International Business and Strategy; Lancaster University (United Kingdom), PhD

Denise Jackson

Associate Professor, Psychology; University of Pittsburgh, PhD

Ellen Jackson

Assistant Teaching Professor, Writing Program; Stanford University, MFA

Sarah Jackson

Assistant Professor, Communication Studies; University of Minnesota, PhD

William J. Jackson

Senior Cooperative Education Coordinator, College of Arts, Media and Design; University of Massachusetts, Boston, MEd

Michelle Jacobs

Assistant Clinical Professor, Pharmacy and Health Systems Sciences; University of California, San Francisco, PharmD

Beverly Jaeger-Helton

Teaching Professor, Mechanical and Industrial Engineering; Northeastern University, PhD

Michael Jaeggli

Assistant Teaching Professor, Bioengineering; Clemson University, PhD

Nader Jalili

Professor, Mechanical and Industrial Engineering; University of Connecticut, PhD

Safa Jamali

Assistant Professor, Mechanical and Industrial Engineering; Case Western Reserve University, PhD

Bogume Jang

Lecturer, Mathematics; Purdue University, PhD

Solomon M. Jekel

Associate Professor, Mathematics; Dartmouth College, PhD

Qingying Jia

Research Assistant Professor, Chemistry and Chemical Biology; Illinois Institute of Technology, PhD

Benedict Jimenez

Associate Professor, Political Science; University of Illinois, Chicago, PhD

Holly Jimison

Professor of the Practice, Computer and Information Science and Nursing; Stanford University, PhD

Xiaoning Jin

Assistant Professor, Mechanical and Industrial Engineering; University of Michigan, PhD

Xuemin Jin

Associate Teaching Professor, Mechanical and Industrial Engineering; University of Maryland, PhD

Donghee Jo

Assistant Professor, Economics; Duke University, MA

Dinesh John

Assistant Professor, Health Sciences; University of Tennessee, PhD

Brooke Johnson

Assistant Cooperative Education Coordinator, D'Amore-McKim School of Business; Boston College, MEd

Steven Johnson

Assistant Cooperative Education Coordinator, College of Engineering; Suffolk University, MS

Vanessa D. Johnson

Associate Professor, Applied Psychology; Western Michigan University, PhD

Kimberly Jones

Associate Teaching Professor, International Affairs; Northeastern University, PhD

Rachel Jones

Associate Professor, Nursing; New York University, PhD

Thomas Jones

Associate Professor, Sociology and Anthropology and Sociology and Anthropology; Princeton University, PhD

Dierdre Jordan

Associate Cooperative Education Coordinator, Bouvé College of Health Sciences; Northeastern University, MS

Tiffany Joseph

Associate Professor, Sociology and Anthropology and International Affairs; University of Michigan, PhD

Alison Joyce

Assistant Cooperative Education Coordinator, College of Engineering; Ohio University, MEd

Maria Jump

Associate Teaching Professor, Computer and Information Science; University of Texas, Austin, PhD

Yung Joon Jung

Professor, Mechanical and Industrial Engineering; Rensselaer Polytechnic Institute, PhD

Jeffrey Juris

Associate Professor, Sociology and Anthropology; University of California, Berkeley, PhD

David R. Kaeli

College of Engineering Distinguished Professor, Electrical and Computer Engineering; Rutgers University, PhD

Sallyann Kakas

Assistant Cooperative Education Coordinator, Finance; Northeastern University, BS

Jayant Kale

Professor and Philip R. McDonald Chair, Finance; University of Texas, Austin, PhD

Sagar V. Kamarthi

Professor, Mechanical and Industrial Engineering; Pennsylvania State University, PhD

John Kane

Lecturer, Art + Design; Yale University, BA

Mary M. Kane

Senior Cooperative Education Coordinator, D'Amore-McKim School of Business; University of Massachusetts, Boston, MEd

Michael Kane

Assistant Professor, Civil and Environmental Engineering; University of Michigan, PhD

Sarah Kanouse

Associate Professor, Art + Design; University of Illinois, Urbana-Champaign, MFA

Carla Kaplan

Davis Distinguished Professor in American Literature, English and Women's, Gender, and Sexuality Studies; Northwestern University, PhD

Swastik Kar

Associate Professor, Physics; Indian Institute of Physics (India), PhD

Samina Karim

Professor, Entrepreneurship and Innovation; University of Michigan, PhD

Alain S. Karma

College of Arts and Sciences Distinguished Professor, Physics; University of California, Santa Barbara, PhD

Edward Katz

Associate Teaching Professor, Computer and Information Science; University of Louisiana, Lafayette, PhD

Ralph Katz

Professor, Entrepreneurship and Innovation; University of Pennsylvania, PhD

Jonathan Kaufman

Professor, Journalism; Harvard University, MA

William Kay

Associate Professor, Political Science; Indiana University, PhD

Bret Keeling

Associate Teaching Professor, Writing Program; University of Washington, PhD

Maureen Kelleher

Associate Professor, Sociology and Anthropology; University of Missouri, Columbia, PhD

Karen P. Kelley

Senior Cooperative Education Coordinator, College of Engineering; Northeastern University, MEd

Ryann Kelley

Associate Cooperative Education Coordinator, Finance; Northeastern University, MEd

Thomas M. Kelley

Lecturer, Physics; University of Minnesota, PhD

Kathleen Kelly

Professor, English; University of North Carolina, Chapel Hill, PhD

Mary Kelting

Associate Professor, Philosophy and Religion; University of Wisconsin, Madison, PhD

Daniel D. Kennedy

Associate Professor, Journalism; Boston University, MLA

Aileen Kent Yates

Assistant Cooperative Education Coordinator, College of Computer and Information Science; University of Massachusetts, Amherst, BA

Heidi Kevoe Feldman

Associate Professor, Communication Studies; Rutgers University, PhD

Leila Keyvani Someh

Assistant Teaching Professor, Engineering; Northeastern University, PhD

Ban-An Khaw

Professor, Pharmaceutical Sciences; Boston College, PhD

Konstantin Khrapko

Professor, Biology and Pharmaceutical Sciences; Engelhardt Institute of Molecular Biology, Moscow (Russia), PhD

Ilham Khuri-Makdisi

Associate Professor, History; Harvard University, PhD

Sheri Kiami

Assistant Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Simmons College, DPT

Angela Kilby

Assistant Professor, Economics; Massachusetts Institute of Technology, PhD

Daniel Kim

Associate Professor, Health Sciences; University of Toronto (Canada), MD; Harvard University, PhD

Eunsong Kim

Assistant Professor, English; University of Texas, Austin, PhD

Jonghan Kim

Assistant Professor, Pharmaceutical Sciences; Ohio State University, PhD

Miso Kim

Assistant Professor, Art + Design; Carnegie Mellon University, PhD

Nancy S. Kim

Associate Professor, Psychology; Yale University, PhD

Somy Kim

Associate Teaching Professor, Writing Program; University of California, San Diego, PhD

Tiffany Kim

Assistant Clinical Professor, Nursing; University of Pennsylvania, PhD

Yong-Bin Kim

Professor, Electrical and Computer Engineering; Colorado State University, PhD

John Kimani

Assistant Teaching Professor, Electrical and Computer Engineering; University of Wisconsin, Milwaukee, PhD

David L. Kimbro

Assistant Professor, Marine and Environmental Sciences; University of California, Davis, PhD

Nancy Kimelman

Assistant Teaching Professor, Economics; Brown University, PhD

Nancy Kindelan

Professor, Theatre; University of Wisconsin, Madison, PhD

Christopher K. King

Professor, Mathematics; Harvard University, PhD

Donald R. King

Associate Professor, Mathematics; Massachusetts Institute of Technology, PhD

Margaret Kirchoff

Assistant Teaching Professor, College of Professional Studies; George Washington University, EdD

Engin Kirda

Professor, Computer and Information Science and Electrical and Computer Engineering; Technical University of Vienna (Austria), PhD

Rein U. Kirss

Associate Professor, Chemistry and Chemical Biology; University of Wisconsin, Madison, PhD

Jennifer L. Kirwin

Clinical Professor, Pharmacy and Health Systems Sciences; Northeastern University, PharmD

Risa Kitagawa

Assistant Professor, Political Science and International Affairs; Stanford University, PhD

Mark Kjellman

Assistant Teaching Professor, Writing Program; Boston University, PhD

Alan Klein

Professor, Sociology and Anthropology; State University of New York, Buffalo, PhD

Sarah Klionsky

Assistant Cooperative Education Coordinator, College of Science; University of Wisconsin, Madison, MA

Kristian Kloeckl

Associate Professor, Art + Design and Architecture; University of Venice (Italy), PhD

Thomas Koenig

Professor, Sociology and Anthropology; University of California, Santa Barbara, PhD

Mieczyslaw M. Kokar

Professor, Electrical and Computer Engineering; University of Wroclaw (Poland), PhD

Tali Konry

Assistant Professor, Pharmaceutical Sciences; Ben Gurion University (Israel), PhD

Constantin Konstantopoulos

Associate Teaching Professor, Graduate School of Engineering; Boston University, PhD

Abigail N. Koppes

Assistant Professor, Chemical Engineering; Rensselaer Polytechnic Institute, PhD

Ryan Koppes

Assistant Professor, Chemical Engineering; Rensselaer Polytechnic Institute, PhD

Sarah Kostanski

Assistant Cooperative Education Coordinator, College of Engineering; Framingham State University, MS

Ilka Kostka

Assistant Teaching Professor, College of Professional Studies; New York University, PhD

Harilaos Koutsopoulos

Professor, Civil and Environmental Engineering; Massachusetts Institute of Technology, PhD

Linda Kowalczyk

Professor of the Practice, Public Policy and Urban Affairs; Johns Hopkins University, PhD

Gregory J. Kowalski

Associate Professor, Mechanical and Industrial Engineering; University of Wisconsin, Madison, PhD

Sergey Kravchenko

Professor, Physics; Institute of Solid State Physics (Russia), PhD

Caroline Krehbiel

Visiting Assistant Professor, Applied Psychology; Lehigh University, PhD

Dmitri Krioukov

Associate Professor, Physics; Old Dominion University, PhD

Ganesh Krishnamoorthy

Professor, Accounting; University of Southern California, PhD

Karthik Krishnan

Associate Professor, Finance; Boston College, PhD

Louis J. Kruger

Associate Professor, Applied Psychology; Rutgers University, PsyD

Laura Kuhl

Assistant Professor, Public Policy and Urban Affairs and International Affairs; Tufts University, PhD

Abhishek Kumar

Assistant Teaching Professor, Mechanical and Industrial Engineering; University of Michigan, PhD

Venkat Kuppuswamy

Assistant Professor, Entrepreneurship and Innovation; Harvard Business School, DBA

Jessica Kurr

Postdoctoral Teaching Associate, Communication Studies; Pennsylvania State University, PhD

Steven R. Kursh

Associate Academic Specialist, Finance; University of Pennsylvania, PhD

John Kwoka

Neal F. Finnegan Distinguished Professor, Economics; University of Pennsylvania, PhD

Michelle Laboy

Assistant Professor, Architecture; University of Michigan, MArch

John LaBrie

Professor of the Practice, College of Professional Studies; University of Pennsylvania, EdD

Jamie Ladge

Associate Professor, Management and Organizational Development; Boston College, PhD

Jay Laird

Assistant Teaching Professor, College of Professional Studies; Lesley University, MFA

Venkatraman Lakshmibai

Professor, Mathematics; Tata University (India), PhD

Charlotte Lam

Assistant Cooperative Education Coordinator, College of Science; California State University, Sacramento, MA

Joan LaMachia

Associate Cooperative Education Coordinator, College of Social Sciences and Humanities; Boston College, MEd

Anna Lamin

Associate Professor and Matthew Eagan Faculty Fellow, International Business and Strategy; University of Minnesota, PhD

Jason Lancaster

Associate Clinical Professor, Pharmacy and Health Systems Sciences; Massachusetts College of Pharmacy, PharmD

William Lancaster

Senior Lecturer, Communication Studies; Michigan State University, MA

Lucas J. Landherr

Associate Teaching Professor, Chemical Engineering; Cornell University, PhD

Theodore Landmark

Distinguished Professor, Public Policy and Urban Affairs; Boston University, PhD

Henry W. Lane

Professor, International Business and Strategy; Harvard University, DBA

David Lang

Lecturer, Mathematics; Boston College, PhD; Northeastern University, PhD

Timothy Lannin

Assistant Teaching Professor, Bioengineering; Cornell University, PhD

Amy Lantinga

Associate Teaching Professor, College of Professional Studies; University of Tennessee, EdD

Denise Lapon Garcia

Associate Professor, Political Science and International Affairs; University of Geneva (Switzerland), PhD

Philip Larese-Casanova

Associate Professor, Civil and Environmental Engineering; University of Iowa, PhD

Sonya L. Larrieux

Associate Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, PhD

Barbara Larson

Associate Academic Specialist, Management and Organizational Development; Harvard Business School, DBA

Elizabeth Larson

Assistant Cooperative Education Coordinator, D'Amore-McKim School of Business; Northeastern University, MBA

Kimberly Larson

Associate Teaching Professor, College of Professional Studies; Drexel University, PhD

Felicia G. Lassk

Associate Professor, Marketing; University of South Florida, PhD

Amanda Reeser Lawrence

Associate Professor, Architecture; Harvard University, PhD

David M. Lazer

Distinguished Professor, Political Science and Computer and Information Science; University of Michigan, Ann Arbor, PhD

Christina Lee

Assistant Professor, Applied Psychology; New York University, PhD

Cynthia Lee

Professor, Management and Organizational Development; University of Maryland, PhD

Doreen Lee

Associate Professor, Sociology and Anthropology; Cornell University, PhD

Jung Lee

Associate Professor, Philosophy and Religion; Brown University, PhD

Kristen Lee

Associate Teaching Professor, College of Professional Studies; Northeastern University, EdD

Lee-Peng Lee

Lecturer, Mathematics; Massachusetts Institute of Technology, PhD

Matt Lee

Teaching Professor, Human Services; University of Illinois, Urbana-Champaign, PhD

Yang W. Lee

Associate Professor, Supply Chain and Information Management; Massachusetts Institute of Technology, PhD

Carolyn W. T. Lee-Parsons

Associate Professor, Chemical Engineering and Chemistry and Chemical Biology; Cornell University, PhD

Miriam E. Leeser

Professor, Electrical and Computer Engineering; Cambridge University (United Kingdom), PhD

Laurel Leff

Associate Professor, Journalism; Yale University, MA

Lori Lefkowitz

Ruderman Professor of Jewish Studies, Jewish Studies and English; Brown University, PhD

Patrick Legros

Distinguished Professor, Economics; California Institute of Technology, PhD

Bradley M. Lehman

Professor, Electrical and Computer Engineering; Georgia Institute of Technology, PhD

Robert Lentz

Associate Academic Specialist, Entrepreneurship and Innovation; Babson College, MBA

Benjamin Lerner

Assistant Teaching Professor, Computer and Information Science;
University of Washington, PhD

Neal Lerner

Professor, English; Boston University, EdD

Marina Leslie

Associate Professor, English; Yale University, PhD

Hanoch Lev-Ari

Professor, Electrical and Computer Engineering; Stanford University, PhD

Danielle Levac

Assistant Professor, Physical Therapy, Movement, and Rehabilitation
Sciences; McMaster University (Canada), PhD

Tatyana Levchenko

Research Assistant Professor, Pharmaceutical Sciences; Academy of
Medical Sciences Moscow (Russia), PhD

Yiannis A. Levendis

College of Engineering Distinguished Professor, Mechanical and Industrial
Engineering; California Institute of Technology, PhD

Elinor Levine

Assistant Cooperative Education Coordinator, D'Amore-McKim School of
Business; University of Massachusetts, Amherst, MEd

Herbert Levine

Professor, Physics and Bioengineering; Princeton University, PhD

Kim Lewis

University Distinguished Professor, Biology; Moscow University (Russia),
PhD

Laura H. Lewis

Cabot Professor, Chemical Engineering and Mechanical and Industrial
Engineering; University of Texas, Austin, PhD

David J. Lewkowicz

Professor, Communication Sciences and Disorders; City University of New
York, Hunter College, PhD

Ang Li

Assistant Professor, Architecture; Princetown University, MArch

Chieh Li

Associate Professor, Applied Psychology; University of Massachusetts,
Amherst, EdD

Rui Li

Associate Clinical Professor, Health Sciences; Baylor University, PhD

Robert Lieb

Professor, Supply Chain and Information Management; University of
Maryland, DBA

Karl J. Lieberherr

Professor, Computer and Information Science; Eidgenössische
Technische Hochschule Zürich (Switzerland), PhD

Karin N. Lifter

Professor, Applied Psychology; Columbia University, PhD

Xue Lin

Assistant Professor, Electrical and Computer Engineering; University of
Southern California, PhD

Yingzi Lin

Associate Professor, Mechanical and Industrial Engineering; University of
Saskatchewan (Canada), PhD

Alisa K. Lincoln

Professor, Sociology and Anthropology and Health Sciences; Columbia
University, PhD

Katherine Lind

Postdoctoral Teaching Associate, Communication Studies; Indiana
University, PhD

John J. Lindhe

Senior Lecturer, Mathematics; Northeastern University, MA

Gabor P. Lippner

Assistant Professor, Mathematics; Eotvos University (Hungary), PhD

James Lipsky

Associate Academic Specialist, American Sign Language; Boston
University, MA

Heather A. Littlefield

Associate Teaching Professor, Linguistics; Boston University, PhD

Kelvin Liu

Associate Professor, Accounting; University of South Carolina, PhD

Xiaoping Liu

Visiting Assistant Professor, Supply Chain and Information Management;
University of Massachusetts, Lowell, PhD

Yang Liu

Assistant Professor, Mechanical and Industrial Engineering; Columbia
University, PhD

Yongmin Liu

Assistant Professor, Mechanical and Industrial Engineering and Electrical
and Computer Engineering; University of California, Berkeley, PhD

Ioannis Livanis

Associate Teaching Professor, International Affairs and Political Science;
University of Florida, PhD

Carol Livermore

Associate Professor, Mechanical and Industrial Engineering; Harvard
University, PhD

Martha Loftus

Assistant Teaching Professor, College of Professional Studies; Harvard
University, EdD

Diomedes E. Logothetis

Professor, Pharmaceutical Sciences; Harvard University, PhD

Mark Lomanno

Visiting Assistant Teaching Professor, Music; University of Texas, Austin,
PhD

Fabrizio Lombardi

International Test Conference Professor, Electrical and Computer
Engineering; University of London (United Kingdom), PhD

Marissa Lombardi

Assistant Teaching Professor, College of Professional Studies;
Northeastern University, EdD

Guido Lopez

Associate Teaching Professor, College of Professional Studies;
Northeastern University, PhD

Steven A. Lopez

Assistant Professor, Chemistry and Chemical Biology; University of
California, Los Angeles, PhD

Connie Lorette

Assistant Clinical Professor, Nursing; Boston College, PhD

Ralph H. Loring

Associate Professor, Pharmaceutical Sciences; Cornell University, PhD

Ivan Loseu

Professor, Mathematics; Moscow State University (Russia), PhD

Daniel Lothian

Visiting Scholar, Journalism; American University, MA

Kathleen E. Lotterhos

Assistant Professor, Marine and Environmental Sciences; Florida State
University, PhD

Salim A. Lotuff III

Teaching Professor, Communication Studies; Northeastern University, MA

Deirdre Loughridge

Assistant Professor, Music; University of Pennsylvania, PhD

Jennifer O. Love

Associate Academic Specialist, Engineering; University of Iowa, MS

Timothy Love

Associate Professor, Architecture; Harvard University, MArch

William Lovely

Assistant Academic Specialist, International Business and Strategy;
Northeastern University, DLP

Amy Shirong Lu

Assistant Professor, Communication Studies and Health Sciences;
University of North Carolina, Chapel Hill, PhD

Long Lu

Assistant Professor, Computer and Information Science; Georgia Institute
of Technology, PhD

Mary Ludden

Assistant Teaching Professor, College of Professional Studies; Walden
University, PhD

Razvan Lungeanu

Assistant Professor, Entrepreneurship and Innovation; Northwestern
University, PhD

Katherine Luongo

Associate Professor, History; University of Michigan, Ann Arbor, PhD

Steven Lustig

Associate Professor, Chemical Engineering; Purdue University, PhD

David E. Luzzi

Professor, Mechanical and Industrial Engineering; Northwestern
University, PhD

Vasiliki Lykourinou

Assistant Teaching Professor, Chemistry and Chemical Biology;
University of South Florida, PhD

Jun Ma

Associate Professor, Economics; University of Washington, PhD

Kayse Maass

Assistant Professor, Mechanical and Industrial Engineering; University of
Michigan, PhD

Patricia A. Mabrouk

Professor, Chemistry and Chemical Biology; Massachusetts Institute of
Technology, PhD

Esther MacKenzie

Visiting Clinical Instructor, Nursing; Boston University, MA

Andrew Mackie

Assistant Clinical Professor, Physician Assistant Program; University of
Nebraska, MS

Emanuele Macri

Associate Professor, Mathematics; SISSA (Italy), PhD

Jeanne Madden

Associate Professor, Pharmacy and Health Systems Sciences; Harvard
University, PhD

Kristin Madison

Professor, Health Sciences and Law; Stanford University, PhD

Tracy Magee

Assistant Clinical Professor, Nursing; Boston College, PhD

Bala Maheswaran

Teaching Professor, Engineering; Northeastern University, PhD

Debra Mahfouz

Associate Clinical Professor, Pharmacy and Health Systems Sciences;
University of Rhode Island, PharmD

Elizabeth Mahler

Associate Teaching Professor, College of Professional Studies; George
Washington University, EdD

Luigia Maiellaro

Teaching Professor, World Languages Center; Russian State University
for the Humanities (Russia), PhD

Lee Makowski

Professor, Bioengineering and Chemistry and Chemical Biology;
Massachusetts Institute of Technology, PhD

Purnima Makris

Associate Professor, Electrical and Computer Engineering;
Massachusetts Institute of Technology, PhD

Alexandros Makriyannis

George D. Behrakis Chair and Professor, Center for Drug Discovery and
Chemistry and Chemical Biology; University of Kansas, PhD

Michael Malamas

Research Associate Professor, Center for Drug Discovery and Chemistry
and Chemical Biology; University of Pennsylvania, PhD

Mario Maletta

Professor, Accounting; University of Massachusetts, Amherst, PhD

Shiti Malhotra

Lecturer, Linguistics; University of Maryland, PhD

Veronika Maliborska

Assistant Teaching Professor, College of Professional Studies; Purdue University, PhD

Mikhail B. Malioutov

Professor, Mathematics; Moscow State University (Russia), PhD

Andrew Mall

Assistant Professor, Music; University of Chicago, PhD

Craig E. Maloney

Associate Professor, Mechanical and Industrial Engineering; University of California, Santa Barbara, PhD

Roman Manetsch

Associate Professor, Chemistry and Chemical Biology and Pharmaceutical Sciences; University of Basel (Switzerland), PhD

John Manferdelli

Professor of the Practice, Computer and Information Science; University of California, Berkeley, PhD

Swapnil Maniar

Professor of the Practice, Health Sciences; Johns Hopkins University, PhD

Justin Manjourides

Assistant Professor, Health Sciences; Harvard University, PhD

Emily Mann

Teaching Professor, Human Services; University of Wisconsin, Madison, PhD

James M. Manning

Professor, Biology; Tufts University, PhD

Peter Manning

Elmer V.H. and Eileen M. Brooks Chair in Policing, Criminology and Criminal Justice; Duke University, PhD

Moirá Mannix Votel

Associate Cooperative Education Coordinator, Bouvé College of Health Sciences; Columbia University, MA

Peter Manolios

Professor, Computer and Information Science; University of Texas, Austin, PhD

Valentina Marano

Assistant Professor, International Business and Strategy; University of South Carolina, PhD

Janice Maras

Assistant Teaching Professor, Health Sciences; Northeastern University, EdD

Krassimir Marchev

Professor of the Practice, College of Professional Studies; Northeastern University, PhD

Edwin Marengo Fuentes

Associate Professor, Electrical and Computer Engineering; Northeastern University, PhD

Donald G. Margotta

Associate Professor, Finance; University of North Carolina, Chapel Hill, PhD

Alina Marian

Professor, Mathematics; Harvard University, PhD

Tucker Marion

Associate Professor, Entrepreneurship and Innovation; Pennsylvania State University, PhD

Robert S. Markiewicz

Professor, Physics; University of California, Berkeley, PhD

Alycia Markowski

Associate Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, DPT

Mindy Marks

Associate Professor, Economics; Washington University, PhD

Stacy Marsella

Professor, Computer and Information Science and Psychology; Rutgers University, PhD

Ineke Marshall

Professor, Sociology and Anthropology and Criminology and Criminal Justice; Bowling Green State University, PhD

Dayna L. Martinez

Assistant Teaching Professor, Mechanical and Industrial Engineering; University of South Florida, Tampa, PhD

Ramiro Martinez

Professor, Criminology and Criminal Justice and Sociology and Anthropology; Ohio State University, PhD

José Angel Martínez-Lorenzo

Assistant Professor, Mechanical and Industrial Engineering and Electrical and Computer Engineering; Universidad de Vigo (Spain), PhD

Alexander Martsinkovsky

Associate Professor, Mathematics; Brandeis University, PhD

David Massey

Professor, Mathematics; Duke University, PhD

Jude E. Mathews

Associate Teaching Professor, Chemistry and Chemical Biology; Clemson University, PhD

Kristen Mathieu Gonzalez

Clinical Instructor, Nursing; University of Phoenix, MS

Daniele Mathras

Assistant Professor, Marketing; Arizona State University, PhD

Thomas M. Matta

Assistant Clinical Professor, Pharmacy and Health Systems Sciences; Xavier University of Louisiana, PharmD

Carla Mattos

Professor, Chemistry and Chemical Biology; Massachusetts Institute of Technology, PhD

Lucy Maulsby

Associate Professor, Architecture; Columbia University, PhD

Ernest Mauristhene

Associate Cooperative Education Coordinator, D'Amore-McKim School of Business; Hardin-Simmons University, MBA

Jessica Maxwell

Associate Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Boston University, PhD; Massachusetts General Hospital Institute of Health Professions, DPT

William Mayer

Professor, Political Science; Harvard University, PhD

Mary Mayville

Assistant Clinical Professor, Nursing; Northeastern University, DNP

Dori P. Mazor

Associate Cooperative Education Coordinator, College of Arts, Media and Design; Brandeis University, MBA

Charn McAllister

Assistant Professor, Management and Organizational Development; Florida State University, PhD

Michelle McAllister

Visiting Assistant Professor, Accounting; Florida State University, PhD

Laurie McCadden

Clinical Instructor, Nursing; University of Massachusetts, Lowell, MSN

Paulette McCarty

Assistant Academic Specialist, Management and Organizational Development; University of Tennessee, PhD

Jane McCool

Assistant Clinical Professor, Nursing; University of Rhode Island, PhD

Al McCready

Assistant Teaching Professor, College of Professional Studies; George Washington University, PhD

Eileen McDonagh

Professor, Political Science; Harvard University, PhD

Ann McDonald

Associate Professor, Art + Design; Yale University, MFA

Matthew McDonald

Associate Professor, Music; Yale University, PhD

Brianne McDonough

Assistant Cooperative Education Coordinator, College of Computer and Information Science; Salem State University, MS

Melissa McElligott

Assistant Teaching Professor, Biology; Northeastern University, PhD

Seamus McGovern

Lecturer, Supply Chain and Information Management; Northeastern University, PhD

Nicol E. McGruer

Professor, Electrical and Computer Engineering; Michigan State University, PhD

Jean McGuire

Professor of the Practice, Health Sciences; Brandeis University, PhD

Hugh McManus

Associate Teaching Professor, Mechanical and Industrial Engineering; Stanford University, PhD

Cristine McMartin-Miller

Associate Teaching Professor, College of Professional Studies; Purdue University, PhD

Joseph McNabb

Professor of the Practice, College of Professional Studies; Northeastern University, PhD

Robert C. McOwen

Professor, Mathematics; University of California, Berkeley, PhD

Frances Nelson McSherry

Teaching Professor, Theatre; New York University, MFA

Iraz Mehdi

Assistant Cooperative Education Coordinator, College of Engineering; California State University, Long Beach, MS

Emanuel S. Melachrinoudis

Professor, Mechanical and Industrial Engineering; University of Massachusetts, Amherst, PhD

Waleed Meleis

Associate Professor, Electrical and Computer Engineering; University of Michigan, PhD

Susan L. Mello

Assistant Professor, Communication Studies; University of Pennsylvania, PhD

Tina J. Mello

Assistant Cooperative Education Coordinator, College of Science; Boston College, MA

Richard H. Melloni Jr.

Professor, Psychology; University of Massachusetts, PhD

Tommaso Melodia

Associate Professor, Electrical and Computer Engineering; Georgia Institute of Technology, PhD

Latika Menon

Associate Professor, Physics; Tata Institute of Fundamental Research, Bombay (India), PhD

Francisco Mesch

Assistant Cooperative Education Coordinator, College of Computer and Information Science; Washington State University, MS

Hameed Metghalchi

Professor, Mechanical and Industrial Engineering; Massachusetts Institute of Technology, ScD

Laura Meyer

Assistant Cooperative Education Coordinator, Graduate School of Engineering; Cleveland State University, MEd

Marc H. Meyer

Robert J. Shillman Professor of Entrepreneurship and Matthews Distinguished University Professor, Entrepreneurship and Innovation; Massachusetts Institute of Technology, PhD

Michael Meyer

Associate Teaching Professor, Philosophy and Religion; Boston University, PhD

Ningfang Mi

Associate Professor, Electrical and Computer Engineering; University of Texas, Dallas, MS

Vidoje Mihajlovikj

Lecturer, Computer and Information Science; Clarkson University, PhD

Lara Milane

Assistant Teaching Professor, Pharmaceutical Sciences; Northeastern University, PhD

Loiza Miles

Assistant Academic Specialist, World Languages Center; Sorbonne University (France), MA

William Miles

Professor, Political Science; Tufts University, PhD

Danielle M. Miller

Assistant Clinical Professor, Pharmacy and Health Systems Sciences; Northeastern University, PharmD

Edward Miller

Assistant Teaching Professor, College of Professional Studies; Boston College, PhD

Gregory Miller

Associate Professor, Pharmaceutical Sciences; University of New York, PhD

Heather Miller

Assistant Clinical Professor, Computer and Information Science; Ecole Polytechnique Federale de Lausanne (Switzerland), PhD

Joanne L. Miller

Matthews Distinguished University Professor, Psychology; University of Minnesota, PhD

Matthew Miller

Professor, Health Sciences; Yale University, MD; Harvard University, ScD

Renee Miller

Distinguished Professor, Computer and Information Science; University of Wisconsin, Madison, PhD

Ennio Mingolla

Professor, Communication Sciences and Disorders; University of Connecticut, PhD

Marilyn L. Minus

Associate Professor, Mechanical and Industrial Engineering; Georgia Institute of Technology, PhD

Alan Mislove

Associate Professor, Computer and Information Science; Rice University, PhD

Cheryl Mitteness

Academic Specialist, Entrepreneurship and Innovation; University of Louisville, PhD

Nancy Mizzoni

Clinical Instructor, Nursing; Northeastern University, MS

Anahit Mkrtchyan

Assistant Professor, Finance; Pennsylvania State University, PhD

Sarah Mockler

Assistant Cooperative Education Coordinator, College of Engineering; Boston College, MA

Alicia Modestino

Associate Professor, Public Policy and Urban Affairs and Economics; Harvard University, PhD

Valentine Moghadam

Professor, International Affairs; American University, PhD

Mohsen Moghaddam

Assistant Professor, Mechanical and Industrial Engineering; Purdue University, PhD

Shan Mohammed

Associate Clinical Professor, Health Sciences; Case Western Reserve University, MD

Changiz Mohiyeddini

Associate Professor, Applied Psychology; University of Trier (Germany), PsyD

Beth Molnar

Associate Professor, Health Sciences; Harvard University, ScD

James Monaghan

Assistant Professor, Biology; University of Kentucky, PhD

Yasmil Montes

Assistant Cooperative Education Coordinator, College of Computer and Information Science; Cambridge College, MS

Susan F. Montgomery

Senior Academic Specialist, Entrepreneurship and Innovation and Law; Northeastern University, JD

Robert M. Mooradian

Professor and Harding Research Professor, Finance; University of Pennsylvania, PhD

Rebekah Moore

Visiting Assistant Professor, Music; Indiana University, PhD

Enrique F. Moreno

Senior Lecturer, Physics; Universidad Nacional de La Plata (Argentina), PhD

Kimberly Moreno

Professor, Accounting; University of Massachusetts, Amherst, PhD

Joanne Morreale

Associate Professor, Media and Screen Studies; Temple University, PhD

Mounira Morris

Assistant Teaching Professor, College of Professional Studies; University of Massachusetts, Amherst, EdD

Kristen Morse

Assistant Cooperative Education Coordinator, Bouvé College of Health Sciences; Ithaca College, DPT

Hossein Mosallaei

Professor, Electrical and Computer Engineering; University of California, Los Angeles, PhD

Edward Moss

Associate Teaching Professor, Writing Program; Emerson College, MFA

Lorraine Ann Mountain

Senior Cooperative Education Coordinator, College of Engineering; Tufts University, MS

Amy Mueller

Assistant Professor, Civil and Environmental Engineering and Marine and Environmental Sciences; Massachusetts Institute of Technology, PhD

Sinan Muftu

Professor, Mechanical and Industrial Engineering; University of Rochester, PhD

Tania Muino

Assistant Academic Specialist, World Languages Center; University of Barcelona (Spain), MA

Sanjeev Mukerjee

Professor, Chemistry and Chemical Biology; Texas AM University, PhD

Jay Mulki

Associate Professor, Marketing; University of South Florida, PhD

Anthony Mullen

Associate Teaching Professor, Computer and Information Science; University of Groningen (Netherlands), PhD

Patrick Mullen

Associate Professor, English; University of Pittsburgh, PhD

Seth Mulliken

Assistant Teaching Professor, Media and Screen Studies; North Carolina State University, PhD

Samuel E. Munoz

Assistant Professor, Marine and Environmental Sciences and Civil and Environmental Engineering; University of Wisconsin, Madison, PhD

Kellianne Murphy

Senior Cooperative Education Coordinator, College of Arts, Media and Design; Northeastern University, MA

Lauren A. Murphy

Assistant Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Portland State University, PhD

Robert Murray

Assistant Academic Specialist, Supply Chain and Information Management; Harvard Business School, MBA

Shashi K. Murthy

Professor, Chemical Engineering; Massachusetts Institute of Technology, PhD

Hande Musdal Oudemir

Assistant Teaching Professor, Mechanical and Industrial Engineering; Northeastern University, PhD

Cecelia Musselman

Associate Teaching Professor, Writing Program; Columbia University, PhD

Shakir Mustafa

Teaching Professor, World Languages Center; Boston University, PhD

Andrew Myers

Associate Professor, Civil and Environmental Engineering; Stanford University, PhD

David Myers

Associate Teaching Professor, Finance; University of Washington, PhD

Laura Mylott

Clinical Professor, Nursing; Boston College, PhD

Nada Naji

Lecturer, Computer and Information Science; University of Neuchatel (Switzerland), PhD

Thomas K. Nakayama

Professor, Communication Studies; University of Iowa, PhD

Laurie Nardone

Associate Teaching Professor, English; Emory University, PhD

Pran Nath

Matthews Distinguished University Professor, Physics; Stanford University, PhD

Hamid Nayeb-Hashemi

Professor, Mechanical and Industrial Engineering; Massachusetts Institute of Technology, PhD

Collette Ncube

Assistant Professor, Health Sciences; University of Pittsburgh, PhD

Brent Nelson

Associate Professor, Physics; University of California, Berkeley, PhD

Carl W. Nelson

Associate Professor, International Business and Strategy; University of Manchester (United Kingdom), PhD

Laura Nelson

Assistant Professor, Sociology and Anthropology; University of California, Berkeley, PhD

Huy Nguyen

Assistant Professor, Computer and Information Science; Princeton University, PhD

Julie Nguyen

Assistant Cooperative Education Coordinator, College of Engineering; Columbia University, MA

Jennifer Nichol

Assistant Professor, Accounting; University of Illinois, Urbana-Champaign, PhD

Sandy Nickel

Assistant Teaching Professor, College of Professional Studies; University of Iowa, PhD

Mark J. Niedre

Associate Professor, Bioengineering; University of Toronto (Canada), PhD

Spyridon Nikas

Research Associate Professor, Center for Drug Discovery; Aristotle University (Greece), PhD

Jelena Nikolic

Assistant Teaching Professor, Economics; Nottingham University (United Kingdom), PhD

Matthew Nippins

Assistant Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Massachusetts General Hospital Institute of Health Professions, DPT

Matthew C Nisbet

Professor, Communication Studies; Cornell University, PhD

Cristina Nita-Rotaru

Professor, Computer and Information Science; Johns Hopkins University, PhD

Daniel Noemi Voionmaa

Associate Professor, Cultures, Societies, and Global Studies; Yale University, PhD

Alison Nogueira

Associate Cooperative Education Coordinator, College of Engineering; Suffolk University, MEd

David Nolan

Associate Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Massachusetts General Hospital Institute of Health Professions, DPT

Kimberly Nolan

Assistant Teaching Professor, College of Professional Studies; University of Vermont, EdD

Carey Noland

Associate Professor, Communication Studies; Ohio University, PhD

Ellen Noonan

Associate Teaching Professor, Writing Program; Emerson College, MFA

Matthew Noonan

Associate Teaching Professor, Writing Program; Massachusetts College of Art, MFA

Guevara Noubir

Professor, Computer and Information Science; Swiss Federal Institute of Technology, Lausanne (Switzerland), PhD

Gilbert Nyaga

Associate Professor and Joe Dichiacchio Faculty Fellow, Supply Chain and Information Management; Michigan State University, PhD

Daniel O'Brien

Assistant Professor, Public Policy and Urban Affairs and Criminology and Criminal Justice; Binghamton University, PhD

Brian O'Connell

Assistant Teaching Professor, Engineering; Tufts University, PhD

Donica O'Malley

Postdoctoral Teaching Associate, Communication Studies; University of Pittsburgh, PhD

Jessica Oakes

Assistant Professor, Bioengineering; University of California, San Diego, PhD

Antonio Ocampo-Guzman

Associate Professor, Theatre; York University (Canada), MFA

Curtis Odom

Visiting Lecturer, Management and Organizational Development; Pepperdine University, EdD

Dietmar Offenhuber

Assistant Professor, Art + Design and Public Policy and Urban Affairs; Massachusetts Institute of Technology, PhD

Marvin Onabajo

Assistant Professor, Electrical and Computer Engineering; Texas AM University, PhD

Kay Onan

Associate Professor, Chemistry and Chemical Biology; Duke University, PhD

Mary Jo Ondrechen

Professor, Chemistry and Chemical Biology; Northwestern University, PhD

Annalisa Onnis-Hayden

Associate Teaching Professor, Civil and Environmental Engineering; University of Cagliari (Italy), PhD

Alina Oprea

Associate Professor, Computer and Information Science; Carnegie Mellon University, PhD

Toyoko J. Orimoto

Assistant Professor, Physics; University of California, Berkeley, PhD

Jessica Ormsby

Assistant Cooperative Education Coordinator, College of Engineering; University of Massachusetts, Boston, MEd

Andrew Orr-Skirvin

Associate Clinical Professor, Pharmacy and Health Systems Sciences; University of Texas, Austin, PharmD

Elika Ortega Guzman

Assistant Professor, Cultures, Societies, and Global Studies; University of Western Ontario (Canada), PhD

Sarah Ostadabbas

Assistant Professor, Electrical and Computer Engineering; University of Texas, Dallas, PhD

Timothy Ouillette

Assistant Teaching Professor, Communication Studies; Art Institute of Boston, MFA

Jane Owens

Associate Professor, Pharmacy and Health Systems Sciences; Pennsylvania State University, PhD

Oyindasola O. Oyelaran

Associate Teaching Professor, Chemistry and Chemical Biology; Harvard University, PhD

Yusuf Ozbek

Associate Teaching Professor, Graduate School of Engineering; Northeastern University, PhD

Sean O'Connell

Assistant Academic Specialist, College of Professional Studies; University of Massachusetts, MA

Catherine O'Connor

Clinical Instructor, Nursing; Boston College, MS

George A. O'Doherty

Professor, Chemistry and Chemical Biology; Ohio State University, PhD

Russ O'Haver

Senior Academic Specialist, Accounting; University of New York, PhD

Peggy L. O'Kelly

Principal Lecturer, Accounting; University of Michigan, MBA

Donald M. O'Malley

Associate Professor, Biology; Harvard University, PhD

Therese M. O'Neil-Pirozzi

Associate Professor, Communication Sciences and Disorders; Boston University, ScD

Taskin Padir

Associate Professor, Electrical and Computer Engineering; Purdue University, PhD

Robert K. Painter

Senior Lecturer, Linguistics; State University of New York, Buffalo, PhD

Himlona Palikhe

Assistant Teaching Professor, Graduate School of Engineering; Texas Tech University, PhD

Costas Panagopoulos

Professor, Political Science; New York University, PhD

Kwamina Panford

Associate Professor, Cultures, Societies, and Global Studies; Northeastern University, PhD

Coleen C. Pantalone

Associate Professor, Finance; Iowa State University, PhD

Themis Papageorge

Associate Clinical Professor, Computer and Information Science; Massachusetts Institute of Technology, PhD

Harikrishnan Parameswaran

Assistant Professor, Bioengineering; Boston University, PhD

Serena Parekh McGushin

Associate Professor, Philosophy and Religion; Boston College, PhD

Jason Parente

Assistant Clinical Professor, Physician Assistant Program; Northeastern University, MS

Melissa Parenti

Assistant Teaching Professor, College of Professional Studies; University of Southern California, EdD

Andrea Parker

Assistant Professor, Computer and Information Science and Health Sciences; Georgia Institute of Technology, PhD

Christopher Parsons

Assistant Professor, History; University of Toronto (Canada), PhD

Nikos Passas

Professor, Criminology and Criminal Justice; University of Edinburgh (Scotland), PhD

Rupal Patel

Professor, Communication Sciences and Disorders and Computer and Information Science; University of Toronto (Canada), PhD

Dipu Patel-Junankar

Assistant Clinical Professor, Physician Assistant Program; University of Nebraska, MPAS

Bryan Patterson

Assistant Teaching Professor, College of Professional Studies; University of Florida, PhD

Mark R. Patterson

Professor, Marine and Environmental Sciences and Civil and Environmental Engineering; Harvard University, PhD

Koen Pauwels

Distinguished Professor, Marketing; University of California, Los Angeles, PhD

Michael Pavel

Professor of the Practice, Computer and Information Science and Health Sciences; New York University, PhD

Spiro Pavlopoulos

Research Associate Professor, Center for Drug Discovery; Victorian College of Pharmacy, Melbourne (Australia), PhD

Virgiliu Pavlu

Associate Teaching Professor, Computer and Information Science; Northeastern University, PhD

Nancy Pawlyshyn

Associate Teaching Professor, College of Professional Studies; Capella University, PhD

Celia Pearce

Associate Professor, Game Design; University of the Arts London (United Kingdom), PhD

Neal J. Pearlmutter

Associate Professor, Psychology; Massachusetts Institute of Technology, PhD

Melissa Pearson

Assistant Teaching Professor, Writing Program; University of South Carolina, PhD

Christoffer Pedersen

Assistant Professor, Art + Design; University of Copenhagen (Denmark), PhD

Melissa Peiken

Associate Cooperative Education Coordinator, College of Computer and Information Science; Emerson College, MEd

Russell Pensyl

Professor, Art + Design; Western Michigan University, MFA

Diane Perez

Assistant Academic Specialist, College of Professional Studies; Salem State University, MEd

Ivan Petkov

Assistant Professor, Economics; Boston College, PhD

Courtney Pfluger

Assistant Teaching Professor, Chemical Engineering; Northeastern University, PhD

Pegaret Pichler

Assistant Professor, Finance; Stanford University, PhD

Susan E. Picillo

Senior Lecturer, Communication Studies; Cambridge College, MEd

Pamela Pietrucci

Visiting Lecturer, Communication Studies; University of Washington, PhD

Jessica Pike

Assistant Cooperative Education Coordinator, College of Engineering; Bridgewater State University, MEd

Sara Pintado-Lopez

Associate Professor, Health Sciences; University Carlos III of Madrid (Spain), PhD

Ameet Pinto

Assistant Professor, Civil and Environmental Engineering; Virginia Polytechnic Institute and State University, PhD

Maricla Pirozzi

Assistant Cooperative Education Coordinator, Graduate School of Engineering; European School of Economics (Italy), MBA

Leigh Plant

Research Associate Professor, Pharmaceutical Sciences; University of Leeds (United Kingdom), PhD

Harlan D. Platt

Professor, Finance; University of Michigan, PhD

Marjorie Platt

Professor, Accounting; University of Michigan, PhD

Robert Platt Jr.

Assistant Professor, Computer and Information Science; University of Massachusetts, Amherst, PhD

Mya Poe

Associate Professor, English; University of Massachusetts, Amherst, PhD

Hermine Poghosyan

Assistant Professor, Nursing; University of Massachusetts Boston, PhD

Ann Polcari

Associate Clinical Professor, Nursing; Boston College, PhD

Stephanie Pollack

Professor of the Practice, Public Policy and Urban Affairs; Harvard Law School, JD

Michael P. Pollastri

Professor, Chemistry and Chemical Biology; Brown University, PhD

Marius Popescu

Visiting Assistant Professor, Finance; Virginia Polytechnic Institute and State University, PhD

Hilary Poriss

Associate Professor, Music; University of Chicago, PhD

Gary Porter

Assistant Teaching Professor, Finance; University of South Carolina, PhD

Gerald Porter

Visiting Lecturer, Economics; Babson College, MBA

Richard D. Porter

Professor, Mathematics; Yale University, PhD

Veronica L. Porter

Associate Professor, Cooperative Education, College of Science; Northeastern University, MEd

John Portz

Professor, Political Science; University of Wisconsin, Madison, PhD

Mary-Susan Potts-Santone

Teaching Professor, Biology; University of New Hampshire, PhD

Karen Pounds

Assistant Clinical Professor, Nursing; University of Rhode Island, PhD

Michael J. Power

Lecturer, Supply Chain and Information Management; Northeastern University, MBA

Edward Powers

Assistant Teaching Professor, College of Professional Studies; Northeastern University, PhD

Susan G. Powers-Lee

Professor, Biology; University of California, Berkeley, PhD

Silvia Prina

Associate Professor, Economics; Boston University, PhD

Robert Prior

Associate Teaching Professor, College of Professional Studies; Nova Southeastern University, EdD

Robert Pritchard

Associate Teaching Professor, Economics; Northeastern University, PhD

Mark Prokosch

Senior Lecturer, Psychology; University of California, Davis, PhD

Sheila M. Puffer

Professor and University Distinguished Professor, International Business and Strategy; University of California, Berkeley, PhD

Karen Quigley

Research Associate Professor, Psychology; Ohio State University, PhD

Gordana Rabrenovic

Associate Professor, Sociology and Anthropology; State University of New York, Albany, PhD

John Rachlin

Assistant Teaching Professor, Computer and Information Science; Boston University, PhD

Joseph A. Raelin

Professor and Asa S. Knowles Chair of Practice-Oriented Education, Management and Organizational Development; State University of New York, Buffalo, PhD

Sriramasundarar Rajagopalan

Assistant Teaching Professor, College of Professional Studies; Capella University, PhD

Rajmohan Rajaraman

Professor, Computer and Information Science; University of Texas, Austin, PhD

Ravi Ramamurti

University Distinguished Chair Professor, International Business and Strategy; Harvard University, DBA

Valeria Ramdin

Assistant Clinical Professor, Nursing; Northeastern University, DNSc

Alireza Ramezani

Assistant Professor, Electrical and Computer Engineering; University of Michigan, PhD

Janet Randall

Professor, English; University of Massachusetts, Amherst, PhD

Aanjhan Ranganathan

Assistant Professor, Computer and Information Science; ETH Zurich (Switzerland), PhD

Carey M. Rappaport

College of Engineering Distinguished Professor, Electrical and Computer Engineering; Massachusetts Institute of Technology, ScD

Andrea Raynor

Teaching Professor, Art + Design; School of Visual Arts, MFA

Desislava Raytcheva

Lecturer, Biology; Northeastern University, PhD

Leena Razzaq

Assistant Teaching Professor, Computer and Information Science; Worcester Polytechnic Institute, PhD

Joseph Reagle

Associate Professor, Communication Studies; New York University, PhD

Debra J. Reid

Associate Clinical Professor, Pharmacy and Health Systems Sciences; Northeastern University, PharmD

Imke Reimers

Assistant Professor, Economics; University of Minnesota, PhD

Karen Reiss Medwed

Associate Teaching Professor, College of Professional Studies; New York University, PhD

Marketa Rejtar

Assistant Clinical Professor, Nursing; Massachusetts General Hospital Institute of Health Professions, PhD

John R. Reynolds

Professor, Pharmacy and Health Systems Sciences; Duquesne University, PharmD

Karl Reynolds

Associate Teaching Professor, College of Professional Studies; University of Washington, PhD

Mahtab Rezvani

Assistant Academic Specialist, College of Professional Studies; California State University, Los Angeles, MA

Christopher Richardson

Lecturer, Biology; Boston University, PhD

Milda Richardson

Lecturer, Art + Design; Boston University, PhD

Megan Richmond

Assistant Cooperative Education Coordinator, D'Amore-McKim School of Business; Boston College, MEd

Janet S. Rico

Associate Clinical Professor, Nursing; Northeastern University, PhD

Mirek Riedewald

Associate Professor, Computer and Information Science; University of California, Santa Barbara, PhD

Christoph Riedl

Assistant Professor, Supply Chain and Information Management and Computer and Information Science; Technische Universität München (Germany), PhD

Justin B. Ries

Associate Professor, Marine and Environmental Sciences; Johns Hopkins University, PhD

Matteo Rinaldi

Associate Professor, Electrical and Computer Engineering; University of Pennsylvania, PhD

Christie Rizzo

Assistant Professor, Applied Psychology; University of Southern California, Los Angeles, PhD

Christina Roberts

Associate Cooperative Education Coordinator, D'Amore-McKim School of Business; Simmons College, MBA

Susan J. Roberts

Professor, Nursing; Boston University, DNSc

Christopher J. Robertson

Professor, International Business and Strategy; Florida State University, PhD

Craig M. Robertson

Associate Professor, Media and Screen Studies; University of Illinois, Urbana-Champaign, PhD

William Robertson

Associate Professor, Computer and Information Science and Electrical and Computer Engineering; University of California, Santa Barbara, PhD

Cordula Robinson

Associate Teaching Professor, College of Professional Studies; University College London (United Kingdom), PhD

Hillary Robinson

Associate Professor, Law and Sociology and Anthropology; Massachusetts Institute of Technology, PhD; Harvard University, JD

Holbrook Robinson

Associate Professor, Cultures, Societies, and Global Studies; University of California, Berkeley, PhD

Tracy L. Robinson Wood

Professor, Applied Psychology; Harvard University, EdD

Brian Robison

Assistant Teaching Professor, Music; Cornell University, DMA

David Rochefort

Distinguished Professor, Political Science; Brown University, PhD

Rachel Rodgers

Associate Professor, Applied Psychology; Université de Toulouse-Le Mirail (France), PhD

Kirsten Rodine Hardy

Associate Professor, Political Science; University of California, Berkeley, PhD

Bruce Ronkin

Professor, Music; University of Maryland, DMA

Tayla Rose

Assistant Clinical Professor, Pharmacy and Health Systems Sciences; University of Connecticut, PharmD

Rebeca B. Rosengaus

Associate Professor, Marine and Environmental Sciences; Boston University, PhD

James R. Ross

Associate Professor, Journalism; American University, MA

Alexandra Roth

Associate Academic Specialist, International Business and Strategy; University of Frankfurt (Germany), PhD

Sara Rouhanifard

Assistant Professor, Bioengineering; Yeshiva University, PhD

Deya Roy

Postdoctoral Teaching Associate, Communication Studies; State University of New York, Amherst, MA

Jeffrey W. Ruberti

Professor, Bioengineering; Tulane University, PhD

Michael Ruff

Assistant Teaching Professor, Accounting; Bentley University, PhD

Timothy J. Rupert

Professor, Accounting; Pennsylvania State University, PhD

Ivan Rupnik

Associate Professor, Architecture; Harvard University, MArch

Bruce Russell

Associate Academic Specialist, Supply Chain and Information Management; National University of Ireland (Ireland), PhD

J. Timothy Sage

Associate Professor, Physics; University of Illinois, Urbana-Champaign, PhD

Vinod Sahney

University Distinguished Professor, Mechanical and Industrial Engineering; University of Wisconsin, Madison, PhD

Yuki Sakurai

Visiting Lecturer, World Languages Center; Ohio State University, MA

Masoud Salehi

Associate Professor, Electrical and Computer Engineering; Stanford University, PhD

Carmel Salhi

Assistant Professor, Health Sciences; Harvard University, PhD

William Sanchez

Associate Professor, Applied Psychology; Boston University, PhD

Nada Sanders

Distinguished Professor of Supply Chain Management, Supply Chain and Information Management; Ohio State University, PhD

Tova Sanders

Associate Teaching Professor, College of Professional Studies; George Washington University, EdD

Ronald Sandler

Professor, Philosophy and Religion; University of Wisconsin, Madison, PhD

Billye Sankofa Waters

Associate Teaching Professor, College of Professional Studies; University of North Carolina, PhD

Ravi Sarathy

Professor, International Business and Strategy; University of Michigan, PhD

Linda Sarkisian

Assistant Cooperative Education Coordinator, D'Amore-McKim School of Business; Lynn University, MBA

Mehrdad Sasani

Associate Professor, Civil and Environmental Engineering; University of California, Berkeley, PhD

Ajay B. Satpute

Assistant Professor, Psychology; University of California, Los Angeles, PhD

Behrooz (Barry) Satvat

Associate Teaching Professor, Chemical Engineering; Massachusetts Institute of Technology, ScD

Daniel Saulnier

Associate Cooperative Education Coordinator, College of Engineering; Babson College, MBA

Kevin Scanlon

Professor of the Practice, Entrepreneurship and Innovation; University of London (United Kingdom), PhD

Samuel V. Scarpino

Assistant Professor, Marine and Environmental Sciences and Physics; University of Texas, Austin, PhD

Carmen Sceppa

Professor, Health Sciences; Francisco Marroquin University (Guatemala), MD; Tufts University, PhD

Martin Schedlbauer

Associate Clinical Professor, Computer and Information Science; University of Massachusetts, PhD

Gunar Schirner

Associate Professor, Electrical and Computer Engineering; University of California, Irvine, PhD

Ralf W. Schlosser

Professor, Communication Sciences and Disorders; Purdue University, PhD

Benjamin Schmidt

Assistant Professor, History; Princeton University, PhD

Walter Schnyder

Associate Teaching Professor, Computer and Information Science; Swiss Federal Institute of Technology (Switzerland), PhD

Egon Schulte

Professor, Mathematics; University of Dortmund (Germany), PhD

Kathryn Schulte Grahame

Associate Teaching Professor, Engineering; Columbia University, PhD

Joseph Schwartz

Associate Teaching Professor, Communication Studies; University of Iowa, PhD

Michael Schwartz

Assistant Cooperative Education Coordinator, Graduate School of Engineering; Northeastern University, MS

Martin Schwarz Jr.

Associate Professor, Mathematics; Courant Institute, PhD

Cody Scott

Assistant Professor, Computer and Information Science; University of Maryland, PhD

Douglass Scott

Senior Lecturer, Art + Design; Yale University, MFA

Frank (Alex) Scott

Assistant Professor, Supply Chain and Information Management; Pennsylvania State University, PhD

Steven Scyphers

Assistant Professor, Marine and Environmental Sciences; University of South Alabama, PhD

Darcey Searles

Postdoctoral Teaching Associate, Communication Studies; Rutgers University, PhD

Max Sederer

Assistant Cooperative Education Coordinator, College of Engineering; Tufts University, MEd

Magy Seif El-Nasr

Associate Professor, Computer and Information Science and Art + Design; Northeastern University, PhD

Ethan Selinger

Assistant Cooperative Education Coordinator, College of Computer and Information Science; University of Massachusetts, Lowell, MS

Laura Senier

Assistant Professor, Sociology and Anthropology and Health Sciences; Brown University, PhD

Sumi Seo

Lecturer, Mathematics; University of Missouri, Columbia, PhD

Susan Setta

Associate Professor, Philosophy and Religion; Pennsylvania State University, PhD

Bahram Shafai

Professor, Electrical and Computer Engineering; George Washington University, ScD

Michael Shah

Lecturer, Computer and Information Science; Tufts University, PhD

Rebecca M. Shansky

Assistant Professor, Psychology; Yale University, PhD

Harvey Shapiro

Associate Clinical Professor, College of Professional Studies; Hebrew Union College, PhD

William T. Sharp

Assistant Teaching Professor, Psychology; Boston Graduate School of Psychoanalysis, PhD

Gavin M. Shatkin

Associate Professor, Public Policy and Urban Affairs and Architecture; Rutgers University, PhD

Dennis R. Shaughnessy

Senior Academic Specialist, Entrepreneurship and Innovation; University of Maryland, JD

Margaret Shea

Associate Cooperative Education Coordinator, D'Amore-McKim School of Business; Boston University, BLS

Thomas C. Sheahan

Professor, Civil and Environmental Engineering; Massachusetts Institute of Technology, ScD

Sandra Shefelbine

Associate Professor, Mechanical and Industrial Engineering and Bioengineering; Stanford University, PhD

Abhi Shelat

Associate Professor, Computer and Information Science; Massachusetts Institute of Technology, PhD

Paxton Sheldahl

Assistant Teaching Professor, Architecture; Harvard University, MARCH

Eliot Sherman

Senior Lecturer, Finance; Bentley College, MST

H. David Sherman

Professor, Accounting; Harvard University, DBA

Amit Shesh

Associate Teaching Professor, Computer and Information Science; University of Minnesota, Twin Cities, PhD

Shiaoming Shi

Assistant Teaching Professor, Bioengineering; University of Pittsburgh, PhD

Craig Shillaber

Assistant Teaching Professor, Civil and Environmental Engineering; Virginia Polytechnic Institute and State University, MS

Jennifer Shire

Assistant Cooperative Education Coordinator, College of Computer and Information Science; Columbia University, MBA

Olin Shivers

Professor, Computer and Information Science; Carnegie Mellon University, PhD

Mariya Shiyko

Associate Professor, Applied Psychology; City University of New York, PhD

Katy Shorey

Assistant Teaching Professor, Philosophy and Religion; University of Missouri, PhD

Aatmesh Shrivastava

Assistant Professor, Electrical and Computer Engineering; University of Virginia, Charlottesville, PhD

Stephanie Sibicky

Assistant Clinical Professor, Pharmacy and Health Systems Sciences; University of Rhode Island, PhD

Brandon Sichling

Assistant Teaching Professor, Art + Design; Emerson College, MFA

Jose Sierra

Associate Teaching Professor, Computer and Information Science; Universidad Carlos III de Madrid (Spain), PhD

Robert Sikes

Associate Professor, Physical Therapy, Movement, and Rehabilitation Sciences; University of Texas, Houston, PhD

Michael B. Silevitch

Robert Black Professor of Engineering and College of Engineering Distinguished Professor, Electrical and Computer Engineering; Northeastern University, PhD

Peter Simon

Teaching Professor, Economics; Northern Illinois University, PhD

Simon Singer

Professor, Criminology and Criminal Justice; University of Pennsylvania, PhD

Hanumant Singh

Professor, Electrical and Computer Engineering and Mechanical and Industrial Engineering; Massachusetts Institute of Technology, PhD

Rifat Sipahi

Associate Professor, Mechanical and Industrial Engineering; University of Connecticut, PhD

Michail V. Sitkovsky

Eleanor W. Black Chair in Immunophysiology and Pharmaceutical Biotechnology and Professor, Institute for Tissue Damage and Biology; Moscow State University (Russia), PhD

Mark Sivak

Associate Teaching Professor, Art + Design and Engineering; Northeastern University, PhD

Adrienne Slaughter

Lecturer, Computer and Information Science; University of Washington, PhD

Nikolai Slavov

Assistant Professor, Bioengineering; Princeton University, PhD

Rory Smead

Ronald L. and Linda A. Rossetti Professor for the Humanities, Philosophy and Religion; University of California, Irvine, PhD

David A. Smith

Assistant Professor, Computer and Information Science; Johns Hopkins University, PhD

Keith Smith

Assistant Professor, Marketing; University of Georgia, PhD

Matthew Smith

Associate Professor, Philosophy and Religion; University of North Carolina, Chapel Hill, PhD

Ronald Bruce Smith

Associate Professor, Music; University of California, Berkeley, PhD

Wendy A. Smith

College of Arts and Sciences Distinguished Associate Professor, Biology; Duke University, PhD

Eugene S. Smotkin

Professor, Chemistry and Chemical Biology; University of Texas, Austin, PhD

Bridget Smyser

Associate Teaching Professor, Mechanical and Industrial Engineering; Worcester Polytechnic Institute, PhD

Nancy P. Snyder

Associate Teaching Professor, Psychology; Harvard University, EdD

Dani Snyder-Young

Assistant Professor, Theatre; New State University, PhD

Pablo Soberon Bravo

Zelevinsky Research Professor, Mathematics; University College London (United Kingdom), PhD

Claudia Sokol

Associate Teaching Professor, World Languages Center; University of Buenos Aires (Argentina), MD

Eduardo Sontag

University Distinguished Professor, Electrical and Computer Engineering and Bioengineering; University of Florida, PhD

Maria Sorenson

Visiting Clinical Instructor, Nursing; Northeastern University, MSN

Susan Soroka

Assistant Teaching Professor, Writing Program; Drew University, PhD

Nikolaos S. Soukos

Assistant Teaching Professor, Physics and Biology; University of Munich (Germany), PhD

Bert A. Spector

Associate Professor, International Business and Strategy; University of Missouri, PhD

Denise Spencer

Senior Lecturer, Supply Chain and Information Management; Boston College, PhD

Karen M. Spikes

Lecturer, Psychology; Cornell University, PhD

David Sprague

Lecturer, Computer and Information Science; University of Victoria (Canada), PhD

Bryan Q. Spring

Assistant Professor, Physics; University of Illinois, Urbana-Champaign, PhD

Shelia Springer

Postdoctoral Teaching Associate, Communication Studies; University of Arizona, Tucson, MA

Srinivas Sridhar

College of Arts and Sciences Distinguished Professor, Physics; California Institute of Technology, PhD

Kandarp Srinivasan

Assistant Professor, Finance; Washington University, St. Louis, PhD

Thomas Starr

Professor, Art + Design; Yale University, MFA

Mary Steffel

Assistant Professor, Marketing; Princeton University, PhD; University of Florida, PhD

Karen Stein

Visiting Assistant Professor, Art + Design; Virginia Commonwealth University, MFA

Leslie Stein

Assistant Teaching Professor, College of Professional Studies; United States International University, EdD

Armen B. Stepanyants

Associate Professor, Physics; University of Rhode Island, PhD

Jennie Stephens

Professor, Public Policy and Urban Affairs; California Institute of Technology, PhD

Dagmar Sternad

Professor, Biology and Electrical and Computer Engineering; University of Connecticut, PhD

Sara Stifano

Postdoctoral Teaching Associate, Communication Studies; University of Connecticut, PhD

Sebastian Stockman

Associate Teaching Professor, Writing Program; Emerson College, MFA

Milica Stojanovic

Professor, Electrical and Computer Engineering; Northeastern University, PhD

Janos Stone

Lecturer, Art + Design; Boston University, MFA

Michael Stone

Assistant Teaching Professor, Economics; University of Connecticut, PhD

Jacob Stowell

Associate Professor, Criminology and Criminal Justice; State University of New York, Albany, PhD

Tracy Strain

Professor of the Practice, Media and Screen Studies; Harvard University, MEd

Amy Stratman

Assistant Academic Specialist, College of Professional Studies; Simmons College, MA

Phyllis R. Strauss

Matthews Distinguished University Professor, Biology; Rockefeller University, PhD

Heather Streets-Salter

Professor, History; Duke University, PhD

Aron P. Stubbins

Associate Professor, Marine and Environmental Sciences and Civil and Environmental Engineering and Chemistry and Chemical Biology; Newcastle University (United Kingdom), PhD

Ming Su

Associate Professor, Chemical Engineering; Northwestern University, PhD

Fernando Suarez

Jean C. Tempel Professor, Entrepreneurship and Innovation; Massachusetts Institute of Technology, PhD

Alexandru I. Suciu

Professor, Mathematics; Columbia University, PhD

Annemarie C. Sullivan

Clinical Instructor, Health Sciences; Northeastern University, MS

Denis Sullivan

Professor, Political Science and International Affairs; University of Michigan, PhD

Fareena Sultan

Professor, Marketing; Columbia University, PhD

Hao Sun

Assistant Professor, Civil and Environmental Engineering; Columbia University, PhD

Linlin Sun

Assistant Research Professor, Chemical Engineering; Northeastern University, PhD

Nian-Xiang Sun

Professor, Electrical and Computer Engineering; Stanford University, PhD

Ravi Sundaram

Professor, Computer and Information Science; Massachusetts Institute of Technology, PhD

Gloria Sutton

Associate Professor, Art + Design; University of California, Los Angeles, PhD

John D. Swain

Associate Professor, Physics; University of Toronto (Canada), PhD

Richard S. Swasey Jr.

Principal Lecturer, Finance; University of Virginia, MBA

Jacqueline F. Sweeney

Senior Cooperative Education Coordinator, College of Arts, Media and Design; Northeastern University, MS

Nina Sylvanus

Associate Professor, Sociology and Anthropology; Ecole des Hautes Etudes en Sciences Sociales, Paris (France), PhD

Balazs Szelenyi

Associate Teaching Professor, College of Professional Studies; University of California, Los Angeles, PhD

Mario Sznaiier

Dennis Picard Trustee Professor, Electrical and Computer Engineering; University of Washington, PhD

Srinivas Tadigadapa

Professor, Electrical and Computer Engineering; Cambridge University (United Kingdom), PhD

Gilead Tadmor

Professor, Electrical and Computer Engineering; Weizmann Institute of Science (Israel), PhD

Paul Tagliamonte

Visiting Lecturer, Supply Chain and Information Management; Boston College, MS

David Tamés

Assistant Teaching Professor, Art + Design; Massachusetts College of Art and Design, MFA

Michael Tannebaum

Visiting Lecturer, Communication Studies; Georgia State University, PhD

Aysen Tanyeri-Abur

Associate Teaching Professor, Economics; Texas AM University, PhD

Peter Tarasewich

Assistant Teaching Professor, Supply Chain and Information Management; University of Connecticut, PhD

Mary Suzanne Tarmina

Associate Clinical Professor, Nursing; University of Utah, PhD

Mohammad E. Taslim

Professor, Mechanical and Industrial Engineering; University of Arizona, PhD

Tomasz R. Taylor

Professor, Physics; University of Warsaw (Poland), PhD

Philip Thai

Assistant Professor, History; Stanford University, PhD

Ganesh Thakur

Associate Professor, Pharmaceutical Sciences; Institute of Chemical Technology (India), PhD

Ronald S. Thomas

Senior Lecturer, International Business and Strategy; Harvard University, PhD

Corliss Thompson

Associate Teaching Professor, College of Professional Studies; University of North Carolina, Chapel Hill, PhD

Jamal Thorne

Assistant Teaching Professor, Art + Design; Northeastern University, MFA

George Thrush

Professor, Architecture; Harvard University, MArch

Jonathan L. Tilly

University Distinguished Professor, Biology; Rutgers, the State University of New Jersey, PhD

Frank Tip

Professor, Computer and Information Science; University of Amsterdam (Netherlands), PhD

Lisa J. Tison-Thomas

Assistant Cooperative Education Coordinator, College of Science; Emmanuel College, MA

Devesh Tiwari

Assistant Professor, Electrical and Computer Engineering; North Carolina State University, PhD

Yustianto Tjiptowidjojo

Assistant Teaching Professor, Mechanical and Industrial Engineering; Mississippi State University, PhD

Gordana G. Todorov

Professor, Mathematics; Brandeis University, PhD

Svetlana Todorova

Visiting Lecturer, Supply Chain and Information Management; Varna University of Management (Bulgaria), PhD

Alessio Tognetti

Assistant Academic Specialist, World Languages Center; University of Washington, MA

Valerio Toledano Laredo

Professor, Mathematics; University of Cambridge (United Kingdom), PhD

Michael Tolley

Associate Professor, Political Science; Johns Hopkins University, PhD

Peter Y. Topalov

Professor, Mathematics; Moscow State University (Russia), PhD

Vladimir P. Torchilin

University Distinguished Professor, Pharmaceutical Sciences; Moscow State University (Russia), PhD, DSc

Ali Touran

Professor, Civil and Environmental Engineering; Stanford University, PhD

Emery A. Trahan

Professor, Finance; State University of New York, Albany, PhD

Stavros Tripakis

Associate Professor, Computer and Information Science; Joseph Fourier University (France), PhD

Andrew Trotman

Assistant Professor, Accounting; Bond University (Australia), PhD

Geoffrey C. Trussell

Professor, Marine and Environmental Sciences; College of William and Mary, PhD

Kumiko Tsuji

Assistant Teaching Professor, World Languages Center; Georgetown University, PhD

Nathaniel Tuck

Lecturer, Computer and Information Science; University of Massachusetts, Lowell, PhD

Eugene Tunik

Associate Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Rutgers University, PhD

Berna Turam

Professor, International Affairs and Sociology and Anthropology; McGill University (Canada), PhD

Esther Tutella-Chen

Assistant Academic Specialist, College of Professional Studies; Vanderbilt University, MEd

Rafael Ubal Tena

Assistant Teaching Professor, Electrical and Computer Engineering; Universidad Politecnica de Valencia (Spain), PhD

Jonathan Ullman

Assistant Professor, Computer and Information Science; Harvard University, PhD

Annique Un

Associate Professor, International Business and Strategy; Massachusetts Institute of Technology, PhD

Christopher Unger

Associate Teaching Professor, College of Professional Studies; Harvard University, EdD

Steven R. Untersee

Lecturer, Biology; Tufts University, PhD

Moneesh Upmanyu

Professor, Mechanical and Industrial Engineering; University of Michigan, PhD

Ricardo Valdez

Assistant Teaching Professor, College of Professional Studies; University of Washington, PhD

Steven Vallas

Professor, Sociology and Anthropology; Rutgers University, PhD

Jenny A. Van Amburgh

Clinical Professor, Pharmacy and Health Systems Sciences; Albany College of Pharmacy, PharmD

Jan-Willem Van De Meent

Assistant Professor, Computer and Information Science; Leiden University (Netherlands), PhD

Anne L. Van De Ven-Moloney

Research Assistant Professor, Physics; Rice University, PhD

Maria Van Pelt

Associate Clinical Professor, Nursing; Villanova University, DNSc

Kathleen Vander Laan

Associate Cooperative Education Coordinator, College of Computer and Information Science; Salem State University, MBA

Ashkan Vaziri

Associate Professor, Mechanical and Industrial Engineering; Northeastern University, PhD

Elaine Vejar

Assistant Academic Specialist, College of Professional Studies; University of Massachusetts, Lowell, MS

Oana Veliche

Lecturer, Mathematics; Purdue University, PhD

Venkata Vemuri

Research Assistant Professor, Pharmaceutical Sciences; Osmania University (India), PhD

Vivek Venkatachalam

Assistant Professor, Physics; Harvard University, PhD

Madhavi Venkatesan

Visiting Assistant Teaching Professor, Economics; Vanderbilt University, PhD

Anand Venkateswaran

Associate Professor, Finance; Georgia State University, PhD

Susan H. Ventura

Associate Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, PhD

Alessandro Vespignani

Sternberg Family Distinguished University Professor, Physics and Health Sciences and Computer and Information Science; University of Rome La Sapienza (Italy), PhD

Gustavo Vicentini

Assistant Teaching Professor, Economics; Boston University, PhD

Thomas Vicino

Associate Professor, Political Science and Public Policy and Urban Affairs; University of Maryland, PhD

Emanuele Viola

Associate Professor, Computer and Information Science; Harvard University, PhD

Jan Vitek

Professor, Computer and Information Science; University of Geneva (Switzerland), PhD

Olga Vitek

Sy and Laurie Sternberg Interdisciplinary Associate Professor, Computer and Information Science and Chemistry and Chemical Biology; Purdue University, PhD

Triet Vo Huu

Research Assistant Professor, Computer and Information Science; Northeastern University, PhD

Steven V. Vollmer

Associate Professor, Marine and Environmental Sciences; Harvard University, PhD

Robert J. Volpe

Associate Professor, Applied Psychology; Lehigh University, PhD

Erik Voss

Associate Teaching Professor, College of Professional Studies; Iowa State University, PhD

Sara Wadia-Fascetti

Professor, Civil and Environmental Engineering; Stanford University, PhD

Nancy Waggner

Associate Cooperative Education Coordinator, Pharmaceutical Sciences; Suffolk University, JD

Thomas Wahl

Associate Professor, Computer and Information Science; University of Texas, Austin, PhD

Thomas E. Wales

Research Associate Professor, Chemistry and Chemical Biology; Duke University, PhD

C.J. Walker

Professor of the Practice, College of Professional Studies; George Washington University, PhD

Jacob Walker

Assistant Cooperative Education Coordinator, College of Engineering; Northeastern University, MS

Louise Walker

Associate Professor, History; Yale University, PhD

Byron Wallace

Assistant Professor, Computer and Information Science; Tufts University, PhD

Rachel Walsh

Assistant Cooperative Education Coordinator, College of Engineering; Suffolk University, MS

Robin Walters

Zelevinsky Research Professor, Psychology; University of Chicago, PhD

Suzanna Walters

Professor, Women's, Gender, and Sexuality Studies and Sociology and Anthropology; City University of New York, PhD

Belinda Walzer

Assistant Teaching Professor, Writing Program; University of North Carolina, Greensboro, PhD

Richard Wamai

Associate Professor, Cultures, Societies, and Global Studies; University of Helsinki (Finland), PhD

Kai-tak Wan

Professor, Mechanical and Industrial Engineering; University of Maryland, College Park, PhD

Lu Wang

Assistant Professor, Computer and Information Science; Cornell University, PhD

Ming Wang

College of Engineering Distinguished Professor, Civil and Environmental Engineering; University of New Mexico, PhD

Qi Wang

Assistant Professor, Civil and Environmental Engineering; Virginia Polytechnic Institute and State University, PhD

Yanzhi Wang

Assistant Professor, Electrical and Computer Engineering; University of Southern California, PhD

Meni Wanunu

Associate Professor, Physics; Weizmann Institute of Science (Israel), PhD

Robert J. Ward

Lecturer, Music; University of California, San Diego, MA

Oliver Wason

Visiting Assistant Teaching Professor, Theatre; Yale University, MFA

Gregory Wassall

Associate Professor, Economics; Rutgers University, PhD

Barbara L. Waszczak

Professor, Pharmaceutical Sciences; University of Michigan, PhD

Maureen Watkins

Assistant Clinical Professor, Physical Therapy, Movement, and Rehabilitation Sciences; Northeastern University, DPT

Natalya Watson

Assistant Teaching Professor, College of Professional Studies; University of Colorado, PhD

Dov Waxman

Professor, Political Science and International Affairs and Jewish Studies; Johns Hopkins University, PhD

Rebecca Webb

Assistant Cooperative Education Coordinator, College of Engineering; Boston College, MA

Thomas J. Webster

Arthur W. Zafiropoulos Professor, Chemical Engineering; Rensselaer Polytechnic Institute, PhD

Vanessa Wei

Assistant Teaching Professor, World Languages Center; University of Iowa, MA

Liza Weinstein

Associate Professor, Sociology and Anthropology; University of Chicago, PhD

Michael Weintraub

Associate Clinical Professor, Computer and Information Science; Ohio State University, PhD

Jonathan Weitsman

Robert G. Stone Professor, Mathematics; Harvard University, PhD

Brandon Welsh

Professor, Criminology and Criminal Justice; University of Cambridge (United Kingdom), PhD

Edward G. Wertheim

Associate Professor, Management and Organizational Development; Yeshiva University, PhD

Richard West

Assistant Professor, Chemical Engineering; University of Cambridge (United Kingdom), PhD

Alan West-Durán

Associate Professor, Cultures, Societies, and Global Studies; New York University, PhD

Rebecca Westerling

Assistant Cooperative Education Coordinator, College of Social Sciences and Humanities; Boston College, MA

Richard Whalen

Teaching Professor, Engineering; Northeastern University, PhD

Susan Whitfield-Gabrieli

Professor, Psychology; University of California, Berkeley, PhD

Paul C. Whitford

Assistant Professor, Physics; University of California, San Diego, PhD

John Whitney

Assistant Professor, Mechanical and Industrial Engineering; Harvard University, PhD

Daniel Wicks

Assistant Professor, Computer and Information Science; New York University, PhD

Peter H. Wiederspahn

Associate Professor, Architecture; Harvard University, MArch

Afi Wiggins

Assistant Teaching Professor, College of Professional Studies; University of Virginia, PhD

John Wihbey

Assistant Professor, Journalism; Columbia University, MS

Ronald J. Willey

Professor, Chemical Engineering; University of Massachusetts, Amherst, PhD

Margaret Williams

Visiting Lecturer, Communication Studies; University of Illinois, Chicago, PhD

Mark C. Williams

Professor, Physics; University of Minnesota, PhD

Stephen Williams

Associate Cooperative Education Coordinator, College of Social Sciences and Humanities; Suffolk University, JD

Tiffani Williams

Professor of the Practice, Computer and Information Science; University of Central Florida, PhD

Christo Wilson

Assistant Professor, Computer and Information Science; University of California, Santa Barbara, PhD

Sheila Winborne

Assistant Teaching Professor, Philosophy and Religion; Harvard University, PhD

Eric Winter

Assistant Cooperative Education Coordinator, College of Engineering; Northeastern University, MS

Pamela Wojnar

Assistant Teaching Professor, College of Professional Studies; University of Sports Academy, EdD

John Wolfe

Associate Teaching Professor, College of Professional Studies; Columbia University, EdD

Darien Wood

Professor, Physics; University of California, Berkeley, PhD

Dori C. Woods

Assistant Professor, Biology; University of Notre Dame, PhD

Adam Woolley

Associate Clinical Professor, Pharmacy and Health Systems Sciences; Massachusetts College of Pharmacy, PharmD

Benjamin Woolston

Assistant Professor, Chemical Engineering; Massachusetts Institute of Technology, PhD

Lisa Worsh

Senior Cooperative Education Coordinator, College of Social Sciences and Humanities; Bridgewater State College, MEd

Shu-Shih Y. Wu

Lecturer, Mathematics; Northeastern University, PhD

Sara A. Wylie

Assistant Professor, Sociology and Anthropology and Health Sciences; Massachusetts Institute of Technology, PhD

Xia Xiao

Assistant Professor, Accounting; University of Arizona, PhD

Wei Xie

Assistant Professor, Mechanical and Industrial Engineering; Northwestern University, PhD

Shiawee X. Yang

Associate Professor, Finance; Pennsylvania State University, PhD

Diane Yasgur

Assistant Cooperative Education Coordinator, College of Engineering; New York University, MBA

Lichuan Ye

Associate Professor, Nursing; University of Pennsylvania, DNSc

Mishac K. Yegian

College of Engineering Distinguished Professor, Civil and Environmental Engineering; Massachusetts Institute of Technology, PhD

Edmund Yeh

Professor, Electrical and Computer Engineering; Massachusetts Institute of Technology, PhD

Boris Yelin

Assistant Teaching Professor, World Languages Center; Purdue University, PhD

Benjamin Yelle

Assistant Teaching Professor, Philosophy and Religion; University of Miami, PhD

Sheng-Che Yen

Assistant Professor, Physical Therapy, Movement, and Rehabilitation Sciences; New York University, PhD

Mark L. Yorra

Senior Cooperative Education Coordinator, Pharmacy and Health Systems Sciences; Northeastern University, EdD

Carol Young

Assistant Teaching Professor, College of Professional Studies; University of Massachusetts, PhD

Gary Young

Professor, International Business and Strategy and Health Sciences; State University of New York, Buffalo, PhD

Lydia Young

Associate Teaching Professor, College of Professional Studies; Boston College, PhD

Nancy Young

Assistant Teaching Professor, College of Professional Studies; Boston University, PhD

Sara C. Young-Hong

Clinical Instructor, Communication Sciences and Disorders; University of Pittsburgh, MA

Qi (Rose) Yu

Assistant Professor, Computer and Information Science; University of Southern California, Los Angeles, PhD

Shuishan Yu

Associate Professor, Architecture; University of Washington, PhD

Jennifer Yule

Associate Academic Specialist, Marketing; Glasgow Caledonian University (Scotland), PhD

Nizar Zaarour

Assistant Teaching Professor, Supply Chain and Information Management; Northeastern University, PhD

Michelle Zaff

Assistant Cooperative Education Coordinator, College of Social Sciences and Humanities; Suffolk University, JD

Christos Zahopoulos

Associate Professor, College of Professional Studies; Northeastern University, PhD

Carl Zangerl

Assistant Teaching Professor, College of Professional Studies; University of Illinois, PhD

Alan J. Zaremba

Associate Professor, Communication Studies; State University of New York, Buffalo, PhD

Michele C. Zee

Assistant Teaching Professor, Behavioral Neuroscience; University of Oregon, PhD

Ibrahim Zeid

Professor, Mechanical and Industrial Engineering; University of Akron, PhD

Edward David Zepeda

Assistant Professor, Supply Chain and Information Management; University of Minnesota, PhD

David P. Zgarrick

Professor, Pharmacy and Health Systems Sciences; Ohio State University, PhD

Ke Zhang

Associate Professor, Chemistry and Chemical Biology; Washington University, St. Louis, PhD

Yue May Zhang

Associate Professor, Accounting; University of Pittsburgh, PhD

Xiaolei Zhao

Zelevinsky Research Professor, Mathematics; University of Michigan, PhD

Kungcheng Zheng

Assistant Professor, Finance; University of Michigan, PhD

Ting Zhou

Associate Professor, Mathematics; University of Washington, PhD

Xiaomu Zhou

Assistant Teaching Professor, College of Professional Studies; University of Michigan, PhD

Zhaohui S. Zhou

Professor, Chemistry and Chemical Biology; Scripps Research Institute, PhD

Hongli Zhu

Assistant Professor, Mechanical and Industrial Engineering; South China University of Technology (China), PhD

Sali Ziane

Associate Teaching Professor, World Languages Center; University of Paris XIII (France), PhD

Nathanial Ziegler

Assistant Cooperative Education Coordinator, College of Engineering; Indiana University of Pennsylvania, MEd

Katherine S. Ziemer

Professor, Chemical Engineering; West Virginia University, PhD

Emily Zimmerman

Assistant Professor, Communication Sciences and Disorders; University of Kansas, PhD

Gregory Zimmerman

Associate Professor, Criminology and Criminal Justice; State University of New York, Albany, PhD

Kathrin Zippel

Associate Professor, Sociology and Anthropology; University of Wisconsin, Madison, PhD

Steven Zoloth

Professor, Health Sciences; University of Pennsylvania, PhD

Elizabeth Zulick

Assistant Teaching Professor, College of Professional Studies; Boston University, PhD

Ronald Zullo

Senior Lecturer, Accounting; Bentley University, MS

Günther K. H. Zupanc

Professor, Biology; University of California, San Diego, PhD; University of Tübingen (Germany), Dr. rer. nat. habil.

Alexander Zvonok

Research Assistant Professor, Pharmaceutical Sciences; Belarusian State University (Belarus), PhD

Nikolai Zvonok

Research Assistant Professor, Pharmaceutical Sciences; Russian Academy of Sciences (Russia), PhD

Governing Boards and Officers of Northeastern

Officers of the Corporation and Board of Trustees 2017–2018

Richard A. D'Amore, *Chair*
 Edward G. Galante, *Vice Chair*
 Katherine S. McHugh, *Vice Chair*
 Alan S. McKim, *Vice Chair*

OFFICERS EMERITAE/I

Neal F. Finnegan, *Chair Emeritus*
 Sy Sternberg, *Chair Emeritus*
 George D. Behrakis, *Vice Chair Emeritus*
 George W. Chamillard, *Vice Chair Emeritus*
 Richard P. Chapman Jr., *Vice Chair Emeritus*
 H. Patricia Hanna, *Vice Chair Emerita*
 Frederic T. Hersey, *Vice Chair Emeritus*
 Robert C. Marini, *Vice Chair Emeritus*
 Richard C. Ockerbloom, *Vice Chair Emeritus*
 Carole J. Shapazian, *Vice Chair Emerita*
 Jean C. Tempel, *Vice Chair Emerita*
 Alan D. Tobin, *Vice Chair Emeritus*

Members of the Board of Trustees

Barbara C. Alleyne
 Jeffrey S. Bornstein
 Nonnie S. Burnes
 Peter B. Cameron
 Jeffrey J. Clarke
 William J. Conley
 William J. Cotter
 William "Mo" Cowan
 Richard A. D'Amore
 Susan Deitch
 Deborah Dunsire
 Spencer T. Fung
 Edward G. Galante
 Sir Lucian Grainge
 David L. House
 William S. Howard
 Frances N. Janis
 Chaitanya Kanojia
 Venetia G. Kontogouris
 William A. Lowell
 Todd M. Manganaro
 Katherine S. McHugh
 Alan S. McKim
 Henry J. Nasella
 Anita Nassar
 Kathryn M. Nicholson
 James J. Pallotta
 John V. Pulichino
 Marcy L. Reed

Winslow Sargeant
 Ronald L. Sargent
 Sy Sternberg
 Melina Travlos
 Joseph M. Tucci
 Christopher A. Viehbacher
 Christophe P. Weber
 Arthur W. Zafiropoulos
 Michael J. Zamkow

EX-OFFICIO

Joseph E. Aoun

TRUSTEES EMERITAE/I

George D. Behrakis
 Margot Botsford
 Frederick Brodsky
 Frederick L. Brown
 Louis W. Cabot

University Leadership

Officers of the University

Joseph E. Aoun, BA, MA, PhD, *President*
 Michael A. Armini, BA, MA, *Senior Vice President for External Affairs*
 James C. Bean, BS, MS, PhD, *Provost and Senior Vice President for Academic Affairs*
 Diane Nishigaya MacGillivray, BA, MA, *Senior Vice President for University Advancement*
 Philomena V. Mantella, BS, MSW, PhD, *Senior Vice President and CEO of the Professional Advancement Network*
 Ralph C. Martin II, BA, JD, *Senior Vice President and General Counsel*
 Thomas Nedell, BA, MBA, *Senior Vice President for Finance and Treasurer*

Academic Deans

Nadine Aubry, BS, MS, PhD, *Dean of the College of Engineering*
 Carla E. Brodley, BA, MS, PhD, *Dean of the College of Computer and Information Science*
 Raj Echambadi, BS, MBA, PhD, *Dean of the D'Amore-McKim School of Business*
 Kenneth W. Henderson, BSc, PhD, *Dean of the College of Science*

Elizabeth Hudson, BA, MA, PhD, Dean of the College of Arts, Media and Design

Mary Loeffelholz, BA, MA, PhD, Dean of the College of Professional Studies

James R. Hackney, AB, JD, Dean of the School of Law

Uta Poiger, BA, MA, AM, PhD, Dean of the College of Social Sciences and Humanities

Susan L. Parish, BA, MSW, PharmD, Dean of Bouvé College of Health Sciences

Vice Provosts

Susan Ambrose, BA, MA, PhD, Senior Vice Provost for Undergraduate Education and Experiential Learning

John Armendariz, EdD, Vice Provost for Institutional Diversity and Inclusion

Debra Franko, BA, PhD, Senior Vice Provost for Academic Affairs

David Luzzi, BE, PhD, MBA, Senior Vice Provost for Research

Breean Fortier, BA, MA, Senior Vice Provost for Budget, Planning, and Administration

Ni (Phil) He, LLB, PhD, Vice Provost for Graduate Education

Sara Wadia-Fascetti, BS, MS, PhD, Vice Provost for the PhD Network

Vice Presidents

Anthony Rini, BA, MPA, EdD, Vice President for Finance

Rick Davis, BS, MA, Vice President for Alumni Relations

Joseph J. Donnelly Jr., BA, Vice President for Advancement and Campaign Director

Nicholas F. Ducoff, BBA, JD, Vice President for New Ventures

Madeleine A. Estabrook, AB, JD, Vice President for Student Affairs

Cole W. Campese, BA, MS, Vice President and Chief Information Officer

Luanne M. Kirwin, BA, MA, Vice President of Development

Sundar Kumarasamy, BA, MS, Vice President for Enrollment Management

Timothy E. Leshan, BA, MPA, Vice President for Government Relations

Chris Mallet, BS, MPA, Vice President for Online Experiential Learning

Jane Moyer, BA, MA, Vice President for Human Resources Management

Lisa Sinclair, BA, JD, Vice President of Legal Affairs

Kathy Spiegelman, BA, MS, Vice President and Chief of Campus Planning and Development

Brian Sullivan, BS, MBA, Vice President and Chief Marketing Officer

John Tobin, BA, Vice President for City and Community Affairs

Renata Nyul, BA, MS, Vice President for Communications

Other Administrative Leaders

Linda D. Allen, BA, MEd, Assistant Vice President and University Registrar

Michael A. Davis, BA, MA, Director of Public Safety and Chief of Police

Jeff Konya, BA, JD, Director of Athletics and Recreation

Dan Cohen, BA, MA, PhD, Dean, University Libraries and Vice Provost for Information Collaboration

Statements of Accreditation and State Authorization

Accreditation

Northeastern University has maintained its status as a member in good standing of the New England Association of Schools and Colleges (NEASC) Commission on Institutions of Higher Education (CIHE) since it was awarded its initial accreditation in 1940. The university was last reviewed by NEASC in 2008 and will be reviewed again in fall 2018.

Northeastern University possesses degree-granting authority in Massachusetts, under the auspices of the Massachusetts Board of Higher Education.

Program	Accrediting Agency
Northeastern University	New England Association of Schools and Colleges (NEASC)

BOUVÉ COLLEGE OF HEALTH SCIENCES

Program	Accrediting Agency
BS in Athletic Training	Commission on Accreditation of Athletic Training Education (CAATE)
BS in Health Science	Council on Education for Public Health
MS in Speech-Language Pathology and Audiology	Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association (ASHA), Massachusetts Board of Education ¹
BS in Nursing	Commission on Collegiate Nursing Education (CCNE) and Massachusetts Board of Registration in Nursing ²
MS in Physician Assistant Studies	Accreditation Review Commission on Education for the Physician Assistant, Inc. (ARC-PA)
MS in Nursing	Commission on Collegiate Nursing Education (CCNE) and Massachusetts Board of Registration in Nursing ²
MS in Nursing in Anesthesia	Council on Accreditation of Nurse Anesthesia Educational Programs (COA); Commission on Collegiate Nursing Education (CCNE) and Massachusetts Board of Registration in Nursing ²
Registered Nurse/BSN ³	Commission on Collegiate Nursing Education (CCNE) and Massachusetts Board of Registration in Nursing ²
Post BS Doctor of Nursing Practice US Army Program in Anesthesia Nursing (USAGPAN)	Council on Accreditation of Nurse Anesthesia Educational Programs (COA)
DPT in Physical Therapy	Commission on Accreditation of Physical Therapy Education (CAPTE)
MS/MBA (two-year program)	Commission on Collegiate Nursing Education (CCNE) and Massachusetts Board of Registration in Nursing ² ; Commission on Collegiate Nursing Education (CCNE) and the Association to Advance Collegiate Schools of Business (AACSB International)
MS and CAGS in Applied Educational Psychology— School Psychology	Massachusetts Department of Education (DOE) and National Association of School Psychologists (NASP)

MS in Applied Educational Psychology – School Counseling	Massachusetts Department of Education (DOE)
AuD in Audiology	Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association (ASHA), Massachusetts Board of Education ¹
MPH Master of Public Health in Urban Health	Council on Education for Public Health
PharmD	Accreditation Council for Pharmacy Education (ACPE)
PhD in Counseling and School Psychology	American Psychology Association (APA)

¹ The Massachusetts Board of Education approves (not accredits) programs.

² The Massachusetts Board of Registration in Nursing approves (not accredits) programs.

³ Accredited under the aegis of the “sponsoring” full-time college.

College of Arts, Media and Design

Program	Accrediting Agency
Master of Architecture (Urban Architecture)	National Architectural Accreditation Board (NAAB)

D'Amore-McKim School of Business

Program	Accrediting Agency
BS in Business Administration	AACSB International—The Association to Advance Collegiate Schools of Business

School of Law

Program	Accrediting Agency
JD	American Bar Association Association of American Law Schools ⁴

⁴ The Association of American Law Schools is an elected membership organization, not an accrediting body.

State Approvals, Authorizations, and Exemptions

Some states require that universities authorized to operate in their state make public disclosures. See the corresponding addendum on the Online and Graduate Professional Degree Programs website

(<http://www.northeastern.edu/online/about-northeastern-online/state-agreements.php>) for up-to-date, state-prescribed regulatory information applicable to all degree levels.

Institutional Calendars and Online Resources

The online resources listed below supplement this catalog.

General Information

The *Northeastern University Graduate Catalog* contains the university's primary statements about these academic programs and degree requirements, as authorized by the president or the Board of Trustees. For information about other academic policies and procedures; student responsibilities; student academic and cocurricular life; faculty rights and responsibilities; or general personnel policies, benefits, and services, please refer to the *Cooperative Education Student Handbook*, *Faculty Handbook*, and related procedural guides, as appropriate.

Accreditation. Northeastern University is accredited by the New England Association of Schools and Colleges, Inc.

Delivery of Services. Northeastern University assumes no liability for delay or failure to provide educational or other services or facilities due to causes beyond its reasonable control. Causes include, without limitation, power failure, fire, strikes by university employees or others, damage by natural elements, and acts of public authorities. The university will, however, exert reasonable efforts, when it judges them to be appropriate, to provide comparable services, facilities, or performance; but its inability or failure to do so shall not subject the university to liability.

The *Northeastern University Graduate Catalog* contains current information about the university calendar, admissions, degree requirements, fees, and regulations; however, such information is not intended and should not be regarded to be contractual.

Northeastern University reserves the sole right to promulgate and change rules and regulations and to make changes of any nature in its program; calendar; admissions policies, procedures, and standards; degree requirements; fees; and academic schedule whenever necessary or desirable, including, without limitation, changes in course content and class schedule, the cancellation of scheduled classes and other academic activities, and the substitution of alternatives for scheduled

classes and other academic activities. In any such case, the university will give whatever notice is reasonably practical.

Northeastern University will endeavor to make available to its students a fine education and a stimulating and congenial environment. However, the quality and rate of progress of an individual's academic career and professional advancement upon completion of a degree or program are largely dependent on his or her own abilities, commitment, and effort. In many professions and occupations, there are also requirements imposed by federal and state statutes and regulatory agencies for certification or entry into a particular field. These requirements may change while a student is enrolled in a program and may vary from state to state or country to country. Although the university stands ready to help its students find out about requirements and changes in them, it is the student's responsibility to initiate the inquiry.

Tuition Default Policy. In cases where the student defaults on his or her tuition, the student shall be liable for the outstanding tuition and all reasonable associated collection costs incurred by the university, including attorneys' fees.

Emergency Closing of the University. Northeastern University posts emergency announcements, including news of weather-related closings, on its homepage (<http://www.northeastern.edu>) and notifies members of the community individually through the NU ALERT system. In addition, the university has made arrangements to notify students, faculty, and staff by radio and television when it becomes necessary to cancel classes because of extremely inclement weather. AM stations WBZ (1030), WILD (1090), and WRKO (680), and FM station WBUR (90.9) are the radio stations authorized to announce the university's decision to close. Television stations WBZ-TV4, WCVB-TV5, and WHDH-TV7 will also report cancellations. Since instructional television courses originate from live or broadcast facilities at the university, neither the classes nor the courier service operates when the university is closed. Please listen to the radio or television to determine whether the university will be closed.

If a storm occurs at night, the announcement of university closing is given to the radio stations at approximately 6 a.m. Classes are generally canceled for that entire day and evening at all campus locations unless stated otherwise. When a storm begins late in the day, cancellations of evening classes may be announced. This announcement is usually made between 2 p.m. and 3 p.m.

Equal Opportunity Policy. Northeastern University does not discriminate on the basis of race, color, religion, sex, sexual orientation, age, national origin, disability, or veteran status in admission to, access to, treatment in, or employment in its programs and activities. In addition, Northeastern University will not condone any form of sexual harassment. Handbooks containing the university's nondiscrimination policies and its grievance procedures are available in the Office of Institutional Diversity and Inclusion, 125 Richards Hall. Inquiries regarding the university's nondiscrimination policies may be directed to:

Office of Institutional Diversity and Inclusion
125 Richards Hall
Northeastern University
Boston, Massachusetts 02115
617.373.2133

Inquiries concerning the application of nondiscrimination policies may also be referred to the Regional Director, Office for Civil Rights, U.S. Department of Education, 8th Floor, 5 Post Office Square, Boston, MA 02109-3921.

Disability Resource Center. The Disability Resource Center provides a variety of disability-related services and accommodations to Northeastern University's students and employees with disabilities.

Northeastern University's compliance with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990 are coordinated by the senior director of the Disability Resource Center. Persons requiring information regarding the Disability Resource Center should contact the center at 617.373.2675 or, if using TTY, via Relay 711.

Family Educational Rights and Privacy Act. In accordance with the Family Educational Rights and Privacy Act of 1974, Northeastern University permits its students to inspect their records wherever appropriate and to challenge specific parts of them when they feel it is necessary to do so. Specific details of the law as it applies to Northeastern are printed in the *Undergraduate Student Handbook* and *Graduate Student Handbook* and are distributed annually at registration for the university's colleges and graduate schools.

Clery Act. Northeastern is committed to assisting all members of the university community in providing for their own safety and security. Information regarding campus security and personal safety, including topics such as crime prevention, university police law enforcement authority, crime reporting policies, crime statistics for the most recent three-year period, and disciplinary procedures, is available upon request from the Northeastern University Director of Public Safety, 360 Huntington Avenue, Boston, MA 02115, or by calling 617.373.2696.

Mission Statement:

To educate students for a life of fulfillment and accomplishment.
To create and translate knowledge to meet global and societal needs.

Nonprofit Sector, Philanthropy, and Social Change, Graduate Certificate	452	Physical Therapy, DPT—Direct Entry	312
Northeastern University Bookstore	19	Physical Therapy, Movement, and Rehabilitation Sciences	278
Nurse Anesthesia, CAGS	260	Physical Therapy—Postbaccalaureate Entry	279
Nursing Administration, MS	266	Physician Assistant	282
Nursing and Business Administration, MS/MBA	267	Physician Assistant Leadership and Management, Graduate Certificate	285
Nursing Anesthesia, MS	266	Physician Assistant Studies and Health Informatics, MS/MS	283
Nursing Informatics, Graduate Certificate	267	Physician Assistant Studies and Health Informatics, MS/MS	283
Nursing, PhD (Post-BSN)	256	Physician Assistant Studies and Public Health, MS/MPH	252
Nursing, PhD—Advanced Entry (Post-MSN)	257	Physician Assistant Studies and Public Health, MS/MPH	252
Nursing Practice, DNP (Post-Masters)	257	Physician Assistant Studies, MS	283
Nursing Practice with Concentration in Nurse Anesthesia, DNP	258	Physics	398
Nursing—Direct Entry, MS	265	Physics, MS	403
		Physics, PhD	398
Occupational Ergonomics and Health, Graduate Certificate	282	Physics, PhD—Advanced Entry	401
Occupational Ergonomics and Health, MS	281	Political Science	429
Office of the Registrar	17	Political Science, MA	431
Online and Video Streaming Examination Policy	122	Political Science, PhD	429
Operations Research, MSOR	207	Political Science, PhD—Advanced Entry	430
Operations Research, MSOR	397	Population Health, PhD	228
Organizational Communication, Graduate Certificate	367	Population Health, PhD	228
		Port Security, Graduate Certificate	368
Parking	20	Process Safety Engineering, Graduate Certificate	142
Pediatric Nurse Practitioner, Acute and Primary Care, CAGS	261	Process Science, Graduate Certificate	384
Pediatric Nurse Practitioner, Acute and Primary Care, MS	264	Professional Sports Administration, Graduate Certificate	368
Pediatric Nurse Practitioner, Acute Care, CAGS	260	Program And Portfolio Management, Graduate Certificate	368
Pediatric Nurse Practitioner, Primary Care, CAGS	261	Program and Portfolio Project Management, MS	338
Pediatric Nurse Practitioner, Primary Care, MS	264	Project Business Analysis, Graduate Certificate	369
Personal Health Informatics, PhD	109	Project Management, Graduate Certificate	369
Personal Health Informatics, PhD	286	Project Management, MS	339
Personal Information	308	Psychology	405
Personal Professional Enrichment (PPE)	302	Psychology, PhD	405
Petitions	125	Psychology, PhD—Advanced Entry	406
Pharmaceutical Sciences, MS	276	Public Administration, MPA	433
Pharmaceutical Sciences, PhD	269	Public Administration, MPA	433
Pharmaceutical Technologies, Graduate Certificate	384	Public and Media Relations, Graduate Certificate	369
Pharmacology, MS	276	Public Health and Exercise Science with a concentration in Physical Activity and Public Health, MPH/MS	253
Pharmacology, PhD	270	Public Health and Health Informatics, MPH/MS	254
Pharmacy and Public Health, PharmD/MPH	251		

Public Health and Health Informatics, MPH/MS	254	School Psychology, MS/CAGS	244
Public Health, MPH	248	School Psychology, PhD	240
Public History, Graduate Certificate	429	Security and Resilience Studies, Graduate Certificate	436
Public Policy Analysis, Graduate Certificate	452	Security and Resilience Studies, MS	434
Public Policy, MPP	443	Seeking more than One Certificate or Degree	307
Public Policy, PhD	437	Social Media And Online Communities, Graduate Certificate	371
Public Policy, PhD—Advanced Entry	439	Sociology	455
Public Safety	20	Sociology, PhD	455
Re-enrollment Policy for Full-time Students	126	Sociology, PhD—Advanced Entry	457
Readmission to Program	303	Special Student Status	301
Reentry to Program	303	Speech-Language Pathology, MS	246
Registration and Taking Courses	304	Sports Leadership, MSLD	352
Regulations Applying only to Doctor of Philosophy (PhD) Programs	11	Statements of Accreditation and State Authorization	508
Regulations Applying to All Degree Programs	10	Strategic Intelligence and Analysis, MA	314
Regulatory Affairs for Drugs, Biologics, and Medical Devices with Concentration in Clinical Research Regulatory Affairs, MS	342	Student Evaluation of Courses (EvaluationKit)	305
Regulatory Affairs for Drugs, Biologics, and Medical Devices with Concentration in General Regulatory Affairs, MS	343	Student Records and Transcripts	29
Regulatory Affairs for Drugs, Biologics, and Medical Devices with Concentration in International Regulatory Affairs, MS	344	Student Refunds	22
Regulatory Affairs for Drugs, Biologics, and Medical Devices with Concentration in Medical Devices, MS	345	Student Right-to-Know Act	33
Regulatory Affairs for Drugs, Biologics, and Medical Devices with Concentration in Operational Regulatory Affairs, MS	346	Student's Academic Standing	235
Regulatory Affairs for Drugs, Biologics, and Medical Devices with Concentration in Regulatory Compliance, MS	347	Students' Bill of Academic Rights and Responsibilities	41
Regulatory Affairs for Drugs, Biologics, and Medical Devices with Concentration in Strategic Regulatory Affairs, MS	348	Supply Chain Management, Graduate Certificate	97
Regulatory Affairs of Food and Food Industries, MS	350	Supply Chain Management—Online Program, Graduate Certificate	98
Regulatory Science, Graduate Certificate	385	Sustainable Building Systems, MSSBS	155
Reinstatement after Academic Dismissal	306	Taxation, MST	76
Remote Sensing, Graduate Certificate	370	Taxation—Online Program, MST	76
Requirements for Clinical, Internships, and Practicum Courses	232	Teaching, Elementary Licensure, MAT	315
Respiratory Care Leadership, MS	350	Teaching English To Speakers Of Other Languages, Graduate Certificate	371
Respiratory Specialty Practice, Graduate Certificate	370	Teaching, Secondary Licensure, MAT	316
Robotics, MS	195	Technical Communication, MS	351
Satisfactory Progress	374	Technological Entrepreneurship, Graduate Certificate	98
School of Architecture	46	Technological Entrepreneurship, MS	73
School of Criminology and Criminal Justice	412	Telecommunication Networks, MS	219
School of Journalism	60	The Doctor of Philosophy Degree (PhD)	374
School of Law	296	The Master's Degree Academic Requirements	375
School of Nursing	255	Time Limitation	374
School of Pharmacy	268	Transfer Credit	373
School of Public Policy and Urban Affairs	436	Transfer Credit Policies	301
		Transfer of Credit	100
		Transfer of Credit	234
		Tuition and Fees	22
		University Health and Counseling Services	20

University Leadership 507

University-Wide Academic Policies and Procedures 27

Urban Analytics, Graduate Certificate 453

Urban and Regional Policy, MS447

Urban Informatics, MS444

Urban Planning and Policy, MS66

Urban Planning and Policy, MS66

Urban Studies, Graduate Certificate 454

Women’s, Gender, and Sexuality Studies, Graduate Certificate 465

Northeastern University

Undergraduate Catalog 2018-2019

Full-Time Day Programs

Table of Contents

Undergraduate	10	University Academics	37
Admission	11	NUpath	37
Admission Policy and Entrance Requirements	11	Requirements	37
University Honors Program	14	Learning Goals	38
Specialized Entry Programs	14	Writing-Intensive Courses	40
Merit Scholarships	15	Additional Requirements for BA Students	40
Information for Entering Students	16	University-Wide Requirements	41
Student Orientation	16	Living and Learning Communities	41
Orientation for International Students	16	Experiential Learning	41
Parent/Family Programs	16	Cooperative Education	41
Residential Life	17	Research and Creative Activity	42
Health Requirements—University Health and Counseling Services (UHCS)	17	Service-Learning	42
English-Language Testing	17	Global Experience	43
Accommodations for Students with Disabilities	17	World Languages Center	43
We Care	17	University Scholars Program	44
Information Technology Services	17	University Honors Program	44
College Expenses	19	Northeastern Explore Program	44
Financial Aid	19	Premedical and Other Preprofessional Health Career Preparation	45
Student/Parent Loans	19	Prelaw Preparation	45
Bill Payment	20	Education	45
Tuition, Room, Board, and Fees Per Semester	21	Teaching, MAT PlusOne Program	46
Academic Policies and Procedures	25	Army, Air Force, and Navy Reserve Officers' Training Corps (ROTC) Programs	46
Academic Integrity Policy	25	General Studies Program	47
Accommodations for Students with Disabilities	25	About Sample Curricula	47
Attendance Requirements	25	Undergraduate Degrees	48
Student Evaluation of Courses (TRACE)	26	Undergraduate Internships	48
Registration and Taking Courses	26	College of Arts, Media and Design	49
Final Examinations and Related Policies on Other Exams and Final Term Papers/Projects	28	School of Architecture	49
Course Credit Guidelines	29	Architecture, BS	50
Grading System	29	Architectural Studies, BS	52
Academic Honors	30	Landscape Architecture, BLA	54
Academic Progression Standards	31	Architecture and English, BS	55
Graduation Requirements	32	Architecture and Graphic and Information Design, BS	57
Degrees, Majors, and Minors	32	Architectural and Urban History, Minor	59
Personal Information	34	Urban Landscape Studies, Minor	59
Family Educational Rights and Privacy Act (FERPA)	34	Art + Design	60
Student Right-to-Know Act	35	Art, BA	62
Leaves of Absence and University Withdrawal	35	Design, BFA	64

Games, BFA	67	Media Arts and Communication Studies, BA	100
Media Arts, BFA	68	Media and Screen Studies and English, BA	134
Studio Art, BFA	73	Media and Screen Studies and History, BA	137
Architecture and Graphic and Information Design, BS	57	Media and Screen Studies and Journalism, BA	139
Business Administration and Design, BS	76	Media and Screen Studies and Media Arts, BA	98
Computer Science and Design, BS	80	Media and Screen Studies and Philosophy, BA	142
Computer Science and Game Development, BS	83	Media and Screen Studies and Political Science, BA	144
Computer Science and Media Arts, BS	84	Media and Screen Studies and Sociology, BA	146
Communication Studies and Graphic and Information Design, BA	87	Media and Screen Studies and Theatre, BA	148
English and Graphic and Information Design, BA	89	Media and Screen Studies and Theatre, BS	149
Game Art and Animation, BFA	92	Music and Communication Studies with Concentration in Music Industry, BS	151
Game Design and Music with concentration in Music Technology, BS	94	Political Science and Communication Studies, BA	154
Graphic and Information Design and Mathematics, BS	95	Political Science and Communication Studies, BS	156
Journalism and Interaction Design, BS	96	Cinema Studies, Minor	158
Media and Screen Studies and Media Arts, BA	98	Communication Studies, Minor	158
Media Arts and Communication Studies, BA	100	Film Production, Minor	158
Theatre and Interaction Design, BA	102	Human Communication, Minor	159
Theatre and Interaction Design, BS	103	Media Screen Studies, Minor	159
Animation, Minor	105	Media Production, Minor	159
Art, Minor	105	Oratory and Public Speaking, Minor	160
Art History, Minor	106	Political Communication, Minor	160
Experience Design, Minor	106	Professional Presentation, Minor	160
Game Art, Minor	107	Rhetoric, Minor	161
Game Design, Minor	107	Social Activism, Minor	161
Graphic and Information Design, Minor	108	Sports, Media, Communication, Minor	161
Interaction Design, Minor	108	School of Journalism	162
Photography, Minor	109	Journalism, BA	162
Photojournalism, Minor	109	Journalism and English, BA	164
Video Arts, Minor	109	Journalism and Political Science, BA	166
Communication Studies	110	Media and Screen Studies and Journalism, BA	139
Communication Studies, BA	111	Computer Science and Journalism, BS	170
Media and Screen Studies, BA	113	Information Science and Journalism, BS	173
Communication Studies and Graphic and Information Design, BA	87	Journalism and Interaction Design, BS	96
Communication Studies and Media and Screen Studies, BA	118	Journalism Practice, Minor	177
Communication Studies and Sociology, BA	120	Journalism Studies, Minor	177
Communication Studies and Theatre, BA	123	Photojournalism, Minor	109
Computer Science and Communication Studies, BS	125	Music	178
English and Communication Studies, BA	127	Music, BA	179
Human Services and Communication Studies, BA	130	Music with Concentration in Music Industry, BS	182
Linguistics and Communication Studies, BA	131	Music with Concentration in Music Technology, BS	185
		Computer Science and Music with Concentration in Music Technology, BS	188

Game Design and Music with concentration in Music Technology, BS	94	Information Science and Business Administration, BS	249
Music and Communication Studies with Concentration in Music Industry, BS	151	Mathematics and Business Administration, BS	253
Physics and Music with Concentration in Music Technology, BS	194	Political Science and Business Administration, BS	256
Ethnomusicology, Minor	196	Concentrations	259
Music, Minor	196	Accounting	259
Music Composition, Minor	197	Business/Interdisciplinary	259
Music Industry, Minor	197	Entrepreneurship and Innovation	259
Music Performance, Minor	197	Finance	260
Music Recording, Minor	198	Management	261
Music Technology, Minor	198	Management Information Systems	261
Musical Theatre, Minor	199	Marketing	262
Songwriting, Minor	199	Supply Chain Management	262
NEC/NU Joint Certificate Program—Professional Studies Certificate in Music Performance	199	Minors	263
Theatre	201	Business Administration, Minor	263
Theatre, BA	202	Business Analytics, Minor	263
Theatre, BS	205	Emerging Markets, Minor	264
American Sign Language and Theatre, BS	208	Entrepreneurship, Minor	264
Communication Studies and Theatre, BA	123	Global Social Entrepreneurship, Minor	265
Cultural Anthropology and Theatre, BA	211	Leadership and Human Capital, Minor	265
English and Theatre, BA	212	Strategy, Minor	266
Media and Screen Studies and Theatre, BA	148	Sustainable Business Practices, Minor	266
Media and Screen Studies and Theatre, BS	149	Accelerated Bachelor/Graduate Degree Programs	267
Theatre and Interaction Design, BA	102	College of Computer and Information Science	268
Theatre and Interaction Design, BS	103	Computer Science	268
Theatre, Minor	220	Computer Science, BSCS	269
Dramatic Literature and the Human Experience, Minor	220	Computer Science with Concentration in Cyber Operations, BSCS	272
Global Fashion Studies, Minor	221	Computer Science, BACS	274
Musical Theatre, Minor	199	Cybersecurity, BS	276
Professional Presentation, Minor	160	Computer Science, Minor	279
Theatrical Design, Minor	222	Information Science	280
D'Amore-McKim School of Business	223	Information Science, BSIS	281
Bachelor of Science in Business Administration, BSBA	224	Information Science, Minor	283
Bachelor of Science in International Business, BSIB	226	Data Science	285
Business Administration Combined Majors	228	Data Science, BS	285
Business Administration and Design, BS	76	Data Science, Minor	287
Business Administration and Psychology, BS	231	Computer and Information Science Combined Majors	288
Computer Science and Business Administration, BS	234	Computer Science and Information Science, BS	289
Cybersecurity and Business Administration, BS	239	Computer Engineering and Computer Science, BSCompE	290
Economics and Business Administration, BS	243	Computer Science and Biology, BS	293
Health Science and Business Administration, BS	246	Computer Science and Business Administration, BS	234
		Computer Science and Cognitive Psychology, BS	301
		Computer Science and Communication Studies, BS	125

Computer Science and Criminal Justice, BS	307	Architectural Engineering, Minor	396
Computer Science and Design, BS	80	Civil Engineering, Minor	397
Computer Science and Economics, BS	312	Electrical and Computer Engineering	398
Computer Science and English, BS	314	Computer Engineering, BSCompE	399
Computer Science and Environmental Science, BS	318	Computer Engineering and Physics, BSCompE	402
Computer Science and Game Development, BS	83	Computer Engineering and Computer Science, BSCompE	290
Computer Science and History, BS	322	Electrical Engineering, BSEE	408
Computer Science and Journalism, BS	170	Electrical Engineering and Physics, BSEE	411
Computer Science and Linguistics, BS	327	Electrical Engineering and Music with concentration in Music Technology, BSEE	414
Computer Science and Mathematics, BS	330	Electrical and Computer Engineering, BSEE or BSCompE	415
Computer Science and Media Arts, BS	84	Biomedical Engineering, Minor	418
Computer Science and Music with Concentration in Music Technology, BS	188	Computer Engineering, Minor	419
Computer Science and Philosophy, BS	337	Computational Data Analytics, Minor	419
Computer Science and Physics, BS	339	Electrical Engineering, Minor	420
Computer Science and Political Science, BS	342	Robotics, Minor	420
Computer Science and Sociology, BS	344	Mechanical and Industrial Engineering	421
Cybersecurity and Business Administration, BS	239	Industrial Engineering, BSIE	422
Cybersecurity and Criminal Justice, BS	351	Mechanical Engineering, BSME	426
Cybersecurity and Economics, BS	352	Mechanical Engineering and Physics, BSME	430
Data Science and Biochemistry, BS	354	Biomechanical Engineering, Minor	431
Data Science and Health Science, BS	355	Healthcare System Operations, Minor	432
Information Science and Business Administration, BS	249	Industrial Engineering, Minor	432
Information Science and Cognitive Psychology, BS	360	Mechanical Engineering, Minor	433
Information Science and Environmental Science, BS	362	Accelerated Bachelor/Graduate Degree Programs	433
Information Science and Journalism, BS	173	Bouvé College of Health Sciences	434
Accelerated Bachelor/Graduate Degree Programs	367	Communication Sciences and Disorders	435
College of Engineering	368	Communications Sciences and Disorders, Minor	436
Interdisciplinary Minors	369	Speech-Language Pathology and Audiology, Minor	437
Entrepreneurial Engineering, Minor	369	Health Sciences	437
Materials Science and Engineering, Minor	370	Health Science, BS	438
Sustainable Energy Systems, Minor	371	Data Science and Health Science, BS	355
Bioengineering	372	Health Science and Business Administration, BS	246
Bioengineering, BSBioE	372	Environmental Engineering and Public Health, BS	394
Chemical Engineering	376	Health Science, Minor	446
Chemical Engineering, BSCHE	377	Health, Humanities, and Society, Minor	446
Chemical Engineering and Biochemistry, BSCHE	381	Healthcare System Operations, Minor	432
Chemical Engineering and Physics, BSCHE	383	Exercise Science, Minor	447
Biochemical Engineering, Minor	385	Global Health, Minor	448
Civil and Environmental Engineering	385	Nutrition, Minor	448
Civil Engineering, BSCE	386	Interdisciplinary	449
Environmental Engineering, BSEnE	391	Early Intervention, Minor	449
Environmental Engineering and Public Health, BS	394	Physical Therapy, Movement, and Rehabilitation Sciences	449

Rehabilitation Studies, BS	450	Environmental Studies, BA	516
Physical Therapy, DPT	452	Environmental Studies and History, BA	521
School of Nursing	454	Environmental Studies and International Affairs, BA	522
Nursing, BSN	454	Environmental Studies and Philosophy, BA	526
Nursing (BSN), Accelerated Program for Second-Degree Students	457	Environmental Studies and Political Science, BA	527
Nursing, RN-to-BSN	457	Sociology and Environmental Studies, BA	530
School of Pharmacy	458	Environmental Science, BS	530
Pharmaceutical Sciences, BS	460	Ecology and Evolutionary Biology, BS	535
Pharmacy Studies, BS	461	Marine Biology, BS	538
Pharmacy, PharmD	463	Computer Science and Environmental Science, BS	318
Accelerated Bachelor/Graduate Degree Programs	467	Environmental Geology and Chemistry, BS	499
College of Science	468	Environmental Studies and Economics, BS	549
Behavioral Neuroscience	469	Information Science and Environmental Science, BS	362
Behavioral Neuroscience, BS	469	Environmental Geology, Minor	552
Behavioral Neuroscience, Minor	472	Environmental Science, Minor	553
Biochemistry	472	Environmental Studies, Minor	553
Biochemistry, BS	473	Geology, Minor	554
Data Science and Biochemistry, BS	354	Marine Biology, Minor	554
Chemical Engineering and Biochemistry, BSCHE	381	Marine Studies, Minor	555
Biochemistry, Minor	479	Mathematics	555
Biology	480	Mathematics, BA	556
Biology, BS	480	Mathematics, BS	558
Cell and Molecular Biology, BS	484	Biology and Mathematics, BS	490
Biology and English, BS	488	Computer Science and Mathematics, BS	330
Biology and Mathematics, BS	490	Economics and Mathematics, BS	563
Biology and Political Science, BS	492	Graphic and Information Design and Mathematics, BS	95
Computer Science and Biology, BS	293	Mathematics and Business Administration, BS	253
Biology, Minor	497	Mathematics and Physics, BS	568
Chemistry and Chemical Biology	497	Mathematics and Political Science, BS	569
Chemistry, BS	497	Mathematics, Minor	571
Environmental Geology and Chemistry, BS	499	Physics	572
Chemistry, Minor	501	Physics, BS	572
Linguistics	501	Applied Physics, BS	577
Linguistics, BS	502	Biomedical Physics, BS	582
American Sign Language and Linguistics, BS	504	Mathematics and Physics, BS	568
Computer Science and Linguistics, BS	327	Computer Science and Physics, BS	339
Linguistics and Cultural Anthropology, BS	507	Physics and Music with Concentration in Music Technology, BS	194
Linguistics and Psychology, BS	509	Physics and Philosophy, BS	592
Linguistics and Communication Studies, BA	131	Chemical Engineering and Physics, BSCHE	383
Linguistics and English, BA	512	Computer Engineering and Physics, BSCompE	402
Linguistics, Minor	515	Electrical Engineering and Physics, BSEE	411
Marine and Environmental Sciences	515	Mechanical Engineering and Physics, BSME	430

Physics, Minor	603	American Sign Language and Linguistics, BS	504
Psychology	603	American Sign Language and Psychology, BS	611
Psychology, BS	603	American Sign Language and Theatre, BS	208
Business Administration and Psychology, BS	231	African Studies, Minor	666
American Sign Language and Psychology, BS	611	African-American Studies, Minor	666
Criminal Justice and Psychology, BS	612	American Sign Language, Minor	667
Computer Science and Cognitive Psychology, BS	301	Arabic, Minor	667
Information Science and Cognitive Psychology, BS	360	Chinese, Minor	667
Linguistics and Psychology, BS	509	Film and International Cultures, Minor	668
Psychology, Minor	621	Italian, Minor	669
Accelerated Bachelor/Graduate Degree Programs	621	Japanese, Minor	669
College of Social Sciences and Humanities	622	French, Minor	669
Interdisciplinary	623	Portuguese, Minor	670
Politics, Philosophy, and Economics, BS	623	Russian, Minor	670
Computational Social Science, Minor	625	Spanish, Minor	671
Digital Methods in the Humanities, Minor	626	Economics	671
Health, Humanities, and Society, Minor	446	Economics, BA	672
Food Systems Sustainability, Health, And Equity, Minor	627	Economics, BS	674
Latino/a, Latin American, and Caribbean Studies, Minor	628	International Affairs and Economics, BA	676
Law and Public Policy, Minor	628	Political Science and Economics, BA	680
Urban Studies, Minor	629	Computer Science and Economics, BS	312
Women's, Gender, and Sexuality Studies, Minor	630	Cybersecurity and Economics, BS	352
Asian Studies	631	Political Science and Economics, BS	686
Asian Studies, BA	631	Economics and Business Administration, BS	243
History and Asian Studies, BA	632	Economics and Mathematics, BS	563
East Asian Studies, Minor	634	Economics and Philosophy, BS	692
School of Criminology and Criminal Justice	634	Environmental Studies and Economics, BS	549
Criminal Justice, BS	635	Economics, Minor	694
Computer Science and Criminal Justice, BS	307	English	694
Criminal Justice and Philosophy, BS	640	English, BA	695
Criminal Justice and Political Science, BS	641	Computer Science and English, BS	314
Criminal Justice and Psychology, BS	612	English and Communication Studies, BA	127
Cybersecurity and Criminal Justice, BS	351	English and Cultural Anthropology, BA	703
Human Services and Criminal Justice, BS	646	English and Graphic and Information Design, BA	89
Criminal Justice, Minor	648	English and Philosophy, BA	708
Cultures, Societies, and Global Studies	649	English and Theatre, BA	212
African-American Studies, BA	649	History and English, BA	712
Religious Studies and African-American Studies, BA	651	Journalism and English, BA	164
Spanish, BA	653	Linguistics and English, BA	512
Spanish and International Affairs, BA	654	Media and Screen Studies and English, BA	134
African-American Studies, BS	658	Architecture and English, BS	55
American Sign Language, BS	660	Biology and English, BS	488
American Sign Language and Human Services, BS	661	English, Minor	727

Rhetoric, Minor	727	Sociology and International Affairs, BA	805
Writing, Minor	728	Spanish and International Affairs, BA	654
History	728	International Affairs, Minor	811
History, BA	729	Middle East Studies, Minor	813
Environmental Studies and History, BA	521	Jewish Studies	814
History and Asian Studies, BA	632	Jewish Studies and Religion, BA	814
History and Cultural Anthropology, BA	734	Jewish Studies, Minor	818
History and English, BA	712	Philosophy and Religion	818
History and Philosophy, BA	738	Philosophy, BA	819
History and Political Science, BA	739	Religious Studies, BA	826
History and Religious Studies, BA	740	English and Philosophy, BA	708
Media and Screen Studies and History, BA	137	Environmental Studies and Philosophy, BA	526
History, BS	744	History and Philosophy, BA	738
Computer Science and History, BS	322	History and Religious Studies, BA	740
History, Minor	750	International Affairs and Religious Studies, BA	796
Human Services	750	Jewish Studies and Religion, BA	814
Human Services, BA	751	Media and Screen Studies and Philosophy, BA	142
Human Services and International Affairs, BA	753	Political Science and Philosophy, BA	843
Political Science and Human Services, BA	757	Religious Studies and African-American Studies, BA	651
Human Services and Sociology, BA	758	Philosophy, BS	847
Human Services, BS	759	Computer Science and Philosophy, BS	337
American Sign Language and Human Services, BS	661	Criminal Justice and Philosophy, BS	640
Human Services and Communication Studies, BA	130	Economics and Philosophy, BS	692
Human Services and Criminal Justice, BS	646	Physics and Philosophy, BS	592
Political Science and Human Services, BS	766	Political Science and Philosophy, BS	859
Human Services and Sociology, BS	767	Politics, Philosophy, and Economics, BS	623
Human Services, Minor	768	Philosophy, Minor	863
International Affairs	769	Religious Studies, Minor	863
International Affairs, BA	769	Ethics, Minor	864
International Affairs with African Studies Concentration, BA	773	Political Science	865
International Affairs with Asian Studies Concentration, BA	775	Political Science, BA	866
International Affairs with European Studies Concentration, BA	777	Environmental Studies and Political Science, BA	527
International Affairs with Latin American Studies Concentration, BA	779	History and Political Science, BA	739
International Affairs with Middle East Studies Concentration, BA	781	Journalism and Political Science, BA	166
Environmental Studies and International Affairs, BA	522	Political Science and Communication Studies, BA	154
Human Services and International Affairs, BA	753	Media and Screen Studies and Political Science, BA	144
International Affairs and Cultural Anthropology, BA	790	Political Science and Economics, BA	680
International Affairs and Economics, BA	676	Political Science and Human Services, BA	757
International Affairs and Religious Studies, BA	796	Political Science and International Affairs, BA	800
Political Science and International Affairs, BA	800	Political Science and Philosophy, BA	843
		Sociology and Political Science, BA	888
		Political Science, BS	890
		Biology and Political Science, BS	492

Political Science and Business Administration, BS	256
Political Science and Communication Studies, BS	156
Criminal Justice and Political Science, BS	641
Political Science and Economics, BS	686
Political Science and Human Services, BS	766
Political Science and Philosophy, BS	859

Admission

- Admission Policy and Entrance Requirements (p. 11)
- University Honors Program (p. 14)
- Specialized Entry Programs (p. 14)
- Merit Scholarships (p. 15)

Admission Policy and Entrance Requirements

Admission to Northeastern is highly selective. The complexity of the admission process is not one that can be defined through a formula. At Northeastern, we evaluate all applicants holistically in order to identify candidates who will bring a diverse set of experiences and interests to our community. Each year, approximately 2,800 new freshmen and 400 new transfer students enroll in September. In addition, over 900 new students will enroll in January through participation in The N.U.*in* Program. The N.U.*in* Program is an innovative first-year global experience during which admitted students begin their college studies at one of our partner institutions overseas while earning transfer credits in the fall semester¹ and transitioning to the Boston campus in the spring semester. See additional information about The N.U.*in* Program.

In building a diverse and talented incoming class, the Admissions Committee seeks to enroll students who have been academically successful and who have been actively involved in their school and community.

When considering applicants for freshman admission, the committee considers whether the applicant's high school transcript reflects the various academic opportunities offered such as honors, advanced placement, international baccalaureate, or college-level courses. Typically, students admitted to Northeastern have been extremely successful with a challenging course load.

When reviewing transfer students, the committee considers the candidate's college and high school transcripts, letters of recommendation, resumé, essay, academic preparation for major of choice, and contributions to the community. In certain cases, standardized test scores are required. Transfer applicants are encouraged to submit all supporting materials by the application deadline.

Northeastern accepts both the Common Application and the Coalition Application. Students may apply online via the Common Application or the Coalition Application. Northeastern does not have a preference for which application is submitted. Both the Common Application and the Coalition Application will be reviewed equally.

The committee will begin to evaluate an applicant's candidacy for admission when all application credentials have been received. Students are informed of their application information through the Application Status Check. Students are highly encouraged to verify that identification information (name, date of birth, and NU ID) is on every item submitted to ensure timely and accurate processing.

¹ Throughout this catalog, the word semester refers both to full semesters and to half semesters, except in cases where there is a cost or timeline difference. In such cases, the terms "full semester" and "half semester" are used.

Deadlines and Decisions

Northeastern offers the following application options.

Freshman Applicants:

- Early Decision I (binding enrollment for fall admission)
- Early Action (nonbinding)
- Early Decision II (binding enrollment for fall admission)
- Regular Decision (nonbinding)

Transfer Applicants:

- Application for fall start (apply in spring)
- Application for spring start (apply in fall)
- All transfer application options are dependent on space availability

Required Materials

The committee will begin to evaluate an applicant's candidacy for admission when all application credentials have been received. Students are informed of their application information through the Application Status Check. Students are highly encouraged to verify that identification information (name, date of birth, and NU ID) is on every item submitted to ensure timely and accurate processing.

FRESHMAN APPLICANTS

More than 62,000 students apply for a space in the freshman class. The committee has the responsibility of selecting applicants for admission who it believes will contribute to Northeastern's diverse and vibrant academic and social community. The committee is particularly interested in applicants who have challenged themselves academically; are highly motivated; have a strong work ethic; and who have demonstrated qualities of leadership, creativity, diversity, engagement, global perspective, adaptability, and resiliency. Our students exhibit a commitment to involvement and to being a positive influence in their community and in the world. We encourage applicants to spend time to thoughtfully prepare their application in order to make sure their strengths and qualities resonate with the Admissions Committee.

Freshman applicants must submit the following:

- Completed Common Application or Coalition Application.
- Application fee of \$75.
- Secondary school counselor and teacher recommendations.
- Secondary school transcripts with final junior-year grades. First-semester or first-trimester grades should be submitted when they are available; first-quarter grades are not required.
- Early Decision Agreement for students applying under the binding Early Decision I or II application options.
- Official SAT or ACT results. Northeastern's CEEB college code is 3667/ACT college code is 1880. Test scores must be sent to Northeastern directly from the testing agency.
- Portfolios are required for Studio Art and are highly encouraged for majors within the College of Arts, Media and Design. Beginning in spring 2018, a portfolio is no longer required for music technology applicants. Northeastern uses SlideRoom for online portfolio submissions. See additional information (p. 14).

- General Equivalency Diploma (GED) recipients should provide their official GED score reports and their most complete high school transcript.
- Home-schooled applicants should submit an academic portfolio/transcript consistent with their state guidelines. This should include grades for each course. They must also provide proof that they will have met by the end of May of the year of graduation all requirements for an official high school diploma and submit a GED, or a certificate of completion from their local school district or state board of education, by the end of July of the year of matriculation. In addition to all other first-year requirements, home-schooled students must submit Northeastern's home-school supplement, which requires students to detail the rigor of their course work.
- Early high school graduates: Northeastern will review applications from students who will complete high school in three years or less. Before enrolling at the university, all applicants for early admission must have completed all units required for high school graduation (including four years of English) or must have earned the GED. In addition to the required materials for freshman applicants, early high school graduate applicants must provide statements of support from the school principal or guidance counselor and the student's parents. The endorsements should speak directly to the applicant's academic readiness and emotional maturity for college.
- Nontraditional grading policies: Students who attend schools where narrative evaluations are used instead of traditional letter grades are required to submit the narratives to complete their applications.
- English proficiency: Northeastern seeks to enroll the most talented and academically qualified students. All Northeastern courses are instructed in English, and therefore attention is paid in application review to preparedness for success in an English-language environment. There may be additional requirements for applicants whose first language is not English. Please see the admissions website (<https://www.northeastern.edu/admissions/application-information>) for the most up-to-date information.
- For applicants applying from secondary schools located outside the United States, SAT or ACT scores are not required and will not be considered for admission if submitted. Applicants are encouraged to submit results from nationally accredited exams that signify completion of secondary education and are required for entry into universities in their home country. Applicants who attend a high school in the United States are required to submit their official SAT or ACT results.

TRANSFER APPLICANTS

Each year we receive over 4,000 applications for transfer admission. Our most competitive candidates for transfer admission typically have a grade-point average of 3.500 or higher.

Transfer applicants must submit the following:

- Completed Common Application or Coalition Application.
- Application fee of \$75.
- Official college transcript(s) for all institutions you have attended.
- College Report to be completed by the registrar's office or dean of your current/previous school.
- Academic evaluation from an academic advisor, professor, or employer.
- Final high school transcript or GED.
- SAT/ACT scores for students who have completed fewer than 24 college credits (after high school graduation) at the time of the application deadline. *This is not required for students who have been out of high school for more than five years. Standardized test scores are*

not required for students who did not complete high school in the United States.

- Joint Service Transcript (if you are a veteran).
- English proficiency: Northeastern seeks to enroll the most talented and academically qualified students. All Northeastern courses are instructed in English, and therefore attention is paid in application review to preparedness for success in an English-language environment. There may be additional requirements for applicants whose first language is not English. Please see the admissions website (<https://www.northeastern.edu/admissions/application-information>) for the most up-to-date information.
- Portfolios are required for Studio Art and are highly encouraged for majors within the College of Arts, Media and Design. Northeastern uses SlideRoom (<http://www.northeastern.edu/admissions/application-information>) for online portfolio submissions. See additional information (p. 14).

TRANSFER CREDIT

Students may transfer up to 60 semester hours of credit from a two-year college, or up to 80 semester hours from a four-year college, or a combination of the two types of colleges. If you have been admitted to the D'Amore-McKim School of Business and your college or university is not AACSB-accredited, the maximum number of credits that you can transfer to Northeastern is 60. See also "Residency Requirement (p. 32)."

College courses completed with a grade of C or better are considered for transfer credit by faculty evaluators. Liberal arts course work taken more than 10 years ago and math and science course work completed more than 5 years ago cannot be considered.

All transfer-credit documents should be received prior to matriculation and *must* be received within one semester of matriculation. These documents include, but are not limited to, Advanced Placement, International Baccalaureate, and National Education exam scores and official transcripts from colleges and universities. These documents should be submitted whether or not you wish to receive transfer credit from this work. Transfer credit *will not* be granted for work completed prior to matriculation if the official credential is received after the completion of the first semester. College course work completed at an international institution must be translated into English and evaluated by a recognized credential agency.

ADVANCED EXAMINATIONS

Students may apply up to 32 semester hours of advanced credit toward their undergraduate degrees. You may enter the university with advanced credit on the basis of your test scores on certain specific examinations (listed below) or on successful completion of accredited college-level courses that you took before you enrolled at Northeastern. For consideration, students should submit transcripts or test results before matriculation and must submit official score reports for credit.

Northeastern currently awards advanced credit for the following examinations:

- Advanced Placement
- British GCE A-Level Examination
- German Abitur
- French Baccalaureate
- International Baccalaureate
- Swiss Federal Maturita Diploma

Advanced Placement Evaluations

The university awards credit for test scores of 4 and 5. Visit the Transfer Equivalency Database (<https://ugadmissions.northeastern.edu/transfercredit/TransferCreditevaluatedstudent2.asp>) for an up-to-date AP listing.

Credit awarded: 4–10 semester hours or up to two courses per exam (refer to AP listing).

British GCE A-Level Examination

The university awards credit for A-level courses with final exam grades of C or better.

German Abitur

The university awards credit for intensive subjects with scores of 7 or higher on a 15-point scale and 4 or higher on a 6-point scale only for subjects that required a written exam.

French Baccalaureate

The university awards credit for any series A–E on the Baccalaureate de l'Enseignement du Second Degré with a coefficient of 4 or above and a score of 10 or better on a 20-point scale.

International Baccalaureate

The university generally awards credit for exam scores of 5, 6, or 7 in higher-level courses only. Visit the International Baccalaureate guide page (<https://www.northeastern.edu/admissions/wp-content/uploads/2016/09/International-Bac-Chart-2016.2017.pdf>) for an up-to-date IB listing.

Swiss Federal Maturita Diploma

The university awards credit for a final score of 4 or higher on a 6-point scale or 6 or higher on a 10-point scale.

ADDITIONAL INFORMATION FOR INTERNATIONAL APPLICANTS

International student applications are reviewed considering their performance in their particular academic environments. SAT or ACT scores are not required for applicants who will graduate from schools located outside the United States. International citizen applicants who attend a high school in the United States are required to submit test scores. U.S. Department of Defense school students are required to submit SAT or ACT scores.

In order to maintain lawful student status in the United States, international students must be mindful of the rules and regulations that govern their nonimmigrant visa classification. Numerous U.S. federal mandates and regulations, including the Student and Exchange Visitor Information System (SEVIS), make it especially important for students in the “F” (student) and “J” (exchange visitor) categories to consult regularly with an international student advisor at the Office of Global Services (OGS) (<http://www.northeastern.edu/ogs>) before taking any action that might affect their immigration status and educational endeavors in the United States.

International students in F-1 and J-1 status must register as full-time students (minimum of 12 credits) and on time (within the appropriate registration period) each term during the regular academic year. In addition, international students must not begin, extend, or resume any type of employment without first obtaining proper employment authorization or verification from the OGS. Any exceptions to full-time registration requirements must be preapproved by the OGS in accordance with specified federal regulations.

In order for prospective F-1 and J-1 students to start their undergraduate program here, they must obtain the certificate of eligibility from OGS. For F-1 students, this document is called Form I-20, and for J-1 students, this document is called Form DS-2019. The international student will

need to complete the e-form on the myOGS system and work with the undergraduate admissions office to meet all requirements needed for successful submission of the request for I-20 or DS-2019. Once the request is approved by the undergraduate admissions office, the OGS will get a request for the student's I-20 and will need 10 business days to generate the student's certificate of eligibility. Students then are able to apply for their F-1 or J-1 visa stamp at a U.S. consulate overseas and, if the visa is granted, enter the United States no earlier than 30 days prior to the start date of their academic program to begin their studies here.

An international student may attend Northeastern in a nonimmigrant status other than F-1 or J-1 only if U.S. Immigration regulations allow for study in the United States under that specific nonimmigrant visa classification. Some international students must apply and be approved for a change of status (e.g., from F-2 to F-1) before beginning their program at Northeastern. For information on nonimmigrant visa statutes other than F-1 and J-1 (including eligibility to work in the United States or participate in co-op and other forms of experiential learning required by your academic program), contact the OGS at ogs@northeastern.edu. Not all visa categories allow for internships, co-ops, international travel associated with an academic program, and/or other experiential learning opportunities. Note that some academic programs at Northeastern have experiential learning requirements (e.g., co-op or study abroad). Nonimmigrant visa statutes other than F-1/J-1 may not allow for those requirements to take place and, as such, may impede the successful completion of your program of study.

REQUIREMENTS FOR APPLICANTS WHOSE PRIMARY LANGUAGE IS NOT ENGLISH

Students whose native language is not English, regardless of their country of citizenship or residence, are required to submit official results of the Test of English as a Foreign Language (TOEFL), the English Test of the International English Language Testing System (IELTS), or the Pearson Test of English (PTE). Applicants must present the required minimum passing scores for admission.

COLLEGE, MAJOR, AND LENGTH OF PROGRAM SELECTION

Applicants to Northeastern University apply to one of our seven undergraduate colleges or to the Explore Program for undeclared students.

We encourage students to select a major that reflects their current academic interests and aspirations; however, the Explore Program for undeclared students provides opportunities to explore our various disciplines and programs. Northeastern offers advisory programs for students interested in preprofessional programs, including medical, dental, law, and veterinary graduate school. Transfer students may not apply to the Explore Program for undeclared students.

Northeastern University offers a broad and deep curriculum that is flexible, and the academic calendar allows students to maximize experiential learning opportunities, including research, study abroad, and our signature co-op program. Students become architects of their own paths, charting their unique course that determines their time to degree. Students can build a program that is four years or five years and gain up to 18 months of full-time experiential learning. Freshmen can participate in NUterm in Summer I of their freshman year, taking advantage of exciting and unique course offerings or regular classes during the May/June semester. By participating in NUterm, students take advantage of Northeastern's signature flexibility, beginning their sophomore year with an additional half term completed. Many colleges offer PlusOne programs, which link undergraduate work with graduate studies. See the detailed curricula in this catalog for more information.

Admission Requirements for the College of Arts, Media and Design

GUIDELINES FOR PORTFOLIO SUBMISSION

All portfolios should be submitted electronically via SlideRoom. Hard-copy portfolios will not be accepted and cannot be reviewed.

STUDIO ART

Applicants for the studio art major, a joint program of Northeastern University and the School of the Museum of Fine Arts, Boston, are required to submit a portfolio through SlideRoom. This portfolio requires a minimum of 15 individual images of original artwork. The portfolio may include work in a variety of media; no particular subject matter or style is required. Rather, students should select work that best shows their personal style, creativity, and commitment to innovation. Check the Department of Art + Design website (<http://www.northeastern.edu/camd/artdesign>) for more information.

MUSIC COMPOSITION AND TECHNOLOGY

Beginning in spring 2018, portfolios are no longer required for students applying to music composition and technology.

MUSIC PERFORMANCE

Once enrolled, students in any music concentration may also audition to pursue a minor in musical performance. This program is highly competitive and therefore requires evaluation by the Department of Music. Auditions are typically scheduled during a student's first semester at Northeastern. For specific questions regarding the program or audition requirements, please reference the CAMD website (https://camd.northeastern.edu/music/academic-programs/minor-in-music-performance/#_ga=26162929219060109681522070914-16965839841517851807).

University Honors Program

The University Honors Program values integrated, student-directed, and experiential learning that is personalized to meet students' unique interests and goals. Our community of intellectually engaged students, advisors, and faculty are committed to making a difference at home and in the world. Students benefit from unique and enriched educational options that include stimulating courses and opportunities for global exploration, research and creative endeavors, service-learning, mentoring, and more. Honors students are guided and supported as they chart their unique educational plans through personalized advising and through their participation in a set of networked communities that include Honors Living Learning Communities.

All applicants seeking freshman entry at Northeastern University (for fall semester entry) are considered for admission into the University Honors Program and are notified of their selection in their letter of admission. There is no separate application. Continuing students in their first or second semester who wish to be considered for the University Honors Program may consult the program's website for instructions on how to apply: www.northeastern.edu/honors. (<https://www.northeastern.edu/honors>)

Specialized Entry Programs

Northeastern University offers admission and enrollment programs and opportunities that advance the university's mission and help meet students' needs. Students who apply for admission to Northeastern may be automatically offered direct entry into some of these programs or, in some cases, may be referred for consideration into other programs. These selections are based on a holistic review of student credentials.

Northeastern is continually assessing our specialized entry programs and opportunities, and additional programs and opportunities may become available while existing programs and opportunities may be modified.

For a complete list of our specialized programs and opportunities, visit the specialized programs webpage (<https://www.northeastern.edu/admissions/academics/specialized-entry>).

The N.U.*in* Program

Northeastern enrolls selected new students in the spring semester through The N.U.*in* Program. During the fall semester N.U.*in* participants study abroad at a partner institution earning transfer credit and enroll in classes as part of the Northeastern community in Boston in the spring. These transfer credits earned are guaranteed to be valid at Northeastern but might not be accepted by other institutions. Participants have studied at partner institutions located in Australia, Canada, China, England, Germany, Greece, Ireland, and Italy in recent years.

General Studies Program

General Studies is a first-year program designed to help students build skills for academic success in their freshman year and beyond. General Studies students spend their freshman year immersed in a combination of first-year requirements, NUpath courses, and introductory courses for their intended major. See additional information (p. 47).

Foundation Year

This first-year college program is designed for recent high school graduates and General Equivalency Diploma (GED) completers from the city of Boston who would benefit from a more structured and supportive first year in order to be successful in the rest of their college career. Foundation Year offers students rigorous academic and career preparation as well as wraparound support services that include advising, tutoring, mentoring, social networking, and work-ready skill development.

Torch Scholars Program

The Torch Scholars Program is a comprehensive support program for first-generation college students who have already succeeded against the odds but who have not yet reached their full academic potential. After a holistic review and thorough interview process, selected Torch Scholars are granted admission to the university and awarded a full-tuition, fees, and room-and-board scholarship for our Summer Immersion Program and eight subsequent semesters of undergraduate study.

N.U. *Bound*

N.U. *Bound* is a first-year college program for non-U.S. citizens that provides rigorous academics and acculturation support to ensure a smooth transition to Northeastern in the student's second year. The fall and spring academic terms are delivered in the city of Suzhou, China, through a partnership with the China Institute, while the final phase of N.U. *Bound* is a two-week prematriculation program delivered at Northeastern University's Boston campus. Please note, N.U. *Bound* provides a conditional offer of admission to Northeastern upon successful completion of the program.

N.U. *Immerse*

N.U. *Immerse* is a transitional experience for students who require English-language preparation and are looking to earn credit while gaining an introduction to the American education system and college culture. Students will improve language and academic skills through a specially designed two-semester curriculum. N.U. *Immerse* offers conditional admission to undergraduate degree programs upon successful completion of the program.

ContiNUe

ContiNUe is a yearlong academic program for first-year students, many of whom are continuing their family legacy at Northeastern. With a focus on preparing our students to be leaders, ContiNUe teaches students transferable skills such as problem solving, decision making, and the game-changer mindset. ContiNUe students complete two semesters of first-year courses through the College of Professional Studies. Students then participate in NUterm before beginning their second full year. ContiNUe provides a conditional offer of admission to Northeastern upon successful completion of the program.

The American Classroom Program

Please note that beginning in fall 2018, students may only apply directly to the American Classroom program. Students will no longer be referred to the program through the undergraduate admission process.

Merit Scholarships

Northeastern provides highly selective scholarship programs aimed at rewarding and recognizing outstanding academic achievement. All applicants who apply on time are considered for these scholarships and no additional applications are necessary. Please note that scholarship consideration is separate from the financial aid application process. International students are eligible for merit scholarship consideration, but Northeastern University does not offer need-based assistance to international students.

National Merit Finalist and National Hispanic Scholar Scholarships

Award: A scholarship for admitted freshman applicants who are designated National Merit Finalists or National Hispanic Recognition Program Scholars. Students who are National Hispanic Recognition Program Scholars must submit documentation to Northeastern by the posted deadline. National Merit Finalists must rank Northeastern as their school of choice by the posted listing deadline. Recipients who maintain normal progress toward a degree, with the minimum 3.000 grade-point average, may renew the award for the full eight-semester program.

Eligibility: Admitted freshman applicants who are U.S. citizens or documented permanent residents and have been designated National Merit Finalists by the National Merit Scholarship Corporation (NMSC) and students identified as National Hispanic Recognition Program Scholars.

Merit Scholarships

Awards: Students who are in the top 10 to 15 percent of our applicant pool are considered for competitive merit awards, including Dean's, Connections, and International Scholarships. Recipients who maintain normal progress toward a degree, with a minimum grade-point average of 3.000, may renew these awards.

Northeastern Honors Program

Each year, the admissions office selects a group of students to join the University Honors Program at Northeastern University. Those invited into the Honors Program are among our most highly accomplished admitted students. There is no separate application process for the Honors Program, and students are considered at all decision deadlines. Decisions are rendered based on the undergraduate admissions application submitted to the university. The invitation to join the University Honors Program is included in the official admission letter. Additional details regarding scholarships and grants for Honors Program students may be found online (<http://www.northeastern.edu/honors/community/honors-program-scholarships>).

Phi Theta Kappa Scholarships (Transfer Students Only)

Award: A grant recognizing high levels of academic achievement in the beginning years of college. Recipients who maintain normal progress toward a degree, with a minimum grade-point average of 3.000, may renew the award.

Eligibility: Applicants for fall transfer admission who have earned a 3.500 grade-point average in 32 semester hours or equivalent quarter hours or units of college-level course work. For eligibility, you must be a U.S. citizen or a permanent resident enrolling directly from a two-year institution of higher education.

Ujima Global Leaders Program

The Ujima Global Leaders Program is a scholarship program focused on developing leaders for tomorrow's diverse and complex world. Ujima Global Leaders from all academic disciplines will work collaboratively to develop intercultural competence and awareness by engaging with communities on campus, throughout Boston and the world. Working with staff and faculty, Ujima Global Leaders may choose to make an impact based on their interests and goals via community service involvement, experiential opportunities, and research and global experiences. Committed to excellence, academic achievement, service, and diversity, Ujima Global Leaders will be prepared to meet the challenges of tomorrow. The Ujima Global Leaders Program seeks to enroll academically talented first-year students with demonstrated leadership skills, community involvement, and/or an interest in issues related to serving underrepresented and underserved populations. Recipients receive a scholarship called the Ujima Global Leadership Award, and those with demonstrated financial need will have their full need met. Ujima Global Leaders are expected to participate in Northeastern's Civic Engagement Program and complete 50 hours of community service each year.

Contact the Office of Undergraduate Admissions if you have any questions about the application process.

Office of Undergraduate Admissions
Northeastern University

Information for Entering Students

- Student Orientation (p. 16)
- Orientation for International Students (p. 16)
- Parent/Family Programs (p. 16)
- Residential Life (p. 17)
- Health Requirements—University Health and Counseling Services (UHCS) (p. 17)
- English-Language Testing (p. 17)
- Accommodations for Students with Disabilities (p. 17)
- We Care (p. 17)
- Information Technology Services (p. 17)

Student Orientation

It is **mandatory** for all incoming first-year and transfer undergraduate students to participate in **student orientation** hosted by the Office of Student Orientation and Parent/Family Programs.

Students beginning in the fall will attend sessions during the months of June and July. Students starting in the spring will attend a session in January prior to the start of the semester. Once a student officially commits to the university by paying the enrollment fee, they will have the ability to register for student orientation through the myNortheastern (<https://my.northeastern.edu>) admitted student portal.

At orientation, students will get acclimated to campus and Boston, prepare for the start of the academic year, and experience what makes Northeastern unique. Students will also register for classes, get their student ID card, and partake in a variety of activities to meet fellow classmates.

The undergraduate student fee supports student orientation costs, including the opportunity to have *two complimentary guests* participate in the **Parent/Family Orientation**. This is a tuition-based fee; more information may be found on the Student Financial Services (<https://studentfinance.northeastern.edu>) website.

Undergraduate **international students (non-U.S. citizens)** are required to attend the student orientation session immediately preceding the start of the fall academic semester. The Office of Global Services (OGS) (<https://www.northeastern.edu/ogs>) will host a specialized presentation that will be incorporated into the two-day student orientation program; separate registration is not required. Following student orientation, OGS will continue with acculturation programming, such as regional excursions and intercultural/diversity education seminars. Students who are U.S. citizens, but reside abroad, are more than welcome to join OGS sessions/activities.

The Office of Student Orientation and Parent/Family Programs
101 Ell Hall
Northeastern University
360 Huntington Avenue
Boston, MA 02115

Phone: 800.696.6516
Email: orientation@northeastern.edu

Orientation for International Students

The Office of Global Services (OGS) (<http://www.northeastern.edu/ogs>) organizes year-round orientation and acculturation programming throughout the year for newly arrived international students and U.S. citizens from abroad. OGS's International Student Orientation provides a unique forum for intercultural interaction and learning, with activities that include an "airport welcome," cultural enrichment programming, information sessions, F-1 or J-1 international student advising, regional excursions, and educational seminars that bring a cross-cultural focus to topics such as academic success, student life, and the dynamics of diversity. OGS's mandatory International Student Online Check-In process and orientation begin prior to the start of the fall and spring semesters, comprising several weeks of activities that provide international students (and others who have lived abroad) an opportunity to gain familiarity with Northeastern in a cross-cultural context while also serving to facilitate the formation of friendships across cultures.

International students holding an F-1 or J-1 visa should plan to arrive several days before the start of the semester as outlined in the OGS orientation schedule in order to attend the scheduled International Student Orientation program and complete the International Student Online Check-In process. All matriculating international students will have access to a preliminary schedule from the OGS prior to their arrival in the United States. Immediately prior to the start of the semester, the Office of New Student Orientation organizes mandatory orientation and academic advising.

For further details on the OGS International Student Orientation and Online Check-In process, and for other information pertinent to international students, contact:

The Office of Global Services (OGS)
405 Ell Hall
Northeastern University
360 Huntington Avenue
Boston, MA 02115

617.373.2310

Parent/Family Programs

The Office of Student Orientation and Parent/Family Programs assists families in making connections with the university and its resources during their student's time at Northeastern. The office helps with a broad spectrum of issues—academic, administrative, and personal.

The office hosts several events each year, including Parent & Family Weekend, and provides timely communications on important campus news and events through their website (<http://northeastern.edu/parents>), Parent Matters newsletters, Facebook (<https://www.facebook.com/ParentFamilyProgramsAtNortheasternUniversity>) page, Tuesday Talks webinars, Parent Corner Message Board, and Parent Portal.

Parents and guardians of students can create an online Parent Portal account by visiting the myNortheastern web portal (<https://my.northeastern.edu>), through which their student may grant them access to services related to their Northeastern experience.

Residential Life

The Department of Residential Life strives to create a community for our residents by planning programs and activities that help students get to know others on their floor and in their residence hall. We also provide services that support our residents in accomplishing their academic and personal goals. Residential Life staff are trained in counseling, crisis intervention, and conflict resolution, as well as interpersonal communications, in order to assist our students to achieve their aspirations.

Each hall is supervised by a professional residence director and student resident assistants, who work together to maintain close contact with students to help make their experience living on campus a positive one.

The university offers a variety of housing options tied to specific programs of study for first-year students known as Living Learning Communities (LLCs). The LLCs offer students a supportive, achievement-oriented environment with opportunities for friendship around common interests as well as continued learning and sharing outside the classroom. LLCs commonly feature tutoring, advising, and study groups as well as unique programs designed to promote student growth and advancement.

Health Requirements—University Health and Counseling Services (UHCS)

Prior to entering Northeastern, all enrolled students must complete and submit a Health Report to University Health and Counseling Services (UHCS). It must be completed and returned by the stated deadline. The required record of immunity section is necessary for compliance with the Massachusetts Immunization Requirements for College-Age Students. Failure to meet the requirement will prevent future course registration. Additionally, further documentation of immunity is mandatory for students in Bouvé College of Health Sciences.

Visit the UHCS website (<http://www.northeastern.edu/uahcs>) to access the Health Report online.

English-Language Testing

NU Global conducts English-language testing for international students who are referred for this service. The testing takes about two hours. The NU Global Test measures English composition, listening comprehension, grammar, vocabulary, and reading comprehension and is administered by the NU Global Office at Northeastern University.

Any department may refer students for testing. Students must arrive on time on designated test days. Referral forms and a schedule of test dates are available to departments by request. Departments should contact cpsadmissions@northeastern.edu for more information.

Accommodations for Students with Disabilities

Northeastern University and the Disability Resource Center (DRC) are committed to providing disability services that enable students who qualify under Section 504 of the Rehabilitation Act and the Americans with Disabilities Act Amendments Act (ADAAA) to participate fully in the activities of the university. To receive accommodations through the DRC, students must provide appropriate documentation that demonstrates a current substantially limiting disability. Accommodations are provided based on an evaluation of the information provided by students and their clinicians, on a case-by-case basis. These services are available for, but not limited to, students with the following diagnoses:

- Learning disabilities and/or AD(H)D
- Autism spectrum disorders
- Chronic or degenerative disorders
- Hearing loss
- Mobility impairments
- Psychiatric disorders
- Traumatic or acquired brain injury
- Vision impairments

Students should provide documentation to the DRC at their earliest convenience to allow for sufficient time for review. After the documentation has been reviewed, a disability specialist will contact the student regarding appropriate next steps. Visit the DRC website at: <http://www.northeastern.edu/drc/> for additional information or contact staff at 617.373.2675.

We Care

We Care is a program that assists students experiencing unexpected challenges maintaining their academic progress. We Care works with the student to coordinate among university offices and to offer appropriate on- and off-campus referrals to support successfully resolving issues. For further information, contact:

We Care
104 Ell Hall
617.373.4384
Website (wecare@northeastern.edu)
www.northeastern.edu/wecare (<http://www.northeastern.edu/wecare>)

Information Technology Services

617.373.4357 (xHELP)
help@northeastern.edu
Website (<http://www.northeastern.edu/its>)

Information Technology Services (ITS) is the centralized technology resource for students, faculty, and staff. ITS provides secure, high-speed internet access through the on-campus networks NUnet and ResNet; wireless internet connectivity through NUwave; centralized computer labs—the InfoCommons and the Digital Media Commons (DMC)—with the latest software; on-site and remote printing; access to the Blackboard learning management system; a vast array of software applications for Windows and Mac; access to myNEU, Northeastern's online portal; on-site and online training on popular software; and high-performance research computing.

ITS Service Desk

Help and Information Desk, Snell Library
617.373.4357 xHELP
help@northeastern.edu

The ITS Service Desk provides phone-based and walk-up technology support services to students, faculty, and staff. The ITS Service Desk staff also offers support for ITS-managed printers and answers general computing questions. Contact the ITS Service Desk for the following services:

- Troubleshooting Northeastern University—provided accounts and applications, including email
- Investigating wired and wireless network connection problems
- Troubleshooting network printer problems
- Assisting students with myNEU and Blackboard questions
- Support with ITS-managed labs
- Access to equipment available for loan, including AV equipment and laptop adapters

The ITS Service Desk is located at the Help and Information Desk on the first floor of Snell Library near the InfoCommons and provides assistance on computer-related issues to students, faculty, and staff with a valid Northeastern ID.

myNEU

Website (<http://myneu.neu.edu>)

myNEU—the online portal for the Northeastern community—is a central resource for students, faculty, and staff. Your myNEU username and password provide access to key university platforms, from the myNEU portal to other university systems, including wireless network access, printing, and email.

The myNEU portal offers services tailored to your role at Northeastern for all academic, personal, and recreational needs. Resources available for students include links to student email, information channels, financial aid, Blackboard, and online course registration. NU Alert, our real-time university emergency notification system, utilizes the contact information provided within myNEU. It is your responsibility to maintain accurate personal and emergency contact information.

ResNet and the ResNet Resource Center

Speare Commons
617.373.HELP (x4357)
resnet@northeastern.edu
Website (<http://www.northeastern.edu/resnet>)

ResNet—a service of Information Technology Services and Housing Services—provides internet access to all students living in Northeastern residence halls. The ResNet Resource Center, located in Speare Commons, provides students with support for the HuskyCable TV service, mobile devices, gaming systems and other devices, student email, computer troubleshooting, and repair services for Apple and Dell computers.

Printing

The Northeastern Printing Program provides a limited amount of free printing each year to students, faculty, and staff. Each September, as an active member of the community, you are given a credit of \$120 on your Husky Card to use at your discretion at any of the ITS-managed printers located across campus. Print credits do not carry over from one academic year to the next.

Print jobs can be directly sent to the appropriate printer queue from any ITS computer labs or from your own computer by using the Virtual Print Client software to remotely print. When you locate a printer associated with the appropriate printing queue, simply swipe your Husky Card, select your print job, and it will print.

Appropriate Use Policy

The information systems of Northeastern University are intended for the use of authorized members of the community in the conduct of their academic and administrative work. The Appropriate Use Policy (AUP) describes the terms and conditions of Northeastern information systems use. For more information, visit the Appropriate Use Policy webpage (<http://www.northeastern.edu/aup>).

Training Services

Snell Library
617.373.5858
training@northeastern.edu

Information Technology Services training provides the following instructor-led and web-based courses to all members of the Northeastern community:

- **Web-based training.** ITS training offers computer training over the internet, including Mac tutorials, MS Office tutorials, some application-specific training provided by the application vendors, and via Lynda.com, which offers 24/7 access to an extraordinary breadth of training modules. Web-based training is an innovative, self-paced learning method that allows students, faculty, and staff to train anytime or anywhere, using a computer with an internet connection.
- **Instructor-led training** includes classes such as Public Speaking for Presentations, Advanced Excel, SharePoint, Adobe Photoshop, and Blackboard. These workshops are available at no charge to the entire university community.

To register for a class, visit the training section of the ITS website.

Academic Technology Services (ATS)

212 Snell Library
ats@northeastern.edu
Website (<http://www.ats.neu.edu>)

For graduate students performing teaching assistant/graduate assistant work, Academic Technology Services (ATS) is a resource for choosing and implementing technological solutions for a wide range of classroom goals. Whether creating online classes or incorporating flipped classroom techniques into on-ground classes, ATS offers consultation and support for implementation. Additionally, ATS manages the Discovery Lab, located on the first floor of Snell Library, which is a space for showcasing ideas and innovations at Northeastern. The Discovery Lab is an area to host both events and exhibitions.

College Expenses

Student Financial Services is available to assist you in developing a plan for financing a Northeastern education. Through a variety of options, including financial aid, Northeastern's Monthly Payment Plan, supplemental loans, and your own resources, a plan can be designed that will make your education costs affordable. To learn more, visit the Student Financial Services website (<https://studentfinance.northeastern.edu>) or call 617.373.3190.

- Financial Aid (p. 19)
- Student/Parent Loans (p. 19)
- Bill Payment (p. 20)
- Tuition, Room, Board, and Fees Per Semester (p. 21)

Financial Aid

For many families, financial aid is a major element in making Northeastern University affordable. Student Financial Services provides a full range of options that help students establish a comprehensive plan to finance their education.

How to Apply

To apply for federal financial aid, freshmen and transfer students must submit the Free Application for Federal Student Aid (FAFSA) (<https://fafsa.gov>). Additionally, for institutional aid consideration, freshmen and transfer students must also complete the CSS Profile (<https://cssprofile.collegeboard.org>) form. Returning students must submit the FAFSA each academic year. Submitting your financial aid application materials by the priority filing deadline date will ensure that you are considered for all available financial aid programs for which you qualify. To view the priority filing deadline dates, please visit the Student Financial Services website (<https://studentfinance.northeastern.edu/applying-for-aid/undergraduate/how-to-apply>).

Satisfactory Academic Progress (SAP)

QUALITATIVE

Student grade-point averages (GPAs) are reviewed annually at the end of spring semester. Freshmen students must have at least a 1.800 GPA by the end of their first academic year and a 2.000 GPA or better thereafter to retain financial aid eligibility. For students completing their sophomore year and beyond, a GPA of 2.000 is required to retain eligibility.

QUANTITATIVE

Students must also meet certain quantitative requirements. Completed credits are reviewed as a percentage of attempted credits after each academic year. Students must earn at least 67 percent of their cumulative attempted credits to maintain satisfactory academic progress.

APPEALS

Students who have lost their eligibility for financial aid due to failure to meet qualitative or quantitative SAP standards have the right to submit a letter of appeal to Student Financial Services. Approval of an appeal will be based on extenuating circumstances that had an impact on the student's ability to achieve the minimum standards of SAP and the assurance that these circumstances will not be present going forward. If approved, appeals require a contractual agreement that must be signed by the student and a financial aid administrator.

Change in Enrollment Status

Students must notify Student Financial Services about any change in planned period of enrollment, whether due to withdrawal from a class, a leave of absence, a change in co-op or in class, an approved reduction in course load, or withdrawal from the university. Changes in enrollment may impact types and amounts of financial aid offered by Northeastern University.

It is highly recommended that whenever possible, students discuss the impact of such changes with their financial aid counselor before making them.

Outside Sources of Aid

Students must notify Student Financial Services of any aid received from outside sources, such as scholarships from outside organizations. A review and possible recalculation of a student's financial aid award will occur.

Return of Title IV Aid

Northeastern is required by federal statute to recalculate federal financial aid eligibility for students who withdraw, drop out, are dismissed, or take a leave of absence prior to completing 60 percent of a term. Recalculation is based on the percentage of earned aid using the Federal Return of Title IV funds formula. Federal regulations require students to obtain at least an A, B, C, D, S, or F in at least one course for the term; students who receive all unsuccessful grades for a term (NE, W, I, U) will be considered unofficially withdrawn from the term. For unofficial withdrawals, the withdrawal date used for aid recalculation is the midpoint of the term.

Verification

If a student is selected for Verification, Student Financial Services may be required to collect additional financial documents, including tax returns and other financial documents, to verify the information provided on the FAFSA. Aid cannot be determined until this process is completed.

Change in Circumstances

If the student believes that the aid process does not accurately reflect their financial situation, or if family circumstances change during the year, the student should notify their financial aid counselor for further evaluation. For additional information, please refer to the Student Financial Services website (<https://studentfinance.northeastern.edu/policies-procedures/changes-in-financial-circumstances>).

Northeastern's Monthly Payment Plan

Northeastern University offers a monthly payment plan, administered through Tuition Management Systems (TMS), which allows students and families to divide their educational costs into smaller, more manageable installments. For additional information, visit the financing options webpage (<https://studentfinance.northeastern.edu/billing-payments/financing-options>).

Student/Parent Loans

There are a number of educational loan programs available to assist students and families in covering expenses over and above any financial aid that may be awarded from Student Financial Services. Most private lenders have credit and income requirements that students and/or parents must meet before being approved for these programs. Additional information regarding private student and parent

loan options is available on the Student Financial Services website (<https://studentfinance.northeastern.edu/billing-payments/financing-options>). When researching the loan and lender that best meet your needs, make sure you take into consideration the interest rate, origination, disbursement, repayment fees, and the quality of customer service.

Bill Payment

Full payment of tuition, residence hall fees, and other related charges are due prior to the start of the term as specified on the original bill. A past-due balance may result in late fees, prevention of registration, prevention of grade release, prevention of participation in international study programs, or withdrawal from the university.

Tuition bills are only generated electronically and are available via the myNortheastern portal (<https://my.northeastern.edu>). Paper bills are not generated. For additional information regarding the E-bill, please visit the billing frequently asked questions webpage (<https://studentfinance.northeastern.edu/billing-payments/billing-faq>). For details on available payment methods, visit the payment methods webpage (<https://studentfinance.northeastern.edu/billing-payments/payment-methods>).

Payment of Tuition

Accepted methods of payment are:

- Checks and E-checks can be made on the web via NUPAY on myNortheastern (<http://myneu.neu.edu/cp/home/loginf>). Check or money order, payable to Northeastern University.
- Through the monthly payment plan, administered through Tuition Management Systems. For additional information, visit the Student Financial Services website (<https://studentfinance.northeastern.edu/billing-payments/financing-options>).
- Supplemental student and parent loans. Review options on the Student Financial Services website (<https://studentfinance.northeastern.edu/billing-payments/financing-options>).
- Additional payment options and payment details are available online (<https://studentfinance.northeastern.edu/billing-payments/payment-methods>).
- International payments using Flywire. Northeastern University has partnered with Flywire to streamline the international wire payment process to the university. This service provides students and their families a safe, cost-effective, and convenient method of making payments to Northeastern University in foreign currencies. Review how to initiate payment at the Student Financial Services website (<https://studentfinance.northeastern.edu/billing-payments/payment-methods>).

Student Financial Responsibility Agreement

As compelled by Federal Law, all students who enroll in classes at Northeastern University are required to complete and accept the Student Financial Responsibility Agreement (SFRA). This agreement must be completed once per academic year, and is located on the student's myNortheastern portal. Failure to complete the SFRA will result in a hold which prevents registration.

Discrepancies in Your Bill

Discrepancies in a bill should be addressed in writing by the student to the Office of Student Accounts at studentaccounts@northeastern.edu. Include the student's name, NU ID,

dollar amount in question, date of invoice, and any other information believed to be relevant.

If there is a billing problem, pay the undisputed portion of the bill to avoid responsibility for any late fees.

Overloads/Reduced Loads

Undergraduate day tuition is charged on a flat per-term basis that includes the cost of each student's normal academic curriculum requirements for that term.

Adjustments for reduced loads are made only when the Undergraduate Petition to Reduce Load is approved by the academic department and the Office of the University Registrar, usually only in the final term. International students who wish to drop below 12 credits during the semester must obtain authorization from the Office of Global Services (OGS) (<http://www.northeastern.edu/ogs>). These students may be approved for a reduced course load of fewer than 12 credits but no fewer than 6 credits in accordance with federal regulations. Tuition adjustments will then be made if the course load falls below 12 credits during full semesters and 6 credits during summer half sessions (calculated at the per-credit-hour rate). To receive an adjustment, the Undergraduate Petition to Reduce Load must be submitted prior to the start of the term. No rebate or credit is granted when a student voluntarily drops a course.

Financial adjustments for course work greater than the prescribed curriculum for the term is calculated at the per-credit hour rate for undergraduate full-time students. Students taking more than 8 credits (summer half session) or 16 credits (full semester) will be charged at the per-credit hour rate.

Undergraduate full-time day students registered for co-op and taking a class will be billed at the per-credit-hour rate for the course. The flat undergraduate tuition rate will be charged for students on co-op enrolled in 12 credits or more.

Visit the tuition and fees webpage (<https://studentfinance.northeastern.edu/billing-payments/tuition-and-fees>) for a full listing of tuition rates. Also see "Overload Policy (p. 27)" and "Reduced Load Policies (p. 27)."

Delinquent Balances

In cases of student default on tuition payments, the student may be withdrawn from the university and is liable for the outstanding tuition, as well as for all reasonable collection costs and any legal fees incurred by the university during the collection process. Accounts may be subject to monthly interest charges. *Transcripts and other academic records will not be released until all financial obligations to the university have been met.*

Refunds on Credit Balances

To submit a request for a refund on a credit balance because of an overpayment, a Student Refund Request must be submitted. This form can be completed through the student's myNortheastern portal (<https://my.northeastern.edu>), under "Services & Links."

Visit the financial aid policies webpage (<https://studentfinance.northeastern.edu/policies-procedures>) for additional information regarding Student Refund Requests.

Refunds for Withdrawal from the University—General Information

Tuition refunds are granted based on the date of the official withdrawal processed by the Office of the University Registrar. Nonattendance does not constitute official withdrawal. Credit policies vary according to the

duration of the course. Typical tuition adjustments are made according to the schedules shown below.

The first week of class is the week containing the “Classes Begin” date listed in the online academic calendar (<https://registrar.northeastern.edu/group/calendar>).

Payment options and credit policies may vary for courses that follow a schedule different from the regular full or half-semester courses. If you are unsure about a course you are taking, contact the Office of Student Accounts.

Transcripts and other academic records will not be released until all financial obligations to the university have been met. All rates are subject to revision at the discretion of Northeastern University’s Board of Trustees.

For information regarding policies that affect eligibility for federal grants and loans upon your withdrawal or adjustment to course enrollment, visit the Student Financial Services website (<https://studentfinance.northeastern.edu>). Note that withdrawal policies vary for international study programs. For more information on study-abroad-related withdrawal policies, refer to the Global Experience Office (<http://www.northeastern.edu/geo/studyabroad>).

Refunds for Course Withdrawals

Undergraduate day students should refer to the “Overload Policy (p. 27)” and “Reduced Load Policies (p. 27)” for information on adjustments for withdrawing from individual course(s). For withdrawals from a course after the third week of a full semester, contact studentaccounts@northeastern.edu.

Refunds for Complete Withdrawal from the University

FULL SEMESTERS

Official withdrawal during the first week	100% refund
---	-------------

Official withdrawal during the second week	100% refund
--	-------------

Official withdrawal during the third week	100% refund
---	-------------

Official withdrawal during the fourth week	60% refund
--	------------

Official withdrawal during the fifth week	40% refund
---	------------

Official withdrawal after the fifth week	no refund
--	-----------

SUMMER HALF SEMESTERS

Official withdrawal during the first week	100% refund
---	-------------

Official withdrawal during the second week	100% refund
--	-------------

Official withdrawal during the third week	50% refund
---	------------

Official withdrawal during the fourth week	25% refund
--	------------

Official withdrawal after the fourth week	no refund
---	-----------

Disability Resource Center Adjustments

Students who are registered with Northeastern University’s Disability Resource Center (<http://www.northeastern.edu/drc>) are eligible to petition to the center for tuition adjustments directly related to their

documented disability. Students who drop below 12 credit hours may be affected by the loss of full-time-student status. Further information is available from the Disability Resource Center.

Tuition, Room, Board, and Fees Per Semester

Annual costs for upperclass students participating in co-op vary depending on their pattern of attendance. See “Patterns of Attendance” section below. The number of semesters a transfer student spends in school depends on the curriculum of the student’s college. You are advised to verify your curriculum with your academic advisor so that you may plan accordingly.

Total Costs

The total costs for students living in our residence halls and enrolled in the 15-meal plan are as follows:

TUITION AND FEES

	Per Full Semester	Per Summer Half Semester
Tuition	\$25,225	\$12,613
Student center fee	\$75	\$38
Student activities fee	\$136 (per year)	
Campus recreation fee	\$56	\$33
Undergraduate student fee	\$310	\$155

ROOM, BOARD, AND FEES PER SEMESTER

	Per Full Semester	Per Summer Half Semester
Residence activity fee	\$32	\$16
Housing	range from \$4,470–\$5,720 ¹	approximately 1/2 of semester rate ¹
15-meal plan ²	\$3,665	\$1,833

¹ Rates vary depending on occupancy and assignment. Visit the housing website (<http://www.northeastern.edu/housing>) for a detailed list of housing rates.

² See “Dining Services (p. 23)” for additional meal plan options.

Undergraduate day students who take a graduate course as part of their undergraduate program will be charged the same rates that apply to undergraduate credits. (See “Overload Policy (p. 27)” and “Reduced Load Policies (p. 27).”)

In addition to the expenses itemized above, families should plan on the normal costs of living that students incur for transportation, books, and personal expenses. While these expenses may vary, for the purpose of approximating a student budget, the university estimates these items at \$2,800 per year.

Tuition rates, room and board charges, and fees are subject to revision by the Northeastern University Board of Trustees at any time.

Patterns of Attendance

To better plan for tuition and fees, students and parents should be aware that:

1. Tuition is charged when a student is taking classes/earning academic credit. Tuition is not charged for co-op; however, the student will pay room and board if he or she stays in a university residence hall while on co-op and will be assessed tuition if enrolled in a class.

- Financial aid will be distributed to match the student's academic program and tuition bills.

Northeastern University's calendar enables students to participate in six-month co-op assignments. Each academic year has two full semesters (fall semester, September–December, and spring semester, January–April) and two half semesters of about seven weeks each (summer 1, May–June, and summer 2, July–August). The six-month co-op assignments generally span either the spring plus summer 1 terms or the summer 2 plus fall terms.

The co-op schedule is flexible, but generally, students alternate periods in class with periods on co-op. All students are required to complete their program in the classroom, rather than on a co-op assignment, so their last semester will be in the classroom. For specific patterns of attendance for particular majors, consult the program plan for that major.

Fees Required of All Students

The following fees are required of all students:

APPLICATION FEE

A nonrefundable fee of \$75 must accompany an application for admission.

ENROLLMENT DEPOSITS

A nonrefundable enrollment deposit, which is applicable toward the first semester's bill, is due by January 15, 2018, from students accepted for Early Decision I, by February 20, 2018, for students accepted for Early Decision II, and by May 1, 2018, from all other accepted freshman students entering in September 2018. A \$350 international student fee is included in the enrollment deposit for international students. This fee supports programs and services provided by the Office of Global Services (OGS) (<https://www.northeastern.edu/ogs>) on campus. Housing is required for all first- and second-year students. Students entering at other times of the year, and transfer students entering in September, should note the required deposit due date on their letter of admission.

UNDERGRADUATE STUDENT FEE

The mandatory undergraduate student fee supports enrollment-related services throughout the student's first year, including new student orientation and welcome week activities. Beyond the first year, the fee supports enrollment services and costs related to ongoing communication to students and parents. The \$310 undergraduate student fee is assessed each in-class or study-abroad term for undergraduate students. During summer half semesters, the fee is prorated.

STUDENT FEES

Students pay a student center fee of \$70 per in-school full semester or \$35 per in-school summer half semester. This fee supports the Curry Student Center. An annual student activities fee of \$136 is charged to support student clubs.

CAMPUS RECREATION FEE

All undergraduate students at Northeastern University will be assessed a campus recreation fee of \$56 per in-school full semester or \$33 per in-school summer half semester. This fee covers admission to home athletic events, use of the Marino Fitness Center, the SquashBusters athletic facility, and the Cabot Gym (fitness and pool). This fee will also support the future construction of athletic fields and facilities.

HUSKY CARD (PHOTO-IDENTIFICATION CARD)

This card is issued to new students at orientation and registration. Students must have a valid Husky Card to use at most university facilities. A replacement card costs \$25.

NORTHEASTERN UNIVERSITY STUDENT HEALTH PLAN (NUSHP)

Since September 1989, Massachusetts law (Massachusetts General Laws, Chapter 15A, Section 18) has required every full-time and part-time student enrolled in a Massachusetts institution of higher learning to participate in a student health insurance program (SHIP) or in a health benefit plan with comparable coverage. Students who have comparable health plan coverage may waive NUSHP by completing a waiver on their myNortheastern portal (<https://my.northeastern.edu>) by the designated deadline date each academic year. For deadlines and additional information, visit the NUSHP website (<http://www.northeastern.edu/nushp>).

Additional Fees

Other fees may include the following:

HOUSING APPLICATION/DEPOSIT

New students must submit a nonrefundable \$600 enrollment deposit along with a completed housing application form to complete the housing application process. Housing is required for all first- and second-year students entering as freshmen. The upperclass housing deposit is \$200 for each full semester and for each summer half semester.

RESIDENCE HALL ACTIVITIES FEE

All students living in the residence hall system pay a full-semester \$32 fee or half-semester \$16 fee for activities sponsored by the Residence Student Association.

LATE FEES

Late fees can be placed on accounts any time after the due date, if the account remains fully or partially unpaid. The university typically waits, however, until after the conclusion of the add/drop period, for the specified semester, prior to assessment of late fees. These fees are based on the amount past due at the time of assessment and can range from \$75 to \$200. Late fees are assessed once per semester.

If a student or payer wishes to dispute a late fee assessment, he or she must do so, in writing, to studentaccounts@northeastern.edu. Please be sure to include the student's name, NU ID, and reason for the dispute in the email.

INTERNATIONAL STUDENT FEE

A onetime fee of \$350 is charged to new undergraduate international students. The fee supports programs and services available at the OGS.

Room and Board

ROOM RATES PER SEMESTER

Visit the Housing and Residential Life website (<https://www.northeastern.edu/housing>) for a complete display of room rates and residence halls.

TERMINATION CHARGE AND ROOM RATE ADJUSTMENTS

The university provides on-campus and leased accommodations that are assigned each term. Students are billed at the beginning of each term and are obligated to pay the full charge for the term. The high demand for on-campus housing makes it necessary for Housing and Residential Life to enforce its cancellation policy strictly. It is imperative to note that a student whose Residence Hall and Dining License Agreement is revoked for disciplinary reasons is subject to the same financial assessments as outlined below.

Students who are suspended or expelled from the university will have their current and any active housing application(s) canceled effective the date of suspension. When suspension or expulsion is sanctioned, the student will be charged according to the "Termination Credit Policy for Official Withdrawal from the University" below. All housing deposits on file will be forfeited. Upon readmittance to the university, the student

must reapply for housing and if capacity has been reached, the student will be placed on the housing waitlist.

Students who withdraw from the university will have their meal plan charges prorated to the end of the week they complete the University Withdrawal form in the Office of the Registrar. Students must also complete the official housing withdrawal form and check out properly with their residence director. Housing charges for students who withdraw from the university will be prorated only through the end of the fifth week of full semesters and through the end of the fourth week of summer half semesters.

Termination Credit Policy for Official Withdrawal from the University Fall and Spring Semesters

Official Withdrawal from University	Room Charge Credited
Week 1	100 percent ¹
Week 2	90 percent ¹
Week 3	80 percent ¹
Week 4	60 percent ¹
Week 5	40 percent ¹
After week 5 ²	0 percent ²

¹ This credit can also be based on the daily charges of time used.

² Students withdrawing after week 5 incur a 100 percent room charge for the term.

Summer Half Semesters

Official Withdrawal from University	Room Charge Credited
Week 1	100 percent ¹
Week 2	75 percent ¹
Week 3	50 percent ¹
Week 4	25 percent ¹
After week 4 ²	0 percent ²

¹ This credit can also be based on the daily charges of time used.

² Students withdrawing after week 4 incur a 100 percent room charge for the term.

Termination Charge Policy for Cancellation from the Residence Halls for Matriculating Students

Failure to provide timely, written notification of cancellation of housing will result in a charge to students for their assigned space. For example, if you are assigned to a room for the fall semester with a rate of \$5,350 and you cancel your housing on June 20, 2017, you will be assessed 50 percent of your room rate, which is \$2,675—not 50 percent of your deposit for the fall term.

If you cancel your housing prior to receiving an assignment, you will be assessed a cancellation fee according to the cancellation schedule at the rate of a standard double room for freshmen or a standard double in an apartment for upperclass and graduate students. If the cancellation deadline has passed, students who can demonstrate a significant change in academic, co-op, or financial circumstances may petition for a waiver of this charge. See the following cancellation charge schedule:

Amount Charged	For Fall Semester	For Spring Semester	For Summer 1	For Summer 2
Deposit refunded; no charge	Before 5/15/17	Before 10/1/17	Before 3/1/18	Before 4/15/18

25 percent of term room charge ¹	After 5/15/17	After 10/1/17	After 3/1/18	After 4/15/18
50 percent of term room charge ¹	After 6/15/17	After 10/15/17	After 3/15/18	After 4/30/18
75 percent of term room charge ¹	After 7/15/17	After 11/1/17	After 4/1/18	After 5/15/18
100 percent of term room charge ¹	After 8/1/17	After 12/1/17	After 4/15/18	After 5/31/18

¹ The student's deposit for the term is applied to the cancellation charge assessed.

DINING SERVICES

All students living in university residence halls that require students to have a meal plan are required to participate in the 19-, 15-, or 10-meal plan operated by University Dining Services.

All freshmen (during their first two semesters as matriculated college students) living in university residence halls are required to have a traditional meal plan. They are required to have at least a 10-meal plan except for those living in university apartments with kitchen facilities. Freshmen living in university apartments with kitchen facilities are required to have at least a 5-meal plan.

Students living in a meal-plan-required residence hall are automatically billed for the 15-meal plan but can increase to a 19-meal plan or decrease to a 10-meal plan. All other students may choose to enroll in a meal plan via the "Services & Links" section on the (<http://www.mynneu.neu.edu>)myNortheastern portal (<https://my.northeastern.edu>).

Changes to the meal plan are made via the "Services & Links" section on the myNortheastern portal (<https://my.northeastern.edu>). Deadlines apply. Visit the Husky Card website (<http://www.northeastern.edu/huskycard>) for details.

For information about menus and dining locations, visit the dining website (<http://www.nudining.com>).

The traditional meal plan rates for 2017–2018 are shown below. For updated meal plan rates, visit the tuition and fees webpage (<https://studentfinance.northeastern.edu/billing-payments/tuition-and-fees>).

Meals per Week	Full Semester	Summer Half Semester
19	\$3,970	\$1,985
15	\$3,665	\$1,833
10	\$3,175	\$1,588
5	\$1,630	\$815

PROFILER MEAL PLANS

The nonrefundable profiler meal plan is a block of meals that are provided in lump sum and can be used at the student's discretion. Profiler options are available to all students. However, these plans cannot take the place of a required, traditional meal plan.

Profiler meal plans end in August at the end of summer 2 semester. Students are advised to pay close attention to the end dates, as unused meals do not roll over and will not be refunded. Profiler meal plans for 2017–2018 are valid from August 27, 2017, through August 25, 2018, and may be used at:

- Levine Marketplace
- Stetson West
- International Village
- Outtakes
- Rebecca's Café in Churchill Hall
- West End in Curry Student Center

Note: Dining locations are limited during the summer.

The profiler rates for 2017–2018 are shown below. For updated rates, visit the tuition and fees webpage (<https://studentfinance.northeastern.edu/billing-payments/tuition-and-fees>).

Meals	Cost
25	\$445
50	\$870
86	\$1,465
110	\$1,845

Profiler plans are nonrefundable and cannot be modified.

Husky Dollars

Students can deposit funds into a Husky Dollar account and access these funds using their Husky Card at many restaurants and retail locations on and off campus, including the university's bookstore.

Note that the account accrues no interest and cannot be used for cash withdrawals. Visit the Husky Card website (<http://www.northeastern.edu/huskycard>) for additional information, including vendor locations and instructions on how to add funds to your account.

Academic Policies and Procedures

This section presents general information about what is expected of students and how progress toward graduation is measured. The university assumes no liability for any delay in providing or failing to provide educational or related services or facilities due to causes beyond the reasonable control of the university. Causes include, but are not limited to, power failure, fire, strikes by university employees or others, weather damage, and acts of public authorities. However, when in its judgment it is appropriate to do so, the university will exert reasonable efforts to provide comparable or substantially equivalent services, facilities, or performance; but its inability or failure to do so shall not subject it to liability. No faculty member, administrator, or other representative of the university shall make any representations to, or enter into any agreements with, or act toward any student or other person in any manner that is not in conformity with established university policies, practices, and procedures as expressed in this or any other official university document.

Academic Integrity Policy

The following academic integrity policy was designed and approved by the Student Government Association and was also approved by the Faculty Senate.

Visit the Office of Student Conduct and Conflict Resolution (<http://www.northeastern.edu/osccr/academic-integrity-policy>) website for a full description of these policies and procedures.

Honor Code

The following honor code was designed and approved by the Student Government Association:

On my honor, I pledge to uphold the values of honesty, integrity, and respect that are expected of me as a Northeastern student.

Code of Student Conduct

The Code of Student Conduct (<http://www.northeastern.edu/osccr/code-of-student-conduct>) is available online.

Accommodations for Students with Disabilities

Northeastern University and the Disability Resource Center (DRC) are committed to providing disability services that enable students who qualify under Section 504 of the Rehabilitation Act and the Americans with Disabilities Act Amendments Act (ADAAA) to participate fully in the activities of the university. To receive accommodations through the DRC, students must provide appropriate documentation that demonstrates a current substantially limiting disability. Accommodations are provided based on an evaluation of the information provided by students and their clinicians, on a case-by-case basis. These services are available for, but not limited to, students with the following diagnoses:

- Learning disabilities and/or AD(H)D
- Autism spectrum disorders
- Chronic or degenerative disorders
- Hearing loss
- Mobility impairments
- Psychiatric disorders

- Traumatic or acquired brain injury
- Vision impairments

Students should provide documentation to the DRC at their earliest convenience to allow for sufficient time for review. After the documentation has been reviewed, a disability specialist will contact the student regarding appropriate next steps. Visit the DRC website at: <http://www.northeastern.edu/drc/> for additional information or contact staff at 617.373.2675.

Attendance Requirements

The university expects students to meet attendance requirements in all courses to qualify for credit. Attendance requirements vary; it is the student's responsibility to ascertain what each instructor requires. Failure to meet attendance requirements may force a student to drop the applicable courses. Classes for day students are normally scheduled from 8:00 a.m. to 5:40 p.m., Monday through Friday. Students should not make conflicting commitments until the class schedules for each semester are final. Permission to make up work may be granted by instructors for reasonable cause. Requests must be made immediately upon a student's return to class. Laboratory work can be made up only during the hours of regularly scheduled instruction.

Absence Because of University-Sponsored Activities

Participation in university-sponsored activities, where the students are representing their university, college, or department, may cause absences from class that qualify as excused absences. Excused absences, with appropriate prior arrangement, are not subject to penalty, and missed work may be satisfied through agreement between the student and the instructor. University-sponsored activities that may justify excused absences include athletic competition, performing arts events, and research or other presentations.

Students must discuss absence(s) with instructors at least two weeks in advance of the university-sponsored activity, or as soon as possible if the activity is at the beginning of the term or is the result of an unforeseen circumstance. Instructors may require a written statement from the administrator in charge of the activity. Instructors are expected to make reasonable accommodations for these class absences including administration of makeup assignments and exams whenever possible. It is expected that students seeking an excused absence will develop a plan and timetable to make up the missed course work with their instructor(s). Note, however, that the requirements of some courses or programs may preclude such accommodations.

Absence Because of Religious Beliefs

Any student who is unable, because of his or her religious beliefs, to attend classes or to participate in any examination, study, or work requirement should be provided with an opportunity to make up such examination, study, or work requirement that he or she may have missed because of such absence on any particular day, provided that such makeup examination or work does not create an unreasonable burden upon the university. Students should make appropriate arrangements with the instructor in advance of the absence, preferably at least two weeks before the religious observance.

Absence Because of Jury Duty

Members of the university community are expected to fulfill their obligations to serve on a jury if called upon. A student selected for jury duty should inform his or her instructors. They will provide a reasonable substitute or compensatory opportunities for any required work missed. A student with such an absence will not be penalized in any way.

Absence Because of Military Deployment

See “Leave of Absence Due to Military Deployment (p.).”

Other Absences

Unforeseen events or circumstances, including illness, accident, catastrophic event such as fire, and bereavement, may cause a student to be absent from class. If such events occur, students should notify their academic advisor and instructors as soon as possible to apprise them of the circumstances leading to their absence, as well as how much time will be missed. Students should work with their instructors to develop a plan, with a timetable, to make up missed course work. Students may be asked to provide documentation that the class absence is warranted. Faculty and students should note that the University Health and Counseling Service does not provide sick notes or medical excuses except for long-term illness. One approach to documentation of short-term illness is that students themselves draft and sign absence notes to be provided to their instructors upon their return to class, with integrity in this process an expectation of the Northeastern Academic Integrity Policy. Instructors are expected to make reasonable accommodations for warranted class absences, including administration of makeup assignments and exams, whenever possible.

Extended Absences

A student who is absent from school for an extended period of time must inform his or her academic advisor by letter, email, or telephone. The expected length of the absence may determine whether the student should apply for a medical or emergency leave of absence (p.). It is strongly recommended that the student contact his or her academic advisor to discuss potential next steps, which could include incomplete grades; withdrawal from classes; or, in the event of an extended absence due to a chronic medical condition or disability, consultation with the Disability Resource Center to explore potential accommodation.

Student Evaluation of Courses (TRACE)

Students play a critical role in the university’s commitment to quality teaching and academic excellence when they participate in the evaluation of courses through TRACE (Teacher Rating And Course Evaluation), a survey developed collaboratively by the Student Government Association and the Faculty Senate. TRACE data are important in the process of course design and improvement, as well as in the process of faculty evaluation. Students are expected to participate in TRACE with constructive feedback that is relevant to teaching and course content. TRACE results from previous terms can be found on the myNortheastern web portal (<http://www.myneu.neu.edu>).

Registration and Taking Courses

Students are expected to register for classes during the published registration times in the academic calendar. Freshmen may be preregistered for some or all of the courses they need. Most registration after the freshman year is accomplished through the myNortheastern web portal (<http://www.myneu.neu.edu>). Students must complete “I Am

Here” registration just prior to the start of classes to remain enrolled. Class adds must be registered by the end of the seventh class day.

Course Numbering System

Every semester course number at Northeastern University consists of two parts:

- A two- or four-letter subject code
- A four-digit number

For example, in the course number Principles of Macroeconomics (ECON 1115), ECON is the subject code, and 1115 is the four-digit number.

The four-digit number indicates the level of the course as indicated below.

UNDERGRADUATE	
0001–0999	Orientation and basic No degree credit
1000–1999	Introductory level (first year) Survey, foundation, and introductory courses, normally with no prerequisites and designed primarily for students with no prior background
2000–2999	Intermediate level (sophomore/ junior year) Normally designed for sophomores and above, but in some cases open to freshman majors in the department
3000–3999	Upper intermediate level (junior year) Designed primarily as courses for juniors; prerequisites are normally required, and these courses are prerequisites for advanced courses
4000–4999	Advanced level (senior year) Designed primarily for juniors and seniors; also includes specialized courses such as research, capstone, and thesis

GRADUATE	
0001–0999	Orientation and basic No degree credit
5000–5999	First-level graduate Courses primarily for graduate students and qualified undergraduate students with permission
6000–6999	Second-level graduate Generally for master’s and clinical doctorate only
7000–7999	Third-level graduate Master’s- and doctoral-level courses; includes master’s thesis
8000–8999	Clinical/research/readings

	Includes comprehensive exam preparation
9000–9999	Doctoral research and dissertation

Class Schedule

All classes start promptly according to the class schedule shown. Most classes at Northeastern are scheduled in the time periods listed.

Students are expected to be punctual. Students who are late for classes should attend for the balance of the class period. Instructors will not tolerate habitual tardiness.

Students may leave 15 minutes past the scheduled opening of class if the instructor is not present. In such cases, students should notify the department in which the course is offered that the instructor was not present.

Any change of regularly scheduled classes or examinations must have the unanimous consent of the students involved unless other mutually acceptable arrangements for students to attend the alternative class or examination are worked out between the faculty member and the student(s) involved. Final Exams must be held during the final exam time period and may not be negotiated in accordance with the official policy..

During the terms when they are teaching, faculty members are expected to provide sufficient conference time to meet the instructional and advising needs of their students.

Fall and Spring Schedule

Sequence 1	MWTh	8:00–9:05
Sequence 2	MWTh	9:15–10:20
Sequence 3	MWTh	10:30–11:35
Sequence 4	MWTh	1:35–2:40
Sequence 5	MWTh	4:35–5:40
Sequence 6	TuThF	11:45–12:50
Sequence 7	TuWF	3:25–4:30
Sequence A	MTh	11:45–1:25
Sequence B	MW	2:50–4:30
Sequence C	TuF	8:00–9:40
Sequence D	TuF	9:50–11:30
Sequence E	WF	11:45–1:25
Sequence F	TuF	1:35–3:15
Sequence G	TuF	3:25–5:05
Sequence H	Tu	11:45–1:25
	and Th	2:50–4:30
Sequence L	MWTh	8:00–11:35
Sequence M	MWTh	11:45–2:40
Sequence N	MWTh	2:50–5:40
Sequence P	MWTh	8:00–10:20
Sequence Q	MWTh	10:30–1:25
Sequence R	MWTh	1:35–5:40
Sequence S	MWTh	1:35–4:30
Sequence T	TuF	8:00–11:30
Sequence U	TuF	11:45–3:15
Sequence V	TuF	3:25–5:25
Sequence W	TuF	1:35–5:05

Summer Schedule

Sequence 1	MTuWTh	8:00–9:40
Sequence 2	MTuWTh	9:50–11:30
Sequence 3	MTuWTh	1:30–3:10
Sequence 4	MTuWTh	3:20–5:00
Sequence 5	MTuWTh	11:40–1:20
Sequence A	MW	8:00–11:30
Sequence B	MW	1:30–5:00
Sequence C	TuTh	8:00–11:30
Sequence D	TuTh	1:30–5:00

Course Syllabus

Faculty members are expected to distribute a syllabus at the start of each course. The syllabus should also be placed on the course Blackboard site. The syllabus should include a schedule of topics, exam and assignment due dates, information on how to contact the faculty member, process for conference time, grading and attendance policies, and a reminder of the university's academic integrity policy.

Course Prerequisites

Students are expected to meet prerequisites as listed in the course description of each course in which they enroll. Grades of F, U, I, or W in prerequisite courses do not normally fulfill requirements. Exceptions must be authorized by the instructor teaching the course.

Overload Policy

An overload occurs when a student is enrolled in more courses than prescribed by the program's curriculum. To register for an overload, students are advised to consult their academic advisor. Students who enroll in overload courses will be billed at the per-credit-hour rate, 1/16th of the full-semester tuition for that semester per semester hour. Undergraduate full-time day students may register for an additional music ensemble course from the list of courses without added charge as long as they are registered for a full course load.

Reduced Load Policies

Undergraduate full-time student adjustments for reduced loads are made only when the Undergraduate Petition to Reduce Load is approved by the academic advisor and by the Office of the Registrar. Adjustments will then be made if the course load falls below 12 semester hours during full semesters and 6 semester hours during summer half semesters (calculated at the per-credit-hour rate). To receive an adjustment, the Undergraduate Petition to Reduce Load must be submitted prior to the start of the term.

No rebate or credit is granted when a student voluntarily drops a course. A reduced load may impact the student's housing, financial aid, visa status, and health insurance. Students should consult applicable departments before committing to a reduced load. Students who take a reduced load will be billed at the per-credit-hour rate, 1/16th of the full-semester tuition for that semester per semester hour.

International students must speak with an advisor at the Office of Global Services (OGS) (<http://www.northeastern.edu/ogs>) prior to dropping a course. Permission to drop below full-time status is restricted according to federal regulations.

Audit Policy

Full-time Northeastern students (16 credits at the undergraduate level and 8 credits at the graduate level, before the audit registration) may audit one class per term as an overload with no additional charge. Students are permitted to register from the end of the course-add

period to the end of the third week of classes. Registration is based on the availability of a seat in the class. Students must obtain advisor approval and meet the prerequisites and any other required approvals for the class. Instructor permission as well as approval by the associate dean of the college offering the course is required. The course work required is at the discretion of the instructor. Once a student opts to audit a course, the audit status of the course cannot be changed. First-year students may not audit classes. A signed Petition to Audit (<http://www.northeastern.edu/registrar/form-petition-to-audit.pdf>) must be presented to the Office of the Registrar during the designated audit-add period. Excluded courses are co-op, labs, language courses, any off-campus course, any online course, and any course required for the major or degree. Audits carry no academic credit.

Taking a Course while on Co-op or on Summer Vacation

Students who wish to take a course while on co-op or on summer vacation must complete an appropriate form in their college academic student services office before the term begins. Students on co-op should complete the petition registration form, and students on summer vacation should complete the summer-only petition registration form. Students who do not file the appropriate form will be dropped from their preregistered courses. Students who take a course while on co-op will be billed the overload tuition rate. Students who take a course while on summer vacation will be billed at the underload tuition rate. (See "Overload Policy" and "Reduced Load Policies" above.)

Transfer Credits for Current Students

Once they matriculate, students are expected to complete all course work for their degree at Northeastern; or an entity in a formal contractual, consorial, or partnership relationship with Northeastern; or at an approved study-abroad program. In some cases, in order to clear a deficiency, to permit students access to courses deemed by their respective advisors and colleges to be important for their education but unavailable to them at Northeastern, or to remain on track for graduation, a student may petition their college for permission to take a course at another accredited institution.

With the approval of the college academic advisor and the graduate school offering the courses, students may take courses in Northeastern's graduate schools.

Students who wish to take courses at another institution and transfer the credit to Northeastern must obtain *prior* approval from the college academic advisor. The Office of the Registrar validates accredited institutions to ensure credit transferability. The student must earn a C (2.000) or better for a course to be considered for transfer. Students are responsible for providing documentation on the institution's accreditation, course grading, and course descriptions prior to approval.

Special Students

Students who are not enrolled at Northeastern University may petition the college academic advising office to take courses on a semester-by-semester basis. Approval is based on the student's academic qualifications and on the availability of class space. The maximum cumulative credit hours for which a special student may register is 20 (not including related labs). Tuition is billed at the undergraduate per-credit-hour rate. If the college academic advising office approves the course enrollment, the student pays the bill and then returns the completed forms to the Office of the Registrar.

Dropping Courses

Not attending class does not constitute withdrawal. Students receiving a grade of W or NE in any course are responsible for the costs associated

with that course. Students must drop courses using processes described below:

IN FALL AND SPRING SEMESTERS

- Through the third week of the semester, students may withdraw without any grade being posted to the transcript. Courses may be dropped via the myNortheastern web portal (<http://www.myneu.neu.edu>).
- Between the fourth week and the last day of classes, course withdrawals are indicated by a W on the student's record. Courses may be dropped via the myNortheastern web portal (<http://www.myneu.neu.edu>). No financial adjustment is made for courses receiving a W grade.
- After the last day of classes, no withdrawals are accepted for any reason. A letter grade for the course will be posted on the transcript.
- Dropping below full-time enrollment (12 semester hours for fall and spring semesters) may affect financial aid, health insurance eligibility, and the maintenance of proper nonimmigrant visa status.

IN SUMMER HALF SEMESTERS

- Through the second week of the half semester, students may withdraw without any grade being posted to the transcript. Courses may be dropped via the myNortheastern web portal (<http://www.myneu.neu.edu>).
- Between the third week and the last day of classes, course withdrawals are indicated by a W on the student's record. Courses may be dropped via the myNortheastern web portal (<http://www.myneu.neu.edu>). No financial adjustment is made for courses receiving a W grade.
- After the last day of classes, no withdrawals are accepted for any reason. A letter grade for the course will be posted on the transcript.
- Dropping below full-time enrollment (8 semester hours for summer half semesters) may affect financial aid.

Late Admission to a Course

Students may petition to register for a course after the normal "class add" period, seven class days. Permission may be granted if seats are available and at the discretion of the instructor. If students are not already registered for a full course load, late admissions may jeopardize full-time status.

The Late Course Registration form (<http://www.northeastern.edu/registrar/form-late-reg.pdf>) is available online.

Final Examinations and Related Policies on Other Exams and Final Term Papers/Projects

- Final examinations are normally two hours in length and must be held when and where scheduled. Final exams are held during a designated final exam period at the end of the semester. An examination schedule is posted at the beginning of each semester at the final-exam schedule webpage (<http://www.northeastern.edu/registrar/finexsched.html>).
- Students are responsible for knowing the time and location of their examinations. Final exam schedules are available to students online via the myNortheastern web portal (<http://www.myneu.neu.edu>) under "My Schedule" in the "Self-Service" tab approximately the fourth week of the term.
- Students who have two examinations scheduled at the same time or three exams on the same day may complete and submit the Final Exam Conflict form (<http://www.northeastern.edu/registrar/form-finex-conflict.pdf>) by the posted deadline.

- Instructors may not give more than 30 total minutes of examinations during the eight calendar days prior to the start of the final exam period.
- Students who have concerns about exams scheduled during the eight calendar days prior to the start of the final exam period, rescheduling of final examinations, or conduct during an examination should report their concerns to their college academic student services office.
- All final examinations, term papers, or projects must be returned to the student or be retained by the department for a period of one year.

Course Credit Guidelines

Course credit hours (semester hours) are assigned to a course based on the established national educational standard that one credit hour is equal to approximately three hours of student learning time per week over a period of a semester. The Office of the Registrar, 271 Huntington Avenue, maintains the official record for all courses. In the event of error in any publication, the academic record will reflect the correct semester hours applicable to any degree requirement.

On occasion, course titles change, while the course number remains the same. Despite such title changes, the course is still considered to be the same course. Students who have taken the course under the old title and then take the course again under the new title are considered to have repeated the course.

Grading System

Grades are officially recorded by letters, evaluated as follows.

Letter Grade	Numerical Equivalent	Explanation
A	4.000	Outstanding achievement
A–	3.667	
B+	3.333	
B	3.000	Good achievement
B–	2.667	
C+	2.333	
C	2.000	Satisfactory achievement
C–	1.667	
D+	1.333	
D	1.000	Poor achievement
D–	0.667	
F	0.000	Failure
I		Incomplete
IP		In progress
NE		Not enrolled
NG		Grade not reported by faculty
S		Satisfactory (pass/fail basis; counts toward total degree requirements)
U		Unsatisfactory (pass/fail basis)
X		Incomplete (pass/fail basis)

L	Audit (no credit given)
T	Transfer
W	Course withdrawal

An I, IP, or X grade shows that the student has not completed the course requirements.

The IP grade is intended for courses that extend over several semesters. The time restrictions on the incomplete grade do not apply to the IP grade. While the IP grade is left unchanged, it is not included in computing the grade-point average. If the IP grade is never changed, the course does not count toward graduation requirements.

Pass/Fail System

The individual schools and colleges state how and when the pass/fail system may be used. An outline of the general system follows.

- Any student not on academic probation may register for one pass/fail course per semester if permission is granted by the college in which the student is enrolled and if the course is offered on a pass/fail basis.
- Pass/fail courses are normally restricted to electives outside the major, minor, or NUpath requirements. The college faculty, however, may choose to adopt the pass/fail system of grading when it appears pedagogically sound for required courses within a major or minor.
- Before requesting a pass/fail grade from an instructor, students should meet with their academic advisor to determine whether doing so will disqualify the course from satisfying a program requirement or elective. In general, courses taken on a pass/fail basis can be used only to satisfy open electives.
- Individual faculty members may decide whether any of their courses may be taken on the pass/fail system of grading, except when uniformity is necessary. In such cases, the department and/or college faculty offering the course determine whether the pass/fail system is used.
- Grades recorded on the basis of the pass/fail system do not figure in the computation of the grade-point average. Satisfactory completion of all courses taken on the pass/fail system is designated on the student's permanent record by the letter S. Unsatisfactory work is designated by the letter U. Any unsatisfactory grade must be handled according to the existing policy of the college but must never be cleared through the election of the same course pass/fail, except when this system is the only one used by the college for grading the course.
- To use the pass/fail system, students must meet all prerequisites for the course and declare by the end of the second week of the semester their intention to receive a pass/fail grade. This deadline may be extended to the end of the eighth week of a full semester or the end of the fifth week of summer half semester at the option of the instructor.
- Students must submit a Petition to Elect Pass/Fail Grade (<http://www.northeastern.edu/registrar/form-passfail.pdf>), signed by the faculty member.

Clearing an Incomplete or Changing Other Grades

The period for clearing an incomplete grade or for changing a grade other than an incomplete or failure (F or U) is restricted to one calendar year from the date it is first recorded on the student's permanent record. An incomplete grade may be reported by the instructor when a student has failed to complete a major component of a required course, such as homework, a quiz or final examination, a term paper, or a laboratory project. Students may make up an incomplete grade by satisfying the

requirements of the instructor or, if the instructor is absent, the chair of the department. Be aware that instructors' policies on the granting of incomplete grades may vary and that the final decision on an incomplete grade is up to the instructor.

Freshmen with multiple course deficiencies, including incomplete grades, may be required by their college academic advisor to rectify the deficiencies within a period of time less than the normal year.

To request an incomplete grade, the student must obtain and complete in consultation with the instructor an Incomplete-Grade Contract (<http://www.northeastern.edu/registrar/form-inc-grade.pdf>) on which the precise agreement for clearing an incomplete grade is specified and which is signed by the student and the instructor. Copies of the form are kept by the student, the instructor, and the Office of the Dean of the college in which the course is offered. Any exception to this policy on change of grades must be recommended by the Academic Standing Committee (ASC) of the college in which the course was offered and must be forwarded in writing by the ASC to the registrar for implementation. (Finishing the agreed-upon course work must be completed within one calendar year from the end of the semester in which the course was offered.)

University policy states that any grade outstanding for twelve or more months cannot be changed. Any exception to this policy on change of grades must be recommended by the ASC of the college in which the course was offered and must be forwarded in writing by the dean to the Office of the Registrar for implementation.

Repeating Courses

When the appropriate course is available, students may repeat a course to earn a better grade. In all cases, the most recent grade earned in a course is the one used in calculating the overall grade-point average; however, previous grades remain on the transcript followed by the word "Repeat." Consult your academic advisor before repeating a course. Students are required to pay normal tuition for all repeated course work.

Substituting Courses

In some cases, it may not be possible to repeat a course if a student wishes to do so. In unusual circumstances, students may petition to substitute one course for another they have already taken, as long as the subject matter of both courses is substantially alike. With the approval of the student's academic advisor and the agreement of the department that offered the first course taken, a grade received in the new course will be labeled "Substitute" on the transcript and will be treated in the grade-point average calculation as a "repeat" grade, as described above. The original grade will remain on the student's Northeastern transcript. Students should consult with their academic advisor before enrolling in any proposed substitute course. Students are required to pay normal tuition charges for all substitute course work.

Clearing an Academic Deficiency

An academic deficiency occurs when a student fails to complete a course with a satisfactory grade. The deficiency may occur because the student has failed the course or because the student has passed the course but with a grade that does not meet the minimum required by the student's program.

Students who have academic deficiencies may be required to clear them before progressing within the curriculum, especially if a given course is a prerequisite for future course work. Deficiencies may affect the student's expected year of graduation.

With the approval of the appropriate program faculty and/or academic advisor, students can clear deficiencies in the following ways:

1. Repeat the same course at one of Northeastern's colleges, which will result in a "repeat" grade (see "Repeating Courses" policy above).
2. Substitute a comparable course at one of Northeastern's colleges, which will result in a "repeat" grade (see "Substituting Courses" policy above).
3. Under special circumstances, a student may be advised to take a preapproved course at Northeastern's College of Professional Studies or at another institution outside Northeastern University. The original grade will remain on the student's Northeastern transcript and will still be used in the calculation of the grade-point average.

Appeal of Final Grades

Under certain circumstances, students have the right to appeal final grades given by either academic faculty or cooperative education coordinators. Criteria and procedures for such appeals can be found on p. 1 of the *Undergraduate Student Handbook* (<http://www.northeastern.edu/osccr/wp-content/uploads/2017/06/2017-18-UG-Student-Handbook.pdf>).

Grade-Point Average (GPA)

Numerical equivalents for scholastic averages are weighted according to the number of hours the course carries. For example, suppose a student receives a grade of B in a course carrying 4 semester hours and a grade of A in a course carrying 1 semester hour. The weightings for these example courses are as follows:

Grade	Numerical Equivalent	Semester Hours	Weight
B	3.000	4	12
A	4.000	1	4
Totals:		5	16

The GPA for both courses would then be the total weight (16) divided by the total semester hours (5), or 3.200. Grades of I, IP, S, U, and X are not included in the calculation of the GPA. See grade table (p. 29) for a complete list of grades and numerical equivalents.

Grade Reports

Grades are available to students approximately three days after the end of each semester via the myNortheastern web portal (<http://www.myneu.neu.edu>). A missing grade means that none was received from the instructor. Grades received late from faculty are processed as they are received.

Transcripts

Currently enrolled students may obtain unofficial transcripts from the myNortheastern web portal (<http://www.myneu.neu.edu>) and may also order official transcripts through myNortheastern. For further information on transcript requests, visit the transcript request webpage (http://www.northeastern.edu/registrar/trans_request.html). All questions concerning transcript requests should be directed to 617.373.2300, TTY 617.373.5360.

Academic Honors

Dean's List

A dean's list, or honors list, is issued at the end of each fall and spring semester. Effective fall 2010, the requirements to be on the dean's list are a 3.500 grade-point average (GPA) or higher with no incomplete grade or grade below C-. Students who are on any form of probation, who

are enrolled in a course on a pass/fail basis (except where there is no alternative or where required by the program), or who are not carrying a full load as determined by their undergraduate college are not eligible. With a few exceptions as approved by the respective colleges, a full load for fall and spring semesters is considered to be a minimum of four courses or 16 semester hours.

Graduation with Honors

Graduation with honors and selection as the class marshal are reserved for undergraduates who have completed 64 semester hours in residence and meet the following GPA requirements to graduate with honors:

GPA	Honor Conferred
3.500–3.699	Graduate with honor (cum laude)
3.700–3.849	Graduate with high honor (magna cum laude)
3.850–4.000	Graduate with highest honor (summa cum laude)

Note: The university reserves the right to change these standards.

University Honors Program Distinction

University Honors Program Distinction is earned by those students who have completed six honors courses, including an honors interdisciplinary seminar, and who have maintained a cumulative GPA of 3.500. The honors course requirement is adjusted for students who join the University Honors Program as second-semester first-year students (five honors courses) or as rising sophomores (four honors courses). Entering first-year students are invited to join based on a combination of their high school academic preparation, SAT/ACT scores, and leadership/civic engagement record. See the program's website (<http://www.northeastern.edu/honors>) for information about the guidelines on how continuing students may join.

Honors in the Discipline

Honors in the Discipline is earned by those students who successfully complete college-defined requirements, generally culminating in a junior/senior honors thesis or a junior/senior honors project. This distinction will appear on the transcript (for example, "Honors in Music" or "Honors in Chemistry"). Detailed information about Honors in the Discipline is provided under each college's website.

Academic Progression Standards

Faculty Advisor Communication Tool (FACT)

FACT warns students and their advisors of difficulty in courses. This warning is important for students' success, especially for students with a cluster of academic problems. Faculty members are expected to submit warnings by the fifth week of the semester, early enough for correction of the performance or for withdrawal from the course, if appropriate. FACT warnings and/or progress reports for student-athletes are necessary for NCAA compliance.

Academic Status

Academic progress of all students is reviewed by academic advisors at the end of each semester. Students are notified soon after final grades are posted if there are concerns about academic progress in any or all of the following areas:

1. Overall grade-point average (GPA)
2. Semester hours successfully completed

3. Failing or near-failing grades in courses that are required for progress in the major

Students at Northeastern maintain good academic standing when they meet the following criteria:

1. Have an overall GPA of 1.800 at the end of each semester of their freshman year and a minimum cumulative GPA of 2.000 at the end of each semester thereafter
2. Earn at least 12 semester hours in the semester just completed

Individual colleges may have additional requirements that are specified in each college section that follows.

In addition, many programs require that specific courses be successfully completed to progress to the next year. Students who do not make satisfactory progress will not graduate with their class and may be withdrawn. For more information about additional academic progression standards for each college, program, or major, refer to the curriculum guidelines that can be found in the college sections of this catalog. See financial aid implications under "Financial Aid (p. 19)."

Academic Probation

Full-time students who fail to meet the criteria for good standing described above will be placed on academic probation effective for the following semester. The action will appear on the internal record but not on the transcript.

Academic Dismissal

Students who remain on probation after two full-term academic semesters may be dismissed from the university. This action may appear on the transcript at the end of the second probationary semester. In addition, students who have below a 1.000 GPA or fewer than 4 earned semester hours in any semester or cumulatively may be dismissed at the discretion of their college. Students may appeal this decision to the Academic Standing Committee of their college (see following section). International students should consult with an advisor in the Office of Global Services (OGS) (<http://www.northeastern.edu/ogs>) to discuss the impact of an academic dismissal as it relates to nonimmigrant visa status.

Academic Standing Appeals

Students may appeal academic standing status if they can provide evidence and/or reasons supporting an appeal. Generally, a student on probation may be granted no more than one additional full-term academic semester to meet the criteria for good academic standing. Students may appeal to the Academic Standing Committee of their college to review probation and dismissal cases.

Academic Eligibility for Participating in Student Organizations and Athletics

All students must have a minimum 2.000 overall GPA to be eligible for an elected or appointed leadership position in any student organization. Athletes must adhere to NCAA standards.

Repeating Courses to Clear Deficiencies

See "Repeating Courses (p. 30)" and "Clearing an Academic Deficiency (p. 30)."

Definition of Freshman, Sophomore, Junior, and Senior

For undergraduate day students, freshman, sophomore, junior, and senior standing are determined by earned semester hours:

Freshman	Less than 32 semester hours
Sophomore	At least 32 but less than 64 semester hours
Junior	At least 64 but less than 96 semester hours
Senior	At least 96 semester hours

Graduation Requirements

To be eligible to receive degrees, graduating seniors must meet all academic and residency requirements. They must also clear all financial, experiential education, and disciplinary deficiencies.

In addition, each program of study has specific academic requirements. These are specified for each program under the various schools and colleges in this catalog.

Once they matriculate, students are expected to complete all course work for their degree at Northeastern; or an entity in a formal contractual, consortial, or partnership relationship with Northeastern; or at an approved Northeastern University study-abroad program. In some cases, in order to clear a deficiency, to permit students access to courses deemed by their respective advisors and colleges to be important for their educations but unavailable to them at Northeastern, or to remain on track for graduation, a student may petition their college for permission to take a course at another accredited institution. See also "Residency Requirement," below.

Prior to completion of their program, students are expected to complete a graduation degree audit at their college's academic student services office.

Note: Participation in study abroad in a student's final semester may result in a delay in graduation due to calendar discrepancies across institutions.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Residency Requirement

In addition to meeting all degree and major requirements, students must earn a minimum of 64 Northeastern University semester hours to receive a bachelor's degree. Established exchange programs, where students are earning two degrees, one from Northeastern University and one from another institution, require students to earn a minimum number of Northeastern University semester hours as specified by the exchange program. Specialized programs for students with preexisting credentials have specific residency requirements.

Commencement

Attendance at Commencement is optional. Information concerning Commencement is provided to all graduating seniors during the spring semester. Seniors who have been removed from the graduation list are notified if they fail to qualify for their degrees. No special notice is sent to students who do qualify.

Degrees, Majors, and Minors

Declaring Majors and Minors

Undergraduate students may declare their majors upon admission to the university or may elect to join programs for undeclared students before declaring a major. Students must declare a major no later than the end of the sophomore year. Majors and concentrations are described under the various schools and colleges in this catalog.

Students should submit a petition form to earn a minor as early as possible and, generally, no later than the end of the junior year, by applying to the department offering the minor. Completion of the requirements of a major, minor, or concentration is noted on the transcript.

Changing Majors

Undergraduate students enrolled full-time in one or more of the university's undergraduate schools or colleges may change their major if they meet one of the following transfer criteria:

- The student meets the criteria for immediate entry as defined by the receiving major.
- The student has a cumulative grade-point average (GPA) of 2.000 or greater and satisfactorily completes the transition criteria as defined by the receiving major. For GPA below 2.000, change of major is at the discretion of the receiving major.

Students who are considering a major change must discuss their change in person with an advisor in the receiving major. See the online list of advising offices (<http://www.northeastern.edu/registrar/changemajor-offices.html>). The advisor will certify that the student meets the criteria for immediate entry to the major or will set up a transition term for the student to satisfy the change-of-major criteria. Advisors will discuss the student's ability to succeed in the desired program given the current academic record as well as the influence of changing major on the student's ability to obtain a degree in the desired program within the traditional eight-academic-term time frame.

Transition criteria are designed to help ensure that students who change major have a reasonable chance of academic success and program completion. A list of school and college transition criteria is maintained at the website of the respective school or college. Students wishing to join some majors must also audition or submit a portfolio, as indicated on the aforementioned webpage. Note also that some colleges have deadlines for applications to change major, also indicated on the aforementioned webpage.

International students must inform the Office of Global Services (OGS) (<http://www.northeastern.edu/ogs>) of any change of major.

Northeastern Explore Program

The Northeastern Explore Program provides support and guidance to first-year students who have not yet decided upon or officially declared a major. All students must declare a major no later than the end of the sophomore year. Undeclared students are strongly encouraged to declare a major by the beginning of their sophomore year if they are interested in highly structured programs or in maximizing their number of co-op placements within such a major. Admission to a particular major is dependent on the transfer criteria described above.

The D'Amore-McKim School of Business, the College of Engineering, and the College of Computer and Information Science also each provide

resources to facilitate a major choice for students who enter their respective colleges with undeclared majors.

Double Major

Students may earn a double major by gaining admission to the second major and by completing all requirements for both majors. Because some double majors will have a significant overlap in courses, all double-major proposals must be approved by the home college of each major in the proposed double major. Students completing a double major receive one degree and one diploma. The two majors appear on the transcript. If the two majors are in different colleges, the degree is associated with the major in the home college.

Second Northeastern University Bachelor's Degree

To earn a second bachelor's degree after earning a first bachelor's degree from Northeastern, a student must be granted admission to the second program, enroll at Northeastern, and complete all requirements for the second major that are not already on the student's transcript. Outdated course work may not be accepted. Students must earn a minimum of 32 semester hours beyond those earned toward the first degree. A second diploma will be awarded and the second degree will be noted on the transcript.

Students must complete an application with the home college of the intended degree. Some programs may require prerequisites prior to admission. Students should apply by the normal transfer deadline to ensure timely consideration. The college makes the determination on admission; notifies the student of this decision; and, if the student is admitted, provides the student with a program of study and reactivates the student's record. International students must consult with an advisor in the Office of Global Services to request updated documentation reflecting engagement in the second Bachelor's Degree program.

Combined and Independent Majors

Students with academic interests not available in the context of existing majors, minors, and double majors may propose a combined or independent major. In these majors, students pursue in-depth study in areas that are supported and approved by the appropriate Northeastern faculty members.

COMBINED MAJORS

Combined majors include at least nine courses associated with each of two participating disciplines. There must be at least one course that acts as a bridge between the disciplines. No more than two courses may count for both disciplines, i.e., there must be at least 16 courses in the combined major. The combined major should be declared by the end of the first semester of the junior year. It is generally advantageous to declare the combined major as early as possible, especially when highly structured disciplinary components are involved. There are three categories of combined majors:

1. A number of defined combined majors currently exist where the curriculum is specific to each individual program; see the online list of current combined major program options (<http://www.northeastern.edu/registrar/major-2.html#defined>).
2. A number of disciplines have preapproved template programs that may be paired in a variety of combinations to yield combined majors; see the online list of current preapproved template programs (<http://www.northeastern.edu/registrar/major-2.html#templates>).
3. Disciplines will consider combined programs upon student request.

Currently Defined Combined Major

Students may request admission to a currently defined combined major by following the standard procedure for changing majors. A home college

is designated, in which the student will be registered and from which he or she will be graduated. Students completing a combined major receive one degree and one diploma. The combined major and home college will appear on the transcript and diploma.

Student-Requested Combined Major

Students may request admission to a new combined major via the Combined Major Approval form (<http://www.northeastern.edu/registrar/form-maj-comb.pdf>) that requires approval by both disciplines/colleges together with an approved curriculum. The request may be for a combined major comprised of preapproved template programs or for a new combined major to be considered by the participating disciplines. During the planning process, advisors from both disciplines will be designated, and one will be identified as the primary advisor. If the two disciplines partnering in the combined major are in different colleges, a home college will be designated in which the student will be registered and from which he or she will be graduated. A meeting of the student and both advisors representing the two disciplines must be held to plan the combined-major curriculum and to consider NUPath requirements. See the online list of discipline advisors and college contacts for new student-requested combined majors (<http://www.northeastern.edu/registrar/contacts-stu-req-combined.html>).

Students completing a combined major receive one degree and one diploma. The combined major and home college will appear on the transcript and diploma. When the two components of the combined major individually offer different degree designations, the degree designation that will appear on the transcript and diploma will be designated during the approval process.

INDEPENDENT MAJORS

In the rare cases when students have academic interests that fall within the expertise of Northeastern faculty members and that are not available in the large number of existing majors, minors, and combined majors, they may propose an independent major. Independent majors form an integrated program focusing on some issue, theme, or subject area not available within the context of existing curricula. These programs should be equivalent in depth and coherence to existing majors and may involve an integrative project. No student with less than a 3.250 grade-point average will be approved for an independent major. The proposal must be approved by the end of the first semester of the junior year. Proposals will not be considered before the end of the freshman year. For initial information and advice, interested students should consult the associate dean overseeing undergraduate studies in their current home college or the college most relevant to the proposed course of study.

The student assumes the initiative in formulating an independent major. High degrees of student initiative and self-reliance are also necessary for completion of this type of major. The student is responsible for securing the advice and approval of faculty mentors, at least one from each of the disciplines. These faculty mentors will help the student design the curriculum. The faculty mentors will guide the student's academic progress through the major. The student should select one of the faculty mentors as the primary mentor.

If the disciplines partnering in the independent major are in different colleges, the college of the primary mentor will be designated as the home college, in which the student will be registered and from which he or she will be graduated. Students completing an independent major receive one degree and one diploma. The independent major and home college will appear on the transcript and diploma. When the components of the independent major individually offer different degree designations, the degree designation that will appear on the transcript and diploma will be designated during the approval process.

The student, with the assistance of the faculty mentors, must formulate in writing and submit to the home college curriculum committee an Independent Major Approval form (<http://www.northeastern.edu/registrar/form-maj-ind.pdf>) bearing the signatures of all faculty mentors and a proposal containing the following items:

- A statement of the central concept around which the independent major is organized and a rationale for the major, including a discussion of why existing programs are inadequate to the student's purpose and how the proposed major meets the student's educational, professional, or personal goals
- A list of courses—including names, numbers, prerequisites, and frequency of offering (if known)—and a breakdown of the introductory, intermediate, and advanced courses included in this list
- A statement of the manner in which the requirements of the university core are fulfilled (and, if applicable, BA core requirements (p. 40))
- A list of courses—including numbers, names, and grades—already taken that will apply to the major or to the university core (and BA core, if applicable) requirements
- A student transcript
- A calendar for completion of the degree

A meeting of all faculty mentors and the student must be held before college approval of the major program. In accepting the proposal, the home college dean's office certifies that the rules established for the independent major have been followed, and it assumes administrative responsibility by assigning an academic advisor to monitor the student's progress and clear the student for graduation. Any changes in the curriculum must be approved by the primary faculty mentor, and the home college advisor must be informed.

PlusOne Bachelor's/Master's Programs

Northeastern University offers a number of PlusOne bachelor's/master's degree programs that allow students to accelerate the completion of the bachelor's degree by applying graduate credits taken as an undergraduate toward both the undergraduate and graduate degrees. Generally, both degrees may be earned in one more year than is the normal time allotted for completion of the bachelor's degree. See additional information on PlusOne Bachelor's/Master's programs (<http://www.northeastern.edu/plusone>).

Northeastern University School of Law also admits students from a small number of programs in the College of Social Sciences and Humanities to a 3+3 program that allows students to count their first year of law school toward their undergraduate degree.

Minors

Minors offer an opportunity for students to complement their major with intensive study in another area. A minor consists of a minimum of four courses defined by a department or an interdisciplinary program. In some cases, background courses are also required. Unless otherwise indicated, minors are generally open to all university students. Minors appear on the transcript only after completion of requirements has been certified and the degree has been awarded.

Personal Information

Change of Name

Report all name changes to the Office of the Registrar immediately. This is especially important when students marry and wish to use a new name on university records.

Change of Address

Report all address changes via the myNEU web portal (<http://www.myneu.neu.edu>) or in person at the Office of the Registrar or Office of Student Accounts. Both the permanent home address and the local address are required. International students must report any changes of address within ten days in order to ensure compliance with Student and Exchange Visitor Information System (SEVIS) requirements.

Family Educational Rights and Privacy Act (FERPA)

FERPA for Students—General Information

FERPA is a federal law that applies to educational institutions. Under FERPA, schools must allow students who are 18 years or over or attending a postsecondary institution:

- Access to their education records
- An opportunity to seek to have the records amended (see the *Student Handbook* for this procedure)
- Some control over the disclosure of information from the records

FERPA General Guidance for Parental Disclosure

When a student turns 18 years of age or attends a postsecondary institution, the student, and not the parent, may access, seek to amend, and consent to disclosures of his or her education records.

If you are an undergraduate day student and you choose not to share information with your parents, Northeastern will, if asked, indicate that you have restricted access to your records.

Release of Directory Information

The primary purpose of directory information is to allow Northeastern University to confirm attendance for employers, health insurance companies, and loan agencies. Northeastern may disclose appropriately designated "directory information" without written consent, unless you have advised the university to the contrary in accordance with the procedures below. If you choose not to release directory information, all communications with all third parties and agencies will need to be done through your written request to the university or in person.

As of June 30, 2016, Northeastern directory information includes:

- Student name
- Home address (city, state, country only)
- Major field of study
- College
- Class year
- Enrollment status (e.g., undergraduate or graduate, full-time or part-time)
- Dates of attendance
- Degrees, honors, and awards received
- Most recent educational agency or institution attended
- Sports activity participation, showing weight/height of members of athletic teams
- Participation in officially recognized activities

If Northeastern currently has permission to release data and you do not want the university to disclose directory information without your prior written consent, you must notify the university by coming to the Office of the Registrar, 271 Huntington Avenue.

Notification of Rights under FERPA

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. These rights are:

1. The right to inspect and review the student's education records within 45 days of the day the university receives a request for access. Students should submit to the registrar, dean, or head of the academic department (or appropriate official) written requests that identify the record(s) they wish to inspect. The university official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the university official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.
2. The right to request the amendment of the student's education record that the student believes is inaccurate or misleading. Students may ask the university to amend a record that they believe is inaccurate or misleading. They should write the university official responsible for the record, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading. If the university decides not to amend the record as requested by the student, the university will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.
3. The right to consent to disclosures of personally identifiable information contained in the student's education records, except to the extent that FERPA authorizes disclosure without consent. One exception, which permits disclosure without consent, is disclosure to school officials with legitimate educational interest. A school official is defined as a person employed by the university in an administrative, supervisory, academic, or support staff position (including law enforcement unit and health staff); a person or company with whom the university has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a person assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.
4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the university to comply with the requirements of FERPA. At Northeastern, the Office of the University Registrar, 271 Huntington Avenue, administers FERPA.

Additional Information

Additional information can be obtained at the U.S. Department of Education's website (<http://www.ed.gov/policy/gen/guid/fpco/ferpa>) or by writing to:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, D.C. 20202-5920

Student Right-to-Know Act

See online information about the Student Right-to-Know Act (<http://www.northeastern.edu/registrar/right-to-know.html>).

Leaves of Absence and University Withdrawal

General Leave of Absence Policy

Students who wish to take a leave of absence are encouraged to apply for the leave by filling out the proper petition through the myNortheastern web portal before the last day to drop without a W in a term. Students can request a leave up until the last day to drop with a W in a term, but should review the financial implications of withdrawing from courses on the Student Financial Services website. Students can take up to one year of leave, excluding medical and emergency leaves of absence. Any leave of absence type, if approved, will take into account the following conditions:

- Students who do not return at the end of the leave will be withdrawn and must contact their college for re-entry prior to the term start.
- Students must return to classes, not co-op.
- Students must be currently enrolled in academic classes or co-op. If a student is withdrawn for personal reasons, the withdrawal can be reversed and a request for a leave of absence can only be processed if it is before the last day to drop without a W in a term. If the student has been administratively withdrawn, a request for leave of absence cannot be considered until the withdrawal is resolved.
- Students who receive financial aid should meet with a financial aid counselor before going on a leave.
- Students in university housing should refer to the Housing and Residential Life Office for policy information.
- A Student's enrollment status cannot include more than one academic year of consecutive non-class enrollments. Students on leave for more than one year will be withdrawn from the university.
- If a student has taken multiple leaves equating to one year, the next leave request will be processed as a withdrawal.
- International students must make an appointment with the Office of Global Services (OGS) (<http://catalog.northeastern.edu/professional-studies/academic-policies-procedures/absence-withdrawal/#military>) to discuss leave of absence procedures in accordance with federal regulations.

Students on a leave of absence are considered active students and are able to register for classes in an upcoming term in a leave status. If a student is unable to register because they are inactive, they should contact their college for re-entry at the time of registration for the return term. Students are expected to register for classes upon returning from a leave of absence.

Medical or Emergency Leave of Absence

Medical leave is an option available to those Northeastern students who develop a major medical condition that precludes class attendance, completion of requirements, and/or participation in co-op. Medical leave petitions must be initiated at University Health and Counseling Services (UHCS). Students are not allowed to take classes for credit toward their degree at Northeastern while on a medical leave of absence. Students can petition their college for an exception to take classes elsewhere while on a medical leave of absence based on extenuating circumstances.

Students who wish to re-enter the university following a medical leave must contact UHCS. Re-entry from a medical leave requires receipt of all documentation delivered to UHCS on or around one month prior to the planned re-entry to classes. Once all documentation is received by UHCS, it will be reviewed and the student will be notified of the decision. Students must be enrolled in Northeastern University classes for the term in which they wish to return from their medical leave of absence.

More specific information about the re-entry process, along with the application for leave, can be found at the UHCS website (<http://www.northeastern.edu/uahcs/access-to-care>).

Emergency leaves may be granted when a student cannot continue attending class after the start of the term due to life-changing situations beyond the student's control. Students can access the application and submit their request for an Emergency Leave of Absence online by going to the myNortheastern web portal (<http://www.mynneu.northeastern.edu>), and typing "Registrar Forms" in the search box, choosing Leave of Absence, and then selecting Emergency as the leave type.

The university's medical leave of absence and emergency leave policy states that all *tuition* charged for the term in which the leave has been granted will be held by the university and applied toward future tuition charges in the same academic program. This does not include housing and other fees. Outstanding balances (including unpaid balances) for the academic term in which the leave is taken are still due the university. Tuition adjustments are made depending on the timing of the leave. The adjustments would follow the same schedule as the official withdrawal adjustments. See the schedule for "Refunds for Complete Withdrawal from the University (<http://catalog.northeastern.edu/undergraduate/expenses/bill-payment/#comp-with>)." Financial aid recipients must contact their financial aid counselor to understand the effects on aid received.

If the leave extends more than six months, student loans may go into repayment. Students enrolled in the Northeastern University Student Health Plan (NUSHP) will remain enrolled in the plan for the plan year, ending August 31.

Returning from a Leave Of Absence

Students on a leave of absence are considered active students and are able to register for classes in an upcoming term in a leave status. If a student is unable to register because they are inactive, they should contact their college for re-entry at the time of registration for the return term. Students are expected to register for classes upon returning from a leave of absence.

Students who are withdrawn and are applying for Commencement may be re-entered on a leave of absence, pending the college's approval, prior to the term in which they will graduate. International students returning from a leave of absence should contact OGS regarding the Student and Exchange Visitor Information System (SEVIS) procedures three to four months prior to anticipated return date.

Students who wish to re-enter the university following a medical leave must contact the Medical Leave Team at UHCS. Re-entry from a medical leave requires receipt of all documentation delivered to UHCS on or around one month prior to the planned re-entry to classes. Once all documentation is received by the Medical Leave Team, it will be reviewed and the student will be notified of the decision. Students must attend classes for the term they wish to return from medical leave of absence.

Leave of Absence Due to Military Deployment or Missionary Service

When a student is called to active duty or missionary service, they must apply for the leave by filling out the proper petition through the myNortheastern web portal (<http://mynneu.northeastern.edu>). Proof of official deployment or call to service paperwork will be required as an attachment when filling out the leave of absence request.

When a student is called during the term, the university will:

- Excuse tuition for that term. Any payment made will be credited to the student's account.
- Post a leave of absence for the term to hold a place for the student when he or she returns.

If a student is called near the end of the term, the student and faculty members may determine that incomplete (I) grades are more appropriate. In this case, tuition will not be waived.

When a student returns to the university after completion, he or she will notify the college academic student services office if the leave was longer than one year, which will in turn notify the Registrar's Office. The college academic student services office will assist the student with re-entry and registration. If the leave was less than one year, the student should register for classes for the upcoming term prior to returning to campus.

International students who must take a leave of absence to engage in military service in their home country must additionally fill out a form for leave of absence with OGS.

Leave of Absence for International Students

International students should discuss maintenance of proper U.S. immigration status with an advisor at OGS before requesting any type of leave of absence.

University Withdrawal

Students seeking to withdraw from the university for any reason should meet with their academic advisor before completing the university withdrawal form online. Students should review the financial implications of withdrawing from all classes on the Student Financial Services website.

Students may be withdrawn from the university for financial, disciplinary, academic, or medical reasons. In the last case, the vice president for student affairs will review the recommendations of the director of health services to determine whether the student should withdraw. Withdrawals are made only when it is determined that the student is a danger to himself or herself or to other members of the university community, or when the student has demonstrated behavior detrimental to the educational mission of the university.

Note that withdrawal from the university will impact an international student's immigration status. Thus, international students should discuss the means to maintain proper U.S. nonimmigrant status with an advisor at OGS before requesting or after having been placed on withdrawal.

University Academics

- NUpath (p. 37)
- University-Wide Requirements (p. 41)

NUpath

Learning, Knowing, Doing, Leading

NUpath is Northeastern University's set of institution-wide general education requirements for all students in all majors. The goal of the NUpath is to develop in our students the knowledge and skills to be lifelong learners with success in many careers, to be thoughtful global citizens, and to be fulfilled human beings. It offers students the flexibility to integrate general education learning into their individual educational journeys while maintaining the rigor of high standards through defined learning outcomes, making NUpath a unique tool for personalized curricular enrichment. NUpath is competency based rather than course based. It is built around essential, broad-based knowledge and skills—such as understanding societies and analyzing data—integrated with specific content areas and disciplines.

NUpath requirements are met throughout a student's program of study. NUpath requirements are not restricted to specific colleges or departments and can be fulfilled through major, minor, or concentration requirements as well as through general electives. NUpath courses may not be taken pass/fail. NUpath is required for all freshmen who entered in fall 2016 and later. It does not apply to students already admitted with a different set of core requirements or to transfer students whose entry year was earlier than the fall of 2016.

- Requirements (p. 37)
- Learning Goals (p. 38)
- Writing-Intensive Courses (p. 40)
- Additional Requirements for BA Students (p. 40)

NUpath Requirements

NUpath requirements are a set of eleven competencies designed to prepare students for personal success in an ever-evolving global society regardless of their chosen field of study. NUpath requirements are as follows:

- Natural and Designed World
- Creative Expression and Innovation
- Interpreting Culture
- Formal and Quantitative Reasoning
- Societies and Institutions
- Analyzing and Using Data
- Differences and Diversity
- Ethical Reasoning
- Writing across Audiences and Genres
- Integrating Knowledge and Skills through Experience
- Demonstrating Thought and Action in a Capstone

Because NUpath is competency based rather than course based, students have many options of courses to fulfill the requirements. Students can use the Dashboard tool (<http://www.neu.edu/registrar/db-ugd.html>) to find courses both in and beyond their major requirements that satisfy NUpath. Courses that meet major, minor, or concentration requirements can also meet NUpath requirements. There are no level restrictions or semester-hour restrictions. No course taken as pass/fail can be used to satisfy a NUpath requirement. A single course can count for up to two of the following requirements:

- Natural and Designed World
- Creative Expression and Innovation
- Interpreting Culture
- Formal and Quantitative Reasoning
- Societies and Institutions
- Analyzing and Using Data
- Differences and Diversity
- Ethical Reasoning

The three additional requirements (writing-intensive in the major, capstone, and experiential) are not limited. So, for example, a course may have two out of the first list (such as Differences and Diversity and Societies and Institutions) and *also* fulfill writing-intensive in the major and capstone.

Transfer credit and placement tests can also be used to meet the NUpath attributes of the Northeastern course equivalents. Up to five of the

following eight requirements can be met by transferred or placement test credits:

- Natural and Designed World
- Creative Expression and Innovation
- Interpreting Culture
- Formal and Quantitative Reasoning
- Societies and Institutions
- Analyzing and Using Data
- Differences and Diversity
- Ethical Reasoning

Transfer credits cannot be used to fulfill the capstone or experiential requirements. Of the writing requirements (p. 40), only the first-year writing requirement can be met by transferred or placement test credits.

NUpath Learning Goals

Established and assessed learning goals ensure rigorous opportunities for students to achieve the essential skills and competencies of NUpath regardless of the context or course within which the learning occurs. Any course that meets a NUpath requirement incorporates the learning goals of that requirement. The requirement short name and/or user code is what will appear in course descriptions and student audits.

Engaging with the Natural and Designed World

Short Name: Natural and Designed World

User Code: ND

Students study and practice scientific investigation and/or engineering design in order to understand the natural world and to effect changes in it to meet human and societal needs and wants. They learn critical thinking and analytical problem solving; the biological, chemical, and/or physical principles that govern the natural world; and the efforts that underlie the origins, development, acceptance, and applications of those principles.

LEARNING GOALS

By the end of the course, students should be able to:

1. Formulate a question that can be answered through investigation or a challenge that can be addressed through research or design.
2. Develop and use models based on evidence to predict and show relationships among variables between systems or components of systems in the natural and/or designed world.
3. Use and question scientific principles and practices to evaluate issues raised by the interplay of science, technology, and society.

Exploring Creative Expression and Innovation

Short Name: Creative Expression/Innovation

User Code: EI

Students study and practice creative expression and innovation. They learn about traditions of creative expression and innovation in any of a number of modes (texts, image, sounds, design, etc.) and products (poems, paintings, prototypes, business plans, games, apps, medical devices and procedures, etc.) and develop their own creative processes

and products as a means of seeing and experiencing the world in new ways and communicating those experiences to others.

LEARNING GOALS

By the end of the course, students should be able to:

1. Describe creative processes in one or more disciplines (e.g. art, business, writing, science, engineering).
2. Generate an artifact (e.g., design, poem/essay, application, visualization, musical composition, product, prototype) through a creative process.
3. Evaluate experimentation, failure, and revision in the creation of innovative projects.

Interpreting Culture

Short Name: Interpreting Culture

User Code: IC

Students study and analyze cultural practices, artifacts, and texts (e.g., visual art, literature, theatrical performances, musical compositions, architectural structures). They learn critical reading and observation strategies and how traditions of theoretical, aesthetic, and/or literary criticism provide different lenses for the interpretation of cultural objects and practices.

LEARNING GOALS

By the end of the course, students should be able to:

1. Recognize and identify a variety of cultural practices and creations, their forms of production, and development over time.
2. Acquire and assess techniques of interpretation (including critical reading and observation techniques), criticism, and analysis of cultural practices, texts, and/or artifacts.
3. Formulate arguments for and against different theories and interpretations of cultural practices, texts, and/or artifacts

Conducting Formal and Quantitative Reasoning

Short Name: Formal/Quantitative Reasoning

User Code: FQ

Students study and practice systematic formal reasoning using either the symbolic languages of mathematics and logic or the combinations of text and symbols characteristic of computer software. They learn when and how to apply formal reasoning to particular problems and subject matters.

LEARNING GOALS

By the end of the course, students should be able to:

1. Recognize when examination of a phenomenon or situation can benefit from problem-solving techniques and analyses that use formal reasoning.
2. Use their expertise in some applications of formal reasoning and know when to call upon domain experts when a problem is beyond their personal expertise.
3. Generate artifacts that require formal reasoning and planning. These artifacts might include logical proofs, mathematical computations, software, simulations, problem solutions, or plans/analyses in a variety of disciplines that require a formal, systematic component.

Understanding Societies and Institutions

Short Name: Societies and Institutions

User Code: SI

Students study and practice social science, historical, and/or literary methods of inquiry and theories in order to understand human behavior and cultural, social, political, and economic institutions, systems, and processes. They learn theories of social behavior as they relate to phenomena such as globalization, social change, and civic sustainability.

LEARNING GOALS

By the end of the course, students should be able to:

1. Describe current theories of how social, political, or economic institutions, systems, and processes work.
2. Explain the historical and cultural contingency of many descriptions and explanations of human behavior, institutions, systems, and processes.
3. Evaluate social, political, or economic theories by applying them to local and global phenomena.

Analyzing and Using Data

Short Name: Analyzing and Using Data

User Code: AD

Students study and practice methods and tools of data analysis and use. Students learn about the structure and analysis of at least one type of data (e.g., numbers, texts, documents, web data, images, videos, sounds, maps) and acquire the skills to examine, evaluate, and critique such data; extract patterns; summarize features; create visualizations; and provide insight not obvious from the raw data itself. Students also learn to be sensitive to ethical concerns associated with data: security, privacy, confidentiality, and fairness.

LEARNING GOALS

By the end of the course, students should be able to:

1. Describe how data may be acquired, stored, transmitted, and processed.
2. Analyze at least one important type of data and summarize the results of an analysis in ways that provide insight.
3. Use mathematical methods and/or computational tools to perform analysis.
4. Evaluate and critique choices made in selection, analysis, and presentation of data.

Engaging Differences and Diversity

Short Name: Differences and Diversity

User Code: DD

Students study and practice methods for recognizing and understanding human diversity of various kinds in global, local, and organizational contexts. They learn theories and perspectives of human difference; civic sustainability and multiculturalism; how social arrangements shape and are shaped by difference; and the histories, cultures, and interactions of diverse groups.

LEARNING GOALS

By the end of the course, students should be able to:

1. Describe how notions of human difference have changed over time and across local and global contexts.
2. Discuss the value in recognizing, respecting, and embracing human diversity and how diversity contributes to culture and society, including civic sustainability.
3. Evaluate and compare two or more theories of human difference and approaches to cultivating and leveraging diversity.
4. Connect theories of human difference and approaches to diversity to one's own experience

Employing Ethical Reasoning

Short Name: Ethical Reasoning

User Code: ER

Students study and practice methods of analyzing and evaluating the moral dimensions of situations and conduct. They learn ethical theories and frameworks; explore how conceptions of morals and ethics shape interpretation of concepts such as justice, fairness, rights and responsibilities, virtue, and the good life; and apply these to personal, professional, social, political, historical, or economic questions and situations.

LEARNING GOALS

By the end of the course, students should be able to:

1. Describe the moral and ethical elements of an issue, problem, or situation.
2. Explain at least two key ethical theories.
3. Apply ethical theories to moral dilemmas and personal positions.

Writing Across Audiences and Genres

Short Name: Writing Across Audiences/Genres

Note: This requirement is met by four courses. See more details under **Writing-Intensive Courses** (p. 40).

Students study and practice writing for multiple public, academic, and professional audiences and contexts. They learn to use writing strategies, conventions, genres, technologies, and modalities (e.g., text, sounds, image, video) to communicate effectively.

LEARNING GOALS

By the end of the course, students should be able to:

1. Adapt writing for multiple academic, professional, and public occasions and audiences.
2. Develop facility with genres of their chosen academic field and profession.
3. Identify credible, relevant sources and engage meaningfully with them in their writing.
4. Demonstrate control of writing conventions, including citation standards and mechanics.

Integrating Knowledge and Skills Through Experience

Short Name: Integration of Experience

User Code: EX

Students study and practice the principles and strategies of experiential learning. Through direct experience and reflection on that experience, they learn to recognize and articulate their knowledge and skills, to apply the knowledge and skills they learn in one context to another context, and to determine what knowledge and skills they need to develop to meet their goals.

Learning Goals: By the end of the course, students should be able to:

- 1. Apply knowledge and skills in new, authentic contexts.
- 2. Gain new knowledge and develop new skills to successfully engage in unfamiliar tasks and activities.
- 3. Integrate and use the deepened knowledge and skills as well as the newly gained knowledge and skills to continue to learn in their academic programs.
- 4. Articulate how and what one learns across a range of contexts.

Demonstrating Thought and Action in a Capstone

Short Name: Capstone Experience
User Code: CE

Each student must take at least one course designated as a capstone experience. Capstone courses may be designed for a specific degree program, for a department, or for a college. The learning goals for a capstone will be developed by the unit that is designing the capstone. Students must complete a capstone in their major. In cases where a student has multiple majors (such as in a combined or double major), the units may specify in which major to take the capstone or may leave the choice to the student.

Writing-Intensive Courses

The faculty expects all students to become effective writers and achieve the learning goals of the “Writing across Audiences and Genres” NUpath attributes. To this end, students are given opportunities to improve their writing throughout their curriculum.

First-Year Writing Requirement

All first-year students must satisfy a first-year writing requirement in one of the following ways:

Code	Title	Hours
ENGW 1111	First-Year Writing	4
ENGW 1110 and ENGW 1111	Introductory First-Year Writing and First-Year Writing	8
ENGW 1102	First-Year Writing for Multilingual Writers	4
ENGW 1101 and ENGW 1102	and First-Year Writing for Multilingual Writers	8

Depending on performance in Introductory First-Year Writing (ENGW 1110) or (ENGW 1101), the second half of the two-course sequence may be waived, as determined by the Department of English. Students must earn a C or better in the required writing course to satisfy the first-year writing requirement.

The First-Year Writing Program conducts a version of “guided self-placement” and requires students bring an essay to the first class meeting; see the course placement webpage (<http://www.northeastern.edu/writing/first-year-writing/course-placement>) for details.

For more information about the Writing Program, visit the Writing Program webpage (<http://www.northeastern.edu/writing>).

Note: (ENGW 1101) and Introductory First-Year Writing (ENGW 1110) are not credited toward graduation in the College of Engineering.

Advanced Writing Requirement

Advanced Writing in the Disciplines (AWD) is the second course of the university-wide requirement. Students are eligible to enroll in AWD once they satisfy the first-year requirement, earn a minimum of 64 semester hours of academic credit (this number includes the semester in which students enroll in AWD), and have at least junior or senior standing. Students are encouraged to take AWD before they have accrued 96 semester hours. A variety of AWD sections are offered, including Advanced Writing in the Technical Professions, Advanced Writing in the Sciences, and Advanced Writing in the Health Professions, among others. A small number of online sections and sections for non-native speakers of English are also offered. Students should consult with their advisors to choose the section that best suits their needs. Transfer credit cannot be used to satisfy this requirement. Students must earn a C or better to satisfy the advanced writing requirement.

For more information about the Writing Program, visit the Writing Program webpage (<http://www.northeastern.edu/writing>).

Writing-Intensive Courses in the Major

Each major includes at least two additional writing-intensive courses. These courses are characterized by frequent and regular writing, assessment and revision of student work, and the opportunity for students to improve their work.

Additional Requirements for BA Students

In addition to successfully completing the university requirements of NUpath (p. 37), students pursuing a Bachelor of Arts (BA) degree must fulfill the BA core requirements as outlined below.

Language Requirement for BA Students

Each BA student must complete the language requirement by demonstrating proficiency at the elementary level and satisfying an intermediate-level requirement as described below.

ELEMENTARY-LEVEL PROFICIENCY

Satisfy one of the following requirements:

- 1. Complete elementary-level two (course number 1102) of a language with grades of C or better in all course work (pass/fail grades cannot be used to satisfy this proficiency requirement).
- 2. Earn a 4 or 5 score on an Advanced Placement (AP) exam in one of the languages offered or receive transfer credit for the equivalent of elementary-level two (course number 1102). Students who have AP or transfer credit must also receive a satisfactory rating in a language-specific interview administered by the World Languages Center upon matriculation.
- 3. Receive a satisfactory score (as determined by the World Languages Center) on a standardized placement exam and a satisfactory rating in a language-specific interview administered by the World Languages Center upon matriculation.

INTERMEDIATE-LEVEL REQUIREMENT

Satisfy one of the following requirements:

1. Complete a course at the intermediate level (course number 2101 or higher) in the language taken at the elementary level.
2. Complete a course in which the subject matter focuses on some aspect of the culture, history, or society of a part of the world where the language taken at the elementary level is spoken or used by a significant portion of the population. For a course list, visit the myNEU web portal (<http://www.mynneu.neu.edu>), click on the "Self-Service" tab, then on "My Degree Audit."
3. Demonstrate conversational proficiency by successfully completing a proficiency interview (scheduled through the World Languages Center). This option is available only for heritage speakers of a language or for students who have completed the elementary-level language requirement through one of the following:
 - a. Advanced placement
 - b. Standardized placement exam as outlined above

University-Wide Requirements

Note: Individual program requirements may exceed the following minima.

Minimum 128 total semester hours required

Minimum 2.000 GPA required

Students must earn a minimum of 64 Northeastern University semester hours in order to receive a bachelor's degree.

Living and Learning Communities

All first-year students are required to live on campus. The First Year Experience (FYE) program has been developed to help Northeastern University's first-year students transition into this new and exciting chapter of their lives—college life. The Department of Residential Life is dedicated to working with Northeastern students to help them build strong community living environments that support personal development and academic success. These environments provide opportunities to learn outside of the classroom through the Living Learning Community program.

The foundation for the FYE program is held by four pillars: personal development, academic success, experiential learning, and community development. These pillars are the guiding principles of the programs and resources specific to the needs of first-year students. The goal is to help students navigate the university and familiarize them in their first year living away from home and with life in a new environment.

Experiential Learning

Website (<http://www.northeastern.edu/experiential-learning>)

Experiential learning offers the opportunity for an education that is richer and more meaningful, providing students with experiences that add depth to their classroom studies and enable them to explore and transform their lives. Experiential learning is tightly integrated with our course curriculum and is supported by advising in the majors as well as advising in the experiential learning group.

The primary ways in which the experiential learning requirement may be satisfied are:

- Cooperative education
- Research or creative activity
- Service-learning
- Global experience

Only one learning experience outside the classroom is required for NUPath. However, students have many additional opportunities for further experiential learning.

Integration of course work and experiential learning occurs throughout the major curriculum as well as in the required capstone course.

Cooperative Education

Website (<http://www.northeastern.edu/coop>)

Cooperative education (co-op) is the cornerstone of Northeastern University's experiential learning approach, in which on-campus study is enhanced by real-world experience at locations all over the world. Through co-op, students alternate periods of academic courses with periods of employment in positions related to their academic or career interests. This combination provides an integrated learning experience that enhances both in-class studies and career development.

Northeastern's cooperative education is a full-time employment experience outside the classroom supporting the concept of experiential learning. Students use the full-time experience to reflect on areas of study and academic interest. Cooperative education experiences are recalled throughout the student's academic career in classes and capstone papers. Students on co-op are required to maintain the same health insurance coverage (either through a private provider or through the university program) as they would while attending classes. In addition, those who wish to do so may live on campus while on co-op. International students must obtain proper authorization from the Office of Global Services (OGS) (<http://www.northeastern.edu/ogs>) before engaging in or extending any period of co-op.

Co-op Scheduling Options

Northeastern provides the flexibility to pursue co-op and other experiential opportunities in a way that fits individual educational goals. Full-time undergraduates may complete up to three six-month co-ops in five years and as many as two six-month co-ops in four years at Northeastern. The design of some programs, such as pharmacy and theatre, requires four-month co-ops.

All co-op patterns share four semesters when students attend classes on a full-time basis: fall and spring terms of the first year, fall term of the second year, and final term of the senior year. In the first three terms, students have an opportunity to develop academic expertise as well as professional development skills. In the last term, students have an opportunity to integrate their in-class and experiential activities in a capstone course. Generally, half of the required course credit will be completed in these four terms.

The remaining half of the required course credit may be arranged in a variety of schedules that incorporate six-month co-op periods and full-time classes in full semesters and summer half semesters. Students may also elect to take courses (on-campus or online) during co-op periods or to complete extra course credit in some terms. Advisors assist students in developing plans of study that best fit the students' experiential learning goals and the requirements of majors/minors.

For better financial planning, students and parents should be aware that:

1. No tuition is charged while a student is on co-op only (although the student will pay room and board if he or she stays in the dorm).
2. If a student takes a class/earns academic credit while on co-op, tuition will be charged at the per-credit rate.
3. Financial aid will be distributed to match the student's academic program and tuition bills.

Co-op Eligibility

Every student must meet specific eligibility requirements to participate in co-op. These are general requirements for all students; however, students must work closely with their cooperative education coordinator to ensure that they meet any college- or major-specific requirements and are aware of major-specific logistics, deadlines, and required paperwork. In accordance with U.S. federal regulations, international students must not begin, extend, or resume any co-op experience without first receiving employment authorization from the OGS.

General Requirements

Students must:

- Take and pass a preparatory course before starting co-op.
- Satisfactorily complete the requirements and deadlines set by their specific co-op program.
- Register for co-op, either through their pattern of attendance or through a change in pattern of attendance, which must be approved by their cooperative education coordinator and academic advisor.
- Have received a Satisfactory (S) grade and have resolved any outstanding Incomplete (X or I) grades for previous co-ops. Students who have received an Unsatisfactory (U) grade must work with their cooperative education coordinator to reestablish eligibility in accordance with the policies and requirements of their program.
- Resolve any previous disciplinary or academic probation issues, or have their cooperative education coordinator approve a plan to resolve these issues, prior to being referred to co-op jobs.
- Have any self-developed co-op approved by their cooperative education coordinator before accepting the position.
- Comply with any preemployment checks required by the employer, such as drug testing, credit checks, physical examinations, security clearance, and criminal record checks.
- Participate in Title IX training, as required.

Academic Requirements

Students must:

- Be making satisfactory progress toward their degree as defined by the university, their colleges, and the curricula in their major programs.
- Have a cumulative 2.000 grade-point average to be eligible to go on domestic co-op or an international co-op at the time they apply for a co-op position.
- Students must be full-time while on co-op. Full-time status for co-op is defined as either:
 - one full-time co-op job,
 - two part-time co-op jobs, or
 - one part-time co-op job and half-time classes.

Transfer Students

Transfer students from other universities must have met the same requirements in their major's co-op program as nontransfers and must have completed at least one semester of classes before starting co-op. Students transferring from one major to another within Northeastern

must have completed the requisite courses and requirements as defined by their current major's co-op program.

Appeals Process

If students do not meet the co-op eligibility requirements and/or their cooperative education coordinator has determined they are ineligible to go on co-op, they may appeal to the director of cooperative education for their college. If the matter cannot be resolved informally, they may appeal the decision to the college academic standing committee.

Registering for Co-op

Students are registered for co-op based on the job placement in NUcareers. Registration into the co-op experience class occurs one month before the term of the co-op job. All co-op placements need to be approved by a co-op coordinator.

Co-op Documentation

Students who fully and successfully participate in co-op will receive a grade of Satisfactory; those who fail to complete their co-op assignment will receive a grade of Unsatisfactory. These grades will appear on the student's academic transcript. However, no academic credit is awarded for the completed co-op assignment.

Further Information

For more detailed information about co-op policies and procedures, see the *Cooperative Education Student Handbook*.

Research and Creative Activity

Website (<http://www.northeastern.edu/research>)

Pursuing research at the university level makes our students knowledge creators and develops their teamwork skills. The discipline of mind that research requires is one of the best ways to learn to think critically. With dozens of majors and minors, many interdisciplinary research centers and institutes, and more than six hundred full-time faculty engaged in active research and scholarship, Northeastern offers countless opportunities for students to apply their classroom learning to the process of discovery.

Undergraduate students can participate in research and creative activity in a variety of formats, including the following:

- Research courses, which generally fulfill major elective requirements
- Research co-ops or internships
- Community-based research
- Research-based activity as the option for work-study work
- Research as a volunteer activity
- Junior/senior honors research projects

Undergraduate students can apply for funding to support their research projects through the university-wide Provost Undergraduate Research and Creative Endeavor Program and from a number of other offices and programs. They often present their research findings at Northeastern's annual Research Expo, as well as at academic conferences and in scholarly journals.

Service-Learning

Website (<http://www.northeastern.edu/servicelearning>)

Community service is an integral part of Northeastern's mission. But more than good works, community service through structured

service-learning programs on our campus is an academically rigorous educational experience that allows students to broaden their knowledge and skills through service that supports our partnerships with Boston schools, neighborhood agencies, health clinics, and nonprofit organizations.

Students participate in organized service projects, coordinated by their professors and/or program directors, which meet needs identified by the community. Before, during, and after their service, students also engage in structured reflection to help them gain further insight into course or program content, a broader appreciation of their academic disciplines, and a greater sense of civic responsibility.

Global Experience

Website (<http://www.northeastern.edu/studyabroad>)

Marina Markot, PhD, Director

Global Experience Office
403 Richards Hall
617.373.5276
617.373.5702 (fax)
geo@northeastern.edu

Northeastern University strongly endorses global experience as an important dimension of learning. To foster this, it maintains a Global Experience Office (GEO) that has developed a series of programs tailored to the interests and needs of Northeastern University students. Global experiences provide students with opportunities to deepen their knowledge of the world and their chosen field of study, develop intercultural and political sensitivity, utilize and strengthen foreign language skills, and explore global career options.

International Study

While studying abroad in a Northeastern-sponsored program, students maintain full-time Northeastern status and earn Northeastern credits. In all cases, upon successful completion of a program, grades are calculated in the student's grade-point average (GPA). To participate in GEO programs, students should be in good academic and disciplinary standing and have no registration-blocking holds. Traditional study-abroad programs require a GPA of at least 2.500. Some programs may have additional eligibility criteria. Students must also meet the requirements of the host institution abroad. Full information and application deadlines are posted on the GEO website (<http://www.northeastern.edu/studyabroad>).

Students who wish to study abroad should start by researching program opportunities on the GEO website (<http://www.northeastern.edu/studyabroad>) or by attending an information session or walk-in advising hours. Students refine their search by working with GEO advisors who provide the final planning assistance. Schedules for information sessions and walk-in advising hours are available on the GEO website and in the GEO office. After choosing a program, students should also consult with their departmental or college advisors. International students should also consult with the Office of Global Services (OGS) (<http://www.northeastern.edu/ogs>) to determine if an updated I-20 for reentry may be needed. Note that studying abroad in a student's final semester may result in a delay in graduation due to calendar discrepancies across institutions.

Types of Programs

Northeastern University offers different types of study-abroad programs, with multiple options within each type. This robust program portfolio

contains global experiences for any major on campus. Students are able to participate in multiple programs during their time at Northeastern.

1. **Study abroad (semester or summer).** Students are based at a partner institution where they attend classes, participate in student activities, and organize their extracurricular schedules just as they would on campus at Northeastern. Some examples include University of Sydney in Sydney, Australia; Technion: Israel Institute of Technology in Haifa, Israel; University of Montevideo in Montevideo, Uruguay; London School of Economics in England, United Kingdom; and the University of Tokyo in Tokyo, Japan.
2. **Dialogue of Civilizations.** The Dialogue of Civilizations are faculty-led study-abroad programs that build upon and enhance the students' academic studies and training in Boston. The Dialogues allow students to engage with course content in different national, cultural, political, and social contexts. The programs foster meaningful conversations between Northeastern students and people around the world, including their peers.
3. **Internship.** These programs offer a combination of classes and related work experience for which students earn academic credit. Examples of internships students have held in the past include accounting at Morningstar in Sydney, Australia, as well as internships in various European parliaments such as Brussels, London, and Dublin.
4. **International research.** The focus of a student's time abroad is on an independent research project. In most cases, the study-abroad program organizes small group seminars and field trips that are designed to help students learn about their international environment and focus on a research topic. Students spend three to four weeks toward the end of the semester working on their individual projects. Examples of projects could be studying tropical biology in Costa Rica, history and culture in Vietnam, and oceanography while sailing in the Atlantic/Pacific cruise track of the SEA Semester Program.

Visit the GEO website (<http://www.northeastern.edu/studyabroad>) to see a complete list of program options.

Global Co-op

The Global Cooperative Education Program provides opportunities for Northeastern students to co-op on all seven continents with foreign and multinational employers, U.S. employers doing business abroad, and other international organizations. Students may apply for existing positions or work with a co-op counselor to develop their own. All majors are welcome to apply. International students participating in co-op abroad should consult with the OGS in advance of departure to ensure reentry to the United States in proper nonimmigrant visa status. The Presidential Global Scholars Program (<https://studentfinance.northeastern.edu/applying-for-aid/undergraduate/types-of-aid/scholarships/presidential-global-scholars-program>) provides financial support for international co-op.

World Languages Center

Stacey Bourns, PhD
Director

201 Renaissance Park
617.373.3131
s.bourns@northeastern.edu

The primary goal of the World Languages Center (WLC) is to offer an expanding array of languages in a variety of instructional formats for

Northeastern students and to ensure that students will be able to take at least two years of instruction (four semesters) in any language offered by the WLC and up to three years of instruction (six semesters) in many of the languages offered.

Placement Assessment

Students with prior experience in French, German, or Spanish must take the online written placement exam if they wish to enroll in a French, German, or Spanish language class. The link for this exam can be found on the WLC or the Languages, Literatures, and Cultures website. Students with prior experience in any other language must contact the WLC to make an appointment for a placement assessment interview. Results of a student's online placement or interview assessments are valid for one year only.

Any student with prior experience in a language who registers for a language course without taking the WLC online placement test or a WLC placement assessment will not receive a letter grade for the course.

Attendance in Language Classes

The development of competence in a language requires regular and structured interaction opportunities. Thus, the WLC takes attendance in language classes very seriously. Each missed class will have specific consequences, including a negative impact on a student's final grade. Classes missed as a result of registering late for a class will count as unexcused absences; if students believe they have been inappropriately placed in a language class, they should contact the WLC immediately.

Auditing Language Classes

Auditing language classes is not permitted. Students who are not on the official roster of a class may not sit in on the class.

Immersion Language Classes

The WLC offers off-campus language immersion classes in a variety of languages. These immersion classes are numbered 1301, 1302, 2301, 2302, 3301, and 3302 and are designed to be part of a faculty-led study trip. Typically, these classes are offered during summer 1 and summer 2 terms. These courses will count toward fulfillment of the BA language requirement, assuming a student receives a grade of C or better.

Study-Away/Abroad Classes

The WLC will authenticate credit-bearing language classes taken in study-away/abroad programs at accredited institutions in fulfillment of and as equivalent to WLC language classes numbered 1101, 1102, 2101, or 2102. Students must receive approval of language course equivalence from the WLC before embarking on a study-away/abroad program. Failure to do so may mean that the courses taken away/abroad will not be accepted in lieu of on-site Northeastern language courses and thus may not satisfy the language requirement. Credit is granted only for successful completion of the course.

BSIB Language Classes

The Bachelor of Science in International Business program is offered through the D'Amore-McKim School of Business. Because of the intensive expectations of the program (one semester in classes abroad, one semester international co-op), the WLC offers classes that are restricted to BSIB students only. These courses are numbered 1201, 1202, 2201, 2202, 3201, 3202, 4201, and 4202. Only BSIB majors may enroll in these BSIB-designated courses.

University Scholars Program

Jonna Iacono, PhD

Director

411 Richards Hall
617.373.3202
617.373.6597 (fax)
universityscholars@northeastern.edu

Launched in fall 2012, the Northeastern University Scholars Program is a full-tuition scholarship program offered to a limited number of students. Individuals invited to join this program have distinguished themselves academically; displayed an entrepreneurial approach to study, achievement, involvement, and life; and have demonstrated curiosity and creativity that extend far beyond the classroom to impact the world around them. The program is intended to meet the interests of students who demand to be challenged, are passionate about learning, and will innovate when given the freedom to explore.

University Honors Program

Laurie Kramer, PhD
Director

150 Richards Hall
617.373.2333
617.373.5300 (fax)
honors@northeastern.edu

The University Honors Program values integrated, student-directed, and experiential learning that is personalized to meet students' unique interests and goals. Our community of intellectually engaged students, advisors, and faculty are committed to making a difference at home and in the world. Students benefit from unique and enriched educational options that include stimulating courses and opportunities for global exploration, research and creative endeavors, service-learning, mentoring, and more. Honors students are guided and supported as they chart their unique educational plans through personalized advising and through their participation in a set of networked communities that include Honors Living Learning Communities.

All applicants seeking freshman entry at Northeastern University (for fall semester entry) are considered for admission into the University Honors Program and are notified of their selection in their letter of admission. There is no separate application. Continuing students in their first or second semester who wish to be considered for the University Honors Program may consult the program's website for instructions on how to apply: www.northeastern.edu/honors (<http://www.northeastern.edu/honors>).

Northeastern Explore Program

Website (<http://www.northeastern.edu/undeclared>)

Kim Irmiter, MA
Director

1 Meserve Hall
617.373.2306

The Northeastern Explore Program welcomes entering students who would like to explore their academic interests before choosing a major and introduces them to the university's broad range of disciplines. Working closely with a combination of faculty, academic advisors, and undergraduate peer mentors, undeclared students at Northeastern are engaged in personal and meaningful discovery. They are not just

seeking a major; they look for clues to the future and find answers to the question: "How will I make my impact?"

Undeclared students enroll in a small-cohort freshman seminar taught by a Northeastern academic advisor and two student leaders. In this seminar, students develop strategic exploration plans to ensure they are able to take full advantage of the vast array of academic and experiential opportunities offered at Northeastern. Students will also attend exploratory programs where they engage with faculty and students in majors to gain an informed understanding of the disciplines that interest them most.

Students may declare a major at any time but are expected to do so by the end of sophomore year. Admission to a particular major is dependent on satisfying the criteria described under "Changing Majors (p. 32)."

Premedical and Other Preprofessional Health Career Preparation

Website (<http://www.northeastern.edu/prehealth>)

Prehealth Studies

Because medical schools place a priority on well-rounded achievement, the prehealth course requirements can be integrated into any major at Northeastern. Medical school admission committees generally give no preference to any particular undergraduate major. As such, students should focus on meeting the course requirements of their chosen field of study, together with the prehealth professions requirements, with demonstrated academic rigor and excellence. For some majors it may be necessary to complete additional credit hours of course work, with associated tuition, to fulfill all prehealth requirements. Prehealth students should research requirements and plan a program of study as early as possible in consultation with both major and prehealth advisors to ensure that requirements will be completed in a timely fashion.

The PreHealth Advising Program provides support for Northeastern students who are planning to pursue doctoral-level training in medicine, including allopathic medicine (MD), dentistry, optometry, osteopathic medicine, podiatric medicine, and veterinary medicine.

Prerequisite Courses

Most health professional schools require a common set of courses. The following program meets the minimum requirements of most health professional programs. Students should work with prehealth advisors to review their course selections.

Note: Corequisite laboratories are required for most science courses.

BIOLOGY

Introductory biology (typically two semesters)

The following course work is required or recommended by many programs and necessary for MCAT preparation:

- Genetics and molecular biology
- Biochemistry

Additional biology courses are required or recommended by many programs and may be helpful for admission exam preparation.

CHEMISTRY

- General chemistry
- Organic chemistry

PHYSICS

Two semesters

MATHEMATICS

Two semesters of calculus and/or statistics

ENGLISH

Two semesters

Some programs require both writing and literature courses.

BEHAVIORAL SCIENCES

The following course work is required or recommended by many programs and necessary for MCAT preparation:

One semester each of psychology and sociology

Additional courses may be required or recommended by individual schools or programs. Students should refer to school websites as well as the appropriate official admission guidebooks for up-to-date information:

- ADEA Official Guide to Dental Schools (<http://www.adea.org>)
- College Information Book (<http://www.aacom.org>)
- Colleges of Podiatric Medicine Admissions Requirements (<http://www.aacpm.org>)
- Medical School Admissions Requirements (<http://www.aamc.org>)
- Schools and Colleges of Optometry Admissions Requirements (<http://www.opted.org>)
- Veterinary Medical School Admissions Requirements (<http://www.aavmc.org>)

Prelaw Preparation

Website (<http://www.northeastern.edu/prelaw>)

Northeastern University adopts in full the statement of the American Bar Association on the "Preparing for Law School (<http://www.abanet.org/legaled/prelaw/prep.html>)" page of its website. Most law school admission committees give no preference to any particular undergraduate major.

The primary goal of the Prelaw Program at Northeastern is to assist current students, staff, and alumni in navigating the law school application process. This includes identifying and researching a variety of law schools to which the person may want to apply. For current Northeastern students, the Prelaw Program provides academic advising that guides course selection and activities aimed at maximizing the student's chance of being admitted to law school. These courses must have at least one, and preferably more, core skills and values, such as analytic/problem-solving skills, critical reading, writing skills, oral communication/listening abilities, general research skills, task organization/management skills, public service, and promotion of justice.

Education

Website (<http://www.cps.neu.edu/discover/schools-institutes/school-of-education.php>)

Lydia Young, PhD

Interim Associate Dean, Academic and Faculty Affairs,
Graduate School of Education

41 Belvidere
617.373.4216
617.373.6600 (fax)

Lydia Young, Associate Dean, l.young@northeastern.edu

Northeastern University's Department of Education offers a Master of Arts in Teaching (MAT) PlusOne program. The program provides a pathway for undergraduate students in the College of Arts, Media and Design; College of Science; and College of Social Sciences and Humanities who aspire to be elementary or secondary classroom teachers.

Programs

Dual Degree

- MAT PlusOne Program (p. 46)

Teaching, MAT PlusOne Program

The Master of Arts in Teaching (MAT) PlusOne program provides a pathway for undergraduate students in the College of Arts, Media and Design; College of Science; and College of Social Sciences and Humanities who aspire to be elementary (1–6) or secondary (8–12) classroom teachers. Undergraduates in majors that align with approved areas of educator licensure can complete their bachelor's degree in four years and earn a Master of Arts in Teaching in just one additional year. In consultation with their advisor, undergraduates may complete up to 12 semester hours of MAT course work and apply these credits toward their bachelor's degree. This partnership between the colleges and the Graduate School of Education leads to initial licensure, as approved by the Massachusetts Department of Elementary and Secondary Education (DESE).

Interested students must express their interest and submit admissions materials by March 1st during their third year. To apply, you do not have to submit a full application. However, to qualify you must:

- Be enrolled in an appropriate major
- Plan in consultation with advisor and Graduate School of Education lead faculty
- Apply to the PlusOne MAT during your third year
 - Submit a statement of purpose
 - Provide a letter of recommendation from a faculty member
- Hold an overall GPA of 3.000 or higher
- Earn a B or higher in Education in the Community (EDUC 1111), Child and Adolescent Development, Learning, and Teaching (EDUC 5504), Inclusion, Equity, and Diversity (EDUC 5570), and Culture, Equity, Power, and Influence (EDUC 5503)
- Take and pass *all* required MTEs by early March of your fourth year

Please contact your undergraduate advisor to learn more about this opportunity.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

Requirements

Complete all education courses with a cumulative GPA of 3.000:

Code	Title	Hours
EDUC 1111	Education in the Community	4
EDUC 1111 should be taken no later than the first semester of the third year		
EDUC 5503	Culture, Equity, Power, and Influence	4
EDUC 5504	Child and Adolescent Development, Learning, and Teaching	4
EDUC 5570	Inclusion, Equity, and Diversity	4
A required education or education-related co-op		

Army, Air Force, and Navy Reserve Officers' Training Corps (ROTC) Programs

Army ROTC Program

Major Joseph L. Luchetta
Professor and Chair, Department of Military Science

335A Huntington Avenue
617.373.2375
617.373.8677 (fax)
Army ROTC website (<http://www.rotc.neu.edu>)
Sheila Hutchins, ROTC Staff Assistant, s.hutchins@northeastern.edu

The Department of Military Science offers the Army Reserve Officers' Training Corps (ROTC) program. The goal of the program is to develop leadership potential in men and women and to prepare them for an officer's commission in the Active Army, Army Reserve, or Army National Guard. The curriculum teaches principles of leadership and personnel management and seeks to develop leadership traits such as teamwork, responsibility, initiative, self-confidence, and discipline.

The Army ROTC program is conducted at Northeastern University. For more information, write:

Department of Military Science
Northeastern University
335A Huntington Avenue
Boston, MA 02115

or call 617.373.2375

Completion of the Army ROTC program will lead to a commission as a second lieutenant in the United States Army, Army Reserve, or the Army National Guard. The program consists of the basic course (freshman and sophomore years) and advanced course (junior and senior years). The program does not conflict with co-op schedules.

Enrollment in the basic course is voluntary and is open to all full-time students. However, only cadets formally enrolled in ROTC may participate in leadership labs, physical training, and practical field exercises. Students in the basic course do not incur a military obligation. Check with your academic department to ensure credits are accepted.

The advanced course is open to all qualified students who have basic course credit or equivalent military experience, as well as meet the Army's physical, medical, and age requirements. Contracted students (advanced course and/or scholarship) receive a monthly cash stipend while in school. Scholarship students also receive full tuition and fees as well as \$1,200 per year for books. Scholarships are merit based and are awarded as four-year, three-year, or two-year benefit packages.

Army Nurse Corps ROTC Program

ROTC provides an opportunity for college nursing students to receive practical, hands-on leadership experience. The courses provide a chance for students to develop management, communication, and decision-making skills. ROTC also provides nursing cadets an opportunity to participate in the Nurse Summer Training Program (NSTP). NSTP is a paid, three-to-four-week, hands-on clinical elective for Army ROTC nurse cadets. This elective is conducted at more than twenty Army hospitals in the continental United States, Hawaii, and Germany. During the NSTP clinical elective, the cadet receives experience under the direct supervision of a preceptor—an Army Nurse Corps officer who works with the cadet one-on-one. Scholarship nurse cadets receive a monthly cash stipend while in school as well as full tuition and fees and \$1,200 per year for books.

Navy ROTC Program

The Boston Navy ROTC (<https://www.bu.edu/rotc/navy/contact>) unit is a six-school consortium that includes students from Boston University, Boston College, Northeastern, Tufts, Harvard, and MIT. All Navy ROTC scholarships are for nursing only and cover full tuition, mandatory fees, a \$375-per-semester book stipend, and a \$250-per-month living stipend that increases by \$50 each year up to \$400. Room and board are not included in the scholarship. For students on Northeastern's five-year program, the Navy grants "Fifth Year Benefits," which mirror those of the fourth year. Upon graduation, there is a four-year active-duty commitment.

NROTC nursing students are required to take four naval science classes, in addition to their regular course work, and attend a leadership laboratory once a week. All classes, labs, and group workouts are conducted at Boston University. Students typically spend a total of six to eight hours per week participating in NROTC-related activities. Additionally, Navy nurses complete two summer cruises, or training sessions, prior to graduation, each of which lasts approximately four weeks. They spend one session with a medical unit at sea (on a Navy ship) and one session at a land-based Navy hospital. All lodging, transportation, meals, and uniforms are paid for by the Navy during summer training sessions. For more information, contact the recruiting officer at 617.358.3470 or navyrotc@bu.edu.

Air Force ROTC Program

Air Force ROTC is an educational and leadership program designed to give men and women the opportunity to become an Air Force officer while completing a bachelor's degree.

Through a cross-enrolled program with Boston University, interested Northeastern University students may participate in the Air Force Reserve Officer Training Corps Program. The requirements include aerospace studies classes, leadership laboratory classes, and physical fitness training. The mandatory weekly commitments range from five to seven hours per week.

In addition to the leadership and management training that cadets receive, they also benefit from several scholarship programs. *High school seniors* can apply for four-year scholarships. The scholarships range from full tuition, \$18,000 per year, and \$9,000 per year. Scholarship winners will also receive a monthly stipend, a book allowance, and uniforms. Applications for scholarships are due by December 1 of senior year. Apply at the Air Force ROTC website (<http://www.AFROTC.com>).

Freshmen and sophomores already in college can compete for three or three-and-a-half-year scholarships, some of which cover full tuition, while

others cover \$18,000 per academic year. All scholarship winners will receive a monthly stipend, a book allowance, and uniforms.

However, students do not need a scholarship to commission through Air Force ROTC. For more information, call 617.353.6316 or 617.353.4705.

General Studies Program

Website (<http://www.northeastern.edu/gsp>)

Lynn Dornink, MA

Director

1 Meserve Hall

617.373.2306

The General Studies Program (GSP) is a full-year program for entering freshmen, offering a unique learning environment where faculty, advisors, and peer leaders provide guidance and support to ensure the students' academic success. The GSP curriculum satisfies first-year academic requirements and is geared to students' academic and career goals. Program benefits include a low student-advisor ratio, fall and spring critical-thinking seminars taught by the student's GSP advisor, a learning community organizational model, a writing-intensive curriculum, and access to a nationally certified peer tutoring program. All majors have defined entrance requirements; therefore, beginning in September, GSP advisors work closely with students to guide them toward their intended majors' requirements. Following the successful completion of the General Studies year, and the meeting of the major requirements, students enter one of the university's seven undergraduate colleges with sophomore status in a specified major. Students may also choose to enter the Program for Undeclared Students with sophomore status. GSP students who have not met the academic progression standards for transitioning by the end of two semesters may continue in the GSP for an additional semester.

Academic Progression Standards

GSP students must meet the following criteria to successfully transition to sophomore standing:

1. 2.000 GPA (individual program entrance requirements vary)
2. 28 semester hours of credit (32 recommended)
3. Successful completion of college/major transition requirements

For more details about transitioning to individual colleges, see below.

Transitioning to Major

For information about transitioning to majors across the university, see "Changing Majors (p. 32)."

Academic Probation

Same as university standards.

University Withdrawal, Low Scholastic Performance

Same as university standards.

About Sample Curricula

The university's official repository of curricular information is this undergraduate catalog in conjunction with the Degree Audit Reporting System. In case of discrepancy, the Degree Audit Reporting System shall take precedence. All curricula are approved through the university undergraduate curriculum committee. Undergraduate students should

consult with their academic advising office to make certain they have all the necessary resources before planning a curriculum.

work at least 12 hours per week to earn academic credit for an internship in a term, as equated to the course credit guidelines.

Undergraduate Degrees

Listed below are the degrees conferred by the undergraduate full-time day colleges at Northeastern University.

College of Arts, Media and Design

- Bachelor of Arts
- Bachelor of Fine Arts
- Bachelor of Landscape Architecture
- Bachelor of Science

D'Amore-McKim School of Business

- Bachelor of Science in Business Administration
- Bachelor of Science in International Business
- Bachelor of Science (combined majors only)

College of Computer and Information Science

- Bachelor of Arts in Computer Science
- Bachelor of Science in Computer Science
- Bachelor of Science in Data Science
- Bachelor of Science in Information Science
- Bachelor of Science (combined majors only)

College of Engineering

- Bachelor of Science in Bioengineering
- Bachelor of Science in Chemical Engineering
- Bachelor of Science in Civil Engineering
- Bachelor of Science in Computer Engineering
- Bachelor of Science in Electrical Engineering
- Bachelor of Science in Environmental Engineering
- Bachelor of Science in Industrial Engineering
- Bachelor of Science in Mechanical Engineering

Bouvé College of Health Sciences

- Bachelor of Science
- Bachelor of Science in Nursing
- Bachelor of Science in Rehabilitation Science
- Doctor of Pharmacy (six-year program)
- Doctor of Physical Therapy (six-year program)

College of Science

- Bachelor of Arts
- Bachelor of Science

College of Social Sciences and Humanities

- Bachelor of Arts
- Bachelor of Science

Undergraduate Internships

An undergraduate Internship is defined as an unpaid opportunity for supervised practical experience related to the student's academic area of study. Internships must be correlated to program curriculum, approved by an academic entity, and supervised by a faculty member. Students must

camd@northeastern.edu (camdadvising@northeastern.edu)

In today's global economy, the disciplines within the College of Arts, Media and Design are powerful drivers of growth and innovation. Creative fields and evolving technology make it possible to connect people and ideas as never before, serving as strong catalysts for change and expanding the understanding of our shared humanity.

The college integrates programs of study in architecture, art and design, communication studies, game design, journalism, media and screen studies, music, and theatre with meaningful experiential learning opportunities, enabling students to explore their passions and prepare for postgraduate opportunities in their chosen fields.

The college offers Bachelor of Arts, Bachelor of Science, and Bachelor of Fine Arts degrees in a number of majors, as well as interdisciplinary programs, and emphasizes general education through the NU Core. Opportunities available to students in the College of Arts, Media and Design include national and international programs for study and experience; programs in field settings, both local and abroad; and programs involving affiliations in such areas as professional performing arts organizations and media organizations. The college also emphasizes experiential learning through cooperative education; service-learning; and other kinds of internships, student-faculty research collaborations, and study abroad.

Students may choose a four- or five-year experiential learning plan in most programs. Either plan offers co-op opportunities, typically in an area related to the student's chosen academic area. Students are normally eligible to participate in co-op as early as the second semester of their sophomore year.

Many programs are flexible enough to allow students to pursue a double major, a major and a minor, or one of the college's combined majors. The college also offers students the opportunity to create an independent major in cases where their interests and goals are not met by an existing major program.

Academic Advising

The College of Arts, Media and Design has an academic advising (<https://camd.northeastern.edu/academics/advising>) system that consists of academic advisors located in the Academic Advising and Cooperative Education office in 100 Meserve Hall and faculty mentors located in the college's academic schools and departments. Detailed advising information is available on the college website (<https://camd.northeastern.edu/academics/advising>). Prelaw advising (<http://www.northeastern.edu/prelaw>) and premedical/pre dental advising

(<http://www.northeastern.edu/prehealth>) are also available. We can be reached by phone at 617.373.5583, by fax at 617.373.8719, or by email at camdadvising@northeastern.edu.

Academic Progression Standards

The College of Arts, Media and Design adheres to the university's academic progression standards (p. 31). Some programs have additional specific requirements in order to progress from year to year or to graduate from that program. This information can be found on each program's page.

Graduation Clearance Process

Students in the College of Arts, Media and Design are required to meet with their assigned academic advisor in 100 Meserve Hall to determine their remaining graduation requirements. Some departments also require a meeting with a faculty mentor. The graduation clearance (<https://camd.northeastern.edu/academics/advising/faq/#clearance>) process should be completed in the junior year to facilitate planning of all remaining requirements.

College Requirements

All students in the College of Arts, Media and Design must successfully complete the university requirements of NUPATH (p. 37). In addition, students pursuing a Bachelor of Arts degree (BA) must fulfill the BA requirements (p. 40).

School of Architecture

Website (<http://camd.northeastern.edu/architecture>)

Dan Adams

Director and Associate Professor
da.adams@northeastern.edu

Kate Zephir

Administrative Assistant
k.zephir@northeastern.edu

151 Ryder Hall
 617.373.4637

Architecture and urban landscape are the context for civic life. In an age of increasingly rapid technological and social change, these fields forge connections between our past and our future. This involves critical thinking about many complex contemporary issues, such as the relationship of public and private life, the interaction between formal and political ideas in cities, and the role of technology in the design, construction, and management of contemporary spaces. Because the process of design involves the synthesis of disparate elements, it can also translate into strategies for approaching a wide range of other problems not traditionally understood to be "architecture." At Northeastern, we connect specific problem solving inherent to architectural and landscape architectural understanding with the larger context of contemporary cities.

The curriculum teaches students to conceptualize, synthesize, and represent complex architectural, urban, and environmental issues. The program focuses on core skills and critical thinking as preparation for both professional practice and advanced study. The curriculum in the design studio encompasses two major themes: First, the studio projects

focus on the art of building and environmental performance, and second, the projects explore how designed environments—from buildings to regional infrastructures—affect urban conditions. The art of building includes the study of construction and technology, as well as the cultural messages created by the expression of material, structure, and form. Environmental performance includes imagining how we can live more sustainably by developing innovative design solutions for synthesizing natural and urban conditions. The contemporary city is our laboratory. This urban focus requires that students integrate their own creative impulses with the future of the society of which they will be a part. By building on the practical and technical training afforded by co-op to develop core professional skills, the curriculum focuses on architecture and landscape architecture's fundamental aesthetic, technological, social, and political aspects.

With the effective synthesis of the art of building and environmental performance with urban issues, Northeastern's programs in architecture and urban landscape are becoming a leader in identifying opportunities for civic representation, urban development, and neighborhood design. Northeastern's students are in demand because of their combination of professional competence and fluency in urban architectural and environmental design issues. There are opportunities for interdisciplinary cooperation in urban-oriented research and creative work in areas such as the economics of urban redevelopment; the design and planning of resilient food, water, energy, transit, and industrial systems; urban public policy; and new forms of spatial and visual communication. Additionally, Northeastern's urban focus is applied globally in the semester abroad.

External Transfers

Full-time architecture faculty members may evaluate nonstudio courses for conformity with NU requirements using transcripts and course descriptions. Any student seeking studio course credit (drawing, technology, or design) must present a portfolio for review and evaluation.

Portfolios are optional, though encouraged, for freshman applicants.

Academic Progression Standards

A minimum grade-point average (GPA) of 2.500 is required to remain in the majors of architecture or urban landscape. Students below this average will not be allowed to continue in these majors.

A minimum GPA of 2.000 is required to remain in the major of architectural studies. Students below this average will not be allowed to continue in the major.

To graduate, a student must have a 2.500 GPA in architecture or urban landscape.

Preapproved Template Programs in Architecture and in Urban Landscape

The School of Architecture offers preapproved template programs in architecture and in urban landscape. Each template program may be paired with another preapproved template program to create a combined major; to see a list of current preapproved template programs, visit the combined majors webpage (<https://registrar.northeastern.edu/article/combined-majors>).

Students may request admission to such a combined major via the Combined Major Approval form (<http://www.northeastern.edu/registrar/form-maj-comb.pdf>), which requires approval by both disciplines/colleges together with an approved curriculum. For additional information on preapproved template programs, see "Student-Requested Combined Major (p. 33)." For template program requirements, visit the

myNortheastern web portal (<http://www.myneu.neu.edu>), click on the "Self-Service" tab, then on "My Degree Audit."

Programs

Bachelor of Science (BS)

- Architecture (p. 50)

- Urban Landscape Studies (p. 59)

Architecture, BS

Website (<https://camd.northeastern.edu/architecture/academic-programs/architecture>)

Undergraduate Program Coordinator

Lucy Maulsby, PhD
Associate Professor
l.maulsby@northeastern.edu
383 Ryder Hall

The curriculum pairs studio courses with relevant architecture history and technology courses to support the comprehensive learning experience of the student. Students engage in intensive studio projects that encourage them to seek prototypical solutions to problems in the modern city. Instruction takes place in the studio with one-on-one consultations with faculty, critiques with classmates, and formal reviews. Visiting critics participate in reviews, and there is a lecture series that brings prominent professionals on campus to discuss the work they are doing in the field.

As part of their studies, students are enrolled in two six-month co-ops (<https://camd.northeastern.edu/architecture/experiential-learning-co-op/co-op>). This allows students to gain real-world experience in architecture that aids them in both their academic development and in professional advancement. Co-op experience can often be applied to one's AXP (<http://www.ncarb.org/Experience-Through-Internships.aspx>) credits.

The School of Architecture offers a NAAB (<http://www.naab.org>)-accredited one-year program to our students who have successfully completed the BS degree in architecture. This allows our own students to achieve a master's degree in an efficient and timely manner.

Applicants should note that the BS degree in architecture is not sufficient by itself to meet the academic requirement to sit for state licensure. (Most undergraduate architecture degrees are not accredited.) Students who graduate with the BS degree have the option to apply to the one-year NAAB-accredited Master of Architecture (<https://camd.northeastern.edu/architecture/academics/graduate>) degree that is open to our BS graduates in good standing.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond

specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

NUPath attributes Natural and Designed World (ND), Creative Expression and Innovation (EI), Interpreting Culture (IC), Formal and Quantitative Reasoning (FQ), Societies and Institutions (SI), Analyzing and Using Data (AD), and Difference and Diversity (DD) are met through the major course requirements.

In order to graduate, students must complete Ethical Reasoning (ER) in their electives.

Architecture Major Requirements

Code	Title	Hours

Cooperative Education

Architecture majors are required to complete two six-month co-ops.

COOP 3945	Co-op Work Experience
-----------	-----------------------

Important Note

When registering for classes, note additional electives are required. If you are taking less than 18 semester hours during fall or spring semesters, verify with your advisor that you have registered for all required electives.

Major GPA Requirement

Minimum 2.500 GPA required

Architecture Major Credit Requirement

Complete 96 semester hours in the major.

Program Requirement

146 total semester hours required

Architectural Studies, BS

Website (<https://camd.northeastern.edu/architecture/academic-programs/bs-architectural-studies>)

Undergraduate Program Coordinator

Amanda Lawrence, PhD
Associate Professor
am.lawrence@northeastern.edu
377 Ryder Hall

The Bachelor of Science in Architectural Studies teaches students the rigorous design methods of architecture while also offering a flexible curriculum focused on key contemporary topics related to the

built environment. After a common sequence of design, history, and technology courses, students may choose from a rich array of electives in the School of Architecture and throughout the university. The culmination of the major is a single capstone course required for all students.

Students will emerge with a strong portfolio, a foundational grounding in architectural design, and will be well equipped for further graduate education or work experience in design-related fields and creative industries. The Bachelor of Science in Architectural Studies can be completed in four years. Students in this major participate in one six-month co-op and have the option of a second four-month summer co-op. Students also have the option to study abroad for a semester.

Students may choose from one of three areas of emphasis—real estate; sustainability; or history, theory, and culture—or work with the department to put together a customized plan of study.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

NUpath Requirements Natural and Designed World (ND), Creative Expression/Innovation (EI), Interpreting Culture (IC), Societies and Institutions (SI), and Difference and Diversity (DD) are met through the major course requirements.

NUpath Requirements Formal and Quantitative Reasoning (FQ), Analyzing and Using Data (AD), and Ethical Reasoning (ER) must be met through electives.

Landscape Architecture, BLA

website (<https://camd.northeastern.edu/architecture/academic-programs/architecture-urban-landscape>)

Undergraduate Program Coordinator

Nicholas Brown, PhD
Associate Teaching Professor
nic.brown@northeastern.edu
539 Holmes Hall

Northeastern University offers a Bachelor of Liberal Arts in Urban Landscape. This new major reflects a growing public interest in making our cities more sustainable and in bringing the insights of landscape architects to join those of urban designers and architects. This hybrid field has deep roots in design, ecology, planning, and aesthetics. In the past 15 years, it has come to play an evermore important role in the design of new places, as well as the retrofitting of our older, postindustrial landscapes. An inherently interdisciplinary program, urban landscape will involve collaborations with other academic units on campus.

Major Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

NUpath requirements Natural and Designed World (ND), Creative Expression/Innovation (EI), Interpreting Culture (IC), Formal and Quantitative Reasoning (FQ), Societies and Institutions (SI), Analyzing and Using Data (AD), and Difference and Diversity (DD) are met through the major course requirements.

NUpath requirement Ethical Reasoning (ER) must be met through general electives.

Architecture and Graphic and Information Design, BS

The School of Architecture and the Department of Art + Design offer a combined major in architecture and graphic and information design. Students interested in the combined major connect specific problem solving inherent to architectural understanding with the larger context of contemporary cities. They learn to conceptualize, synthesize, and represent complex architectural, urban, and environmental issues. Students combine this knowledge with the design of message and meaning, integrating text and image to visualize concepts and data to enhance human understanding of complex and vital knowledge.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

NUpath attributes Natural and Designed World (ND), Creative Expression and Innovation (EI), Interpreting Culture (IC), Societies and Institutions (SI), and Difference and Diversity (DD) are met through the major course requirements.

In order to graduate, students must complete Formal and Quantitative Reasoning (FQ), Analyzing and Using Data (AD), and Ethical Reasoning (ER) in their electives.

Architectural and Urban History, Minor

Website (<https://camd.northeastern.edu/architecture/academic-programs/architectural-history>)

The four-course minor introduces students to the study of architectural history, paying particular attention to the relationship between buildings and their larger urban, cultural, economic, and social environments. The minor includes one general survey class that covers a variety of different cultures and geographic contexts over time. Students may then choose from a suite of architectural history courses to fulfill the remaining 12 credits of this minor.

Please note: This minor is not available to students in the BS in architecture or BS in architectural studies major. BLA in landscape architecture students may double count at most one course with this minor.

Minor Requirements

Note: This minor is not available to students in the BS in architecture or BS in architectural studies major. BLA in landscape architecture students may double count at most one course with this minor.

Required Courses

Urban Landscape Studies, Minor

Website (<https://camd.northeastern.edu/architecture/academic-programs/urban-landscape-studies>)

The minor in urban landscape studies has two tracks, one for architecture majors and a second for students from other disciplines. The minor introduces fundamental design and management of sustainable urban environments, as well as an overview of historical and contemporary issues in urban landscape.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Nhora Delgado, Administrative Assistant, n.delgado@northeastern.edu

Art makes life meaningful. Design makes life possible. Together they make life wonderful. The work of artists and designers informs and forms cultures, benefits society, and empowers the global marketplace of ideas. The faculty in the Department of Art + Design seeks to prepare students for a rich and rewarding life making a significant difference in the lives of others. We study the fundamentals of knowing, thinking, making, and doing; you have an opportunity to learn to use ideas and influences, tools and techniques, and principles and processes of art and design. We provide a faculty, format, and facilities for a great experiential education in art and design within a major urban research university. You pursue your curiosity about, intentions toward, and obligations to the evolving world. Summer programs in Iceland, Ireland, Venice, Rome, Berlin, Budapest, Cuba, and Ecuador offer intensive studio experiences to augment your study with travel and creative work in the context of other cultures.

Whether you are studying design, media art, or game design, the Department of Art + Design seeks to cultivate your talents as a source of original ideas and expressions of an inner life, using classical, current, and emerging media. You are inspired and challenged to create powerful new works. You will gain visual literacy and fluency with professional art, design, and game design practices in the context of a liberal arts education. You can be transformed into a creative force, ready to realize your potential and create cultural value and social benefit.

Art, BA

A studio-based fine art program that offers a broad and deep exploration of what it means to be culturally aware, skilled, and productive, the Bachelor of Arts in Art balances studio courses in drawing/painting and digital media with art history and visual studies. Students' education, experience, and training in understanding cultural practices take full advantage of the remarkable scope of the College of Arts, Media and Design. The focus of obtaining a well-rounded liberal arts education, within a broad study of the arts and humanities, is complemented by the study of a language and its cultural context and knowledge in the natural, physical, and social sciences. Some courses in this program are offered in Ireland, a cultural treasure house amid natural splendor, where students have an intensive and immersive experience. There, students make art in their own studios in an art school equipped with all the tools and resources an artist requires. Most important, ample elective choices include study-abroad programs and span the complete range of offerings of our college.

The concentration in visual studies incorporates art and design history with a cultural study of seeing. Understanding vision to be as much a product of lived culture and a phenomenon that is as dynamic, creative, and social as it is physical and biological, visual studies explores differing ways to interpret the visible world that surrounds us. Students are exposed to the history and theory of the visual arts and visual experience as they address connections between topics as wide-ranging

as Leonardo da Vinci's *Mona Lisa* and the computer interface used in Apple's *Lisa*. Visual studies seeks to develop critical insight into, and understanding of, what is seen.

The **Bachelor of Arts in Art** is offered with a concentration in visual studies or without a concentration.

Design, BFA

Design is the practice-based discipline raising important questions about—and providing significant answers to—how we live. Designers are needed when we don't know what is needed. Designers propose alternative futures and create new choices using design principles and processes to create, compose, and construct meaning in diverse knowledge fields. Designers seek a broad understanding of principles and systems of perception, communication, and action. Concentrations in design practices are graphic and information design, interaction design, and experience design.

Graphic design makes messages and meaning using visual form and the integration of text and image. It often has a persuasive intention and uses rules of visual composition, form, and pattern to enable storytelling or to create attention and an ambiance for consideration. Information design focuses on visualizing concepts and data to enhance human understanding of complex and vital knowledge.

Interaction design focuses on the creation of navigable interfaces and systems that allow audiences to achieve meaningful goals, connecting people to people and people to information and environments.

Experience design is a holistic approach that utilizes investigation into human environments in specific situations to improve quality. Given an understanding of goals, needs, and desires, it seeks to improve the various contexts by identifying and studying events and how they can be turned into beneficial practices.

As intensive studio programs, the curricula balance theory and design history and theory with studio projects in all media. As a design analyst, inventor, interpreter, curator, and producer of information, interaction, and experience, students can integrate many facets of university and liberal arts education.

The **Bachelor of Fine Arts in Design** is offered with the following concentration options: experience design, interaction design, or graphic and information design.

Games, BFA

The Bachelor of Fine Arts in Games seeks to give students the skills to communicate ideas and emotions through interactive media. The focus of the BFA degree is to explore games as an aesthetic and expressive form through critical analysis and creative, reflective practice. To reflect emerging trends in the video game industry, including broader platforms and audiences and more distribution channels, students will be oriented toward developing games and playful media in an independent creative context, preparing graduates to become leaders within a growing segment of the game industry. Curriculum is geared to cultivating the students' own unique creative voice through courses that apply theory analysis to game-making practice across a wide range of media. Students are exposed to a wide variety of genres and contexts, as well as different ways of thinking about games content, platforms, and production. BFA in games majors will have a minimum of four games courses in which they interact with and collaborate with students in the BS in computer science and game development major.

Media Arts, BFA

The continuing revolution in digital computing and global communications has produced a rapidly evolving field for artists who create experiences of image and form with computer screens, intelligent devices, and new materials. Artists also invent tools for exploring, creating, and distributing their ideas and works. Media arts practices of animation, game, game art, photography, and video arts are offered with variations yet to be invented.

Courses in imaginative and narrative arts, required for professional work in documentary films, game art and promotion, visualization, motion graphics, interactive art, illustration, and short animated film are offered. An intensive studio program, the curriculum provides knowledge, experience, and techniques of media arts informed by theory, experimentation, and critique. Extensive digital imaging and interactive media editing and production facilities offer the opportunity to become highly proficient in the current skills and emerging practices necessary for remarkable work. The media arts are evolving and expanding their reach into culture and society in daily life and global experience. The revolutions in 3-D printing, embedded devices, and robotics are changing the landscape in which the media artist will operate. This degree prepares students to meet the challenges of continuous change with adaptive ingenuity.

The **Bachelor of Fine Arts in Media Arts** is offered without a concentration or with the following concentration options: animation, photography, or video arts.

Studio Art, BFA

The Bachelor of Fine Arts in Studio Art is offered in partnership with the School of the Museum of Fine Arts at Tufts University (SMFA at Tufts) (<https://smfa.tufts.edu>), adjacent to the Northeastern campus. In this major, the studio art classes are taken at the SMFA at Tufts, which permits students to explore a wide range of artistic media including ceramics, drawing, film, glasswork, metalsmith, painting, performance, print and paper, sculpture, and sound in their extensive studio environments. Art and design history courses are taken in the department. In addition, students have access to all the elective courses, co-op, study-abroad programs, technology, and student resources that Northeastern students experience.

The **Bachelor of Fine Arts in Studio Art** degree is awarded by Northeastern.

Preapproved Template Programs

The Department of Art + Design offers preapproved template programs in the following areas:

- Experience design
- Game design
- Graphic and information design
- Interaction design
- Media arts
- Visual studies

Each template program may be paired with another preapproved template program to create a combined major; to see a list of current preapproved template programs, visit the combined majors webpage (<https://registrar.northeastern.edu/article/combined-majors>).

Students may request admission to such a combined major via the Combined Major Approval form (<http://www.northeastern.edu/registrar/form-maj-comb.pdf>), which requires approval by both disciplines/colleges together with an approved curriculum. For additional information on

preapproved template programs, see “Student-Requested Combined Major (p. 33).” For template program requirements, visit myNortheastern (<https://my.northeastern.edu/welcome>), click on the “Self-Service” tab, then on “My Degree Audit.”

Admission Requirements for Art + Design

There are specific admissions criteria for students entering majors in the Department of Art + Design. See “Admission Requirements for the College of Arts, Media and Design (p. 14).”

Academic Progression Standards

Same as college standards.

Programs

Bachelor of Arts (BA)

- Art (p. 62)
- Communication Studies and Graphic and Information Design (p. 87)
- English and Graphic and Information Design (p. 89)
- Media and Screen Studies and Media Arts (p. 98)
- Media Arts and Communication Studies (p. 100)
- Theatre and Interaction Design (p. 102)

Bachelor of Fine Arts (BFA)

- Design (p. 64)
- Games (p. 67)
- Media Arts (p. 68)
- Studio Art (p. 73)
- Game Art and Animation (p. 92)

Bachelor of Science (BS)

- Architecture and Graphic and Information Design (p. 57)
- Business Administration and Design (p. 76)
- Computer Science and Design (p. 80)
- Computer Science and Game Development (p. 83)
- Computer Science and Media Arts (p. 84)
- Game Design and Music with concentration in Music Technology (p. 94)
- Graphic and Information Design and Mathematics (p. 95)
- Journalism and Interaction Design (p. 96)
- Theatre and Interaction Design (p. 103)

Minors

- Animation (p. 105)
- Art (p. 105)
- Art History (p. 106)
- Experience Design (p. 106)
- Game Art (p. 107)
- Game Design (p. 107)
- Graphic and Information Design (p. 108)
- Interaction Design (p. 108)
- Photography (p. 109)
- Photojournalism (p. 109)
- Video Arts (p. 109)

Art, BA

A studio-based fine art program that offers a broad and deep exploration of what it means to be culturally aware, skilled, and productive, the Bachelor of Arts in Art balances studio courses in drawing/painting and digital media with art history and visual studies. Students' education, experience, and training in understanding cultural practices take full advantage of the remarkable scope of the College of Arts, Media and Design. The focus of obtaining a well-rounded liberal arts education, within a broad study of the arts and humanities, is complemented by the study of a language and its cultural context and knowledge in the natural, physical, and social sciences. Some courses in this program are offered in Ireland, a cultural treasure-house amid natural splendor, where students may have an intensive and immersive experience. There students make art in their own studios in an art school equipped with all the tools and resources an artist requires. Most important, ample elective choices include study-abroad programs and span the complete range of offerings of our college.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

NUPath requirements Creative Expression/Innovation (EI), Interpreting Culture (IC), and Societies and Institutions (SI) are met through the major course requirements.

NUPath requirements Natural and Designed World (ND), Formal and Quantitative Reasoning (FQ), Analyzing and Using Data (AD), Difference and Diversity (DD), and Ethical Reasoning (ER) must be met through general electives.

Games, BFA

The BFA in games seeks to give students the skills to communicate ideas and emotions through interactive media. The focus of the BFA degree is to explore games as an aesthetic and expressive form through critical analysis and creative, reflective practice. To reflect emerging trends in the video game industry, including broader platforms and audiences and more distribution channels, students will be oriented toward developing games and playful media in an independent creative context, preparing graduates to become leaders within a growing segment of the game industry. Curriculum is geared to cultivating the students' own unique creative voice through courses that apply theory analysis to game-making practice across a wide range of media. Students are exposed

to a wide variety of genres and contexts, as well as different ways of thinking about games content, platforms, and production. BFA in games majors will be based in the College of Arts, Media and Design but will have a minimum of four games courses in which they interact with and collaborate with students in the BS in computer science and game development major.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

NUpath requirements Creative Expression/Innovation (EI), Formal and Quantitative Reasoning (FQ), and Analyzing/Using Data (AD) are met through the major course requirements. All other NUpath requirements must be met through electives.

Media Arts, BFA

The continuing revolution in digital computing and global communications has produced a rapidly evolving field for artists who create experiences of image and form with computer screens, intelligent devices, and new materials. Artists also invent tools for exploring, creating, and distributing their ideas and works. Media arts practices of animation, game, game art, photography, and video arts are offered with variations more yet to be invented.

Courses in imaginative and narrative arts, required for professional work in documentary films, game art and promotion, visualization, motion graphics, interactive art, illustration, and short animated film, are offered. An intensive studio program, the curriculum provides knowledge, experience, and techniques of media arts informed by theory, experimentation, and critique. Extensive digital imaging and interactive media editing and production facilities afford you the opportunity to become highly proficient in the current skills and emerging practices necessary for remarkable work. The media arts are evolving and expanding their reach into culture and society in daily life and global experience. The revolutions in 3-D printing, embedded devices, and robotics are changing the landscape in which the media artist will operate. This degree is designed to prepare students to meet the challenges of continuous change with adaptive ingenuity.

Video arts is a multidisciplinary field focused on creative video expression and messaging that weaves together art and design foundations; art and design history; video production; cinematic language (including documentary, narrative, and experimental strategies); collaborative frameworks; and theories of social and cultural change. The scope of the video arts curriculum is a broader and more diverse tapestry than traditional video art and it reflects the dynamic evolution of video in multiple contexts. The video arts concentration enables students to explore traditional, alternative, and other artistic means of video art production in a variety of creative and technical contexts. The focus on a multiplicity of artistic formats—hence, the choice of the title video arts—underscores our attention to the training of students who are interested in learning how to experiment with new technical, narrative, and aesthetic practices and incorporate these options into the traditional medium of video art.

Program Requirements - All Concentrations

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

NUPath requirements Creative Expression and Innovation (EI), Interpreting Culture (IC), and Societies and Institutions (SI) are met through the major course requirements.

NUPath requirements Natural and Designed World (ND), Formal and Quantitative Reasoning (FQ), Analyzing and Using Data (AD), Difference and Diversity (DD), and Ethical Reasoning (ER) must be met through general electives.

Art and Design Core

Studio Art, BFA

The BFA in studio art is offered in partnership with the School of the Museum of Fine Arts at Tufts University (SMFA at Tufts), affiliated with Tufts University and located adjacent to the Northeastern campus. In this major, the studio art classes are taken at the SMFA at Tufts, which permits students to explore a wide range of artistic media including ceramics, drawing, film, glasswork, metalsmith, painting, performance, print and paper, sculpture, and sound in their extensive studio environments. Art and design history courses are taken at Northeastern. In addition, students have access to all the elective courses, co-op, study-abroad programs, technology, and student resources that Northeastern students experience.

The BFA in studio art degree is awarded by Northeastern.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

NUpath requirements Interpreting Culture (IC) and Societies and Institutions (SI) are met through the major course requirements.

NUpath requirements Natural and Designed World (ND), Creative Expression/Innovation (EI), Formal and Quantitative Reasoning (FQ), Analyzing and Using Data (AD), Difference and Diversity (DD), and Ethical Reasoning (ER) must be met through general electives.

Note: The BFA in studio art is a joint degree program offered in collaboration with the School of the Museum of Fine Arts at Tufts University (SMFA at Tufts), which is affiliated with Tufts University. Art and design history and general education requirements are offered at Northeastern University, and studio art courses, which are determined in consultation with academic advisors at the SMFA at Tufts, are targeted to each student's unique program of study.

Art History Requirements for Studio Art

A cumulative grade-point average (GPA) of 2.500 or higher is required for the art history requirements.

Architecture and Graphic and Information Design, BS

The School of Architecture and the Department of Art + Design offer a combined major in architecture and graphic and information design. Students interested in the combined major connect specific problem solving inherent to architectural understanding with the larger context of contemporary cities. They learn to conceptualize, synthesize, and represent complex architectural, urban, and environmental issues. Students combine this knowledge with the design of message and meaning, integrating text and image to visualize concepts and data to enhance human understanding of complex and vital knowledge.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

NUpath attributes Natural and Designed World (ND), Creative Expression and Innovation (EI), Interpreting Culture (IC), Societies and Institutions (SI), and Difference and Diversity (DD) are met through the major course requirements.

In order to graduate, students must complete Formal and Quantitative Reasoning (FQ), Analyzing and Using Data (AD), and Ethical Reasoning (ER) in their electives.

Business Administration and Design, BS

The combined major in business administration and design integrates fundamental design courses with the theory and practice of management through active learning, problem-driven research, corporate partnerships, and experiential assignments. The BS degree can be accomplished using the five-year co-op plan.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Business Core Requirements

Code	Title	Hours
Introduction to College		
BUSN 1102	Personal Skill Development for Business	1
or ARTF 1000	Art and Design at Northeastern	
Mathematics		
Complete one of the following:		4
MATH 1231	Calculus for Business and Economics	
MATH 1241	Calculus 1	
MATH 1260	Math Fundamentals for Games	
Macroeconomics and Microeconomics		
ECON 1115	Principles of Macroeconomics	4
or ECON 1116	Principles of Microeconomics	

Business Requirements

Code	Title	Hours
Accounting

ARTG 2260	Programming Basics	
ARTG 3250	Physical Computing	
ARTG 3351	Time-Based Design	
ARTG 3451	Information Design 1	
ARTE 4901	Special Topics in Art and Design Studio	

Second Business Concentration (Optional)

A second business concentration is optional and may be chosen from the following list. Requirements for the concentrations are listed below (p. 77).

- Accounting (p. 77)
- Business/Interdisciplinary (p. 78)
- Entrepreneurship and Innovation (p. 78)
- Finance (p. 78)
- Management (p. 78)
- Management Information Systems (p. 79)
- Supply Chain Management (p. 79)

Integrative Courses

Code	Title	Hours
Integrative Courses		
Note: These courses also satisfy requirements above:		
MKTG 3301	Marketing Management	
ARTG 3460	Identity and Brand Design	
Capstone		
Complete the interactive media capstone or the business capstone:		4-8
<i>Interactive Media Capstone</i>		
ARTG 4550 and ARTG 4551	Design Degree Project 1 and Design Degree Project 2	
ARTG 4700 and ARTG 4701	Interaction Team Degree Project 1 and Interaction Team Degree Project 2	
<i>Business Capstone</i>		
STRT 4501	Strategy in Action	

Business GPA Requirement

A minimum 2.000 GPA in business courses is required.

Business Cooperative Education Requirement

Complete one six-month co-op experience.

Program Requirement

132 total semester hours required

Second Business Concentration (Optional)

A second business concentration is optional and may be chosen from the following:

CONCENTRATION IN ACCOUNTING

Code	Title	Hours
Required Courses		
ACCT 3401	Financial Reporting and Analysis 1	4

ACCT 4501	Financial Reporting and Analysis 2	4
Electives		
Complete two of the following:		8
ACCT 3403	Accounting Information Systems	
ACCT 3416	Strategic Cost Analysis for Decision Making	
ACCT 4412	Auditing and Other Assurance Services	
ACCT 4414	Income Tax Determination and Planning	

CONCENTRATION IN BUSINESS/INTERDISCIPLINARY

Code	Title	Hours
Complete four courses in consultation with approved D'Amore-McKim School of Business faculty member.		16

CONCENTRATION IN ENTREPRENEURSHIP AND INNOVATION

Code	Title	Hours
Note: The following courses do not count toward this concentration:		

ENTR 1201	The Entrepreneurial Universe	
ENTR 3308	Business Economic History of South Africa	
ENTR 3318		
ENTR 3328		
ENTR 3338	Field Research in Sustainable Energy in Iceland	
ENTR 3346		
ENTR 4510	Management Consulting Abroad	
ENTR 4514	Development Practice and Global Citizenship in India	

Introductory Course

ENTR 2301	Innovation!	4
or ENTR 2303	Entrepreneurial Marketing and Selling	

Capstone Course

Complete one of the following:		4
--------------------------------	--	---

ENTR 4501	Business Planning for Technology Ventures	
ENTR 4503	Business Planning for Small and Medium Enterprises	
ENTR 4505	Entrepreneurial Growth Strategy for Technology Ventures	
ENTR 4506	Advanced Studies in Social Enterprise	

Electives

Note: Only one non-ENTR course may be used as an elective.		
Complete two of the following:		8

ENTR 2206	Global Social Enterprise	
ENTR 2215	Understanding Family Enterprise	
ENTR 2414	Social Responsibility of Business in an Age of Inequality	
ENTR 2301	Innovation! (if not used as introductory course)	
ENTR 2303	Entrepreneurial Marketing and Selling (if not used for introductory course)	
ENTR 3212	Innovation for Social Change	
ENTR 3217	Global Family Business Leadership	

ENTR 3220	International Entrepreneurship and Innovation Consulting	
ENTR 3305	Entrepreneurial Strategy and Business Model Design	
ENTR 3306	Global Entrepreneurship	
ENTR 3330	Lean Design and Development for Entrepreneurs	
ENTR 3401	Management of Operations and Growth in Small- and Medium-Sized Enterprises	
ENTR 3403	Managing Operations in a Technology-Based Startup Firm	
ENTR 3520	Impact Investing and Social Finance	
ENTR 4225	Corporate Entrepreneurship through Global Growth, Acquisitions, and Alliances	
ENTR 4512	Social Entrepreneurship and Sustainable Development in India	
FINA 4610	Entrepreneurial Finance, Innovation Valuation, and Private Equity	
MGMT 3302	Negotiating in Business	

CONCENTRATION IN FINANCE

Code	Title	Hours
Required Course		
FINA 3301 or FINA 3303	Corporate Finance Investments	4
Electives		
Complete three of the following:		12
ENTR 3520 or FINA 2720	Impact Investing and Social Finance Sustainability in the Business Environment	
FINA 3301	Corporate Finance (if not selected as a required course)	
FINA 3303	Investments (if not selected as a required course)	
FINA 4219	Portfolio Management	
FINA 4220	Behavioral Finance	
FINA 4310	Working Capital Management	
FINA 4312	Issues in Corporate Governance	
FINA 4320	International Financial Management

CONCENTRATION IN MANAGEMENT

Code	Title	Hours
Required Course		
MGMT 4501	Skills for Managerial Success	4
Electives		
Note: Only one non-MGMT course may be used as an elective.		
Complete three of the following:		12
MGMT 3302	Negotiating in Business	
MGMT 3315	Managing Organizational Change and Disruption	
MGMT 3330	Developing Leaders for Global Sustainability	
MGMT 3340	Managing Healthcare Organizations: Critical Challenges and New Approaches	
MGMT 3350	Managing a Diverse Workforce	
MGMT 3360	Law and the Legal Process	
MGMT 3420	Managing Human Capital	
MGMT 3510	Managing Global Teams Virtually and Locally	
MGMT 3530	Project Management	
MGMT 4310	The Management Practices of Great Organizations	
MGMT 4410	Human Resources and Workforce Analytics	
ENTR 2215	Understanding Family Enterprise	
ENTR 2414	Social Responsibility of Business in an Age of Inequality	
ENTR 4225	Corporate Entrepreneurship through Global Growth, Acquisitions, and Alliances	

CONCENTRATION IN MANAGEMENT INFORMATION SYSTEMS

Code	Title	Hours
Required Courses		
MISM 3403	Data Management in the Enterprise	4
MISM 4501	Business Systems Integration	4
Electives		
Note: Only one non-MISM course may be used as an elective.		
Complete two of the following:		8
MISM 2510	Fundamentals of Information Analytics	
MISM 3305	Information Resource Management	
MISM 3404	Data Communications	
MISM 3406	Introduction to Web Design, Practices, and Standards	
MISM 3501	Information Visualization for Business	
MISM 3515	Data Mining for Business	
MKTG 4508	Digital Marketing	
SCHM 3301	Global Supply Chain Strategy	
SCHM 3305	Sourcing and Procurement	
SCHM 3308	Supply Chain Analytics	

CONCENTRATION IN SUPPLY CHAIN MANAGEMENT

Code	Title	Hours
Required Courses		
SCHM 3301	Global Supply Chain Strategy	4
SCHM 3305	Sourcing and Procurement	4
SCHM 3310	Logistics and Transportation Management	4
Elective		
Complete one of the following:		4
SCHM 3308	Supply Chain Analytics	
SCHM 3320	Demand Planning and Forecasting	
SCHM 3330	Sustainability and Supply Chain Management	
SCHM 4401	Advanced Problems in Supply Chain Management

Total Hours: 131

Computer Science and Design, BS

The combined major in computer science and design integrates fundamental design courses with a strong programming foundation. Students will declare a concentration in interaction design, graphic and information design, or experience design. Students in this major often have an interest in human-centered design methods used in developing digital interfaces and applications.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Computer Science Courses

Code	Title	Hours
Computer Science Overview		
CS 1200 or ARTF 1000	Leadership Skill Development Art and Design at Northeastern	1
CS 1210	Professional Development for CCIS Co-op	1

Computer Science Fundamental Courses

A grade of C– or higher is required in computer science fundamental courses.

CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5

Computer Science Required Courses

CS 3000	Algorithms and Data	4
CS 3500	Object-Oriented Design	4
CS 4500 and CS 4501	Software Development and Recitation for CS 4500	4
IS 4300	Human Computer Interaction	4

Presentation Requirement

THTR 1170	The Eloquent Presenter	1
-----------	------------------------	---

Computer Science Elective Courses

With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.

Complete 8 credits of CS, IS, or DS classes that are not already required. Choose courses within the following ranges:

CS 2500 or higher, except CS 5010

IS 2000 or higher, except IS 4900

DS 2000 or higher, except DS 4900

Design Requirements

Code	Title	Hours
Design Courses		
ARTF 1122	2D Fundamentals: Surface and Drawing (with optional ARTF 1123)	4
ARTF 2223	5D Fundamentals: Experience and Drawing (with optional ARTF 2224)	4
ARTG 1250	Design Process Context and Systems	4
ARTG 2260	Programming Basics	4
ARTG 2250	Typography 1 (with optional ARTG 2251)	4
ARTG 3350	Typography 2	4
ARTG 3451	Information Design 1	4

Art + Design History

Complete one of the following:		4
ARTH 1100	Interactive Media and Society	
ARTH 1111	Global Art and Design History: Renaissance to Modern	
ARTH 2210	Modern Art and Design History	
ARTH 2211	Contemporary Art and Design History	
ARTH 2212	Survey of the Still and Moving Image	
ARTH 2215	History of Graphic Design	

Degree Capstone Project

Complete one of the following:		8
ARTG 4550 and ARTG 4551	Design Degree Project 1 and Design Degree Project 2	
ARTG 4700 and ARTG 4701	Interaction Team Degree Project 1 and Interaction Team Degree Project 2	

Design Options

Complete one of the following options:

Code	Title	Hours
Interaction Design Option		
ARTG 2400	Interaction Design 1: Responsive (with optional ARTG 2401)	4
ARTG 3700	Interaction Design 2: Mobile	4
Graphic and Information Design Option		
ARTG 2252	Graphic Design 1	4
ARTG 3450	Graphic Design 2	4
Experience Design Option		
ARTG 3462	Experience Design 1	4
ARTG 3463	Experience Design 2	4

Degree-Focused Electives

Code	Title	Hours
Complete two courses from the following lists:		
<i>Art + Design</i>		
ARTF 1120	Observational Drawing	
ARTF 1121	Conceptual Drawing	
ARTF 1124	3D Fundamentals: Structure and Drawing (with optional ARTF 1125)	
ARTF 2220	4D Fundamentals: Sequence and Drawing (with optional ARTF 2221)	
ARTD 2100	Narrative Basics	
ARTD 2360	Photo Basics (with optional ARTD 2361)	
ARTD 2370	Animation Basics (with optional ARTD 2371)	
ARTD 2380	Video Basics (with optional ARTD 2381)	
ARTG 2252	Graphic Design 1	
ARTG 2300	Business Literacy for Design and Media	
ARTG 2400	Interaction Design 1: Responsive (with optional ARTG 2401)	
ARTG 3450	Graphic Design 2	
ARTG 3250	Physical Computing	
ARTG 3351	Time-Based Design	
ARTG 3450	Graphic Design 2	
ARTG 3460	Identity and Brand Design	
ARTG 3462	Experience Design 1	
ARTG 3463	Experience Design 2	
ARTG 3700	Interaction Design 2: Mobile	
ARTG 4552	Information Design 2	
ARTG 4553	Environmental Information Design	
ARTG 4554	Typography 3	
ARTE 4901	Special Topics in Art and Design Studio	
<i>Psychology</i>		
PSYC 1101	Foundations of Psychology	
PSYC 3452	Sensation and Perception	
PSYC 3464	Psychology of Language	
PSYC 3466	Cognition	

Computer Science

CS 3200	Database Design
CS 3520	Programming in C++
CS 3540	Game Programming
CS 3650	Computer Systems
CS 3700	Networks and Distributed Systems
CS 3800	Theory of Computation
CS 4100	Artificial Intelligence
CS 4150	Game Artificial Intelligence
CS 4300	Computer Graphics
CS 4400	Programming Languages
CS 4520	Mobile Application Development
CS 4550	Web Development
CS 4850	Building Game Engines
IS 2000	Principles of Information Science
DS 4100	Data Collection, Integration, and Analysis
DS 4200	Information Presentation and Visualization
DS 4300	Large-Scale Information Storage and Retrieval
DS 4400	Machine Learning and Data Mining 1
DS 4420	Machine Learning and Data Mining 2
CS 4991	Research
CS 4992	Directed Study
CS 4993	Independent Study

Integrative Requirement

Code	Title	Hours
The following courses are used in the major but also count as the integrative requirement:		
IS 4300	Human Computer Interaction	
ARTG 2260	Programming Basics	

Supporting Course

Code	Title	Hours
Computing and Social Issues		
Complete one of the following:		
ANTH 3418	Wired/Unwired: Cybercultures and Technopolitics	4
IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
PHIL 1145	Technology and Human Values	
SOCL 1280	The 21st-Century Workplace	
SOCL 3485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	

Computer Science Writing Requirement

Code	Title	Hours
College Writing		
ENGW 1111	First-Year Writing	4
Advanced Writing in the Disciplines		
ENGW 3302	Advanced Writing in the Technical Professions	4

or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines
--------------	---

Required General Electives

Code	Title	Hours
Complete six general electives.		24

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Exploring Creative Expression and Innovation
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Major GPA Requirement

Minimum 2.000 GPA required in all CS and IS courses

Program Requirement

131 total semester hours required

Computer Science and Game Development, BS

The computer science and game development combined major focuses on the specific skills needed to succeed in the highly competitive game industry. Students will engage in building and developing games and playable media experiences while completing courses in computer science and specialized game technology and design. Interdisciplinary courses enable students to develop their creative and entrepreneurial abilities, as well as create a strong portfolio of game pieces.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Computer Science and Media Arts, BS

The computer science and media arts combined major is ideal for creative students who love technology. Students will acquire a solid

foundation in both fields through curriculum that spans photography, animation, video, database design, computer graphics, and human-computer interaction.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Communication Studies and Graphic and Information Design, BA

The Department of Communication Studies and the Department of Art + Design offer a combined major in communication studies and graphic and information design. Students interested in the combined major integrate the study of communication skills and processes with the design of message and meaning, integrating text, image, and data.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

NUpath requirements Interpreting Culture (IC), Societies and Institutions (SI), and Ethical Reasoning (ER) are met through the major course requirements.

NUpath requirements Natural and Designed World (ND), Creative Expression/Innovation (EI), Formal and Quantitative Reasoning (FQ), Analyzing and Using Data (AD), and Difference and Diversity (DD) may be met through electives in the major.

Communication Studies Requirements

Code	Title	Hours
Communication Studies Common Requirements		
COMM 1101	Introduction to Communication Studies	4
COMM 1112	Public Speaking	4
or COMM 2301	Communication Research Methods	
Foundation Course		
Complete one of the following:		4
COMM 1210	Persuasion and Rhetoric	
COMM 1225	Communication Theory	
COMM 1231	Principles of Organizational Communication	
COMM 1255	Communication in a Digital Age	
Cluster Course		
Complete one of the following:		4
COMM 1131	Sex, Relationships, and Communication	
COMM 2303	Global and Intercultural Communication	
COMM 2304	Communication and Gender	
COMM 2501	Communication Law	
COMM 2551	Free Speech in Cyberspace	

Writing-Intensive

Complete two of the following: 8

COMM 3200	Mobile Communication
COMM 3201	Health Communication
COMM 3230	Interpersonal Communication
COMM 3304	Communication and Inclusion
COMM 3320	Political Communication
COMM 3330	Argumentation Theory
COMM 3400	Rhetoric of Science
COMM 3414	Great Speakers and Speeches 2, 1930–Present

English and Graphic and Information Design, BA

The Department of English and the Department of Art + Design offer an interdisciplinary combined major in English and graphic and information

design. Students interested in the combined major in English and graphic and information design integrate the study of literature and writing with the design of message and meaning, integrating text, image, and data.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Experiential Liberal Arts

All undergraduate students in the College of Social Sciences and Humanities are required to complete the Experiential Liberal Arts Requirement (p. 622).

English Requirements

Code	Title	Hours
English Course-Level Requirement		
In addition to the capstone, two of the courses chosen from the lists below must be numbered 3000–4999.		
Introduction to College		
ENGL 1000	English at Northeastern	1
Foundational Courses		
ENGL 1400	Introduction to Literary Studies	4
ENGL 1160	Introduction to Rhetoric	4
or ENGL 1410	Introduction to Writing Studies	
Diversity		
Complete one of the following courses. This course may also be used to fulfill an additional English requirement below:		4
ENGL 2150	Literature and Digital Diversity	
ENGL 2296	Early African-American Literature	
ENGL 2450	Postcolonial Literature	
ENGL 2451	Postcolonial Women Writers	
ENGL 2455	American Women Writers	
ENGL 2460	Multiethnic Literatures of the U.S.	
ENGL 2470	Asian-American Literature	
ENGL 2760	Writing in Global Contexts	
ENGL 3663	The African-American Novel	
ENGL 3676	Representing Gender and Sexuality in Literature	
ENGL 3678	Bedrooms and Battlefields: Hebrew Bible and the Origins of Sex, Gender, and Ethnicity	
ENGL/JWSS 3685	Modern and Contemporary Jewish Literature	
Pre-Nineteenth-Century Literature		

Complete one of the following:		4
ENGL 1600	Introduction to Shakespeare	
ENGL 1700	Global Literature to 1500	
ENGL 2240	17th-Century British Literature	
ENGL 2296	Early African-American Literature	
ENGL 3618	Milton	
ENGL/JWSS 3678	Bedrooms and Battlefields: Hebrew Bible and the Origins of Sex, Gender, and Ethnicity	
ENGL 4000	Topics in Early Literatures	
ENGL 4010	Topics in Shakespeare	
ENGL 4020	Topics in 17th- and 18th-Century Literatures	

Nineteenth-, Twentieth-, and Twenty-First-Century Literature

Complete one of the following:		4
ENGL 2260	Romantic Poetry	
ENGL 2330	The American Renaissance	
ENGL 2340	American Realism	
ENGL 3619	Emerson and Thoreau	
ENGL 3720	19th-Century Major Figure	
ENGL 4040	Topics in 19th-Century Literatures	
ENGL 2301	The Graphic Novel	
ENGL 2410	Contemporary American Literature	
ENGL 2440	The Modern Bestseller	
ENGL 2600	Irish Literary Culture (Abroad)	
ENGL 2610	Contemporary Israeli Literature and Art (Abroad)	
ENGL/JWSS 3685	Modern and Contemporary Jewish Literature	
ENGL 3730	20th- and 21st-Century Major Figure	

Theories and Methods

Complete one of the following:		4
ENGL 1140	Grammar: The Architecture of English	
ENGL 1160	Introduction to Rhetoric	
ENGL 1410	Introduction to Writing Studies	
ENGL 2150	Literature and Digital Diversity	
ENGL 3325	Rhetoric of Law	
ENGL 3340	Technologies of Text	
ENGL 3370	Writing Cultures	
ENGL 3381	The Practice and Theory of Teaching Writing	
ENGL 3700	Narrative Medicine	
ENGL 4100	Topics in Literary Criticism	
ENGL 4400	Opening the Archive	
ENGL 4410	Research in Rhetoric and Writing	
LING 1150	Introduction to Language and Linguistics	
LING 2350	Linguistic Analysis	
LING 3450	Syntax	
LING 3452	Semantics	
LING 3454	History of English	
LING 3456	Language and Gender	
LING 3458	Topics in Linguistics	

Comparative Literature

Complete one of the following:		4
--------------------------------	--	---

ENGL 1120	Trouble in Utopia
ENGL 1130	Animals, Objects, Humans
ENGL 1450	Reading and Writing in the Digital Age
ENGL 1500	British Literature to 1800
ENGL 1502	American Literature to 1865
ENGL 1503	American Literature 1865 to Present
ENGL 2150	Literature and Digital Diversity
ENGL 2370	The Modern Short Story
ENGL 2380	The Modern Novel
ENGL 2400	Modern Poetry
ENGL 2420	Contemporary Poetry
ENGL 2430	Contemporary Fiction
ENGL 2450	Postcolonial Literature
ENGL 2451	Postcolonial Women Writers
ENGL 2455	American Women Writers
ENGL 2460	Multiethnic Literatures of the U.S.
ENGL 2470	Asian-American Literature
ENGL 2510	Horror Fiction
ENGL 2520	Science Fiction
ENGL 2600	Irish Literary Culture (Abroad)
ENGL 2620	What Is Nature? (Abroad)
ENGL 2690	Boston in Literature
ENGL 3427	The Literature of Science
ENGL 3487	Film and Text (Abroad)

Game Art and Animation, BFA

Game art and animation offers students an opportunity to master visual arts and animation within the game medium. The program focuses on developing the depth of knowledge required to be successful in a highly competitive industry. The continuing revolution in digital computing and animation has produced a rapidly evolving field for artists who create aesthetics, characters, and environments for games. The major encourages students to think critically and work collaboratively in multidisciplinary teams. The collaborative approach helps all team members to understand the context in which their asset contributions are used and to develop visual design skills in the service of larger experiential goals. Students have many opportunities to collaborate with their peers and work with students in the BS in computer science and game development and BFA in games majors, culminating in a two-semester senior capstone. Students will have a home college in the College of Arts, Media and Design but will have a minimum of four interdisciplinary courses where students interact and work together with students in the other degrees.

Working in the interdisciplinary game areas, the program fosters experiential learning opportunities utilizing diverse intersections of skills merging artistic practice and expression blended with technology. Focus is on establishing core skills that engage critical thinking in preparation for professional practice in game art and asset creation or moving on to advanced study. Students will have an opportunity to develop tools to succeed, eagerness to innovate, and skills to become next-generation entrepreneurs in an ever-changing games and media landscape. Practical and technical experiential training will be offered via Northeastern’s world-renowned co-op program.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

NUPath requirements Creative Expression (EI), Interpreting Culture (IC), Societies and Institutions (SI), and Analyzing/Using Data (AD) are met through the major course requirements. All other NUPath requirements must be met through electives.

Capstone

Complete one of the following: 4

MUST 4611	Music Technology Capstone/Senior Recital	
GAME 4701	Game Design Capstone 2	

Combined-Major Credit Requirement

Complete 90 semester hours in the major.

Program Requirement

138 total semester hours required

Graphic and Information Design and Mathematics, BS

The Department of Mathematics and the Department of Art + Design offer a combined major in mathematics and graphic and information design. Students interested in the combined major integrate the study of mathematical reasoning including methods for analyzing and solving problems encountered in the physical world with the design of message and meaning, integrating text and image to visualize concepts and data to enhance human understanding of complex and vital knowledge.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

NUpath requirements Creative Expression/Innovation (EI), Interpreting Culture (IC), Formal and Quantitative Reasoning (FQ), Analyzing and Using Data (AD), and Societies and Institutions (SI) are met through the major course requirements.

NUpath requirements Natural and Designed World (ND), Difference and Diversity (DD), and Ethical Reasoning (ER) must be met through electives.

Graphic and Information Design Requirements

ARTG 4553	Environmental Information Design	
ARTG 4554	Typography 3	

Mathematics Requirements

Code	Title	Hours
Math Reasoning		
MATH 1365	Introduction to Mathematical Reasoning	4

Calculus

A grade of C or higher is required:

MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4

Intermediate Math

MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 2331	Linear Algebra	4
MATH 3081	Probability and Statistics	4

Advanced Elective

Complete one of the following: 4

MATH 3150	Real Analysis	
MATH 3175	Group Theory	
MATH 3560	Geometry	

Mathematics Elective

MATH 4025 can count as an upper-level math elective as well as a capstone.

Complete one course in the following range: 4

MATH 3101 to MATH 4899		
------------------------	--	--

Integrative Requirement

Code	Title	Hours
ARTG 3451	Information Design 1	4

Combined-Major Credit Requirement

Complete 80 semester hours in the major.

Program Requirement

128 total semester hours required

Journalism and Interaction Design, BS

The School of Journalism and the Department of Art and Design offer an interdisciplinary combined major in journalism and interaction design. Broadly speaking, students in the combined major in journalism and interaction design at Northeastern integrate the study of journalism with the study of art and design.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

NUpath requirements Creative Expression/Innovation (EI), Interpreting Culture (IC), Societies and Institutions (SI), Difference and Diversity (DD), and Ethical Reasoning (ER) are met through the major course requirements.

NUpath requirement Analyzing and Using Data (AD) may be met through electives in the major.

NUpath requirements Natural and Designed World (ND) and Formal and Quantitative Reasoning (FQ) must be met through general electives.

Media and Screen Studies and Media Arts, BA

The Media and Screen Studies Program and the Department of Art + Design offer a combined major in media studies and media arts. Students pursuing the combined major are able to integrate the theory and practice of contemporary media studies with the deep appreciation of the narrative arts that is required for professional work in documentary film, game art and promotion, visualization, motion graphics, interactive art, illustration, and short animated films.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

NUpath requirements Creative Expression/Innovation (EI), Interpreting Culture (IC), Societies and Institutions (SI), and are met through the major course requirements.

NUpath requirement Analyzing and Using Data (AD), Difference and Diversity (DD), and Ethical Reasoning (ER) may be met through electives in the major.

NUpath requirements Natural and Designed World (ND) and Formal and Quantitative Reasoning (FQ) must be met through general electives.

Media Arts and Communication Studies, BA

The Department of Communication Studies and the Department of Art + Design offer a combined major in media arts and communication studies. Students interested in the combined major integrate the study of communication skills and processes with the study of the creation of the narrative arts, required for professional work in documentary film, game art and promotion, visualization, motion graphics, interactive art, illustration, and short animated films.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUPATH Requirements

All undergraduate students are required to complete the NUPATH Requirements (p. 37).

NUPATH attributes Creative Expression and Innovation (EI), Interpreting Culture (IC), and Societies and Institutions (SI) are met through the major course requirements.

In order to graduate, students must complete Natural and Designed World (ND), Formal and Quantitative Reasoning (FQ), Analyzing and Using Data

(AD), Difference and Diversity (DD), and Ethical Reasoning (ER) in their electives.

Theatre and Interaction Design Combined-Major Credit Requirement

Complete 98 semester hours in the major.

Program Requirement

128 total semester hours required

Animation, Minor

The animation minor immerses students in the creation of animated artwork and assets for short animated films, game art and promotion, documentary films, visualization, motion graphics, illustration, and interactive art. An intensive studio program, this curriculum seeks to immerse students in the knowledge, experience, and techniques of animation, informed by theory, experimentation, and critique. Extensive digital imaging and interactive media editing and production facilities afford students the opportunity to become proficient in the emerging practices necessary for remarkable work.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified. Students who wish to register for 2000-level courses and above need to plan ahead in order to complete prerequisite course(s) ahead of time.

Requirements for Non-Art and Design Majors

GPA Requirement

2.500 GPA required in the minor

Art, Minor

The art minor allows students to complement any degree with a broad exploration of visual studies, fine arts, and design. Following an introduction to the fundamentals of drawing and two-dimensional design, students select from courses in time-based media, interaction, sculpture, painting, and art history. The department's exceptional Dialogues are popular among art minors, who are able to complete a large portion of their course work during culturally immersive and focused studio residencies in places such as Ireland, Iceland, Cuba, and the Galapagos Islands.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified. Students who wish to register for 2000-level courses and above need to plan ahead in order to complete prerequisite course(s) ahead of time.

Requirements for Non-Art and Design Majors

GPA Requirement

2.500 GPA required in the minor

Art History, Minor

An ideal complement to many majors, the art history minor builds the techniques of visual intelligence necessary to successfully navigate an increasingly image-driven world. Students learn to interpret visual evidence as well as written documents to understand and interrogate how evolving ideas about quality and judgment have shaped the institutions of art, including the growing art market. A diverse and strong faculty brings its own research into the classroom, allowing students to gain international exposure and real-world experience with world-class museums and cultural centers in Boston, Cambridge, and the greater metropolitan area. Art history minors often have opportunities to conduct independent research, develop publishable texts, and gain exposure to the dynamic fields of visual art and curatorial practice.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified. Students who wish to register for 2000-level courses and above need to plan ahead in order to complete prerequisite course(s) ahead of time.

Note: This minor is not available to students in the BA in art program or any art combined major.

Experience Design, Minor

Experience design is a holistic approach that utilizes investigation into human environments in specific situations to improve quality. Given an understanding of goals, needs, and desires, it seeks to improve the various contexts by identifying and studying events and how they can be turned into beneficial practices.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified. Any prerequisites should be taken before registering for 2000-level courses and above.

GPA Requirement

2.500 GPA required in the minor

Game Art, Minor

The game art minor offers students an opportunity to become immersed in the study and practice of the visual arts and animation within the game medium. Students are afforded the opportunity to think critically and work collaboratively in multidisciplinary teams to produce art and animation assets that are critical to the success of projects in the game medium. Working in the interdisciplinary game areas, the program fosters experiential learning opportunities utilizing diverse intersections of skills merging artistic practice and expression blended with technology. Students will be immersed in experiences to develop tools to succeed, eagerness to innovate, and skills to become next-generation entrepreneurs in the ever-changing games and media landscape.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified. Students who wish to register for 2000-level courses and above need to plan ahead in order to complete prerequisite course(s) ahead of time.

Requirements for Non-Art + Design Majors

Code	Title	Hours
Required Courses		
ARTD 2370	Animation Basics (with optional ARTD 2371)	4
ARTF 1120	Observational Drawing	4
ARTF 1122	2D Fundamentals: Surface and Drawing (with optional ARTF 1123)	4
ARTF 2220	4D Fundamentals: Sequence and Drawing (with optional ARTF 2221)	4
Elective Course		

Complete one of the following:		4
ARTD 3471	Virtual Environment Design	
ARTD 3472	Character Design for Animation	
ARTD 3473	Animation for Games	

Requirements for Art and Design Majors

Note: This minor is not available to students in the BFA in media arts program or any media arts combined major.

GPA Requirement

2.500 GPA required in the minor

Game Design, Minor

The game design minor allows students in other areas of study to become familiarized with the basics of game design. Game design minor students can collaborate with BFA in games, game art and animation, and computer science in game development students make games and create portfolio pieces. Students will also be encouraged to apply principles from their own discipline to the game designs they create.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Foundations of Game Design

Code	Title	Hours
GAME 2500	Foundations of Game Design	4

GPA Requirement

2.000 GPA required in the minor

Graphic and Information Design, Minor

Graphic design makes messages and meaning using visual form and the integration of text and image. It often has a persuasive intention and uses rules of visual composition, form, and pattern to enable storytelling or to create attention and an ambience for consideration. Information design focuses on visualizing concepts and data to enhance human understanding of complex and vital knowledge.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified. Any prerequisites should be taken before registering for 2000-level courses and above.

Requirements for Non-Art and Design Majors

Photography, Minor

The photography minor immerses students in the creation of photographs. The curriculum seeks to involve students in the knowledge, experience, and techniques of photography, informed by theory, experimentation, and critique. Digital imaging, editing, and production facilities afford students the opportunity to become proficient in the emerging practices necessary for a variety of creative and technical contexts.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified. Students who wish to register for 2000-level courses and above need to plan ahead in order to complete prerequisite course(s) ahead of time.

Video Arts, Minor

The video arts minor is based on a multidisciplinary field focused on creative video expression and messaging. It weaves together collaborative frameworks, theories of social and cultural change, and video production (sound and image) alongside cinematic language (including documentary, imaginative, narrative, and experimental strategies). The scope of the video arts minor is a broader and more diverse tapestry than traditional video arts, and it reflects the dynamic evolution of video in multiple contexts, including the workplace. This minor enables students to explore contemporary, alternative, and other artistic means of video production in a variety of creative and technical contexts.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified. Any prerequisites should be taken before registering for 2000 level courses and above.

Communication Studies

Website (<https://camd.northeastern.edu/commstudies>)

Dale A. Herbeck, PhD
Professor and Chair

212A Lake Hall
617.373.5517
617.373.8533 (fax)
Angela Chin, Administrative Officer, commstudies@northeastern.edu

The Department of Communication Studies is committed to providing students with both the communication skills and the understanding of the communication process required to thrive in a complex and changing society. Majors are required to demonstrate a mastery of the fundamentals of effective communication, to learn the fundamentals of communication theory and practice, and to develop a distinct area of emphasis. Some of the more popular areas include argumentation

and advocacy, organizational and health communication, international and intercultural communication, digital communication and social media, and media production. The curriculum is designed to enhance the understanding of human communication in a variety of contexts, to empower students to become informed and engaged citizens, and to provide the knowledge and skills required to live a rich personal and professional life.

Academic Progression Standards

Departmental probation will result from a cumulative grade-point average below 2.000. No more than two grades below a C in communication studies courses can be used to fulfill degree requirements. Dismissal from the major may occur as a result of two consecutive semesters on departmental probation.

Preapproved Template Program in Communication Studies

The Department of Communication Studies offers a preapproved template program that may be paired with another preapproved template program to create a combined major; to see a list of current preapproved template programs, visit the combined majors webpage (<https://registrar.northeastern.edu/article/combined-majors>).

Students may request admission to such a combined major via the Combined Major Approval form (<http://www.northeastern.edu/registrar/form-maj-comb.pdf>), which requires approval by both disciplines/colleges together with an approved curriculum. For additional information on preapproved template programs, see "Student-Requested Combined Major (p. 33)." For template program requirements, visit the myNortheastern web portal (<http://my.northeastern.edu>), click on the "Self-Service" tab, then on "My Degree Audit."

Media and Screen Studies

Website (<https://camd.northeastern.edu/mscr>)

Dale A. Herbeck, PhD
Professor and Chair

212A Lake Hall
617.373.5517
617.373.8533 (fax)
mscr@northeastern.edu

Media and screen studies (MSCR) educates students in the analysis and production of media. Taught from a liberal arts perspective, a media and screen studies degree seeks to give students the ability to think critically about the continually changing media industry and the complex world in which it exists and to apply that knowledge to media production. MSCR is a challenging degree that is not limited to what is traditionally offered at a film school or in a visual and performing arts degree. It gives students the tools to become engaged citizens equipped to meet the challenges of living in a global culture defined by technological and social change.

The BA in media and screen studies offers courses in analysis and practice. Required courses offer students an opportunity to obtain the critical thinking skills necessary to better understand media content, media technology, and media production. Students then decide how many production and analysis courses they want to take. Choosing from a broad range of electives, students can take more than half their major in media and film production courses, can take a majority of courses that critically examine media content and technology, or can combine courses in other ways.

Students may also enroll in one of the preexistent MSCR combined majors. Media and screen studies has combined majors with communication studies, English, journalism, political science, sociology,

and theatre. Students may also petition for new combinations, making use of the half-major template in media and screen studies.

Academic Progression Standards

For media and screen studies, majors must maintain at least a 2.500 grade-point average (GPA) in their overall program of studies and a minimum of 3.000 in the following two required courses:

Code	Title	Hours
MSCR 1220	Media, Culture, and Society	4
MSCR 2220	Understanding Media and Film	4

Preapproved Template Program in Media and Screen Studies

Media and screen studies offers a preapproved template program that may be paired with another preapproved template program to create a combined major; to see a list of current preapproved template programs, visit the combined majors webpage (<https://registrar.northeastern.edu/article/combined-majors>).

Students may request admission to such a combined major via the Combined Major Approval form (<http://www.northeastern.edu/registrar/form-maj-comb.pdf>), which requires approval by both disciplines/colleges together with an approved curriculum. For additional information on preapproved template programs, see “Student-Requested Combined Major (p. 33).” For template program requirements, visit the myNortheastern web portal (<http://my.northeastern.edu>), click on the “Self-Service” tab, then on “My Degree Audit.”

Communication Studies and Graphic and Information Design, BA

The Department of Communication Studies and the Department of Art + Design offer a combined major in communication studies and graphic and information design. Students interested in the combined major integrate the study of communication skills and processes with the design of message and meaning, integrating text, image, and data.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

NUPath requirements Interpreting Culture (IC), Societies and Institutions (SI), and Ethical Reasoning (ER) are met through the major course requirements.

NUPath requirements Natural and Designed World (ND), Creative Expression/Innovation (EI), Formal and Quantitative Reasoning (FQ), Analyzing and Using Data (AD), and Difference and Diversity (DD) may be met through electives in the major.

Communication Studies Requirements

Code	Title	Hours
Communication Studies Common Requirements		
COMM 1101	Introduction to Communication Studies	4
COMM 1112	Public Speaking	4
or COMM 2301	Communication Research Methods	
Foundation Course		
Complete one of the following:		4
COMM 1210	Persuasion and Rhetoric	
COMM 1225	Communication Theory	
COMM 1231	Principles of Organizational Communication	
COMM 1255	Communication in a Digital Age	
Cluster Course		
Complete one of the following:		4
COMM 1131	Sex, Relationships, and Communication	
COMM 2303	Global and Intercultural Communication	
COMM 2304	Communication and Gender	
COMM 2501	Communication Law	
COMM 2551	Free Speech in Cyberspace	
Writing-Intensive		
Complete two of the following:		8
COMM 3200	Mobile Communication	
COMM 3201	Health Communication	
COMM 3230	Interpersonal Communication	
COMM 3304	Communication and Inclusion	
COMM 3320	Political Communication

Communication Studies and Media and Screen Studies, BA

The Department of Communication Studies offers majors in communication studies and in media studies. The integrated major allows students to combine courses from both majors into a degree that integrates theory and practice. Students completing the combined major

have the knowledge necessary to engage the complex and dynamic relationship between communication, culture, and knowledge.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

NUpath requirements Interpreting Culture (IC), Societies and Institutions (SI), and Ethical Reasoning (ER) are met through the major course requirements.

NUpath requirements Natural and Designed World (ND), Creative Expression/Innovation (EI), Formal and Quantitative Reasoning (FQ), Analyzing and Using Data (AD), and Difference and Diversity (DD) may be met through electives in the major.

Communication Studies and Sociology, BA

The communication studies department and the sociology department offer an interdisciplinary combined major in communication studies and sociology. The combined major integrates the study of communication skills and processes with the study of social behaviors.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

NUpath requirements Societies and Institutions (SI) and Ethical Reasoning (ER) are met through the major course requirements.

NUpath requirements Natural and Designed World (ND), Creative Expression/Innovation (EI), Interpreting Culture (IC), Formal and Quantitative Reasoning (FQ), Difference and Diversity (DD), and Analyzing and Using Data (AD) may be met through electives in the major.

Experiential Liberal Arts

All undergraduate students in the College of Social Sciences and Humanities are required to complete the Experiential Liberal Arts Requirement (p. 622).

Communication Studies and Theatre, BA

The Department of Communication Studies and the Department of Sociology offer an interdisciplinary combined major in communication studies and theatre. The combined major integrates the study of communication skills and processes with the study of theater history, playwriting, acting, and directing, as well as costume design, lighting, and scenery.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

NUPath requirements Interpreting Culture (IC), Creative Expression/Innovation (EI), Societies and Institutions (SI), and Ethical Reasoning (ER) are met through the major course requirements.

NUPath requirements Natural and Designed World (ND), Formal and Quantitative Reasoning (FQ), Analyzing and Using Data (AD), and Difference and Diversity (DD) may be met through electives in the major.

Communication Studies Requirements

Code	Title	Hours
Communication Studies Common Requirements		
COMM 1000	Communication Studies at Northeastern	1
COMM 1101	Introduction to Communication Studies	4
COMM 1112	Public Speaking	4
or COMM 2301	Communication Research Methods	
Foundation Course		
Complete one of the following:		4
COMM 1210	Persuasion and Rhetoric	
COMM 1231	Principles of Organizational Communication	
COMM 1225	Communication Theory	
COMM 1255	Communication in a Digital Age	
Cluster Course		
Complete one of the following:		4
COMM 1131	Sex, Relationships, and Communication	
COMM 2303	Global and Intercultural Communication	
COMM 2304	Communication and Gender	
COMM 2501	Communication Law	
COMM 2551	Free Speech in Cyberspace	

Writing-Intensive Courses

Complete two of the following:		8
COMM 3200	Mobile Communication	
COMM 3201	Health Communication	
COMM 3230	Interpersonal Communication	
COMM 3304	Communication and Inclusion	
COMM 3320	Political Communication	
COMM 3330	Argumentation Theory	
COMM 3400	Rhetoric of Science

Computer Science and Communication Studies, BS

The computer science and communication studies combined major integrates practical skills and theory. Students will gain both a strong computer science foundation and a deep understanding of the major conceptual frameworks for human communication—plus how to apply this knowledge to solve problems in today's society.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Computer Science Courses

Code	Title	Hours
Computer Science Overview		
CS 1200	Leadership Skill Development	1
CS 1210	Professional Development for CCIS Co-op	1

Computer Science Fundamental Courses

A grade of C– or higher is required in computer science fundamental courses.

CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5

Computer Science Required Courses

CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500	Object-Oriented Design	4
CS 4500 and CS 4501	Software Development and Recitation for CS 4500	4
CS 4550	Web Development	4

Presentation Requirement

THTR 1170	The Eloquent Presenter	1
-----------	------------------------	---

Computer Science Elective Courses

With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.

Complete 12 credits of CS, IS, or DS classes that are not already required. Choose courses within the following ranges:

- CS 2500 or higher, except CS 5010
- DS 2000 or higher, except DS 4900
- IS 2000 or higher, except IS 4900

Communication Studies Courses

Code	Title	Hours
Communication Studies Common Requirements		
COMM 1101	Introduction to Communication Studies	4
COMM 1112 or COMM 2301	Public Speaking Communication Research Methods	4

Foundation Course

Complete one of the following: 4

- COMM 1210 Persuasion and Rhetoric
- COMM 1225 Communication Theory
- COMM 1231 Principles of Organizational Communication
- COMM 1255 Communication in a Digital Age

Cluster Course

Complete one of the following: 4

- COMM 1131 Sex, Relationships, and Communication
- COMM 2303 Global and Intercultural Communication
- COMM 2304 Communication and Gender
- COMM 2501 Communication Law
- COMM 2551 Free Speech in Cyberspace

Writing-Intensive

Complete two of the following:		8
COMM 3200	Mobile Communication	
COMM 3201	Health Communication	
COMM 3230	Interpersonal Communication	
COMM 3304	Communication and Inclusion	
COMM 3320	Political Communication	
COMM 3330	Argumentation Theory	
COMM 3400	Rhetoric of Science	
COMM 3414	Great Speakers and Speeches 2, 1930–Present	
COMM 3415	Communication Criticism	
COMM 3445	Public Relations Principles	
COMM 3501	Free Speech: Law and Practice	
COMM 3530	Communication and Sexualities	
COMM 3532	Theories of Conflict and Negotiation	
COMM 3610	Communication, Politics, and Social Change	
COMM 4535	Nonverbal Social Interaction	
COMM 4605	Youth and Communication Technology	
COMM 4631	Crisis Communication and Image Management	

Communication Studies Electives

Complete three courses in the following range: ¹		12
COMM 1131 to COMM 4996		

¹ Special Topics in Communication Studies (COMM 4912), and Junior/Senior Honors Project 1 (COMM 4970) are excluded.

Supporting Courses

Code	Title	Hours
Mathematics		
MATH 1341	Calculus 1 for Science and Engineering	4
Computing and Social Issues		
Complete one of the following:		4
ANTH 3418	Wired/Unwired: Cybercultures and Technopolitics	
IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
PHIL 1145	Technology and Human Values	
SOCL 1280	The 21st-Century Workplace	
SOCL 3485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	

Writing Requirements

Code	Title	Hours
College Writing		
ENGW 1111	First-Year Writing	4
Advanced Writing in the Disciplines		
Complete one of the following:		4
ENGW 3302	Advanced Writing in the Technical Professions	

ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines
COMM 3409	Advocacy Writing ¹

² If Advocacy Writing (COMM 3409) is selected it will also satisfy a communication studies elective requirement. One additional general elective will be then required in its place.

Required General Electives

Code	Title	Hours
Complete eight general electives.		32

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Understanding Societies and Institutions
- Employing Ethical Reasoning
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Communication Studies Grade Requirement

No more than two grades below a C in communication studies courses may be used to fulfill degree requirements.

Major GPA Requirement

Minimum 2.000 GPA required in all CS, IS, and COMM courses

Program Requirement

133 total semester hours required

English and Communication Studies, BA

The English department and the communication studies department offer an interdisciplinary combined major in English and communication studies. Broadly speaking, students in the combined major in English and communication studies at Northeastern integrate the study of literature and writing with studies of media, social, corporate, and political communications.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Experiential Liberal Arts

All undergraduate students in the College of Social Sciences and Humanities are required to complete the Experiential Liberal Arts Requirement (p. 622).

English Requirements

Code	Title	Hours
English Course-Level Requirement		
In addition to the capstone, two of the courses chosen from the lists below must be numbered 3000–4999.		
Introduction to College		
ENGL 1000	English at Northeastern	1
Foundational Courses		
ENGL 1400	Introduction to Literary Studies	4
ENGL 1160	Introduction to Rhetoric	4
or ENGL 1410	Introduction to Writing Studies	
Diversity		
Complete one of the following courses. This course may also be used to fulfill an additional English requirement below:		4
ENGL 2150	Literature and Digital Diversity	
ENGL 2296	Early African-American Literature	
ENGL 2450	Postcolonial Literature	
ENGL 2451	Postcolonial Women Writers	
ENGL 2455	American Women Writers	
ENGL 2460	Multiethnic Literatures of the U.S.	
ENGL 2470	Asian-American Literature	
ENGL 2760	Writing in Global Contexts	
ENGL 3663	The African-American Novel	
ENGL 3676	Representing Gender and Sexuality in Literature	
ENGL 3678	Bedrooms and Battlefields: Hebrew Bible and the Origins of Sex, Gender, and Ethnicity	
ENGL/JWSS 3685	Modern and Contemporary Jewish Literature	
Pre-Nineteenth-Century Literature		
Complete one of the following:		4
ENGL 1600	Introduction to Shakespeare	
ENGL 1700	Global Literature to 1500	

ENGL 2240	17th-Century British Literature	
ENGL 2296	Early African-American Literature	
ENGL 3618	Milton	
ENGL/JWSS 3678	Bedrooms and Battlefields: Hebrew Bible and the Origins of Sex, Gender, and Ethnicity	
ENGL 4000	Topics in Early Literatures	
ENGL 4010	Topics in Shakespeare	
ENGL 4020	Topics in 17th- and 18th-Century Literatures	
Nineteenth-, Twentieth-, and Twenty-First-Century Literature		
Complete one of the following:		4
ENGL 2260	Romantic Poetry	
ENGL 2330	The American Renaissance	
ENGL 2340	American Realism	
ENGL 3619	Emerson and Thoreau	
ENGL 3720	19th-Century Major Figure	
ENGL 4040	Topics in 19th-Century Literatures	
ENGL 2301	The Graphic Novel	
ENGL 2410	Contemporary American Literature	
ENGL 2440	The Modern Bestseller	
ENGL 2600	Irish Literary Culture (Abroad)	
ENGL 2610	Contemporary Israeli Literature and Art (Abroad)

Human Services and Communication Studies, BA

The intersection of communications studies and human services practices spans several domains. Nonprofit organizations depend on communications professionals to effectively represent their work to the community, partner organizations, and funders. Knowledge and skills developed in communications studies also service human services professionals working in the political realm as they seek to promote impactful social policies.

The human services major is designed to prepare students for careers in social change by providing them with the theoretical and skill-based background necessary for practice and research. Students will develop a holistic understanding of preventative and reactive responses to social inequality and an understanding of how to impact change at the individual and structural levels. Students engage in an integrated educational program that emphasizes experiential approaches to learning through service-learning, co-op, and internship opportunities.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Experiential Liberal Arts

All undergraduate students in the College of Social Sciences and Humanities are required to complete the Experiential Liberal Arts Requirement (p. 622).

Linguistics and Communication Studies, BA

In the combined major in linguistics and communication studies, students have an opportunity to learn about the formal structures and analysis of human languages across multiple levels (sounds, words, phrases and sentences, meaning) while simultaneously mastering the fundamentals of effective communication and of communication theory and practice. Students receive extensive training in writing and speaking, both for a technical audience and more generally; and they explore the role of language and communication in society, both from a broad theoretical perspective and in narrower, more focused and applied domains.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond

specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Linguistics and Communication Studies Combined-Major Credit Requirement

Complete 76 semester hours in the major.

Program Requirement

128 total semester hours required

Media Arts and Communication Studies, BA

The Department of Communication Studies and the Department of Art + Design offer a combined major in media arts and communication studies. Students interested in the combined major integrate the study of communication skills and processes with the study of the creation of the narrative arts, required for professional work in documentary film, game art and promotion, visualization, motion graphics, interactive art, illustration, and short animated films.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

NUpath attributes Creative Expression and Innovation (EI), Interpreting Culture (IC), and Societies and Institutions (SI) are met through the major course requirements.

In order to graduate, students must complete Natural and Designed World (ND), Formal and Quantitative Reasoning (FQ), Analyzing and Using Data (AD), Difference and Diversity (DD), and Ethical Reasoning (ER) in their electives.

Media and Screen Studies and English, BA

The media and screen studies program and the Department of English offer a combined major in media and screen studies and English. The combined major integrates the analysis, research, and production of traditional and emerging media along with the study of the diverse historical, cultural, and aesthetic contexts of English, American, and other Anglophone literatures. Majors become familiar with writing practices and media from the Middle Ages through the present, from the quill pen to computer code.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Experiential Liberal Arts

All undergraduate students in the College of Social Sciences and Humanities are required to complete the Experiential Liberal Arts Requirement (p. 622).

NUpath requirements Interpreting Culture (IC) and Societies and Institutions (SI) are met through the major course requirements.

NUpath requirements Creative Expression/Innovation (EI), Analyzing and Using Data (AD), Difference and Diversity (DD), and Ethical Reasoning (ER) may be met through electives in the major.

NUpath requirements Natural and Designed World (ND) and Formal and Quantitative Reasoning (FQ) must be met through general electives.

Media and Screen Studies and History, BA

The Media and Screen Studies Program and the Department of History offer a combined major in media and screen studies and history. The combined major integrates the analysis, research, and production of traditional and emerging media along with the study of local and regional histories as well as of the global exchanges between nations, regions, and cultures.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Experiential Liberal Arts

All undergraduate students in the College of Social Sciences and Humanities are required to complete the Experiential Liberal Arts Requirement (p. 622).

NUPath requirements Interpreting Culture (IC) and Societies and Institutions (SI) are met through the major course requirements.

NUPath requirements Creative Expression/Innovation (EI), Analyzing and Using Data (AD), Difference and Diversity (DD), and Ethical Reasoning (ER) may be met through electives in the major.

NUPath requirements Natural and Designed World (ND) and Formal and Quantitative Reasoning (FQ) must be met through general electives.

Media and Screen Studies and Political Science, BA

The Media and Screen Studies Program and the Department of Political Science offer a combined major in media and screen studies and political science. The combined major integrates the analysis, research, and production of traditional and emerging media along with courses on American government, comparative politics, international relations, and research methods.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Experiential Liberal Arts

All undergraduate students in the College of Social Sciences and Humanities are required to complete the Experiential Liberal Arts Requirement (p. 622).

NUpath requirements Interpreting Culture (IC), Societies and Institutions (SI), and Analyzing and Using Data (AD) are met through the major course requirements.

NUpath requirements Creative Expression/Innovation (EI), Difference and Diversity (DD), and Ethical Reasoning (ER) may be met through electives in the major.

NUpath requirements Natural and Designed World (ND) and Formal and Quantitative Reasoning (FQ) must be met through general electives.

Media Studies Requirements

Code	Title	Hours
Introduction to College		
MSCR 1000	Media and Screen Studies at Northeastern	1

Required Courses

MSCR 1220	Media, Culture, and Society	4
MSCR 2220	Understanding Media and Film	4
MSCR 4623	Theories of Media and Culture	4

Elective Courses

Complete four of the following: 16

CINE 2160	Narrative Filmmaking
CINE 3389	Screenwriting
CINE 3392	Gender and Film
CINE 3446	Topics in Documentary Production
CINE 3920	Topics in Film Studies
MSCR 1230	Introduction to Film Production

MSCR 1310	Introduction to Digital Media Culture
MSCR 2302	Advertising and Promotional Culture
MSCR 2325	Global Media

Media and Screen Studies and Sociology, BA

The Media and Screen Studies Program and the Department of Sociology and Anthropology offer a combined major in media and screen studies and sociology. The combined major integrates the analysis, research, and production of traditional and emerging media along with the critical perspective needed for studying the social and cultural arrangements in which people live, for understanding how societies function, for investigating the conditions under which people change their institutions, and for describing the modes and conditions of cooperation that make social life possible.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

NUPath requirements Interpreting Culture (IC) and Societies and Institutions (SI) are met through the major course requirements.

NUPath requirements Creative Expression/Innovation (EI), Analyzing and Using Data (AD), Difference and Diversity (DD), and Ethical Reasoning (ER) may be met through electives in the major.

NUPath requirements Natural and Designed World (ND) and Formal and Quantitative Reasoning (FQ) must be met through general electives.

Music and Communication Studies with Concentration in Music Industry, BS

The Bachelor of Science in Music with Concentration in Music Industry, the first such undergraduate program offered in Boston, is designed for students with an interest in fields such as artist management; the music products industry; the recording industry; arts administration; contracting and legal issues; financial and economics aspects of the music industry; and broadcast, mobile, and online media technologies.

The Department of Communication Studies is committed to providing students with both the communication skills and the understanding of the communication process required to thrive in a complex and changing society. Majors are required to demonstrate a mastery of the fundamentals of effective communication, to learn the fundamentals of communication theory and practice, and to develop a distinct area of emphasis. Some of the more popular areas include argumentation and advocacy, organizational and health communication, international and intercultural communication, digital communication and social media, and media production. The curriculum is designed to enhance the understanding of human communication in a variety of contexts, to empower students to become informed and engaged citizens, and to provide the knowledge and skills required to live a rich personal and professional life.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

NUPath requirements Creative Expression/Innovation (EI), Interpreting Culture (IC), Societies and Institutions (SI), and Ethical Reasoning (ER) are met through the major course requirements.

NUPath requirements Natural and Designed World (ND), Formal and Quantitative Reasoning (FQ), Analyzing and Using Data (AD), and Difference and Diversity (DD) may be met through electives in the major.

Music Industry Requirements

Code	Title	Hours
Introduction to College		
MUSC 1000	Music at Northeastern	1
Music Core		
MUSC 1001	Music in Everyday Life	4
Music Theory Placement		
All students must take a theory placement exam. Students who do not place into MUSC 1201 must first take the following:		
MUSC 1119	Fundamentals of Western Music Theory	4
Music Theory Requirement		
MUSC 1201	Music Theory 1	4
Introductory Music Industry		
MUSI 1230	Introduction to Music Industry	4
Music in Context		
Choose one course from traditional, ethnomusicology, or contemporary categories.		4
Traditional		
MUSC 2311	Historical Traditions: America

Cinema Studies, Minor

The interdisciplinary cinema studies minor is intended for students who wish to augment their major program of study with courses that promote the study of film, television, and digital media. In addition to film analysis and film theory, students choose from electives on culture and film, film and television history, and gender and film. The minor also includes film-related courses from art, English, history, and music.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Courses

Code	Title	Hours
MSCR 2895	Film Analysis	4
CINE 3500	Film Theory	4

Elective Courses

Code	Title	Hours
Complete three of the following:		12
ARTH 2212	Survey of the Still and Moving Image	
CINE 2336	American Film and Culture	
CINE 3392	Gender and Film	
ENGL 4080	Topics in Film	
HIST 1279	History of the American Film Industry	
MUSC 1113	Film Music	

GPA Requirement

2.000 GPA required in the minor

Communication Studies, Minor

The communication studies minor is for students who seek to acquire the practical skills necessary to succeed in the modern workplace. The minor consists of two common requirements—Introduction to Communication Studies (COMM 1101) and Public Speaking (COMM 1112)—a foundational course, and three electives.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Communication Studies Minor Requirements

Code	Title	Hours
Required Courses		
COMM 1101	Introduction to Communication Studies	4
COMM 1112	Public Speaking	4
Foundation Course		
Complete one of the following:		4
COMM 1210	Persuasion and Rhetoric	
COMM 1231	Principles of Organizational Communication	
COMM 1225	Communication Theory	
COMM 1255	Communication in a Digital Age	
Communication Studies Electives		
Complete three of the following:		12
COMM 1131	Sex, Relationships, and Communication	
COMM 1210	Persuasion and Rhetoric	
COMM 1225	Communication Theory	
COMM 2350	Producing for the Entertainment Industry	
COMM 2501	Communication Law	
COMM 2450	Sound Production for Digital Media	
COMM 1331 to COMM 2304		
COMM 2531 to COMM 4799		
COMM 4910 to COMM 4914		
The following courses may not be used to satisfy this requirement:		
COMM 1511	Communication and Storytelling	
COMM 3501	Free Speech: Law and Practice	
COMM 3550	Television Field Production	
COMM 3650	Television Studio Production	
COMM 4650	Digital Editing for TV	

GPA Requirement

2.000 GPA required in the minor

Film Production, Minor

The interdisciplinary film production minor provides students with basic skills in media production. In addition to a foundational course in film production, students take electives dealing with documentary production, film analysis, screenwriting, storytelling, and video.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Course

Code	Title	Hours
MSCR 1230	Introduction to Film Production	4

Electives

Code	Title	Hours
Complete four of the following:		16
ARTD 3480	Video: Sound and Image	
ARTD 3485	Experimental Video	

ARTD 5582	Collaborative Video and Community Engagement
CINE 3389	Screenwriting
CINE 3446	Topics in Documentary Production
MSCR 2895	Film Analysis
THTR 2345	Acting for the Camera

GPA Requirement

2.000 GPA required in the minor

Human Communication, Minor

The human communication minor is for students who are interested in studying the role of interpersonal communication in relationships, including romantic relationships, friendships, and relationships in groups or in organizations. The goal for students who complete the minor is to gain an in-depth understanding of how communication can affect the quality of relationships, the satisfaction that is derived from relationships, and whether a relationship is likely to last or dissolve. Courses in the minor focus on research-validated theories, concepts, and models that will aid students in better understanding the many different types of relationships that exist in their personal and professional lives.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Foundational Course

Code	Title	Hours
Complete two of the following:		8
COMM 1131	Sex, Relationships, and Communication	
COMM 1231	Principles of Organizational Communication	
COMM 2131	Dark Side of Interpersonal Communication	
COMM 2303	Global and Intercultural Communication	
COMM 2304	Communication and Gender	

Advanced Courses

Code	Title	Hours
Complete two of the following:		8
COMM 2301	Communication Research Methods	
COMM 3230	Interpersonal Communication	
COMM 3530	Communication and Sexualities	
COMM 3532	Theories of Conflict and Negotiation	
COMM 4535	Nonverbal Social Interaction	

GPA Requirement

2.000 GPA required in the minor

Media and Screen Studies, Minor

The media and screen studies minor provides students with the analytical skills necessary for the rigorous analysis of media within the humanities and social science. The minor focuses on how media shape society and prepares students for careers in arts and industry, politics, and popular culture.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Note: Courses used in the major may not be used in the minor in media and screen studies.

Required Courses

Code	Title	Hours
MSCR 1220	Media, Culture, and Society	4
MSCR 2220	Understanding Media and Film	4

Elective Courses

Code	Title	Hours
Complete three of the following:		12
MSCR 2000 to MSCR 5999		
CINE 3500	Film Theory	
CINE 3920	Topics in Film Studies	

GPA Requirement

2.000 GPA required in the minor

Media Production, Minor

The media production minor is for students interested in learning the hands-on techniques of producing and directing for the entertainment industry. The technical aspects of camera operation, audio design, lighting design, digital editing, and live broadcast are also covered.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Note: Restricted to communication studies majors. An overall 3.000 grade-point average (GPA) is required for the minor. Only three courses from this minor also count toward communication studies major electives; additional courses taken for this minor do not count toward communication studies major requirements.

Required Courses

Code	Title	Hours
COMM 2350	Producing for the Entertainment Industry	4
COMM 2450	Sound Production for Digital Media	4
COMM 3550	Television Field Production	4
COMM 3650	Television Studio Production	4

Elective Courses

Code	Title	Hours
Complete two of the following:		8
COMM 2650	The Business of Entertainment	
COMM 2750	Beyond Television	
COMM 3307	Production Practicum Abroad	
COMM 3450	Voice-Over Artist	
COMM 3750	Special Effects and Postproduction for Television	
COMM 4650	Digital Editing for TV	

COMM 4755	Production Capstone
COMM 4940	Special Topics in Media Production

GPA Requirement

3.000 GPA required in the minor

Oratory and Public Speaking, Minor

The oratory and public speaking minor is for students seeking to develop exemplary oral communication skills. While many universities recognize the importance of writing in their curricula, oratory and public speaking skills are often ignored.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Public Speaking

Code	Title	Hours
COMM 1112	Public Speaking	4

Elective Courses

Code	Title	Hours
Complete four of the following:		16
COMM 1113	Business and Professional Speaking	
COMM 1210	Persuasion and Rhetoric	
COMM 1331	Legal Argumentation, Advocacy, and Citizenship	
COMM 1511	Communication and Storytelling	
COMM 2100	Elements of Debate	
COMM 3330	Argumentation Theory	
COMM 3450	Voice-Over Artist	

GPA Requirement

2.000 GPA required in the minor

Political Communication, Minor

The political communication minor is a joint program offered through the departments of communication studies, political science, and journalism. The focus of the minor is on the electoral process, political rhetoric, and the role of media in political life. It is intended to address the interests and needs of students considering careers in the political sphere, either as candidates, employees, volunteers, or reporters in political organizations and campaigns.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Introductory Courses

Code	Title	Hours
Complete two of the following:		8
COMM 1210	Persuasion and Rhetoric	
COMM 1331	Legal Argumentation, Advocacy, and Citizenship	
COMM 1412	Social Movement Communication	

JRNL 1150	Understanding Today's News
POLS 1150	American Government

Intermediate/Advanced Courses

Code	Title	Hours
Complete four courses from the following lists. At least one course must be taken from each department:		16

Communication Studies	
COMM 3320	Political Communication
COMM 3409	Advocacy Writing
COMM 3610	Communication, Politics, and Social Change
COMM 4602	Contemporary Rhetorical Theory

Journalism	
JRNL 2350	The History of Journalism: How the News Became the News
JRNL 3550	The First Amendment and the Media

Political Science	
POLS 3310	Public Opinion, Voting, and Elections

GPA Requirement

2.000 GPA required in the minor

Professional Presentation, Minor

Whether you are speaking at a meeting, engaging an audience, pitching a new idea, or energizing your team, effective presentation skills are essential to professional success. This dynamic, interdisciplinary minor is designed to help you become a more confident, creative, and compelling communicator. Uniting the acting training of theatre with practical techniques of communications studies, develop an individualized course of study that will empower your voice and speech, cultivate your onstage persona, and develop high-impact presentation skills to enhance your career prospects.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Presentation Requirement

Code	Title	Hours
Complete two of the following:		8
COMM 1112	Public Speaking	
COMM 1113	Business and Professional Speaking	
COMM 1210	Persuasion and Rhetoric	
COMM 1511	Communication and Storytelling	

Performance Requirement

Code	Title	Hours
Complete two of the following:		8
THTR 1125	Improvisation	
THTR 1130	Introduction to Acting	
THTR 1135	Introduction to Acting Abroad	
THTR 1160	The Professional Voice	
THTR 1165	The Professional Voice Abroad	
THTR 2345	Acting for the Camera	

GPA Requirement

2.000 GPA required in minor

Rhetoric, Minor

The rhetoric minor offers students the opportunity to acquire competence in the history, theory, and criticism of civic discourse and cultural practices. It brings together courses from both the communication studies and English departments, from which students may learn about the nature and function of rhetoric in politics, the professions, and the media.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Elective

Code	Title	Hours
ENGL 1160	Introduction to Rhetoric	4
or COMM 1210	Persuasion and Rhetoric	

Electives

Code	Title	Hours
Note: For English majors, only one course from the major may also count toward this elective section of the minor.		
Complete four of the following:		16
COMM 1331	Legal Argumentation, Advocacy, and Citizenship	
COMM 3414	Great Speakers and Speeches 2, 1930–Present	
COMM 3415	Communication Criticism	
COMM 3501	Free Speech: Law and Practice	
COMM 4602	Contemporary Rhetorical Theory	
ENGL 3325	Rhetoric of Law	
ENGL 3381	The Practice and Theory of Teaching Writing	

GPA Requirement

2.000 GPA required in the minor

Social Activism, Minor

Students who minor in social activism will learn a variety of perspectives and practical approaches to social activism. Students interested in activism will have opportunities to explore social movements, advocacy, and citizenship in a wide array of situations. These opportunities arise from the wealth of advocacy organizations in Boston; the access Northeastern University students have to co-op experiences nationally and internationally; and Northeastern University's Service-Learning Program. Course work in a variety of departments will enable students to successfully apply different skill sets and knowledge bases to future work as lawyers, nonprofit activists, community organizers, lobbyists, and volunteers.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Introductory Courses

Code	Title	Hours
Only one course may be taken from each department/program.		
Complete two of the following:		8
Communication Studies		
COMM 1412	Social Movement Communication	
Political Science		
POLS 1150	American Government	
Sociology		
SOCL 1228	Social Problems	
SOCL 1246	Environment and Society	
Theatre		
THTR 1215	Activism and Performance	

Intermediate/Advanced Courses

Code	Title	Hours
Only one course may be taken from each department/program.		
Complete three of the following:		12
Law and Public Policy		
LPSC 2301	Introduction to Law, Policy, and Society	
LPSC 2302	Global Human Rights: A Social and Economic Perspective	
Political Science		
POLS 2395	Environmental Politics and Policy	
Sociology		
SOCL 2268	Social Movements	
SOCL 2450	Class, Power, and Social Change	

Service-Learning

Code	Title	Hours
POLS 2360	Politics of Poverty	4

GPA Requirement

2.000 GPA required in the minor

Sports, Media, and Communication, Minor

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Courses

Susan Conover, Academic Coordinator, s.conover@northeastern.edu

The School of Journalism seeks to prepare students for careers in news and related communication fields. The program prepares future journalists and professional communicators in writing, editing, digital and social media, photography, video and audio production, design, and public relations. These skills have broad applications. Graduates of the program also go on to work in government, business, law, and teaching.

Students may enroll in a four- or five-year cooperative education program or a four-year program without co-op. The school strongly advises students to obtain cooperative education experience. The program offers some of the best co-ops and internships anywhere.

Graduates work for some of the world's best newspapers and magazines, radio and television stations, online publications, wire services, public relations departments, and advertising agencies.

Academic Progression Standards

Journalism majors and minors must be in good standing in accordance with university-wide requirements to remain in the major or minor.

Preapproved Template Program in Journalism

The School of Journalism offers a preapproved template program that may be paired with another preapproved template program to create a combined major; to see a list of current preapproved template programs, visit the combined majors webpage (<https://registrar.northeastern.edu/article/combined-majors>).

Students may request admission to such a combined major via the Combined Major Approval form (<http://www.northeastern.edu/>

[registrar/form-maj-comb.pdf](#)), which requires approval by both disciplines/colleges together with an approved curriculum. For additional information on preapproved template programs, see "Student-Requested Combined Major (p. 33)." For template program requirements, visit the myNortheastern web portal (<http://my.northeastern.edu>), click on the "Self-Service" tab, then on "My Degree Audit."

Journalism, BA

Website (<https://camd.northeastern.edu/journalism/academic-programs/ba-journalism>)

If you're a news junkie; love to write; want to tell people what's going on in your hometown, around the world, or in an organization, a journalism major at Northeastern University is designed to give you the skills and experience you need to tell your story.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

NUPath requirements Creative Expression/Innovation (EI), Interpreting Culture (IC), Societies and Institutions (SI), Difference and Diversity (DD), and Ethical Reasoning (ER) are met through the major course requirements.

NUPath requirement Analyzing and Using Data (AD) may be met through electives in the major.

NUpath requirements Natural and Designed World (ND) and Formal and Quantitative Reasoning (FQ) must be met through general electives.

Journalism Major Requirements

Students transferring from outside institutions must complete a minimum of five 4-credit journalism courses at Northeastern, and these must include:

Code	Title	Hours
JRNL 2201	Journalism 2: Intermediate Reporting	
JRNL 2301	Visual Storytelling in Journalism	
JRNL 4650	Ethics and Issues in Journalism

Journalism and English, BA

The School of Journalism and the English Department offer an interdisciplinary combined major in Journalism and English. Broadly speaking, students in the Combined Major in Journalism and English at Northeastern integrate the study of journalism with the study of language, literature and writing.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses

where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Experiential Liberal Arts

All undergraduate students in the College of Social Sciences and Humanities are required to complete the Experiential Liberal Arts Requirement (p. 622).

NUPath requirements Creative Expression/Innovation (EI), Societies and Institutions (SI), and Difference and Diversity (DD) are met through the major course requirements.

NUPath requirements Interpreting Culture (IC), Analyzing and Using Data (AD), and Ethical Reasoning (ER) may be met through electives in the major.

NUPath requirements Natural and Designed World (ND) and Formal and Quantitative Reasoning (FQ) must be met through general electives.

Journalism and Political Science, BA

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

NUPath requirements Creative Expression/Innovation (CI), Interpreting Culture (IC), Understanding Societies and Institutions (SI), Analyzing and Using Data (AD), Engaging Difference and Diversity (DD), and Employing Ethical Reasoning (ER) are met through the major requirements. All other Nupath requirements must be met through electives.

Experiential Liberal Arts

All undergraduate students in the College of Social Sciences and Humanities are required to complete the Experiential Liberal Arts Requirement (p. 622).

Journalism Major Requirements

Code	Title	Hours
Journalism Introductory Course		
JRNL 1150	Understanding Today's News	4
Journalism Foundations		
Must receive a C or better in the following:		
JRNL 1101 and JRNL 1102	Journalism 1: Fundamentals of Reporting and Journalist's Toolbox	5
JRNL 2201	Journalism 2: Intermediate Reporting	4
JRNL 2301	Visual Storytelling in Journalism	4
JRNL 3610	Digital Storytelling and Social Media	4
Ethics		
JRNL 4650	Ethics and Issues in Journalism	4
Journalism Electives		
Take three JRNL courses.		12

Political Science Requirements

Code	Title	Hours
Political Science Foundation Courses		
POLS 1150	American Government	4
POLS 1155	Comparative Politics	4
POLS 1160	International Relations	4
POLS 2399	Research Methods in Political Science	4
POLS 2400	Quantitative Techniques	4
Political Thought		
POLS 2325	Ancient Philosophy and Political Thought	4
POLS 2328	Modern Political Thought	4
POLS 2330	American Political Thought	4
POLS 2332	Contemporary Political Thought	4
Political Science Capstone or Thesis		
Complete one of the following:		4
POLS 4701	Political Science Senior Capstone	
POLS 4703	Senior Thesis	

Political Science Electives

Complete two upper-division POLS courses or complete a concentration from the following list:	8
POLS 2300 to POLS 5999	

Political Science Concentrations (Optional)

If you are working toward one of the following concentrations, declare it with your advisor so that it may be added to your record. Requirements for the concentrations are listed below (p. 167).

- American political institutions (p. 167)
- Campaigns and elections (p. 167)
- Comparative politics (p. 168)
- Identity, culture, and politics (p. 168)
- International relations and diplomacy (p. 168)
- Law and legal studies (p. 168)
- Public policy (p. 168)
- Security studies (p. 168)

Integrative Requirement

Code	Title	Hours
JRNL 3550	The First Amendment and the Media	4
COMM 3320 or POLS 3320	Political Communication Politics and Mass Media	4

Journalism and Political Science Combined-Major Credit Requirement

Complete 84 semester hours in the major.

Program Requirement

128 total semester hours required

Concentrations

CONCENTRATION IN AMERICAN POLITICAL INSTITUTIONS

Code	Title	Hours
Complete four of the following:		16
POLS 2350	State and Local Politics	
POLS 3300	The U.S. Congress	
POLS 3302	Judicial Process and Behavior	
POLS 3305	The American Presidency	
POLS 3307	Public Policy and Administration	
POLS 3310	Public Opinion, Voting, and Elections	

CONCENTRATION IN CAMPAIGNS AND ELECTIONS

Code	Title	Hours
Required Courses		
With advisor approval, a co-op or internship may be substituted in place of POLS 4947:		
POLS 3160	Campaign Strategy	4
POLS 4947		4
Campaigns and Elections Electives		
If POLS 4947 was replaced by a co-op or internship, an additional elective must be taken.		
Complete two of the following:		8
POLS 2345	Urban Policies and Politics	
POLS 2355		

POLS 3310	Public Opinion, Voting, and Elections
POLS 3162	Local Campaigns and Elections
POLS 3320	Politics and Mass Media
POLS 3402	
POLS 3304	

CONCENTRATION IN COMPARATIVE POLITICS

Code	Title	Hours
Theoretical Requirement		
Complete one of the following:		4
POLS 2370	Religion and Politics	
POLS 3418	Nationalism	
POLS 3427	Civil-Military Relations	
POLS 3487	Politics of Developing Nations	
Regional Requirements		
Complete two of the following:		8
POLS 3435	Politics and Governance of Europe and the European Union	
POLS 3445		
POLS 3450		
POLS 3460		
POLS 3465	Government and Politics in the Middle East	
POLS 3475		
POLS 3480		
POLS 3485		
Experiential/Practicum Requirement		
Complete one of the following:		4
POLS 4915	Model Arab League	
POLS 4918	Model NATO	
POLS 4937	Dialogue of Civilizations: Government and Politics Abroad	

CONCENTRATION IN IDENTITY, CULTURE, AND POLITICS

Code	Title	Hours
Core Course		
POLS 3418	Nationalism	4
Electives		
Complete three of the following:		12
POLS 2360	Politics of Poverty	
POLS 2368	Music and Politics in America and Abroad	
POLS 2370	Religion and Politics	
POLS 3309	Lesbian, Gay, Bisexual, and Transgender Issues in Public Policy	
POLS 3324	Law and Society	

CONCENTRATION IN INTERNATIONAL RELATIONS AND DIPLOMACY

Code	Title	Hours
Experiential/Practicum Requirement		
Complete one of the following:		4
POLS 4910	Model United Nations	
POLS 4915	Model Arab League	
POLS 4918	Model NATO	

POLS 4938	Dialogue of Civilizations: International Politics Abroad
-----------	--

Core Courses

Complete three of the following:		12
POLS 3405	International Political Economy	
POLS 3406	International Law	
POLS 3407	International Organizations	
POLS 3408	International Security	
POLS 3435	Politics and Governance of Europe and the European Union	
POLS 3470	Arab-Israeli Conflict	

CONCENTRATION IN LAW AND LEGAL STUDIES

Code	Title	Hours
Complete four of the following:		16
POLS 2330	American Political Thought	
POLS 3300	The U.S. Congress	
POLS 3302	Judicial Process and Behavior	
POLS 3324	Law and Society	
POLS 3406	International Law	
POLS 4500	U.S. Constitutional Law	
POLS 4505	U.S. Civil Liberties	

CONCENTRATION IN PUBLIC POLICY

Code	Title	Hours
Core Requirement		
POLS 3307	Public Policy and Administration	4
Electives		
Complete three of the following:		12
POLS 2334	Bureaucracy and Government Organizations	
POLS 2335	Budgeting and Taxation	
POLS 2340	Business and Government	
POLS 2345	Urban Policies and Politics	
POLS 2350	State and Local Politics	
POLS 2357	Growth and Decline of Cities and Suburbs	
POLS 2390	Science, Technology, and Public Policy	
POLS 2395	Environmental Politics and Policy	
POLS 3425	U.S. Foreign Policy	

CONCENTRATION IN SECURITY STUDIES

Code	Title	Hours
Complete four of the following:		16
POLS 3408	International Security	
POLS 3420	U.S. National Security Policy	
POLS 3423	Terrorism and Counterterrorism	
POLS 3425	U.S. Foreign Policy	
POLS 3427	Civil-Military Relations	
POLS 3430	Revolution, Civil War, and Insurrection	
POLS 3470	Arab-Israeli Conflict	
POLS 3487	Politics of Developing Nations	
POLS 4918	Model NATO	

Media and Screen Studies and Journalism, BA

A Bachelor of Arts in Journalism and Media and Screen Studies is designed for the student who is interested in pursuing a career as a journalist specializing in the film industry.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

NUpath requirements Creative Expression/Innovation (EI), Interpreting Culture (IC), Societies and Institutions (SI), Difference and Diversity (DD), and Ethical Reasoning (ER) are met through the major course requirements.

NUpath requirement Analyzing and Using Data (AD) may be met through electives in the major.

NUpath requirements Natural and Designed World (ND) and Formal and Quantitative Reasoning (FQ) must be met through general electives.

Media and Screen Studies Requirements

Code	Title	Hours
Introduction to College		
MSCR 1000	Media and Screen Studies at Northeastern	1
or JRNL 1000	Journalism at Northeastern	
Introduction to Media Studies		
MSCR 1220	Media, Culture, and Society	4
Introduction to Screen Theory		
MSCR 2220	Understanding Media and Film	4
Advanced Theory		
MSCR 4623	Theories of Media and Culture	4
Media and Screen Electives		
Complete four of the following:		16
CINE 2160	Narrative Filmmaking	
CINE 3389	Screenwriting	
CINE 3392	Gender and Film	
CINE 3446	Topics in Documentary Production	
CINE 3920	Topics in Film Studies	
MSCR 1230	Introduction to Film Production	
MSCR 1310	Introduction to Digital Media Culture	
MSCR 2302	Advertising and Promotional Culture	
MSCR 2325	Global Media

Computer Science and Journalism, BS

The computer science and journalism combined major supports students who understand that journalism now takes place in both print and the digital world. Students will learn the principles, practices, and responsibilities of the journalism profession while gaining a deep understanding of the systems and technologies that support digital media.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond

specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Computer Science Courses

Code	Title	Hours
Computer Science Overview		
CS 1200	Leadership Skill Development	1
CS 1210	Professional Development for CCIS Co-op	1
Computer Science Fundamental Courses		
A grade of C– or higher is required in computer science fundamental courses:		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
Computer Science Required Courses		
CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500	Object-Oriented Design	4
CS 4500 and CS 4501	Software Development and Recitation for CS 4500	4
Presentation Requirement		
THTR 1170	The Eloquent Presenter	1
Computer Science Elective Courses		
With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete 16 credits of CS, IS, or DS classes that are not already required. Choose courses within the following ranges:		16
CS 2500 or higher, except CS 5010		
IS 2000 or higher, except IS 4900		
DS 2000 or higher, except DS 4900		
At least one of these must be from the following list:		
IS 4200	Information Retrieval	
IS 4300	Human Computer Interaction	

Journalism Major Requirements

Students transferring from outside institutions must complete a minimum of five 4-credit journalism courses at Northeastern, and these must include:

Code	Title	Hours
JRNL 2201	Journalism 2: Intermediate Reporting	
JRNL 2301	Visual Storytelling in Journalism	
JRNL 4650	Ethics and Issues in Journalism	

Code	Title	Hours
Journalism Courses		
A grade of C or higher is required:		
JRNL 1101 and JRNL 1102	Journalism 1: Fundamentals of Reporting and Journalist's Toolbox	5
JRNL 2201	Journalism 2: Intermediate Reporting	4
JRNL 2301	Visual Storytelling in Journalism	4
JRNL 3610	Digital Storytelling and Social Media	4
Required Journalism		
JRNL 1150	Understanding Today's News	4
JRNL 2350	The History of Journalism: How the News Became the News	4
JRNL 3550	The First Amendment and the Media	4
JRNL 4650	Ethics and Issues in Journalism	4
Journalism Electives		
Complete two JRNL courses.		8
Journalism-Related Requirement		
HIST 1130	Introduction to the History of the United States	4

Supporting Courses

Code	Title	Hours
Mathematics Requirement		
MATH 1341	Calculus 1 for Science and Engineering	4
Computing and Social Issues		
Complete one of the following:		4
ANTH 3418	Wired/Unwired: Cybercultures and Technopolitics	
IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
PHIL 1145	Technology and Human Values	
SOCL 1280	The 21st-Century Workplace	
SOCL 4528	Computers and Society	
SOCL 3485	Environment, Technology, and Society	

Writing Requirement

Code	Title	Hours
College Writing		
ENGW 1111	First-Year Writing	4
Advanced Writing in the Disciplines		
JRNL 2301	Visual Storytelling in Journalism	4

Required General Electives

Code	Title	Hours
Complete seven general electives.		28

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Exploring Creative Expression and Innovation
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Understanding Societies and Institutions
- Interpreting Culture

- Engaging Difference and Diversity
- Employing Ethical Reasoning
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Major GPA Requirement

Minimum 2.000 GPA required in all CS, IS, and JRNL courses

Program Requirement

134 total semester hours required

Information Science and Journalism, BS

The information science and journalism combined major is similar to the computer science and journalism degree, with a greater focus on the journalism profession's information science needs. Information science combines concepts and skills from computer science, behavioral and social science, and system design into an integrated, people-centered curriculum. Both degrees provide a strong foundation in the principles, practices, and responsibilities of journalism as well as the systems and technologies that support digital media.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

SOCL 3485	Environment, Technology, and Society
SOCL 4528	Computers and Society

Writing Requirement

Code	Title	Hours
College Writing		
ENGW 1111	First-Year Writing	4
Advanced Writing in the Disciplines		
JRNL 2301	Visual Storytelling in Journalism	4

Required General Electives

Code	Title	Hours
Complete five general electives.		20

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
 - Exploring Creative Expression and Innovation
 - Conducting Formal and Quantitative Reasoning
 - Analyzing and Using Data
 - Understanding Societies and Institutions
 - Interpreting Culture
 - Engaging Difference and Diversity
 - Employing Ethical Reasoning
 - Writing in the First Year
 - Advanced Writing in the Disciplines
 - Writing-Intensive in the Major
 - Demonstrating Thought and Action in a Capstone
- Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Major GPA Requirement

Minimum 2.000 GPA required in all CS, IS, and JRNL courses

Program Requirement

134 total semester hours required

Journalism and Interaction Design, BS

The School of Journalism and the Department of Art and Design offer an interdisciplinary combined major in journalism and interaction design. Broadly speaking, students in the combined major in journalism and interaction design at Northeastern integrate the study of journalism with the study of art and design.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

NUpath requirements Creative Expression/Innovation (EI), Interpreting Culture (IC), Societies and Institutions (SI), Difference and Diversity (DD), and Ethical Reasoning (ER) are met through the major course requirements.

NUpath requirement Analyzing and Using Data (AD) may be met through electives in the major.

NUpath requirements Natural and Designed World (ND) and Formal and Quantitative Reasoning (FQ) must be met through general electives.

Journalism Practice, Minor

With the explosion of websites, podcasts, and social media, more and more people find themselves using the skills of a journalist in the dissemination of information in both their private and professional lives. This minor is intended for those students who wish to bring more professionalism and sophistication to the things they post online or who hope to offer a skill set that will make them more versatile and employable in their chosen field. It will also serve those who may be

considering a career in journalism but find themselves too late in their college careers to switch majors.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Note: Any student wishing to satisfy a minor in both journalism studies and journalism practice must take eight unique courses. No double counting. Journalism majors are not eligible for a minor in journalism practice.

Required Courses

Code	Title	Hours
Required Courses		
JRNL 1101 and JRNL 1102	Journalism 1: Fundamentals of Reporting and Journalist's Toolbox	5
JRNL 2201	Journalism 2: Intermediate Reporting	4
Restricted Elective		
Complete one course from the following:		
JRNL 3610	Digital Storytelling and Social Media	4
JRNL 3625	Public Relations Practice	
JRNL 3630	Magazine Writing	
JRNL 3680	Advanced Reporting	
JRNL 5310	Photojournalism	
JRNL 5311	Design and Graphics	
JRNL 5314	Video News Reporting and Producing	
JRNL 5360	Global Reporting	

Elective

Complete one additional JRNL course. 4

GPA Requirement

2.000 GPA required in the minor

Journalism Studies, Minor

With an ever-growing array of information options available, and with the news media making news in the early days of the new administration in Washington, interest in the workings of journalism has never been higher. This minor is intended for those students who wish for a sophisticated media literacy, an understanding of the field that goes deeper than what can be gained in our popular Understanding Today's News course.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Note: Any student wishing to satisfy a minor in both journalism studies and journalism practice must take eight unique courses. No double counting. Journalism majors are not eligible for a minor in journalism studies.

617.373.4129 (fax)

Allen G. Feinstein, Senior Teaching Professor and Head Faculty Mentor,
a.feinstein@northeastern.edu

The Department of Music offers its music majors, music minors, and combined majors a cross-disciplinary approach to the study and practice of music, underscored by real-world experiential learning and cutting-edge technology. The music faculty are dedicated to three continuously interacting and integrated dimensions: the creation of music; its

production and promotion; and the study of its history, meaning, and impact on cultures around the globe—past, present, and future.

There are three concentrations in music: the Bachelor of Arts in Music, the Bachelor of Science in Music with Concentration in Music Technology, and the Bachelor of Science in Music with Concentration in Music Industry. Students in all three concentrations begin with a core of shared offerings, including a uniquely probing, cross-cultural, and interdisciplinary introduction to music, Music in Everyday Life (MUSC 1001), together with shared requirements in introductory theory and musicianship. With a common perspective offered by these courses, students then branch out to focus on their individual disciplines but also to interact and bring unique aspects of their disciplines together in a collaborative learning environment with other students.

Our signature program is the Bachelor of Arts in Music, designed to offer a variety of flexible advising paths that allow a focus on history, theory, ethnomusicology, performance, or other directions tailored to the students' individual interests.

The Bachelor of Science in Music with Concentration in Music Technology focuses on the creative application of digital sound technologies to a broad range of artistic, social, and industrial purposes, including experimental composition, film, video, theatre, game design, mobile applications, sound design for urban environments, and beyond. An emphasis is maintained throughout on imaginative exploration, collaboration across disciplines, and real-world experience.

The Bachelor of Science in Music with Concentration in Music Industry, the first such undergraduate program offered in Boston, is designed for students with an interest in fields such as artist management; the music products industry; the recording industry; arts administration; contracting and legal issues; financial and economics aspects of the music industry; and broadcast, mobile, and online media technologies.

Through an exchange program with the New England Conservatory (NEC), the Department of Music also offers a joint certificate in performance, where students may attend classes and take performance instruction at NEC in combination with offerings from the Northeastern University music catalog (see below).

While some music courses are designed for music majors, music minors and combined majors in music, and a variety of other disciplines, the Department of Music also offers elective survey courses and other study opportunities open to students across the Northeastern University campus. Also available are private lessons in a wide variety of instruments and voice, including a focus on genres ranging from traditional concert music to jazz to fusion, rock, and a variety of popular idioms.

An extensive concert series presents not only guest performers and ensembles from around the world but also performances by the Northeastern University Symphony Orchestra; the Northeastern University Wind Ensemble and Concert Band; the Northeastern University Choral Society; and the Jazz Ensemble, Jazz Choir, Contemporary Music Ensemble, Blues/Rock Fusion Ensemble, Rock Ensemble, Chamber Music Ensembles, and individual student recitals, along with an array of student-run music groups.

In addition to co-op, Dialogues of Civilization, and a range of other opportunities for experiential learning and study abroad, students may immediately begin to participate in student organizations, such as Green Line Records and other groups, that allow students actively to pursue their passions and aspirations.

Students may double concentrate in music industry and music technology. While students are encouraged to consider double majoring in the Bachelor of Arts in Music and other disciplines outside music, the BA cannot be combined with the concentration in music industry or the concentration in music technology.

Students may double count only one course between a concentration and a minor. Students may double count only one course between two different music minors. Should a student place out of a course in a minor, it must be replaced with another course.

Academic Progression Standards

Students must maintain at least a B– average in all major courses and complete all required music courses with grades of at least C. Students who fail to meet the above standards will be placed on departmental probation; those who remain on probation for two consecutive semesters will be dropped from the major.

Preapproved Template Programs in Music and in Music Industry

The Department of Music offers preapproved template programs in the following areas:

- Music
- Music industry
- Music technology

Each template program may be paired with another preapproved template program to create a combined major; to see a list of current preapproved template programs, visit the combined majors webpage (<http://www.northeastern.edu/registrar/major-2.html>).

Students may request admission to such a combined major via the Combined Major Approval form (<http://www.northeastern.edu/registrar/form-maj-comb.pdf>), which requires approval by both disciplines/colleges together with an approved curriculum. For additional information on preapproved template programs, see “Student-Requested Combined Major (p. 33).” For template program requirements, visit the myNortheastern web portal (<http://my.northeastern.edu>), click on the “Self-Service” tab, then on “My Degree Audit.”

NEC/NU Joint Certificate Programs in Music Performance

The Department of Music at Northeastern University (NU) and the New England Conservatory (NEC), administered through its School of Continuing Education, offer a Professional Studies Certificate in Music Performance. This program primarily serves undergraduate music majors who audition competitively and are dedicated to advancing their skills on an instrument or voice in the classical or jazz styles.

The certificate in music performance is *in addition to* the student’s NU undergraduate degree—it is an entirely separate and distinct credential. Credits are taken partly at Northeastern University and partly at the New England Conservatory and/or its continuing education division. Those courses taken directly from the New England Conservatory catalog require permission of NEC faculty but are part of a tuition exchange program shared between Northeastern University and the New England Conservatory; they do not carry additional tuition costs. Some courses may be taken through NEC’s School of Continuing Education, which is not part of the tuition exchange program; those courses are billed separately over and above tuition at Northeastern University and are not eligible for financial aid. Individual lessons with faculty at the New England Conservatory carry a lab fee each semester, which is billed separately from tuition.

Students should be aware that ensembles at NEC meet primarily during the morning and that academic courses offered at NEC meet primarily in the afternoons.

Programs

Bachelor of Arts (BA)

- Music (p. 179)

Bachelor of Science (BS)

- Music with Concentration in Music Technology (p. 185)

- Musical Theatre (p. 199) (offered by the Department of Theatre)
- Songwriting (p. 199)

Certificate

- NEC/NU Joint Certificate Program—Professional Studies Certificate in Music Performance (p. 199)

Music, BA

The Bachelor of Arts in Music at Northeastern engages students in the study of how music works and the many contexts in which it is created and received.

Students encounter a wide range of musical repertoires, theoretical approaches, and research strategies. While many students opt to major in music alone, many others enroll as part of a double major. This is especially true of young scholars who are aiming for careers in engineering, sciences, business, and fields in the humanities and social sciences who still want to pursue their interests in music. Students in the BA concentration take a variety of classes in history, theory, and ethnomusicology, and they may be active performers, participating in our many ensembles and taking private lessons. Students also participate in a wide array of co-ops and are encouraged to explore opportunities that conform to their interests.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond

specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

- NUPath requirements Creative Expression/Innovation (EI) and Interpreting Culture (IC) are met through the major course requirements.
- NUPath requirements Formal and Quantitative Reasoning (FQ), Societies and Institutions (SI), Analyzing and Using Data (AD), Difference and Diversity (DD), and Ethical Reasoning (ER) may be met through electives in the major.
- NUPath requirements Natural and Designed World (ND) must be met through general electives.

Introduction to College

Code	Title	Hours
MUSC 1000	Music at Northeastern	1

Music Theory and Musicianship

Code	Title	Hours
------	-------	-------

Music Theory Placement

All students must take a music theory placement exam. Students who do not place into MUSC 1201 must first take the following course:

MUSC 1119	Fundamentals of Western Music Theory
-----------	--------------------------------------

Required Music Theory

A grade of C or higher is required in each course:

MUSC 1201	Music Theory 1	4
-----------	----------------	---

Choose two courses from the following list: 8

MUSC 1119	Fundamentals of Western Music Theory
MUSC 1202	Music Theory 2
MUSC 2111	Algebra and Geometry of Music
MUSC 2208	Jazz Improvisation
MUSC 2303	Tonal Form
MUSC 2350	Acoustics and Psychoacoustics of Music
MUSC 3541	Music Analysis Seminar
MUSI 1204	Analyzing Popular Genres

Music in Context

Choose one from each category below. From the categories "Traditional," "Ethnomusicology," and "Contemporary," at least two must be at the 2000-level or higher. Courses may not double-count across the five areas.

Code	Title	Hours

Music with Concentration in Music Industry, BS

The Bachelor of Science in Music with Concentration in Music Industry, the first such undergraduate program offered in Boston, is designed for students with an interest in fields such as artist management; the music products industry; the recording industry; arts administration; contracting and legal issues; financial and economics aspects of the music industry; and broadcast, mobile, and online media technologies.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

NUpath requirements Creative Expression/Innovation (EI), Interpreting Culture (IC), Societies and Institutions (SI), and Analyzing and Using Data (AD) are met through the major course requirements.

NUpath requirements Difference and Diversity (DD) and Ethical Reasoning (ER) may be met through electives in the major.

NUpath requirements Natural and Designed World (ND) and Formal and Quantitative Reasoning (FQ) must be met through general electives.

Music Industry Requirements

Code	Title	Hours
Music Core		
MUSC 1000	Music at Northeastern	1
MUSC 1001	Music in Everyday Life	4
Music Theory Placement		

All students must take a theory placement exam. Students who do not place into MUSC 1201 must first take the following:

MUSC 1119	Fundamentals of Western Music Theory	4
-----------	--------------------------------------	---

Music Theory Requirement

MUSC 1201	Music Theory 1	4
MUSI 1204	Analyzing Popular Genres	4

Music in Context

Choose one from each of these categories: "Traditional," "Ethnomusicology," "Contemporary," and "Creative." Of the courses from "Traditional," "Ethnomusicology," "Contemporary," at least two must be at the 2000-level or higher. Courses may not double count across these areas.

<i>Traditional (complete one):</i>		4
------------------------------------	--	---

MUSC 1106	Women in Music
MUSC 1109	Introduction to Art, Drama, and Music
MUSC 1136	What's Playing at Symphony?
MUSC 2310	Popular Music Since 1945
MUSC 2311	Historical Traditions: America
MUSC 2312	Historical Traditions: Classical
MUSC 2320	40,000 Years of Music Technology
MUSC 2340	Divas, DJs, and Double Standards
MUSC 3470	War and Music

MUSC 1920	Pep Band

Music Industry

MUSI 1230	Introduction to Music Industry	4
-----------	--------------------------------	---

Music Industry Electives

Complete seven music industry electives, taking a minimum of one course in each of the following four categories and at least three courses from a single category. 28

Creating and Producing

Note: MUSI 1230 is not a prerequisite for the following courses:

MUSC 2210	Introduction to Songwriting
MUSC 2211	Advanced Songwriting
MUSI 2101	Demo Production for Songwriters
MUSI 2232	Music Recording 1
MUSI 2331	Music Recording 2
MUSI 3341	Music Recording 3—Mixing and Mastering
MUST 1220	Introduction to Music Technology
MUST 3421	Digital Audio Processing

Legal Aspects

Note: MUSI 1230 is a prerequisite for the following courses:

MUSI 2231	Music Licensing for Media
MUSI 3333	The Record Industry
MUSI 3335	Copyright Law for Musicians
MUSI 2341	Music Supervision 1

Music Business and Management

Note: MUSI 1230 is a prerequisite for the following courses:

MUSI 2233	Music in the Online and Mobile Environment
MUSI 3332	Artist Management
MUSI 3334	Music Products Industry
MUSI 3338	Music Industry Marketing and Promotion
MUSI 3340	Concert Promotion and Venue Management
MUSI 4530	Music Entrepreneurship

Music Industry Studies

Note: MUSI 1230 is a prerequisite for the following MUSI courses only:

MUSI 3401	Hip Hop in the Music Industry
MUSI 4601	Seminar in Music Industry

Business Course Requirements

Code	Title	Hours
Economics		
ECON 1116	Principles of Microeconomics	4
Accounting		
ACCT 1209	Financial Accounting and Reporting	4
Business Elective		
Complete one business course in the following subject areas:		4
ACCT, BUSN, ENTR, FINA, HRMG, INTB, MGMT, ORGB, MGSC, MISM, MKTG, SCHM, or STRT		

Capstone for Music Industry

Code	Title	Hours
Complete one of the following:		
MUSI 4601	Seminar in Music Industry	4
MUSI 4530	Music Entrepreneurship	

Music Industry Major Credit Requirement

Complete 77 semester hours in the major.
Minimum 2.667 GPA is required in the major.

Program Requirement

128 total semester hours required

Music with Concentration in Music Technology, BS

The Bachelor of Science in Music with Concentration in Music Technology focuses on the creative application of digital sound technologies to a broad range of artistic, social, and industrial purposes, including experimental composition, film, video, theatre, game design, mobile applications, sound design for urban environments, and beyond. An emphasis is maintained throughout on imaginative exploration, collaboration across disciplines, and real-world experience.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

- NUPath requirements Creative Expression/Innovation (EI), Interpreting Culture (IC), and Analyzing and Using Data (AD) are met through the major course requirements.
- NUPath requirements Difference and Diversity (DD) and Formal and Quantitative Reasoning (FQ) may be met through electives in the major.
- NUPath requirements Natural and Designed World (ND), Societies and Institutions (SI), and Ethical Reasoning (ER) must be met through general electives.

Computer Science and Music with Concentration in Music Technology, BS

The computer science and music combined major with concentration in music technology focuses on the creative application of digital sound technologies to a broad range of artistic, social, and industrial purposes. An emphasis is maintained throughout on imaginative exploration, collaboration across disciplines, and real-world experience. It is designed to give students a firm foundation in music and computing for digital audio technologies. This program is recommended for students with a strong background in music prior to entering Northeastern.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Computer Science Courses

Code	Title	Hours
Computer Science Overview		
CS 1200	Leadership Skill Development	1
CS 1210	Professional Development for CCIS Co-op	1
Computer Science Fundamental Courses		
A grade of C– or higher is required in computer science fundamental courses:		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
Computer Science Required Courses		
CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500	Object-Oriented Design	4

CS 4500 and CS 4501	Software Development and Recitation for CS 4500	4
IS 4300	Human Computer Interaction (Integrative)	4

Presentation Requirement

THTR 1170	The Eloquent Presenter	1
-----------	------------------------	---

Computer Science Elective Courses

With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.

Complete 8 credits of CS, IS, or DS classes that are not already required. Choose courses within the following ranges:

CS 2500 or higher, except CS 5010

IS 2000 or higher, except IS 4900

DS 2000 or higher, except DS 4900

Music Courses

Code	Title	Hours
Music Theory and Composition		
MUSC 1201	Music Theory 1	4
MUSC 1202	Music Theory 2	4
MUSC 3541	Music Analysis Seminar	4
MUST 1301	Introduction to Composition	4
Music in Context		
MUSC 1001	Music in Everyday Life	4
Contemporary		
Complete one of the following:		4
MUSC 2101	Black Popular Music	
MUSC 2310	Popular Music Since 1945	
MUSC 2315	History of Electronic Music	
MUSC 2320	40,000 Years of Music Technology	
MUSC 3560	Topics in Music since 1900	
MUSI 3401	Hip Hop in the Music Industry	
Music Technology		
MUST 1220	Introduction to Music Technology	4
MUST 2431	Computer Music Fundamentals	4
MUSC 2350	Acoustics and Psychoacoustics of Music	4
Music Industry		
Complete one of the following:		4
MUSI 1230	Introduction to Music Industry	
MUSI 2331	Music Recording 2	
MUSI 3335	Copyright Law for Musicians	
Music Technology Electives		
Complete two of the following:		8
MUST 4520	Interactive Music Programming	
MUST 4610	Composition for Electronic Instruments	
MUST 4XXX	Composing with Image and Sound	
MUST 4XXXX	Spatial Audio	
MUST 3540	Special Topics in Music Technology	
Music Technology Capstone		
MUST 4611	Music Technology Capstone/Senior Recital	4

Foundations of Psychology

Code	Title	Hours
PSYC 1101	Foundations of Psychology	4

Computing and Social Issues

Code	Title	Hours
Complete one of the following:		4
ANTH 3418	Wired/Unwired: Cybercultures and Technopolitics	
IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
PHIL 1145	Technology and Human Values	
SOCL 1280	The 21st-Century Workplace	
SOCL 3485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	

Computer Science English Requirement

Code	Title	Hours
College Writing		
ENGW 1111	First-Year Writing	4
Advanced Writing in the Disciplines		
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

Required General Electives

Code	Title	Hours
Complete five general electives.		20

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Exploring Creative Expression and Innovation
- Interpreting Culture
- Conducting Formal and Quantitative Reasoning
- Understanding Societies and Institutions
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Major GPA Requirement

Minimum 2.000 GPA required in all CS and IS courses

Complete 90 semester hours in the major.

Program Requirement

138 total semester hours required

Music and Communication Studies with Concentration in Music Industry, BS

The Bachelor of Science in Music with Concentration in Music Industry, the first such undergraduate program offered in Boston, is designed for students with an interest in fields such as artist management; the music products industry; the recording industry; arts administration; contracting and legal issues; financial and economics aspects of the music industry; and broadcast, mobile, and online media technologies.

The Department of Communication Studies is committed to providing students with both the communication skills and the understanding of the communication process required to thrive in a complex and changing society. Majors are required to demonstrate a mastery of the

fundamentals of effective communication, to learn the fundamentals of communication theory and practice, and to develop a distinct area of emphasis. Some of the more popular areas include argumentation and advocacy, organizational and health communication, international and intercultural communication, digital communication and social media, and media production. The curriculum is designed to enhance the understanding of human communication in a variety of contexts, to empower students to become informed and engaged citizens, and to provide the knowledge and skills required to live a rich personal and professional life.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

NUpath requirements Creative Expression/Innovation (EI), Interpreting Culture (IC), Societies and Institutions (SI), and Ethical Reasoning (ER) are met through the major course requirements.

NUpath requirements Natural and Designed World (ND), Formal and Quantitative Reasoning (FQ), Analyzing and Using Data (AD), and Difference and Diversity (DD) may be met through electives in the major.

Music Industry Requirements

Code	Title	Hours
Introduction to College		
MUSC 1000	Music at Northeastern	1
Music Core		
MUSC 1001	Music in Everyday Life	4
Music Theory Placement		
All students must take a theory placement exam. Students who do not place into MUSC 1201 must first take the following:		
MUSC 1119	Fundamentals of Western Music Theory	4
Music Theory Requirement		
MUSC 1201	Music Theory 1	4
Introductory Music Industry		
MUSI 1230	Introduction to Music Industry	4
Music in Context		
Choose one course from traditional, ethnomusicology, or contemporary categories.		4
Traditional		
MUSC 2311	Historical Traditions: America	
MUSC 2312	Historical Traditions: Classical	
MUSC 3470	War and Music	
MUSC 3550	Historical Traditions: Special Topics	
Ethnomusicology

Code	Title	Hours
Communication Studies Common Requirements		
COMM 1101	Introduction to Communication Studies	4
COMM 1112	Public Speaking	4
or COMM 2301	Communication Research Methods	
Foundation Course		
Complete one of the following:		4
COMM 1210	Persuasion and Rhetoric	
COMM 1231	Principles of Organizational Communication	
COMM 1225	Communication Theory	
COMM 1255	Communication in a Digital Age	
Cluster Course		
Complete one of the following:		4
COMM 1131	Sex, Relationships, and Communication	
COMM 2303	Global and Intercultural Communication	
COMM 2304	Communication and Gender	
COMM 2501	Communication Law	

COMM 2551	Free Speech in Cyberspace	
Writing-Intensive Courses		
Complete two of the following:		8
COMM 3200	Mobile Communication	
COMM 3201	Health Communication	
COMM 3230	Interpersonal Communication	
COMM 3304	Communication and Inclusion	
COMM 3320	Political Communication	
COMM 3330	Argumentation Theory	
COMM 3400	Rhetoric of Science	
COMM 3414	Great Speakers and Speeches 2, 1930–Present	
COMM 3415	Communication Criticism	
COMM 3445	Public Relations Principles	
COMM 3501	Free Speech: Law and Practice	
COMM 3530	Communication and Sexualities	
COMM 3532	Theories of Conflict and Negotiation	
COMM 3610	Communication, Politics, and Social Change	
COMM 4535	Nonverbal Social Interaction	
COMM 4605	Youth and Communication Technology	
COMM 4631	Crisis Communication and Image Management	

Communication Studies Electives		
Complete three COMM courses.		12

Integrative Requirement

Code	Title	Hours
Complete one of the integrative options below. If a communication studies course is taken, an additional music industry course is required, chosen from the list of music industry electives above.		4-8

Music Option		
Complete one of the following:		
MUSI 4601	Seminar in Music Industry	
MUSI 4530	Music Entrepreneurship	

Communication Studies Option		
Complete two of the following. One communication studies course is required:		
COMM 4608	Strategic Communication Capstone	
or COMM 4625	Online Communities	
MUSC 2000 to MUSC 5999		
MUSI 2000 to MUSI 5999		
MUST 2000 to MUST 5999		

Communication Studies Major Grade Requirement

No more than two grades below a C in communication studies courses may be used to satisfy degree requirements.

Program Requirement

Physics and Music with Concentration in Music Technology, BS

The combined major in physics and music provides a strong foundation in classical and modern physics, including studies of the various physical phenomena including electromagnetism, dynamics, building blocks of matter, energy, and radiation. It also provides students with a solid background in composition for acoustic and electronic instruments and for combined and/or interactive live and digital sources. The combined major allows students to learn how physical principles influence sound production and propagation.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Ethnomusicology, Minor

The minor in ethnomusicology offers students an interdisciplinary approach to exploring the richness of music in its cultural context.

The foundation of the minor is a unique introductory course, Music in Everyday Life (MUSC 1001), which investigates many dimensions of musical experience and music's connections to society. Students take in-depth electives that focus on the music of a region, tradition, global popular trends, etc. The minor culminates in a seminar that invites students to conduct their own ethnographic projects in and around Boston. Projects involving music's role in social justice issues are exciting options.

Ethnomusicological studies would enrich many programs or degrees, including but not limited to African-American studies; sociology; anthropology; Asian studies; Middle Eastern studies; Jewish studies; world language studies; cultural studies; women, gender, and sexuality studies; Latin American studies; religion; urban studies; Art + Design; cinema studies; communication studies; international affairs; theatre; political science; or health sciences. Music majors may also add this minor.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Courses

Code	Title	Hours
MUSC 1001	Music in Everyday Life	4
Complete one of the following:		4
MUSC 4641	Seminar in Ethnomusicology: Issues in Fieldwork and Methodology	
MUSC 2330	Musical Communities of Boston	

Ethnomusicology Electives

Code	Title	Hours
Complete two of the following:		8
MUSC 1112	Jazz	
MUSC 1131	Music of Latin America and the Caribbean	
MUSC 2101	Black Popular Music	
MUSC 2130	Music of Asia	

GPA Requirement

2.000 GPA required in the minor

Music, Minor

The minor in music offers students an opportunity to explore electives in music along with a music theory course appropriate to the student's level of experience. The foundation of the minor is a unique introductory course, Music in Everyday Life (MUSC 1001), which investigates many dimensions of the musical experience and music's contributions to culture.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

A grade of C or better is required in all music courses.

Music Theory and Musicianship

Code	Title	Hours
MUSC 1001	Music in Everyday Life	4
Complete one course from the following. Music theory placement test permits placement into Music Theory 1 or higher.		4
MUSC 1119	Fundamentals of Western Music Theory	
MUSC 1201	Music Theory 1	
MUSC 1202	Music Theory 2	
MUSI 1204	Analyzing Popular Genres	

Music Literature Electives

Code	Title	Hours
Electives		
Complete two courses from the following. Four semesters of ensembles may be substituted for one elective:		8
MUSC 1106	Women in Music	
MUSC 1109	Introduction to Art, Drama, and Music	
MUSC 1110	Music in Popular Culture	
MUSC 1111	Rock Music	
MUSC 1112	Jazz	
MUSC 1113	Film Music	
MUSC 1114	Mozart	
MUSC 1115	Debussy and the Music of Paris	
MUSC 1116	Beethoven	
MUSC 1118	Music Therapy 1	
MUSC 1131	Music of Latin America and the Caribbean	
MUSC 2311	Historical Traditions: America	
MUSC 2101	Black Popular Music	
MUSC 2320	40,000 Years of Music Technology	
MUSC 2330	Musical Communities of Boston	
MUSC 2312	Historical Traditions: Classical	
MUSC 2313	Historical Traditions: World	
MUSC 2317	Punk Rock	
MUSC 2340	Divas, DJs, and Double Standards	
MUSC 2351	Music, Sound, and the Screen	
MUSC 3550	Historical Traditions: Special Topics	
MUSC 3560	Topics in Music since 1900	
MUSC 4641	Seminar in Ethnomusicology: Issues in Fieldwork and Methodology	

Ensembles

All ensembles are 1 credit:

MUSC 1904	Chorus
MUSC 1905	Concert Band
MUSC 1906	Orchestra
MUSC 1907	Wind Ensemble
MUSC 1911	Jazz Ensemble
MUSC 1912	Rock Ensemble

MUSC 1913	Blues/Rock Ensemble
MUSC 1914	Create Your Own Music
MUSC 1915	Chamber Ensemble
MUSC 1916	Contemporary Music Ensemble
MUSC 1917	Jazz Choir and Combo
MUSC 1918	World Music Ensemble
MUSC 1919	Fusion Ensemble
MUSC 1920	Pep Band

GPA Requirement

2.000 GPA required in the minor

Music Composition, Minor

The minor in composition offers student composers at all levels a concentrated opportunity to build composition skills. The minor includes a foundation in music theory and introduction to compositional approaches, composition lessons, and additional course work to broaden the student composer's understanding and appreciation of the intersection of music and culture.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Courses

Code	Title	Hours
MUSC 1001	Music in Everyday Life	4
MUSC 1201	Music Theory 1	4
MUSC 1202	Music Theory 2	4
MUSC 1301	Introduction to Composition	4
MUSC 1903	Composition Lessons	1

Elective

Code	Title	Hours

GPA Requirement

2.000 GPA required in the minor

Music Performance, Minor

The minor in music performance offers students an opportunity to improve on their instrument or voice through ensemble performance, private lessons, recitals, and instruction in music theory. Students also take an elective in music that can be used to explore a genre, musical culture, or composer related to the student's performance area or can be used to broaden the student's musical horizons beyond their area of focus.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Note: Acceptance into the minor requires an audition.

Music Core

A grade of C or higher is required in music theory courses:

Code	Title	Hours
MUSC 1001	Music in Everyday Life	4
MUSC 1201	Music Theory 1	4

Music Lessons

Code	Title	Hours
Complete four music lesson courses (courses are repeatable):		4
MUSC 1901	Music Lessons 1	
MUSC 1902	Music Lessons 2	

Music Ensemble

Code	Title	Hours
Complete five music ensembles:		5
MUSC 1904	Chorus	
MUSC 1905	Concert Band

Music Recitals

Code	Title	Hours
MUSC 3410	Recital 1	1
MUSC 4622	Recital 2	1

GPA Requirement

2.000 GPA required in the minor

Music Recording, Minor

The minor in music recording offers students a chance to explore the theory and practice of recording from basic principles through studio sessions and mixing/mastering. An elective rounds out the minor, giving students an opportunity to learn about the intersection of recording and copyright, technology, entertainment, and other disciplines.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Courses

Code	Title	Hours
MUSI 2232	Music Recording 1	4
MUSI 2331	Music Recording 2	4
MUSI 3341	Music Recording 3—Mixing and Mastering	4

Recording Elective

GPA Requirement

2.000 GPA required in the minor

NEC/NU Joint Certificate Program—Professional Studies Certificate in Music Performance

The Department of Music at Northeastern University (NU) and the New England Conservatory (NEC), administered through its School of Continuing Education, offer a Professional Studies Certificate in Music Performance. This program primarily serves undergraduate music majors who audition competitively and are dedicated to advancing their skills on an instrument or voice in the classical or jazz styles.

The certificate in music performance is *in addition to* the student's NU undergraduate degree—it is an entirely separate and distinct credential. Credits are taken partly at Northeastern University and partly at the New England Conservatory and/or its continuing education division. Those courses taken directly from the New England Conservatory catalog require permission of NEC faculty but are part of a tuition exchange program shared between Northeastern University and the New England Conservatory, so they are treated as part of a Northeastern student's tuition package or otherwise billed like NU classes. Some courses may

be taken through NEC's School of Continuing Education, which is not part of the tuition exchange program; those courses are billed separately over and above tuition at Northeastern University and are not eligible for financial aid. Individual lessons with faculty at the New England Conservatory carry a lab fee each semester, which is billed separately from tuition.

Students should be aware that ensembles at NEC meet primarily during the morning and that academic courses offered at NEC meet primarily in the afternoons.

Program Requirements

Complete all courses listed below unless otherwise indicated.

Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Northeastern University Requirements

Complete 22 credits of course work at Northeastern University as indicated below.

Code	Title	Hours
Music Theory and Musicianship Placement		
All students must take a theory placement exam. Students who do not place into MUSC 1201 or MUSI 1203 must first take the following course:		
MUSC 1119	Fundamentals of Western Music Theory	
Credits for MUSC 1119 do not count toward the certificate.		
Music Theory and Musicianship ¹		
MUSC 1201	Music Theory 1	4
MUSC 1202	Music Theory 2	4
Music in Context (Traditional, Ethnomusicological, Contemporary)		
Complete 8 credits from the following:		8
MUSC 1106	Women in Music	
MUSC 1109	Introduction to Art, Drama, and Music	
MUSC 1110	Music in Popular Culture	
MUSC 1111	Rock Music	
MUSC 1112	Jazz	
MUSC 1113	Film Music	
MUSC 1114	Mozart	
MUSC 1115	Debussy and the Music of Paris	
MUSC 1116	Beethoven	
MUSC 1131	Music of Latin America and the Caribbean	
MUSC 1136	What's Playing at Symphony?	
MUSC 1140	Global Pop Music	
MUSC 1141	Wired for Sound	
MUSC 2101	Black Popular Music	
MUSC 2130	Music of Asia	
MUSC 2311	Historical Traditions: America	
MUSC 2312	Historical Traditions: Classical	
MUSC 2313	Historical Traditions: World	
MUSC 2315	History of Electronic Music	
MUSC 2317	Punk Rock	
MUSC 2320	40,000 Years of Music Technology	
MUSC 2330	Musical Communities of Boston	
MUSC 2340	Divas, DJs, and Double Standards	

MUSC 2351	Music, Sound, and the Screen
MUSC 3470	War and Music
Note: Since the following course is repeatable, music majors and combined majors may count the credits for the second time they take this course toward the music performance certificate. Students may utilize special topics courses in music history to fulfill this requirement. If interested in this option, students should consult the coordinator of the certificate programs via email.	
MUSC 3550	Historical Traditions: Special Topics
MUSC 3560	Topics in Music since 1900
MUSC 4641	Seminar in Ethnomusicology: Issues in Fieldwork and Methodology
MUSI 3401	Hip Hop in the Music Industry
Ensembles	
Complete six music ensembles:	
MUSC 1904	Chorus
MUSC 1905	Concert Band
MUSC 1906	Orchestra
MUSC 1907	Wind Ensemble
MUSC 1911	Jazz Ensemble
MUSC 1912	Rock Ensemble
MUSC 1913	Blues/Rock Ensemble
MUSC 1914	Create Your Own Music
MUSC 1915	Chamber Ensemble
MUSC 1916	Contemporary Music Ensemble
MUSC 1917	Jazz Choir and Combo
MUSC 1918	World Music Ensemble
MUSC 1919	Fusion Ensemble
MUSC 1920	Pep Band

¹ Music majors with a concentration in music industry may substitute (MUSI 1203) for Music Theory 1 (MUSC 1201) and Analyzing Popular Genres (MUSI 1204) for Music Theory 2 (MUSC 1202).

New England Conservatory Requirements

Complete 26 credits of course work at New England Conservatory School of Continuing Education as indicated below.

Code	Title	Hours
Private Studio Instruction		
Complete 16 credits of (repeatable) private studio instruction with New England Conservatory School of Continuing Education faculty. These credits may be accumulated in units of 2, 3, or 4 credits per semester. All private lessons require audition by NEC/NU faculty in order to assign private teacher placement. After being placed with a private teacher, and working with their certificate advisor, students must confirm with that teacher the length and number of lessons they will receive.		16

Theatre

Website (<https://camd.northeastern.edu/theatre>)

Scott Edmiston, MFA

Professor of the Practice and Chair

180 Ryder Hall

617.373.2244

Antonio Ocampo-Guzman, Associate Professor and Major Mentor,
antonio@northeastern.edu

Jonathan Carr, Assistant Teaching Professor and Minor Mentor,
jo.carr@northeastern.edu

Darren Evans, Theatre Operations Specialist, d.evans@northeastern.edu

The Northeastern Department of Theatre is a community dedicated to creativity, collaboration, and excellence in the pursuit of innovative ways to see, to investigate, and to make theatre for a new generation. We offer students a transformative education by aligning performance and production with academic inquiry and professional experiential learning. Our curriculum embraces diverse techniques, philosophies, and measures of success.

Connecting classroom experiences to the stage, we produce a diverse season of plays and musicals, ranging from classical theatre to world premieres. Nearly 50 performances take place annually in the Studio Theatre, where students collaborate with faculty and professional guest artists to achieve the highest standard of professionalism. With more than 30 co-op partners around the globe, students can unite the career elements of a conservatory program with the comprehensive education of a liberal arts degree.

Our multidimensional students develop a unique understanding of creative entrepreneurship. They are actors, directors, designers, technicians, playwrights, stage managers, producers, and administrators.

With generosity, integrity, respect, and rigor, we explore theatre as a living art that engages with our global society and the moment in which we live.

Academic Progression Standards

Students must receive a minimum grade of 2.000 in major courses. The following courses are recommended to be taken by the end of the fourth semester (third semester for transfer students):

Code	Title	Hours
THTR 1101	Introduction to Theatre	4
THTR 1120	Acting 1	4
THTR 1131	Technical Theatre 1	4
THTR 1270	Introduction to Theatrical Design	4
THTR 2325	From Script to Stage	4

Preapproved Template Program in Theatre

The Department of Theatre offers a preapproved template program that may be paired with another preapproved template program to create a combined major; to see a list of current preapproved template programs, visit our combined majors webpage (<https://camd.northeastern.edu/theatre/academics/undergraduate/flexible-curriculum>).

Students may request admission to such a combined major via the Combined Major Approval form (<http://www.northeastern.edu/registrar/form-maj-comb.pdf>), which requires approval by both disciplines/colleges together with an approved curriculum. For additional information on preapproved template programs, see “Student-Requested Combined Major (p. 33).” For template program requirements, visit the myNortheastern web portal (<http://my.northeastern.edu>), click on the “Self-Service” tab, then on “My Degree Audit.”

Theatre, BA

The Northeastern Department of Theatre is a community dedicated to creativity, collaboration, and excellence in the pursuit of innovative ways to see, to investigate, and to make theatre for a new generation. We offer

students a transformative theatre education by aligning performance and production with academic inquiry and professional experiential learning. Our multidimensional students develop a unique understanding of professionalism and entrepreneurship as the foundations of meaningful careers. We embrace diverse methods, philosophies, and measures of success. Through values of generosity, integrity, respect, and rigor, we explore theatre as a living art that engages with our global society and the moment in which we live.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

NUpath requirements Creative Expression/Innovation (EI), Interpreting Culture (IC), and Societies and Institutions (SI) are met through the major course requirements.

NUpath requirements Formal and Quantitative Reasoning (FQ), Difference and Diversity (DD), and Ethical Reasoning (ER) may be met through electives in the major.

NUpath requirements Natural and Designed World (ND) and Analyzing and Using Data (AD) must be met through general electives.

Theatre Major Requirements

A minimum grade of C is required for all theatre courses.

American Sign Language and Theatre, BS

The American Sign Language (ASL) Program curriculum is an intensive program of study dedicated to preparing individuals to interact in a positive and supportive manner with members of the American Deaf Community. This Program is designed to assist students in acquiring competence in American Sign Language, developing an understanding of the American Deaf Community and its culture, and applying their linguistic and cultural skills and knowledge to a particular academic area of study.

This major is designed for students who want to combine an understanding of the American Deaf Community and its culture to the study and making of theatre, including performance, design, and production. It offers both classroom and experiential learning on the creative, social, and linguistic relationship between theatre and the American Deaf Community. Students may study acting, dramatic literature, and production design to develop the skills to be professional ASL/English interpreters and/or performers for theatrical productions.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Experiential Liberal Arts

All undergraduate students in the College of Social Sciences and Humanities are required to complete the Experiential Liberal Arts Requirement (p. 622).

Communication Studies and Theatre, BA

The Department of Communication Studies and the Department of Sociology offer an interdisciplinary combined major in communication studies and theatre. The combined major integrates the study of communication skills and processes with the study of theater history, playwriting, acting, and directing, as well as costume design, lighting, and scenery.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

NUpath requirements Interpreting Culture (IC), Creative Expression/Innovation (EI), Societies and Institutions (SI), and Ethical Reasoning (ER) are met through the major course requirements.

NUpath requirements Natural and Designed World (ND), Formal and Quantitative Reasoning (FQ), Analyzing and Using Data (AD), and Difference and Diversity (DD) may be met through electives in the major.

Communication Studies Requirements

Code	Title	Hours
------	-------	-------

Communication Studies Common Requirements

COMM 1000	Communication Studies at Northeastern	1
COMM 1101	Introduction to Communication Studies	4
COMM 1112	Public Speaking	4
or COMM 2301	Communication Research Methods	

Foundation Course

Complete one of the following:		4
COMM 1210	Persuasion and Rhetoric	
COMM 1231	Principles of Organizational Communication	
COMM 1225	Communication Theory	
COMM 1255	Communication in a Digital Age	

Cluster Course

Complete one of the following:		4
COMM 1131	Sex, Relationships, and Communication	
COMM 2303	Global and Intercultural Communication	
COMM 2304	Communication and Gender	
COMM 2501	Communication Law	
COMM 2551	Free Speech in Cyberspace	

Writing-Intensive Courses

Complete two of the following:		8
COMM 3200	Mobile Communication	
COMM 3201	Health Communication	
COMM 3230	Interpersonal Communication	
COMM 3304	Communication and Inclusion	
COMM 3320	Political Communication	
COMM 3330	Argumentation Theory	
COMM 3400	Rhetoric of Science	
COMM 3414	Great Speakers and Speeches 2, 1930–Present	
COMM 3415	Communication Criticism	
COMM 3445	Public Relations Principles	
COMM 3501	Free Speech: Law and Practice	
COMM 3530	Communication and Sexualities	

COMM 3532	Theories of Conflict and Negotiation
COMM 3610	Communication, Politics, and Social Change
COMM 4535	Nonverbal Social Interaction
COMM 4605	Youth and Communication Technology
COMM 4631	Crisis Communication and Image Management

Communication Studies Electives	
Complete three COMM courses.	12

Theatre Requirements

A minimum grade of C is required in all theatre courses.

Code	Title	Hours
Foundational Stages		
THTR 1101	Introduction to Theatre	4
THTR 1120	Acting 1	4
THTR 1131	Technical Theatre 1	4

Cultural Anthropology and Theatre, BA

This major is designed for students who want to combine a knowledge of the art of theatre, including performance, design, and production, with sociocultural theories and conceptual frameworks for understanding human behavior. It offers both classroom and experiential learning in the practice of making theatre and performance theories with cross-cultural approaches. Successful students develop an understanding of theatre's impact on past and present cultures, as well as a deeper awareness of the world in which they live.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Anthropology Requirements

Code	Title	Hours
Foundation Courses		
ANTH 1101	Peoples and Cultures	4
ANTH 2305	Global Markets and Local Culture	4
ANTH 3421	Foundations of Anthropological Theory	4
ANTH 3410	Ethnographic Field Experience	4
Advanced Area Courses		
Complete two of the following:		
ANTH 4350	Ethnography of Southeast Asia	
ANTH 4500	Latin American Society and Development	
ANTH 4505	Native North Americans	
ANTH 4510	Anthropology of Africa	
ANTH 4515	Culture and Politics in Modern India	
Anthropology Electives		
Complete six courses in the following range. Two study-abroad courses may count toward this requirement with prior permission from the department:		24
ANTH 2300 to ANTH 4999		
Social Science Electives		
Complete three social science courses from the following subject areas:		12
AFRS, AFAM, CRIM, ECON, HUSV, HIST, INTL, LING, LPSC, POLS, PSYC, SOCL		

Theatre Requirements

A minimum grade of C is required in all theatre courses.

A GPA of 2.000 for major courses is required.

Program Requirement

128 total semester hours required

English and Theatre, BA

The Department of English and the Department of Theatre offer an interdisciplinary combined major that integrates performance, design, production, and dramatic literature with literary studies, digital humanities, and creative writing. This combined major offers both classroom and experiential learning in making theatre, playwriting, and dramaturgy with the study of the diverse historical, cultural, and aesthetic contexts of diverse English and American literatures. Students develop the capacity for interpreting a variety of texts through performance and writing to engage diverse audiences.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

BA Language Requirements

All BA students are required to complete the BA language requirements (p. 40).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Experiential Liberal Arts

All undergraduate students in the College of Social Sciences and Humanities are required to complete the Experiential Liberal Arts Requirement (p. 622).

English Requirements

Code	Title	Hours
English Course-Level Requirement		
In addition to the capstone, two of the courses chosen from the lists below must be numbered 3000–4999.		
Introduction to College		
ENGL 1000	English at Northeastern	1
Foundational Courses		
ENGL 1400	Introduction to Literary Studies	4
ENGL 1160	Introduction to Rhetoric	4
or ENGL 1410	Introduction to Writing Studies	
Diversity		
Complete one of the following courses. This course may also be used to fulfill an additional English requirement below:		4
ENGL 2150	Literature and Digital Diversity	
ENGL 2296	Early African-American Literature	
ENGL 2450	Postcolonial Literature	
ENGL 2451	Postcolonial Women Writers	
ENGL 2455	American Women Writers	
ENGL 2460	Multiethnic Literatures of the U.S.	
ENGL 2470	Asian-American Literature	
ENGL 2760	Writing in Global Contexts	
ENGL 3663	The African-American Novel	
ENGL 3676	Representing Gender and Sexuality in Literature	
ENGL 3678	Bedrooms and Battlefields: Hebrew Bible and the Origins of Sex, Gender, and Ethnicity	
ENGL/JWSS 3685	Modern and Contemporary Jewish Literature	
Pre-Nineteenth-Century Literature		
Complete one of the following:		4
ENGL 1600	Introduction to Shakespeare	
ENGL 1700	Global Literature to 1500	
ENGL 2240	17th-Century British Literature	
ENGL 2296	Early African-American Literature	
ENGL 3618	Milton	
ENGL/JWSS 3678	Bedrooms and Battlefields: Hebrew Bible and the Origins of Sex, Gender, and Ethnicity	
ENGL 4000	Topics in Early Literatures	
ENGL 4010	Topics in Shakespeare	
ENGL 4020	Topics in 17th- and 18th-Century Literatures	
Nineteenth-, Twentieth-, and Twenty-First-Century Literature		
Complete one of the following:		4
ENGL 2260	Romantic Poetry	
ENGL 2330	The American Renaissance	
ENGL 2340	American Realism	
ENGL 3619	Emerson and Thoreau	
ENGL 3720	19th-Century Major Figure	
ENGL 4040	Topics in 19th-Century Literatures	
ENGL 2301	The Graphic Novel	
ENGL 2410	Contemporary American Literature	
ENGL 2440	The Modern Bestseller	

ENGL 2600	Irish Literary Culture (Abroad)
ENGL 2610	Contemporary Israeli Literature and Art (Abroad)
ENGL/JWSS 3685	Modern and Contemporary Jewish Literature
ENGL 3730	20th- and 21st-Century Major Figure

Theories and Methods

Complete one of the following: 4

ENGL 1140	Grammar: The Architecture of English
ENGL 1160	Introduction to Rhetoric
ENGL 1410	Introduction to Writing Studies
ENGL 2150	Literature and Digital Diversity
ENGL 3325	Rhetoric of Law
ENGL 3340	Technologies of Text
ENGL 3370	Writing Cultures
ENGL 3381	The Practice and Theory of Teaching Writing
ENGL 3700	Narrative Medicine
ENGL 4100	Topics in Literary Criticism
ENGL 4400	Opening the Archive
ENGL 4410	Research in Rhetoric and Writing
LING 1150	Introduction to Language and Linguistics
LING 2350	Linguistic Analysis
LING 3450	Syntax
LING 3452	Semantics
LING 3454	History of English
LING 3456	Language and Gender
LING 3458	Topics in Linguistics

Comparative Literature

Complete one of the following: 4

ENGL 1120	Trouble in Utopia
ENGL 1130	Animals, Objects, Humans
ENGL 1450	Reading and Writing in the Digital Age
ENGL 1500	British Literature to 1800
ENGL 1502	American Literature to 1865
ENGL 1503	American Literature 1865 to Present
ENGL 2150	Literature and Digital Diversity
ENGL 2370	The Modern Short Story
ENGL 2380	The Modern Novel
ENGL 2400	Modern Poetry
ENGL 2420	Contemporary Poetry
ENGL 2430	Contemporary Fiction
ENGL 2450	Postcolonial Literature
ENGL 2451	Postcolonial Women Writers
ENGL 2455	American Women Writers
ENGL 2460	Multiethnic Literatures of the U.S.
ENGL 2470	Asian-American Literature
ENGL 2510	Horror Fiction
ENGL 2520	Science Fiction
ENGL 2600	Irish Literary Culture (Abroad)
ENGL 2620	What Is Nature? (Abroad)
ENGL 2690	Boston in Literature
ENGL 3427	The Literature of Science

ENGL 3487	Film and Text (Abroad)
ENGL 3582	Children's Literature
ENGL 3663	The African-American Novel
ENGL 3676	Representing Gender and Sexuality in Literature
ENGL 4070	Topics in Genre

Writing

Complete one of the following: 4

ENGL 2700	Creative Writing
ENGL 2710	Style and Editing
ENGL 2730	Digital Writing
ENGL 2740	Writing and Community Engagement
ENGL 2760	Writing in Global Contexts
ENGL 2770	Writing to Heal
ENGL 2780	Visual Writing: Writing Visuals
ENGL 2850	Writing for Social Media: Theory and Practice
ENGL 3375	Writing Boston
ENGL 3376	Creative Nonfiction
ENGL 3377	Poetry Workshop
ENGL 3378	Fiction Workshop
ENGL 3380	Topics in Writing
ENGL 3382	Publishing in the 21st Century
ENGL 3384	The Writer's Marketplace

Capstone

ENGL 4710	Capstone Seminar	4
or ENGL 4720	Capstone Project	

English Electives

Complete two additional ENGL electives. 8

Theatre Requirements

A minimum grade of C is required in all theatre courses.

Code	Title	Hours

Theatre, Minor

Theatre minors are important and fully engaged members of our theatre department and community. Minors may be interested in becoming professional theatre artists or looking for creative inspiration or to enhance their communication skills. No two student experiences are alike, and you can choose the path that matches your theatre interests and ambitions.

Minor Requirements

Complete all courses listed below unless otherwise indicated.

Note: No student may receive a theatre minor as a result of external transfer credit only.

Required Course

Code	Title	Hours
THTR 1101	Introduction to Theatre	4

Foundational Courses

Participate in a theatre department production:		
THTR 1100	Production Experience 1	1

NOTE: If cast in a substantial role, THTR 3700 Rehearsal and Production (4 semester hours) can be substituted for THTR 1100.

GPA Requirement

2.000 GPA required in the minor

Dramatic Literature and the Human Experience, Minor

This minor is designed for students with an interest in experiencing theatre as ideas, connecting theatre and creative writing, and understanding human behavior and psychology as captured by the written word. Students can select a personalized path of study to explore a range of diverse and innovative plays, playwrights, dramatic theories, forms, and movements spanning from Ancient Greece to today.

The dramatic literature and human experience minor combines courses from the Department of Theatre with additional choices from the English, communication studies, and media and screen studies departments.

Minor Requirements

Complete all courses listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
THTR 1101	Introduction to Theatre	4

Electives

Code	Title	Hours
Choose three from the following:		12
Note: Two of the three electives must be selected within the theatre curriculum.		
CINE 3389	Screenwriting	

COMM 1511	Communication and Storytelling
ENGL 1600	Introduction to Shakespeare
THTR 2300	Classics of Global Theatre
THTR 2315	Rebels of Modern Drama
THTR 2320	America Onstage: Dramatizing the Dream
THTR 2325	From Script to Stage
THTR 2330	Playwriting
THTR 2335	Boston Theatre Experience
THTR 2340	Theatre and Society
THTR 2500	Breaking the Glass Ceiling: Women in Theatre
THTR 3200	Queer Theatre and Performance

Note: For theatre majors, only Introduction to Theatre (THTR 1101) may be double counted within the existing theatre requirements. They must take three additional courses to complete the minor (for a total of six dramatic literature courses).

GPA Requirement

2.000 GPA required in the minor

Global Fashion Studies, Minor

This program of study has grown from steadily increasing student enthusiasm in fashion history and costume design courses offered by the Department of Theatre. The primary focus of this new minor is on the context, culture, and practices of the fashion industry. This minor will appeal to students whose interests lie in fashion marketing, fashion journalism, fashion photography, and fashion and textile technology.

As a prominent global industry, fashion offers employment opportunities in a wide variety of areas. This new minor allows Northeastern students to identify, analyze, demonstrate, and communicate how the evolving and highly competitive fashion industry functions artistically, socially, historically, economically, ethically, and culturally in a global market. Courses in this minor include opportunities for design thinking and collaborative maker activities as well as the development of innovation and entrepreneurship.

Minor Requirements

Complete all courses listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
Complete one of the following:		4
THTR 1236	Introduction to Global Fashion Studies: History, Theory, and Contemporary Practice	
THTR 1237	Introduction to Global Fashion Studies Abroad: History, Theory, and Contemporary Practice	

Electives

Code	Title	Hours
Complete two of the following:		8

THTR 2310	History of Musical Theatre	
THTR 2330	Playwriting	
THTR 3570	Musical Theatre Performance	

GPA Requirement

2.000 GPA required in the minor

Professional Presentation, Minor

Whether you are speaking at a meeting, engaging an audience, pitching a new idea, or energizing your team, effective presentation skills are essential to professional success. This dynamic, interdisciplinary minor is designed to help you become a more confident, creative, and compelling communicator. Uniting the acting training of theatre with practical techniques of communications studies, develop an individualized course of study that will empower your voice and speech, cultivate your onstage persona, and develop high-impact presentation skills to enhance your career prospects.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Presentation Requirement

Code	Title	Hours
Complete two of the following:		8
COMM 1112	Public Speaking	
COMM 1113	Business and Professional Speaking

THTR 1125	Improvisation	
THTR 1130	Introduction to Acting	
THTR 1135	Introduction to Acting Abroad	
THTR 1160	The Professional Voice	
THTR 1165	The Professional Voice Abroad	
THTR 2345	Acting for the Camera	

GPA Requirement

2.000 GPA required in minor

Theatrical Design, Minor

This minor is intended for students with an interest in design as the collaborative art of transforming ideas into images that support live performance; design as an expression of human experience; design as a method of inquiry and problem solving. It encourages interdisciplinary learning by connecting the study of theatre with studio art, visual communication, design thinking, spatial design, and visual storytelling.

The theatrical design minor combines courses from the Department of Theatre with additional choices from the Department of Art + Design, the Department of Music, and the Department of Architecture.

Minor Requirements

Complete all courses listed below unless otherwise indicated.

Foundational Requirements

Code	Title	Hours
THTR 1100	Production Experience 1	1
THTR 1270	Introduction to Theatrical Design	4

Design Area

Code	Title	Hours

Cynthia Elcock, *Academic Assistant*, c.elcock@northeastern.edu

Modern business faces many opportunities and challenges due to increasing globalization of economies; political change; and the effects of foreign policy, technological advances, regulatory policies, and economic policies. The result is increased demand for highly educated individuals equipped to analyze and address this changing environment.

Programs in the D'Amore-McKim School of Business are designed for students who are preparing to take on managerial responsibility or starting their own companies. These programs seek to help students develop the ability to recognize and solve business and organizational problems and understand the role of business in the community, the nation, and the world. The school strives to assist students in becoming global citizens, designing innovative solutions, and developing their own professional paths and passions.

The school offers Bachelor of Science degrees in:

- Business Administration
- International Business
- Combined Majors—see Combined Majors section

For each degree program students must choose one of the concentrations listed below:

- Accounting
- Entrepreneurship and Innovation
- Finance
- Management
- Management Information Systems
- Marketing
- Supply Chain Management

The business curriculum is enhanced by courses in the sciences, humanities, and social sciences. In addition to their academic courses, all students are required to complete a cooperative education plan.

Co-op provides a learning experience beyond the classroom. Textbook examples come to life in real-world business settings where business theories are applied to actual business problems. In turn, these experiences serve to stimulate inquiry and discussion back in the classroom. This interaction between college studies and cooperative education sets the stage for a lifetime of learning.

The undergraduate program of the D'Amore-McKim School of Business meets the standards of the American Assembly of Collegiate Schools of

Business for faculty and student quality, curriculum design, and overall university support.

After graduation, students may obtain jobs in all aspects of business, both domestically and internationally, as well as in nonprofits and government.

Academic Progression Standards

In addition to meeting the university progression standards, students must achieve a 2.000 GPA in business courses.

Freshmen must complete at least 32 semester hours (SH) in order to progress to sophomore status. Freshmen who earn fewer than 32 SH must make up the difference prior to graduation. Students beyond the freshman year must complete at least 16 SH each in-school (not on co-op) full semester and 8 SH each in-school summer half semester in order to progress to the next class standing.

Students who do not meet academic progression standards will be placed on academic probation and may be subject to dismissal from the university.

Pass/Fail Option

D'Amore-McKim School of Business students may opt to take courses on a pass/fail basis in accordance with university policy but should be aware that this policy applies to nonbusiness courses that will count as open electives only. Business courses may not be taken pass/fail under any circumstance.

Taking Courses While on Co-op

It is D'Amore-McKim School of Business policy that, with permission of their academic advisor, co-op coordinator, and employer, students may take a maximum of one class while on co-op during the fall, spring, or summer term.

External Transfer to the D'Amore-McKim School of Business

External transfer students are accepted from other academic institutions during the fall and spring terms. Applications and accompanying materials are submitted directly to the Admissions Office.

The D'Amore-McKim School of Business at Northeastern University is accredited by the Association for the Advancement of Collegiate Schools of Business (AACSB) and as such complies with the following regulations governing the transferring of credit:

COURSES FROM AN AACSB-ACCREDITED INSTITUTION

Students may transfer a maximum of 80 SH of credit. A combination of 60 SH of nonbusiness courses and/or 28 SH of business courses will be accepted; 64 SH may be applied as credits toward the minimum 128 SH required for degree conferral.

COURSES FROM A NON-AACSB-ACCREDITED INSTITUTION

Students may transfer a maximum of 60 SH of credit. A combination of 52 SH of nonbusiness courses and/or 20 SH of business courses will be accepted.

Some courses are not eligible for transfer. Check with the Office of Undergraduate Admissions for more details.

Graduation Requirements

The school reserves the right to amend programs, courses, and degree requirements to fulfill its educational responsibility to respond to relevant changes in the field.

Bachelor of Science degree candidates must complete all prescribed work of the curriculum in which they seek to qualify, currently 128 SH. The degree not only represents the formal completion of selected courses but also indicates professional study in the major or concentration. A GPA of 2.000 and a C average in all business courses are required for graduation.

Bachelor of Science in Business Administration, BSBA

The Bachelor of Science in Business Administration program integrates the theory and practice of management through active learning, problem-driven research, corporate partnerships, and experiential assignments. As part of the degree program, all students are expected to participate in the co-op program, where they participate in paid work placements related to their field of study. The BS degree can be accomplished using the four-year co-op plan or with the five-year co-op plan.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

NUPath requirements Differences and Diversity (DD), Creative Expression and Innovation (EI), and Natural and Designed World (ND) are not explicitly satisfied by required courses in the business curriculum at this time. Students are responsible for satisfying these requirements, and if these are not fulfilled in required major courses, they should use general electives to do so.

Business Requirements

Code	Title	Hours
Accounting		
ACCT 1201	Financial Accounting and Reporting	4
ACCT 2301	Managerial Accounting	4
Finance		
FINA 2201	Financial Management	4
Marketing

¹ Business core courses as indicated in the sample study plan include Managerial Accounting (ACCT 2301), Financial Management (FINA 2201), Introduction to Marketing (MKTG 2201), Management Information Systems (MISM 2301), and Supply Chain and Operations Management (SCHM 2301).

² Students are strongly encouraged to complete Innovation! (ENTR 2301) to fulfill their NUpath EI requirement.

³ One concentration course will fulfill WI.

⁴ Electives may be used to complete a secondary business concentration. In addition, some electives shown will be fulfilled by completing NUpath courses not explicitly completed by following major curriculum.

Bachelor of Science in International Business, BSIB

The BSIB program allows students the opportunity to create their own path to experience the challenges of an international assignment that any manager may encounter during his or her career. You will have the chance to take courses in the principal fields of business and choose among our seven business concentrations. Students may choose their destination for international immersion from a wide variety of locations. Whether you do a four- or five-year program with one, two, or three co-ops, a yearlong immersion, customized study and co-op or study semesters, dual or single degree, the choice is yours.

Available Opportunities

A **yearlong immersion**, which includes a full semester of study at one of the traditional BSIB partners with a six-month co-op in the host country. Course work and co-op are completed in one consecutive year at the same location with business-based curricula and dual-degree opportunities. Work may be completed in either English or the language of the host country.

A **customized study and co-op program** during either the spring or fall terms at either a BSIB partner or via the Global Experience Office. This version of the program will allow for study semesters and co-op to be completed in separate academic years and in different locations. A wide variety of subjects are offered; not always business focused. This opportunity requires an independent international co-op search.

Custom study semesters are also available between a BSIB partner school or a program sponsored by the Global Experience Office. The study semesters can be completed in separate academic years and in different locations. Course work is generally taught in English and there are a wide variety of subjects offered.

Students also have the dual-degree option, which allows them to receive both the BSIB degree from Northeastern and an equivalent undergraduate

degree from some of the partner schools. This dual-degree path is an intensive program requiring strong commitment.

With the flexibility of the BSIB, students are able to combine their undergraduate program with the Master of Science in International Management PlusOne program, the Master of Finance, or the Master of Accounting.

In conjunction with their academic advisor, students will determine an individual action plan to meet their needs. Students take the degree's required courses in international business administration and choose a concentration from other business areas such as accounting, entrepreneurship, finance, marketing, management, information management, and supply chain management.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

NUpath requirements Differences and Diversity (DD), Natural and Designed World (ND), and Formal and Quantitative Reasoning (FQ) are not explicitly satisfied by required courses in the business curriculum at this time. Students are responsible for satisfying these requirements, and if these are not fulfilled in required major courses, they should use general electives to do so.

Business Core

Code	Title	Hours
ACCT 1202	Financial Accounting in a Global Context	4
ENTR 2301	Innovation!	4
FINA 2202	Financial Management in a Global Context	4
ORGB 3201	Organizational Behavior	4
MGSC 2301	Business Statistics	4
MKTG 2202	Introduction to Marketing in a Global Context	4

International Business Requirements

Code	Title	Hours
INTB 1202	Becoming a Global Manager	4
INTB 2202	Analyzing the Global Business Environment	4
INTB 3202	Managing the International Assignment	4
INTB 4202	Executing Global Strategy	4

Language Proficiency or Minor Requirement

Students must test to a level of B1 proficiency in the language of their destination to qualify for their expatriate year.

Note: Students who opt for the expatriate year in England or Ireland must complete a globally focused general minor to earn the BSIB degree. A list of qualifying minors may be found on the overview (p. 226) page.

Concentration

Complete one of the following concentrations. A second concentration is optional. Certain concentrations require additional prerequisites. Please consult your academic advisor to ensure you have met these requirements.

- Accounting (p. 259)
- Business/Interdisciplinary (p. 259) (second concentration only)
- Entrepreneurship and Innovation (p. 259)
- Finance (p. 260)
- Management (p. 261)
- Management Information Systems (p. 261)
- Marketing (p. 262)
- Supply Chain Management (p. 262)

General Education

Code	Title	Hours

BUSN 1102	Personal Skill Development for Business	1
BUSN 1103	Professional Development for Business Co-op	1

Business Cooperative Education

Complete two six-month co-op experiences.

Business GPA Requirement

A minimum 2.000 GPA in business courses is required.

Program Requirement

128 total semester hours required

Plan of Study

Five-Year Program: Year 3 Abroad with 3 Co-ops

Note: Plan of study will vary based upon student's academic program. Individual study plans will be created with academic advisor.

- Additional courses may be required in place of open electives. Electives may be moved or used to fulfill language classes.
- This plan of study will not work for the United Kingdom or Spain. Consult advisor for study plan example. Finance concentration requires Managerial Accounting in a Global Context (ACCT 2302) and Principles of Macroeconomics (ECON 1115) to fulfill prerequisites. Accounting concentration requires Managerial Accounting in a Global Context (ACCT 2302) as a prerequisite. Supply chain management requires Supply Chain and Operations Management (SCHM 2301) as prerequisite. Management information systems requires Management Information Systems (MISM 2301) as a prerequisite.

ARTG 3463	Experience Design 2	

Marketing Concentration

Code	Title	Hours
Required Courses		
MKTG 3301	Marketing Management	4
MKTG 3401	Marketing Research	4

Electives

At least one course must be taken from the business courses listed and one from the interactive media courses listed.

Complete three of the following: 12

Business

MKTG 4502	Marketing in the Service Sector
MKTG 4504	Advertising and Brand Promotion
MKTG 4506	Consumer Behavior
MKTG 4508	Digital Marketing
MKTG 4510	New Product Development

Art + Design

ARTD 2360	Photo Basics (With optional ARTD 2361)
ARTD 2380	Video Basics (With optional ARTD 2381)
ARTF 2220	4D Fundamentals: Sequence and Drawing (With optional ARTF 2221)
ARTG 2260	Programming Basics
ARTG 3250	Physical Computing
ARTG 3351	Time-Based Design
ARTG 3451	Information Design 1
ARTE 4901	Special Topics in Art and Design Studio

Second Business Concentration (Optional)

A second business concentration is optional and may be chosen from the following list. Requirements for the concentrations are listed below (p. 77).

- Accounting (p. 77)
- Business/Interdisciplinary (p. 78)
- Entrepreneurship and Innovation (p. 78)
- Finance (p. 78)
- Management (p. 78)
- Management Information Systems (p. 79)
- Supply Chain Management (p. 79)

Integrative Courses

Code	Title	Hours
------	-------	-------

Integrative Courses

Note: These courses also satisfy requirements above:

MKTG 3301	Marketing Management
ARTG 3460	Identity and Brand Design

Capstone

Complete the interactive media capstone or the business capstone: 4-8

Interactive Media Capstone

ARTG 4550 and ARTG 4551	Design Degree Project 1 and Design Degree Project 2
ARTG 4700 and ARTG 4701	Interaction Team Degree Project 1 and Interaction Team Degree Project 2

Business Capstone

STRT 4501	Strategy in Action
-----------	--------------------

Business GPA Requirement

A minimum 2.000 GPA in business courses is required.

Business Cooperative Education Requirement

Complete one six-month co-op experience.

Program Requirement

132 total semester hours required

Second Business Concentration (Optional)

A second business concentration is optional and may be chosen from the following:

CONCENTRATION IN ACCOUNTING

Code	Title	Hours
Required Courses		
ACCT 3401	Financial Reporting and Analysis 1	4
ACCT 4501	Financial Reporting and Analysis 2	4
Electives		
Complete two of the following:		8
ACCT 3403	Accounting Information Systems	
ACCT 3416	Strategic Cost Analysis for Decision Making	
ACCT 4412	Auditing and Other Assurance Services	
ACCT 4414	Income Tax Determination and Planning	

CONCENTRATION IN BUSINESS/INTERDISCIPLINARY

Code	Title	Hours
Complete four courses in consultation with approved D'Amore-McKim School of Business faculty member.		16

CONCENTRATION IN ENTREPRENEURSHIP AND INNOVATION

Code	Title	Hours
------	-------	-------

Note: The following courses do not count toward this concentration:

ENTR 1201	The Entrepreneurial Universe
ENTR 3308	Business Economic History of South Africa
ENTR 3318	
ENTR 3328	
ENTR 3338	Field Research in Sustainable Energy in Iceland
ENTR 3346	
ENTR 4510	Management Consulting Abroad
ENTR 4514	Development Practice and Global Citizenship in India

Introductory Course

ENTR 2301	Innovation!	4
or ENTR 2303	Entrepreneurial Marketing and Selling	

Capstone Course

Complete one of the following: 4

ENTR 4501	Business Planning for Technology Ventures
ENTR 4503	Business Planning for Small and Medium Enterprises
ENTR 4505	Entrepreneurial Growth Strategy for Technology Ventures

ENTR 4506	Advanced Studies in Social Enterprise	
Electives		
Note: Only one non-ENTR course may be used as an elective.		
Complete two of the following:		8
ENTR 2206	Global Social Enterprise	
ENTR 2215	Understanding Family Enterprise	
ENTR 2414	Social Responsibility of Business in an Age of Inequality	
ENTR 2301	Innovation! (if not used as introductory course)	
ENTR 2303	Entrepreneurial Marketing and Selling (if not used for introductory course)	
ENTR 3212	Innovation for Social Change	
ENTR 3217	Global Family Business Leadership	
ENTR 3220	International Entrepreneurship and Innovation Consulting	
ENTR 3305	Entrepreneurial Strategy and Business Model Design	
ENTR 3306	Global Entrepreneurship	
ENTR 3330	Lean Design and Development for Entrepreneurs	
ENTR 3401	Management of Operations and Growth in Small- and Medium-Sized Enterprises	
ENTR 3403	Managing Operations in a Technology-Based Startup Firm	
ENTR 3520	Impact Investing and Social Finance	
ENTR 4225	Corporate Entrepreneurship through Global Growth, Acquisitions, and Alliances	
ENTR 4512	Social Entrepreneurship and Sustainable Development in India	
FINA 4610	Entrepreneurial Finance, Innovation Valuation, and Private Equity	
MGMT 3302	Negotiating in Business	

CONCENTRATION IN FINANCE

Code	Title	Hours
Required Course		
FINA 3301 or FINA 3303	Corporate Finance Investments	4
Electives		
Complete three of the following:		12
ENTR 3520 or FINA 2720	Impact Investing and Social Finance Sustainability in the Business Environment	
FINA 3301	Corporate Finance (if not selected as a required course)	
FINA 3303	Investments (if not selected as a required course)	
FINA 4219	Portfolio Management	
FINA 4220	Behavioral Finance	
FINA 4310	Working Capital Management	
FINA 4312	Issues in Corporate Governance	
FINA 4320	International Financial Management	
FINA 4410	Valuation and Value Creation	
FINA 4412	Personal Financial Planning	
FINA 4420	Mergers and Acquisitions	

FINA 4512	Financial Risk Management
FINA 4514	Investment Banking
FINA 4516	Real Estate Finance
FINA 4524	Credit Analysis
FINA 4526	Core Topics in Alternative Investments
FINA 4983	Special Topics in Finance
FINA 4602	Turnaround Management
FINA 4604	Fixed-Income Securities
FINA 4608	Advanced Financial Strategy
FINA 4610	Entrepreneurial Finance, Innovation Valuation, and Private Equity

CONCENTRATION IN MANAGEMENT

Code	Title	Hours
Required Course		
MGMT 4501	Skills for Managerial Success	4
Electives		
Note: Only one non-MGMT course may be used as an elective.		
Complete three of the following:		12
MGMT 3302	Negotiating in Business	
MGMT 3315	Managing Organizational Change and Disruption	
MGMT 3330	Developing Leaders for Global Sustainability	
MGMT 3340	Managing Healthcare Organizations: Critical Challenges and New Approaches	
MGMT 3350	Managing a Diverse Workforce	
MGMT 3360	Law and the Legal Process	
MGMT 3420	Managing Human Capital	
MGMT 3510	Managing Global Teams Virtually and Locally	
MGMT 3530	Project Management	
MGMT 4310	The Management Practices of Great Organizations	
MGMT 4410	Human Resources and Workforce Analytics	
ENTR 2215	Understanding Family Enterprise	
ENTR 2414	Social Responsibility of Business in an Age of Inequality	
ENTR 4225	Corporate Entrepreneurship through Global Growth, Acquisitions, and Alliances	

CONCENTRATION IN MANAGEMENT INFORMATION SYSTEMS

Code	Title	Hours
Required Courses		
MISM 3403	Data Management in the Enterprise	4
MISM 4501	Business Systems Integration	4
Electives		
Note: Only one non-MISM course may be used as an elective.		
Complete two of the following:		8
MISM 2510	Fundamentals of Information Analytics	
MISM 3305	Information Resource Management	
MISM 3404	Data Communications	

MISM 3406	Introduction to Web Design, Practices, and Standards
MISM 3501	Information Visualization for Business
MISM 3515	Data Mining for Business
MKTG 4508	Digital Marketing
SCHM 3301	Global Supply Chain Strategy
SCHM 3305	Sourcing and Procurement
SCHM 3308	Supply Chain Analytics

CONCENTRATION IN SUPPLY CHAIN MANAGEMENT

Code	Title	Hours
Required Courses		
SCHM 3301	Global Supply Chain Strategy	4
SCHM 3305	Sourcing and Procurement	4
SCHM 3310	Logistics and Transportation Management	4
Elective		
Complete one of the following:		4
SCHM 3308	Supply Chain Analytics	
SCHM 3320	Demand Planning and Forecasting	
SCHM 3330	Sustainability and Supply Chain Management	
SCHM 4401	Advanced Problems in Supply Chain Management

Business Administration and Psychology, BS

This combined major educates students in business and psychology and the interface between the two disciplines. The scope and sequence of psychology courses provide students with a foundation in the interdisciplinary science of psychology, including statistics and research, social psychology, developmental psychology, cognition, and personality. Business courses provide a foundation in accounting, innovation, marketing, management, and organizational behavior, with the opportunity to concentrate in a specific area of business. Students completing this program should be able to understand the relationships between these fields that pertain to explaining and addressing human behavior and business practices.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond

specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Business Requirements

Code	Title	Hours
Required Courses		
ACCT 1201	Financial Accounting and Reporting	4
ACCT 2301	Managerial Accounting	4
ENTR 2301	Innovation!	4
FINA 2201	Financial Management	4
INTB 1203	International Business and Global Social Responsibility	4
MISM 2301	Management Information Systems	4
or SCHM 2301	Supply Chain and Operations Management	
MKTG 2201	Introduction to Marketing	4
ORGB 3201	Organizational Behavior	4
STRT 4501	Strategy in Action	4
Supporting Courses for Business		
ECON 1115	Principles of Macroeconomics	4
or ECON 1116	Principles of Microeconomics	
MATH 1231	Calculus for Business and Economics	4

Business Concentration

Complete one of the following concentrations. Requirements for the concentrations are listed below (p. 233).

- Accounting (p. 233)
- Entrepreneurship and Innovation (p. 233)
- Finance (p. 233)
- Management (p. 234)
- Management Information Systems (p. 234)
- Marketing (p. 234)
- Supply Chain Management (p. 234)

Psychology Requirements

Code	Title	Hours
Required Courses		
PSYC 1101	Foundations of Psychology	4
PSYC 2320	Statistics in Psychological Research	4
or MGSC 2301	Business Statistics	
PSYC 3402	Social Psychology	4
PSYC 3466	Cognition	4
PSYC 3400	Personality	4
PSYC 3404	Developmental Psychology	4
Required Seminar		
Complete one of the following:		4
PSYC 4650	Seminar in Clinical Case Study	
PSYC 4654	Seminar in Behavioral Modification	
PSYC 4656	Seminar in Biological Psychology	

PSYC 4658	Seminar in Psycholinguistics
PSYC 4660	Seminar in Cognition
PSYC 4662	Seminar in Personality
PSYC 4664	Seminar in Social Psychology
PSYC 4666	Seminar in Clinical Psychology
PSYC 4668	Seminar in Sensation and Perception
PSYC 4674	Seminar in Cognitive Neuroscience
PSYC 4676	Seminar in Developmental Psychology
PSYC 4678	Seminar in Social and Affective Neuroscience

Required Lab		
Complete one of the following:		4
PSYC 4600	Laboratory in Research Design	
PSYC 4606	Laboratory in Biological Psychology	
PSYC 4610	Laboratory in Psycholinguistics	
PSYC 4612	Laboratory in Cognition	
PSYC 4614	Laboratory in Social Psychology	
PSYC 4616	Laboratory in Personality	
PSYC 4622	Laboratory in Sensation and Perception	
PSYC 4624	Laboratory in Affective Science	
PSYC 4626	Laboratory in Life-Span Emotional Development	
PSYC 4628	Laboratory in Developmental Psychology	

Psychology Electives		
Complete two PSYC courses not used to fulfill the requirements above:		8
PSYC 1001 to PSYC 5999		

Supporting Courses

Code	Title	Hours
Introduction to College		
BUSN 1102	Personal Skill Development for Business	1
or PSYC 1000	Psychology at Northeastern	
Co-op Preparation		
Complete one of the following:		1-5
BUSN 1101	Introduction to Business	
and BUSN 1103	and Professional Development for Business Co-op	
EESC 2000	Professional Development for Co-op	

Integrative Course

Code	Title	Hours
ORGB 3201	Organizational Behavior	4

Business GPA Requirement

A minimum 2.000 GPA in business courses is required.

Psychology GPA Requirement

A minimum 2.000 GPA in psychology courses is required.

Business Cooperative Education Requirement

Complete one six-month co-op experience.

Program Requirement

128 total semester hours required

Business Concentration

CONCENTRATION IN ACCOUNTING

Code	Title	Hours
Required Courses		
ACCT 3401	Financial Reporting and Analysis 1	4
ACCT 4501	Financial Reporting and Analysis 2	4
Electives		
Complete two of the following:		8
ACCT 3403	Accounting Information Systems	
ACCT 3416	Strategic Cost Analysis for Decision Making	
ACCT 4412	Auditing and Other Assurance Services	
ACCT 4414	Income Tax Determination and Planning	

CONCENTRATION IN ENTREPRENEURSHIP AND INNOVATION

Code	Title	Hours
Note: The following courses do not count toward this concentration:		

ENTR 1201	The Entrepreneurial Universe	
ENTR 3308	Business Economic History of South Africa	
ENTR 3318		
ENTR 3328		
ENTR 3338	Field Research in Sustainable Energy in Iceland	
ENTR 3346		
ENTR 4510	Management Consulting Abroad	
ENTR 4514	Development Practice and Global Citizenship in India	

Introductory Course

ENTR 2301	Innovation!	4
or ENTR 2303	Entrepreneurial Marketing and Selling	

Capstone Course

Complete one of the following:		4
ENTR 4501	Business Planning for Technology Ventures	
ENTR 4503	Business Planning for Small and Medium Enterprises	
ENTR 4505	Entrepreneurial Growth Strategy for Technology Ventures	
ENTR 4506	Advanced Studies in Social Enterprise	

Electives

Note: Only one non-ENTR course may be used as an elective.

Complete two of the following:		8
ENTR 2206	Global Social Enterprise	
ENTR 2215	Understanding Family Enterprise	
ENTR 2414	Social Responsibility of Business in an Age of Inequality	
ENTR 2301	Innovation! (if not used as introductory course)	

ENTR 2303	Entrepreneurial Marketing and Selling (if not used for introductory course)	
ENTR 3212	Innovation for Social Change	
ENTR 3217	Global Family Business Leadership	
ENTR 3220	International Entrepreneurship and Innovation Consulting	
ENTR 3305	Entrepreneurial Strategy and Business Model Design	
ENTR 3306	Global Entrepreneurship	
ENTR 3330	Lean Design and Development for Entrepreneurs	
ENTR 3401	Management of Operations and Growth in Small- and Medium-Sized Enterprises	
ENTR 3403	Managing Operations in a Technology-Based Startup Firm	
ENTR 3520	Impact Investing and Social Finance	
ENTR 4225	Corporate Entrepreneurship through Global Growth, Acquisitions, and Alliances	
ENTR 4512	Social Entrepreneurship and Sustainable Development in India	
FINA 4610	Entrepreneurial Finance, Innovation Valuation, and Private Equity	
MGMT 3302	Negotiating in Business	

CONCENTRATION IN FINANCE

Code	Title	Hours
Required Course		
FINA 3301 or FINA 3303	Corporate Finance Investments	4
Electives		
Complete three of the following:		12
ENTR 3520 or FINA 2720	Impact Investing and Social Finance Sustainability in the Business Environment	
FINA 3301	Corporate Finance (if not selected as a required course)	
FINA 3303	Investments (if not selected as a required course)	
FINA 4219	Portfolio Management	
FINA 4220	Behavioral Finance	
FINA 4310	Working Capital Management	
FINA 4312	Issues in Corporate Governance	
FINA 4320	International Financial Management	
FINA 4410	Valuation and Value Creation	
FINA 4412	Personal Financial Planning

FINA 4524	Credit Analysis	
FINA 4526	Core Topics in Alternative Investments	
FINA 4983	Special Topics in Finance	
FINA 4602	Turnaround Management	
FINA 4604	Fixed-Income Securities	
FINA 4608	Advanced Financial Strategy	

FINA 4610 Entrepreneurial Finance, Innovation Valuation, and Private Equity

CONCENTRATION IN MANAGEMENT

Code	Title	Hours
Required Course		
MGMT 4501	Skills for Managerial Success	4
Electives		
Note: Only one non-MGMT course may be used as an elective.		
Complete three of the following:		12
MGMT 3302	Negotiating in Business	
MGMT 3315	Managing Organizational Change and Disruption	
MGMT 3330	Developing Leaders for Global Sustainability	
MGMT 3340	Managing Healthcare Organizations: Critical Challenges and New Approaches	
MGMT 3350	Managing a Diverse Workforce	
MGMT 3360	Law and the Legal Process	
MGMT 3420	Managing Human Capital	
MGMT 3510	Managing Global Teams Virtually and Locally	
MGMT 3530	Project Management	
MGMT 4310	The Management Practices of Great Organizations	
MGMT 4410	Human Resources and Workforce Analytics	
ENTR 2215	Understanding Family Enterprise	
ENTR 2414	Social Responsibility of Business in an Age of Inequality	
ENTR 4225	Corporate Entrepreneurship through Global Growth, Acquisitions, and Alliances	

CONCENTRATION IN MANAGEMENT INFORMATION SYSTEMS

Code	Title	Hours
Required Courses		
MISM 3403	Data Management in the Enterprise	4
MISM 4501	Business Systems Integration	4
Electives		
Note: Only one non-MISM course may be used as an elective.		
Complete two of the following:		8
MISM 2510	Fundamentals of Information Analytics	
MISM 3305	Information Resource Management	
MISM 3404	Data Communications	
MISM 3406	Introduction to Web Design, Practices, and Standards	
MISM 3501	Information Visualization for Business	
MISM 3515	Data Mining for Business	
MKTG 4508	Digital Marketing	
SCHM 3301	Global Supply Chain Strategy	
SCHM 3305	Sourcing and Procurement	
SCHM 3308	Supply Chain Analytics	

CONCENTRATION IN MARKETING

Code	Title	Hours
Required Courses		
MKTG 3401	Marketing Research	4
MKTG 3301	Marketing Management	4
or MKTG 4506	Consumer Behavior	
Electives		
Complete two of the following:		8
MKTG 2301	Marketing and Society	
MKTG 3301	Marketing Management (if not selected as a required course)	
MKTG 3501	Marketing Analytics	
MKTG 4220	Marketing in Asia	
MKTG 4420	Sales Management	
MKTG 4502	Marketing in the Service Sector	
MKTG 4504	Advertising and Brand Promotion	
MKTG 4506	Consumer Behavior (if not selected as a required course)	
MKTG 4508	Digital Marketing	
MKTG 4510	New Product Development	
MKTG 4512	International Marketing	

CONCENTRATION IN SUPPLY CHAIN MANAGEMENT

Code	Title	Hours
Required Courses		
SCHM 3301	Global Supply Chain Strategy	4
SCHM 3305	Sourcing and Procurement	4
SCHM 3310	Logistics and Transportation Management	4
Elective		
Complete one of the following:		4
SCHM 3308	Supply Chain Analytics	
SCHM 3320	Demand Planning and Forecasting	
SCHM 3330	Sustainability and Supply Chain Management	
SCHM 4401	Advanced Problems in Supply Chain Management	

Computer Science and Business Administration, BS

The computer science and business combined major delivers a technical degree with a strong grounding in business. Students will complete most of the requirements of a business major, including macroeconomics and microeconomics, while also focusing on technical skills like program design, software development, computer organization, systems and networks, theories of computation, principles of languages, and advanced algorithms and data.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Computer Science Courses

Code	Title	Hours
------	-------	-------

Computer Science Overview

CS 1200	Leadership Skill Development	1
CS 1210	Professional Development for CCIS Co-op	1

Computer Science Fundamental Courses

A grade of C– or higher is required in computer science fundamental courses:

CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5

Computer Science Required Courses

CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500	Object-Oriented Design	4
CS 4500 and CS 4501	Software Development and Recitation for CS 4500	4

Complete two of the following: 8

CS 3650	Computer Systems	
CS 3700	Networks and Distributed Systems	
DS 4100	Data Collection, Integration, and Analysis	
DS 4200	Information Presentation and Visualization	
DS 4300	Large-Scale Information Storage and Retrieval	

Presentation Requirement

THTR 1170	The Eloquent Presenter	1
-----------	------------------------	---

Computer Science Elective Courses

With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.

Complete four credits of CS, IS, or DS classes that are not already required. Choose courses within the following ranges: 4

CS 2500 or higher, except CS 5010

IS 2000 or higher, except IS 4900

DS 2000 or higher, except DS 4900

Business Courses

Code	Title	Hours
------	-------	-------

Required Business Courses

ACCT 1201	Financial Accounting and Reporting	4
ACCT 2301	Managerial Accounting	4
FINA 2201	Financial Management	4
ORGB 3201	Organizational Behavior	4

MKTG 2201	Introduction to Marketing	4
MGSC 2301	Business Statistics	4
Choose one of the following: ¹		4
STRT 4501	Strategy in Action	
STRT 4516	External Case Competition Challenge	

¹ Strategy in Action (STRT 4501), and External Case Competition Challenge (STRT 4516) both satisfy the capstone requirement.

Business Concentration

Complete a four-course business concentration from the following list. Requirements for the concentrations are listed below (p. 236).

- Accounting (p. 236)
- Entrepreneurship and Innovation (p. 236)
- Finance (p. 236)
- Management (p. 237)
- Marketing (p. 237)
- Supply Chain Management (p. 237)

Integrative Course

Code	Title	Hours
------	-------	-------

Information Resource Management

MISM 2301	Management Information Systems	4
-----------	--------------------------------	---

Supporting Courses

Code	Title	Hours
------	-------	-------

Mathematics

MATH 1341	Calculus 1 for Science and Engineering	4
or MATH 1231	Calculus for Business and Economics	

Economics

ECON 1115	Principles of Macroeconomics	4
ECON 1116	Principles of Microeconomics	4

Computing and Social Issues

Complete one of the following: 4

ANTH 3418	Wired/Unwired: Cybercultures and Technopolitics	
IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
PHIL 1145	Technology and Human Values	
SOCL 1280	The 21st-Century Workplace	
SOCL 3485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	

Computer Science Writing Requirement

Code	Title	Hours
------	-------	-------

College Writing

ENGW 1111	First-Year Writing	4
-----------	--------------------	---

Advanced Writing in the Disciplines

ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

Required General Electives

Code	Title	Hours
Complete four general electives.		16

Business Cooperative Education Requirement

Complete one six-month co-op experience.

Computer Science GPA Requirement

Minimum 2.000 GPA required in all CS and IS courses

Business GPA Requirement

Minimum 2.000 GPA required in business courses

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Understanding Societies and Institutions
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Program Requirement

133 total semester hours required

Cybersecurity and Business Administration, BS

The cybersecurity and business combined major delivers a technical and security-focused degree with a strong grounding in business. Students will complete most of the requirements of a business major, including macroeconomics and microeconomics, while also focusing on the conceptual and practical computer science skills that will enable them to contribute to ensuring the reliability and security of cyberspace.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Cybersecurity Major Requirements

Code	Title	Hours
------	-------	-------

Computer Science Overview

CS 1200	Leadership Skill Development	1
CS 1210	Professional Development for CCIS Co-op	1

Computer Science Fundamental Courses

A grade of C– or higher is required in computer science fundamental courses.

CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5

Computer Science Required Courses

CS 3000	Algorithms and Data	4
CS 3500	Object-Oriented Design	4
CS 3650	Computer Systems	4
CS 3700	Networks and Distributed Systems	4

Cybersecurity Required Courses

CS 2550	Foundations of Cybersecurity	4
CS 3740	Systems Security	4
CS 4170	The Law, Ethics, and Policy of Data and Digital Technologies	4
or IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
CS 4740	Network Security	4

Cybersecurity Electives

If courses require prerequisites, those should be taken using general electives.

Complete one course from the following: 3-4

CS 2800	Logic and Computation
CS 4240	Large-Scale Parallel Data Processing
CS 4400	Programming Languages
CS 4500 and CS 4501	Software Development and Recitation for CS 4500
CS 4710	Mobile and Wireless Systems
CS 5770	Software Vulnerabilities and Security
CS 6710	Wireless Network
DS 4300	Large-Scale Information Storage and Retrieval
DS 4400	Machine Learning and Data Mining 1
IA 5200	Security Risk Management and Assessment
IA 5210 and IA 5211	Information System Forensics and Lab for IA 5210
IS 4300	Human Computer Interaction
EECE 2160	Embedded Design: Enabling Robotics
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322

EECE 3324	Computer Architecture and Organization	
EECE 4534 and EECE 4535	Microprocessor-Based Design and Lab for EECE 4534	
MATH 3527	Number Theory 1	
MATH 4575	Introduction to Cryptography	
COMM 2551	Free Speech in Cyberspace	
CRIM 2200	Criminology	
CRIM 3030	Global Criminology	
CRIM 3400	Corporate Security: Securing the Private Sector	
CRIM 4040	Crime Prevention	
LPSC 1101	Introduction to Law	
LPSC 2301	Introduction to Law, Policy, and Society	
LPSC 3303	Topics in Law and Public Policy	
PHIL 1145	Technology and Human Values	
POLS 2390	Science, Technology, and Public Policy	
POLS 3307	Public Policy and Administration	
POLS 3324	Law and Society	
POLS 3406	International Law	
POLS 3408	International Security	
POLS 3420	U.S. National Security Policy	
POLS 3423	Terrorism and Counterterrorism	

Presentation Requirement

THTR 1170	The Eloquent Presenter	1
-----------	------------------------	---

Business Requirements

Code	Title	Hours
Accounting		
ACCT 1201	Financial Accounting and Reporting	4
ACCT 2301	Managerial Accounting	4
Finance		
FINA 2201	Financial Management	4
Organizational Behavior		
ORGB 3201	Organizational Behavior	4
Marketing		
MKTG 2201	Introduction to Marketing	4
Statistics		
MGSC 2301	Business Statistics	4
Strategy		
STRT 4501	Strategy in Action	4
or STRT 4516	External Case Competition Challenge	

Business Concentration

Complete a four-course business concentration from the following list. Requirements for the concentrations are listed below. (p. 241)

- Accounting (p. 241)
- Entrepreneurship and Innovation (p. 241)
- Finance (p. 241)
- Management (p. 242)
- Marketing (p. 242)
- Supply Chain Management (p. 242)

Business Cooperative Education Requirement

Complete one six-month co-op experience.

Integrative Requirement

Code	Title	Hours
MISM 2301	Management Information Systems	4

Supporting Courses

Code	Title	Hours
------	-------	-------

Mathematics Courses

Complete one of the following:		4
--------------------------------	--	---

MATH 1341	Calculus 1 for Science and Engineering
-----------	--

MATH 1231	Calculus for Business and Economics
-----------	-------------------------------------

Economics

Complete one of the following:		4
--------------------------------	--	---

ECON 1115	Principles of Macroeconomics
-----------	------------------------------

ECON 1116	Principles of Microeconomics
-----------	------------------------------

Writing Requirements

Code	Title	Hours
------	-------	-------

College Writing

ENGW 1111	First-Year Writing	4
-----------	--------------------	---

or ENGW 1102	First-Year Writing for Multilingual Writers
--------------	---

Advanced Writing in the Disciplines

Complete one of the following:		
--------------------------------	--	--

ENGW 3302	Advanced Writing in the Technical Professions
-----------	---

ENGW 3308	Advanced Writing in the Social Sciences
-----------	---

ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines
-----------	---

Required General Electives

Code	Title	Hours
------	-------	-------

Complete four general electives.		16
----------------------------------	--	----

Cybersecurity GPA Requirement

Minimum 2.000 GPA required in all computer and information science courses.

Business GPA Requirement

Minimum 2.000 GPA required in all business courses.

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Understanding Societies and Institutions
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Program Requirement

133 semester hours required

Business Concentrations

CONCENTRATION IN ACCOUNTING

Code	Title	Hours
Required Courses		
ACCT 3401	Financial Reporting and Analysis 1	4
ACCT 4501	Financial Reporting and Analysis 2	4
Electives		
Complete two of the following:		8
ACCT 3403	Accounting Information Systems	
ACCT 3416	Strategic Cost Analysis for Decision Making	
ACCT 4412	Auditing and Other Assurance Services	
ACCT 4414	Income Tax Determination and Planning	

CONCENTRATION IN ENTREPRENEURSHIP AND INNOVATION

Code	Title	Hours
Note: The following courses do not count toward this concentration:		
ENTR 1201	The Entrepreneurial Universe	
ENTR 3308	Business Economic History of South Africa	
ENTR 3318		
ENTR 3328		
ENTR 3338	Field Research in Sustainable Energy in Iceland	
ENTR 3346		
ENTR 4510	Management Consulting Abroad	
ENTR 4514	Development Practice and Global Citizenship in India	
Introductory Course		
ENTR 2301	Innovation!	4
or ENTR 2303	Entrepreneurial Marketing and Selling	
Capstone Course		
Complete one of the following:		4
ENTR 4501	Business Planning for Technology Ventures	
ENTR 4503	Business Planning for Small and Medium Enterprises	
ENTR 4505	Entrepreneurial Growth Strategy for Technology Ventures	
ENTR 4506	Advanced Studies in Social Enterprise	
Electives		
Note: Only one non-ENTR course may be used as an elective.		
Complete two of the following:		8
ENTR 2206	Global Social Enterprise	
ENTR 2215	Understanding Family Enterprise	
ENTR 2414	Social Responsibility of Business in an Age of Inequality	
ENTR 2301	Innovation! (if not used as introductory course)	

ENTR 2303	Entrepreneurial Marketing and Selling (if not used for introductory course)	
ENTR 3212	Innovation for Social Change	
ENTR 3217	Global Family Business Leadership	
ENTR 3220	International Entrepreneurship and Innovation Consulting	
ENTR 3305	Entrepreneurial Strategy and Business Model Design	
ENTR 3306	Global Entrepreneurship	
ENTR 3330	Lean Design and Development for Entrepreneurs	
ENTR 3401	Management of Operations and Growth in Small- and Medium-Sized Enterprises	
ENTR 3403	Managing Operations in a Technology-Based Startup Firm	
ENTR 3520	Impact Investing and Social Finance	
ENTR 4225	Corporate Entrepreneurship through Global Growth, Acquisitions, and Alliances	
ENTR 4512	Social Entrepreneurship and Sustainable Development in India	
FINA 4610	Entrepreneurial Finance, Innovation Valuation, and Private Equity	
MGMT 3302	Negotiating in Business	

CONCENTRATION IN FINANCE

Code	Title	Hours
Required Course		
FINA 3301	Corporate Finance	4
or FINA 3303	Investments	
Electives		
Complete three of the following:		12
ENTR 3520	Impact Investing and Social Finance	
or FINA 2720	Sustainability in the Business Environment	
FINA 3301	Corporate Finance (if not selected as a required course)	
FINA 3303	Investments (if not selected as a required course)	
FINA 4219	Portfolio Management	
FINA 4220	Behavioral Finance	
FINA 4310	Working Capital Management	
FINA 4312	Issues in Corporate Governance	
FINA 4320	International Financial Management	
FINA 4410	Valuation and Value Creation	
FINA 4412	Personal Financial Planning	
FINA 4420	Mergers and Acquisitions	
FINA 4512	Financial Risk Management	
FINA 4514	Investment Banking	
FINA 4516	Real Estate Finance	
FINA 4524	Credit Analysis	
FINA 4526	Core Topics in Alternative Investments	
FINA 4983	Special Topics in Finance	
FINA 4602	Turnaround Management	
FINA 4604	Fixed-Income Securities	
FINA 4608	Advanced Financial Strategy	

FINA 4610	Entrepreneurial Finance, Innovation Valuation, and Private Equity
-----------	--

CONCENTRATION IN MANAGEMENT

Code	Title	Hours
Required Course		
MGMT 4501	Skills for Managerial Success	4
Electives		
Note: Only one non-MGMT course may be used as an elective.		
Complete three of the following:		12
MGMT 3302	Negotiating in Business	
MGMT 3315	Managing Organizational Change and Disruption	
MGMT 3330	Developing Leaders for Global Sustainability	
MGMT 3340	Managing Healthcare Organizations: Critical Challenges and New Approaches	
MGMT 3350	Managing a Diverse Workforce	
MGMT 3360	Law and the Legal Process	
MGMT 3420	Managing Human Capital	
MGMT 3510	Managing Global Teams Virtually and Locally	
MGMT 3530	Project Management	
MGMT 4310	The Management Practices of Great Organizations	
MGMT 4410	Human Resources and Workforce Analytics	
ENTR 2215	Understanding Family Enterprise	
ENTR 2414	Social Responsibility of Business in an Age of Inequality	
ENTR 4225	Corporate Entrepreneurship through Global Growth, Acquisitions, and Alliances	

CONCENTRATION IN MARKETING

Code	Title	Hours
Required Courses		
MKTG 3401	Marketing Research	4
MKTG 3301 or MKTG 4506	Marketing Management Consumer Behavior	4
Electives		
Complete two of the following:		8
MKTG 2301	Marketing and Society	
MKTG 3301	Marketing Management (if not selected as a required course)	
MKTG 3501	Marketing Analytics	
MKTG 4220	Marketing in Asia	
MKTG 4420	Sales Management	
MKTG 4502	Marketing in the Service Sector	
MKTG 4504	Advertising and Brand Promotion	
MKTG 4506	Consumer Behavior (if not selected as a required course)	
MKTG 4508	Digital Marketing	

MKTG 4510	New Product Development
MKTG 4512	International Marketing

CONCENTRATION IN SUPPLY CHAIN MANAGEMENT

Code	Title	Hours
Required Courses		
SCHM 3301	Global Supply Chain Strategy	4
SCHM 3305	Sourcing and Procurement	4
SCHM 3310	Logistics and Transportation Management	4
Elective		
Complete one of the following:		4
SCHM 3308	Supply Chain Analytics	
SCHM 3320	Demand Planning and Forecasting	
SCHM 3330	Sustainability and Supply Chain Management	
SCHM 4401	Advanced Problems in Supply Chain Management

Economics and Business Administration, BS

The combined major with business administration is our most popular combined major, combining the underlying economic theories and models and their business applications. After satisfying the core courses in economics, there are over 40 electives from which to choose to complete this combined major.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Experiential Liberal Arts

All undergraduate students in the College of Social Sciences and Humanities are required to complete the Experiential Liberal Arts Requirement (p. 622).

Economics Requirements

Grades in required economics courses must average a minimum GPA of 2.000 with no grade lower than C-.

Code	Title	Hours
Introduction to College		
ECON 1000 or BUSN 1102	Economics at Northeastern Personal Skill Development for Business	1
Required Economics Courses		
ECON 1115	Principles of Macroeconomics	4
ECON 1116	Principles of Microeconomics	4
ECON 2315	Macroeconomic Theory	4
ECON 2316	Microeconomic Theory	4
ECON 2350 or MGSC 2301	Statistics Business Statistics	4
ECON 2560	Applied Econometrics	4

Economics Electives

Complete four courses from the following lists with no more than one at the introductory level: 16

Introductory

ECON 1200 to ECON 1990

Intermediate/Advanced

ECON 2990 to ECON 3499

ECON 3520 History of Economic Thought

ECON 3915 Intermediate Selected Topics in Macroeconomics

ECON 3916 Intermediate Selected Topics in Microeconomics

ECON 3990 Elective

ECON 4600 to ECON 4681

ECON 4915 to ECON 4916

ECON 4965 Undergraduate Teaching Experience 1

ECON 4970 to ECON 4990

ECON 4992 Directed Study

Business Requirements

Code	Title	Hours
Accounting		
ACCT 1201	Financial Accounting and Reporting	4
ACCT 2301	Managerial Accounting	4
Finance		
FINA 2201	Financial Management	4
Marketing		
MKTG 2201	Introduction to Marketing	4
Organizational Behavior		
ORGB 3201	Organizational Behavior	4
International Business/Social Responsibility		
INTB 1203	International Business and Global Social Responsibility	4

Business Concentration

Complete one of the following business concentrations. Requirements for the concentrations are listed below (p.).

- Accounting (p. 244)
- Entrepreneurship and Innovation (p. 244)
- Finance (p. 245)
- Management (p. 245)
- Management Information Systems (p. 245)
- Marketing (p. 246)
- Supply Chain Management (p. 246)

Business Cooperative Education Requirement

Complete one six-month co-op experience.

Supporting Courses

Code	Title	Hours
Mathematics		
MATH 1231	Calculus for Business and Economics	4
or MATH 1341	Calculus 1 for Science and Engineering	
Computer Science		
CS 1100	Computer Science and Its Applications	4

Co-op Preparation

BUSN 1103	Professional Development for Business Co-op	1
or EESH 2000	Professional Development for Co-op	

Capstone Requirement

ECON 4692	Senior Economics Seminar	4
STRT 4501	Strategy in Action	4

Economics GPA Requirement

Minimum 2.000 GPA required in all economics courses

Business GPA Requirement

Minimum 2.000 GPA required in business courses

Program Requirement

128 total semester hours required

Concentrations**CONCENTRATION IN ACCOUNTING**

Code	Title	Hours
Required Courses		
ACCT 3401	Financial Reporting and Analysis 1	4
ACCT 4501	Financial Reporting and Analysis 2	4

Health Science and Business Administration, BS

The combined major in Health Science and Business Administration provides students at Northeastern with an opportunity to study a

curriculum that is synergetic with the growing field of health care. This academic combination will provide students with the knowledge and expertise needed to enter a multitude of careers upon graduation. The degree will allow students the unique opportunity to better understand the business side of the health care industry in Massachusetts, which is home to some of the best hospitals and medical research companies in the country. The field is compatible with all the undergraduate concentrations in the School of Business and prepares students to enter the workforce after graduation.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Health Science Requirements

Code	Title	Hours

Information Science and Business Administration, BS

The information science and business combined major provides a technical degree with a strong grounding in business. Information science combines concepts and skills from computer science, behavioral and social science, and system design into an integrated, people-centered curriculum. Students will complete most of the requirements of a business major, including macroeconomics and microeconomics, while studying how information is acquired, organized, communicated, and used by both people and computers.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Computer Science Courses

Code	Title	Hours
Computer Science Overview		
CS 1200	Leadership Skill Development	1
CS 1210	Professional Development for CCIS Co-op	1
Computer Science Fundamental Courses		
A grade of C– or higher is required in computer science fundamental courses:		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
Computer Science Required Courses		
CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500	Object-Oriented Design	4
Information Science Required Courses		
IS 2000	Principles of Information Science	4
IS 3500	Information System Design and Development	4
IS 4800	Empirical Research Methods	4
Presentation Requirement		
THTR 1170	The Eloquent Presenter	1

Mathematics and Business Administration, BS

A combined major combines two majors in a way that allows a student to fulfill all requirements within the standard 128 credits. For details, see program requirements.

Current students can also find details about combined majors and minors by going to their audit, clicking on “explore options,” and finding the appropriate program. Students will be able to see a list of required courses and will be able to track their progress toward fulfilling them.

In the BS combined mathematics and business administration degree program, business and mathematics courses lay the groundwork for strong basic training in finance.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Mathematics Requirements

Code	Title	Hours
Required Courses		
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 1365	Introduction to Mathematical Reasoning	4
MATH 3081	Probability and Statistics	4
Calculus and Linear Algebra (Required) and Differential Equations (Recommended)		
Complete either Option 1 or Option 2 below:		8

Option 1 (Recommended)

MATH 2321	Calculus 3 for Science and Engineering
MATH 2341	Differential Equations and Linear Algebra for Engineering

Option 2

MATH 2321	Calculus 3 for Science and Engineering
or MATH 2323	Calculus 3 for Business, Economics, and Mathematics
MATH 2331	Linear Algebra

Co-op Reflections

MATH 3000	Co-op and Experiential Learning Reflection Seminar 1	1
-----------	--	---

Mathematics Electives

Complete three courses in the range MATH 3001 to MATH 5999. The following courses are recommended:

MATH 4681	Probability and Risks
MATH 4682	Theory of Interest and Basics of Life Insurance
MATH 4581	Statistics and Stochastic Processes

Business Requirements

Code	Title	Hours
Accounting		
ACCT 1201	Financial Accounting and Reporting	4
ACCT 2301	Managerial Accounting	4
Finance		
FINA 2201	Financial Management	4
Marketing		
MKTG 2201	Introduction to Marketing	4
Organizational Behavior		
ORGB 3201	Organizational Behavior	4
International Business/Social Responsibility		
INTB 1203	International Business and Global Social Responsibility	4
Strategy in Action		
STRT 4501	Strategy in Action	4

Integrative Course

Note: Financial Risk Management (FINA 4512) also counts toward the finance concentration.

Code	Title	Hours

FINA 3301	Corporate Finance	4
FINA 3303	Investments	4
FINA 4512	Financial Risk Management	4
Finance Elective		
Complete one of the following:		4
ENTR 3520	Impact Investing and Social Finance	
or FINA 2720	Sustainability in the Business Environment	
FINA 4604	Fixed-Income Securities (Recommended)	

FINA 4310	Working Capital Management
FINA 4312	Issues in Corporate Governance
FINA 4320	International Financial Management
FINA 4410	Valuation and Value Creation
FINA 4412	Personal Financial Planning
FINA 4420	Mergers and Acquisitions
FINA 4514	Investment Banking
FINA 4516	Real Estate Finance
FINA 4526	Core Topics in Alternative Investments
FINA 4602	Turnaround Management
FINA 4604	Fixed-Income Securities
FINA 4608	Advanced Financial Strategy
FINA 4610	Entrepreneurial Finance, Innovation Valuation, and Private Equity
FINA 4983	Special Topics in Finance

Second Business Concentration (Optional)

A second business concentration is optional and may be chosen from the following list. Requirements for the concentrations are listed below (p. 254).

- Accounting (p. 254)
- Business/Interdisciplinary (p. 254)
- Entrepreneurship and Innovation (p. 254)
- Management (p. 255)
- Management Information Systems (p. 255)
- Marketing (p. 255)
- Supply Chain Management (p. 255)

Supplemental Courses

Code	Title	Hours
Economics		
ECON 1115	Principles of Macroeconomics	4
ECON 1116	Principles of Microeconomics	4
Co-op Preparation		
BUSN 1103	Professional Development for Business Co-op	1
or EESC 2000	Professional Development for Co-op	

Business Cooperative Education Requirement

Complete one six-month co-op experience.

Mathematics GPA Requirement

Minimum 2.000 GPA required in all mathematics courses

Business GPA Requirement

Minimum 2.000 GPA required in business courses

Program Requirement

128 total semester hours required

CONCENTRATION IN ACCOUNTING

Code	Title	Hours
Required Courses		
ACCT 3401	Financial Reporting and Analysis 1	4

Elective		
Complete one of the following:		4
SCHM 3308	Supply Chain Analytics	
SCHM 3320	Demand Planning and Forecasting	
SCHM 3330	Sustainability and Supply Chain Management	
SCHM 4401	Advanced Problems in Supply Chain Management	

Political Science and Business Administration, BS

The combined major in political science and business administration offers students the opportunity to integrate the study of politics and government with an analysis of business practices and organizations. Students complete core courses in political science along with core courses in business administration that cover accounting, finance, marketing, and organizational behavior. This combined major highlights the important intersection between business practices and the evolution of politics and government.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Experiential Liberal Arts

All undergraduate students in the College of Social Sciences and Humanities are required to complete the Experiential Liberal Arts Requirement (p. 622).

Political Science Requirements

Code	Title	Hours
Introduction to College		
POLS 1000 or BUSN 1102	Political Science at Northeastern Personal Skill Development for Business	1

Ganesh Krishnamoorthy, Professor and Group Coordinator,
g.krishnamoorthy@northeastern.edu

A concentration in accounting aims to prepare the graduate for entry into public accounting or private industry in a highly valued career. Accounting is a dynamic profession that requires people to possess

sound technical knowledge, critical thinking skills, superior interpersonal skills, and the ability to communicate effectively. Accountants hold senior management positions in private companies in business or industry, public accounting firms, and government agencies.

To prepare for an accounting career, students take courses in financial reporting, managerial accounting, and intermediate accounting, with additional elective courses available for more specialized studies in strategic cost analysis, auditing and other assurance services, income tax planning, and accounting information systems. Students wishing to sit for the CPA exam may combine the BSBA with a concentration in accounting with the Master of Science in Accounting (five-year BSBA/MSA program).

Concentration Requirements

CONCENTRATION IN ACCOUNTING

Code	Title	Hours
Required Courses		
ACCT 3401	Financial Reporting and Analysis 1	4

Tucker Marion, The Sam and Nancy Altschuler Faculty Fellow; Bornstein Endowed Faculty Fellow
Professor of Technological Entrepreneurship; Entrepreneurship and Innovation Group Coordinator, Academic Programs,
t.marion@northeastern.edu

Fernando F. Suarez, Jean C. Tempel Professor, Entrepreneurship and Innovation; Entrepreneurship and Innovation Group Coordinator, Research and Tenure-Track Faculty, f.suarez@northeastern.edu

Entrepreneurship and Innovation Group offers a dynamic set of courses for students considering career paths as either entrepreneurs or corporate innovators. It is also a wonderful complement to finance, marketing, and other disciplines interested in learning and applying entrepreneurial thinking to business problems. We offer three specific tracks within the concentration—technological entrepreneurship, family business, and social enterprise—in which there is a required capstone that varies by these three tracks, plus any other three ENTR courses from a broad menu. In addition, the Entrepreneurship and Innovation Group provides a five-course interdisciplinary entrepreneurship minor for non-D'Amore-McKim students in which college-specific courses in innovation and design can be combined with D'Amore-McKim School of Business entrepreneurship courses. We also offer a concentrated course of study with an off-campus program in Silicon Valley. This program leverages the strength of our campus network and builds on the university's existing brand in entrepreneurship so students have an opportunity to build their own network of future entrepreneurs within Silicon Valley. In all these programs, the professors have been entrepreneurs and innovators throughout their careers. This makes the courses both cutting edge and "real world."

There are also specialized field studies in our international new ventures and Dialogues of Civilization programs, conducted in Summer 1 and Summer 2. Locales include South Africa, India, Italy, South Korea, and Israel.

Even if you don't wish to start your own company, *entrepreneurial thinking* is an attribute greatly valued by employers across industry and around the world.

Concentration Requirements

CONCENTRATION IN ENTREPRENEURSHIP AND INNOVATION

Code	Title	Hours
------	-------	-------

Note: The following courses do not count toward this concentration:

ENTR 1201	The Entrepreneurial Universe	
ENTR 3308	Business Economic History of South Africa	
ENTR 3318		
ENTR 3328		
ENTR 3338	Field Research in Sustainable Energy in Iceland	
ENTR 3346		
ENTR 4510	Management Consulting Abroad	
ENTR 4514	Development Practice and Global Citizenship in India	

Introductory Course

ENTR 2301	Innovation!	4
or ENTR 2303	Entrepreneurial Marketing and Selling	

Capstone Course

Complete one of the following: 4

ENTR 4501	Business Planning for Technology Ventures	
ENTR 4503	Business Planning for Small and Medium Enterprises	
ENTR 4505	Entrepreneurial Growth Strategy for Technology Ventures	
ENTR 4506	Advanced Studies in Social Enterprise	

Electives

Note: Only one non-ENTR course may be used as an elective.

Complete two of the following:		8
ENTR 2206	Global Social Enterprise	
ENTR 2215	Understanding Family Enterprise	
ENTR 2414	Social Responsibility of Business in an Age of Inequality

The role of people trained in finance is expanding rapidly within the business world. Changes on the financial scene—rising securities prices, fluctuating inflation, currency values and interest rates, and globalization of markets—have created an awareness that financial knowledge is essential to the effective management of business firms and many other types of organizations.

Finance is the management of real and monetary assets for businesses, financial institutions, nonprofit organizations, governments, and individuals. Finance courses draw on accounting principles, economic theory, and quantitative methods. These courses develop methods to direct the way capital is acquired and managed. Students are exposed to economic and financial systems and how they operate. They also are given an opportunity to analyze economic trends and indicators and to apply this analysis to financial decision making.

Students may specialize in one or more of the following areas: corporate finance, investment management and analysis, risk management, and

real estate. The program is designed to prepare students for careers in corporate financial management, security analysis, investment management, security or insurance brokerage, credit management, and risk management with corporations, banks, insurance companies, and other financial institutions.

Cynthia Lee, Professor and Group Coordinator, c.lee@northeastern.edu

Managing—whether it's people, projects, or programs—is challenging and requires a considerable range of knowledge and skills. Effective managers must know the business, be interpersonally competent, behave ethically, and diagnose and deal with human and organizational dynamics. The aim of the management concentration is to increase both managerial *knowledge* and management *skills*. This involves both studying *and* practicing topics such as motivation, leadership, negotiation, conflict resolution, project management, managing teams, organizational change, and their impact on business results.

Management concentrators participate in vibrant co-op experiences spanning a diverse range of business functions. These cover a wide number of possibilities such as business analytics, human resources, client and sales support, and project management. Many students who concentrate in management decide to get a second concentration, giving them the ability to work in teams and manage other people in whatever arena they find themselves.

Concentration Requirements

CONCENTRATION IN MANAGEMENT

Code	Title	Hours
Required Course

Yang W. Lee, Associate Professor and Group Coordinator, y.lee@northeastern.edu

In the global information age, success for individuals and for companies requires the ability to manage information effectively. To that end, the goal of the management information systems concentration is to teach future managers how to use information systems (IS) and information technology (IT) to help organizations and individuals perform more efficiently and effectively. This can lead the student in two career directions:

- To become a professional in the cross-functional business data, information management, data governance function of a company or in an IT or data-enabled strategic business consulting company
- To accelerate and enhance a career in another functional area such as finance, marketing, research and development/innovation, accounting, human resource, strategic management, or acquisition

Understanding how to get the right information in the right form and format to the right people at the right time is essential in today's business world, especially when companies and the individuals that do this well are achieving significant competitive advantage. Students have an opportunity to develop new, cutting-edge approaches that allow them to use the powerful resource of information to its greatest advantage. They also have the opportunity to develop technical and problem-solving skills that are in high demand by employers.

Managers in the IS function need to interact frequently with other managers throughout an organization. Therefore, students are encouraged to complete a dual concentration in management information systems and another area of business. Graduates of this program have a wide range of career paths that suit their particular interests. Professional options include business/systems analyst, database designer and administrator, webmaster, software help-desk expert, project specialist, consultant, network administrator, and IT specialist within other departments, such as financial services, accounting, marketing, or manufacturing.

Concentration Requirements

CONCENTRATION IN MANAGEMENT INFORMATION SYSTEMS

Bruce H. Clark, Associate Professor and Group Coordinator, b.clark@northeastern.edu

According to the American Marketing Association, marketing is "an organizational function and a set of processes for creating, communicating, and delivering value to customers, and for managing

customer relationships in ways that benefit the organization and its stakeholders." Create something people want, tell them about it, and deliver it to them in a way so that everyone benefits.

The concentration in marketing offers students an opportunity to develop an understanding of the role of the marketing function in the organization as well as detailed insight into various aspects of marketing processes, including strategy, buyer behavior, market research and analytics, digital and mobile media, marketing communications, sales, services, and new product development. Students prepare for possible careers in areas such as brand and product management, consulting, digital marketing, entrepreneurship, marketing research, marketing communications, and sales and account management.

Concentration Requirements

Supply Chain Management

Website (<http://www.damore-mckim.neu.edu>)

314 Hayden Hall

617.373.3132

617.373.3166 (fax)

Yang W. Lee, Associate Professor and Group Coordinator, y.lee@northeastern.edu

From the *Fortune* 500 manufacturer to the small firm that produces, sells, or distributes products, all companies have a supply chain function that must be effectively managed if they are to be competitive. A supply chain manager is typically involved in making critical decisions about such matters as the modes of transportation used to move the company's materials and products, inventory policies, warehousing needs, customer service standards, and the location of facilities.

As companies become increasingly involved in global markets as both buyers and sellers, supply chain managers play a major role not only in assessing the feasibility of international activity but also in developing supply and distribution networks to support that involvement.

Because supply chain managers frequently interact with those involved in other areas of management, many supply chain management students have chosen to complete a second concentration in such areas as marketing, information management, or finance.

In addition to finding career opportunities with manufacturers, retailers, and distributors, supply chain management students may find similar opportunities with companies that sell supply chain services or transportation services in the marketplace. Consulting firms and government agencies at the federal, state, and local levels provide other career options.

Concentration Requirements

CONCENTRATION IN SUPPLY CHAIN MANAGEMENT

Minors

Students who wish to enter one of the minor programs listed below should complete the online minor form accessible via the D'Amore-McKim School of Business Undergraduate Programs website. Students who complete all required courses successfully and have earned at least a C (2.000) average in them will be awarded the minor at graduation.

- Business Administration, Minor (p. 263)
- Business Analytics, Minor (p. 263)
- Emerging Markets, Minor (p. 264)
- Entrepreneurship, Minor (p. 264)
- Global Social Entrepreneurship, Minor (p. 265)
- Leadership and Human Capital, Minor (p. 265)
- Strategy, Minor (p. 266)
- Sustainable Business Practices, Minor (p. 266)

Business Administration, Minor

The minor in business administration introduces nonbusiness students to the key functional areas in business, providing a broad overview of the business world. The minor is available to nonbusiness students only.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Accounting

Code	Title	Hours
ACCT 1209	Financial Accounting and Reporting	4

Organizational Behavior

Finance

Code	Title	Hours
FINA 2209	Financial Management (ACCT 1209 is a prerequisite)	4

Marketing

Note: It is recommended that students complete Financial Accounting and Reporting (ACCT 1209) prior to taking Introduction to Marketing (MKTG 2209):

Code	Title	Hours
MKTG 2209	Introduction to Marketing	4

Business Elective

Code	Title	Hours
Complete one of the following courses or, with the approval of the undergraduate dean's office, any business course for which the prerequisites have been met:		4

BUSN 1110	Fundamentals of Business
ENTR 1201	The Entrepreneurial Universe
ENTR 2206	Global Social Enterprise
ENTR 2301	Innovation!
ENTR 2215	Understanding Family Enterprise
ENTR 2414	Social Responsibility of Business in an Age of Inequality
FINA 1209	Personal Finance
FINA 2720	Sustainability in the Business Environment
INTB 1209	International Business and Global Social Responsibility
INTB 2501	Competing to Win in Emerging Markets

GPA Requirement

2.000 GPA required in the minor

Business Analytics, Minor

The business analytics minor is open to undergraduate students with any major and concentration. The minor program offers contemporary data-grounded courses from a business perspective. The goal of these courses is to help students develop business data capability that can be applied to all business and decisions contexts. The minor courses include both fundamental courses and courses geared toward more specific data analytics challenges. Each of these courses will include real-world examples and data sets, grounded in relevant theory and principles, and will be reinforced using various user-friendly tools to gain the necessary skills and knowledge for tomorrow's work environment.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses

where specified. Only one course in the minor may double count with one of the seven business concentrations.

Required Course

SCHM 3308	Supply Chain Analytics	

GPA Requirement

2.000 GPA required in the minor

Emerging Markets, Minor

The minor in emerging markets introduces students to the challenges and opportunities that face companies in countries that are rapidly developing into more developed world economies. Students have an opportunity to combine course work that explores the dynamics of conducting business and generating innovations in emerging markets with a summer field project on-site in an area of the world where markets are rapidly developing. This interdisciplinary minor is open to business and nonbusiness students.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Emerging Markets

Code	Title	Hours
INTB 2501	Competing to Win in Emerging Markets	4

Field Research

Code	Title	Hours
INTB 3316 and INTB 3318	Economic, Social, and Political Dimensions of Doing Business in Brazil and Field Research in Emerging Markets in Brazil	8

Please note: Additional research courses may be accepted with approval from the undergraduate dean's office.

Electives

Code	Title	Hours

CLTR 1500 or HIST 1500	Modern Chinese History and Culture	

CLTR 1505	Introduction to Latin American Culture
COMM 2303	Global and Intercultural Communication
LPSC 2302	Global Human Rights: A Social and Economic Perspective
POLS 3405	International Political Economy
POLS 3407	International Organizations
POLS 3487	Politics of Developing Nations

GPA Requirement

2.000 GPA required in the minor

Entrepreneurship, Minor

This five-course (20 credit) Interdisciplinary minor guides students through the startup process. Students are exposed to innovation, marketing, and business modeling and given the opportunity to develop prototypes for their new ideas. They will then work in interdisciplinary teams to develop business plans. Support is provided to help students advance their ventures through IDEA, the venture incubator.

Depending on the participating college, one or two courses have been carefully selected as substitutes for D'Amore-McKim School of Business courses, allowing a student to apply the same course to both his or her own college degree and our entrepreneurship minor. We currently have partnerships with CAMD, COE, CCIS, Bouvé, and COS. This allows students to learn entrepreneurship from business school professors while at the same time innovate and prototype new products and systems within their area's faculty. This powerful combination leads to exciting new ventures.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Note: This minor is not available to students in the D'Amore-McKim School of Business.

Required Course

Code	Title	Hours
Complete one of the following:		4
ENTR 4501	Business Planning for Technology Ventures	
ENTR 4503	Business Planning for Small and Medium Enterprises	
ENTR 4505	Entrepreneurial Growth Strategy for Technology Ventures	

Electives

Code	Title	Hours
A minimum of two courses must be ENTR courses.		
Complete four of the following:		16
ENTR 1201	The Entrepreneurial Universe

GAME 2010	The Business of Games
GE 1110	Engineering Design (engineering students only)
GE 5100	Product Development for Engineers (engineering students only)

GPA Requirement

2.000 GPA required in the minor

Global Social Entrepreneurship, Minor

This five-course (20 credits) interdisciplinary minor in global social entrepreneurship (GSE) is administered by the D'Amore-McKim School of Business through its Entrepreneurship and Innovation Group (ENT) in collaboration with the College of Social Sciences and Humanities (CSSH).

The minor consists of three on-campus courses and one two-course Dialogue of Civilizations Program (Dialogue). The minor is open to business and nonbusiness students. Several of the courses included in this minor may also apply to other programs or individual course requirements. Because this minor is interdisciplinary, a student may apply only three courses from any one college toward completion of the minor. For example, after a student completes Global Social Enterprise (ENTR 2206) (a D'Amore-McKim School of Business course) and a D'Amore-McKim School of Business Dialogue, then the remaining two courses must come from CSSH. If, alternatively, a student completes a qualified CSSH Dialogue, then he or she may thereafter take one or two elective courses from the D'Amore-McKim School of Business.

Finally, note that business students can pursue this minor or alternatively choose to pursue the ENT concentration with a track (concentration track) in social entrepreneurship, which requires three ENTR courses in social entrepreneurship and does not require a Dialogue. Students may also choose to pursue both the minor and the ENT concentration.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Note: No more than three courses may be taken from any one college.

Required Course

Code	Title	Hours
ENTR 2206	Global Social Enterprise	4

Research Courses

Code	Title	Hours
Complete one of the following:		8
ENTR 3306 and ENTR 3308	Global Entrepreneurship and Business Economic History of South Africa	

ENTR 4512 and ENTR 4514	Social Entrepreneurship and Sustainable Development in India and Development Practice and Global Citizenship in India
-------------------------	---

HUSV 4945 and HUSV 4866	Leadership and International Program Development and Intercultural Studies through Human Services
-------------------------	---

Please note: Additional research courses may be accepted with approval from the undergraduate dean's office.

Electives

Code	Title	Hours
Complete two of the following:		8

LPSC 2302	Global Human Rights: A Social and Economic Perspective	
POLS 3487	Politics of Developing Nations	
POLS 3406	International Law	

GPA Requirement

2.000 GPA required in the minor

Leadership and Human Capital, Minor

The leadership and human capital minor will deepen students' knowledge and skills that are necessary to attract, retain, develop, lead, and manage employees. Employees of a firm are resources for an employer and based on their expertise provide economic value to a firm. Thus, the effective leadership and management of human capital is instrumental to an organization's success. As organizations are seeking new ways of dealing with problems such as globalization, a weak economy, rapidly changing technology, union-management relations, and changing demographics in the workplace, managers and human resources professionals use a wide range of techniques for handling these and other challenges and ensuring that their employees and organizations are competitive and high performing.

Managing human capital is a significant component of the strategic management of an organization. The courses offered in the leadership and human capital minor will expose students to the major issues and challenges in leading and managing a global and increasingly diverse workforce. The courses address the human capital issues all employees face and offer ways to deal with them.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified. Please note, only one course in the minor may double count in one of the seven business concentrations.

Organizational Behavior

Code	Title	Hours
ORGB 3201	Organizational Behavior	4
or ORGB 3209	Organizational Behavior	

Managing Human Capital

MGMT 3330	Developing Leaders for Global Sustainability	
MGMT 3350	Managing a Diverse Workforce	
MGMT 4310	The Management Practices of Great Organizations	
MGMT 4410	Human Resources and Workforce Analytics	

GPA Requirement

2.000 GPA required in the minor

Strategy, Minor

The strategy minor is open to undergraduate business students with any major or concentration. The curriculum develops students' ability to assume the role of a general manager and to think constructively about the strategic focus and direction of an organization, as well as its relative competitive strengths and weaknesses. Broad topics include the appropriate criteria and processes for general management decision making, especially under conditions of uncertainty; strategies a firm can follow in order to gain competitive advantage when entering into, competing within, and exiting from individual markets and how these strategies interact when the firm competes in several markets; and the optimal boundaries of the firm—the advantages and disadvantages its unique history and resources give it. The strategy minor may be of particular interest for students who plan to pursue careers in general management, management consulting, new venture management, venture capital, corporate planning, and investment banking.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Courses

Code	Title	Hours
STRT 4501	Strategy in Action	4
or INTB 4202	Executing Global Strategy

Accelerated Bachelor/Graduate Degree Programs

Northeastern University offers a number of PlusOne bachelor's/master's degree programs that allow students to accelerate the completion of the bachelor's degree by applying graduate credits taken as an undergraduate toward both the undergraduate and graduate degrees. Generally, both degrees may be earned in one more year than is the normal time allotted for completion of the bachelor's degree. See additional information on PlusOne Bachelor's/Master's programs (<http://www.northeastern.edu/plusone>).

If you have questions regarding specific accelerated programs see the college's Dean's Office.

Computing has transformed the way people work and live, and its applications are limitless. Today, an understanding of computing is critical in business, healthcare, science, digital art, and other areas of our information-driven society. Computing knowledge and computing technology also contribute to resolving major issues in an increasingly complex world.

The College of Computer and Information Science offers undergraduate programs that combine a strong foundation in computing with the opportunity to acquire a deep knowledge of another discipline in which computing plays a critical role. The college offers undergraduate degree programs in computer science (BS and BA), data science (BS), information science (BS), and cybersecurity (BS); combined majors with business administration, cognitive psychology, biology, biochemistry, mathematics, physics, environmental science, health sciences, game development, music composition and technology, linguistics, communication, design, media arts, journalism, criminal justice, economics, English, history, philosophy, political science, and sociology; and a combined major in computer science and information science. The BS in computer science emphasizes strong technical competence in computer science, mathematics, science, and electrical engineering. The BA in computer science combines computer science with a broad-based liberal arts education. The BS in information science integrates studies in computer science, behavioral science, business, and social science. The BS in data science combines computer science, information science, mathematics, statistics, and probability theory into an integrated curriculum. The BS in cybersecurity provides the fundamental knowledge of computer science with an essential focus on experiential learning through security-related courses. The BS in computer science with a concentration in cyber operations extends the regular BS in computer science by requiring a significant number of courses in security and in networks both wired and wireless. This program is one of the initial four programs selected in 2012 by the National Security Agency as a National Center of Academic Excellence in Cyber Operations Program.

Academic Progression Standards

To progress to sophomore standing, students are required to earn:

- A minimum of 25 semester hours of credit
- A minimum overall and CS GPA of 1.800

- A grade of C or higher in First-Year Writing (ENGW 1111) or First-Year Writing for Multilingual Writers (ENGW 1102)

A deficit in any of these criteria after two semesters of enrollment will lead to student dismissal from CCIS and Northeastern.

Additional requirements

- Students are permitted two attempts to earn a minimum grade of C– in the following courses:
 - Discrete Structures (CS 1800)
 - Fundamentals of Computer Science 1 (CS 2500)
 - Fundamentals of Computer Science 2 (CS 2510)
- If a C– is not earned by the second attempt, a student will be dismissed from CCIS and Northeastern.
- If the following courses are required by the degree program, a minimum grade of C– is required:
 - Calculus for Business and Economics (MATH 1231)
 - Calculus and Differential Equations for Biology 1 (MATH 1251)
 - Calculus and Differential Equations for Biology 2 (MATH 1252)
 - Intensive Calculus for Engineers (MATH 1340)
 - Calculus 1 for Science and Engineering (MATH 1341)
 - Calculus 2 for Science and Engineering (MATH 1342)

Maintaining good standing

To remain in good academic standing and progress after the first year, students are required to fulfill:

- A minimum of 12 SH in each full-term semester (fall or spring)
- A minimum overall GPA of 2.000
- A minimum GPA of 2.000 in all CS/IS/DS courses
- A minimum GPA of 2.000 for business courses in the combined CS and business, IS and business, and cybersecurity and business majors (or the business portion of the combined major will be dropped)

Program Length

The College of Computer and Information Science prides itself on flexibility and a very supportive advising staff. Depending upon the number of entry-level/transfer credits, the academic program, and student planning, it is possible to complete the program within four years with at least one experiential experience and usually with two such experiences.

Computer Science

Computer science involves the application of theoretical concepts in the context of software development to the solution of problems that arise in almost every human endeavor. Computer science as a discipline draws its inspiration from mathematics, logic, science, and engineering. From these roots, computer science has fashioned paradigms for program structures, algorithms, data representations, efficient use of computational resources, robustness and security, and communication within computers and across networks. The ability to frame problems, select computational models, design program structures, and develop

efficient algorithms is as important in computer science as software implementation skill. Computer science is concerned with bringing together all of the intellectual resources needed to enable the rapid and effective development of software to meet the needs of business, research, and end users.

The goal of the undergraduate program in computer science is to teach students the conceptual and practical skills that will enable them to contribute to the development of computational principles and to play a productive role in the software community. To that end, the undergraduate program focuses on the fundamentals of program design including object-oriented design, software development, computer organization, systems and networks, theory of computation, principles of languages, and advanced algorithms and data. The program also offers a variety of electives at the upper undergraduate and beginning graduate levels ranging from more theoretical courses to those that focus on important applications.

The Bachelor of Science in Computer Science with Concentration in Cyber Operations is one of the initial four programs selected in 2012 by the National Security Agency as a National Center of Academic Excellence in Cyber Operations Program.

Programs

Bachelor of Science in Computer Science (BSCS)

- Computer Science (p. 269)
- Computer Science with Concentration in Cyber Operations (p. 272)

Bachelor of Arts in Computer Science (BACS)

- Computer Science (p. 274)

Bachelor of Science (BS)

- Cybersecurity (p. 276)

Minor

- Computer Science (p. 279)

Accelerated Programs

See Accelerated Bachelor/Graduate Degree Programs (p. 367)

Computer Science, BSCS

The Bachelor of Science in Computer Science focuses on the fundamentals of program design, software development, computer organization, systems and networks, theories of computation, principles of languages, and advanced algorithms and data. The bachelor's degree in computer science is also offered with a concentration in cyber operations.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Computer Science Major Requirements

Code	Title	Hours
Computer Science Overview		
CS 1200	Leadership Skill Development	1
CS 1210	Professional Development for CCIS Co-op	1
Computer Science Fundamental Courses		
A grade of C– or higher is required in computer science fundamental courses:		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
CS 2800 and CS 2801	Logic and Computation and Lab for CS 2800	5
Computer Science Required Courses		
CS 3000	Algorithms and Data	4
CS 3500	Object-Oriented Design	4
CS 3650	Computer Systems	4
CS 3700	Networks and Distributed Systems	4
CS 3800	Theory of Computation	4
CS 4400	Programming Languages	4
CS 4500 and CS 4501	Software Development and Recitation for CS 4500	4
Presentation Requirement		
THTR 1170	The Eloquent Presenter	1
Computer Science Capstone		
Complete one of the following:		4-5
CS 4100	Artificial Intelligence	
CS 4300	Computer Graphics	
CS 4410	Compilers	
CS 4150	Game Artificial Intelligence	
CS 4550	Web Development	
CS 4991	Research	
IS 4900	Information Science Senior Project	
Computer Science Elective Courses		
With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete 8 credits of CS, IS or DS classes that are not already required. Choose courses within the following ranges:		8
CS 2500 or higher, except CS 5010		
IS 2000 or higher, except IS 4900		
DS 2000 or higher, except DS 4900		
Supporting Courses		
Code	Title	Hours
Mathematics Courses		
MATH 1341	Calculus 1 for Science and Engineering (a grade of C– or higher is required)	4

MATH 1342	Calculus 2 for Science and Engineering (a grade of C– or higher is required)	4
MATH 2331	Linear Algebra	4
MATH 3081	Probability and Statistics	4
Computing and Social Issues		
Complete one of the following:		4
ANTH 3418	Wired/Unwired: Cybercultures and Technopolitics	
IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
PHIL 1145	Technology and Human Values	
SOCL 1280	The 21st-Century Workplace	
SOCL 3485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	
Electrical Engineering		
EECE 2160	Embedded Design: Enabling Robotics	4
Science Requirement		
Complete two courses for one of the following science categories:		10
<i>Biology</i>		
BIOL 1111 and BIOL 1112	General Biology 1 and Lab for BIOL 1111	
Then complete one of the following:		
BIOL 1113 and BIOL 1114	General Biology 2 and Lab for BIOL 1113	
BIOL 2301 and BIOL 2302	Genetics and Molecular Biology and Lab for BIOL 2301	
<i>Chemistry</i>		
CHEM 1211 and CHEM 1212 and CHEM 1213	General Chemistry 1 and Lab for CHEM 1211 and Recitation for CHEM 1211	
CHEM 1214 and CHEM 1215 and CHEM 1216	General Chemistry 2 and Lab for CHEM 1214 and Recitation for CHEM 1214	
<i>Geology/Environmental Science (Option 1)</i>		
ENVR 1200 and ENVR 1201	Dynamic Earth and Lab for ENVR 1200	
ENVR 1202 and ENVR 1203	History of Earth and Life and Interpreting Earth History	
<i>Geology/Environmental Science (Option 2)</i>		
ENVR 1200 and ENVR 1201	Dynamic Earth and Lab for ENVR 1200	
Then complete one of the following:		
ENVR 2310 and ENVR 2311	Earth Materials and Lab for ENVR 2310	
ENVR 2340 and ENVR 2341	Earth Landforms and Processes and Lab for ENVR 2340	
ENVR 3300 and ENVR 3301	Geographic Information Systems and Lab for ENVR 3300	
ENVR 4500 and ENVR 4501	Applied Hydrogeology and Lab for ENVR 4500	
<i>Geology/Environmental Science (Option 3)</i>		
ENVR 1202 and ENVR 1203	History of Earth and Life and Interpreting Earth History	

ENVR 5242 and ENVR 5243	Ancient Marine Life and Lab for ENVR 5242
<i>Physics</i>	
Complete one of the following sequences:	
Sequence A	
PHYS 1145 and PHYS 1146	Physics for Life Sciences 1 and Lab for PHYS 1145
PHYS 1147 and PHYS 1148	Physics for Life Sciences 2 and Lab for PHYS 1147
Sequence B	
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155
Sequence C	
PHYS 1161 and PHYS 1162 and PHYS 1163	Physics 1 and Lab for PHYS 1161 and Recitation for PHYS 1161
PHYS 1165 and PHYS 1166 and PHYS 1167	Physics 2 and Lab for PHYS 1165 and Recitation for PHYS 1165

Computer Science Writing Requirement

Code	Title	Hours
College Writing		
ENGW 1111	First-Year Writing	4
Advanced Writing in the Disciplines		
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

Required General Electives

Code	Title	Hours
Complete eight general electives.		32

Major GPA Requirement

Minimum 2.000 GPA required in all CS and IS courses

Computer Science Credit Requirements

Complete 60 semester hours in the major. Acceptable courses for this requirement include all CS courses (except CS 5010) and IS 2000 and higher (except IS 4900).

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Program Requirement

135 total semester hours required

Computer Science with Concentration in Cyber Operations, BSCS

The Bachelor of Science in Computer Science with Concentration in Cyber Operations focuses on the fundamentals of program design, software development, computer organization, systems and networks, theories of computation, principles of languages, and advanced algorithms and data, along with a particular focus on cyber operations.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Computer Science, BACS

The Bachelor of Arts in Computer Science offers a similar curriculum to the BS, with slightly fewer CS requirements to allow students to study a foreign language and have a wider choice of electives.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Requirements for BA

All BA students are required to complete the BA requirements (p. 40).

Computer Science Major Requirements

Code	Title	Hours

CS 1210	Professional Development for CCIS Co-op	1
Computer Science Fundamental Courses		
A grade of C– or higher is required in computer science fundamental courses:		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
CS 2800 and CS 2801	Logic and Computation and Lab for CS 2800	5
Computer Science Required Courses		
CS 3000	Algorithms and Data	4
CS 3500	Object-Oriented Design	4
CS 3650	Computer Systems	4
CS 3700	Networks and Distributed Systems	4
CS 3800	Theory of Computation	4

CS 4500 and CS 4501	Software Development and Recitation for CS 4500	4
------------------------	--	---

Presentation Requirement

THTR 1170	The Eloquent Presenter	1
-----------	------------------------	---

Computer Science Capstone

Complete one of the following:		4-5
--------------------------------	--	-----

CS 4100	Artificial Intelligence	
CS 4150	Game Artificial Intelligence	
CS 4300	Computer Graphics	
CS 4410	Compilers	
CS 4550	Web Development	
CS 4991	Research	
IS 4900	Information Science Senior Project	

Computer Science Elective Courses

With advisor approval, directed study, project study, and appropriate graduate-level courses may also be taken as upper-division electives.

Complete 4 credits that are not already required. Choose courses within the following ranges:		4
---	--	---

CS 2500 or higher, except CS 5010		
IS 2000 or higher, except IS 4900		
DS 2000 or higher, except DS 4900		
MATH 2321	Calculus 3 for Science and Engineering	
MATH 2331	Linear Algebra	
MATH 3000 to MATH 4581 but not MATH 4025		

Supporting Courses

Code	Title	Hours
------	-------	-------

Mathematics Courses

MATH 1341	Calculus 1 for Science and Engineering (a grade of C– or higher is required)	4
MATH 1342	Calculus 2 for Science and Engineering (a grade of C– or higher is required)	4
MATH 3081	Probability and Statistics	4

Science Courses

Complete one course from one of the following groups:		5
---	--	---

Biology

BIOL 1111 and BIOL 1112	General Biology 1 and Lab for BIOL 1111	
----------------------------	--	--

Chemistry

CHEM 1101 and CHEM 1102 and CHEM 1103	General Chemistry for Health Sciences and Lab for CHEM 1101 and Recitation for CHEM 1101	
CHEM 1151 and CHEM 1152 and CHEM 1153	General Chemistry for Engineers and Lab for CHEM 1151 and Recitation for CHEM 1151	

Geology

ENVR 1200 and ENVR 1201	Dynamic Earth and Lab for ENVR 1200	
ENVR 1202 and ENVR 1203	History of Earth and Life and Interpreting Earth History	

Physics

PHYS 1145 and PHYS 1146	Physics for Life Sciences 1 and Lab for PHYS 1145	
----------------------------	--	--

PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	
---	---	--

PHYS 1161 and PHYS 1162	Physics 1 and Lab for PHYS 1161	
----------------------------	------------------------------------	--

Computing and Social Issues

Complete one of the following:		4
--------------------------------	--	---

ANTH 3418	Wired/Unwired: Cybercultures and Technopolitics	
IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
PHIL 1145	Technology and Human Values	
SOCL 1280	The 21st-Century Workplace	
SOCL 3485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	

Computer Science Writing Requirement

Code	Title	Hours
------	-------	-------

College Writing

ENGW 1111	First-Year Writing	4
-----------	--------------------	---

Advanced Writing in the Disciplines

ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

Required General Electives

Code	Title	Hours
------	-------	-------

Complete 10 general electives.		40
--------------------------------	--	----

Major GPA Requirement

Minimum 2.000 GPA required in all CS and IS courses

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Program Requirement

134 total semester hours required

Cybersecurity, BS

The Bachelor of Science in Cybersecurity teaches students the conceptual and practical skills that will enable them to contribute to ensuring the reliability and security of cyberspace. The program will provide students with the fundamental knowledge of computer science that forms the technical foundation of the field, with an essential focus on experiential learning through laboratory exercises in the security-related courses, as well as through the co-op program. The program’s holistic view of cybersecurity gives it a strong interdisciplinary focus, teaching students how social behavior, policy, and legal rules can affect cybersecurity and the tools of information technology.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Cybersecurity Major Requirements

Code	Title	Hours
Computer Science Overview		
CS 1200	Leadership Skill Development	1
CS 1210	Professional Development for CCIS Co-op	1
Computer Science Fundamental Courses		
A grade of C– or higher is required in computer science fundamental courses:		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
Computer Science Required Courses		
CS 3000	Algorithms and Data	4
CS 3500	Object-Oriented Design	4
CS 3650	Computer Systems	4
CS 3700	Networks and Distributed Systems	4
CS 3800	Theory of Computation	4
Presentation Requirement		
THTR 1170	The Eloquent Presenter	1
Cybersecurity Required Courses		
CS 2550	Foundations of Cybersecurity	4
CS 3740	Systems Security	4
CS 4170	The Law, Ethics, and Policy of Data and Digital Technologies	4
or IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
CS 4740	Network Security	4
CS 4770	Cryptography	4
CS 4930	Cybersecurity Capstone	4
or CS 4940	Research Projects on National Security	
Cybersecurity Electives		
If courses require prerequisites, those should be taken using general electives.		
Complete five courses from the following, at least one of which must come from the cybersecurity and social issues elective list:		20-22
CS 2800 and CS 2801	Logic and Computation and Lab for CS 2800	
CS 4710	Mobile and Wireless Systems	

or CS 6710	Wireless Network
CS 5770	Software Vulnerabilities and Security
CS 4400	Programming Languages
CS 4500 and CS 4501	Software Development and Recitation for CS 4500
CS 4240	Large-Scale Parallel Data Processing
DS 4300	Large-Scale Information Storage and Retrieval
DS 4400	Machine Learning and Data Mining 1
IA 5200	Security Risk Management and Assessment
IA 5210 and IA 5211	Information System Forensics and Lab for IA 5210
IS 4300	Human Computer Interaction
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322
EECE 3324	Computer Architecture and Organization
EECE 4534 and EECE 4535	Microprocessor-Based Design and Lab for EECE 4534
MATH 3527	Number Theory 1
MATH 4575	Introduction to Cryptography
MISM 2301	Management Information Systems
or MISM 2309	Management Information Systems
Cybersecurity and Social Issues Elective List	
COMM 2551	Free Speech in Cyberspace
CRIM 2200	Criminology
CRIM 3400	Corporate Security: Securing the Private Sector
CRIM 4040	Crime Prevention
LPSC 1101	Introduction to Law
LPSC 2301	Introduction to Law, Policy, and Society
LPSC 3303	Topics in Law and Public Policy
POLS 2390	Science, Technology, and Public Policy
POLS 3307	Public Policy and Administration
POLS 3324	Law and Society
POLS 3406	International Law
POLS 3408	International Security
POLS 3420	U.S. National Security Policy
POLS 3423	Terrorism and Counterterrorism

Concentration in Cyber Operations (Optional)

Code	Title	Hours
Cyber Operations Required Courses		
CS 4710	Mobile and Wireless Systems	4
CS 5770	Software Vulnerabilities and Security	4
IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	4
Electives		
Complete two of the following:		8
CS 4500 and CS 4501	Software Development and Recitation for CS 4500	
CS 4240	Large-Scale Parallel Data Processing	
EECE 3324	Computer Architecture and Organization	

EECE 4534	Microprocessor-Based Design
IA 5200	Security Risk Management and Assessment
IA 5210 and IA 5211	Information System Forensics and Lab for IA 5210

Supporting Courses

Code	Title	Hours
Electrical Engineering Required Course		
EECE 2160	Embedded Design: Enabling Robotics	4
Mathematics Courses		
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 3081	Probability and Statistics	4

Writing Requirements

Code	Title	Hours
College Writing		
ENGW 1111	First-Year Writing	4
Advanced Writing in the Disciplines		
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

Required General Electives

Code	Title	Hours
Complete seven general electives.		28

Major GPA Requirement

Minimum 2.000 GPA required in all CS and IS courses

Computer Science Credit Requirements

Complete 80 semester hours in the major.

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Program Requirement

133 semester hours required

Plan of Study

Total Hours: 132

Computer Science, Minor

A computer science minor is designed to provide the computer science skills and know-how you need to succeed in today's highly digital world. A minor requires completion of five CS courses—more than enough to gain proficiency while easily fitting around your major requirements. No prior programming experience is needed.

Looking to gain technical knowledge that directly applies to your major? Students have the option to pursue a CCIS meaningful minor.

Minor Requirements

Note: CCIS minors are only available to non-CCIS majors; students in CCIS-only or CCIS-combined degrees are not eligible for CCIS minors. A

student may receive at most one CCIS minor, regardless of how many CCIS minors they qualify for.

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Courses

Code	Title	Hours
Computer Science Fundamental Courses		
A grade of C– or higher is required in computer science fundamental courses:		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5

Computer Science Electives

Code	Title	Hours
Complete three courses that are not already required in the following ranges:		
CS 2500 to CS 7999 but not CS 5010		
IS 4300	Human Computer Interaction	12
One course from CCIS meaningful minors list (see below).		

CCIS Meaningful Minors

The concept of “CCIS meaningful minors” allows students the chance to personalize a computer or information science minor to meet individual academic needs and interests. Students may take *one elective* related to computation or information from a preapproved list of courses offered across the university rather than from within CCIS. This allows students to integrate the minor with a course in their own major or with a course in another area of interest. Students may of course choose to take all electives in the minor within CCIS if they wish.

Information Science

Unlocking the full potential of information technology—ensuring that it serves the goals and needs of users, clients, and society—is a tremendous challenge, one that requires a unique blend of knowledge and skills. The field of information science (IS) focuses on the relationship between computers, the people who use them, and the contexts in which they operate. IS seeks to further our understanding of:

1. information itself: where it comes from, how it is organized, and how it is used;
2. the design of computer applications that are usable, socially acceptable, and achieve the goals for which they were created;
3. the impact of information technology (IT) on human life and work; and

4. how the nature of the information, the goals of the users, and the relevant social policies and laws both influence and are influenced by the technical aspects of computer systems.

Information science majors have an opportunity to acquire a strong technical foundation by taking classes in mathematics, logic, and computer science and to acquire a strong foundation in behavioral science by taking classes in cognitive psychology, economics, and statistics. A course in the principles of information science introduces students to important intellectual frameworks such as decision theory, general systems theory, and social informatics and to topics of current importance such as digital copyright, trusted systems, and Internet privacy policy. Building on these foundations, the IS core develops expertise in the design, development, management, maintenance, and evaluation of large-scale information technology systems. Elective courses cover topics such as software project management, text/hypertext retrieval and data mining, social information systems, health informatics, ubiquitous computing, artificial intelligence, information security, and e-commerce.

Programs

Bachelor of Science in Information Science (BSIS)

- Information Science (p. 281)

Minor

- Information Science (p. 283)

Information Science, BSIS

The program combines concepts and skills from computer science, behavioral and social sciences, and system design into an integrated curriculum that is focused on people. The course work covers information architecture; information system design and development; programming and software design; database design; systems and networks; information resource management; social informatics; quantitative and qualitative research methods; and human computer interaction.

Although there is no sharp boundary between computer science and information science, it may be said that CS is concerned with building the software and services infrastructure used by people and organizations worldwide, whereas IS is concerned with the information and software needs of a particular business, healthcare provider, government agency, or nonprofit.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Common Computer and Information Science Curriculum

Code	Title	Hours
Computer Science Overview		
CS 1200	Leadership Skill Development	1
CS 1210	Professional Development for CCIS Co-op	1
Computer Science Fundamental Courses		
A grade of C– is required:		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
Computer Science Required Courses		
CS 3000	Algorithms and Data	4
CS 3500	Object-Oriented Design	4
CS 3650	Computer Systems	4
CS 3700	Networks and Distributed Systems	4
Computing and Social Issues		
Complete one of the following:		4
ANTH 3418	Wired/Unwired: Cybercultures and Technopolitics	
IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
PHIL 1145	Technology and Human Values	
SOCL 1280	The 21st-Century Workplace	
SOCL 3485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	

Common Information Science Curriculum

Code	Title	Hours
Information Science Foundations		
CS 3200	Database Design	4
IS 2000	Principles of Information Science	4
IS 3500	Information System Design and Development	4
Human Computer Interaction		
IS 4300	Human Computer Interaction	4
PSYC 1101	Foundations of Psychology	4
Research and Data Analysis		
PSYC 2320 or ECON 2350	Statistics in Psychological Research or Statistics	4
IS 4800	Empirical Research Methods	4
IS 4900	Information Science Senior Project	5

Information Science Concentrations

Complete one of the following concentrations:

- Information Systems Management (p. 282)
- Human Computer Interaction (p. 282)
- Research and Data Analysis (p. 282)

Computer Science or Information Science Electives

Code	Title	Hours
With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.		
Complete 8 credits of CS, IS, or DS classes that are not already required. Choose courses within the following ranges:		8
CS 2500 or higher, except CS 5010		
IS 2000 or higher, except IS 4900		
DS 2000 or higher, except DS 4900		

Computer Science English Requirement

Code	Title	Hours
College Writing		
ENGW 1111	First-Year Writing	4
Advanced Writing in the Disciplines		
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

Required General Electives

Code	Title	Hours
Complete nine general electives.		

Major GPA Requirement

Minimum 2.000 GPA required in all CS and IS courses

Information Science Major Credit Requirement

Complete 73 semester hours in CS and IS for the major.

Program Requirement

132 total semester hours required

Concentrations

CONCENTRATION IN INFORMATION SYSTEMS MANAGEMENT

Code	Title	Hours
Complete three of the following:		
CS 4500 and CS 4501		12
CS 4550		
MISM 4501		
ORGB 3201		
or ORGB 3209		

CONCENTRATION IN HUMAN COMPUTER INTERACTION

Code	Title	Hours
Complete three of the following:		
PSYC 3466		12
CS 4100		
CS 4500 and CS 4501		
CS 4520		
CS 4550		
CS 6120		

DS 4200	Information Presentation and Visualization
---------	--

CONCENTRATION IN RESEARCH AND DATA ANALYSIS

Code	Title	Hours
Complete three of the following:		
IS 4200		12
CS 4100		
CS 4500 and CS 4501		
CS 6120		
DS 4000 or higher		

Plan of Study

Information Science, Minor

CCIS minors provide the computer science skills and know-how you need to succeed in today's highly digital world. A minor requires completion of five CS courses—more than enough to gain proficiency while easily fitting around your major requirements. All with no prior programming experience needed. Looking to gain technical knowledge that directly applies to your major? You have the option to pursue a CCIS meaningful minor for both CS and IS.

Minor Requirements

Note: CCIS minors are only available to non-CCIS majors; students in CCIS-only or CCIS-combined degrees are not eligible for CCIS minors. A student may receive at most one CCIS minor, regardless of how many CCIS minors they qualify for.

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Courses

Code	Title	Hours
Computer Science Fundamental Courses		
A grade of C– or higher is required in computer science fundamental courses.		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
Information Science Required Course		
IS 2000	Principles of Information Science	4

Information Science Electives

Code	Title	Hours
Complete two from the following:		8
IS 1500	Introduction to Web Development	
IS 2000 to IS 4989		
CS 3200	Database Design	
One course from CCIS meaningful minors (see below)		

CCIS Meaningful Minors

The concept of “CCIS Meaningful Minors” allows students the chance to personalize a computer or information science minor to meet individual academic needs and interests. Students may take *one elective* related to computation or information from a preapproved list of courses offered across the university rather than from within CCIS. This allows students to integrate the minor with a course in their own major or with a course in another area of interest. Students may of course choose to take all electives in the minor within CCIS if they wish.

Data Science

The Bachelor of Science in Data Science studies the collection, manipulation, storage, retrieval, and computational analysis of data in its various forms, including numeric, textual, image, and video data from small to large volumes. The program combines computer science, information science, mathematics, statistics, and probability theory into an integrated curriculum that prepares students for careers or graduate studies in big data analysis, data science, and data analytics. The course work covers exploratory data analysis, data manipulation in a variety of programming languages, large-scale data storage, predictive analytics, machine learning, data mining, and information visualization and presentation. Data science has emerged as a discipline due to the confluence of two major events:

1. The ability to collect, store, prune, process, and transmit large amounts of data in the cloud, and
2. The convergence of programming, statistics, artificial intelligence, and visualization as complementary tools for the analysis and understanding of data.

Programs

Bachelor of Science (BS)

- Data Science, BS (p. 285)
- Data Science, Minor (p. 287)

Data Science, BS

The Bachelor of Science in Data Science studies the collection, manipulation, storage, retrieval, and computational analysis of data in its various forms, including numeric, textual, image, and video data from small to large volumes.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Data Science Major Requirements

Code	Title	Hours
Computer Science Overview		
CS 1200	Leadership Skill Development	1

CS 1210	Professional Development for CCIS Co-op	1
---------	---	---

Computer Science Fundamental Courses

A grade of C– or higher is required in computer science fundamental courses.

CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5

Computer Science Required Courses

IS 2000	Principles of Information Science	4
CS 3200	Database Design	4
CS 3500	Object-Oriented Design	4
CS 3520	Programming in C++	4

Presentation Requirement

MATH 2331	Linear Algebra
MATH 3081	Probability and Statistics
MATH 4581	Statistics and Stochastic Processes
MISM 3305	Information Resource Management
MISM 3403	Data Management in the Enterprise
MKTG 3401	Marketing Research
MKTG 3501	Marketing Analytics
PSYC 2320	Statistics in Psychological Research

¹ The statistics course options under Mathematics and Statistics Foundations are also listed here as Data-Science-Related Electives. A student is permitted to take at most one additional statistics course to see statistics from the perspective of a different department.

Computer Science Writing Requirement

Code	Title	Hours
College Writing		
ENGW 1111	First-Year Writing	4
Advanced Writing in the Disciplines		
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

Required General Electives

Code	Title	Hours
Complete eight general electives.		32

Major GPA Requirement

Minimum 2.000 GPA required in all CS, IS, and DS courses

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Program Requirement

133 total semester hours required

Computer and Information Science Combined Majors

The college offers combined majors with business administration, cognitive psychology, biology, biochemistry, mathematics, physics, environmental science, health sciences, game development, music composition and technology, linguistics, communication, design, media arts, journalism, criminal justice, economics, English, history, philosophy, political science, and sociology, and a combined major in computer science and information science. Each of the combined majors offers the opportunity for intense study in two disciplines with appropriate breadth in the liberal arts. Students take nine to 13 courses in each discipline (or a related discipline) and at least one integrative course that binds the disciplines together. These programs offer an excellent educational opportunity for the ambitious student.

Programs

Bachelor of Science (BS)

- Computer Science and Information Science (p. 289)
- Computer Science and Biology (p. 293)
- Computer Science and Business Administration (p. 234)
- Computer Science and Cognitive Psychology (p. 301)
- Computer Science and Communication Studies (p. 125)
- Computer Science and Criminal Justice (p. 307)
- Computer Science and Design (p. 80)
- Computer Science and Economics (p. 312)
- Computer Science and English (p. 314)
- Computer Science and Environmental Science (p. 318)
- Computer Science and Game Development (p. 83)
- Computer Science and History (p. 322)
- Computer Science and Journalism (p. 170)
- Computer Science and Linguistics (p. 327)
- Computer Science and Mathematics (p. 330)
- Computer Science and Media Arts (p. 84)
- Computer Science and Music with Concentration in Music Technology (p. 188)

- Computer Science and Philosophy (p. 337)
- Computer Science and Physics (p. 339)
- Computer Science and Political Science (p. 342)
- Computer Science and Sociology (p. 344)
- Cybersecurity and Business Administration (p. 239)
- Cybersecurity and Criminal Justice (p. 351)
- Cybersecurity and Economics (p. 352)
- Data Science and Biochemistry (p. 354)
- Data Science and Health Science (p. 355)
- Information Science and Business Administration (p. 249)
- Information Science and Cognitive Psychology (p. 360)
- Information Science and Environmental Science (p. 362)
- Information Science and Journalism (p. 173)

Bachelor of Science in Computer Engineering (BSCompE)

- Computer Engineering and Computer Science (p. 290)

Computer Science and Information Science, BS

The computer science and information science combined major is designed for students looking for a thorough immersion in both fields. Students will focus on the fundamentals and theories of computing plus the management of information—while taking all required courses for the computer science and information science undergraduate degree programs.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Computer Science Courses

Code	Title	Hours
Computer Science Overview		
CS 1200	Leadership Skill Development	1
CS 1210	Professional Development for CCIS Co-op	1
Computer Science Fundamental Courses		
A grade of C– or higher is required in computer science fundamental courses.		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
CS 2800 and CS 2801	Logic and Computation and Lab for CS 2800	5
Computer Science Required Courses		

CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500	Object-Oriented Design	4
CS 3650	Computer Systems	4
CS 3700	Networks and Distributed Systems	4
CS 3800	Theory of Computation	4
CS 4400	Programming Languages	4
CS 4500 and CS 4501	Software Development and Recitation for CS 4500	4

Information Science Courses

Code	Title	Hours
Required Courses in Information Science		
IS 2000	Principles of Information Science	4
IS 3500	Information System Design and Development	4
IS 4300	Human Computer Interaction	4
IS 4800	Empirical Research Methods	4
IS 4900	Information Science Senior Project	5

Computing and Social Issues

Complete one of the following:		4
ANTH 3418	Wired/Unwired: Cybercultures and Technopolitics	
IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
PHIL 1145	Technology and Human Values	
SOCL 1280	The 21st-Century Workplace	
SOCL 3485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	

Supporting Courses

Code	Title	Hours
Psychology		
PSYC 1101	Foundations of Psychology	4
Calculus		
MATH 1341	Calculus 1 for Science and Engineering (A grade of C– or higher is required)	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2331	Linear Algebra	4
Statistics		
PSYC 2320 or ECON 2350	Statistics in Psychological Research or Statistics	4

Computer Science Writing Requirement

Code	Title	Hours
College Writing		
ENGW 1111	First-Year Writing	4
Advanced Writing in the Disciplines		
ENGW 3302 or ENGW 3315	Advanced Writing in the Technical Professions or Interdisciplinary Advanced Writing in the Disciplines	4

Required General Electives

Code	Title	Hours
Complete seven general electives.		

Major GPA Requirement

Minimum 2.000 GPA required in all CS and IS courses

Program Requirement

133 total semester hours required

Plan of Study

Four Years, Two Co-ops in Summer/Fall

Year 1

Computer Engineering and Computer Science, BSCompE

This intercollege dual major serves students who are interested in both computer hardware and software, combining an accredited Bachelor of Science degree in engineering with the added benefits of depth in software principles found in a Bachelor of Science degree in computer science. This program provides a well-rounded computing education that includes engineering design principles, computational thinking, proper program design, and a solid background in mathematics and science. The degree is fully accredited as a Bachelor of Science in Computer Engineering and adds the computer science depth.

Because of the large body of shared knowledge between computer engineering and computer science, an integrated dual major between these two disciplines is a logical course of study and can be

accomplished within a student's usual five-year program (including three co-op placements) without requiring course overloading in any semester. A student graduating from this program will have a solid foundation in both computer hardware and software principles, and should be prepared for a wide range of career paths in the computing field or any related field that relies on the application of engineering or computing principles.

Students interested in this program should contact the Department of Electrical and Computer Engineering or the Department of Computer and Information Science as early as possible, preferably prior to registering for freshman courses.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Major GPA Requirement

2.000 minimum GPA in EECE courses

Engineering

Complete 48 semester hours in engineering as indicated below.

Code	Title	Hours
Required Courses		
EECE 2150	Circuits and Signals: Biomedical Applications	5
EECE 2160	Embedded Design: Enabling Robotics	4
Computer Engineering Fundamentals		
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	5
EECE 2540	Fundamentals of Networks	4
CS 3000	Algorithms and Data	4
Electrical Engineering Fundamentals		
Complete one of the following:		4
EECE 2412 and EECE 2413	Fundamentals of Electronics and Lab for EECE 2412	
EECE 2520	Fundamentals of Linear Systems	
EECE 2530 and EECE 2531	Fundamentals of Electromagnetics and Lab for EECE 2530	
Capstone Courses		
EECE 4790	Electrical and Computer Engineering Capstone 1	4
EECE 4792	Electrical and Computer Engineering Capstone 2	4
EECE Technical Electives		
Complete two of the following:		8
EECE 2750	Enabling Engineering	
EECE 4991	Research	

EECE 4992	Directed Study
EECE 4993	Independent Study
GE 4608	Nanotechnology in Engineering
ENGR 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage
EECE 2412 to EECE 2530	
EECE 3324 to EECE 4698	
EECE 5155 to EECE 5698	
CS/IS Technical Electives	
Complete two of the following:	
CS 2550	Foundations of Cybersecurity
CS 3200	Database Design
CS 3540	Game Programming
CS 3700	Networks and Distributed Systems
CS 3740	Systems Security
CS 3800	Theory of Computation
CS 4850	Building Game Engines
CS 4100 to CS 4410	
CS 4510 to CS 4650	
CS 4740 to CS 4760	
IS 4200 to IS 4700	

Supplemental Credit	
3 semester hours from the following course count toward the engineering requirement:	3
GE 1501	Cornerstone of Engineering 1
3 semester hours from the following course count toward the engineering requirement:	3
GE 1502	Cornerstone of Engineering 2

Computer Science Requirements

Code	Title	Hours
Computer Science Introductory Courses		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
CS 2800 and CS 2801	Logic and Computation and Lab for CS 2800	5
Computer Science Upper-Level Courses		
CS 3500	Object-Oriented Design	4
CS 3650	Computer Systems	4
CS 4500 and CS 4501	Software Development and Recitation for CS 4500	4

Professional Development

Code	Title	Hours
Required Professional Development		
GE 1000	Introduction to the Study of Engineering	1
EECE 2000	Introduction to Engineering Co-op Education	1
EECE 3000	Professional Issues in Engineering	1
Additional Required Courses		
The remaining credit from the following course will apply to the professional development area:		1
GE 1501	Cornerstone of Engineering 1	

Integrative Courses

The following courses are taken in the major and count toward the integrative requirement:

Code	Title	Hours
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 3081	Probability and Statistics	4
CS 1800	Discrete Structures	4
PHYS 1151 and PHYS 1152	Physics for Engineering 1 and Lab for PHYS 1151	4
EECE 4790	Electrical and Computer Engineering Capstone 1	4
EECE 4792	Electrical and Computer Engineering Capstone 2	4

Supporting Courses: Mathematics/Science

Complete 35 semester hours in mathematics and science as indicated below.

Code	Title	Hours
Required Mathematics/Science		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 3081	Probability and Statistics	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	5

Supplemental Credit		
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1502	Cornerstone of Engineering 2	

Writing Requirements and NUPath Courses

Code	Title	Hours
Writing		
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

NUPath Requirements through General Electives

NUPath requirements Interpreting Culture (IC), Societies and Institutions (SI), and Differences and Diversity (DD) are not explicitly satisfied by required engineering courses. Students are responsible for satisfying these requirements with general electives.

Required General Electives

Code	Title	Hours
Complete two academic, nonremedial, nonrepetitive courses, each equivalent to 4 semester hours.		8

Course Work That Does Not Count Toward the Engineering Degree

Students in engineering are allowed to count a maximum of two pass/fail courses toward their degree program. Only general electives outside the College of Engineering may be taken on a pass/fail grading basis. A maximum of one pass/fail course is allowed per semester.

Program Requirement

139 total semester hours required

Computer Science and Biology, BS

The computer science and biology combined major reflects how research in biology, especially genetics, has become a computational science.

The program provides a strong foundation in biology, chemistry, and mathematics, as well as software development and algorithms.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Computer Science Courses

Code	Title	Hours
------	-------	-------

Computer Science Overview

CS 1200	Leadership Skill Development ¹	
CS 1210	Professional Development for CCIS Co-op ²	

Computer Science Fundamental Courses

A grade of C– or higher is required in computer science fundamental courses.

CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5

Computer Science Required Courses

CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500	Object-Oriented Design	4
CS 3800	Theory of Computation (integrative course)	4
CS 4500 and CS 4501	Software Development and Recitation for CS 4500	4

Presentation Requirement

THTR 1170	The Eloquent Presenter	1
-----------	------------------------	---

Computer Science Elective Courses

With advisor approval, a directed study, research, project study, or appropriate graduate-level course may also be taken as a computer science elective.

Complete 4 credits of CS, IS, or DS classes that are not already required. Choose courses within the following ranges:

CS 2500 or higher, except CS 5010	
IS 2000 or higher, except IS 4900	
DS 2000 or higher, except DS 4900	

¹ Students entering through the biology department may take Biology at Northeastern (BIOL 1000).

² Students entering through the biology department may take Professional Development for Co-op (EESC 2000).

Biology Courses

Code	Title	Hours
------	-------	-------

Foundations of Biology

BIOL 1107 and BIOL 1108	Foundations of Biology and Lab for BIOL 1107	5
-------------------------	--	---

Inquiries

BIOL 2299	Inquiries in Biological Sciences	4
-----------	----------------------------------	---

Molecular Biology

BIOL 2301 and BIOL 2302	Genetics and Molecular Biology and Lab for BIOL 2301	5
BIOL 3611 and BIOL 3612	Biochemistry and Lab for BIOL 3611	5

Techniques in Biology

BIOL 2309	Biology Project Lab	4
-----------	---------------------	---

Chemistry

CHEM 1161 and CHEM 1162 and CHEM 1163	General Chemistry for the Biological Sciences and Lab for CHEM 1161 and Recitation for CHEM 1161	5
CHEM 2311 and CHEM 2312	Organic Chemistry 1 and Lab for CHEM 2311	5
CHEM 2313 and CHEM 2314	Organic Chemistry 2 and Lab for CHEM 2313	5

Biology Capstone

BIOL 4701	Biology Capstone	4
-----------	------------------	---

Intermediate and Advanced Biology Electives

Complete two biology courses (with corequisite labs if offered). Choose one of these two courses from the following list:

BIOL 2321 and BIOL 2322	Microbiology and Lab for BIOL 2321	
BIOL 2327	Human Parasitology	
BIOL 3401	Comparative Vertebrate Anatomy	
EEMB 2302 and EEMB 2303	Ecology and Lab for EEMB 2302	
EEMB 2400	Introduction to Evolution	
EEMB 2616 and EEMB 2617	Invertebrate Zoology and Lab for EEMB 2616	
EEMB 2700 and EEMB 2701	Marine Biology and Lab for EEMB 2700	

Choose the second elective from the following list:

BIOL 2311 to 4999, EEMB 2290 to 5515, EEMB 5520 to 5534, EEMB 5548 to 5569, EEMB 2400	
---	--

Biology Integrative Course

Complete one of the following:

BIOL 5569	Advanced Microbiology	
BINF 6308	Bioinformatics Computational Methods 1	
BIOL 4707	Cell and Molecular Biology	
BIOL 5581	Biological Imaging	
BIOL 5587	Comparative Neurobiology	
BIOL 5591	Advanced Genomics	
EEMB 5548	Sociobiology	

Supporting Courses

Code	Title	Hours
Calculus		
Complete two calculus courses with a grade of C– or higher:		
MATH 1251	Calculus and Differential Equations for Biology 1	4
MATH 1252	Calculus and Differential Equations for Biology 2	4
Probability and Statistics		
Complete one of the following:		4-5
MATH 3081	Probability and Statistics	
ENVR 2500 and ENVR 2501	Biostatistics and Lab for ENVR 2500	
Computing and Social Issues		
Complete one of the following:		4
ANTH 3418	Wired/Unwired: Cybercultures and Technopolitics	
IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
PHIL 1145	Technology and Human Values	
SOCL 1280	The 21st-Century Workplace	
SOCL 3485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	
Intermediate or Advanced Science		
Complete one course from the following:		4
BIOL 2301 to BIOL 5999		
CHEM 2311 to CHEM 5999		
EEMB 2290 to EEMB 5999		
ENVR 2310 to ENVR 5999		
MATH 2280 to MATH 5999		
PHYS 2303 to PHYS 5999		
PSYC 2290 to PSYC 5999		

Writing Requirements

Code	Title	Hours
College Writing		
ENGW 1111	First-Year Writing	4
Advanced Writing in the Disciplines		
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

Required General Electives

Complete five general electives.

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Exploring Creative Expression and Innovation
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines

- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Major GPA Requirement

Minimum 2.000 GPA required in all CS and IS courses

Program Requirement

141 total semester hours required

Plan of Study

Sample Patterns:

Four Years, Two Co-ops in Summer 2/Fall

Year 1							
Fall	Hours	Spring	Hours	Summer 1	Hours	Summer 2	Hours
CS 1200	1	CS 2510 and CS 2511	5	BIOL 2301	4	Vacation

Computer Science and Business Administration, BS

The computer science and business combined major delivers a technical degree with a strong grounding in business. Students will complete most of the requirements of a business major, including macroeconomics and microeconomics, while also focusing on technical skills like program design, software development, computer organization, systems and networks, theories of computation, principles of languages, and advanced algorithms and data.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Computer Science Courses

Code	Title	Hours
Computer Science Overview		
CS 1200	Leadership Skill Development	1

CS 1210	Professional Development for CCIS Co-op	1
---------	---	---

Computer Science Fundamental Courses

A grade of C– or higher is required in computer science fundamental courses:

CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5

Computer Science Required Courses

CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500	Object-Oriented Design	4
CS 4500 and CS 4501	Software Development and Recitation for CS 4500	4

Complete two of the following: 8

CS 3650	Computer Systems	
CS 3700	Networks and Distributed Systems	
DS 4100	Data Collection, Integration, and Analysis	
DS 4200	Information Presentation and Visualization	
DS 4300	Large-Scale Information Storage and Retrieval	

Presentation Requirement

THTR 1170	The Eloquent Presenter	1
-----------	------------------------	---

Computer Science Elective Courses

With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.

Complete four credits of CS, IS, or DS classes that are not already required. Choose courses within the following ranges: 4

CS 2500 or higher, except CS 5010

IS 2000 or higher, except IS 4900

DS 2000 or higher, except DS 4900

Business Courses

Code	Title	Hours
Required Business Courses		
ACCT 1201	Financial Accounting and Reporting	4
ACCT 2301	Managerial Accounting	4
FINA 2201	Financial Management	4
ORGB 3201	Organizational Behavior	4
MKTG 2201	Introduction to Marketing	4
MGSC 2301	Business Statistics	4
Choose one of the following: ¹		4
STRT 4501	Strategy in Action	
STRT 4516	External Case Competition Challenge	

¹ Strategy in Action (STRT 4501), and External Case Competition Challenge (STRT 4516) both satisfy the capstone requirement.

Business Concentration

Complete a four-course business concentration from the following list. Requirements for the concentrations are listed below (p. 236).

- Accounting (p. 236)
- Entrepreneurship and Innovation (p. 236)
- Finance (p. 236)
- Management (p. 237)
- Marketing (p. 237)
- Supply Chain Management (p. 237)

Integrative Course

Code	Title	Hours
Information Resource Management		
MISM 2301	Management Information Systems	4

Supporting Courses

Code	Title	Hours
Mathematics		
MATH 1341	Calculus 1 for Science and Engineering	4
or MATH 1231	Calculus for Business and Economics	
Economics		
ECON 1115	Principles of Macroeconomics	4
ECON 1116	Principles of Microeconomics	4
Computing and Social Issues		
Complete one of the following:		4
ANTH 3418	Wired/Unwired: Cybercultures and Technopolitics	
IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
PHIL 1145	Technology and Human Values	
SOCL 1280	The 21st-Century Workplace	
SOCL 3485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	

Computer Science Writing Requirement

Code	Title	Hours
College Writing		
ENGW 1111	First-Year Writing	4
Advanced Writing in the Disciplines		
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

Required General Electives

Code	Title	Hours
Complete four general electives.		16

Business Cooperative Education Requirement

Complete one six-month co-op experience.

Computer Science GPA Requirement

Minimum 2.000 GPA required in all CS and IS courses

Business GPA Requirement

Minimum 2.000 GPA required in business courses

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Understanding Societies and Institutions
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Program Requirement

133 total semester hours required

Concentrations

CONCENTRATION IN ACCOUNTING

Code	Title	Hours
Required Courses		
ACCT 3401	Financial Reporting and Analysis 1	4
ACCT 4501	Financial Reporting and Analysis 2	4
Electives		
Complete two of the following:		8
ACCT 3403	Accounting Information Systems	
ACCT 3416	Strategic Cost Analysis for Decision Making	
ACCT 4412	Auditing and Other Assurance Services	
ACCT 4414	Income Tax Determination and Planning	

CONCENTRATION IN ENTREPRENEURSHIP AND INNOVATION

Code	Title	Hours
Note: The following courses do not count toward this concentration:		
ENTR 1201	The Entrepreneurial Universe	
ENTR 3308	Business Economic History of South Africa	
ENTR 3318		
ENTR 3328		
ENTR 3338	Field Research in Sustainable Energy in Iceland	
ENTR 3346		
ENTR 4510	Management Consulting Abroad	
ENTR 4514	Development Practice and Global Citizenship in India	

Introductory Course

ENTR 2301	Innovation!	4
or ENTR 2303	Entrepreneurial Marketing and Selling	

Capstone Course

Complete one of the following:		4
--------------------------------	--	---

ENTR 4501	Business Planning for Technology Ventures
ENTR 4503	Business Planning for Small and Medium Enterprises
ENTR 4505	Entrepreneurial Growth Strategy for Technology Ventures
ENTR 4506	Advanced Studies in Social Enterprise

Electives

Note: Only one non-ENTR course may be used as an elective.

Complete two of the following: 8

ENTR 2206	Global Social Enterprise
ENTR 2215	Understanding Family Enterprise
ENTR 2414	Social Responsibility of Business in an Age of Inequality
ENTR 2301	Innovation! (if not used as introductory course)
ENTR 2303	Entrepreneurial Marketing and Selling (if not used for introductory course)
ENTR 3212	Innovation for Social Change
ENTR 3217	Global Family Business Leadership
ENTR 3220	International Entrepreneurship and Innovation Consulting
ENTR 3305	Entrepreneurial Strategy and Business Model Design
ENTR 3306	Global Entrepreneurship
ENTR 3330	Lean Design and Development for Entrepreneurs
ENTR 3401	Management of Operations and Growth in Small- and Medium-Sized Enterprises
ENTR 3403	Managing Operations in a Technology-Based Startup Firm
ENTR 3520	Impact Investing and Social Finance
ENTR 4225	Corporate Entrepreneurship through Global Growth, Acquisitions, and Alliances
ENTR 4512	Social Entrepreneurship and Sustainable Development in India
FINA 4610	Entrepreneurial Finance, Innovation Valuation, and Private Equity
MGMT 3302	Negotiating in Business

CONCENTRATION IN FINANCE

Code	Title	Hours
Required Course		

FINA 3301 or FINA 3303	Corporate Finance Investments	4
---------------------------	----------------------------------	---

Electives

Complete three of the following: 12

ENTR 3520 or FINA 2720	Impact Investing and Social Finance Sustainability in the Business Environment
FINA 3301	Corporate Finance (if not selected as a required course)
FINA 3303	Investments (if not selected as a required course)
FINA 4219	Portfolio Management
FINA 4220	Behavioral Finance

FINA 4310	Working Capital Management
FINA 4312	Issues in Corporate Governance
FINA 4320	International Financial Management
FINA 4410	Valuation and Value Creation
FINA 4412	Personal Financial Planning
FINA 4420	Mergers and Acquisitions
FINA 4512	Financial Risk Management
FINA 4514	Investment Banking
FINA 4516	Real Estate Finance
FINA 4524	Credit Analysis
FINA 4526	Core Topics in Alternative Investments
FINA 4983	Special Topics in Finance
FINA 4602	Turnaround Management
FINA 4604	Fixed-Income Securities
FINA 4608	Advanced Financial Strategy
FINA 4610	Entrepreneurial Finance, Innovation Valuation, and Private Equity

CONCENTRATION IN MANAGEMENT

Code	Title	Hours
Required Course		

MGMT 4501	Skills for Managerial Success	4
-----------	-------------------------------	---

Electives

Note: Only one non-MGMT course may be used as an elective.

Complete three of the following: 12

MGMT 3302	Negotiating in Business
MGMT 3315	Managing Organizational Change and Disruption
MGMT 3330	Developing Leaders for Global Sustainability
MGMT 3340	Managing Healthcare Organizations: Critical Challenges and New Approaches
MGMT 3350	Managing a Diverse Workforce
MGMT 3360	Law and the Legal Process
MGMT 3420	Managing Human Capital
MGMT 3510	Managing Global Teams Virtually and Locally
MGMT 3530	Project Management
MGMT 4310	The Management Practices of Great Organizations
MGMT 4410	Human Resources and Workforce Analytics
ENTR 2215	Understanding Family Enterprise
ENTR 2414	Social Responsibility of Business in an Age of Inequality
ENTR 4225	Corporate Entrepreneurship through Global Growth, Acquisitions, and Alliances

CONCENTRATION IN MARKETING

Code	Title	Hours
Required Courses		

MKTG 3401	Marketing Research	4
MKTG 3301	Marketing Management	4

or MKTG 4506	Consumer Behavior
Electives	
Complete two of the following:	
MKTG 2301	Marketing and Society
MKTG 3301	Marketing Management (if not selected as a required course)
MKTG 3501	Marketing Analytics
MKTG 4220	Marketing in Asia
MKTG 4420	Sales Management
MKTG 4502	Marketing in the Service Sector
MKTG 4504	Advertising and Brand Promotion
MKTG 4506	Consumer Behavior (if not selected as a required course)
MKTG 4508	Digital Marketing
MKTG 4510	New Product Development
MKTG 4512	International Marketing

CONCENTRATION IN SUPPLY CHAIN MANAGEMENT

Code	Title	Hours
Required Courses		
SCHM 3301	Global Supply Chain Strategy	4
SCHM 3305	Sourcing and Procurement	4
SCHM 3310	Logistics and Transportation Management	4
Elective		
Complete one of the following:		
SCHM 3308	Supply Chain Analytics	
SCHM 3320	Demand Planning and Forecasting	
SCHM 3330	Sustainability and Supply Chain Management	
SCHM 4401	Advanced Problems in Supply Chain Management

Computer Science and Cognitive Psychology, BS

The computer science and cognitive psychology combined major provides a foundation in general psychology, psychology of language, cognition, and statistics—all supplemented by an experimental laboratory course, seminar course, and psychology electives. Students who choose this program often have a general interest in human psychology or specific interests in artificial intelligence or human-computer interaction.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Computer Science Courses

Code	Title	Hours
Computer Science Overview		
CS 1200	Leadership Skill Development	1

CS 1210	Professional Development for CCIS Co-op	1
---------	---	---

Computer Science Fundamental Courses

A grade of C– or higher is required in computer science fundamental courses.

CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5

Computer Science Required Courses

CS 3000	Algorithms and Data	4
CS 3500	Object-Oriented Design	4
CS 4100	Artificial Intelligence (Integrative course)	4
CS 4500 and CS 4501	Software Development and Recitation for CS 4500 (Integrative course)	4
IS 4300	Human Computer Interaction (Integrative course)	4

Presentation Requirement

THTR 1170	The Eloquent Presenter	1
-----------	------------------------	---

Computer Science Elective Courses

With advisor approval, a directed study, research, project study, or appropriate graduate-level course may also be taken as a computer science elective.

Complete twelve credits of CS, IS or DS classes that are not already required. Choose courses within the following ranges:

CS 2500 or higher, except CS 5010		
IS 2000 or higher, except IS 4900		
DS 2000 or higher, except DS 4900		

Psychology Courses

Code	Title	Hours
------	-------	-------

Required Courses

PSYC 1101	Foundations of Psychology	4
PSYC 2320	Statistics in Psychological Research	4
PSYC 3464	Psychology of Language	4
PSYC 3466	Cognition	4

Advanced Psychology

PSYC 3452 or PSYC 3458	Sensation and Perception Biological Psychology	4
------------------------	---	---

Laboratory in Psychology

Complete one of the following: 4

PSYC 4610	Laboratory in Psycholinguistics	
PSYC 4612	Laboratory in Cognition	
PSYC 4622	Laboratory in Sensation and Perception	

Seminar in Psychology

Complete one of the following: 4

PSYC 4658	Seminar in Psycholinguistics	
PSYC 4660	Seminar in Cognition	
PSYC 4668	Seminar in Sensation and Perception	
PSYC 4674	Seminar in Cognitive Neuroscience	

Psychology Electives

Note: Courses satisfying the categories above cannot be reused.

Complete two of the following: 8

PSYC 3402	Social Psychology	
PSYC 3404	Developmental Psychology	
PSYC 3450	Learning and Motivation	
PSYC 3451	Learning Principles and Behavior Analysis	
PSYC 3452	Sensation and Perception	
PSYC 3458	Biological Psychology	
PSYC 4512	Neuropsychology	
PSYC 4520	Language and the Brain	
PSYC 4524	Cognitive Development	
PSYC 4610	Laboratory in Psycholinguistics	
PSYC 4612	Laboratory in Cognition	
PSYC 4622	Laboratory in Sensation and Perception	
PSYC 4628	Laboratory in Developmental Psychology	
PSYC 4658	Seminar in Psycholinguistics	
PSYC 4660	Seminar in Cognition	
PSYC 4668	Seminar in Sensation and Perception	
PSYC 4674	Seminar in Cognitive Neuroscience	
PSYC 4676	Seminar in Developmental Psychology	
With prior approval, directed study research and Honors Project courses can also be counted:		
PSYC 4970	Junior/Senior Honors Project 1	
PSYC 4971	Junior/Senior Honors Project 2	
PSYC 4991	Directed Study Research

Computer Science and Communication Studies, BS

The computer science and communication studies combined major integrates practical skills and theory. Students will gain both a strong computer science foundation and a deep understanding of the major conceptual frameworks for human communication—plus how to apply this knowledge to solve problems in today’s society.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Computer Science Courses

Code	Title	Hours
Computer Science Overview		
CS 1200	Leadership Skill Development	1
CS 1210	Professional Development for CCIS Co-op	1

Computer Science Fundamental Courses
A grade of C– or higher is required in computer science fundamental courses.

CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5

Computer Science Required Courses		
CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500	Object-Oriented Design	4
CS 4500 and CS 4501	Software Development and Recitation for CS 4500	4
CS 4550	Web Development	4

Presentation Requirement		
THTR 1170	The Eloquent Presenter	1

Computer Science Elective Courses

With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.

Complete 12 credits of CS, IS, or DS classes that are not already required. Choose courses within the following ranges: 12

CS 2500 or higher, except CS 5010

DS 2000 or higher, except DS 4900

IS 2000 or higher, except IS 4900

Communication Studies Courses

Code	Title	Hours
------	-------	-------

Communication Studies Common Requirements

COMM 1101	Introduction to Communication Studies	4
-----------	---------------------------------------	---

COMM 1112	Public Speaking	4
or COMM 2301	Communication Research Methods	

Foundation Course

Complete one of the following: 4

COMM 1210	Persuasion and Rhetoric
-----------	-------------------------

COMM 1225	Communication Theory
-----------	----------------------

COMM 1231	Principles of Organizational Communication
-----------	--

COMM 1255	Communication in a Digital Age
-----------	--------------------------------

Cluster Course

Complete one of the following: 4

COMM 1131	Sex, Relationships, and Communication
-----------	---------------------------------------

COMM 2303	Global and Intercultural Communication
-----------	--

COMM 2304	Communication and Gender
-----------	--------------------------

COMM 2501	Communication Law
-----------	-------------------

COMM 2551	Free Speech in Cyberspace
-----------	---------------------------

Writing-Intensive

Complete two of the following: 8

COMM 3200	Mobile Communication
-----------	----------------------

COMM 3201	Health Communication
-----------	----------------------

COMM 3230	Interpersonal Communication
-----------	-----------------------------

COMM 3304	Communication and Inclusion
-----------	-----------------------------

COMM 3320	Political Communication
-----------	-------------------------

COMM 3330	Argumentation Theory
-----------	----------------------

COMM 3400	Rhetoric of Science
-----------	---------------------

COMM 3414	Great Speakers and Speeches 2, 1930–Present
-----------	---

COMM 3415	Communication Criticism
-----------	-------------------------

COMM 3445	Public Relations Principles
-----------	-----------------------------

COMM 3501	Free Speech: Law and Practice
-----------	-------------------------------

COMM 3530	Communication and Sexualities
-----------	-------------------------------

COMM 3532	Theories of Conflict and Negotiation
-----------	--------------------------------------

COMM 3610	Communication, Politics, and Social Change
-----------	--

COMM 4535	Nonverbal Social Interaction
-----------	------------------------------

COMM 4605	Youth and Communication Technology
-----------	------------------------------------

COMM 4631	Crisis Communication and Image Management
-----------	---

Communication Studies Electives

Complete three courses in the following range: ¹ 12

COMM 1131 to COMM 4996

¹ Special Topics in Communication Studies (COMM 4912), and Junior/Senior Honors Project 1 (COMM 4970) are excluded.

Supporting Courses

Code	Title	Hours
------	-------	-------

Mathematics

MATH 1341	Calculus 1 for Science and Engineering	4
-----------	--	---

Computing and Social Issues

Complete one of the following: 4

ANTH 3418	Wired/Unwired: Cybercultures and Technopolitics
-----------	---

IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights
---------	---

INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks
-----------	---

-----------	-----------------------------

SOCL 1280	The 21st-Century Workplace
-----------	----------------------------

SOCL 3485	Environment, Technology, and Society
-----------	--------------------------------------

SOCL 4528	Computers and Society
-----------	-----------------------

Writing Requirements

Code	Title	Hours
------	-------	-------

College Writing

ENGW 1111	First-Year Writing	4
-----------	--------------------	---

Advanced Writing in the Disciplines

Complete one of the following: 4

ENGW 3302	Advanced Writing in the Technical Professions
-----------	---

ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines
-----------	---

COMM 3409	Advocacy Writing ¹
-----------	-------------------------------

² If Advocacy Writing (COMM 3409) is selected it will also satisfy a communication studies elective requirement. One additional general elective will be then required in its place.

Required General Electives

Code	Title	Hours
------	-------	-------

Complete eight general electives.

32

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Understanding Societies and Institutions
- Employing Ethical Reasoning
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Communication Studies Grade Requirement

No more than two grades below a C in communication studies courses may be used to fulfill degree requirements.

Major GPA Requirement

Minimum 2.000 GPA required in all CS, IS, and COMM courses

Program Requirement

133 total semester hours required

Computer Science and Criminal Justice, BS

For students interested in criminal justice in an increasingly digital world, the computer science and criminal justice combined degree offers a strong programming foundation coupled with academic and experiential knowledge of the criminal justice system. Students will learn the principles, practices, and responsibilities of criminal justice professionals alongside the computer science skills necessary for practical applications in the field.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Experiential Liberal Arts

All undergraduate students in the College of Social Sciences and Humanities are required to complete the Experiential Liberal Arts Requirement (p. 622).

Computer Science and Design, BS

The combined major in computer science and design integrates fundamental design courses with a strong programming foundation. Students will declare a concentration in interaction design, graphic and information design, or experience design. Students in this major often have an interest in human-centered design methods used in developing digital interfaces and applications.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Computer Science Courses

Code	Title	Hours
Computer Science Overview		
CS 1200 or ARTF 1000	Leadership Skill Development Art and Design at Northeastern	1
CS 1210	Professional Development for CCIS Co-op	1

Computer Science Fundamental Courses

A grade of C– or higher is required in computer science fundamental courses.

CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
Computer Science Required Courses		
CS 3000	Algorithms and Data	4
CS 3500	Object-Oriented Design	4
CS 4500 and CS 4501	Software Development and Recitation for CS 4500	4
IS 4300	Human Computer Interaction	4

Presentation Requirement

THTR 1170	The Eloquent Presenter	1
-----------	------------------------	---

Computer Science Elective Courses

With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.

Complete 8 credits of CS, IS, or DS classes that are not already required. Choose courses within the following ranges:

CS 2500 or higher, except CS 5010

IS 2000 or higher, except IS 4900

DS 2000 or higher, except DS 4900

Design Requirements

Code	Title	Hours
Design Courses		
ARTF 1122	2D Fundamentals: Surface and Drawing (with optional ARTF 1123)	4
ARTF 2223	5D Fundamentals: Experience and Drawing (with optional ARTF 2224)	4
ARTG 1250	Design Process Context and Systems	4
ARTG 2260	Programming Basics	4
ARTG 2250	Typography 1 (with optional ARTG 2251)	4
ARTG 3350	Typography 2	4
ARTG 3451	Information Design 1	4
Art + Design History		
Complete one of the following:		4
ARTH 1100	Interactive Media and Society	
ARTH 1111	Global Art and Design History: Renaissance to Modern	
ARTH 2210	Modern Art and Design History	
ARTH 2211	Contemporary Art and Design History	
ARTH 2212	Survey of the Still and Moving Image	
ARTH 2215	History of Graphic Design	
Degree Capstone Project		
Complete one of the following:		8
ARTG 4550 and ARTG 4551	Design Degree Project 1 and Design Degree Project 2	
ARTG 4700 and ARTG 4701	Interaction Team Degree Project 1 and Interaction Team Degree Project 2	

Design Options

Complete one of the following options:

Code	Title	Hours
Interaction Design Option		
ARTG 2400	Interaction Design 1: Responsive (with optional ARTG 2401)	4
ARTG 3700	Interaction Design 2: Mobile	4
Graphic and Information Design Option		
ARTG 2252	Graphic Design 1	4
ARTG 3450	Graphic Design 2	4
Experience Design Option		
ARTG 3462	Experience Design 1	4
ARTG 3463	Experience Design 2	4

Degree-Focused Electives

Code	Title	Hours
Complete two courses from the following lists:		8
<i>Art + Design</i>		
ARTF 1120	Observational Drawing	
ARTF 1121	Conceptual Drawing	
ARTF 1124	3D Fundamentals: Structure and Drawing (with optional ARTF 1125)	

ARTF 2220	4D Fundamentals: Sequence and Drawing (with optional ARTF 2221)
ARTD 2100	Narrative Basics
ARTD 2360	Photo Basics (with optional ARTD 2361)
ARTD 2370	Animation Basics (with optional ARTD 2371)
ARTD 2380	Video Basics (with optional ARTD 2381)
ARTG 2252	Graphic Design 1
ARTG 2300	Business Literacy for Design and Media
ARTG 2400	Interaction Design 1: Responsive (with optional ARTG 2401)
ARTG 3450	Graphic Design 2
ARTG 3250	Physical Computing
ARTG 3351	Time-Based Design
ARTG 3450	Graphic Design 2
ARTG 3460	Identity and Brand Design
ARTG 3462	Experience Design 1
ARTG 3463	Experience Design 2
ARTG 3700	Interaction Design 2: Mobile
ARTG 4552	Information Design 2
ARTG 4553	Environmental Information Design
ARTG 4554	Typography 3
ARTE 4901	Special Topics in Art and Design Studio

<i>Psychology</i>	
PSYC 1101	Foundations of Psychology
PSYC 3452	Sensation and Perception
PSYC 3464	Psychology of Language
PSYC 3466	Cognition

<i>Computer Science</i>	
CS 3200	Database Design
CS 3520	Programming in C++
CS 3540	Game Programming
CS 3650	Computer Systems
CS 3700	Networks and Distributed Systems
CS 3800	Theory of Computation
CS 4100	Artificial Intelligence
CS 4150	Game Artificial Intelligence
CS 4300	Computer Graphics
CS 4400	Programming Languages
CS 4520	Mobile Application Development
CS 4550	Web Development
CS 4850	Building Game Engines
IS 2000	Principles of Information Science
DS 4100	Data Collection, Integration, and Analysis
DS 4200	Information Presentation and Visualization
DS 4300	Large-Scale Information Storage and Retrieval
DS 4400	Machine Learning and Data Mining 1
DS 4420	Machine Learning and Data Mining 2
CS 4991	Research

CS 4992	Directed Study
CS 4993	Independent Study

Integrative Requirement

Code	Title	Hours
The following courses are used in the major but also count as the integrative requirement:		
IS 4300	Human Computer Interaction	
ARTG 2260	Programming Basics	

Supporting Course

Code	Title	Hours
Computing and Social Issues		
Complete one of the following:		4
ANTH 3418	Wired/Unwired: Cybercultures and Technopolitics	
IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
PHIL 1145	Technology and Human Values	
SOCL 1280	The 21st-Century Workplace	
SOCL 3485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	

Computer Science Writing Requirement

Code	Title	Hours
College Writing		
ENGW 1111	First-Year Writing	4
Advanced Writing in the Disciplines		
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

Required General Electives

Code	Title	Hours
Complete six general electives.		24

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Exploring Creative Expression and Innovation
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Major GPA Requirement

Minimum 2.000 GPA required in all CS and IS courses

Program Requirement

131 total semester hours required

Computer Science and Economics, BS

The combined major in computer science and economics integrates fundamental economics courses with a strong programming foundation. Studying both the behavior of individuals and the collective behavior of industries and governments, students will utilize computing skills to address complex issues within the field.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Experiential Liberal Arts

All undergraduate students in the College of Social Sciences and Humanities are required to complete the Experiential Liberal Arts Requirement (p. 622).

Computer Science Courses

Code	Title	Hours
Computer Science Overview		
CS 1200 or ECON 1000	Leadership Skill Development Economics at Northeastern	1
CS 1210	Professional Development for CCIS Co-op	1
Computer Science Fundamental Courses		
A grade of C– or higher is required in computer science fundamental courses.		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5

CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
CS 2800 and CS 2801	Logic and Computation and Lab for CS 2800	5

Computer Science Required Courses

CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500	Object-Oriented Design	4
IS 2000	Principles of Information Science	4

Presentation Requirement

THTR 1170	The Eloquent Presenter	1
-----------	------------------------	---

Computer Science Elective Courses

With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.

Complete 12 credits of CS, IS, or DS classes that are not already required. Choose courses within the following ranges:

CS 2500 or higher, except CS 5010

IS 2000 or higher, except IS 4900

DS 2000 or higher, except DS 4900

Economics Requirements

Code	Title	Hours
------	-------	-------

Required Economics Courses

ECON 1115	Principles of Macroeconomics	4
ECON 1116	Principles of Microeconomics	4
ECON 2315	Macroeconomic Theory	4
ECON 2316	Microeconomic Theory	4
ECON 2350	Statistics	4
ECON 2560	Applied Econometrics	4

Economics Electives

Complete four economics electives with no more than two below 3000:

ECON 1230 Healthcare and Medical Economics

ECON 1240 Economics of Crime

ECON 1290 History of the Global Economy

ECON 3420 Urban Economic Issues

ECON 3423 Environmental Economics

ECON 3424 Law and Economics

ECON 3425 Energy Economics

ECON 3440 Public Finance

ECON 4635 International Economics

ECON 4681 Information Economics and Game Theory

Economics Capstone

ECON 4692	Senior Economics Seminar	4

Computer Science and English, BS

The computer science and English combined major focuses on the increasingly interdisciplinary processes of creating, interpreting, and analyzing texts and programs. Students will combine communication

and critical judgment, gaining the creativity and adaptability necessary to utilize technology in literary studies, and apply humanities skills to solve programming problems.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Experiential Liberal Arts

All undergraduate students in the College of Social Sciences and Humanities are required to complete the Experiential Liberal Arts Requirement (p. 622).

Computer Science Courses

Code	Title	Hours
Computer Science Overview		

CS 1200	Leadership Skill Development	1
CS 1210	Professional Development for CCIS Co-op	1

Computer Science Fundamental Courses

A grade of C– or higher is required in computer science fundamental courses.

CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5

Computer Science Required Courses

CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500	Object-Oriented Design	4

Computing Focus

Students are required to complete one of the following foci (two courses total):

Focus 1: Natural Language Processing

CS 3800	Theory of Computation
CS 4120	Natural Language Processing

Focus 2: Programming Languages

CS 3800	Theory of Computation
CS 4400	Programming Languages

Focus 3: Analytics

DS 4100	Data Collection, Integration, and Analysis
DS 4200	Information Presentation and Visualization

Presentation Requirement

THTR 1170	The Eloquent Presenter	1
-----------	------------------------	---

Computer Science/Information Science Elective Course

IS 2000	Principles of Information Science	4
or CS 4500	Software Development	

Computer Science Elective Courses

With advisor approval, a directed study, project study, or appropriate graduate-level course may also be taken as an upper-division elective.

Complete 4 credits of CS, IS, or DS classes that are not already required. Choose courses within the following ranges:

CS 2500 or higher, except CS 5010

IS 2000 or higher, except IS 4900

DS 2000 or higher, except DS 4900

English Requirements

Code	Title	Hours
------	-------	-------

English Course-Level Requirement

In addition to the capstone, two of the courses chosen from the lists below must be numbered 3000–4999.

Introduction to College

ENGL 1000	English at Northeastern	1
-----------	-------------------------	---

Foundational Courses

ENGL 1400	Introduction to Literary Studies	4
ENGL 1160	Introduction to Rhetoric	4
or ENGL 1410	Introduction to Writing Studies	

Diversity

Complete one of the following courses. This course may also be used to fulfill an additional English requirement below:

ENGL 2150	Literature and Digital Diversity
ENGL 2296	Early African-American Literature
ENGL 2450	Postcolonial Literature
ENGL 2451	Postcolonial Women Writers
ENGL 2455	American Women Writers
ENGL 2460	Multiethnic Literatures of the U.S.
ENGL 2470	Asian-American Literature
ENGL 2760	Writing in Global Contexts
ENGL 3663	The African-American Novel
ENGL 3676	Representing Gender and Sexuality in Literature
ENGL 3678	Bedrooms and Battlefields: Hebrew Bible and the Origins of Sex, Gender, and Ethnicity
ENGL/JWSS 3685	Modern and Contemporary Jewish Literature

Pre-Nineteenth-Century Literature

Complete one of the following:

ENGL 1600	Introduction to Shakespeare
ENGL 1700	Global Literature to 1500
ENGL 2240	17th-Century British Literature
ENGL 2296	Early African-American Literature
ENGL 3618	Milton
ENGL/JWSS 3678	Bedrooms and Battlefields: Hebrew Bible and the Origins of Sex, Gender, and Ethnicity
ENGL 4000	Topics in Early Literatures
ENGL 4010	Topics in Shakespeare

ENGL 4020	Topics in 17th- and 18th-Century Literatures
Nineteenth-, Twentieth-, and Twenty-First-Century Literature	
Complete one of the following:	
ENGL 2260	Romantic Poetry
ENGL 2330	The American Renaissance
ENGL 2340	American Realism
ENGL 3619	Emerson and Thoreau
ENGL 3720	19th-Century Major Figure
ENGL 4040	Topics in 19th-Century Literatures
ENGL 2301	The Graphic Novel
ENGL 2410	Contemporary American Literature
ENGL 2440	The Modern Bestseller
ENGL 2600	Irish Literary Culture (Abroad)
ENGL 2610	Contemporary Israeli Literature and Art (Abroad)
ENGL/JWSS 3685	Modern and Contemporary Jewish Literature
ENGL 3730	20th- and 21st-Century Major Figure
Theories and Methods	
Complete one of the following:	
ENGL 1140	Grammar: The Architecture of English
ENGL 1160	Introduction to Rhetoric
ENGL 1410	Introduction to Writing Studies
ENGL 2150	Literature and Digital Diversity
ENGL 3325	Rhetoric of Law
ENGL 3340	Technologies of Text
ENGL 3370	Writing Cultures
ENGL 3381	The Practice and Theory of Teaching Writing
ENGL 3700	Narrative Medicine
ENGL 4100	Topics in Literary Criticism
ENGL 4400	Opening the Archive
ENGL 4410	Research in Rhetoric and Writing
LING 1150	Introduction to Language and Linguistics
LING 2350	Linguistic Analysis
LING 3450	Syntax
LING 3452	Semantics
LING 3454	History of English
LING 3456	Language and Gender
LING 3458	Topics in Linguistics
Comparative Literature	
Complete one of the following:	
ENGL 1120	Trouble in Utopia
ENGL 1130	Animals, Objects, Humans
ENGL 1450	Reading and Writing in the Digital Age
ENGL 1500	British Literature to 1800
ENGL 1502	American Literature to 1865
ENGL 1503	American Literature 1865 to Present
ENGL 2150	Literature and Digital Diversity
ENGL 2370	The Modern Short Story
ENGL 2380	The Modern Novel
ENGL 2400	Modern Poetry

ENGL 3375	Writing Boston
ENGL 3376	Creative Nonfiction
ENGL 3377	Poetry Workshop
ENGL 3378	Fiction Workshop
ENGL 3380	Topics in Writing
ENGL 3382	Publishing in the 21st Century
ENGL 3384	The Writer's Marketplace

Capstone

ENGL 4710	Capstone Seminar	4
or ENGL 4720	Capstone Project	

English Electives

Complete two additional ENGL electives.	8
---	---

Integrative Course Requirement

This course will not be allowed to double-count in the Theories and Methods section above.

Code	Title	Hours
ENGL 3340	Technologies of Text	4

Supporting Course

Code	Title	Hours
Complete one of the following:		4
SOCL 4528	Computers and Society	
SOCL 3485	Environment, Technology, and Society	

SOCL 1280	The 21st-Century Workplace
ANTH 3418	Wired/Unwired: Cybercultures and Technopolitics
PHIL 1145	Technology and Human Values
IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks

Computer Science Writing Requirement

Code	Title	Hours
College Writing		
ENGW 1111	First-Year Writing	4
or ENGW 1102	First-Year Writing for Multilingual Writers	

Advanced Writing in the Disciplines

Complete one course from the following:

ENGW 3302	Advanced Writing in the Technical Professions
ENGW 3309	Advanced Writing in the Humanities
ENGW 3310	Advanced Writing in Literature
ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines

Required General Electives

Code	Title	Hours
Complete eight general electives.		32

Major GPA Requirement

Minimum 2.000 GPA required in all CS and IS courses

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Exploring Creative Expression and Innovation
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Program Requirement

Computer Science and Environmental Science, BS

The computer science and environmental science combined major focuses on geological processes that greatly impact the earth, atmosphere, and water in oceans, lakes, and rivers. Understanding these processes requires acquisition and computational analysis of large amounts of data—underscoring the natural relationship between computer science and environmental science.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Computer Science Courses

Code	Title	Hours
Computer Science Overview		
CS 1200	Leadership Skill Development	1
CS 1210	Professional Development for CCIS Co-op	1

Computer Science Fundamental Courses

A grade of C– or higher is required in computer science fundamental courses:

CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5

Computer Science Required Courses

CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500	Object-Oriented Design	4
CS 3800	Theory of Computation	4
CS 4500 and CS 4501	Software Development and Recitation for CS 4500	4

Presentation Requirement

THTR 1170	The Eloquent Presenter	1
-----------	------------------------	---

Computer Science Elective Courses

With advisor approval, a directed study, research, project study, or appropriate graduate-level course may also be taken as a computer science elective.

Complete 4 credits of CS, IS, or DS classes that are not already required. Choose courses within the following ranges:

CS 2500 or higher, except CS 5010

IS 2000 or higher, except IS 4900

DS 2000 or higher, except DS 4900

Environmental Science Courses

Code	Title	Hours
Environmental Science Required Courses		
ENVR 1200 and ENVR 1201	Dynamic Earth and Lab for ENVR 1200	5
ENVR 5210 or ENVR 5250	Environmental Planning Geology and Land-Use Planning	4
ENVR 4900 or ENVR 4997	Earth and Environmental Science Capstone Senior Thesis	1
Complete one of the following sequences:		5
ENVR 1202 and ENVR 1203	History of Earth and Life and Interpreting Earth History	
ENVR 2310 and ENVR 2311	Earth Materials and Lab for ENVR 2310	
Environmental Science Integrative Courses		
Complete at least two of the following:		8-10
ENVR 3300 and ENVR 3301	Geographic Information Systems and Lab for ENVR 3300	
ENVR 3418	Geophysics	
ENVR 4500 and ENVR 4501	Applied Hydrogeology and Lab for ENVR 4500	
Environmental Science Electives		
If you complete more than two environmental science integrative courses (above), they will count as environmental science electives.		
Complete four of the following:		16-20
ENVR 1101	Environmental Science	
ENVR 2340 and ENVR 2341	Earth Landforms and Processes and Lab for ENVR 2340	
ENVR 4504	Environmental Pollution	
ENVR 4563	Advanced Spatial Analysis	
ENVR 5190	Soil Science	
ENVR 5201	Geologic Field Seminar	
ENVR 5230 and ENVR 5231	Structural Geology and Lab for ENVR 5230	
ENVR 5240 and ENVR 5241	Sedimentary Basin Analysis and Lab for ENVR 5240	
ENVR 5242 and ENVR 5243	Ancient Marine Life and Lab for ENVR 5242	
ENVR 5270 and ENVR 5271	Glacial and Quaternary History and Lab for ENVR 5270	

Supporting Courses

Code	Title	Hours
Calculus		
MATH 1251 or MATH 1341	Calculus and Differential Equations for Biology 1 Calculus 1 for Science and Engineering	4
MATH 1252 or MATH 1342	Calculus and Differential Equations for Biology 2 Calculus 2 for Science and Engineering	4
MATH 3081	Probability and Statistics	4

Chemistry

CHEM 1211 and CHEM 1212 and CHEM 1213	General Chemistry 1 and Lab for CHEM 1211 and Recitation for CHEM 1211	5
CHEM 1214 and CHEM 1215 and CHEM 1216	General Chemistry 2 and Lab for CHEM 1214 and Recitation for CHEM 1214	5
Computing and Social Issues		
Complete one of the following:		4
ANTH 3418	Wired/Unwired: Cybercultures and Technopolitics	
IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
PHIL 1145	Technology and Human Values	
SOCL 1280	The 21st-Century Workplace	
SOCL 3485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	

Computer Science English Requirement

Code	Title	Hours
College Writing		
ENGW 1111 or ENGW 1102	First-Year Writing First-Year Writing for Multilingual Writers	4
Advanced Writing in the Disciplines		
Complete one course from the following:		4
ENGW 3302	Advanced Writing in the Technical Professions	
ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

Required General Electives

Code	Title	Hours
Complete six general electives.		24

Major GPA Requirement

Minimum 2.000 GPA required in all CS and IS courses

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Computer Science and Game Development, BS

The computer science and game development combined major focuses on the specific skills needed to succeed in the highly competitive game industry. Students will engage in building and developing games and playable media experiences while completing courses in computer science and specialized game technology and design. Interdisciplinary courses enable students to develop their creative and entrepreneurial abilities, as well as create a strong portfolio of game pieces.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Computer Science Courses

Code	Title	Hours
Computer Science Overview		
CS 1200	Leadership Skill Development	1

Computer Science and History, BS

The computer science and history combined major offers students the opportunity to gain both historical knowledge and a broad range of related analytical skills in both the humanities and computer science. You'll define a history course cluster according to a thematic principle, with a focus on quantitative analysis in the field, complementing your foundation in programming.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Experiential Liberal Arts

All undergraduate students in the College of Social Sciences and Humanities are required to complete the Experiential Liberal Arts Requirement (p. 622).

HIST 1252	Japanese Literature and Culture	
HIST 1270	Ancient Greece	
HIST 1271	Ancient Rome	
HIST 1285	Introduction to Russian Civilization	
HIST 1389	History of Espionage 1: Antiquity to World War II	
HIST 2330	Colonial and Revolutionary America	
Complete three intermediate/advanced-level courses:		12
Select from any HIST course numbered 2303 or above.		
Complete one advanced-level course:		4
Select from any HIST course numbered 3000 or above.		
History Capstone Seminar or Senior Project		
Complete one capstone experience from the following:		4
HIST 4701	Capstone Seminar	
Public history concentrators may also select from the following:		
HIST 4903	Fieldwork in History 1	

Cluster Requirement

Note: Four of the six courses chosen as history electives must create a history cluster of related courses. The history cluster is subject to department approval.

Integrative Course Requirement

Code	Title	Hours
HIST 2211	The World Since 1945	4

Supporting Courses

Code	Title	Hours
Research Methods		
Complete one course from the following:		4
ECON 2350	Statistics	
POLS 2400	Quantitative Techniques	
PSYC 2320	Statistics in Psychological Research	
SOCL 2320	Statistical Analysis in Sociology	
ENVR 3300	Geographic Information Systems	
ENVR 5260	Geographical Information Systems	
Computing and Social Issues		
Complete one of the following:		4
ANTH 3418	Wired/Unwired: Cybercultures and Technopolitics	
IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	

INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks
PHIL 1145	Technology and Human Values
SOCL 1280	The 21st-Century Workplace
SOCL 3485	Environment, Technology, and Society
SOCL 4528	Computers and Society

Computer Science Writing Requirement

Code	Title	Hours
College Writing		
ENGW 1111	First-Year Writing	4
or ENGW 1102	First-Year Writing for Multilingual Writers	

Advanced Writing in the Disciplines

This requirement is satisfied by HIST 2302 taken in conjunction with HIST 2301.

Required General Electives

Code	Title	Hours
Complete eight general electives.		32

Major GPA Requirement

Minimum 2.000 GPA required in all CS and IS courses

Computer Science and History GPA/Credit Requirement

Complete 98 semester hours in the major with a minimum 2.000 GPA

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Writing in the First Year
- Writing-Intensive in the Major
- Advanced Writing in the Disciplines
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Program Requirement

135 total semester hours required

Plan of Study

Sample Patterns:

Four Years, Two Co-ops in Summer 2/Fall

Year 1							
Fall	Hours	Spring	Hours	Summer 1	Hours	Summer 2	Hours

Computer Science and Journalism, BS

The computer science and journalism combined major supports students who understand that journalism now takes place in both print and the digital world. Students will learn the principles, practices, and responsibilities of the journalism profession while gaining a deep

understanding of the systems and technologies that support digital media.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Computer Science Courses

Code	Title	Hours
------	-------	-------

Computer Science Overview

CS 1200	Leadership Skill Development	1
CS 1210	Professional Development for CCIS Co-op	1

Computer Science Fundamental Courses

A grade of C– or higher is required in computer science fundamental courses:

CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5

Computer Science Required Courses

CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500	Object-Oriented Design	4
CS 4500 and CS 4501	Software Development and Recitation for CS 4500	4

Presentation Requirement

THTR 1170	The Eloquent Presenter	1
-----------	------------------------	---

Computer Science Elective Courses

With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.

Complete 16 credits of CS, IS, or DS classes that are not already required. Choose courses within the following ranges:	16
---	----

CS 2500 or higher, except CS 5010

IS 2000 or higher, except IS 4900

DS 2000 or higher, except DS 4900

At least one of these must be from the following list:

IS 4200 Information Retrieval

IS 4300 Human Computer Interaction

Journalism Major Requirements

Students transferring from outside institutions must complete a minimum of five 4-credit journalism courses at Northeastern, and these must include:

Code	Title	Hours
JRNL 2201	Journalism 2: Intermediate Reporting	
JRNL 2301	Visual Storytelling in Journalism	
JRNL 4650	Ethics and Issues in Journalism	

Code	Title	Hours
Journalism Courses		
A grade of C or higher is required:		
JRNL 1101 and JRNL 1102	Journalism 1: Fundamentals of Reporting and Journalist's Toolbox	5
JRNL 2201	Journalism 2: Intermediate Reporting	4
JRNL 2301	Visual Storytelling in Journalism	4
JRNL 3610	Digital Storytelling and Social Media	4

Required Journalism		
JRNL 1150	Understanding Today's News	4
JRNL 2350	The History of Journalism: How the News Became the News	4
JRNL 3550	The First Amendment and the Media	4
JRNL 4650	Ethics and Issues in Journalism	4

Journalism Electives		
Complete two JRNL courses.		8

Journalism-Related Requirement		
HIST 1130	Introduction to the History of the United States	4

Supporting Courses

Code	Title	Hours
Mathematics Requirement		
MATH 1341	Calculus 1 for Science and Engineering	4

Computing and Social Issues		
Complete one of the following:		4
ANTH 3418	Wired/Unwired: Cybercultures and Technopolitics	
IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
PHIL 1145	Technology and Human Values	
SOCL 1280	The 21st-Century Workplace	
SOCL 4528	Computers and Society	
SOCL 3485	Environment, Technology, and Society	

Writing Requirement

Code	Title	Hours
College Writing		
ENGW 1111	First-Year Writing	4
Advanced Writing in the Disciplines		
JRNL 2301	Visual Storytelling in Journalism	4

Required General Electives

Code	Title	Hours
Complete seven general electives.		28

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Exploring Creative Expression and Innovation
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Understanding Societies and Institutions
- Interpreting Culture
- Engaging Difference and Diversity
- Employing Ethical Reasoning
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Major GPA Requirement

Minimum 2.000 GPA required in all CS, IS, and JRNL courses

Program Requirement

134 total semester hours required

Computer Science and Linguistics, BS

The computer science and linguistics combined major provides students with extensive background in the formal structures of natural (human) languages, as well as methods and applications of linguistic and psycholinguistic analyses of human language data. This is combined with an emphasis in computer science on artificial intelligence and natural language processing techniques. The major provides excellent preparation for work or more advanced degrees focusing on computational linguistics, natural language processing, speech perception, spoken language interfaces, artificial intelligence, and a wide array of related fields.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Computer Science Courses

Computer Science and Mathematics, BS

The computer science and mathematics combined major was the first dual major created by the college. The mathematics requirements focus on courses that have computing applications or form the basis for further studies in mathematical theory. The program emphasizes the strong ties between computer science and mathematics that date back to the origins of machine computation in the 1930s and 1940s—and persist to this day.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Computer Science Courses

Code	Title	Hours

Mathematics Electives	
Complete three courses in the following range:	12
MATH 3001 to MATH 4999 but not MATH 4000	

Supporting Course

Code	Title	Hours
Complete one of the following:		
ANTH 3418	Wired/Unwired: Cybercultures and Technopolitics	
IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
PHIL 1145	Technology and Human Values	
SOCL 1280	The 21st-Century Workplace	
SOCL 3485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	

Computer Science Writing Requirement

Code	Title	Hours
College Writing		
ENGW 1111	First-Year Writing	4
Advanced Writing in the Disciplines		
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

Required General Electives

Code	Title	Hours
Complete seven general electives.		
		28

Major GPA Requirement

Minimum 2.000 GPA required in all CS and IS courses

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Program Requirement

133 total semester hours required

Plan of Study

Sample Patterns:

Computer Science and Media Arts, BS

The computer science and media arts combined major is ideal for creative students who love technology. Students will acquire a solid foundation in both fields through curriculum that spans photography, animation, video, database design, computer graphics, and human-computer interaction.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Computer Science Courses

Code	Title	Hours
Computer Science Overview		
CS 1200	Leadership Skill Development	1
CS 1210	Professional Development for CCIS Co-op	1
Computer Science Fundamental Courses		
A grade of C– or higher is required in computer science fundamental courses:		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
Computer Science Required Courses		
CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500	Object-Oriented Design	4
CS 4300	Computer Graphics	4
CS 4500 and CS 4501	Software Development and Recitation for CS 4500	4
IS 4300	Human Computer Interaction	4
Presentation Requirement		
THTR 1170	The Eloquent Presenter	1

Computer Science Elective Courses

With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.

Complete 8 credits of CS, IS, or DS classes that are not already required. Choose courses within the following ranges:	8
CS 2500 or higher, except CS 5010	
IS 2000 or higher, except IS 4900	
DS 2000 or higher, except DS 4900	

Computer Science Writing Requirement

Code	Title	Hours
College Writing		
ENGW 1111	First-Year Writing	4
Advanced Writing in the Disciplines		
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

Media Arts Courses

Code	Title	Hours
Required Media Arts Courses		
ARTF 1120	Observational Drawing	4
ARTF 1122	2D Fundamentals: Surface and Drawing (with optional ARTF 1123)	4
ARTF 1124	3D Fundamentals: Structure and Drawing (with optional ARTF 1125)	4
ARTD 2100	Narrative Basics	4
ARTF 2220	4D Fundamentals: Sequence and Drawing (with optional ARTF 2221)	4

Media Arts Electives

Complete six of the following:	24
ARTF 2223	5D Fundamentals: Experience and Drawing (with optional ARTF 2224)

Basics

ARTD 2360	Photo Basics (with optional ARTD 2361)
ARTD 2370	Animation Basics (with optional ARTD 2371)
ARTD 2380	Video Basics (with optional ARTD 2381)

Photography

ARTD 3460	Photography 1
ARTD 4565	Photography 2
ARTD 4660	Studio Photography
ARTD 4661	Alternative Photographic Processes

Animation

ARTD 3470	Animation 1
ARTD 3471	Virtual Environment Design
ARTD 3472	Character Design for Animation
ARTD 3473	Animation for Games
ARTD 4570	Animation 2
ARTD 4575	Animation 3
ARTD 4577	Digital Sculpture and Model Making

Video

ARTD 3480	Video: Sound and Image
ARTD 5582	Collaborative Video and Community Engagement

History

ARTH 2212	Survey of the Still and Moving Image
-----------	--------------------------------------

Media Arts Capstone Requirement

ARTD 4530	Media Arts Degree Project 1	4
ARTD 4670	Media Arts Degree Project 2	4

Supporting Courses

Code	Title	Hours
Mathematics Requirement		
MATH 2331	Linear Algebra	4
Computing and Social Issues		
Complete one of the following:		4
ANTH 3418	Wired/Unwired: Cybercultures and Technopolitics

Computer Science and Music with Concentration in Music Technology, BS

The computer science and music combined major with concentration in music technology focuses on the creative application of digital sound technologies to a broad range of artistic, social, and industrial purposes. An emphasis is maintained throughout on imaginative exploration, collaboration across disciplines, and real-world experience. It is designed to give students a firm foundation in music and computing for digital audio technologies. This program is recommended for students with a strong background in music prior to entering Northeastern.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Computer Science and Philosophy, BS

The computer science and philosophy combined major offers an opportunity to obtain a fluency in formal logic, including logical proofs and the ability to represent arguments clearly and evaluate them for cogency. Students will find that logic plays a fundamental role in computer science as they experience an in-depth programming foundation. The philosophy curriculum also focuses on oral and written communication, as well as ethical and social issues related to computing and information technologies.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Experiential Liberal Arts

All undergraduate students in the College of Social Sciences and Humanities are required to complete the Experiential Liberal Arts Requirement (p. 622).

CS 3500	Object-Oriented Design	4
CS 3800	Theory of Computation	4

CS 4500 and CS 4501	Software Development and Recitation for CS 4500	4
Presentation Requirement		
THTR 1170	The Eloquent Presenter	1
Computer Science Elective Courses		
With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken for upper-division electives.		
Complete 8 credits of upper-division CS, IS, or DS classes that are not already required. Choose courses within the following ranges:		8
CS 2500 or higher, except CS 5010		
IS 2000 or higher, except IS 4900		
DS 2000 or higher, except DS 4900		

Philosophy Courses

Code	Title	Hours
Philosophy Required Courses		
PHIL 1115	Introduction to Logic	4
PHIL 2325	Ancient Philosophy and Political Thought	4
or POLS 2325 or PHIL 2330	Ancient Philosophy and Political Thought Modern Philosophy	
PHIL 1145	Technology and Human Values	4
PHIL 4515	Advanced Logic	4
Philosophy Restricted Electives		
Take two courses, at least one of which is at the 4000 or 5000 level, from the following:		8
PHIL 3343	Existentialism	
PHIL 3435	Moral Philosophy	
PHIL 3460	Philosophy and Literature	
PHIL 4390	Cults and Sects	
PHIL 4500	Theory of Knowledge	
PHIL 4510	Philosophy of Science	
PHIL 4535	Philosophy of Mind	
PHIL 4547	Seminar: Apocalypticism	
PHIL 4606	Seminar: Theories and Methods in Religious Studies	
PHIL 4903	Seminar in Religion	
PHIL 4906	Topics in Religious Studies	
PHIL 5001	Global Justice	
PHIL 5011	Comparative Religious Ethics	

Electives	
Take three PHIL courses.	12

Integrative Course Requirement

Code	Title	Hours
These courses will double count in other areas of your major:		
CS 3800	Theory of Computation	
PHIL 4515	Advanced Logic	

Computer Science English Requirement

Code	Title	Hours
College Writing		
ENGW 1111 or ENGW 1102	First-Year Writing First-Year Writing for Multilingual Writers	4

Advanced Writing in the Disciplines

Complete one course from the following:		4
ENGW 3302	Advanced Writing in the Technical Professions	
ENGW 3309	Advanced Writing in the Humanities	
ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

Required General Electives

Code	Title	Hours
Complete 11 general electives.		44

Major GPA Requirement

Minimum 2.000 GPA required in all CS and IS courses

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Writing-Intensive in the Major
- Interpreting Culture
- Understanding Societies and Institutions
- Employing Ethical Reasoning
- Writing in the First Year
- Advanced Writing in the Disciplines
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Program Requirement

133 total semester hours required

Computer Science and Physics, BS

The computer science and physics combined major brings together three disciplines: computer science, physics, and mathematics. The mathematics requirements serve as a foundation for both computer science and physics. From hands-on experience with sophisticated physics instruments, to mathematical theory, to the latest computational innovations, our interdisciplinary approach will prepare students for the myriad challenges in today's rapidly changing world.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Computer Science Courses

Code	Title	Hours
Computer Science Overview		
CS 1200	Leadership Skill Development	1
CS 1210	Professional Development for CCIS Co-op	1
Computer Science Fundamental Courses		

A grade of C– or higher is required in computer science fundamental courses.

CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
CS 2800 and CS 2801	Logic and Computation and Lab for CS 2800	5

Computer Science Required Courses

CS 3000	Algorithms and Data	4
CS 3500	Object-Oriented Design	4
CS 3800	Theory of Computation	4
CS 4500 and CS 4501	Software Development and Recitation for CS 4500	4

Computer Science Senior Seminar

THTR 1170	The Eloquent Presenter	1
-----------	------------------------	---

Physics Courses

Code	Title	Hours
Required Courses		

PHYS 1161 and PHYS 1162	Physics 1 and Lab for PHYS 1161	5
PHYS 1165 and PHYS 1166	Physics 2 and Lab for PHYS 1165	5

Intermediate Physics

PHYS 2303	Modern Physics	4
PHYS 2305	Thermodynamics and Statistical Mechanics	4
PHYS 2371 and PHYS 2372	Electronics and Lab for PHYS 2371 (Integrative course)	4

Advanced Physics

PHYS 3600	Advanced Physics Laboratory	4
PHYS 3602	Electricity and Magnetism	4

Capstone and Electives

Code	Title	Hours
Capstone		

Complete either one computer science capstone or the physics capstone: 4

Computer Science Capstone

CS 4100	Artificial Intelligence	
CS 4300	Computer Graphics	
CS 4410	Compilers	
CS 4150	Game Artificial Intelligence	
CS 4550	Web Development	

Physics Capstone

PHYS 5318	Principles of Experimental Physics	
-----------	------------------------------------	--

Computer Science Elective

The computer science elective is not required if the student has completed the computer science capstone (above). With advisor approval, a directed study, research, project study, or appropriate graduate-level course may also be taken as a computer science elective.

Complete 4 credits of CS, IS, or DS classes that are not already required. Choose courses within the following ranges: 4

CS 2500 or higher, except CS 5010

IS 2000 or higher, except IS 4900

DS 2000 or higher, except DS 4900

Physics Elective

Only one physics elective is required if the student has completed the physics capstone (above).

Complete two courses in the following range: 8

PHYS 3000 to PHYS 5999

Integrative Courses

Code	Title	Hours
Calculus		

MATH 1341	Calculus 1 for Science and Engineering (a grade of C– or higher is required)	4
MATH 1342	Calculus 2 for Science and Engineering (a grade of C– or higher is required)	4
MATH 2321	Calculus 3 for Science and Engineering	4

Additional Mathematics Requirements

MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 4525	Applied Analysis	4

Supporting Course

Code	Title	Hours
Complete one of the following: 4		

ANTH 3418	Wired/Unwired: Cybercultures and Technopolitics	
IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
INSH 2102	Bostonography: The City through Data, Texts, Maps, and Networks	
PHIL 1145	Technology and Human Values	
SOCL 1280	The 21st-Century Workplace	
SOCL 3485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	

Computer Science Writing Requirement

Code	Title	Hours
College Writing		

ENGW 1111	First-Year Writing	4
-----------	--------------------	---

Advanced Writing in the Disciplines

ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

Required General Electives

Code	Title	Hours
Complete six general electives.		24

Major GPA Requirement

Minimum 2.000 GPA required in all CS and IS courses

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Exploring Creative Expression and Innovation
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data

- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Computer Science and Political Science, BS

The computer science and political science combined major offers both a strong computer science foundation and a deep understanding of global and societal needs. You will become an engaged citizen of the world, participating in interdisciplinary scholarship and translational research to address regional and global issues.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Experiential Liberal Arts

All undergraduate students in the College of Social Sciences and Humanities are required to complete the Experiential Liberal Arts Requirement (p. 622).

Computer Science Courses

Code	Title	Hours
Computer Science Overview		
CS 1200	Leadership Skill Development	1
CS 1210	Professional Development for CCIS Co-op	1
Computer Science Fundamental Courses

Computer Science and Sociology, BS

The social aspects to computing continue to grow, primarily with respect to communication and the internet. The computer science and sociology combined major examines this significant impact on society and how people communicate and share culture. Students will have an opportunity to gain a solid programming foundation, as well as the practical and

theoretical skills needed to address the complex social and cultural issues in a period of far-reaching social change.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Computer Science Courses

Code	Title	Hours
------	-------	-------

Computer Science Overview

CS 1200	Leadership Skill Development	1
CS 1210	Professional Development for CCIS Co-op	1

Computer Science Fundamental Courses

A grade of C– or higher is required in computer science fundamental courses:

CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5

Computer Science Required Courses

CS 3000	Algorithms and Data	4
CS 3200	Database Design	4
CS 3500	Object-Oriented Design	4
IS 2000	Principles of Information Science	4

Computer Science Writing-Intensive Requirement

Complete one of the following: 4

CS 4500	Software Development	
IS 3500	Information System Design and Development	
DS 4200	Information Presentation and Visualization (Take DS 4100 either as a prerequisite of or concurrently with DS 4200.)	

Presentation Requirement

THTR 1170	The Eloquent Presenter	1
-----------	------------------------	---

Computer Science Elective Courses

With advisor approval, directed study, research, project study, and appropriate graduate-level courses may also be taken as upper-division electives.

Complete 12 credits of upper-division CS, IS, or DS classes that are not already required. Choose courses within the following ranges: 12

CS 2500 or higher, except CS 5010

IS 2000 or higher, except IS 4900

DS 2000 or higher, except DS 4900

Sociology Courses

Code	Title	Hours
------	-------	-------

Sociology Required Courses

SOCL 1101	Introduction to Sociology	4
SOCL 2300	Social Theory	4
SOCL 2320	Statistical Analysis in Sociology	4
SOCL 2321	Research Methods in Sociology	4
ANTH 1101	Peoples and Cultures	4
ANTH 2305	Global Markets and Local Culture	4

Sociology Electives

Complete one sociology elective in each of the following ranges: 12

Introductory elective: SOCL 1000 to SOCL 1999

Intermediate elective: SOCL 2000 to SOCL 3999

Advanced elective: SOCL 4000 to SOCL 4999

Sociology Required Capstone

SOCL 4600	Senior Seminar	4
-----------	----------------	---

Integrative Course Requirement

Code	Title	Hours
------	-------	-------

Complete one of the following: 4

SOCL 1280	The 21st-Century Workplace	
SOCL 3485	Environment, Technology, and Society	
SOCL 4528	Computers and Society	
ANTH 3418	Wired/Unwired: Cybercultures and Technopolitics	

Computer Science Writing Requirement

Code	Title	Hours
------	-------	-------

College Writing

ENGW 1111	First-Year Writing	4
or ENGW 1102	First-Year Writing for Multilingual Writers	

Advanced Writing in the Disciplines

Complete one of the following: 4

ENGW 3302	Advanced Writing in the Technical Professions	
ENGW 3308	Advanced Writing in the Social Sciences	
ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

Required General Electives

Code	Title	Hours
------	-------	-------

Complete eight general electives. 32

Major GPA Requirements

Minimum 2.000 GPA required in all CS and IS courses, and a 2.000 average GPA requirement across all sociology classes is required.

NUPath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data

- Writing-Intensive in the Major
- Writing in the First Year
- Advanced Writing in the Disciplines
- Interpreting Culture
- Understanding Societies and Institutions
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Program Requirement

133 total semester hours required

Cybersecurity and Business Administration, BS

The cybersecurity and business combined major delivers a technical and security-focused degree with a strong grounding in business. Students will complete most of the requirements of a business major, including macroeconomics and microeconomics, while also focusing on the conceptual and practical computer science skills that will enable them to contribute to ensuring the reliability and security of cyberspace.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Cybersecurity Major Requirements

Code	Title	Hours
Computer Science Overview		
CS 1200	Leadership Skill Development	1
CS 1210	Professional Development for CCIS Co-op	1
Computer Science Fundamental Courses		
A grade of C– or higher is required in computer science fundamental courses.		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
Computer Science Required Courses		
CS 3000	Algorithms and Data	4
CS 3500	Object-Oriented Design	4
CS 3650	Computer Systems	4
CS 3700	Networks and Distributed Systems	4
Cybersecurity Required Courses		
CS 2550	Foundations of Cybersecurity	4
CS 3740	Systems Security	4
CS 4170	The Law, Ethics, and Policy of Data and Digital Technologies	4
or IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
CS 4740	Network Security	4
Cybersecurity Electives		
If courses require prerequisites, those should be taken using general electives.		

Complete one course from the following: 3-4

CS 2800	Logic and Computation
CS 4240	Large-Scale Parallel Data Processing
CS 4400	Programming Languages
CS 4500 and CS 4501	Software Development and Recitation for CS 4500
CS 4710	Mobile and Wireless Systems
CS 5770	Software Vulnerabilities and Security
CS 6710	Wireless Network
DS 4300	Large-Scale Information Storage and Retrieval
DS 4400	Machine Learning and Data Mining 1
IA 5200	Security Risk Management and Assessment
IA 5210 and IA 5211	Information System Forensics and Lab for IA 5210
IS 4300	Human Computer Interaction
EECE 2160	Embedded Design: Enabling Robotics
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322
EECE 3324	Computer Architecture and Organization
EECE 4534 and EECE 4535	Microprocessor-Based Design and Lab for EECE 4534
MATH 3527	Number Theory 1
MATH 4575	Introduction to Cryptography
COMM 2551	Free Speech in Cyberspace
CRIM 2200	Criminology
CRIM 3030	Global Criminology
CRIM 3400	Corporate Security: Securing the Private Sector
CRIM 4040	Crime Prevention
LPSC 1101	Introduction to Law
LPSC 2301	Introduction to Law, Policy, and Society
LPSC 3303	Topics in Law and Public Policy
PHIL 1145	Technology and Human Values
POLS 2390	Science, Technology, and Public Policy
POLS 3307	Public Policy and Administration
POLS 3324	Law and Society
POLS 3406	International Law
POLS 3408	International Security
POLS 3420	U.S. National Security Policy
POLS 3423	Terrorism and Counterterrorism
Presentation Requirement	
THTR 1170	The Eloquent Presenter

Business Requirements

Code	Title	Hours
Accounting		
ACCT 1201	Financial Accounting and Reporting	4
ACCT 2301	Managerial Accounting	4
Finance		
FINA 2201	Financial Management	4
Organizational Behavior		

ORGB 3201	Organizational Behavior	4
Marketing		
MKTG 2201	Introduction to Marketing	4
Statistics		
MGSC 2301	Business Statistics	4
Strategy		
STRT 4501	Strategy in Action	4
or STRT 4516	External Case Competition Challenge	

Business Concentration

Complete a four-course business concentration from the following list. Requirements for the concentrations are listed below. (p. 241)

- Accounting (p. 241)
- Entrepreneurship and Innovation (p. 241)
- Finance (p. 241)
- Management (p. 242)
- Marketing (p. 242)
- Supply Chain Management (p. 242)

Business Cooperative Education Requirement

Complete one six-month co-op experience.

Integrative Requirement

Code	Title	Hours
MISM 2301	Management Information Systems	4

Supporting Courses

Code	Title	Hours
------	-------	-------

Mathematics Courses

Complete one of the following:		4
MATH 1341	Calculus 1 for Science and Engineering	
MATH 1231	Calculus for Business and Economics	

Economics

Complete one of the following:		4
ECON 1115	Principles of Macroeconomics	
ECON 1116	Principles of Microeconomics	

Writing Requirements

Code	Title	Hours
------	-------	-------

College Writing

ENGW 1111	First-Year Writing	4
or ENGW 1102	First-Year Writing for Multilingual Writers	

Advanced Writing in the Disciplines

Complete one of the following:		
ENGW 3302	Advanced Writing in the Technical Professions	
ENGW 3308	Advanced Writing in the Social Sciences	
ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

Required General Electives

Code	Title	Hours
Complete four general electives.		16

Cybersecurity GPA Requirement

Minimum 2.000 GPA required in all computer and information science courses.

Business GPA Requirement

Minimum 2.000 GPA required in all business courses.

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Understanding Societies and Institutions
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone

Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Program Requirement

133 semester hours required

Business Concentrations

CONCENTRATION IN ACCOUNTING

Code	Title	Hours
------	-------	-------

Required Courses

ACCT 3401	Financial Reporting and Analysis 1	4
ACCT 4501	Financial Reporting and Analysis 2	4

Electives

Complete two of the following:		8
--------------------------------	--	---

ACCT 3403	Accounting Information Systems	
ACCT 3416	Strategic Cost Analysis for Decision Making	
ACCT 4412	Auditing and Other Assurance Services	
ACCT 4414	Income Tax Determination and Planning	

CONCENTRATION IN ENTREPRENEURSHIP AND INNOVATION

Code	Title	Hours
------	-------	-------

Note: The following courses do not count toward this concentration:

ENTR 1201	The Entrepreneurial Universe	
ENTR 3308	Business Economic History of South Africa	
ENTR 3318		
ENTR 3328		
ENTR 3338	Field Research in Sustainable Energy in Iceland	
ENTR 3346		
ENTR 4510	Management Consulting Abroad	
ENTR 4514	Development Practice and Global Citizenship in India	

Introductory Course

ENTR 2301	Innovation!	4
or ENTR 2303	Entrepreneurial Marketing and Selling	

Capstone Course

Complete one of the following: 4

ENTR 4501	Business Planning for Technology Ventures
ENTR 4503	Business Planning for Small and Medium Enterprises
ENTR 4505	Entrepreneurial Growth Strategy for Technology Ventures
ENTR 4506	Advanced Studies in Social Enterprise

Electives

Note: Only one non-ENTR course may be used as an elective.

Complete two of the following: 8

ENTR 2206	Global Social Enterprise
ENTR 2215	Understanding Family Enterprise
ENTR 2414	Social Responsibility of Business in an Age of Inequality
ENTR 2301	Innovation! (if not used as introductory course)
ENTR 2303	Entrepreneurial Marketing and Selling (if not used for introductory course)
ENTR 3212	Innovation for Social Change
ENTR 3217	Global Family Business Leadership
ENTR 3220	International Entrepreneurship and Innovation Consulting
ENTR 3305	Entrepreneurial Strategy and Business Model Design
ENTR 3306	Global Entrepreneurship
ENTR 3330	Lean Design and Development for Entrepreneurs
ENTR 3401	Management of Operations and Growth in Small- and Medium-Sized Enterprises
ENTR 3403	Managing Operations in a Technology-Based Startup Firm
ENTR 3520	Impact Investing and Social Finance
ENTR 4225	Corporate Entrepreneurship through Global Growth, Acquisitions, and Alliances
ENTR 4512	Social Entrepreneurship and Sustainable Development in India
FINA 4610	Entrepreneurial Finance, Innovation Valuation, and Private Equity
MGMT 3302	Negotiating in Business

CONCENTRATION IN FINANCE

Code	Title	Hours
Required Course		

FINA 3301 or FINA 3303	Corporate Finance Investments	4
---------------------------	----------------------------------	---

Electives

Complete three of the following: 12

ENTR 3520 or FINA 2720	Impact Investing and Social Finance Sustainability in the Business Environment
FINA 3301	Corporate Finance (if not selected as a required course)
FINA 3303	Investments (if not selected as a required course)

FINA 4219	Portfolio Management
FINA 4220	Behavioral Finance
FINA 4310	Working Capital Management
FINA 4312	Issues in Corporate Governance
FINA 4320	International Financial Management
FINA 4410	Valuation and Value Creation
FINA 4412	Personal Financial Planning
FINA 4420	Mergers and Acquisitions
FINA 4512	Financial Risk Management
FINA 4514	Investment Banking
FINA 4516	Real Estate Finance
FINA 4524	Credit Analysis
FINA 4526	Core Topics in Alternative Investments
FINA 4983	Special Topics in Finance
FINA 4602	Turnaround Management
FINA 4604	Fixed-Income Securities
FINA 4608	Advanced Financial Strategy
FINA 4610	Entrepreneurial Finance, Innovation Valuation, and Private Equity

CONCENTRATION IN MANAGEMENT

Code	Title	Hours
Required Course		

MGMT 4501	Skills for Managerial Success	4
-----------	-------------------------------	---

Electives

Note: Only one non-MGMT course may be used as an elective.

Complete three of the following: 12

MGMT 3302	Negotiating in Business
MGMT 3315	Managing Organizational Change and Disruption
MGMT 3330	Developing Leaders for Global Sustainability
MGMT 3340	Managing Healthcare Organizations: Critical Challenges and New Approaches
MGMT 3350	Managing a Diverse Workforce
MGMT 3360	Law and the Legal Process
MGMT 3420	Managing Human Capital
MGMT 3510	Managing Global Teams Virtually and Locally
MGMT 3530	Project Management
MGMT 4310	The Management Practices of Great Organizations
MGMT 4410	Human Resources and Workforce Analytics
ENTR 2215	Understanding Family Enterprise
ENTR 2414	Social Responsibility of Business in an Age of Inequality
ENTR 4225	Corporate Entrepreneurship through Global Growth, Acquisitions, and Alliances

CONCENTRATION IN MARKETING

Code	Title	Hours
Required Courses		
MKTG 3401	Marketing Research	4
MKTG 3301	Marketing Management	4
or MKTG 4506	Consumer Behavior	
Electives		
Complete two of the following:		8
MKTG 2301	Marketing and Society	
MKTG 3301	Marketing Management (if not selected as a required course)	
MKTG 3501	Marketing Analytics	
MKTG 4220	Marketing in Asia	
MKTG 4420	Sales Management	
MKTG 4502	Marketing in the Service Sector	
MKTG 4504	Advertising and Brand Promotion	
MKTG 4506	Consumer Behavior (if not selected as a required course)	
MKTG 4508	Digital Marketing	
MKTG 4510	New Product Development	
MKTG 4512	International Marketing	

CONCENTRATION IN SUPPLY CHAIN MANAGEMENT

Code	Title	Hours
Required Courses		
SCHM 3301	Global Supply Chain Strategy	4
SCHM 3305	Sourcing and Procurement	4
SCHM 3310	Logistics and Transportation Management	4
Elective		
Complete one of the following:		4
SCHM 3308	Supply Chain Analytics	
SCHM 3320	Demand Planning and Forecasting	
SCHM 3330	Sustainability and Supply Chain Management	
SCHM 4401	Advanced Problems in Supply Chain Management	

Plan of Study

Cybersecurity and Criminal Justice, BS

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Cybersecurity Major Requirements

Code	Title	Hours
Computer Science Overview		
CS 1200 or CRIM 1000	Leadership Skill Development Criminal Justice at Northeastern	1

CS 1210	Professional Development for CCIS Co-op	1
Discrete Structures		
A grade of C– or higher is required:		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
Computer Science Fundamentals Courses		
A grade of C– or higher is required in each course:		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
Computer Science Required Courses		
CS 3000	Algorithms and Data	4
CS 3500	Object-Oriented Design	4
CS 3650	Computer Systems	4
CS 3700	Networks and Distributed Systems	4
Cybersecurity Required Courses		
CS 2550	Foundations of Cybersecurity	4
CS 3740	Systems Security	4
CS 4740	Network Security	4
Cybersecurity Elective		
Complete one of the following:		
CS 2800	Logic and Computation	4
CS 4710 or CS 6710	Mobile and Wireless Systems Wireless Network	
CS 5770	Software Vulnerabilities and Security	
CS 4770	Cryptography	
CS 4400	Programming Languages	
CS 4500	Software Development	
CS 4240	Large-Scale Parallel Data Processing	
DS 4300	Large-Scale Information Storage and Retrieval	
DS 4400	Machine Learning and Data Mining 1	
IA 5200	Security Risk Management and Assessment	
IA 5210 and IA 5211	Information System Forensics and Lab for IA 5210	
IS 4300	Human Computer Interaction	
EECE 2160	Embedded Design: Enabling Robotics	
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	
EECE 3324	Computer Architecture and Organization	
EECE 4534 and EECE 4535	Microprocessor-Based Design and Lab for EECE 4534	
MATH 3527	Number Theory 1	
MATH 4575	Introduction to Cryptography	
COMM 2551	Free Speech in Cyberspace

Cybersecurity Integrative Course		
CS 4170	The Law, Ethics, and Policy of Data and Digital Technologies	4
or IA 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
Criminal Justice Integrative Course		
Complete one of the following:		4
CRIM 4040	Crime Prevention	
CRIM 4630	Political Crime and Terrorism	
CRIM 3050	Organized Crime	
CRIM 3400	Corporate Security: Securing the Private Sector	
CRIM 3500	Policing a Democratic Society	
CRIM 5900	Topics in Criminal Justice and Criminology	

Required General Electives

Code	Title	Hours
Complete six general electives.		24

Cybersecurity GPA Requirement

Minimum 2.000 GPA required in all computer and information science courses.

Program Requirement

133 total semester hours required.

Cybersecurity and Economics, BS

The cybersecurity and economics combined degree applies a multidisciplinary approach integrating fundamental economics courses with a strong programming foundation. Students will study both the behavior of individuals and the collective behavior of industries and governments, utilizing computing skills to ensure the reliability and security of cyberspace.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses

where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Cybersecurity Major Requirements

Code	Title	Hours
Computer Science Overview		
CS 1200 or ECON 1000	Leadership Skill Development Economics at Northeastern	1

Major GPA Requirement

Minimum 2.000 GPA required in all CS, IS, and DS courses

Program Requirement

136 total semester hours required

Data Science and Health Science, BS

The health science and computer science combined major offers a solid academic and experiential foundation integrating studies in health administration, computer science, mathematics, and statistics. This program reflects the impact of data in modern healthcare and prepares

students for success in careers in health administration, community-based health promotion, public health, and big data analysis.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

136 semester hours required

Information Science and Business Administration, BS

The information science and business combined major provides a technical degree with a strong grounding in business. Information science combines concepts and skills from computer science, behavioral and social science, and system design into an integrated, people-centered curriculum. Students will complete most of the requirements of a business major, including macroeconomics and microeconomics, while studying how information is acquired, organized, communicated, and used by both people and computers.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Complete two of the following:		8
ACCT 3403	Accounting Information Systems	
ACCT 3416	Strategic Cost Analysis for Decision Making	
ACCT 4412	Auditing and Other Assurance Services	

ACCT 4414 Income Tax Determination and Planning

CONCENTRATION IN ENTREPRENEURSHIP AND INNOVATION

Code	Title	Hours
------	-------	-------

Note: The following courses do not count toward this concentration:

ENTR 1201	The Entrepreneurial Universe	
ENTR 3308	Business Economic History of South Africa	
ENTR 3318		
ENTR 3328		
ENTR 3338	Field Research in Sustainable Energy in Iceland	
ENTR 3346		
ENTR 4510	Management Consulting Abroad	
ENTR 4514	Development Practice and Global Citizenship in India	

Introductory Course

ENTR 2301	Innovation!	4
or ENTR 2303	Entrepreneurial Marketing and Selling	

Capstone Course

Complete one of the following: 4

ENTR 4501	Business Planning for Technology Ventures	
ENTR 4503	Business Planning for Small and Medium Enterprises	
ENTR 4505	Entrepreneurial Growth Strategy for Technology Ventures	
ENTR 4506	Advanced Studies in Social Enterprise	

Electives

Note: Only one non-ENTR course may be used as an elective.

Complete two of the following: 8

ENTR 2206	Global Social Enterprise	
ENTR 2215	Understanding Family Enterprise	
ENTR 2414	Social Responsibility of Business in an Age of Inequality	
ENTR 2301	Innovation! (if not used as introductory course)	
ENTR 2303	Entrepreneurial Marketing and Selling (if not used for introductory course)	
ENTR 3212	Innovation for Social Change	
ENTR 3217	Global Family Business Leadership	
ENTR 3220	International Entrepreneurship and Innovation Consulting	
ENTR 3305	Entrepreneurial Strategy and Business Model Design	
ENTR 3306	Global Entrepreneurship	
ENTR 3330	Lean Design and Development for Entrepreneurs	
ENTR 3401	Management of Operations and Growth in Small- and Medium-Sized Enterprises	
ENTR 3403	Managing Operations in a Technology-Based Startup Firm	
ENTR 3520	Impact Investing and Social Finance	

ENTR 4225 Corporate Entrepreneurship through Global Growth, Acquisitions, and Alliances

ENTR 4512	Social Entrepreneurship and Sustainable Development in India	
FINA 4610	Entrepreneurial Finance, Innovation Valuation, and Private Equity	
MGMT 3302	Negotiating in Business	

CONCENTRATION IN FINANCE

Code	Title	Hours
------	-------	-------

Required Course

FINA 3301	Corporate Finance	4
or FINA 3303	Investments	

Electives

Complete three of the following: 12

ENTR 3520	Impact Investing and Social Finance	
or FINA 2720	Sustainability in the Business Environment	
FINA 3301	Corporate Finance (if not selected as a required course)	
FINA 3303	Investments (if not selected as a required course)	
FINA 4219	Portfolio Management	
FINA 4220	Behavioral Finance	
FINA 4310	Working Capital Management	
FINA 4312	Issues in Corporate Governance

Information Science and Cognitive Psychology, BS

The information science and cognitive psychology combined major provides a foundation in general psychology, psychology of language, cognition, and statistics. These are supplemented by an experimental laboratory course, seminar course, and psychology electives. Information science combines concepts and skills from computer science, behavioral and social science, and system design to create an integrated, people-centered curriculum. Students who choose this program often have a general interest in human psychology or specific interests in artificial intelligence or human-computer interaction.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Computer and Information Science Courses

Code	Title	Hours
Computer Science Overview		
CS 1200	Leadership Skill Development	1
CS 1210	Professional Development for CCIS Co-op	1
Computer Science Fundamental Courses		
A grade of C– or higher is required in computer science fundamental courses.		
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5
CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
Computer Science Required Courses		
CS 3000	Algorithms and Data	4
CS 3500	Object-Oriented Design	4
CS 4100	Artificial Intelligence (integrative course)	4
Information Science Required Courses		
IS 2000	Principles of Information Science	4
IS 3500	Information System Design and Development	4
IS 4300	Human Computer Interaction (integrative course)	4
IS 4800	Empirical Research Methods	4
IS 4900	Information Science Senior Project (integrative course)	5

Psychology Courses

Code	Title	Hours
Required Courses		
PSYC 1101	Foundations of Psychology	4
PSYC 2320	Statistics in Psychological Research	4
PSYC 3464	Psychology of Language	4
PSYC 3466	Cognition	4
Advanced Psychology		
PSYC 3452	Sensation and Perception	4
or PSYC 3458	Biological Psychology	
Laboratory in Psychology		
Complete one of the following:		4
PSYC 4610	Laboratory in Psycholinguistics	
PSYC 4612	Laboratory in Cognition	
PSYC 4622	Laboratory in Sensation and Perception	
Seminar in Psychology		
Complete one of the following:		4
PSYC 4658	Seminar in Psycholinguistics	
PSYC 4660	Seminar in Cognition	
PSYC 4668	Seminar in Sensation and Perception	
PSYC 4674	Seminar in Cognitive Neuroscience	
Psychology Electives		
Note: Courses satisfying the categories above cannot be reused.		
Complete two of the following:		8
PSYC 3402	Social Psychology	
PSYC 3404	Developmental Psychology	
PSYC 3450	Learning and Motivation	
PSYC 3451	Learning Principles and Behavior Analysis	
PSYC 3452	Sensation and Perception	
PSYC 3458	Biological Psychology	
PSYC 4512	Neuropsychology	
PSYC 4520	Language and the Brain	
PSYC 4524	Cognitive Development	
PSYC 4610	Laboratory in Psycholinguistics	
PSYC 4612	Laboratory in Cognition	
PSYC 4622	Laboratory in Sensation and Perception	
PSYC 4628	Laboratory in Developmental Psychology	
PSYC 4658	Seminar in Psycholinguistics	
PSYC 4660	Seminar in Cognition	
PSYC 4668	Seminar in Sensation and Perception	
PSYC 4674	Seminar in Cognitive Neuroscience	
PSYC 4676	Seminar in Developmental Psychology	
With prior approval, directed study research and Honors Project courses can also be counted:		
PSYC 4970	Junior/Senior Honors Project 1	
PSYC 4971	Junior/Senior Honors Project 2	
PSYC 4991	Directed Study Research

Information Science and Environmental Science, BS

The information science and environmental science combined major provides a foundational study of geological processes before focusing on environmental planning, environmental ethics, and sustainability. Since it examines the relationship between human decisions and actions to the environment, the program aligns with the orientation of information science, which utilizes an integrated, people-centered curriculum combining concepts and skills from computer science, behavioral and social science, and system design.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond

specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Information Science and Journalism, BS

The information science and journalism combined major is similar to the computer science and journalism degree, with a greater focus on the journalism profession's information science needs. Information science combines concepts and skills from computer science, behavioral and social science, and system design into an integrated, people-centered curriculum. Both degrees provide a strong foundation in the principles, practices, and responsibilities of journalism as well as the systems and technologies that support digital media.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Information Science Courses

Code	Title	Hours

SOCL 4528	Computers and Society	

Writing Requirement

Code	Title	Hours
College Writing		
ENGW 1111	First-Year Writing	4
Advanced Writing in the Disciplines		
JRNL 2301	Visual Storytelling in Journalism	4

Required General Electives

Code	Title	Hours
Complete five general electives.		20

NUpath Requirements Satisfied

- Engaging with the Natural and Designed World
- Exploring Creative Expression and Innovation
- Conducting Formal and Quantitative Reasoning
- Analyzing and Using Data
- Understanding Societies and Institutions

- Interpreting Culture
- Engaging Difference and Diversity
- Employing Ethical Reasoning
- Writing in the First Year
- Advanced Writing in the Disciplines
- Writing-Intensive in the Major
- Demonstrating Thought and Action in a Capstone Integrating Knowledge and Skills Through Experience is satisfied through co-op.

Major GPA Requirement

Minimum 2.000 GPA required in all CS, IS, and JRNL courses

Program Requirement

134 total semester hours required

Plan of Study

Sample Pattern, Five Years, Three Co-ops in Summer 2/Fall

Year 1

Accelerated Bachelor/Graduate Degree Programs

Northeastern University offers a number of PlusOne bachelor's/master's degree programs that allow students to accelerate the completion of the bachelor's degree by applying graduate credits taken as an undergraduate toward both the undergraduate and graduate degrees. Generally, both degrees may be earned in one more year than is the normal time allotted for completion of the bachelor's degree. See additional information on PlusOne Bachelor's/Master's programs (<http://www.northeastern.edu/plusone>).

Programs

- Computer Science, BSCS/Computer Science, MSCS
- Computer Science and Mathematics, BS/Mathematics, MS
- Cybersecurity, BS/Information Assurance and Cybersecurity, MSIA

COEAdvising@northeastern.edu

The mission of the College of Engineering is to provide a teaching, learning, and research environment that results in the highest-quality education for our students. Consistent with this goal, while providing a practice-oriented, experiential, and interdisciplinary program, the College of Engineering seeks to prepare students to contribute to the accumulation and application of technical knowledge. The college further seeks to help students master the fundamental mathematical and scientific principles underlying a particular branch of engineering; develop and demonstrate competence in analysis and design appropriate to an engineering specialization; reason clearly and communicate effectively; and recognize the need to continue professional development.

Through laboratory exercises, senior design projects, professional association activities, cooperative work assignments, and other experiential opportunities, students put theory into practice and clarify their professional goals.

The college offers a Bachelor of Science degree with specializations in bioengineering, chemical engineering, civil engineering, computer engineering, electrical engineering, environmental engineering, industrial engineering, and mechanical engineering. Five-year and four-year options are available to complete the Bachelor of Science degree program. The five-year option includes eighteen months of cooperative education work experience, and the four-year option includes twelve months of cooperative education experience. Customized four-year programs without co-op experience are also available.

The college encourages students to study the arts, sciences, business, and other areas outside engineering to allow for an increased awareness of the social, economic, political, aesthetic, and philosophical influences that shape the world in which graduates will practice their professions. Students may complete a minor in different areas such as business, computer science, biomedical engineering, math, or music. In many cases, the minor can be completed without course overloads.

The college also offers an array of international educational experiences, including a number of study-abroad options, international cooperative educational experiences, and Dialogue of Civilizations classes (which offer a four- to six-week opportunity to study engineering or a related field in the context of an international experience).

In addition to a full array of university services, specialized advising and other support services (including tutoring) are provided. Students in the University Honors Program may participate in honors sections

of a number of courses. Active student chapters of many national professional engineering organizations and honor societies are supported by the college as an enriching addition to academic studies and co-op experience.

The Bachelor of Science programs in chemical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, and mechanical engineering are accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>).

Bachelor of Science/Master of Science Degree Programs

The Departments of Bioengineering, Chemical Engineering, Civil and Environmental Engineering, Electrical and Computer Engineering, and Mechanical and Industrial Engineering offer programs leading to both the bachelor's and master's degrees in five years. All students begin with the common first-year engineering program. Upon successful completion of required course work (four or five semesters in the undergraduate curriculum depending upon departmental requirements), students may petition to enter a BS/MS program. Degree candidates must maintain a 3.200 cumulative grade-point average (GPA), carry extra courses, and reduce the number of cooperative education semesters to complete the course requirements.

Academic Standards

ACADEMIC PROGRESSION STANDARDS

In addition to meeting university progression standards, it is expected that full-time engineering students enroll in four courses with appropriate labs and recitations and successfully complete at least 12 semester hours each academic semester with an acceptable GPA as noted below. Any exceptions to the course load requirement must be approved in writing by the student's academic advisor prior to the start of each semester. Only general electives taken outside the College of Engineering may be taken on a pass/fail grading basis.

GPA REQUIREMENTS FOR GRADUATION

A minimum cumulative GPA requirement of 2.000 in major (department) courses and a minimum cumulative GPA requirement of 2.000 overall are required for graduation.

CRITERIA FOR ACADEMIC PROBATION

Full-time students in the College of Engineering will be placed on academic probation effective for the following academic semester for any of the reasons noted below:

First-year Students:

- Not maintaining a semester GPA of at least a 1.800 at the end of each full-term semester (fall, spring) of the first-year curriculum
- Not earning at least 12 semester hours at the end of each semester of the first-year curriculum
- Not earning at least 24 semester hours at the end of the two full-term semesters (fall, spring) of the first-year curriculum

Upper-class and Transfer Students:

- Not earning at least 12 semester hours in the academic full-term semester (fall, spring) just completed
- Not maintaining an overall cumulative GPA of at least 2.000 at the end of each full-term academic semester (fall, spring)
- Not maintaining a GPA of at least a 2.000 in the major at the end of the fourth academic full-term semester of the curriculum and at the end of each full-term academic semester (fall, spring) thereafter

- Accumulating three outstanding course deficiencies (grades of F, I, W, NE, U, or missing grades)
- Earning a full-term semester (fall, spring) GPA of 1.800 or lower
- Not following a program of study approved by the student's academic advisor

A notation of the academic probation action will appear on the internal record but not on the permanent transcript.

CRITERIA FOR ACADEMIC DISMISSAL

Students who have below a 1.000 GPA in any academic term following their first semester or cumulatively may be dismissed, regardless of their prior academic status, at the discretion of the college.

Full-time students on academic probation in the College of Engineering are eligible for academic dismissal from the university for any of the reasons noted below:

- Earning less than a 1.800 GPA in a current term (fall, spring, summer, summer 1, or summer 2)
- Completing fewer than 12 semester hours in a full-term (fall, spring) academic semester
- Not following a program of study approved by the student's academic advisor
- Remaining on academic probation after two full-term (fall, spring) academic semesters

Notation of this academic dismissal action will appear on the permanent transcript.

PASS/FAIL COURSE WORK

Students may elect to take courses on a pass/fail basis in accordance with university policy. A maximum of two courses may be taken pass/fail toward fulfillment of degree requirements in the College of Engineering.

GRADUATION REQUIREMENTS

The college reserves the right to amend programs, courses, and degree requirements to fulfill its educational responsibility to respond to relevant changes in the field.

Students must complete all of the requirements in the degree program in which they are candidates. Degree requirements are based upon the year of graduation, determined by the date of entry or reentry into the College of Engineering. Degree requirements and the year of graduation for a degree candidate who fails to make normal academic progress will be subject to review and possible change.

PROGRESSION TOWARD FULFILLMENT OF DEGREE REQUIREMENTS

Students are expected to develop and follow a program of study outlining scheduled course work to complete degree requirements. If changes to the year of graduation are to be made after completion of the third year of study in the major program curriculum, revised plans should be submitted to an academic advisor for review and approval. Students pursuing a minor course of study should declare their minor no later than the third year.

Interdisciplinary Minors

- Entrepreneurial Engineering, Minor (p. 369)
- Materials Science and Engineering, Minor (p. 370)
- Sustainable Energy Systems, Minor (p. 371)

Entrepreneurial Engineering, Minor

The entrepreneurial engineering minor is designed for the technology-minded entrepreneur who seeks to understand disciplinary fundamentals, assess market needs, create technologies, and determine how to manufacture solutions sustainably and economically. The course requirements for the minor are designed to incorporate both engineering elements (product development and prototyping) and creative elements (product design), along with market and societal considerations (customer discovery and needs assessment). The elective option provides an opportunity to specialize in one of three areas: manufacturing, design, or venture creation. Versions of this minor are available for both engineering and nonengineering majors. Sign up for the minor by contacting your academic advisor.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Core Courses

Code	Title	Hours
For Undergraduates in the College of Engineering		
GE 5010	Customer-Driven Technical Innovation for Engineers	4
GE 5020	Engineering Product Design Methodology	4
GE 5030	Iterative Product Prototyping for Engineers	4
GE 5100	Product Development for Engineers	4
For Undergraduates outside the College of Engineering		
GE 1110	Engineering Design	4
Complete three of the following:		
GE 5010	Customer-Driven Technical Innovation for Engineers	4
GE 5020	Engineering Product Design Methodology	4
GE 5030	Iterative Product Prototyping for Engineers	4
GE 5100	Product Development for Engineers	4

Elective

Materials Science and Engineering, Minor

Materials Science and Engineering

The study of materials science and engineering has spurred breakthroughs in applications ranging from artificial limbs and organs, to space travel vehicles, to personal MP3 players. For example, the discovery of buckyballs and carbon nanotubes has led to the development of an unprecedented reduction in size of prototype electronic components and points the way to tomorrow's electronic technologies. Porous nanostructures of biocompatible materials are studied for targeted drug delivery within the body. The integration of polymers and semiconductors is used to create efficient, usable solar cells to reduce our dependence on fossil fuels. There are many more examples of both existing technologies and current research areas involving materials science and engineering that impact everyday life both today and in the future.

The minor in materials science and engineering is open to all students of the College of Engineering whose science and technical interests involve the design, processing, and optimization of engineering materials. Since the materials interests may vary across the engineering disciplines, the minor is composed of an interdisciplinary selection of courses that offer a high degree of flexibility to the student. The fundamental goals of the program are to offer the student a broad interdisciplinary program that includes a basic background in the relevant aspects of materials science and the engineering applications of materials. The objectives are to serve the needs of the chemical, civil, electrical, and mechanical engineering departments in providing a vehicle to expose students to materials science and engineering. Particular focus areas include electronic materials and processing for device applications; strength, wear, and corrosion-resistant coatings; molecular-level design of thin films and nanostructures; polymers and biomedical applications; and steels, concretes, and space-based structures.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Course

Code	Title	Hours
ME 2340	Introduction to Material Science	4

Electives

Code	Title	Hours
Complete three courses from the following disciplines:		11-13

Bioengineering

BIOE 5820	Biomaterials
-----------	--------------

Chemical Engineering

CHME 5631	Biomaterials Principles and Applications
-----------	--

CHME 5632	Advanced Topics in Biomaterials
-----------	---------------------------------

CHME 5699	Special Topics in Chemical Engineering (Introduction to Polymer Science)
-----------	--

Civil and Environmental Engineering

CIVE 2260 and CIVE 2261	Civil Engineering Materials and Materials and Measurements Lab
----------------------------	---

CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure
-----------	--

Electrical and Computer Engineering

EECE 3392	Electronic Materials
-----------	----------------------

EECE 5606	Micro- and Nanofabrication
-----------	----------------------------

EECE 7296	Electronic Materials (With Instructor Permission)
-----------	---

Materials Engineering

MATL 6285	Structure, Properties, and Processing of Polymeric Materials (With Instructor Permission)
-----------	---

Mechanical and Industrial Engineering

ME 4640	Mechanical Behavior and Processing of Materials
---------	---

ME 5374	Special Topics in Mechanical Engineering (Advances in Materials - Fundamentals, Properties, Applications)
---------	---

ME 5600	Materials Processing and Process Selection
---------	--

ME 5645	Environmental Issues in Manufacturing and Product Use
---------	---

Engineering Interdisciplinary

ENGR 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage
-----------	---

Chemistry and Chemical Biology

CHEM 3501	Inorganic Chemistry
-----------	---------------------

CHEM 5651	Materials Chemistry of Renewable Energy
-----------	---

Capstone Design

Code	Title	Hours
Complete one of the following major capstone requirements: ¹		4-5

BIOE 4792	Capstone Design 2
-----------	-------------------

CHME 4703	Capstone Design 2: Chemical Process Design
-----------	--

CIVE 4765	Senior Design Project—Environmental
-----------	-------------------------------------

CIVE 4767	Senior Design Project—Structural
-----------	----------------------------------

CIVE 4768	Senior Design Project—Transportation

EECE 4792	Electrical and Computer Engineering Capstone 2
-----------	--

MEIE 4702	Capstone Design 2
-----------	-------------------

GPA Requirement

2.000 GPA required in the minor

- ¹ Students may complete 4 semester hours of elective course work in place of the capstone design project (if major does not have a capstone design project requirement).

Sustainable Energy Systems, Minor

The sustainable energy systems minor is an interdisciplinary selection of courses designed to offer flexibility and exposure to the principles and applications of sustainable energy systems that are needed to meet the challenges of the world's growing energy needs. Students have an opportunity to learn technical skills, analysis techniques, design strategies, and principles of economics and energy policy in topic areas including traditional (fossil fuel), alternative, renewable, and sustainable energy sources and energy system applications.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Note: Courses required to fulfill a major requirement (i.e., those that are specifically listed by course number and name on the curriculum sheet) may not be used to fulfill minor requirements. However, one engineering course from this minor with course number 4000 to 5999 in the student's major can be used as a technical elective or advanced engineering elective to fulfill the student's major requirements.

- Civil engineering students may not count Energy Systems: Science, Technology, and Sustainability (GE 3300) toward the sustainable energy systems minor if this course is used to fulfill major requirements.
- Chemical engineering students and mechanical engineering students may not count Chemical Engineering Thermodynamics 1 (CHME 2320) or Thermodynamics (ME 2380) toward the sustainable energy systems minor since these courses are required in their respective majors.
- Chemical engineering students may not count Conservation Principles in Chemical Engineering (CHME 2308) toward the sustainable energy systems minor since this course is required in their major.
- Industrial engineering students may not count Engineering Economy (IE 4512) toward the sustainable energy systems minor since this course is required in their major.

Core Energy Science, Technology Courses

Code	Title	Hours
Complete two of the following:		
CHME 2320	Chemical Engineering Thermodynamics 1	8
or ME 2380	Thermodynamics	
GE 3300	Energy Systems: Science, Technology, and Sustainability	
ENGR 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
ENSY 5000	Fundamentals of Energy System Integration	

Environmental/Economics/Policy Courses

Code	Title	Hours
Complete one of the following:		
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	4
ECON 3423	Environmental Economics	
ECON 3425	Energy Economics	
ENVR 4515	Sustainable Development	
FINA 2720	Sustainability in the Business Environment	
ME 5645	Environmental Issues in Manufacturing and Product Use	
SOCL 3485	Environment, Technology, and Society	

Electives

Code	Title	Hours
Complete two of the following:		
CHME 2308	Conservation Principles in Chemical Engineering	8
CHME 2320	Chemical Engineering Thermodynamics 1	
CHME 5630	Biochemical Engineering	
CHME 5699	Special Topics in Chemical Engineering	
CIVE 4566	Design for Sustainable Transportation: Netherlands	
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
EECE 5680	Electric Drives	
EECE 5682	Power Systems Analysis 1	
EECE 5686	Electrical Machines	
EECE 5688	Analysis of Unbalanced Power Grids	
GE 3300	Energy Systems: Science, Technology, and Sustainability	
ENGR 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
ENSY 5000	Fundamentals of Energy System Integration	
IE 4512	Engineering Economy (IE students may not count this course toward a sustainable energy minor if used to fulfill a major requirement.)	
IE 4600	Systems Design for Sustainability	
ME 2380	Thermodynamics	
ME 5645	Environmental Issues in Manufacturing and Product Use	
ME 5685	Solar Thermal Engineering	
SBSY 5100	Sustainable Design and Technologies in Construction	
SBSY 5200	Sustainable Engineering Systems for Buildings

The Department of Bioengineering offers students a broad education built on fundamentals in science, mathematics, and engineering, with a focus on the biological applications of engineering. The program is designed to provide a rigorous engineering training along with a comprehensive understanding of the biological constraints intrinsic to designing artificial systems to interface with, augment, replace, repair, or monitor living systems. These constraints depend on the properties of the biological system involved and the functionality that is being created. The living system may be the human body; an ecosystem; or, more broadly, a bioreactor, tissue culture system, or any system with living components. The presence of naturally occurring biological tissue places special constraints on the design and implementation of artificial constructs and their interface to living systems. Bioengineers are engineers with comprehensive understanding of the engineering requirements intrinsic to working within a biological context.

Bioengineering is a relatively new field driven by the recognition that engineering of biological systems or systems that interface with living systems requires a multidisciplinary approach that takes into account the mechanical, electrical, chemical, and materials properties of the biological system. With that in mind, the bioengineering program has been designed to provide a rigorous engineering education that endows a broad understanding of the quantitative analysis of biological systems and a deep expertise in one of four areas of bioengineering. The curriculum is structured around a core of six courses that quantitatively analyze biological systems from multiple points of view. The core provides the fundamentals of quantitative physiology, electrical engineering in the context of excitable tissues; basics of mechanical engineering in the context of the musculoskeletal system; and thermodynamics, heat transfer, and fluids mechanics within the context of physiological systems. On completion of the core, students choose one of four concentrations (bioimaging and signal processing, cell and tissue engineering, biomechanics, or biomedical devices), which provides the opportunity to develop a deep level of expertise in an important area of bioengineering. The curriculum culminates with a two-semester capstone course to provide experience in design and implementation of a novel bioengineering project.

Program Objectives

Program educational objectives describe what graduates are expected to attain within a few years after graduation. The program educational objectives of the BS in bioengineering program are to prepare graduates to:

- Be technically proficient, innovative, and rigorous problem solvers who excel in the professional practice of engineering while maintaining a high standard of professional and ethical responsibility.
- Be multifaceted and able to work with and demonstrate leadership in multidisciplinary teams.

- Pursue advanced degrees in engineering, medicine, and other fields that leverage their technical and problem-solving skills.

Mission of the Department

The program is committed to providing a multidisciplinary education, making connections from the classroom and laboratory to research, co-op, and co-curricular experiences. The curriculum provides fundamentals in mathematics, physical sciences, and engineering science; laboratory experiences; as well as an emphasis on the special considerations intrinsic to design within a biological context. Through the university's general educational requirements, students gain awareness of the impact of engineering decisions in a broader societal and ethical context. The department encourages professional development through active participation and leadership in student organizations, societies, and departmental activities. As a result, the bioengineering program is designed to prepare students for success in industrial careers; graduate programs; or professional medical, law, and business schools.

Overview of Programs Offered

The Department of Bioengineering offers a Bachelor of Science in Bioengineering. Five-year Bachelor of Science in Bioengineering/Master of Science programs are also available in the following Master of Science disciplines: bioimaging and signal processing, cell and tissue engineering, biomedical devices, and biomechanics.

Other Programmatic Features

By participating in our cooperative education program, our graduates will have an opportunity to explore what career objectives fit their own skills and interests. The goal of this component of our program is to offer students valuable professional experience and contacts that will help get them started in their professional career, as well as to develop career management skills. The co-op program parallels the academic program in level of responsibility and sophistication.

The department also offers significant research opportunities throughout all fields of bioengineering, including participating in research centers based in our department and college, as well as new interdisciplinary graduate and professional master's programs.

The bioengineering curriculum is an innovative plan that is continuously and carefully assessed and evaluated to ensure that graduates of the program are fully prepared for success as professional bioengineers and are prepared for graduate or professional school.

Programs

Bachelor of Science in Bioengineering (BSBioE)

- Bioengineering (p. 372)

Accelerated Programs

See Accelerated Bachelor/Graduate Degree Programs (p. 433)

Bioengineering, BSBioE

Bioengineering is engineering in a biological context such as the human body, an ecosystem, or a bioreactor. In every case, the interface between engineered and biological systems places unique constraints on the design and implementation of devices, instruments, or implants. These depend on the properties of the biological system involved and the functionality that is being created.

The interface of engineering and medicine as embodied in bioengineering will be one of the most exciting endeavors and greatest adventures of the 21st century. Job opportunities are expected to expand dramatically

with a focus on development of entirely new classes of products, instrumentation, and implants. The impact to human health will be extraordinary.

Bioengineering is intrinsically multidisciplinary and it is essential that students learn the languages used by multidisciplinary teams. To that end, our curriculum is structured around a core of six courses that analyze biological systems from every possible quantitative point of view. On the completion of the core, students choose one of four concentrations, which provides the opportunity to develop a deep level of expertise in a specific area of bioengineering.

Bioengineering students will have unique opportunities in the classroom, research labs, and experiential learning. The projects that they may be able to contribute to include bio-bandages that monitor bacterial growth or that help damaged ligaments heal faster; sheets of cells folded like origami to form a working kidney; and new materials that—like a leaf in the sun—automatically sense and adapt to changes in the environment. This is truly an exciting time!

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Major GPA Requirement

2.000 minimum required in BIOE courses

Bioengineering Core Requirements

Complete 39 semester hours in bioengineering core requirements as indicated below.

Code	Title	Hours
Required Courses		
BIOE 2355	Quantitative Physiology for Bioengineers	4
BIOE 2365 and BIOE 2366	Bioengineering Measurement, Experimentation, and Statistics and Lab for BIOE 2365	5
BIOE 2350	Biomechanics	4
BIOE 3380	Biomolecular Dynamics and Control	4
BIOE 3310	Transport and Fluids for Bioengineers	4
BIOE 3210	Bioelectricity	4

BIOE 3000	Professional Issues in Engineering	1
Additional Required Courses		
Credit from the following course counts toward requirements above:		1
GE 1501	Cornerstone of Engineering 1	

Concentration

Complete 20 semester hours in one of the following four concentrations. Requirements for the concentrations are listed below (p. 374).

- Bioimaging and Signal Processing (p. 374)
- Cell and Tissue Engineering (p. 374)
- Biomechanics (p. 374)
- Biomedical Devices (p. 374)

Supporting Courses: Mathematics/Science

Complete 37 semester hours in mathematics and science as indicated below.

Code	Title	Hours
Required Mathematics/Science		
BIOL 1115 and BIOL 1116	General Biology 1 for Engineers and Lab for BIOL 1115	5
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
CHEM 2311 and CHEM 2312 and CHEM 2319	Organic Chemistry 1 and Lab for CHEM 2311 and Recitation for CHEM 2311	5
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
GE 2361	Mathematical Methods for Engineers	4
PHYS 1171 and PHYS 1172 and PHYS 1173	Physics 1 for Bioscience and Bioengineering and Lab for PHYS 1171 and Interactive Learning Seminar for PHYS 1171	5
PHYS 1175 and PHYS 1176 and PHYS 1177	Physics 2 for Bioscience and Bioengineering and Lab for PHYS 1175 and Interactive Learning Seminar for PHYS 1175	5
Supplemental Credit		
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1502	Cornerstone of Engineering 2	

Writing and NUpath Courses

Code	Title	Hours
Writing		
A grade of C or higher is required:		

ENGW 1111	First-Year Writing	4
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

NUPath Requirements through General Electives

NUPath requirements Interpreting Culture (IC), Societies and Institutions (SI), and Differences and Diversity (DD) are not explicitly satisfied by required engineering courses. Students are responsible for satisfying these requirements with general electives.

Required General Electives

Code	Title	Hours
Complete seven academic, nonremedial, nonrepetitive courses, each equivalent to 4 semester hours.		28

Course Work That Does Not Count Toward the Engineering Degree

Students in engineering are allowed to count a maximum of two pass/fail courses toward their degree program. Only general electives outside the College of Engineering may be taken on a pass/fail grading basis. A maximum of one pass/fail course is allowed per semester.

Program Requirement

136 total semester hours required

Concentrations

CONCENTRATION IN BIOIMAGING AND SIGNAL PROCESSING

Code	Title	Hours
Required Courses		
BIOE 5235	Biomedical Imaging	4
BIOE 5810	Design of Biomedical Instrumentation	4
EECE 2520	Fundamentals of Linear Systems	4
Elective Courses		
Complete two of the following:		8
BIOE 4991	Research	
BIOL 5581	Biological Imaging	
EECE 2530	Fundamentals of Electromagnetics	
EECE 3468	Noise and Stochastic Processes	
EECE 4512	Biomedical Electronics	
EECE 4626	Image Processing and Pattern Recognition	
EECE 5648	Biomedical Optics	
EECE 5664	Biomedical Signal Processing	

CONCENTRATION IN CELL AND TISSUE ENGINEERING

Code	Title	Hours
Required Courses		
BIOE 5410	Molecular Bioengineering	4
BIOE 5420	Cellular Engineering	4
BIOE 5430	Principles and Applications of Tissue Engineering	4
Elective Courses		
Complete two of the following:		8
BIOE 4991	Research	
BIOE 5650	Multiscale Biomechanics	

BIOE 5656	Fields, Forces, and Flows in Biological Systems
BIOE 5820	Biomaterials
CHME 5630	Biochemical Engineering

CONCENTRATION IN BIOMECHANICS

Code	Title	Hours
Required Courses		
BIOE 5630	Physiological Fluid Mechanics	4
BIOE 5650	Multiscale Biomechanics	4
ME 5665	Musculoskeletal Biomechanics	4
Elective Courses		
Complete two of the following:		8
BIOE 4991	Research	
BIOE 5656	Fields, Forces, and Flows in Biological Systems	
ME 4508	Mechanical Engineering Computation and Design	
ME 4555	System Analysis and Control	
ME 5667	Solid Mechanics of Cells and Tissues	

CONCENTRATION IN BIOMEDICAL DEVICES

Code	Title	Hours
Required Courses		
BIOE 5250	Design, Manufacture, and Evaluation of Medical Devices	4
BIOE 5810	Design of Biomedical Instrumentation	4
BIOE 5820	Biomaterials	4
Elective Courses		
Complete two of the following:		8
BIOE 4991	Research	
BIOE 5850	Design of Implants	
EECE 2750	Enabling Engineering	
ME 2340 and ME 2341	Introduction to Material Science and Lab for ME 2340	
ME 4508	Mechanical Engineering Computation and Design	
ME 4555	System Analysis and Control	

Plan of Study

Four Years, Two Co-ops in Summer 2/Fall

Year 1

Fall	Hours	Spring	Hours	Summer 1	Hours	Summer 2	Hours
Students will need to have AP credit for Calc. AB (MATH1341-Calculus 1 – 4 SH)		4	PHYS 1171 (ND)	3	General elective	4	0

Ronald J. Willey, PhD

Professor and Vice Chair

313 Snell Engineering Center

617.373.2989

617.373.2209 (fax)

The chemical engineering program offers students a broad education built on fundamentals in science, mathematics, and engineering, which are then applied to a variety of contemporary problems using modern tools, such as computational software and computer-aided design. Chemical engineers have traditionally been employed in chemical, petrochemical, agricultural chemical, pulp and paper, plastics, cosmetics, and textiles industries and in consulting and design firms. Today, chemical engineers also play an integral role in emerging biological and advanced materials fields, including nanotechnology. For example, chemical engineers are creating new materials needed for space exploration, alternative energy sources, and faster, self-powered computer chips. In biotechnology and bioengineering, chemical engineers are working to understand human diseases, developing new therapies and drug delivery systems, and producing new medicines through cell culture techniques. Chemical engineers employ nanotechnology to revolutionize sensors, security systems, and medical diagnostics and treatments. In addition to creating important products, chemical engineers are also involved in protecting our environment by exploring ways to reduce acid rain and smog; to recycle and reduce wastes; to develop new sources of environmentally clean energy; and to design inherently safe, efficient, and "green" processes. The role of chemical engineering is to develop new products and to design processes while reducing costs, increasing production, and improving the quality and safety of new products.

Mission of the Department

The faculty of the chemical engineering program are committed to providing a practice-oriented education through project and problem-based learning and drawing connections between classroom learning and co-op experiences. The educational curriculum provides fundamentals in mathematics, physical sciences, and engineering science as well as real-world design and laboratory experiences. Through the university's academic core requirements, NUpath, students gain awareness of the impact of engineering decisions in a broader societal and ethical context. Cooperative education enables students to integrate practical

workplace knowledge with classroom learning so the educational experiences are synergistic and deepen the learning process. The chemical engineering community encourages professional development through active participation and leadership in student organizations, professional societies, and departmental activities. As a result, the chemical engineering program prepares students for industrial careers, graduate programs, or professional medical, law, and business schools.

Overview of Programs Offered

Please see the programs tab (p. 377) for a list of the department's academic programs.

The program educational objectives are as follows. Within a few years after graduation, graduates of the chemical engineering program are expected to obtain the ability to function successfully in a variety of fields in chemical engineering or in advanced study that uses the problem-solving skills taught in chemical engineering; identify problems, collect necessary information, and analyze data to draw appropriate conclusions and to make informed decisions; function effectively in a diverse workplace using interpersonal and communicative skills gained from their chemical engineering training; recognize an economic, environmental, health and safety, or sustainability situation in need of improvement, then make suggestions that improve this situation.

The program's student objectives are as follows. When a student graduates from the chemical engineering program, they will have an ability to identify, formulate, and solve complex chemical engineering problems by applying principles of engineering, science, and mathematics; an ability to apply chemical engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, and global, cultural, social, environmental, and economic factors, as well as identifying and mitigating the hazards associated with that design to promote health and safety; an ability to communicate effectively with a range of audiences; an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts including protecting the public and the environment by performing their work in a safe and environmentally conscious manner; an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives; an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions; and an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

The faculty of the chemical engineering program are committed to providing a practice-oriented education through experiential learning and by drawing connections between classroom learning and co-op experiences. The educational curriculum provides fundamentals in mathematics, physical sciences, and engineering science, as well as real-world design and laboratory experiences. Through the university's general education requirements, students gain awareness of the impact of engineering decisions in a broader societal and ethical context.

Other Programmatic Features

By participating in our cooperative education program, our graduates will have an opportunity to explore what career objectives fit their own skills and interests. The goal of this component of our program is to offer students valuable professional experience and contacts that will help get them started in their professional career, as well as to develop career management skills. The co-op program parallels the academic program in level of responsibility and sophistication.

The department also offers significant research opportunities throughout all fields of chemical engineering, including participating in research centers based in our department and college, as well as new interdisciplinary graduate and professional master's programs.

The chemical engineering community creates opportunities for professional development through active participation and leadership in student organizations, professional societies, and departmental activities. As a result, the chemical engineering program prepares students for successful industrial careers; graduate programs; or professional medical, law, and business schools. The chemical engineering curriculum is continuously evaluated and improved to ensure that graduates of the program are given every opportunity for future success as professional chemical engineers and are prepared for graduate or professional school.

Programs

Bachelor of Science in Chemical Engineering (BSCHE)

- Chemical Engineering (p. 377)
- Chemical Engineering and Physics (p. 383)
- Chemical Engineering and Biochemistry (p. 381)

Minor

- Biochemical Engineering (p. 385)

Accelerated Programs

See Accelerated Bachelor/Graduate Degree Programs (p. 433)

Chemical Engineering, BSCHE

Provides a BS degree in chemical engineering. Upon completion, one can move in several career directions. Traditionally, the degree prepares one for practice in the engineering and the control of processes involving chemicals, biotechnology feedstocks, and pharmaceuticals. The degree can also serve as a springboard to advance study in chemical engineering. Nontraditional postgraduate pathways include obtaining a law school degree related to patent law, an MBA, or a medical degree for a career in the health professions.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

NUPath requirements Interpreting Culture (IC), Societies and Institutions (SI), and Differences and Diversity (DD) are not explicitly satisfied by required engineering courses. Students are responsible for satisfying these requirements with general electives.

Engineering

Complete 54 semester hours in engineering as indicated below:

Code	Title	Hours
CHME 2308	Conservation Principles in Chemical Engineering	4
CHME 2310	Transport Processes 1	4
CHME 2320	Chemical Engineering Thermodynamics 1	4
CHME 3312	Transport Processes 2 and Separations	4
CHME 3315	Chemical Engineering Experimental Design 1 (Chem Eng Lab 1)	4
CHME 3322	Chemical Engineering Thermodynamics 2	4
CHME 4315	Chemical Engineering Experimental Design 2 (Chem Eng Lab 2)	4
CHME 4510	Chemical Engineering Kinetics	4
CHME 4512	Chemical Engineering Process Control	4
CHME 4701	Capstone Design 1: Process Analysis	4
CHME 4703	Capstone Design 2: Chemical Process Design	4

Advanced Engineering Elective

Complete one course numbered between 4000 and 5999 in any of the following subject areas:

BIOE, CHME, CIVE, EECE, ME, IE, MEIE, and ENGR

Supplemental Credit

3 semester hours from the following course count toward the engineering requirement:

GE 1501 Cornerstone of Engineering 1

3 semester hours from the following course count toward the engineering requirement:

GE 1502 Cornerstone of Engineering 2

Professional Development

Complete 4 semester hours in professional development as indicated below:

Code	Title	Hours
Professional Development		
GE 1000	Introduction to the Study of Engineering	1
CHME 2000	Introduction to Engineering Co-op Education	1
CHME 3000	Professional Issues in Engineering	1

Additional Required Courses

The remaining credit from the following course will apply to the professional development area:

GE 1501 Cornerstone of Engineering 1

Supporting Courses: Mathematics/Science

Complete 30 semester hours in mathematics and science as indicated below:

Code	Title	Hours
Required Mathematics/Science		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4

MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5

Complete one of the following:

BIOL 1111	General Biology 1
BIOL 1115	General Biology 1 for Engineers
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155

Supplemental Credit

1 semester hour from the following course counts toward the mathematics/science requirement:

GE 1502 Cornerstone of Engineering 2

Supporting Courses: Advanced Science

Complete 14 semester hours in advanced science as indicated below.

Code	Title	Hours
Complete one of the following:		
CHEM 2311 and CHEM 2312 and CHEM 2319	Organic Chemistry 1 and Lab for CHEM 2311 and Recitation for CHEM 2311	5
CHEM 2315 and CHEM 2316 and CHEM 2324	Organic Chemistry 1 for Chemistry Majors and Lab for CHEM 2315 and Recitation for CHEM 2315	5
Complete one of the following:		
CHEM 2313 and CHEM 2314 and CHEM 2320	Organic Chemistry 2 and Lab for CHEM 2313 and Recitation for CHEM 2313	5
CHEM 2317 and CHEM 2318 and CHEM 2325	Organic Chemistry 2 for Chemistry Majors and Lab for CHEM 2317 and Recitation for CHEM 2317	5

Complete one of the following:

BIOL 2301 and BIOL 2302	Genetics and Molecular Biology and Lab for BIOL 2301	4-6
BIOL 2321 and BIOL 2322	Microbiology and Lab for BIOL 2321	
BIOL 2327	Human Parasitology	
BIOL 3611 and BIOL 3612	Biochemistry and Lab for BIOL 3611	
BIOL 3603	Mammalian Systems Physiology	
EEMB 2302 and EEMB 2303	Ecology and Lab for EEMB 2302	
CHEM 2331 and CHEM 2332	Bioanalytical Chemistry and Lab for CHEM 2331	
CHEM 3403 and CHEM 3404	Quantum Chemistry and Spectroscopy and Lab for CHEM 3403	
CHEM 3501	Inorganic Chemistry	
CHEM 4621 and CHEM 4622	Introduction to Chemical Biology and Lab for CHEM 4621	

CHEM 4628 and CHEM 4629	Introduction to Spectroscopy of Organic Compounds and Identification of Organic Compounds
PHYS 2303	Modern Physics
PHYS 3601	Classical Dynamics

Writing Requirements

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

Required General Electives

Code	Title	Hours
Complete six academic, nonremedial, nonrepetitive courses, each equivalent to 4 semester hours.		
		24

Major GPA Requirement

2.000 minimum required in CHME courses

Course Work That Does Not Count Toward the Engineering Degree

Students in engineering are allowed to count a maximum of two pass/fail courses toward their degree program. Only general electives outside the College of Engineering may be taken on a pass/fail grading basis. A maximum of one pass/fail course is allowed per semester.

Program Requirement

134 total semester hours required

Chemical Engineering and Biochemistry, BSCHE

This intercollege combined major serves students who would like to explore their interest in biochemistry while earning the benefit of a Bachelor of Science degree in chemical engineering. The program combines the fundamentals of biochemistry with the engineering skills necessary for scale-up of biochemical processes. Successful graduates will be well-qualified to enter the growing biotechnology industry and be able to converse from the chemistry of organisms to the design of vessels for successful synthesis of cells and pharmaceuticals.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Major GPA Requirement

2.000 minimum required in CHME courses

Mathematics/Science Requirement

Complete 44 semester hours in mathematics and science as indicated below.

Code	Title	Hours
Required Mathematics/Science		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
BIOL 2301 and BIOL 2302	Genetics and Molecular Biology and Lab for BIOL 2301	5
BIOL 3611 and BIOL 3612	Biochemistry and Lab for BIOL 3611	5
BIOL 4707	Cell and Molecular Biology	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5

Advanced Biology Elective

Complete one course in the following range:	4
BIOL 2311 to BIOL 5999	
Supplemental Credit	
1 semester hour from the following course counts toward the mathematics/science requirement:	1
GE 1502	Cornerstone of Engineering 2

Advanced Science Requirement

Complete 23 semester hours in advanced science as indicated below.

Code	Title	Hours
BIOL 1115	General Biology 1 for Engineers	4
CHEM 2311 and CHEM 2312 and CHEM 2319	Organic Chemistry 1 and Lab for CHEM 2311 and Recitation for CHEM 2311	5
CHEM 2313 and CHEM 2314 and CHEM 2320	Organic Chemistry 2 and Lab for CHEM 2313 and Recitation for CHEM 2313	5
CHEM 2331 and CHEM 2332	Bioanalytical Chemistry and Lab for CHEM 2331	5

Advanced Chemistry Elective

Complete one course in the following range:	4
CHEM 2310 to CHEM 5999	

Engineering

Complete 50 semester hours in engineering as indicated below.

Code	Title	Hours
Required Engineering		
CHME 2308	Conservation Principles in Chemical Engineering	4
CHME 2310	Transport Processes 1	4
CHME 2320	Chemical Engineering Thermodynamics 1	4
CHME 3312	Transport Processes 2 and Separations	4
CHME 3315	Chemical Engineering Experimental Design 1	4
CHME 3322	Chemical Engineering Thermodynamics 2	4
CHME 4315	Chemical Engineering Experimental Design 2	4
CHME 4510	Chemical Engineering Kinetics	4
CHME 4512	Chemical Engineering Process Control	4
CHME 4701	Capstone Design 1: Process Analysis	4
CHME 4703	Capstone Design 2: Chemical Process Design	4

Supplemental Credit

3 semester hours from the following course count toward the engineering requirement:	3
GE 1501	Cornerstone of Engineering 1
3 semester hours from the following course count toward the engineering requirement:	3
GE 1502	Cornerstone of Engineering 2

Professional Development

Complete 4 semester hours in professional development as indicated below.

Code	Title	Hours
Professional Development		
GE 1000	Introduction to the Study of Engineering	1
CHME 2000	Introduction to Engineering Co-op Education	1
CHME 3000	Professional Issues in Engineering	1
Additional Required Courses		
The remaining credit from the following course will apply to the professional development area:		1
GE 1501	Cornerstone of Engineering 1	

Additional NUPath Courses

Code	Title	Hours
Writing		
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3307	Advanced Writing in the Sciences	
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

NUPath Requirements Through General Electives

NUPath requirements Interpreting Culture (IC), Societies and Institutions (SI), and Differences and Diversity (DD) are not explicitly satisfied by required engineering courses. Students are responsible for satisfying these requirements with general electives.

Required General Electives

Complete four academic, nonremedial, nonrepetitive courses, each equivalent to 4 semester hours.

Course Work That Does Not Count Toward the Engineering Degree

Students in engineering are allowed to count a maximum of two pass/fail courses toward their degree program. Only general electives outside the College of Engineering may be taken on a pass/fail grading basis. A maximum of one pass/fail course is allowed per semester.

Program Requirement

145 total semester hours required

Chemical Engineering and Physics, BSCH

This intercollege combined major serves students who would like to explore their interest in physics while earning the benefit of a Bachelor of Science degree in chemical engineering. Upon completion, the successful student will understand the fundamental physics behind many chemical-

based processes, resulting in the ability to design and practice in the field of engineering that deals with the movement of mass, heat transfer, and reactions involved in the processing of various materials.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Major GPA Requirement

2.000 minimum required in CHME courses

Mathematics/Science Requirement

Complete 47 semester hours in mathematics and science as indicated below.

Code	Title	Hours
Required Mathematics/Science		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	5
PHYS 2371 and PHYS 2372	Electronics and Lab for PHYS 2371	4
PHYS 3601	Classical Dynamics	4
PHYS 3602	Electricity and Magnetism	4
PHYS 5318	Principles of Experimental Physics	4
Supplemental Credit		
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1502	Cornerstone of Engineering 2	

Advanced Science Requirement

Complete 18 semester hours in advanced chemistry as indicated below.

Code	Title	Hours
CHEM 2311 and CHEM 2312 and CHEM 2319	Organic Chemistry 1 and Lab for CHEM 2311 and Recitation for CHEM 2311	5

PHYS 2303	Modern Physics	4
PHYS 5115	Quantum Mechanics	4
Complete one of the following:		5
CHEM 2313 and CHEM 2314 and CHEM 2320	Organic Chemistry 2 and Lab for CHEM 2313 and Recitation for CHEM 2313	
CHEM 2317 and CHEM 2318 and CHEM 2325	Organic Chemistry 2 for Chemistry Majors and Lab for CHEM 2317 and Recitation for CHEM 2317	

Engineering

Complete 54 semester hours in engineering as indicated below.

Code	Title	Hours
Required Engineering		
PHYS 3600	Advanced Physics Laboratory	4
CHME 2308	Conservation Principles in Chemical Engineering	4
CHME 2310	Transport Processes 1	4
CHME 2320	Chemical Engineering Thermodynamics 1	4
CHME 3312	Transport Processes 2 and Separations	4

Biochemical Engineering, Minor

This minor exposes the student to the fundamentals of chemical engineering. Focus is on the major conservation principles such as the conservation of mass and the conservation of energy, followed by how chemical reactions and processing are governed by these principles.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Note: Courses taken pass/fail cannot be used to fulfill minor requirements.

Required Chemical Engineering Courses

Code	Title	Hours
CHME 2308	Conservation Principles in Chemical Engineering	4
CHME 2310	Transport Processes 1	4
CHME 3312	Transport Processes 2 and Separations	4
CHME 5630	Biochemical Engineering	4

Capstone

Overview

As a leader in research and education, the Department of Civil and Environmental Engineering at Northeastern University prepares undergraduate engineers to excel in their chosen careers,

including engineering practice, academia, infrastructure management, land-use planning and development, urban and regional planning, public sector leadership, and many others.

With a strategic focus in urban engineering, and through a range of teaching and research strengths, anchored by several multidisciplinary, multi-institutional centers and programs, the department prepares future engineers to address the global, complex, and ever-evolving engineering challenges of our time by building on current department strengths and expanding into vital areas. Three overarching themes are emphasized: environmental health, civil infrastructure security, and sustainable resource engineering. These themes are aligned with the department's premier strengths in simulation (both computational and experimental), smart sensing, data and network science, and urban informatics.

Experience tells us that civil and environmental engineering graduates will enter almost every field imaginable. The knowledge and skills acquired—understanding science, critical thinking, effective communication, and understanding the social context, among them—form an excellent foundation for a host of careers, as well as for a fulfilling life outside the world of work.

Our students have an opportunity to obtain a broad knowledge base in science, engineering, and general studies that allows them flexibility in career development and graduate education. At the same time, our graduates should be responsible and scientifically educated citizens, prepared to contribute personally as well as professionally to an educated, democratic society. Our programs have been designed with six general electives that permit students to explore or acquire further depth in other fields of interest. Students can use these electives to earn a minor in architectural engineering, business, architectural history, music, computer science, or any number of other fields.

Mission of the Department

The mission for the Department of Civil and Environmental Engineering is to provide a premier undergraduate and graduate education to help prepare globally oriented civil and environmental engineering leaders; to conduct world-class, use-inspired disciplinary and interdisciplinary research; and to serve a diverse constituency through public service and outreach.

CIVIL ENGINEERING

Civil engineers apply their knowledge of mathematics and sciences to improve and protect the natural environment and to design and create the built environment for community living, industry, and transportation. Civil engineering encompasses several disciplines, including environmental and water resources engineering, transportation planning and engineering, structural engineering, geotechnical engineering, and construction management.

The program educational objectives for the Bachelor of Science in Civil Engineering are as follows:

1. The civil engineering program at Northeastern University prepares graduates to contribute to society as civil engineers and in other professions that benefit from a technical education.
2. Within a few years of graduation, many of our graduates will be working in responsible engineering positions that will qualify them to take the professional engineer (PE) licensure exam, and will prepare them to successfully pursue advanced study in civil engineering and other fields.

ENVIRONMENTAL ENGINEERING

By applying their background in engineering, chemical, biological, and ecological principles, Northeastern's environmental engineering

graduates create, invent, and lead a new generation of engineers who will be able to address key challenges—including developing sustainable resource engineering solutions to environmental health needs with an understanding of institutional and legal frameworks, all related to interconnected challenges in water, energy, air pollution, and waste management—to protect and provide a better quality of life to the human race. Northeastern's program provides graduates with the core skills necessary to practice environmental engineering and to work with other engineers and urban and regional planners in an interdisciplinary environment.

The program educational objectives for the Bachelor of Science in Environmental Engineering are as follows:

1. The environmental engineering program at Northeastern University prepares graduates to contribute to society as environmental engineers and in other professions that benefit from a technical education.
2. Within a few years of graduation, many of our graduates will be working in responsible engineering positions that will qualify them to take the professional engineer (PE) licensure exam, and will prepare them to successfully pursue advanced study in environmental engineering and other fields.

Other Programmatic Features

By participating in our cooperative education program, our graduates will have an opportunity to explore what career objectives fit their own skills and interests. The goal of this component of our program is to offer students valuable professional experience and contacts that will help get them started in their professional career, as well as to develop career management skills. The co-op program parallels the academic program in level of responsibility and sophistication.

The department also offers significant research opportunities throughout all fields of civil and environmental engineering, including participating in research centers based in our department and college, as well as new interdisciplinary graduate and professional master's programs as part of the five-year Bachelor of Science/Master of Science programs.

Programs

Accelerated Programs

See Accelerated Bachelor/Graduate Degree Programs (p. 433)

Civil Engineering, BSCE

Civil engineers play a vital role in human progress and well-being worldwide. Conceptualizing, innovating, designing, and building sustainable infrastructure and environments is fundamental in helping society progress. Modern challenges, including engineering a resilient and sustainable urban infrastructure; establishing clean water and a clean

environment; and advancing technologies in computing, sensing, and human health, are all part of the development of society.

Civil engineers design and construct buildings, bridges, tunnels, dams, and river systems. They also plan, design, construct, and manage highways, railroads, canals, and airports; regulate rivers and control floods; and design and build systems for water distribution and environmental protection.

With a broad range of applications, our civil engineering students have the opportunity to explore a range of disciplinary and interdisciplinary tracks, including environmental and water systems, structural engineering, transportation engineering, geotechnical and geoenvironmental engineering, construction management, civil infrastructure security, environmental health, and sustainable resource engineering.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Major GPA Requirement

2.000 minimum required in major (CIVE) courses

Engineering

Complete 61 semester hours in engineering as indicated below.

Code	Title	Hours
Required Engineering		
CIVE 2221 and CIVE 2222	Statics and Strength of Materials and Recitation for CIVE 2221	4
CIVE 2260 and CIVE 2261	Civil Engineering Materials and Materials and Measurements Lab	5
CIVE 2320 and CIVE 2321	Structural Analysis 1 and Recitation for CIVE 2320	4
CIVE 2324 or CIVE 3425	Reinforced Concrete Design Steel Design	4
CIVE 2331	Fluid Mechanics	4
CIVE 2334	Environmental Engineering 1	4
CIVE 2340 and CIVE 2341	Soil Mechanics and Lab for CIVE 2340	5
GE 3300	Energy Systems: Science, Technology, and Sustainability	4
Civil Engineering Project Elective		
Complete one of the following:		4
CIVE 4534 and CIVE 4535	Environmental Engineering 2 and Lab for CIVE 4534	
CIVE 4542	Foundation Engineering	
CIVE 4554	Highway Engineering	
CIVE 5536	Hydrologic Engineering	

Senior Design Project		
Complete one of the following:		5
CIVE 4765	Senior Design Project—Environmental	
CIVE 4767	Senior Design Project—Structural	
CIVE 4768	Senior Design Project—Transportation	
Civil Engineering Technical Electives		
Complete 11 semester hours from the following:		11
CIVE 2324	Reinforced Concrete Design	
CIVE 3425	Steel Design	
CIVE 3435	Environmental Pollution Fate and Transport	
CIVE 4540	Resource Recovery and Waste Treatment Technologies Abroad	
CIVE 4542	Foundation Engineering	
CIVE 4554	Highway Engineering	
CIVE 4566	Design for Sustainable Transportation: Netherlands	
CIVE 4575	Construction Management	
CIVE 4777	Climate Hazards and Resilient Cities Abroad	
CIVE 4990	Elective	
CIVE 5221	Construction Project Control and Organization	
CIVE 5231	Alternative Project Delivery Systems in Construction	
CIVE 5250	Organic Pollutants in the Environment	
CIVE 5260	Environmental Fluid Mechanics	
CIVE 5261	Dynamic Modeling for Environmental Investment and Policymaking	
CIVE 5271	Solid and Hazardous Waste Management	
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
CIVE 5280	Remote Sensing of the Environment	
CIVE 5300	Environmental Engineering Laboratory	
CIVE 5373	Transportation Systems: Analysis and Planning	
CIVE 5376	Traffic Engineering and Sustainable Urban Street Design	
CIVE 5522	Structural Analysis 2	
CIVE 5525	Prestressed Concrete Design	
CIVE 5536	Hydrologic Engineering	
CIVE 5699	Special Topics in Civil Engineering (Climate Science and Technology Adaptation Policy)	
CIVE 5699	Special Topics in Civil Engineering (Structural Systems)	
CIVE 5699	Special Topics in Civil Engineering (Vibration-based Structural Health Monitoring)	
CIVE 5699	Special Topics in Civil Engineering (Groundwater and Contamination)	
CIVE 5699	Special Topics in Civil Engineering (Coastal Dynamics and Design Practice)	
SBSY 5100	Sustainable Design and Technologies in Construction	

SBSY 5200	Sustainable Engineering Systems for Buildings	
SBSY 5300	Information Systems for Integrated Project Delivery	

Supplemental Credit

3 semester hours from the following course count toward the engineering requirement:

GE 1501	Cornerstone of Engineering 1	3
---------	------------------------------	---

3 semester hours from the following course count toward the engineering requirement:

GE 1502	Cornerstone of Engineering 2	3
---------	------------------------------	---

1 semester hour from the following course counts toward the engineering requirement:

CIVE 3464	Probability and Engineering Economy for Civil Engineering	1
-----------	---	---

Professional Development

Code	Title	Hours
Professional Development		

GE 1000	Introduction to the Study of Engineering	1
---------	--	---

CIVE 2000	Introduction to Engineering Co-op Education	1
-----------	---	---

CIVE 3000	Professional Issues in Engineering	1
-----------	------------------------------------	---

Additional Required Courses

The remaining credit from the following course will apply to the professional development area:

GE 1501	Cornerstone of Engineering 1	1
---------	------------------------------	---

Supporting Courses: Mathematics/Science

Complete 33 semester hours in mathematics and science as indicated below.

Code	Title	Hours
Required Mathematics/Science		

Complete one of the following:

CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
-------------------------	--	---

CHEM 1211 and CHEM 1212 and CHEM 1213	General Chemistry 1 and Lab for CHEM 1211 and Recitation for CHEM 1211	4
---------------------------------------	--	---

CHEM 1214 and CHEM 1215 and CHEM 1216	General Chemistry 2 and Lab for CHEM 1214 and Recitation for CHEM 1214	4
---------------------------------------	--	---

MATH 1341	Calculus 1 for Science and Engineering	4
-----------	--	---

MATH 1342	Calculus 2 for Science and Engineering	4
-----------	--	---

MATH 2321	Calculus 3 for Science and Engineering	4
-----------	--	---

MATH 2341	Differential Equations and Linear Algebra for Engineering	4
-----------	---	---

Complete one of the following:

PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
---------------------------------------	--	---

PHYS 1161 and PHYS 1162 and PHYS 1163	Physics 1 and Lab for PHYS 1161 and Recitation for PHYS 1161	5
---------------------------------------	--	---

Science Elective

Complete one of the following:

BIOL 1111 and BIOL 1112	General Biology 1 and Lab for BIOL 1111	
BIOL 1115 and BIOL 1116	General Biology 1 for Engineers and Lab for BIOL 1115	
BIOL 1117 and BIOL 1118	Integrated Anatomy and Physiology 1 and Lab for BIOL 1117	
BIOL 1121 and BIOL 1122	Basic Microbiology and Lab for BIOL 1121	
BIOL 1141	Microbes and Society	
BIOL 1143	Biology and Society	
CHEM 2311 and CHEM 2312 and CHEM 2319	Organic Chemistry 1 and Lab for CHEM 2311 and Recitation for CHEM 2311	
ENVR 1110	Global Climate Change	
ENVR 1120	Oceans and Coasts	
ENVR 1200	Dynamic Earth	
ENVR 1202	History of Earth and Life	
ENVR 2310	Earth Materials	
ENVR 3418	Geophysics	
ENVR 4515	Sustainable Development	
ENVR 5250	Geology and Land-Use Planning	
PHYS 1111	Astronomy	
PHYS 2303	Modern Physics	
PHYS 2305	Thermodynamics and Statistical Mechanics	
PHYS 3601	Classical Dynamics	
PHYS 4623	Medical Physics	
PHYS 5111	Astrophysics and Cosmology	

Supplemental Credit

3 semester hours from the following course count toward the mathematics/science requirement:

CIVE 3464	Probability and Engineering Economy for Civil Engineering	3
-----------	---	---

1 semester hour from the following course counts toward the mathematics/science requirement:

GE 1502	Cornerstone of Engineering 2	1
---------	------------------------------	---

Supporting Course

Code	Title	Hours
Economics		

ECON 1115 or ECON 1116	Principles of Macroeconomics or Principles of Microeconomics	4
------------------------	--	---

Writing Requirements and NUPath

Code	Title	Hours
Writing		

A grade of C or higher is required:

ENGW 1111	First-Year Writing	4
-----------	--------------------	---

ENGW 3302	Advanced Writing in the Technical Professions	4
-----------	---	---

NUPath Requirements through General Electives

NUPath requirements Interpreting Culture (IC), Societies and Institutions (SI), and Differences and Diversity (DD) are not explicitly satisfied by required engineering courses. Students are responsible for satisfying these requirements with general electives.

Required General Electives

Code	Title	Hours
Complete six academic, nonremedial, nonrepetitive courses, each equivalent to 4 semester hours.		24

Course Work That Does Not Count Toward the Engineering Degree

Students in engineering are allowed to count a maximum of two pass/fail courses toward their degree program. Only general electives outside the College of Engineering may be taken on a pass/fail grading basis. A maximum of one pass/fail course is allowed per semester.

Program Requirement

134 total semester hours required

Plan of Study

Environmental Engineering, BSEnvE

Throughout the world, environmental engineers play a key role in defining the future of sustainable cities and communities. Creating innovations and designing systems that ensure clean and healthy environments are some of the greatest collective challenges of our time. Revolutionary strategies and designs are needed to create symbiosis between our natural and manmade environments.

Using new and advanced technologies, environmental engineers must address the world's growing challenges, including engineering sustainable strategies coupled with the development of devices and tools to better predict and address environmental needs to provide clean environments and planning green infrastructure in conjunction with the natural environment for a changing planet.

With a solid foundation in engineering, chemical, biological, and ecological principles, Northeastern's environmental engineering students learn how to tackle interconnected challenges as they relate to water, energy, air quality, and related fields. Understanding these complex interactions, particularly as they impact our built and natural environments, is embodied in our program through a holistic educational approach.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Major GPA Requirement

2.000 minimum required in major (CIVE) courses

Engineering

Complete 63 semester hours in engineering as indicated below.

Code	Title	Hours
Required Engineering		
CIVE 2221 and CIVE 2222	Statics and Strength of Materials and Recitation for CIVE 2221	4
CIVE 2260 and CIVE 2261	Civil Engineering Materials and Materials and Measurements Lab	5
CIVE 2331	Fluid Mechanics	4

CIVE 2334	Environmental Engineering 1	4
CIVE 3435	Environmental Pollution Fate and Transport	4
CIVE 4534 and CIVE 4535	Environmental Engineering 2 and Lab for CIVE 4534	4
CIVE 4765	Senior Design Project—Environmental	5
CIVE 5300	Environmental Engineering Laboratory	4
GE 3300	Energy Systems: Science, Technology, and Sustainability	4

Environmental Engineering Technical Electives

Complete 12 semester hours from the following:		12
CIVE 4540	Resource Recovery and Waste Treatment Technologies Abroad	
CIVE 5250	Organic Pollutants in the Environment	
CIVE 5260	Environmental Fluid Mechanics	
CIVE 5261	Dynamic Modeling for Environmental Investment and Policymaking	
CIVE 5271	Solid and Hazardous Waste Management	
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
CIVE 5280	Remote Sensing of the Environment	
CIVE 5536	Hydrologic Engineering	
CIVE 5699	Special Topics in Civil Engineering (Groundwater and Contamination)	
CIVE 5699	Special Topics in Civil Engineering (Coastal Dynamic and Design Practice)	
CIVE 5699	Special Topics in Civil Engineering (Climate Science and Technology Adaptation and Policy)	

Supplemental Credit

1 semester hour from the following course counts toward the engineering requirement:		1
CIVE 3464	Probability and Engineering Economy for Civil Engineering	
3 semester hours from the following course count toward the engineering requirement:		3
CIVE 2335	Environmental Engineering Chemistry	
3 semester hours from the following course count toward the engineering requirement:		3
CIVE 3430	Engineering Microbiology and Ecology	
3 semester hours from the following course count toward the engineering requirement:		3
GE 1501	Cornerstone of Engineering 1	
3 semester hours from the following course count toward the engineering requirement:		3
GE 1502	Cornerstone of Engineering 2	

Professional Development

Code	Title	Hours
Professional Development		
GE 1000	Introduction to the Study of Engineering	1
CIVE 2000	Introduction to Engineering Co-op Education	1
CIVE 3000	Professional Issues in Engineering	1

Additional Required Courses

The remaining credit from the following course will apply to the professional development area:		1
GE 1501	Cornerstone of Engineering 1	

Supporting Courses: Mathematics/Science

Complete 35 semester hours in mathematics and science as indicated below.

Code	Title	Hours
Required Mathematics/Science		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5

Science Elective (Earth)

Complete one of the following:		4-5
ENVR 1110	Global Climate Change	
ENVR 1112	Environmental Geology	
ENVR 1120	Oceans and Coasts	
ENVR 1200	Dynamic Earth	
ENVR 1202	History of Earth and Life	
ENVR 2310	Earth Materials	
ENVR 3125	Global Oceanic Change	

Supplemental Credit

3 semester hours from the following course count toward the mathematics/science requirement:		3
CIVE 3464	Probability and Engineering Economy for Civil Engineering	
1 semester hour from the following course counts toward the mathematics/science requirement:		1
CIVE 2335	Environmental Engineering Chemistry	
1 semester hour from the following course counts toward the mathematics/science requirement:		1
CIVE 3430	Engineering Microbiology and Ecology	
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1502	Cornerstone of Engineering 2	

Writing Requirement and NUPATH Courses

Code	Title	Hours
Writing		
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302	Advanced Writing in the Technical Professions	4

NUPATH Requirements through General Electives

NUPath requirements Interpreting Culture (IC), Societies and Institutions (SI), and Differences and Diversity (DD) are not explicitly satisfied by required engineering courses. Students are responsible for satisfying these requirements with general electives.

Required General Electives

Code	Title	Hours
Complete six academic, nonremedial, nonrepetitive courses, each equivalent to 4 semester hours.		24

Course Work That Does Not Count Toward the Engineering Degree

Students in engineering are allowed to count a maximum of two pass/fail courses toward their degree program. Only general electives outside the College of Engineering may be taken on a pass/fail grading basis. A maximum of one pass/fail course is allowed per semester.

Program Requirement

134 total semester hours required

Environmental Engineering and Health Science, BS

This intercollege combined major is designed for students who would like to explore their interest in the health sciences while earning the benefit of a Bachelor of Science degree in environmental engineering. The combined major reflects the respective departmental thrusts in environmental health and sustainable resource engineering to create awareness about the complex relationship between the environment and human health, prepare professionals in this growing area capable of providing engineering solutions to current and emerging topics related to environmental engineering and health sciences, and maintain healthy environmental systems by applying and developing techniques to reduce exposure to health hazards. This program combines the content of two majors to allow students to learn the breadth and depth of the convergence between public health and environmental engineering.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Major GPA Requirement

2.000 minimum required in major (CIVE) courses

Engineering

Complete 65 semester hours in engineering as indicated below.

Code	Title	Hours
Required Engineering		
CIVE 2221 and CIVE 2222	Statics and Strength of Materials and Recitation for CIVE 2221	4
CIVE 2260 and CIVE 2261	Civil Engineering Materials and Materials and Measurements Lab	5
CIVE 2331	Fluid Mechanics	4
CIVE 2334	Environmental Engineering 1	4
CIVE 2335	Environmental Engineering Chemistry	4
CIVE 3430	Engineering Microbiology and Ecology	4
CIVE 3435	Environmental Pollution Fate and Transport	4
CIVE 4534 and CIVE 4535	Environmental Engineering 2 and Lab for CIVE 4534	4
CIVE 4765	Senior Design Project—Environmental	5
CIVE 5300	Environmental Engineering Laboratory	4
GE 3300	Energy Systems: Science, Technology, and Sustainability	4

Environmental Engineering Technical Electives

Complete 12 semester hours from the following:		12
CIVE 5250	Organic Pollutants in the Environment	
CIVE 5260	Environmental Fluid Mechanics	
CIVE 5271	Solid and Hazardous Waste Management	
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
CIVE 5280	Remote Sensing of the Environment	
CIVE 5536	Hydrologic Engineering	
CIVE 5699	Special Topics in Civil Engineering (Groundwater and Contamination)	
CIVE 5699	Special Topics in Civil Engineering (Coastal Dynamic and Design Practice)	
CIVE 5699	Special Topics in Civil Engineering (Climate Science and Technology Adaptation and Policy)	

Supplemental Credit

1 semester hour from the following course counts toward the engineering requirement:	1
--	---

CIVE 3464	Probability and Engineering Economy for Civil Engineering	
3 semester hours from the following course count toward the engineering requirement:		3
GE 1501	Cornerstone of Engineering 1	
3 semester hours from the following course count toward the engineering requirement:		3
GE 1502	Cornerstone of Engineering 2	

Professional Development

Code	Title	Hours
Professional Development		
GE 1000	Introduction to the Study of Engineering	1
CIVE 2000	Introduction to Engineering Co-op Education	1
CIVE 3000	Professional Issues in Engineering	1
Additional Required Courses		
The remaining credit from the following course will apply to the professional development area:		1
GE 1501	Cornerstone of Engineering 1	

Supporting Courses: Mathematics/Science

Complete 33 semester hours in mathematics and science as indicated below.

Code	Title	Hours
Required Mathematics/Science		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
Science Elective (Earth)		
Complete one of the following:		4-5
ENVR 1110	Global Climate Change	
ENVR 1112	Environmental Geology	
ENVR 1120	Oceans and Coasts	
ENVR 1200	Dynamic Earth	
ENVR 1202	History of Earth and Life	
ENVR 2310	Earth Materials	
ENVR 3125	Global Oceanic Change	

Supplemental Credit

3 semester hours from the following course count toward the mathematics/science requirement:		3
CIVE 3464	Probability and Engineering Economy for Civil Engineering	
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1502	Cornerstone of Engineering 2	

Writing Requirement and NUPath Courses

Code	Title	Hours
Writing		
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

NUPath Requirements through General Electives

NUPath requirements Interpreting Culture (IC), Societies and Institutions (SI), and Differences and Diversity (DD) are not explicitly satisfied by required engineering courses. Students are responsible for satisfying these requirements with general electives.

Health Sciences Major Requirement

Code	Title	Hours
HLTH 5450	Healthcare Research	4
PHTH 4120	Global Perspectives on Discrimination and Health	4
PHTH 5214	Environmental Health	3
PHTH 1260	The American Healthcare System	4
PHTH 2210	Foundations of Biostatistics	4
PHTH 2350	Community and Public Health	4
PHTH 2414	Environmental Health	4
PHTH 2515	Healthcare Policy and Administration	4
PHTH 4540	Health Education and Program Planning	4

Integrative Course

Code	Title	Hours
CIVE 4765	Senior Design Project—Environmental	5

Course Work That Does Not Count Toward the Engineering Degree

Students in engineering are allowed to count a maximum of two pass/fail courses toward their degree program. Only general electives outside the College of Engineering may be taken on a pass/fail grading basis. A maximum of one pass/fail course is allowed per semester.

Program Requirement

145 total semester hours required

Plan of Study

Year 1							
Fall	Hours	Spring	Hours	Summer 1	Hours	Summer 2	Hours

Architectural Engineering, Minor

Architectural engineering is a field of engineering that encompasses elements of civil engineering, mechanical engineering, architecture, and related fields to plan, design, and create buildings within the urban environment. It includes the architectural and structural design, mechanical systems design, computational controls and sensing, and sustainable engineering strategies.

The Department of Civil and Environmental Engineering recognizes the importance of interdisciplinary work and of exposing students to the great richness in a classroom of diverse students from multiple majors bringing their own perspectives. The prospect of engineering students in

architecture classes and vice versa stands to benefit all the students, whether or not they are enrolled in the minor.

The minor in architectural engineering opens opportunities for students across the university who are interested in a unique and multidisciplinary approach to the built environment. For engineering students, this minor offers an opportunity to work in the built environment and to better understand architecture, while for architecture students this is an opportunity to acquire the technical knowledge of a course of study in an engineering minor.

A total of 20 semester hours (SH) are required to complete this minor. Students will be required to complete 8 SH of required courses and 12 SH of approved elective courses from several colleges and departments at the university. Students interested in this minor must contact the civil engineering academic advisor in order to declare the minor.

- Audience: This minor in architectural engineering is designed for any major and is open to any undergraduate student at the university.
- Double count no more than two courses with any major or graduate degree requirement, other than general electives.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs and recitations courses where specified.

Required Courses

Code	Title	Hours
CIVE 2221 and CIVE 2222	Statics and Strength of Materials and Recitation for CIVE 2221	4
ARCH 5210 and ARCH 5211	Environmental Systems and Recitation for ARCH 5210	4

Electives

ARCHITECTURE ELECTIVES

Code	Title	Hours
Complete one of the following:		4
ARCH 2330 and ARCH 2331	Architecture, Modernity, and the City, 1800 to 1910 and Recitation for ARCH 2330	
ARCH 2340 and ARCH 2341	Architecture, Modernity, and the City, 1910 to 1980 and Recitation for ARCH 2340	
ARCH 5220	Integrated Building Systems	
LARC 2230	Site Materials and Methods	
LARC 2240	Sustainable Site Construction and Detailing	

ENGINEERING ELECTIVES

Code	Title	Hours
Complete one or two of the following:		8
CIVE 2320 and CIVE 2321	Structural Analysis 1 and Recitation for CIVE 2320	
CIVE 2324	Reinforced Concrete Design	
CIVE 3425	Steel Design	
CIVE 5522	Structural Analysis 2	
CIVE 5699	Special Topics in Civil Engineering (Structural Systems)	

CIVE 5699	Special Topics in Civil Engineering (Vibration-based Structural Health Monitoring)
CIVE 5699	Special Topics in Civil Engineering (Climate Science and Technology Adaptation and Policy)
SBSY 5100	Sustainable Design and Technologies in Construction
SBSY 5200	Sustainable Engineering Systems for Buildings
SBSY 5300	Information Systems for Integrated Project Delivery
If only one course was taken above, complete one course from the following:	
GE 3300	Energy Systems: Science, Technology, and Sustainability
CIVE 2340 and CIVE 2341	Soil Mechanics and Lab for CIVE 2340
CIVE 4542	Foundation Engineering
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure

GPA Requirement

2.000 GPA required in the minor

Civil Engineering, Minor

The minor in civil engineering opens opportunities for students across the university who are interested in gaining knowledge in urban engineering through the core disciplines within the Department of Civil and Environmental Engineering.

A total of 16 semester hours are required to complete this minor. Students interested in this minor must contact the civil and environmental engineering academic advisor in order to declare the minor. This minor is not open to civil engineering or environmental engineering majors.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs and recitations courses where specified.

Required Courses

Code	Title	Hours
Complete four of the following:		16
CIVE 2221	Statics and Strength of Materials	
CIVE 2260 and CIVE 2261	Civil Engineering Materials and Materials and Measurements Lab	
CIVE 2320	Structural Analysis 1	
CIVE 2324	Reinforced Concrete Design	
CIVE 2331	Fluid Mechanics	
CIVE 2334	Environmental Engineering 1	
CIVE 2335	Environmental Engineering Chemistry	
CIVE 2340 and CIVE 2341	Soil Mechanics and Lab for CIVE 2340	
CIVE 3425	Steel Design	
CIVE 3430	Engineering Microbiology and Ecology	
CIVE 3435	Environmental Pollution Fate and Transport	

CIVE 3464	Probability and Engineering Economy for Civil Engineering
CIVE 4534	Environmental Engineering 2
CIVE 4540	Resource Recovery and Waste Treatment Technologies Abroad
CIVE 4542	Foundation Engineering
CIVE 4554	Highway Engineering
CIVE 4566	Design for Sustainable Transportation: Netherlands
CIVE 4575	Construction Management
CIVE 4777	Climate Hazards and Resilient Cities Abroad
CIVE 5271	Solid and Hazardous Waste Management
CIVE 5221 and CIVE 5231	Construction Project Control and Organization and Alternative Project Delivery Systems in Construction
CIVE 5250	Organic Pollutants in the Environment
CIVE 5260	Environmental Fluid Mechanics
CIVE 5261	Dynamic Modeling for Environmental Investment and Policymaking
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure
CIVE 5280	Remote Sensing of the Environment
CIVE 5300	Environmental Engineering Laboratory
CIVE 5373	Transportation Systems: Analysis and Planning
CIVE 5376	Traffic Engineering and Sustainable Urban Street Design
CIVE 5522	Structural Analysis 2
CIVE 5536	Hydrologic Engineering
CIVE 5699	Special Topics in Civil Engineering (Climate Science and Technology Adaptation and Policy)
CIVE 5699	Special Topics in Civil Engineering (Groundwater and Contamination)
CIVE 5699	Special Topics in Civil Engineering (Coastal Dynamics and Design Practice)
CIVE 5699	Special Topics in Civil Engineering (Structural Systems)
CIVE 5699	Special Topics in Civil Engineering (Vibration-based Structural Health Monitoring)
SBSY 5100	Sustainable Design and Technologies in Construction
SBSY 5200	Sustainable Engineering Systems for Buildings
SBSY 5300	Information Systems for Integrated Project Delivery

Electrical and computer engineering (ECE) is a discipline that prepares graduates to solve problems across a diverse array of industries. Course work is drawn from a curriculum that includes cutting-edge ECE technologies: embedded systems and internet of things, robotics and cyber-human systems, networking (mobile/wireless as well as the internet of the future), and big data analytics and machine learning. Northeastern's historic strengths in ECE include communications and digital signal processing, power and control systems, power electronics, RF/microwave magnetic materials, device technologies, computer engineering, networking, and robotics. The Department of Electrical and Computer Engineering is deeply committed to training and educating the next generation of electrical and computer engineers through Northeastern's experiential learning model and comprehensive pedagogy. BS, MS, and PhD degrees are offered in both electrical and computer engineering.

Mission of the Department

The primary educational missions of the Department of Electrical and Computer Engineering are to educate undergraduate students so they have the opportunity to obtain successful careers in electrical and computer engineering and related disciplines and pursue advanced study, such as graduate study in engineering or related disciplines, and to educate graduate students so they can make meaningful contributions to the research and industrial communities.

Overview of Programs Offered

Please see the programs tab (p. 398) for a list of the department's academic programs.

Successful engineers need to organize and adapt information to solve problems. They also must work effectively in teams and communicate well. Therefore, the goal of the electrical engineering and computer engineering programs is to help students develop these skills and provide the appropriate technical background for a successful career. The program educational objectives of the Bachelor of Science programs are that graduates should:

1. Obtain successful careers in electrical and computer engineering and related disciplines through substantial technical contributions, continued employment, professional recognition, advancement in responsibilities, a professional network, and personal satisfaction.
2. Pursue advanced study such as graduate study in engineering or related disciplines, if desired.

The curricula are continuously assessed to ensure that graduates can achieve these goals and go on to succeed as professional electrical or computer engineers. The Bachelor of Science programs allow students sufficient flexibility within the standard eight academic semesters to earn a minor in nearly any department in the university. Typical minors might include physics, math, computer science, or business, but students might also organize their course of study to earn a minor in economics, English, or music.

The academic program is supported by extensive laboratory facilities for study and experimentation in computing, circuit analysis, electronics, digital systems, microwaves, control systems, semiconductor processing, very large-scale integration (VLSI) design, and digital signal processing. Students have access to state-of-the-art computing facilities, including numerous Linux and Windows-based workstations. Many courses are taught in one of the four computer-based teaching classrooms. Two introductory electrical and computer engineering courses meet in integrated lab-classrooms where students and professors, assisted by undergraduate and graduate teaching assistants, work together on both theoretical and practical aspects of a wide range of signal processing and computing systems.

Other Programmatic Features

More than 90 percent of department undergraduates take advantage of the cooperative education program. During the cooperative work phase of the program, the students' levels of responsibility grow as they gain theoretical and technical knowledge through academic work. A sophomore might begin cooperative work experience as an engineering assistant and progress by the senior year to a position with responsibilities similar to those of entry-level engineers.

The department also offers significant research opportunities throughout all fields of electrical and computer engineering, including participating in research centers based in our department and college.

A senior-year design course caps the education by drawing on everything learned previously. Teams of students propose, design, and build a functioning electrical or computer engineering system—just as they might in actual practice.

Programs

Bachelor of Science in Computer Engineering (BSCompE)

- Computer Engineering (p. 399)
- Computer Engineering and Physics (p. 402)
- Computer Engineering and Computer Science (p. 290)

Bachelor of Science in Electrical Engineering (BSEE)

- Electrical Engineering (p. 408)
- Electrical Engineering and Physics (p. 411)
- Electrical Engineering and Music with Concentration in Music Technology (p. 414)

Combined Major (BSEE or BSCompE)

- Electrical and Computer Engineering (p. 415)

Minors

- Biomedical Engineering (p. 418)
- Computer Engineering (p. 419)
- Computational Data Analytics (p. 419)
- Electrical Engineering (p. 420)
- Robotics (p. 420)

Accelerated Programs

See Accelerated Bachelor/Graduate Degree Programs (p. 433)

Computer Engineering, BSCompE

The use of computer technology is exploding, driven by applications in wireless communications, multimedia, portable devices, and internet computing. At the core of these technological advances are computer engineers who research, design, and develop hardware and software. With a degree in computer engineering you might develop a full-featured multimedia phone, design the next-generation microprocessor, program computer-guided cameras to inspect nanomanufacturing facilities, or start your own software company.

The computer engineering major acquires a strong foundation in engineering principles and the physical sciences in addition to a powerful mix of theory and practice in hardware and software design. The core of the computer engineering curriculum comprises courses in computer organization and architecture, computer networks, computer-aided design, programming languages, optimization theory, and software design.

The BSCompE degree requires a sequence of core courses, technical electives, general electives, and electives in the arts and humanities and social sciences.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

NUPath requirements Interpreting Culture (IC), Societies and Institutions (SI), and Differences and Diversity (DD) are not explicitly satisfied by required engineering courses. Students are responsible for satisfying these requirements and, if these are not fulfilled in engineering courses, should use general electives to do so.

Major GPA Requirement

2.000 minimum GPA required in EECE courses

Engineering

Complete 56 semester hours in engineering as indicated below.

Code	Title	Hours
Required Courses		
EECE 2150	Circuits and Signals: Biomedical Applications	5
EECE 2160	Embedded Design: Enabling Robotics	4
Computer Engineering Fundamentals		
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	5

EECE 2540	Fundamentals of Networks	4
EECE 2560	Fundamentals of Engineering Algorithms	4

Electrical Engineering Fundamentals

If more than one electrical engineering fundamentals course is taken, it can count as a technical elective.

Complete one of the following: 4-5

EECE 2412 and EECE 2413	Fundamentals of Electronics and Lab for EECE 2412	
EECE 2520	Fundamentals of Linear Systems	
EECE 2530 and EECE 2531	Fundamentals of Electromagnetics and Lab for EECE 2530	

Capstone Courses

EECE 4790	Electrical and Computer Engineering Capstone 1	4
EECE 4792	Electrical and Computer Engineering Capstone 2	4

EECE Technical Electives

Two CS courses from the following approved list may be taken toward the EECE technical elective requirement.

Complete four of the following: 16

EECE 2750	Enabling Engineering	
EECE 4991	Research	
EECE 4992	Directed Study	
EECE 4993	Independent Study	
GE 4608	Nanotechnology in Engineering	
ENGR 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
EECE 2412 to EECE 2530		
EECE 3324 to EECE 4698		
EECE 5155 to EECE 5698		
CS 2550	Foundations of Cybersecurity	
CS 3200	Database Design	
CS 3500	Object-Oriented Design	
CS 4850	Building Game Engines	
CS 3540 to CS 3800		
CS 4100 to CS 4770		
IS 4200 to IS 4700		

Supplemental Credit

3 semester hours from the following course count toward the engineering requirement: 3

GE 1501	Cornerstone of Engineering 1	
3 semester hours from the following course count toward the engineering requirement: 3		
GE 1502	Cornerstone of Engineering 2	

Professional Development

Code	Title	Hours
Required Professional Development		
GE 1000	Introduction to the Study of Engineering	1
EECE 2000	Introduction to Engineering Co-op Education	1
EECE 3000	Professional Issues in Engineering	1

Additional Required Courses

Complete 35 semester hours in mathematics and science as indicated below.

Code	Title	Hours
Required Mathematics/Science		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 3081	Probability and Statistics	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	5

1 semester hour from the following course counts toward the mathematics/science requirement:

GE 1502 Cornerstone of Engineering 2

Code	Title	Hours
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

Code	Title	Hours
	Complete seven academic, nonremedial, nonrepetitive courses, each equivalent to 4 semester hours.	28

Students in engineering are allowed to count a maximum of two pass/fail courses toward their degree program. Only general electives outside the College of Engineering may be taken on a pass/fail grading basis. A maximum of one pass/fail course is allowed per semester.

Computer Engineering and Physics, BSCompE

This intercollege dual major serves students who would like to explore their interest in physics while earning the benefit of an accredited Bachelor of Science degree in engineering. The dual major combines a major in physics from the Department of Physics in the College of Arts and Sciences with the Bachelor of Science in Computer Engineering degree from the Department of Electrical and Computer Engineering.

Because of the large body of shared knowledge between computer engineering and physics, an integrated dual major between these two disciplines is a logical course of study and can be accomplished within a student's usual five-year program (including three co-op placements) without requiring course overloading in any semester. A student graduating from this program will have studied both the physical fundamentals and computer systems.

Students interested in this program should contact the Department of Electrical and Computer Engineering or the Department of Physics as early as possible, preferably prior to registering for freshman courses.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Major GPA Requirement

2.000 minimum GPA required in EECE courses

Engineering

Complete 48 semester hours in engineering as indicated below.

Code	Title	Hours
Required Courses		
EECE 2150	Circuits and Signals: Biomedical Applications	5
EECE 2160	Embedded Design: Enabling Robotics	4
Computer Engineering Fundamentals		
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	5
EECE 2540	Fundamentals of Networks	4
EECE 2560	Fundamentals of Engineering Algorithms	4
Electrical Engineering Fundamentals		
If more than one electrical engineering fundamentals course is taken, it can count as a technical elective.		
Complete one of the following:		4
EECE 2412 and EECE 2413	Fundamentals of Electronics and Lab for EECE 2412	
EECE 2520	Fundamentals of Linear Systems	
EECE 2530 and EECE 2531	Fundamentals of Electromagnetics and Lab for EECE 2530	
Capstone Courses		
EECE 4790	Electrical and Computer Engineering Capstone 1	4
EECE 4792	Electrical and Computer Engineering Capstone 2	4
Technical Electives		
One CS course from the following approved list may be taken toward the EECE technical elective requirement:		8
EECE 2750	Enabling Engineering	
EECE 4991	Research	
EECE 4992	Directed Study	
EECE 4993	Independent Study	
EECE 2412 to EECE 2530		
EECE 3324 to EECE 4698		
EECE 5155 to EECE 5698		
ENGR 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
GE 4608	Nanotechnology in Engineering	
CS 2550	Foundations of Cybersecurity	
CS 3200	Database Design	
CS 3500	Object-Oriented Design	
CS 4850	Building Game Engines	

CS 3540 to CS 3800	
CS 4100 to CS 4770	
IS 4200 to IS 4700	
Supplemental Credit	
3 semester hours from the following course count toward the engineering requirement:	3
GE 1501	Cornerstone of Engineering 1
3 semester hours from the following course count toward the engineering requirement:	3
GE 1502	Cornerstone of Engineering 2

Mathematics/Science

Complete 63 semester hours in mathematics and science as indicated below.

Code	Title	Hours
Required Mathematics/Science		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 3081	Probability and Statistics	4
Complete one of the following:		5
PHYS 1161 and PHYS 1162	Physics 1 and Lab for PHYS 1161	
PHYS 1151 and PHYS 1152	Physics for Engineering 1 and Lab for PHYS 1151	
PHYS 1153	and Interactive Learning Seminar for PHYS 1151	
Complete one of the following:		5
PHYS 1165 and PHYS 1166	Physics 2 and Lab for PHYS 1165	
PHYS 1155 and PHYS 1156	Physics for Engineering 2 and Lab for PHYS 1155	
PHYS 1157	and Interactive Learning Seminar for PHYS 1155	
PHYS 2303	Modern Physics	4
PHYS 2305	Thermodynamics and Statistical Mechanics	4
PHYS 3600	Advanced Physics Laboratory	4
PHYS 3602	Electricity and Magnetism	4
PHYS 5115	Quantum Mechanics	4
Advanced Physics Elective		
Complete one of the following:		4
MATH 4606	Mathematical and Computational Methods for Physics	
PHYS 3600 to PHYS 7999		
Supplemental Credit		
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1502	Cornerstone of Engineering 2	

Professional Development

Code	Title	Hours
Required Professional Development		
GE 1000	Introduction to the Study of Engineering	1
EECE 2000	Introduction to Engineering Co-op Education	1
EECE 3000	Professional Issues in Engineering	1
Additional Required Courses		
One credit hour from the following course counts toward the engineering requirement:		1
GE 1501	Cornerstone of Engineering 1	

Integrative Requirement

The following course, which counts toward the engineering requirement above, is an integrative course:

Code	Title	Hours
EECE 4790	Electrical and Computer Engineering Capstone 1	4

Writing Requirement and NUpath Courses

Code	Title	Hours
Writing		
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	
NUpath Requirements through General Electives		
NUpath requirements Interpreting Culture (IC), Societies and Institutions (SI), and Differences and Diversity (DD) are not explicitly satisfied by required engineering courses. Students are responsible for satisfying these requirements through general electives.		

Required General Electives

Complete two academic, nonremedial, nonrepetitive courses, each equivalent to 4 semester hours.

Course Work That Does Not Count Toward the Engineering Degree

Students in engineering are allowed to count a maximum of two pass/fail courses toward their degree program. Only general electives outside the College of Engineering may be taken on a pass/fail grading basis. A maximum of one pass/fail course is allowed per semester.

Program Requirement

132 total semester hours required

Plan of Study

Computer Engineering and Computer Science, BSCompE

This intercollege dual major serves students who are interested in both computer hardware and software, combining an accredited Bachelor of Science degree in engineering with the added benefits of depth in software principles found in a Bachelor of Science degree in computer science. This program provides a well-rounded computing education that includes engineering design principles, computational thinking, proper program design, and a solid background in mathematics and science. The degree is fully accredited as a Bachelor of Science in Computer Engineering and adds the computer science depth.

Because of the large body of shared knowledge between computer engineering and computer science, an integrated dual major between these two disciplines is a logical course of study and can be accomplished within a student's usual five-year program (including three co-op placements) without requiring course overloading in any semester. A student graduating from this program will have a solid foundation in both computer hardware and software principles, and should be prepared for a wide range of career paths in the computing field or any related field that relies on the application of engineering or computing principles.

Students interested in this program should contact the Department of Electrical and Computer Engineering or the Department of Computer and Information Science as early as possible, preferably prior to registering for freshman courses.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Major GPA Requirement

2.000 minimum GPA in EECE courses

Engineering

Complete 48 semester hours in engineering as indicated below.

Code	Title	Hours
Required Courses		
EECE 2150	Circuits and Signals: Biomedical Applications	5
EECE 2160	Embedded Design: Enabling Robotics	4
Computer Engineering Fundamentals		

EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	5
EECE 2540	Fundamentals of Networks	4
CS 3000	Algorithms and Data	4

Electrical Engineering Fundamentals

Complete one of the following: 4

EECE 2412 and EECE 2413	Fundamentals of Electronics and Lab for EECE 2412
EECE 2520	Fundamentals of Linear Systems
EECE 2530 and EECE 2531	Fundamentals of Electromagnetics and Lab for EECE 2530

Capstone Courses

EECE 4790	Electrical and Computer Engineering Capstone 1	4
EECE 4792	Electrical and Computer Engineering Capstone 2	4

EECE Technical Electives

Complete two of the following: 8

EECE 2750	Enabling Engineering
EECE 4991	Research
EECE 4992	Directed Study
EECE 4993	Independent Study
GE 4608	Nanotechnology in Engineering
ENGR 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage

EECE 2412 to EECE 2530
EECE 3324 to EECE 4698
EECE 5155 to EECE 5698

CS/IS Technical Electives 8

Complete two of the following:

CS 2550	Foundations of Cybersecurity
CS 3200	Database Design
CS 3540	Game Programming
CS 3700	Networks and Distributed Systems
CS 3740	Systems Security
CS 3800	Theory of Computation
CS 4850	Building Game Engines
CS 4100 to CS 4410	
CS 4510 to CS 4650	
CS 4740 to CS 4760	
IS 4200 to IS 4700	

Supplemental Credit

3 semester hours from the following course count toward the engineering requirement: 3

GE 1501	Cornerstone of Engineering 1
3 semester hours from the following course count toward the engineering requirement: 3	
GE 1502	Cornerstone of Engineering 2

Computer Science Requirements

Code	Title	Hours
Computer Science Introductory Courses		
CS 2500 and CS 2501	Fundamentals of Computer Science 1 and Lab for CS 2500	5

CS 2510 and CS 2511	Fundamentals of Computer Science 2 and Lab for CS 2510	5
CS 2800 and CS 2801	Logic and Computation and Lab for CS 2800	5
Computer Science Upper-Level Courses		
CS 3500	Object-Oriented Design	4
CS 3650	Computer Systems	4
CS 4500 and CS 4501	Software Development and Recitation for CS 4500	4

Professional Development

Code	Title	Hours
Required Professional Development		
GE 1000	Introduction to the Study of Engineering	1
EECE 2000	Introduction to Engineering Co-op Education	1
EECE 3000	Professional Issues in Engineering	1
Additional Required Courses		
The remaining credit from the following course will apply to the professional development area:		1
GE 1501	Cornerstone of Engineering 1	

Integrative Courses

The following courses are taken in the major and count toward the integrative requirement:

Code	Title	Hours
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 3081	Probability and Statistics	4
CS 1800	Discrete Structures	4
PHYS 1151 and PHYS 1152	Physics for Engineering 1 and Lab for PHYS 1151	4
EECE 4790	Electrical and Computer Engineering Capstone 1	4
EECE 4792	Electrical and Computer Engineering Capstone 2	4

Supporting Courses: Mathematics/Science

Complete 35 semester hours in mathematics and science as indicated below.

Code	Title	Hours
Required Mathematics/Science		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
MATH 3081	Probability and Statistics	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5

PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	5
---	--	---

Supplemental Credit		
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1502	Cornerstone of Engineering 2	

Writing Requirements and NUpath Courses

Code	Title	Hours
Writing		
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4

Electrical Engineering, BSEE

The components of the Information Age—global communication systems; computers and computer chips, and the software that runs them; as well as pacemakers, magnetic resonance imaging, and interplanetary space missions—are possible because of the efforts of electrical engineers. Today, electrical engineers are developing concepts and working to translate these ideas into the next generation of products, from computers and safe, energy-efficient vehicles, to radar that can detect unexploded land mines from the air, to microrobots that diagnose disease from inside the body.

Many electrical engineers work in the traditional areas of communications, computation, and control and components required to realize such systems. They are involved in design and product development, testing and quality control, sales and marketing, and manufacturing. Others use their problem-solving skills in diverse areas such as bioengineering, healthcare, electronic music, meteorology, and experimental psychology. Some graduates draw on their electrical engineering backgrounds to launch successful careers as physicians, financial analysts, attorneys, and entrepreneurs.

The BSEE degree requires a sequence of core courses and advanced study in one or more technical elective areas: electronic circuits and devices; signals and systems; fields, waves, and optics; power engineering; or computer engineering. General electives and electives in the arts and humanities and social sciences are also required.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Major GPA Requirement

Minimum 2.000 GPA required in EECE courses

Engineering

Complete 59 semester hours in engineering as indicated below.

Code	Title	Hours
Required Courses		
EECE 2150	Circuits and Signals: Biomedical Applications	5
EECE 2160	Embedded Design: Enabling Robotics	4
Electrical Engineering Fundamentals		
EECE 2412 and EECE 2413	Fundamentals of Electronics and Lab for EECE 2412	5
EECE 2520	Fundamentals of Linear Systems	4
EECE 2530 and EECE 2531	Fundamentals of Electromagnetics and Lab for EECE 2530	5
Computer Engineering Fundamentals		
If more than one computer engineering fundamentals course is taken, it can count as a technical elective.		
Complete one of the following:		4-5
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	
EECE 2540	Fundamentals of Networks	
EECE 2560	Fundamentals of Engineering Algorithms	
Capstone Courses		
EECE 4790	Electrical and Computer Engineering Capstone 1	4
EECE 4792	Electrical and Computer Engineering Capstone 2	4
Electrical Engineering Technical Electives		
Complete four of the following:		16
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	
EECE 4991	Research	
EECE 4992	Directed Study	
EECE 4993	Independent Study	
ENGR 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
GE 4608	Nanotechnology in Engineering	
EECE 2540 to EECE 2750		
EECE 3324 to EECE 3410		
EECE 4512 to EECE 4698		
EECE 5155 to EECE 5698		
Supplemental Credit		
2 semester hours from the following course count toward the engineering requirement:		2
EECE 3468	Noise and Stochastic Processes	
3 semester hours from the following course count toward the engineering requirement:		3
GE 1501	Cornerstone of Engineering 1	
3 semester hours from the following course count toward the engineering requirement:		3

GE 1502	Cornerstone of Engineering 2	
Total Hours		59-60

Professional Development

Code	Title	Hours
Professional Development		
GE 1000	Introduction to the Study of Engineering	1
EECE 2000	Introduction to Engineering Co-op Education	1
EECE 3000	Professional Issues in Engineering	1

Additional Required Courses

The remaining credit from the following course will apply to the professional development area:	1
GE 1501	Cornerstone of Engineering 1

Supporting Courses: Mathematics/Science

Complete 33 semester hours in mathematics and science as indicated below:

Code	Title	Hours
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	5

Supplemental Credit

2 semester hours from the following course count toward the mathematics/science requirement:

EECE 3468	Noise and Stochastic Processes	2
-----------	--------------------------------	---

1 semester hour from the following course counts toward the mathematics/science requirement:

GE 1502	Cornerstone of Engineering 2	1
---------	------------------------------	---

Writing Requirement and NUPath Courses

Code	Title	Hours
Writing		
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

NUPath Requirements through Open Electives

NUPath requirements Interpreting Culture (IC), Societies and Institutions (SI), and Differences and Diversity (DD) are not explicitly satisfied by required engineering courses. Students are responsible for satisfying these requirements with general electives.

Required General Electives

Code	Title	Hours
Complete seven academic, nonremedial, nonrepetitive courses, each equivalent to 4 semester hours.		28

Course Work That Does Not Count Toward the Engineering Degree

Students in engineering are allowed to count a maximum of two pass/fail courses toward their degree program. Only general electives outside the College of Engineering may be taken on a pass/fail grading basis. A maximum of one pass/fail course is allowed per semester.

Program Requirement

132 total semester hours required

Plan of Study

Four Years, Two Co-ops in Summer 2/Fall

Year 1								
Fall	Hours	Spring	Hours	Summer 1	Hours	Summer 2	Hours	
MATH 1341 (FQ)	4	MATH 1342 (FQ)	4	General elective		4	Vacation	0

Electrical Engineering and Physics, BSEE

This intercollege combined major serves students who would like to explore their interest in physics while earning the benefit of an accredited Bachelor of Science degree in engineering. The major combines a major in physics from the Department of Physics in the College of Science with the Bachelor of Science in Electrical Engineering degree from the Department of Electrical and Computer Engineering.

Because of the large body of shared knowledge between electrical engineering and physics, a combined major between these two

disciplines is a logical course of study and can be accomplished within a student's usual five-year program (including three co-op placements) without requiring course overloading in any semester. A student graduating from this program will have studied both the physical fundamentals and the applications of electronic devices and systems. The program is a particularly appropriate course of study for students who wish to pursue a career in solid-state devices, microelectromechanical systems, or nanotechnology.

Students interested in this program should contact the Department of Electrical and Computer Engineering or the Department of Physics as early as possible, preferably prior to registering for freshman courses.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Major GPA Requirement

2.000 minimum GPA required in EECE courses

Engineering

Complete 51 semester hours in engineering as indicated below.

Code	Title	Hours
Required Courses		
EECE 2150	Circuits and Signals: Biomedical Applications	5
EECE 2160	Embedded Design: Enabling Robotics	4
Electrical Engineering Fundamentals		
EECE 2412 and EECE 2413	Fundamentals of Electronics and Lab for EECE 2412	5
EECE 2520	Fundamentals of Linear Systems	4
EECE 2530 and EECE 2531	Fundamentals of Electromagnetics and Lab for EECE 2530	5
Computer Engineering Fundamentals		
If more than one computer engineering fundamentals course is taken, it can count as a technical elective.		
Complete one of the following:		4-5
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	
EECE 2540	Fundamentals of Networks	
EECE 2560	Fundamentals of Engineering Algorithms	
Capstone Courses		
EECE 4790	Electrical and Computer Engineering Capstone 1	4
EECE 4792	Electrical and Computer Engineering Capstone 2	4
EECE Technical Electives		

Complete two of the following:		8-9
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	
EECE 4991	Research	
EECE 4992	Directed Study	
EECE 4993	Independent Study	
ENGR 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
GE 4608	Nanotechnology in Engineering	
EECE 2540 to EECE 2750		
EECE 3324 to EECE 3410		
EECE 4512 to EECE 4698		
EECE 5155 to EECE 5698		

Supplemental Credit

2 semester hours from the following course count toward the engineering requirement:	2
EECE 3468	Noise and Stochastic Processes
3 semester hours from the following course count toward the engineering requirement:	3
GE 1501	Cornerstone of Engineering 1
3 semester hours from the following course count toward the engineering requirement:	3
GE 1502	Cornerstone of Engineering 2

Professional Development

Code	Title	Hours
Required Professional Development		
GE 1000	Introduction to the Study of Engineering	1
EECE 2000	Introduction to Engineering Co-op Education	1
EECE 3000	Professional Issues in Engineering	1
Additional Required Courses		
The remaining credit from the following course will apply to the professional development area:		1
GE 1501	Cornerstone of Engineering 1	

Mathematics/Science

Complete 57 semester hours in mathematics and science as indicated below.

Code	Title	Hours
Required Mathematics/Science		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
Complete one of the following:		5
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	
PHYS 1161 and PHYS 1162	Physics 1 and Lab for PHYS 1161	

Complete one of the following:		5
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	
PHYS 1165 and PHYS 1166	Physics 2 and Lab for PHYS 1165	
PHYS 2303	Modern Physics	4
PHYS 2305	Thermodynamics and Statistical Mechanics	4
PHYS 3600	Advanced Physics Laboratory	4
PHYS 3602	Electricity and Magnetism	4
PHYS 5115	Quantum Mechanics	4
Advanced Physics Elective		
Complete one of the following:		4
MATH 4606	Mathematical and Computational Methods for Physics	
PHYS 3600 to PHYS 7999		
Supplemental Credit		
2 semester hours from the following course count toward the mathematics/science requirement:		2
EECE 3468	Noise and Stochastic Processes	
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1502	Cornerstone of Engineering 2	

Writing Requirement and NUPath Courses

Code	Title	Hours
Writing		
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

NUPath Requirements through General Electives

NUPath requirements Interpreting Culture (IC), Societies and Institutions (SI), and Differences and Diversity (DD) are not explicitly satisfied by required engineering courses. Students are responsible for satisfying these requirements with general electives.

Required General Electives

Code	Title	Hours
Complete three academic, nonremedial, nonrepetitive courses, each equivalent to 4 semester hours.		12

Course Work That Does Not Count Toward the Engineering Degree

Students in engineering are allowed to count a maximum of two pass/fail courses toward their degree program. Only general electives outside the College of Engineering may be taken on a pass/fail grading basis. A maximum of one pass/fail course is allowed per semester.

Program Requirement

132 total semester hours required

Electrical Engineering and Music with concentration in Music Technology, BSEE

This intercollege combined major is designed for students who would like to explore their interest in music technology while earning the benefit of a Bachelor of Science degree in electrical engineering. The music industry relies heavily on electronic technology in the production (e.g., electronic musical instruments and performance/recording technology), storage (e.g., mp3 and other file storage formats), and distribution (e.g., streaming services) of music. The program combines the content of two majors to allow students to learn the breadth and depth of the convergence between electrical engineering and music technology.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Major GPA Requirement

Minimum 2.000 GPA required in EECE courses

Engineering Requirements

Complete 51 semester hours in engineering as indicated below.

Code	Title	Hours
Required Courses		
EECE 2150	Circuits and Signals: Biomedical Applications	5
EECE 2160	Embedded Design: Enabling Robotics	4
Electrical Engineering Fundamentals		
EECE 2412 and EECE 2413	Fundamentals of Electronics and Lab for EECE 2412	5
EECE 2520	Fundamentals of Linear Systems	4
EECE 2530 and EECE 2531	Fundamentals of Electromagnetics and Lab for EECE 2530	5
Computer Engineering Fundamentals		

Complete one of the following. If more than one computer engineering fundamentals course is taken, it may count as a technical elective:

4-5

EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322
EECE 2540	Fundamentals of Networks
EECE 2560	Fundamentals of Engineering Algorithms

Capstone Courses

EECE 4790	Electrical and Computer Engineering Capstone 1	4
EECE 4792	Electrical and Computer Engineering Capstone 2	4

Technical Electives

Complete two of the following. If EECE 5697 is taken, students are required to complete a music elective.

8

EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322
EECE 4993	Independent Study
EECE 4991	Research
ENGR 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage
EECE 4992	Directed Study
GE 4608	Nanotechnology in Engineering
EECE 2540	Fundamentals of Networks
EECE 2750	Enabling Engineering
EECE 3324	Computer Architecture and Organization
EECE 3410	Electronics 2
EECE 4512	Biomedical Electronics
EECE 5155	Wireless Sensor Networks and the Internet of Things
EECE 5698	Special Topics in Electrical and Computer Engineering

Supplemental Credit

3 semester hours from the following course count toward the engineering requirement:

3

GE 1501	Cornerstone of Engineering 1
---------	------------------------------

2 semester hours from the following course count toward the engineering requirement:

2

EECE 3468	Noise and Stochastic Processes
-----------	--------------------------------

3 semester hours from the following course count toward the engineering requirement:

3

GE 1502	Cornerstone of Engineering 2
---------	------------------------------

Professional Development

Code	Title	Hours
GE 1000	Introduction to the Study of Engineering	1
EECE 2000	Introduction to Engineering Co-op Education	1
EECE 3000	Professional Issues in Engineering	1
Required course with additional credit not used in the engineering requirement above:		1
GE 1501	Cornerstone of Engineering 1	

Supporting Courses: Mathematics/Science

Complete 33 semester hours in mathematics and science as indicated below:

Code	Title	Hours
CHEM 1151	General Chemistry for Engineers	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	5
2 semester hours from the following course count toward this requirement:		2
EECE 3468	Noise and Stochastic Processes	
Supplemental Credit		
1 semester hour from the following course count toward this requirement:		1
GE 1502	Cornerstone of Engineering 2	

Music Requirements

Code	Title	Hours
Music Theory		
MUSC 1201	Music Theory 1	4
MUSC 1202	Music Theory 2	4
Required Context Course		
MUSC 1001	Music in Everyday Life	4
Music in Context		
Complete one of the following:		4
MUSC 2101	Black Popular Music	
MUSC 2310	Popular Music Since 1945	
MUSC 2315	History of Electronic Music	
MUSC 2317	Punk Rock	
MUSC 2320	40,000 Years of Music Technology	
MUSC 2340	Divas, DJs, and Double Standards	
MUSC 2351	Music, Sound, and the Screen	
MUSC 3560	Topics in Music since 1900	
MUSI 3401	Hip Hop in the Music Industry	
Acoustics or Music Elective		
Complete one of the following. If EECE 5697 is taken, students are required to complete a music elective.		4
MUSC 2350	Acoustics and Psychoacoustics of Music	
MUSC 2000 to MUSC 5999		
Music Technology		
MUST 1220	Introduction to Music Technology	4
MUST 2431	Computer Music Fundamentals	4
Music Technology Electives		
Complete two of the following:		8

MUST 4520	Interactive Music Programming
MUST 4610	Composition for Electronic Instruments
MUST 3540	Special Topics in Music Technology

Writing Requirement and Additional NUPath Courses

A grade of C or higher is required in both First-Year Writing and Advanced Writing in the Disciplines.

Code	Title	Hours
Writing		
ENGW 1111	First-Year Writing	4
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

NUPath Requirements through Open Electives

NUPath requirements Interpreting Culture (IC), Societies and Institutions (SI), and Differences and Diversity (DD) are not explicitly satisfied by required engineering courses. Students are responsible for satisfying these requirements with general electives.

Required General Electives

Code	Title	Hours
Complete one academic, nonremedial, nonrepetitive course, equivalent to 4 semester hours.		4

Course Work That Does Not Count Toward the Engineering Degree

Students in engineering are allowed to count a maximum of two pass/fail courses toward their degree program. Only general electives outside the College of Engineering may be taken on a pass/fail grading basis. A maximum of one pass/fail course is allowed per semester.

Program Requirement

136 total semester hours required

Electrical and Computer Engineering, BSEE or BSCompE

Students may choose to major in both electrical and computer engineering by following the combined-major program leading to a Bachelor of Science in Electrical Engineering or Bachelor of Science in Computer Engineering. Students take the required courses for both majors along with technical electives distributed among the areas of computer engineering; fields, waves, and optics; signals and systems; power engineering; and electronic circuits and devices. Additional NUPath requirements must be fulfilled using general electives.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Engineering

Complete 68 semester hours in engineering as indicated below.

Code	Title	Hours
Required Courses		
EECE 2150	Circuits and Signals: Biomedical Applications	5
EECE 2160	Embedded Design: Enabling Robotics	4
Electrical Engineering Fundamentals		
EECE 2412 and EECE 2413	Fundamentals of Electronics and Lab for EECE 2412	5
EECE 2520	Fundamentals of Linear Systems	4
EECE 2530 and EECE 2531	Fundamentals of Electromagnetics and Lab for EECE 2530	5
Computer Engineering Fundamentals		
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	5
EECE 2540	Fundamentals of Networks	4
EECE 2560	Fundamentals of Engineering Algorithms	4
Capstone Courses		
EECE 4790	Electrical and Computer Engineering Capstone 1	4
EECE 4792	Electrical and Computer Engineering Capstone 2	4
EECE Technical Electives		
Two CS courses from the following approved list may be taken toward the EECE technical elective requirement.		
Complete four of the following:		16
EECE 2750	Enabling Engineering	
EECE 4991	Research	
EECE 4992	Directed Study	
EECE 4993	Independent Study	
EECE 3324 to EECE 3410		
EECE 4512 to EECE 4698		
EECE 5155 to EECE 5698		
ENGR 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
GE 4608	Nanotechnology in Engineering	
CS 2550	Foundations of Cybersecurity	
CS 3200	Database Design	
CS 3500	Object-Oriented Design	
CS 4850	Building Game Engines	
CS 3540 to CS 3800		
CS 4100 to CS 4770		
IS 4200 to IS 4700		
Supplemental Credit		
2 semester hours from the following course count toward the engineering requirement:		2
EECE 3468	Noise and Stochastic Processes	

3 semester hours from the following course count toward the engineering requirement:

GE 1501	Cornerstone of Engineering 1	
---------	------------------------------	--

3 semester hours from the following course count toward the engineering requirement:

GE 1502	Cornerstone of Engineering 2	
---------	------------------------------	--

Professional Development

Code	Title	Hours
Required Professional Development		
GE 1000	Introduction to the Study of Engineering	1
EECE 2000	Introduction to Engineering Co-op Education	1
EECE 3000	Professional Issues in Engineering	1
Additional Required Courses		
The remaining credit from the following course will apply to the professional development area:		1
GE 1501	Cornerstone of Engineering 1	

Supporting Courses: Mathematics/Science

Complete 37 semester hours in mathematics and science as indicated below.

Code	Title	Hours
Required Mathematics/Science		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
CS 1800 and CS 1802	Discrete Structures and Seminar for CS 1800	5
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5
PHYS 1155 and PHYS 1156 and PHYS 1157	Physics for Engineering 2 and Lab for PHYS 1155 and Interactive Learning Seminar for PHYS 1155	5

Supplemental Credit

2 semester hours from the following course count toward the mathematics/science requirement:

EECE 3468	Noise and Stochastic Processes	
-----------	--------------------------------	--

1 semester hour from the following course counts toward the mathematics/science requirement:

GE 1502	Cornerstone of Engineering 2	
---------	------------------------------	--

Writing Requirement and NUpath Courses

Code	Title	Hours

Total Hours: 134

Biomedical Engineering, Minor

Medical imaging and biomedical electronics are important areas of biomedical engineering that are within the province of electrical engineering. The minor in biomedical engineering is open to all students in the university with the prerequisite calculus and physics background. The minor is particularly designed for majors in electrical or computer engineering, biology, health science fields, or other engineering departments who would like a background in relevant aspects of

biology and electrical engineering, with the opportunity to complete an interdisciplinary biomedical engineering capstone design project. Course work in anatomy and physiology and other health science topics is combined with technical engineering courses related to biomedical imaging and instrumentation.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Biology

Code	Title	Hours
BIOL 1115 and BIOL 1116	General Biology 1 for Engineers and Lab for BIOL 1115	5
BIOL 1117 and BIOL 1118	Integrated Anatomy and Physiology 1 and Lab for BIOL 1117	5

Required Engineering

The course you select may also count toward your major.

Code	Title	Hours
Complete one of the following:		4
EECE 4512	Biomedical Electronics	
EECE 5664	Biomedical Signal Processing	
EECE 5648	Biomedical Optics	
EECE 5698	Special Topics in Electrical and Computer Engineering	
EECE 4993	Independent Study (must have a biomedical-engineering focus)	

Required Capstone-Design Courses

Complete the following two courses on a biologically oriented project:

Code	Title	Hours
EECE 4790	Electrical and Computer Engineering Capstone 1	4
EECE 4792	Electrical and Computer Engineering Capstone 2	4

Elective Courses

One course must be outside your home department. Neither course can be used toward your major.

Code	Title	Hours
Complete two of the following:		8-10
Biology		
BIOL 1113 and BIOL 1114	General Biology 2 and Lab for BIOL 1113	
BIOL 1119 and BIOL 1120	Integrated Anatomy and Physiology 2 and Lab for BIOL 1119	
BIOL 2299	Inquiries in Biological Sciences	
BIOL 2301 and BIOL 2302	Genetics and Molecular Biology and Lab for BIOL 2301	
BIOL 3405	Neurobiology	
BIOL 5581	Biological Imaging	

Chemical Engineering

CHME 5630	Biochemical Engineering
CHME 5699	Special Topics in Chemical Engineering

Civil/Industrial Engineering

Code	Title	Hours
CIVE 7251	Environmental Biological Processes	

Electrical/Computer Engineering

EECE 4512	Biomedical Electronics	
EECE 5664	Biomedical Signal Processing	
EECE 5648	Biomedical Optics	
EECE 5698	Special Topics in Electrical and Computer Engineering	
EECE 4993	Independent Study	

Mechanical/Industrial Engineering

ME 5665	Musculoskeletal Biomechanics	
IE 4522	Human-Machine Systems	

Physics

PHYS 4621	Biological Physics 1	
PHYS 4623	Medical Physics	
PHYS 4651	Medical Physics Seminar 1	
PHYS 4652	Medical Physics Seminar 2	

Psychology

PSYC 3452	Sensation and Perception	
PSYC 3458	Biological Psychology	

GPA Requirement

2.000 GPA required in the minor

Computer Engineering, Minor

The minor in computer engineering is open to all students in the university. The minor is designed for the student who would like a coherent background in the theory and laboratory practice of computer engineering.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

This minor is not open to students in the Department of Electrical and Computer Engineering.

Complete a total of four courses for the minor.

Required Core Course

Code	Title	Hours
EECE 2160	Embedded Design: Enabling Robotics	4

Required Fundamental Courses

Code	Title	Hours
Complete two of the following: 8-9		
EECE 2322 and EECE 2323	Fundamentals of Digital Design and Computer Organization and Lab for EECE 2322	
EECE 2540	Fundamentals of Networks	
EECE 2560	Fundamentals of Engineering Algorithms	

Computer Engineering Technical Elective

Fundamentals not taken to satisfy the above requirement may be used as a technical elective.

Code	Title	Hours
Complete one of the following: 4-5		
EECE 4993	Independent Study	
ENGR 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
GE 4608	Nanotechnology in Engineering	
EECE 2322 to EECE2750		
EECE3324 to EECE 4698		
EECE 5576 to EECE 5698		

GPA Requirement

2.000 GPA required in the minor

Computational Data Analytics, Minor

This minor, offered by the Department of Electrical and Computer Engineering in the College of Engineering, seeks to provide a coherent technical foundation in the fundamentals and application of data analytics. The minor addresses the growing demand in industry to be able to apply background in probability/statistics, calculus, engineering problem solving, computing, and analytical principles/tools to identify patterns and trends, find clusters and outliers, and characterize/summarize the mountain of data being generated in our world. This program leverages faculty expertise in electrical and computer engineering and includes courses from across the College of Engineering, College of Science, and College of Computer and Information Science.

Students need to complete the program requirements with at least three courses that are not part of their major required course work.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Note: Students need to complete the program requirements with at least three courses that are not part of their major required course work.

Required Courses

Code	Title	Hours
EECE 2300	Computational Methods for Data Analytics (not required for EECE majors)	4
EECE 5644	Introduction to Machine Learning and Pattern Recognition	4
EECE 5642	Data Visualization	4

Probability and Statistics

Code	Title	Hours
Complete one of the following: 4		
CIVE 3464	Probability and Engineering Economy for Civil Engineering	
EECE 3468	Noise and Stochastic Processes	
GE 2361	Mathematical Methods for Engineers	
MATH 2280	Statistics and Software	
MATH 3081	Probability and Statistics	

Elective

Code	Title	Hours
Complete one of the following:		4
EECE 2560	Fundamentals of Engineering Algorithms	
EECE 2520	Fundamentals of Linear Systems	
EECE 4542	Advanced Engineering Algorithms	
EECE 4626	Image Processing and Pattern Recognition	
EECE 4694	Numerical Methods and Computer Applications	
EECE 5639	Computer Vision	
CS 3000	Algorithms and Data	
CS 3200	Database Design	
CS 4240	Large-Scale Parallel Data Processing	
CS 5200	Database Management Systems	
IE 4515	Operations Research	
IE 5640	Data Mining for Engineering Applications	
IS 4200	Information Retrieval	
MATH 4525	Applied Analysis	

GPA Requirement

2.000 GPA required in the minor

Electrical Engineering, Minor

A minor in electrical engineering is particularly designed for majors in math, science, computer science, or other engineering departments who would like a coherent background in the theory and laboratory practice of electrical engineering.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

This minor is not open to students in the Department of Electrical and Computer Engineering because of overlap with the majors.

Complete a total of four courses for the minor.

Required Core Course

Code	Title	Hours
Complete one of the following:		5
EECE 2150	Circuits and Signals: Biomedical Applications	
EECE 2210 and EECE 2211	Electrical Engineering and Lab for EECE 2210	

Fundamental Core Courses

Code	Title	Hours
Complete two of the following:		9-10
EECE 2412 and EECE 2413	Fundamentals of Electronics and Lab for EECE 2412	
EECE 2520	Fundamentals of Linear Systems	
EECE 2530 and EECE 2531	Fundamentals of Electromagnetics and Lab for EECE 2530	

Electrical Engineering Technical Electives

Code	Title	Hours
Fundamentals not taken to satisfy the above requirement may be used as a technical elective.		
Complete one of the following:		4
EECE 4993	Independent Study	
ENGR 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
GE 4608	Nanotechnology in Engineering	
EECE 2322 to EECE 2750		
EECE 3324 to EECE 4698		
EECE 5576 to EECE 5698		

GPA Requirement

2.000 GPA required in the minor

Robotics, Minor

The minor in robotics is open to all students in the university. The minor is designed for the student who would like a coherent background in the theory and practice of robotics.

Students need to complete the program requirements with at least three courses that are not part of their major required course work.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Courses

Code	Title	Hours
ME 3460	Robot Dynamics and Control	4
Complete one of the following:		4
EECE 2210 and EECE 2211	Electrical Engineering and Lab for EECE 2210	
EECE 2160	Embedded Design: Enabling Robotics	

Electives

Code	Title	Hours
Complete three of the following:		12
EECE 4626	Image Processing and Pattern Recognition	
EECE 4630	Robotics	
EECE 5639	Computer Vision	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
EECE 5698	Special Topics in Electrical and Computer Engineering	
EECE 5580	Classical Control Systems	
ME 5245	Mechatronic Systems	
ME 5250	Robot Mechanics and Control	
IE 4522	Human-Machine Systems	
IE 5630	Biosensor and Human Behavior Measurement	
CS 4100	Artificial Intelligence	
CS 4610	Robotic Science and Systems

Mission of the Department

The mission of the Department of Mechanical and Industrial Engineering is to educate students for professional and technical excellence; to perform research to advance the science and practice of engineering; to engage in service activities that advance the department, the university, and the profession; and to instill in ourselves and our students habits and attitudes that promote ethical behavior, professional responsibility, and careers that advance the well-being of society.

The program educational objectives for the mechanical engineering and industrial engineering programs are as follows. Graduates from our undergraduate programs will demonstrate technical excellence in their chosen fields, anticipate and respond to societal changes, and develop careers with depth and flexibility, while retaining a professional and intellectual thrust throughout. Specifically:

1. Graduates will contribute to the advancement of the mechanical or industrial engineering field, displaying leadership and innovation in the larger community while fulfilling the expectations of their employers.
2. Graduates will engage in activities that promote professional development and personal growth.

Mechanical Engineering

Mechanical engineers design, develop, and support the manufacture of machinery and devices to transmit power or to convert energy from thermal to mechanical form in order to power the modern world and its machines. Traditionally, mechanical engineers have designed and tested devices, such as heating and air-conditioning systems, machine tools, internal-combustion engines, and steam power plants. Today they also play primary roles in the development of new technologies in a variety of fields—energy conversion, solar energy utilization, environmental control, prosthetics, transportation, manufacturing, robotics, and new-materials development.

Mechanical engineers use computers to formulate preliminary and final designs of systems or devices, to perform calculations that predict the behavior of the design, and to collect and analyze performance data from system testing or operation. Mechanical engineering has been heavily influenced by recent advances in computer hardware and software.

The curriculum in mechanical engineering focuses on four areas: applied mechanics, thermofluids engineering, materials science, and controls. Applied mechanics is the study of the motion and deformation of

structural elements acted on by forces in devices that range from rotating industrial dynamos to dentists' drills. Thermofluids engineering deals with the motion of fluids and the transfer of energy, as in the cooling of electronic components or the design of gas turbine engines. Materials science is concerned with the relationship between the structure and properties of materials and with the control of structure, through processing, to achieve desired properties. Practical applications are in the development of composite materials, metallurgical process industries, and advanced functional materials. Controls are critical to any engineered system in which sensors and actuators of several types communicate and function.

Courses in each area form the foundation for advanced analytical and creative design courses that culminate in a two-semester capstone design project. Faculty encourage students throughout the curriculum to use computer-aided design tools and high-performance computer workstations.

Industrial Engineering

Industrial engineers design and analyze systems that include people, equipment, and materials and their interactions and performance in the workplace. An industrial engineer collects this information and evaluates alternatives to make decisions that best advance the goals of the enterprise. Industrial engineers work in manufacturing firms, hospitals, banks, public utilities, transportation, government agencies, insurance companies, and construction firms. Among the projects they undertake are design and implementation of a computer-integrated supply chain or manufacturing system, facilities planning for a variety of industries, design of a robotics system in a manufacturing environment, long-range corporate planning, development and implementation of a quality-control system, simulation analyses to improve processes and make operational decisions, design of healthcare operations to enhance patient safety and improve efficiency, productivity, and development of computer systems for information control.

The program in industrial engineering offers students a base of traditional engineering courses, such as work design, human-machine systems, probability, statistics, and engineering economy, while emphasizing such contemporary areas as simulation modeling, engineering database systems, quality assurance, logistics and supply chain management, operations research, and facilities planning. Students integrate the knowledge acquired in these courses in a two-semester capstone design project.

Other Programmatic Features

More than 90 percent of the department's undergraduate students take advantage of the cooperative education program. Cooperative education assignments increase in responsibility and technical challenge as students progress through the program. Entry level co-op positions in **mechanical engineering** may be in manufacturing, quality assurance and testing, or involve 3-D CAD modeling, while more advanced-level positions will allow students to gain experience in the design process, including advanced 3-D modeling, design for manufacturability, prototyping, and systems engineering. Students in the **industrial engineering** discipline may utilize co-op to concentrate on one industry segment and build an increasingly technical skill set with each experience or explore the breadth of career opportunities over the course of several co-op rotations such as healthcare process improvement, supply chain logistics, business analytics, manufacturing operations, and more.

The department also offers significant research opportunities throughout all fields of mechanical and industrial engineering, including participating

in research centers based in our department and college, as well as new interdisciplinary graduate and professional master's programs.

Our students have an opportunity to obtain a broad knowledge base in science, engineering, and general studies that allows them flexibility in career development and graduate education. At the same time, our graduates should be responsible and scientifically educated citizens, prepared to contribute personally as well as professionally to an educated, democratic society.

Industrial Engineering, BSIE

Industrial engineering involves the design and analysis of systems that include people, equipment, and materials and their interactions and performance in the workplace. An industrial engineer collects this information and evaluates alternatives to make decisions that best advance the goals of the enterprise.

The program in industrial engineering offers students a base of traditional engineering courses, such as work design, human-machine systems, probability, statistics, and engineering economy, while emphasizing such contemporary areas as simulation modeling, engineering database systems, quality assurance, logistics and supply chain management, operations research, and facilities planning. Students integrate the knowledge acquired in these courses in a two-semester capstone design project.

Industrial engineers work in manufacturing firms, hospitals, banks, public utilities, transportation, government agencies, insurance companies, and construction firms. Among the projects they undertake are design and implementation of a computer-integrated supply chain or manufacturing system; facilities planning for a variety of industries; design of a robotics system in a manufacturing environment; long-range corporate planning; development and implementation of a quality-control system; simulation analyses to improve processes and make operational decisions; design of healthcare operations to enhance patient safety; and improve efficiency, productivity, and development of computer systems for information control.

More than 90 percent of department undergraduate students take advantage of the cooperative education program. Cooperative education assignments generally increase in level of responsibility as students gain theoretical and technical knowledge through their academic work. A sophomore might begin as a computer/data analyst evaluating the

performance of a manufacturing system and progress to designing manufacturing engineering workstations by the senior year.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Engineering

Complete 58 semester hours in engineering as indicated below.

Code	Title	Hours
Required Engineering		
IE 2310 and IE 2311	Introduction to Industrial Engineering and Recitation for IE 2310	4
IE 3425 and IE 3426	Engineering Database Systems and Recitation for IE 3425	4
IE 4510	Simulation Modeling and Analysis	4
IE 4516	Quality Assurance	4

Mechanical Engineering, BSME

Mechanical engineering involves the design, development, and manufacture of machinery and devices to transmit power or to convert energy from thermal to mechanical form in order to power the modern world and its machines. Its current practice has been heavily influenced by recent advances in computer hardware and software.

Mechanical engineers use computers to formulate preliminary and final designs of systems or devices, to perform calculations that predict the behavior of the design, and to collect and analyze performance data from system testing or operation.

Traditionally, mechanical engineers have designed and tested devices, such as heating and air-conditioning systems, machine tools, internal-combustion engines, and steam power plants. Today they also play primary roles in the development of new technologies in a variety of fields—energy conversion, solar energy utilization, environmental control, prosthetics, transportation, manufacturing, and new-materials development.

The curriculum in mechanical engineering focuses on four areas: applied mechanics, thermofluids engineering, materials science, and controls. Applied mechanics is the study of the motion and deformation of structural elements acted on by forces in devices that range from rotating industrial dynamos to dentists' drills. Thermofluids engineering deals with the motion of fluids and the transfer of energy, as in the cooling of electronic components or the design of gas turbine engines. Materials science is concerned with the relationship between the structure and properties of materials and with the control of structure, through processing, to achieve desired properties. Practical applications are in the development of composite materials, metallurgical process industries, and advanced functional materials. Controls are critical to any engineered system in which sensors and actuators of several types communicate and function.

Courses in each area form the foundation for advanced analytical and creative design courses that culminate in a two-semester capstone design project. Faculty encourages students throughout the curriculum to use computer-aided design tools and high-performance computer workstations.

More than 90 percent of department undergraduate students take advantage of the cooperative education program. Cooperative education assignments increase in responsibility and technical challenge as students progress through the program. Initial positions may involve computer-intensive CAD/CAM assignments or programming tasks, while more advanced jobs will place students in charge of design, quality-control systems, and performance testing of equipment.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

NUpath requirements Interpreting Culture (IC), Societies and Institutions (SI), and Differences and Diversity (DD) are not explicitly satisfied by required engineering courses. Students are responsible for satisfying these requirements with general electives.

Engineering

Complete 69 semester hours in engineering as indicated below:

Code	Title	Hours
Required Engineering		
EECE 2210 and EECE 2211	Electrical Engineering and Lab for EECE 2210	5
ME 2340 and ME 2341	Introduction to Material Science and Lab for ME 2340	5
ME 2350	Engineering Mechanics and Design	4
ME 2355 and ME 2356	Mechanics of Materials and Lab for ME 2355	5
ME 2380	Thermodynamics	4
ME 3455 and ME 3456	Dynamics and Vibrations and Lab for ME 3455	5
ME 3475 or ME 3480	Fluid Mechanics International Applications of Fluid Mechanics	4
ME 4505 and ME 4506	Measurement and Analysis with Thermal Science Application and Lab for ME 4505	5
ME 4508	Mechanical Engineering Computation and Design	4
ME 4550	Mechanical Engineering Design	4
ME 4555	System Analysis and Control	4
ME 4570	Thermal Systems Analysis and Design	4
MEIE 4701	Capstone Design 1	1
MEIE 4702	Capstone Design 2	5
Mechanical and Industrial Engineering Technical Elective		
Complete one technical elective in one of the following subject areas:		4
EMGT, ENGR, IE, ME, or MEIE		
Supplemental Credit		
3 semester hours from the following course counts toward the engineering requirement:		3
GE 1501	Cornerstone of Engineering 1	
3 semester hours from the following course counts toward the engineering requirement:		3
GE 1502	Cornerstone of Engineering 2	

Professional Development

Code	Title	Hours
Required Professional Development		
GE 1000	Introduction to the Study of Engineering	1

Mechanical Engineering and Physics, BSME

This undergraduate program takes advantage of the physical similarities between mechanical engineering and physics, providing students with the opportunity to pursue studies that explore both topics. The program culminates with mechanical engineering capstone design.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Major GPA Requirement

2.000 minimum GPA required in IE, ME, and MEIE courses

Engineering Requirement

Complete 60 semester hours in engineering as indicated below:

Code	Title	Hours
Required Engineering		
ME 2340 and ME 2341	Introduction to Material Science and Lab for ME 2340	5
ME 2350	Engineering Mechanics and Design	4
ME 2355 and ME 2356	Mechanics of Materials and Lab for ME 2355	5
ME 2380	Thermodynamics	4
ME 3455 and ME 3456	Dynamics and Vibrations and Lab for ME 3455	5
ME 3475 or ME 3480	Fluid Mechanics International Applications of Fluid Mechanics	4
ME 4505 and ME 4506	Measurement and Analysis with Thermal Science Application and Lab for ME 4505	5
ME 4508	Mechanical Engineering Computation and Design	4
ME 4550	Mechanical Engineering Design	4
ME 4555	System Analysis and Control	4
ME 4570	Thermal Systems Analysis and Design	4
MEIE 4701	Capstone Design 1	1
MEIE 4702	Capstone Design 2	5
Supplemental Credit		
3 semester hours from the following course counts toward the engineering requirement:		3
GE 1501	Cornerstone of Engineering 1	
3 semester hours from the following course counts toward the engineering requirement:		3
GE 1502	Cornerstone of Engineering 2	

Professional Development Requirement

Code	Title	Hours
Professional Development		
GE 1000	Introduction to the Study of Engineering	1
MEIE 2000	Introduction to Engineering Co-op Education	1
MEIE 3000	Professional Issues in Engineering	1
Additional Required Courses		
The remaining credit from the following course will apply to the professional development area:		1
GE 1501	Cornerstone of Engineering 1	

Mathematics/Science Requirement

Complete 59 semester hours in mathematics and science as indicated below:

Code	Title	Hours
Required Mathematics/Science		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1161 and PHYS 1162	Physics 1 and Lab for PHYS 1161	5
PHYS 1165 and PHYS 1166	Physics 2 and Lab for PHYS 1165	5
PHYS 2303	Modern Physics	4
PHYS 2371 and PHYS 2372	Electronics and Lab for PHYS 2371	4
PHYS 3602	Electricity and Magnetism	4
PHYS 3600	Advanced Physics Laboratory	4
PHYS 3601	Classical Dynamics	4
PHYS 5318	Principles of Experimental Physics	4
Advanced Physics Elective		
Complete one 4-semester-hour course in the following range:		4
PHYS 3600 to PHYS 5999		

Supplemental Credit

1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1502	Cornerstone of Engineering 2	

Writing Requirement and NUPath Courses

Code	Title	Hours
Writing		
ENGW 1111	First-Year Writing (a grade of C or higher is required)	4
ENGW 3302	Advanced Writing in the Technical Professions (a grade of C or higher is required)	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

NUPath Requirements through General Electives

NUpath requirements Interpreting Culture (IC), Societies and Institutions (SI), and Differences and Diversity (DD) are not explicitly satisfied by required engineering courses. Students are responsible for satisfying these requirements with general electives.

Integrative Requirement

Principles of Experimental Physics (PHYS 5318) is part of the mathematics/science requirement above and is an integrative course.

Code	Title	Hours
PHYS 5318	Principles of Experimental Physics	4

Required General Electives

Complete two academic, nonremedial, nonrepetitive courses, each equivalent to 4 semester hours.

Course Work That Does Not Count Toward the Engineering Degree

Students in engineering are allowed to count a maximum of two pass/fail courses toward their degree program. Only general electives outside the College of Engineering may be taken on a pass/fail grading basis. A maximum of one pass/fail course is allowed per semester.

Program Requirement

139 total semester hours required

Plan of Study

Five Years, Three Co-ops in Summer 2/Fall

Year 1

Fall	Hours	Spring	Hours	Summer 1	Hours	Summer 2	Hours
MATH 1341 (FQ)	4	MATH 1342 (FQ)	4	Vacation	0	Vacation	0

		PHYS advanced elective	4
		General elective	4
	0		17

Total Hours: 139

Biomechanical Engineering, Minor

This minor provides an opportunity for students to explore the interaction between mechanical engineering and health. Recommended for students interested in aspects of engineering related to human kinematics, including biomedical devices, joint injury, prosthetic development, human-machine systems, and/or prosthetics.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Biology

Code	Title	Hours
Biology 1		
Complete one of the following:		5
BIOL 1111 and BIOL 1112	General Biology 1 and Lab for BIOL 1111	

BIOL 1115 and BIOL 1116	General Biology 1 for Engineers and Lab for BIOL 1115	
Anatomy and Physiology		
BIOL 1117 and BIOL 1118	Integrated Anatomy and Physiology 1 and Lab for BIOL 1117	5

Required Mechanical Engineering

Code	Title	Hours
ME 5665	Musculoskeletal Biomechanics	4
MEIE 4701	Capstone Design 1	1
MEIE 4702	Capstone Design 2	5

Technical Elective

Additional electives may be approved by your academic advisor.

Code	Title	Hours
Complete one of the following:		
IE 4520	Stochastic Modeling	4-5
IE 4522 and IE 4523	Human-Machine Systems and Lab for IE 4522	
ME 4640	Mechanical Behavior and Processing of Materials	
ME 5650	Advanced Mechanics of Materials	
ME 5655	Dynamics and Mechanical Vibration	
PHYS 4621	Biological Physics 1	

GPA Requirement

2.000 GPA required in the minor

Healthcare System Operations, Minor

The objective of the minor in healthcare system operations is to prepare students to apply industrial and systems engineering methods in healthcare applications. Distinct from other service industries, healthcare systems are characterized by extensive complexities driven by communication between and interdependencies among multiple actors, and the need to simultaneously address multiple competing objectives pertaining to economic, quality-driven, individual-driven, and population-driven goals. This minor will benefit students by highlighting the unique features of this industry and methods for addressing its unique challenges to engineer improvements to the design, operation, and management of healthcare systems.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Courses

At most, one course from the minor may be counted toward major requirements.

Code	Title	Hours
Required Courses		
IE 5617	Lean Concepts and Applications	4
IE 5400	Healthcare Systems Modeling and Analysis	4
or IE 3500	Introduction to Healthcare Systems Engineering	
PTH 1260	The American Healthcare System	4

Electives		
Complete one of the following:		4
PTH 4511	Healthcare Management	
PTH 5226	Strategic Management and Leadership in Healthcare	
PTH 5232	Evaluating Healthcare Quality	
NRSG 5121	Epidemiology and Population Health	
IE 5374	Special Topics in Industrial Engineering (System Dynamics in Healthcare)	
IE 5500	Systems Engineering in Public Programs	
IE 5640	Data Mining for Engineering Applications	

GPA Requirement

2.000 GPA required in the minor

Industrial Engineering, Minor

This minor provides an opportunity for students to explore core aspects of industrial engineering, including mathematical foundations, along with a technical focus into one of the many industrial engineering subdisciplines.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Courses

Code	Title	Hours
IE 2310	Introduction to Industrial Engineering	4
IE 4515	Operations Research	4
IE 3412	Engineering Probability and Statistics (or equivalent)	4

Technical Elective

Consult mechanical and industrial engineering academic advisor for additional electives.

Code	Title	Hours
Complete one of the following:		
IE 3425	Engineering Database Systems	
IE 4510	Simulation Modeling and Analysis	
IE 4512	Engineering Economy	
IE 4516	Quality Assurance	
IE 4520	Stochastic Modeling	
IE 4522 and IE 4523	Human-Machine Systems and Lab for IE 4522	
IE 4525	Logistics and Supply Chain Management	
IE 4530	Manufacturing Systems and Techniques	

GPA Requirement

2.000 GPA required in the minor

Mechanical Engineering, Minor

This minor provides an opportunity for students to explore core aspects of mechanical engineering, including mechanical and thermal foundations, along with a technical focus into one of the mechanical engineering disciplines (mechanics, thermofluids, materials, and/or controls).

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Courses

Code	Title	Hours
ME 2350	Engineering Mechanics and Design	4
ME 2380	Thermodynamics	4

Mechanical Engineering Technical Electives

Code	Title	Hours
Complete two of the following:		8
ME 2340	Introduction to Material Science	
ME 2355	Mechanics of Materials	
ME 3455	Dynamics and Vibrations	
ME 3475	Fluid Mechanics	
or ME 3480	International Applications of Fluid Mechanics	
ME 4508	Mechanical Engineering Computation and Design	
ME 4550	Mechanical Engineering Design	
ME 4555	System Analysis and Control	
ME 4570	Thermal Systems Analysis and Design	

GPA Requirement

2.000 GPA required in the minor

Accelerated Bachelor/Graduate Degree Programs

The College of Engineering offers a number of bachelor's/master's degree programs that allow students to accelerate the attainment of the master's degree by applying graduate credits taken as an undergraduate toward both the undergraduate and graduate degrees. These degrees may be earned either simultaneously in five years, or sequentially, with the bachelor's degree attainment followed by a PlusOne year to complete the master's degree. See additional information on engineering bachelor's/master's programs (<http://www.coe.neu.edu/advising/flexible-degree-programs>).

Programs

Bioengineering

- Bioengineering, BSBioE/Engineering Management, MSEM
- Bioengineering, BSBioE/Bioengineering, MSBioE

Chemical Engineering

- Chemical Engineering, BSChE/Chemical Engineering, MSCHE
- Chemical Engineering, BSChE/Engineering Management, MSEM

Civil and Environmental Engineering

- Civil Engineering, BSCE/Civil Engineering, MSCivE
- Civil Engineering, BSCE/Energy Systems, MSENES
- Civil Engineering, BSCE/Engineering and Public Policy, MS
- Civil Engineering, BSCE/Engineering Management, MSEM
- Civil Engineering, BSCE/Environmental Engineering, MSEnVE
- Civil Engineering, BSCE/Sustainable Building Systems, MSSBS
- Environmental Engineering, BSEnVE/Environmental Engineering, MSEnVE

Electrical and Computer Engineering

- Electrical Engineering, BSEE/Electrical and Computer Engineering, MSECE
- Electrical Engineering, BSEE/Engineering Management, MSEM
- Computer Engineering, BSEE/Electrical and Computer Engineering, MSECE
- Computer Engineering, BSEE/Engineering Management, MSEM

Industrial and Mechanical Engineering

- Industrial Engineering, BSIE/Industrial Engineering, MSIE
- Industrial Engineering, BSIE/Energy Systems, MSENES
- Industrial Engineering, BSIE/Engineering Management, MSEM
- Industrial Engineering, BSIE/Operations Research, MSOR
- Mechanical Engineering, BSME/Law, JD

bouvestudentservices@northeastern.edu

The programs in Bouvé College of Health Sciences combine experiential and cooperative education opportunities with highly innovative academic curricula that are designed to meet the demand for well-educated health professionals, nurses, and pharmacists. The college seeks to prepare students to become effective clinicians, researchers, and leaders who will enter graduate schools and work in many areas responsible for the delivery of healthcare and the promotion of health of individuals and populations.

There are three schools within the Bouvé College of Health Sciences: the School of Nursing, the School of Pharmacy, and the School of Health Professions, which comprises the health science and physical therapy majors. The college offers students an education in health and health profession fields that features a curriculum of highly relevant and closely integrated basic courses in the physical, biological, behavioral, social, environmental, and health systems sciences; as well as on-site involvement in interprofessional clinical patient care and interdisciplinary translational research; integrated experiential education opportunities in the form of the university's signature cooperative education work program; and a commitment to the search for and advancement of new and progressive concepts, ideas, and philosophies of education and professional practice.

Each of the programs offered by the college is accredited by the appropriate professional entity. The college is a member of the American Association of Colleges of Nursing, the American Association of Colleges of Pharmacy, the American Council of Academic Physical Therapy, and the Council on Education for Public Health.

Academic Requirements

Students are responsible for following the curriculum plan for their respective major, pattern of attendance, and graduation year. Students are responsible for monitoring their own progress through the curriculum by registering for the courses stipulated by their curriculum plan, abiding by course prerequisites, regularly checking their degree audits, and knowing the consequences for unsatisfactory academic progress. Any exceptions to a student's curriculum plan will be determined by protocols established by the program, after consultation with the student's academic advisor.

COLLEGE ACADEMIC STANDARDS—PROFESSIONAL COURSES

Students must receive a grade of C or better in professional courses.

Professional courses are those required courses taught within the major/college as identified by course subject code: EXSC, HLTH, HSCI, NRSG, PHMD, PHSC, PHTH, and PT.

Courses in the above-listed subjects that are taken as electives are exempt from the C or better rule and the university's minimum satisfactory grade will be accepted. Those courses labeled "**professional elective**" (i.e. certain pharmacy courses), are subject to the C or better requirement.

COLLEGE ACADEMIC STANDARDS—PROFESSIONAL PREREQUISITES

Major	Professional Prerequisite Designation	Minimum Passing Grade
Health Science	BIOL, CHEM, MATH	C–
Nursing	BIOL, CHEM, MATH PSYC 3404	C C
Pharmacy (PharmD, BS PharmSci)	BIOL, CHEM, MATH, PHYS	C
Physical Therapy	BIOL, EXSC, PHYS, PSYC CHEM, MATH	C C–

Courses in the above-listed subjects that are taken as electives are exempt from the C– or higher rule and the university's minimum satisfactory grade will be accepted. Those courses labeled "**professional elective**" (i.e. certain pharmacy courses), are subject to the C or better requirement.

COLLEGE ACADEMIC STANDARDS—ALL OTHER COURSES

The university's minimum passing grade for the course will be accepted.

Note: The university requires a minimum grade of C for First-Year Writing (ENGW 1111) and Advanced Writing in the Health Professions (ENGW 3306).

PROGRESSION WITHIN BOUVÉ

- First-year students must complete at least 27 semester hours and meet all major prerequisite course requirements to progress to sophomore status.
- To progress into the subsequent year of professional courses, students must have completed all professional prerequisites with the required minimum passing grade as noted in the chart above.
- To progress into the subsequent semester of professional courses, students must have completed all professional courses with a grade of C or better.
- For pharmacy students, failure to earn a satisfactory grade (S) in a co-op will be counted as a professional course failure.
- Students admitted to the preprofessional pharmacy program must receive the minimum passing grade as noted in the chart above for all professional prerequisites, have satisfactorily completed all academic courses in the preprofessional phase of the curriculum, have an overall GPA of 3.000 or higher, and a science prerequisite GPA of 3.000 or higher in order to progress. In addition, in order to progress into the PharmD professional (P1) year, students must demonstrate, through a personal interview, good verbal and written communication skills, understanding of the pharmacy profession, and commitment to patient care, based on criteria set by the Doctor of Pharmacy program. Pharmacy (PharmD) students with a cumulative GPA of 3.200 or less following the fall semester of the sophomore year

may experience a delayed start date for the first co-op (IPPE), as the School of Pharmacy will not submit intern licensure documentation to the Board of Pharmacy until spring grades are verified. Pharmacy (PharmD) students must maintain an overall GPA of 3.000 or higher during the professional years (P1–P4) of the Doctor of Pharmacy program. BS Pharm Sci students must maintain an overall GPA and a science GPA of 3.000 or higher in order to progress.

- Physical therapy students must receive the minimum passing grade as noted in the chart above for all professional prerequisites, have satisfactorily completed all academic courses in the preprofessional phase of the curriculum, have an overall GPA of 3.000 or higher, a science prerequisite GPA of 3.000, and must have completed a minor or its equivalent by the end of the preprofessional phase of the program (physical therapy = summer 1) in order to progress into the professional phase of the program. This requirement is intended to provide students with a robust foundation in the humanities, social sciences, and natural sciences that is required for successful completion of the doctoral program in physical therapy.
- Students who incur an incomplete grade in a prerequisite course may not progress into the subsequent courses(s). Any exceptions will be determined by protocols established by the program, after consultation with the student's academic advisor.

CRITERIA FOR UNIVERSITY ACADEMIC PROBATION

Note: Notation of academic probation will appear on internal records but not on permanent transcripts.

Students in the Bouvé College of Health Sciences will be placed on academic probation effective the following academic semester for any of the reasons noted below:

First-year Students

Students who fail to attain an overall GPA of 1.800 at the end of each semester of their freshman year and/or fail to earn at least 12 semester hours in the semester just completed will be placed on academic probation effective for the following semester.

Upperclass and Transfer Students

Students who fail to attain a minimum cumulative GPA of 2.000 at the end of each semester and/or fail to earn at least 12 semester hours in the semester just completed and/or fail to meet the requirements for good academic standing for their major will be placed on academic probation.

ACADEMIC DISMISSAL FROM MAJOR

Students in the Bouvé College of Health Sciences will be dismissed from their major effective the following academic semester for any of the reasons noted below:

- Failure to earn the minimum required grade in the same course twice.
- For health science, pharmacy, and physical therapy students, failure to earn a grade of C or better in three professional courses, regardless of remediation.

Within the health science program, lecture and clinical/lab components for the same class are considered as one professional course failure.

Within the physical therapy and pharmacy programs, each specific professional course (with separate registration number) will be counted as a separate failure even if content is related.

- For nursing students, failure to earn a grade of C or better in two professional and/or clinical courses, regardless of remediation. Within the nursing program, each specific professional course (with

separate registration number) will be counted as a separate failure even if content is related.

- For physical therapy and pharmacy students, failure to achieve an overall GPA of 3.000 or higher or a science prerequisite GPA of 3.000 or higher by the end of the preprofessional phase of the program (physical therapy = summer 1, semester year two; pharmacy = spring semester, year two) or failure to maintain the required overall 3.000 GPA at any point in the professional phase of the program.
- For nursing, physical therapy, and pharmacy students, changing the expected graduation date more than twice.
- The physical therapy and pharmacy programs monitor and promote the development of professional behaviors in their students in order to ensure appropriate professionalism in the classroom, local and global communities, and clinical settings. Breach of adherence to these standards may result in dismissal from the student's respective program.

Note: Students dismissed from their major but who are otherwise in good standing with the university are allowed to remain at Northeastern University for up to two semesters as a provisional Bouvé student, by the end of which the student is expected to move into a new major. If not moved into a new major by the end of two semesters, the student will be blocked from further registration.

ACADEMIC DISMISSAL FROM UNIVERSITY

Students who remain on probation after two academic semesters may be dismissed from the university. Notation of this academic dismissal action will appear on the permanent transcript.

ACADEMIC APPEALS

Students who believe that they were erroneously, capriciously, or otherwise unfairly treated in an academic or cooperative education decision may petition to appeal that decision. In addition, students may also appeal to the college's Academic Standing Committee to review probation and dismissal cases. Refer to the *Bouvé Undergraduate or Graduate Student Manual*, which details the Bouvé College of Health Sciences Appeals Process, and the *Northeastern University Student Handbook*, which details the University Undergraduate Student Academic Appeals Procedures.

GPA

Bouvé College does not permit the use of a hand-calculated GPA under any circumstances. All grade-point calculations will be performed by the university's standard process.

Communication Sciences and Disorders

Website (<http://www.northeastern.edu/bouve/csd>)

Lorraine A. Book, PhD, CCC-SLP
Interim Chair and Assistant Clinical Professor

226 Forsyth Building
617.373.3698
617.373.2239 (fax)

The Department of Communication Sciences and Disorders (CSD) offers two undergraduate minors.

These flexible minors allow students from various fields of study to enhance their academics with courses related to the field of communication sciences in general, as well as specific courses covering topics such as audiology or speech/language disorders

across the lifespan. Advisors assist students minoring in this area with accommodating their interests, aptitudes, or graduate plans.

The minor in CSD includes courses that offer exposure to a variety of aspects of the CSD field. Students can go on to graduate programs in fields such as applied psychology, linguistics, neuroscience, and education, among others; but the minor does not by itself prepare students for admission to graduate programs in speech-language pathology or audiology. Speech-language pathology and audiology courses are designed to help students develop entry-level competencies that will enable them to function in a preprofessional capacity in educational settings, medical and rehabilitation centers, and private-practice clinics.

The minor in clinical speech-language pathology and audiology (SLPA) seeks to prepare students for admission into a graduate program in speech-language pathology or audiology. Speech-language pathologists and audiologists (which requires graduate education to practice) are involved with the evaluation and treatment of, and counseling and research in, human communication and its disorders. They provide clinical services to a full range of communicatively impaired individuals, from infants through geriatrics. Speech-language pathologists treat disorders such as developmental language and articulation disorders; voice and resonance problems; stuttering; pediatric and adult swallowing disorders; and language and cognitive impairments due to stroke, head injury, and progressive neurological diseases. Audiologists specialize in the prevention, identification, assessment, and rehabilitation of hearing disorders. Individuals with congenital and acquired hearing impairments are seen for services by audiologists. They prescribe and dispense hearing aids and instruct individuals in the use of amplification.

Communication Sciences and Disorders Minor

The CSD minor consists of one required foundation course taken prior to any core or elective courses, then two core courses and one elective from either the remaining core courses in the list or from a specified set of elective courses that are taught by units other than the Department of CSD. Students may consult with an advisor in the CSD department concerning the current listing of eligible elective courses for the CSD minor.

Clinical Speech-Language Pathology and Audiology Minor

The clinical SLPA minor seeks to prepare students for admission into a graduate program in speech-language pathology or audiology. In particular, students in this minor are on a track that, if supplemented with certain elective choices within their major, would meet all admissions requirements for our department's own MS/SLP (<http://catalog.northeastern.edu/graduate/health-sciences/communication-sciences-disorders/speech-language-pathology-ms>) program.

Students pursuing this minor are advised to consult early and regularly with their academic advisors in order to ensure a timely completion of the combination of their major and the clinical SLPA minor requirements.

Students pursuing this minor who wish to go to graduate school at institutions other than Northeastern are advised to carefully check admissions requirements for those programs.

Programs Minors

- Communication Sciences and Disorders (p. 436)
- Speech-Language Pathology and Audiology (p. 437)

Communication Sciences and Disorders, Minor

The communication sciences and disorders (CSD) minor consists of one required foundation course taken prior to any core or elective courses, then two core courses and one elective from either the remaining core courses in the list or from a specified set of elective courses that are taught by units other than the CSD department. Students may consult with an advisor in the CSD department concerning the current listing of eligible elective courses for the CSD minor.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Foundation Course

Code	Title	Hours
Complete one of the following:		4
SLPA 1101	Introduction to Communication Disorders	
SLPA 1555	Communication Disorders in Movies	

Communication Sciences and Disorders Core

Code	Title	Hours
Complete two of the following:		6-8
SLPA 1102	Language Development	
SLPA 1103	Anatomy and Physiology of Speech and Hearing Mechanism	
SLPA 1200	Phonetics	
SLPA 1203	Introduction to Audiology	
SLPA 1205	Speech and Hearing Science	
SLPA 4651	Speech Disorders across the Life Span	
SLPA 5110	Language Disorders across the Life Span	

Electives

Code	Title	Hours
Complete at least one of the following. Additional courses may be needed to complete a minimum of 15 semester hours for the minor.		3-6
AMSL 1101	Elementary ASL 1	
CAEP 3480	Counseling Theories and Practice	
COMM 1112	Public Speaking	
COMM 3201	Health Communication	
COMM 3230	Interpersonal Communication	
COMM 3534		
ENTR 2301	Innovation!	
HLTH 1510	Introduction to Healthcare Ethics	
PHTH 2300	Communication Skills for the Health Professions	
PHTH 2301	Communication Skills for the Health Professions—Global	
PSYC 3450	Learning and Motivation	
PSYC 3451	Learning Principles and Behavior Analysis	

Minor Credit Requirement

Minimum of 15 semester hours required in the minor

GPA Requirement

2.000 GPA required in the minor

Speech-Language Pathology and Audiology, Minor

The clinical SLPA minor seeks to prepare students for admission into a graduate program in speech-language pathology or audiology. In particular, students in this minor are on a track that, if supplemented with certain elective choices within their major, would meet all admissions requirements for our department's own MS/SLP (<http://catalog.northeastern.edu/graduate/health-sciences/communication-sciences-disorders/speech-language-pathology-ms>) program.

The clinical SLPA minor consists of one required foundation course taken prior to core courses, then five department-specific SLPA core courses.

Students pursuing this minor are advised to consult early and regularly with their academic advisors in order to ensure a timely completion of the combination of their major and the clinical SLPA minor requirements.

Students pursuing this minor who wish to go to graduate school at institutions other than Northeastern are advised to carefully check admissions requirements for those programs.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Foundation Course

Code	Title	Hours
Complete one of the following:		4
SLPA 1101	Introduction to Communication Disorders	
SLPA 1555	Communication Disorders in Movies	

Speech-Language Pathology and Audiology Core

Code	Title	Hours
SLPA 1102	Language Development	3-4
SLPA 1103	Anatomy and Physiology of Speech and Hearing Mechanism	3-4
SLPA 1200	Phonetics	3-4
SLPA 1203	Introduction to Audiology	3-4
SLPA 1205	Speech and Hearing Science	3-4

GPA Requirement

2.000 GPA required in the minor

The Department of Health Sciences offers a BS degree program in health science; a BS in health science/MPH (Master of Public Health); and minors in exercise science, global health, nutrition, and health science.

The health science major is designed to provide students with an integrated understanding of the natural and social sciences, critical reasoning, and the determinants of global and population health. The competencies that students acquire over their tenure in the Department of Health Sciences provide a solid foundation that prepares students to enter graduate and professional programs in medicine, dentistry, law, veterinary medicine, physician assistant, exercise science, social work, and public health. Health science students also distinguish themselves as particularly well prepared to enter the workforce in many health-related areas because they understand the critical importance of the context in which healthcare is delivered. Health science graduates can be found in leadership roles in various health-related organizations, including hospitals, government and other public health agencies, community-based organizations, and in the pharmaceutical and insurance industries.

The health science curriculum integrates learning in the natural sciences, social sciences, and the liberal arts. All health science students have the option to complete the program with or without a co-op experience. Health science students take courses that introduce them to social determinants of health and wellness and to the ways in which healthcare systems and policies foster—or impede—health and wellness. Our curriculum offers students an opportunity to develop an understanding of public health, health policy and administration, quality-of-care improvement, research methods, and evidence-based healthcare. The curriculum includes electives designed to enrich students' intellectual lives and an opportunity to identify specific areas of interest. Students may use electives to explore a formal minor that complements their health science studies or take prerequisite courses for graduate programs. The entire academic experience culminates in a sequence of capstone courses during the senior year, intended to provide students with a structured opportunity to integrate the knowledge and skills acquired in prior courses, research, and experiential activities into a significant capstone project.

Programs

Bachelor of Science (BS)

- Health Science (p. 438)

Combined Majors

- Data Science and Health Science (p. 355)
- Health Science and Business Administration (p. 246)
- Environmental Engineering and Public Health (p. 394)

Minors

- Health Science (p. 446)
- Health, Humanities, and Society (p. 446)
- Healthcare System Operations (p. 432)
- Exercise Science (p. 447)
- Global Health (p. 448)
- Nutrition (p. 448)

Accelerated Programs

See Accelerated Bachelor/Graduate Degree Programs (p. 467)

Health Science, BS

The health science major offers students a solid academic and experiential foundation that positions them well to pursue graduate and professional school training in the following programs:

- Medicine
- Dentistry
- Veterinary medicine
- Public health
- Physician assistant studies
- Social work

The health science major is also designed for students who are seeking a strong foundation for a career in health administration and in community-based health promotion and public health.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Public Health Core

Data Science and Health Science, BS

The health science and computer science combined major offers a solid academic and experiential foundation integrating studies in health administration, computer science, mathematics, and statistics. This program reflects the impact of data in modern healthcare and prepares

students for success in careers in health administration, community-based health promotion, public health, and big data analysis.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Health Science and Business Administration, BS

The combined major in Health Science and Business Administration provides students at Northeastern with an opportunity to study a curriculum that is synergetic with the growing field of health care. This academic combination will provide students with the knowledge and expertise needed to enter a multitude of careers upon graduation. The degree will allow students the unique opportunity to better understand the business side of the health care industry in Massachusetts, which is home to some of the best hospitals and medical research companies in the country. The field is compatible with all the undergraduate concentrations in the School of Business and prepares students to enter the workforce after graduation.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

MGMT 3420	Managing Human Capital
MGMT 3510	Managing Global Teams Virtually and Locally
MGMT 3530	Project Management
MGMT 4310	The Management Practices of Great Organizations
MGMT 4410	Human Resources and Workforce Analytics
ENTR 2215	Understanding Family Enterprise
ENTR 2414	Social Responsibility of Business in an Age of Inequality
ENTR 4225	Corporate Entrepreneurship through Global Growth, Acquisitions, and Alliances

CONCENTRATION IN MANAGEMENT INFORMATION SYSTEMS

Code	Title	Hours
Required Courses		

MISM 3403	Data Management in the Enterprise	4
MISM 4501	Business Systems Integration	4

Electives

Note: Only one non-MISM course may be used as an elective.

Complete two of the following: 8

MISM 2510	Fundamentals of Information Analytics
MISM 3305	Information Resource Management
MISM 3404	Data Communications
MISM 3406	Introduction to Web Design, Practices, and Standards
MISM 3501	Information Visualization for Business
MISM 3515	Data Mining for Business
MKTG 4508	Digital Marketing
SCHM 3301	Global Supply Chain Strategy
SCHM 3305	Sourcing and Procurement
SCHM 3308	Supply Chain Analytics

CONCENTRATION IN MARKETING

Code	Title	Hours
Required Courses		
MKTG 3401	Marketing Research	4
MKTG 3301	Marketing Management	4
or MKTG 4506	Consumer Behavior	

Electives

Complete two of the following: 8

MKTG 2301	Marketing and Society
MKTG 3301	Marketing Management (if not selected as a required course)
MKTG 3501	Marketing Analytics
MKTG 4220	Marketing in Asia
MKTG 4420	Sales Management
MKTG 4502	Marketing in the Service Sector
MKTG 4504	Advertising and Brand Promotion
MKTG 4506	Consumer Behavior (if not selected as a required course)
MKTG 4508	Digital Marketing
MKTG 4510	New Product Development
MKTG 4512	International Marketing

CONCENTRATION IN SUPPLY CHAIN MANAGEMENT

Code	Title	Hours
Required Courses		
SCHM 3301	Global Supply Chain Strategy	4
SCHM 3305	Sourcing and Procurement	4
SCHM 3310	Logistics and Transportation Management	4

Elective

Complete one of the following: 4

SCHM 3308	Supply Chain Analytics
SCHM 3320	Demand Planning and Forecasting
SCHM 3330	Sustainability and Supply Chain Management
SCHM 4401	Advanced Problems in Supply Chain Management

Environmental Engineering and Health Science, BS

This intercollege combined major is designed for students who would like to explore their interest in the health sciences while earning the benefit of a Bachelor of Science degree in

environmental engineering. The combined major reflects the respective departmental thrusts in environmental health and sustainable resource engineering to create awareness about the complex relationship between the environment and human health, prepare professionals in this growing area capable of providing engineering solutions to current and emerging topics related to environmental engineering and health sciences, and maintain healthy environmental systems by applying and developing techniques to reduce exposure to health hazards. This program combines the content of two majors to allow students to learn the breadth and depth of the convergence between public health and environmental engineering.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

Major GPA Requirement

2.000 minimum required in major (CIVE) courses

Engineering

Complete 65 semester hours in engineering as indicated below.

Code	Title	Hours
Required Engineering		
CIVE 2221 and CIVE 2222	Statics and Strength of Materials and Recitation for CIVE 2221	4
CIVE 2260 and CIVE 2261	Civil Engineering Materials and Materials and Measurements Lab	5
CIVE 2331	Fluid Mechanics	4
CIVE 2334	Environmental Engineering 1	4
CIVE 2335	Environmental Engineering Chemistry	4
CIVE 3430	Engineering Microbiology and Ecology	4
CIVE 3435	Environmental Pollution Fate and Transport	4
CIVE 4534 and CIVE 4535	Environmental Engineering 2 and Lab for CIVE 4534	4
CIVE 4765	Senior Design Project—Environmental	5
CIVE 5300	Environmental Engineering Laboratory	4
GE 3300	Energy Systems: Science, Technology, and Sustainability	4
Environmental Engineering Technical Electives		
Complete 12 semester hours from the following:		12
CIVE 5250	Organic Pollutants in the Environment	
CIVE 5260	Environmental Fluid Mechanics	
CIVE 5271	Solid and Hazardous Waste Management	
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
CIVE 5280	Remote Sensing of the Environment	

CIVE 5536	Hydrologic Engineering
CIVE 5699	Special Topics in Civil Engineering (Groundwater and Contamination)
CIVE 5699	Special Topics in Civil Engineering (Coastal Dynamic and Design Practice)
CIVE 5699	Special Topics in Civil Engineering (Climate Science and Technology Adaptation and Policy)

Supplemental Credit

1 semester hour from the following course counts toward the engineering requirement: 1

CIVE 3464	Probability and Engineering Economy for Civil Engineering
-----------	---

3 semester hours from the following course count toward the engineering requirement: 3

GE 1501	Cornerstone of Engineering 1
---------	------------------------------

3 semester hours from the following course count toward the engineering requirement: 3

GE 1502	Cornerstone of Engineering 2
---------	------------------------------

Professional Development

Code	Title	Hours
Professional Development		
GE 1000	Introduction to the Study of Engineering	1
CIVE 2000	Introduction to Engineering Co-op Education	1
CIVE 3000	Professional Issues in Engineering	1

Additional Required Courses

The remaining credit from the following course will apply to the professional development area: 1

GE 1501	Cornerstone of Engineering 1
---------	------------------------------

Supporting Courses: Mathematics/Science

Complete 33 semester hours in mathematics and science as indicated below.

Code	Title	Hours
Required Mathematics/Science		
CHEM 1151 and CHEM 1153	General Chemistry for Engineers and Recitation for CHEM 1151	4
MATH 1341	Calculus 1 for Science and Engineering	4
MATH 1342	Calculus 2 for Science and Engineering	4
MATH 2321	Calculus 3 for Science and Engineering	4
MATH 2341	Differential Equations and Linear Algebra for Engineering	4
PHYS 1151 and PHYS 1152 and PHYS 1153	Physics for Engineering 1 and Lab for PHYS 1151 and Interactive Learning Seminar for PHYS 1151	5

Science Elective (Earth)

Complete one of the following: 4-5

ENVR 1110	Global Climate Change
ENVR 1112	Environmental Geology
ENVR 1120	Oceans and Coasts
ENVR 1200	Dynamic Earth
ENVR 1202	History of Earth and Life
ENVR 2310	Earth Materials

ENVR 3125	Global Oceanic Change	
Supplemental Credit		
3 semester hours from the following course count toward the mathematics/science requirement:		3
CIVE 3464	Probability and Engineering Economy for Civil Engineering	
1 semester hour from the following course counts toward the mathematics/science requirement:		1
GE 1502	Cornerstone of Engineering 2	

Writing Requirement and NUpath Courses

Code	Title	Hours
Writing		
A grade of C or higher is required:		
ENGW 1111	First-Year Writing	4
ENGW 3302	Advanced Writing in the Technical Professions	4
or ENGW 3315	Interdisciplinary Advanced Writing in the Disciplines	

NUpath Requirements through General Electives

NUpath requirements Interpreting Culture (IC), Societies and Institutions (SI), and Differences and Diversity (DD) are not explicitly satisfied by required engineering courses. Students are responsible for satisfying these requirements with general electives.

Health Sciences Major Requirement

Code	Title	Hours
HLTH 5450	Healthcare Research	4
PHTH 4120	Global Perspectives on Discrimination and Health	4
PHTH 5214	Environmental Health	3
PHTH 1260	The American Healthcare System	4
PHTH 2210	Foundations of Biostatistics	4
PHTH 2350	Community and Public Health	4
PHTH 2414	Environmental Health	4
PHTH 2515	Healthcare Policy and Administration	4
PHTH 4540	Health Education and Program Planning	4

Integrative Course

Code	Title	Hours
CIVE 4765	Senior Design Project—Environmental	5

Course Work That Does Not Count Toward the Engineering Degree

Students in engineering are allowed to count a maximum of two pass/fail courses toward their degree program. Only general electives outside the College of Engineering may be taken on a pass/fail grading basis. A maximum of one pass/fail course is allowed per semester.

Program Requirement

145 total semester hours required

Health Science, Minor

The minor in health science is designed for undergraduate students from a variety of disciplines across the university who wish to expand and apply their understanding in key areas of public health including healthcare research; policy; management and delivery; epidemiology; informatics; communications; and contemporary issues in food policy, nutrition, health disparities, disease prevention, and disability in society. The minor is comprised of five courses, two of which are required (The American Healthcare System (PHTH 1260) and Community and Public Health (PHTH 2350)) to equal 20 credits in total. Health science faculty will consult with students to assist with elective selections relevant to their interests.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Courses

Code	Title	Hours
PHTH 1260	The American Healthcare System	4
PHTH 2350	Community and Public Health	4

Elective Courses

Code	Title	Hours
Complete three of the following:		9-12
EXSC 1120	Introduction to Exercise, Fitness, and Health	
HSCI 1106	Contemporary Issues in Nutrition	
PHTH 1120	Society and Health	
PHTH 2300	Communication Skills for the Health Professions	
PHTH 4120	Global Perspectives on Discrimination and Health	
PHTH 4511	Healthcare Management	
PHTH 4515	Critical Issues in Health and Public-Health Policy	
PHTH 5202	Introduction to Epidemiology	
PHTH 5228	Advances in Measuring Behavior	
PHTH 5230	Global Health	
PHTH 5232	Evaluating Healthcare Quality	
PHTH 5234	Economic Perspectives on Health Policy	
PHTH 5440	Community-Based Participatory Research: Environmental Health	
HSCI 5230	Clinical Nutrition Applications in Health and Disease	
HLTH 5450	Healthcare Research	
HLTH 5280	The (in)Visibility of (dis)Ability in Society	

GPA Requirement

2.000 GPA required in the minor

Health, Humanities, and Society, Minor

The health, humanities, and society minor is designed for students who would like to learn how to think capaciously and creatively about health using the rigorous, precise, and flexible skills trained by the social sciences and the humanities. The social sciences teach students to think about the social, economic, and political factors that structure health conditions and outcomes in particular societies, while the humanities train students to navigate the complexities of interpersonal interaction and their ethical implications, to relate the micro to the macro and texts to contexts, to historicize encounters, to communicate accurately and effectively across a variety of media, and to engage in creative analytical thinking about healthcare. The landscape of healthcare is quickly changing, and this training will equip students well not only for the diverse forms of health work that exist today, but for as yet unimaginable varieties of health-related work in the future.

This minor is structured around the particular competencies that the social sciences and humanities train. Those competencies are narrative and historical perspective, critical attention and observation, ethics and judgment, performance and creativity, and social and structural proficiency. Rather than adopting the more traditional approach of connecting particular skills to particular disciplines (say, narrative to literature and observation to art history), this minor builds from discipline-specific health knowledge while training students to think across disciplines. Thus, it will not be unusual for students to find a single course addressing multiple competencies or to take courses in different disciplines that address the same competency from distinct but complementary perspectives.

This minor is housed in the Humanities Center of the College of Social Sciences and Humanities in partnership with the Bouvé College of Health Sciences.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Courses

No more than two courses, in addition to the introductory course, may be taken under the 2000 level.

Code	Title	Hours
Introductory Course		
INSH 1300	Introduction to Health and Humanities	4
Humanities Requirement		
Complete two of the following:		8
ENGL 2770	Writing to Heal	
ENGL 3700	Narrative Medicine	
ENGL 4710	Capstone Seminar	
ENGL 4040	Topics in 19th-Century Literatures	
HIST 3322	The History of Medicine in North America	
PHIL 1165	Moral and Social Problems in Healthcare	
PHIL 1271	Sex in Judaism, Christianity, and Islam	

PHIL 1295	Religious Perspectives on Health and Healing
WMNS 1225	Gender, Race, and Medicine
Social Sciences Requirement	
Complete two of the following:	
AFRS 3424	Epidemiology of Pandemic Diseases and Health Disparities in the African Diaspora
AFRS 4939	Community Health, Culture, and Development in Kenya
ANTH 4580	Special Topics in Anthropology
ECON 1230	Healthcare and Medical Economics
HLTH 5280	The (in)Visibility of (dis)Ability in Society
PHTH/SOCL 1120	Society and Health
PHTH 1270	Introduction to Global Health
PHTH 2300	Communication Skills for the Health Professions
PHTH 4120	Global Perspectives on Discrimination and Health
PHTH 5202	Introduction to Epidemiology
PHTH 5234	Economic Perspectives on Health Policy
SOCL 1295	Drugs and Society
SOCL 2303	Gender and Reproductive Justice
SOCL 3441	Sociology of Health and Illness

GPA Requirement

2.000 GPA required in the minor

Healthcare System Operations, Minor

The objective of the minor in healthcare system operations is to prepare students to apply industrial and systems engineering methods in healthcare applications. Distinct from other service industries, healthcare systems are characterized by extensive complexities driven by communication between and interdependencies among multiple actors, and the need to simultaneously address multiple competing objectives pertaining to economic, quality-driven, individual-driven, and population-driven goals. This minor will benefit students by highlighting the unique features of this industry and methods for addressing its unique challenges to engineer improvements to the design, operation, and management of healthcare systems.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Courses

At most, one course from the minor may be counted toward major requirements.

Code	Title	Hours
Required Courses		
IE 5617	Lean Concepts and Applications	4
IE 5400	Healthcare Systems Modeling and Analysis	4
or IE 3500	Introduction to Healthcare Systems Engineering	

PHTH 1260	The American Healthcare System	4
Electives		
Complete one of the following:		
PHTH 4511	Healthcare Management	
PHTH 5226	Strategic Management and Leadership in Healthcare	
PHTH 5232	Evaluating Healthcare Quality	
NRSG 5121	Epidemiology and Population Health	
IE 5374	Special Topics in Industrial Engineering (System Dynamics in Healthcare)	
IE 5500	Systems Engineering in Public Programs	
IE 5640	Data Mining for Engineering Applications	

GPA Requirement

2.000 GPA required in the minor

Exercise Science, Minor

The minor in exercise science is for undergraduate students from any discipline wishing to expand their understanding in this area. Exercise science is a discipline that examines the short- and long-term responses to exercise and benefits of exercise training for healthy persons, as well as persons with chronic diseases such as heart disease, pulmonary diseases, diabetes, and obesity. Through this minor, undergraduate students have an opportunity to broaden their understanding of exercise and physical activity in health promotion, disease prevention, and interventions. Students who elect a minor in exercise science may then apply to the Master of Science in Exercise Science upon graduation.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Exercise Science Requirements

A minimum grade of C is required in all courses taken toward the minor.

Required Courses

Code	Title	Hours
BIOL 1117	Integrated Anatomy and Physiology 1	5
and BIOL 1118	and Lab for BIOL 1117	
BIOL 1119	Integrated Anatomy and Physiology 2	5
and BIOL 1120	and Lab for BIOL 1119	
EXSC 4500	Exercise Physiology 1	5
and EXSC 4501	and Lab for EXSC 4500	

Focus

Complete either the cardiovascular focus (open to all students) or the musculoskeletal focus (open to physical therapy students only):

Code	Title	Hours
Cardiovascular Focus—Open to All Students		
EXSC 5200	Cardiopulmonary Physiology	3
EXSC 5220	Advanced Exercise Physiology	3
Musculoskeletal Focus—Open to Physical Therapy Students Only		

EXSC 5230	Physical Activity and Exercise: Effects on Musculoskeletal Health and Disease	3
PT 5133 and PT 5134	Kinesiology and Lab for PT 5133	4

GPA Requirement

2.000 GPA required in the minor

Global Health, Minor

The area of global health has become a critical field of study across and within diverse disciplines because of the cross-border and cross-national implications of health-related risks for national security, commerce, transportation, and healthcare delivery itself. In collaboration with the College of Social Sciences and Humanities, the minor in global health is designed to provide undergraduate students an opportunity to explore and discuss the implications with an interdisciplinary lens. The minor is comprised of five courses: two foundation and core courses, three electives, and a global health experience to be approved by the global health minor advisor.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Courses

Code	Title	Hours
If both are taken, the additional course may count as an elective.		
Complete one of the following:		4
PHTH 2350	Community and Public Health	
AFRS 1270 or PHTH 1270	Introduction to Global Health	

Core Courses

Code	Title	Hours
Complete one of the following. If additional courses are taken, they may be used as electives.		4
AFRS 3424	Epidemiology of Pandemic Diseases and Health Disparities in the African Diaspora	
HUSV 4945	Leadership and International Program Development	
PHTH 4120	Global Perspectives on Discrimination and Health	
PHTH 5202	Introduction to Epidemiology	
PHTH 5230	Global Health	

Elective Courses

Code	Title	Hours
Complete three courses from the following areas. Only two courses from any one area may count toward the minor electives. No more than two required courses in the student's major may count toward the minor electives. At least one of the minor electives must be at the 3000-level or above.		12

Area 1: Community and Public Health		
PHTH 1261	Comparative Healthcare Systems	

PHTH 2301	Communication Skills for the Health Professions—Global
PHTH 4540	Health Education and Program Planning
AFRS 4939	Community Health, Culture, and Development in Kenya

Area 2: Biology of Health and Disease

BIOL 1141	Microbes and Society
ENVR 1110	Global Climate Change

Area 3: Society and Cultural Health/Area Studies

PHIL 1165	Moral and Social Problems in Healthcare
ECON 1230	Healthcare and Medical Economics
LACS 1220	Latino, Latin American, and Caribbean Studies
ANTH 4350	Ethnography of Southeast Asia
ANTH 4510	Anthropology of Africa
ANTH 4515	Culture and Politics in Modern India
MGMT 3330	Developing Leaders for Global Sustainability
HIST 3322	The History of Medicine in North America

Area 4: Globalization and Development

POLS 1160	International Relations
ECON 1291	Development Economics
LPSC 2302	Global Human Rights: A Social and Economic Perspective
CRIM 1400	Human Trafficking
HLTH 1510	Introduction to Healthcare Ethics

Global Health Experience

Complete a global health experience that has been approved by the global health minor advisor.

Recommended

Competency in another language other than English is recommended.

GPA Requirement

2.000 GPA required in the minor

Nutrition, Minor

The minor in nutrition is designed for undergraduate students from a variety of disciplines across the university who wish to expand and apply their understanding in key concepts of nutrition and how they intersect with public health, clinical applications, food policy, behavioral counseling, or health communication.

The minor is comprised of five courses. It requires a foundational course in Human Nutrition (HSCI 1105) that instructs students in the basic principles of human nutrition. Students expand foundational concepts in additional required courses to apply knowledge of nutrition in clinical settings and to public health initiatives. Following the initial core courses, students complete two elective courses, at least one at 3000 level or higher, developing deeper knowledge and specific professional skills.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Courses

Code	Title	Hours
HSCI 1105	Human Nutrition	4
HSCI 2500	Public Health Nutrition in the Community	4
HSCI 2350	Advanced Nutrition in Health and Disease	4

Supporting Courses

Code	Title	Hours
Complete two of the following. At least one elective must be at the 3000 level or above:		
HSCI 1106	Contemporary Issues in Nutrition	7-8
EXSC 1120	Introduction to Exercise, Fitness, and Health	
PSYC 2306	Food, Behavior, and Eating Disorders	
ECON 3404	International Food Economics and Policy	
BIOL 3611	Biochemistry	
CAEP 3480	Counseling Theories and Practice	
COMM 3201	Health Communication	
PHSC 4340	Pharmacology for the Health Professions	
PPUA 5270	Food Systems and Public Policy	

GPA Requirement

2.000 GPA required in the minor

Interdisciplinary

Programs

Minor

Early Intervention, Minor (p. 449)

Early Intervention, Minor

The interdisciplinary concentration in early intervention (EI) is designed for students who enjoy working with very young children and their families. Through course work and practicum experiences, students are prepared to work with infants and toddlers with known disabilities, or those who are at risk for developmental delay, and their families.

This course work can be integrated into the psychology undergraduate degree program, the program in human services, or the physical therapy DNP program, usually taken in the senior year. Students in other programs may petition to include this minor in their course of study.

Minor Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified.

Required Courses

Code	Title	Hours
CAEP 5150	Early Intervention: Family Systems	3
CAEP 5151	Early Intervention: Infant and Toddler Development, Risk, and Disability	3
CAEP 5152	Early Intervention: Planning and Evaluating Services	3
CAEP 8425	Early Intervention Practicum 1	2
CAEP 8426	Early Intervention Practicum 2	2
SLPA 6335	Early Intervention: Assessment and Intervention	3

GPA Requirement

2.000 GPA required in the minor

Physical Therapy, Movement, and Rehabilitation Sciences

Website (<http://www.northeastern.edu/bouve/physical-therapy>)

Kristen Curry Greenwood, PT, DPT, EdD, MS

Associate Clinical Professor and Interim Chair

301 Robinson Hall

617.373.3908

617.373.3161 (fax)

physicaltherapy@northeastern.edu

The physical therapy program has a long and rich history as one of the oldest accredited programs in the United States, with origins dating back to World War I reconstruction aides. Our mission is to impact the health and well-being of the global community by developing leaders in physical therapy, movement, and rehabilitation sciences through interprofessional experiential education, translational research, and excellence in clinical practice. The cornerstone of our program is experiential learning, which includes cooperative education, simulated patient interactions, engagement with consumer clients, service-learning, clinical research, and international humanitarian opportunities. Through this unique, multifaceted approach to learning we:

- Educate skilled, autonomous doctors of physical therapy who embrace evidence-based practice, are culturally competent, and are equipped to work in a complex global healthcare environment
- Promote professionalism, humanistic values, resourcefulness and innovation, and a commitment to lifelong learning
- Advance scholarship in areas related to physical therapist education and clinical practice to meet the changing needs of a global and technologically advancing world

Features of the Doctor of Physical Therapy Program

The program in physical therapy has three admission points: freshman, change of major, or as a graduate student with a baccalaureate degree in any field. The duration of the program is six years for freshman entry and three and one-half years for transfer or postbaccalaureate entry. The terminal degree is the Doctor of Physical Therapy (DPT). Our entry-level Doctor of Physical Therapy program is one of the few freshman entry programs in the country. Undergraduate students earn a BS in rehabilitation science and progress into the Doctor of Physical Therapy phase of the program. Students do not need to reapply to the DPT phase of the program, provided they meet the academic standards.

Emphasis on Experiential Learning

Our DPT program provides freshman-entry students with one year of cooperative education (six months for graduate-entry students) in addition to the required clinical affiliations necessary for licensure. Through cooperative education, the hallmark of Northeastern University, students are able to integrate semesters of academic study with semesters of cooperative education experiences in hospitals and clinics throughout the country and around the globe. Students may be employed as physical therapy co-ops with increasing responsibilities commensurate with their academic studies or perform other health-related duties.

The curriculum also includes 36 weeks of clinical education under the direct supervision of a licensed physical therapist. We are affiliated with world-class medical centers and clinical sites throughout the United States, providing students with access to master clinicians and clinical scholars. Every effort is made to accommodate individual circumstances, but students should be prepared to travel out of state for two of the three clinical placements. Availability of a car is required, as most sites are not accessible by public transportation. All expenses associated with clinical education, including travel and housing, are the responsibility of the student.

Student Research

Physical therapy students participate in research that is integrated into the curriculum. Students have the opportunity to work with faculty to conduct ongoing research in world-renowned medical centers, in one of the 11 Department of Physical Therapy, Movement, and Rehabilitation Science's labs and centers (e.g., Neuromotor Systems Lab, Lab for Locomotion Research, The ReGameVR Lab, Movement Neuroscience Lab, Rehabilitation and Epidemiology Trainee Program, Occupational Biomechanics and Ergonomics Lab, Neurophysiology Lab, Teaching and Learning Innovation Lab, Musculoskeletal Epidemiology and Biomechanics Lab, Cadaver Lab, and Neuroscience Wet Lab). The outcome is the ability to conduct and present quality research at local and/or national-level conferences.

Global Outreach

Students have multiple opportunities to enrich their education through global outreach and education. Physical therapy students can elect to do a traditional semester-long study abroad, a one-month Dialogue of Civilization, or to go abroad for a cooperative education experience. To date, physical therapy students have worked in Nepal, Peru, Costa Rica, Uganda, and South Africa for their cooperative education experience. In the latter portion of the curriculum, students can participate in short cultural immersion experiences abroad whereby they engage in community service projects under the direction of a physical therapy faculty member or on physical therapy academic exchanges with partner academic institutions.

Ability to Minor in Another Field

Physical therapy undergraduate students work with their academic advisor to develop a schedule to complete a minor in another field such as psychology, exercise science, or a foreign language.

Ability to Concentrate

Once in the program, students may have the ability to acquire additional information in two areas of concentration. The Certificate in Early Intervention (<http://catalog.northeastern.edu/graduate/health-sciences/applied-psychology/early-intervention-graduate-certificate/#programrequirementstext>) is an interprofessional program that meets the state and national requirements for personnel to work with families, infants, and toddlers with disabilities or who are at risk for developmental

delays. **The concentration in sports performance** prepares the physical therapy student to confidently pursue a sports physical therapy position working with athletes of all ages in a variety of settings. In both areas, students take additional course work, focused on research and clinical rotations that expand upon the entry-level physical therapy curriculum.

Progression in the Program

To progress in the program, students must maintain acceptable standards of scholarship and academic performance as stated in the academic requirements section of this catalog. Students must develop appropriate motor skills, professional behaviors, and emotional maturity. The program in physical therapy is accredited by the Commission on Accreditation in Physical Therapy Education of the American Physical Therapy Association.

Graduates of the Doctor of Physical Therapy program are eligible to sit for the Physical Therapy Licensure Examination.

Programs

Bachelor of Science

- Rehabilitation Studies (p. 450)

Doctor of Physical Therapy, DPT

- Physical Therapy (p. 452)

Rehabilitation Studies, BS

The Department of Physical Therapy, Movement, and Rehabilitation Sciences offers a four-year degree program leading to the Bachelor of Science in Rehabilitation Studies (BSRS). The program is designed to prepare students for careers in entry-level positions in the healthcare industry or to prepare graduates for admission into advanced degree (MS, PhD, PA, DPT) programs in the healthcare field. The BSRS does not qualify or prepare the graduate to sit for the physical therapy licensure exam. This program is open to students already enrolled in the Doctorate of Physical Therapy (DPT) program at Northeastern University who choose to opt out of pursuing licensure for direct patient care in the practice of physical therapy for a future career that is grounded in healthcare. The transition of a student from the DPT program to the BSRS program is seamless because the course work for the first three years of the six-year DPT curriculum is identical to the BSRS curriculum. See "Changing Majors (p. 32)" for more information.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUpath Requirements

All undergraduate students are required to complete the NUpath Requirements (p. 37).

The NUpath requirement Differences and Diversity (DD) is not explicitly satisfied by required courses. Students are responsible for satisfying this requirement with an open elective.

Physical Therapy, DPT

The Doctor of Physical Therapy (DPT) degree is a professional doctoral degree offered by the department that leads to professional licensure in physical therapy.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

The NUPath requirement Differences and Diversity (DD) is not explicitly satisfied by required courses. Students are responsible for satisfying this requirement with an open elective.

Physical Therapy Major Requirements

A 3.000 GPA and a 3.000 GPA in science prerequisites are required at the end of Summer 1 of the second year to progress into the professional phase of the program.

Code	Title	Hours

The School of Nursing offers a traditional Bachelor of Science and both an Accelerated Bachelor of Science (ABSN) and a Direct Entry (BSN) to Master's (MSN), for second degree students, in nursing designed to prepare students to become professional nurses by providing them with the knowledge, skills, and professional values needed for successful practice in a variety of healthcare settings. The school aims to provide all students—including those with diverse backgrounds and changing career goals—with a broad-based education that will foster ongoing personal and professional growth.

The mission of the Northeastern University School of Nursing is to educate our students to provide evidence-based, culturally and linguistically competent, ethical healthcare that is high quality, safe, and accessible to diverse local, national, and global communities. Our programs seek to prepare students to become leaders as nurse clinicians, educators, scholars, and researchers.

Nursing is both a science-based profession and a caring art. The curriculum draws on basic and behavioral sciences, the arts and humanities, and the art and science of nursing to help students understand the complexities of health and illness across the life span.

Special Requirements

All students must receive a health clearance from University Health and Counseling Services (UHCS). Health clearance is based on specific documentation of immunity from infectious disease and a physical examination (this may be done by the student's own healthcare provider). In addition, nursing students need a clinical clearance in order to participate in clinical courses. Clinical clearance, managed by the

School of Nursing's Clinical Placement Office, includes verification of certification in cardiopulmonary resuscitation (CPR); recent negative tuberculosis screening (PPD); positive titres for MMR, varicella, and hepatitis B; vaccines including TDAP and influenza; and additional health screenings as may be required by the program. It is the responsibility of the student to stay current and to provide documentation required for clinical clearance throughout the entire nursing program.

Clinical settings also require us to run a criminal background check. Additionally, international students require curricular practical training (CPT) clearance to meet federal requirements for all clinical and co-op experiences.

Students enrolled in the clinical courses may need access to a car to travel to assigned agencies. Students are responsible for their own transportation costs.

During academic semesters, students in the School of Nursing are required to wear the approved school uniform to their clinical site and in some clinical laboratory areas. Students are responsible for purchasing these uniforms, badges, and a lab supply pack.

In Massachusetts, and several other states, the registering board requires that graduates taking the National Council Licensing Examination (NCLEX-RN) meet standards of "good moral character" (GMC). Students may review the GMC requirement specified at Massachusetts General Laws Chapter 112, sections 74, 74A, and 76; Licensure Policy No. 00-01 under "Rules & Regulations" on the Massachusetts BORN website; or they can similarly investigate the requirements in the state where they expect to practice.

RN to BSN Hybrid Option

The Bouvé College of Health Sciences School of Nursing allows qualified individuals to take the next step in their career toward becoming a baccalaureate-prepared registered nurse. The RN to BSN program offers a comprehensive clinical curriculum where students are exposed to all nursing specialties and aspects of nursing leadership. Program participation may be completed on a part-time or a full-time basis depending on preference. For more information, contact the School of Nursing program call center at 888.206.6004.

Programs

Bachelor of Science in Nursing (BSN)

- Nursing (p. 454)
- Accelerated Program for Second-Degree Students (p. 457)
- RN-to-BSN (p. 457)

Nursing, BSN

The goal of the School of Nursing is to prepare students to think critically and to practice nursing competently and compassionately in rapidly changing practice environments. All efforts are designed to build nursing knowledge; enhance nursing practice and patient safety; foster professional integrity; and ultimately improve the health outcomes of patients, families, and communities across the continuum of care. This approach requires knowledge, skills, and attitudes that demonstrate leadership, quality care, critical thinking and clinical reasoning, cultural and linguistic competence, interprofessional collaboration, evidence-based practice, and integration of informatics and technology.

The clinical program takes place in the community where people live as well as in hospitals, rehabilitation centers, and long-term-care facilities. The curriculum is capped by courses that enable students to put

leadership and management skills into action and to synthesize the complete role of the professional nurse in a clinical practicum.

In addition to completing academic course work, students must meet the cooperative education requirement, which gives them the opportunity to integrate the theory and practice of nursing in selected settings.

Numerous community and institutional healthcare agencies in Greater Boston and across the country offer students an opportunity to gain experience in providing nursing care to a variety of patients and families and to understand that nurses have major roles in wellness and health promotion, acute care, and long-term care. Students in the program are strongly encouraged to participate in research activity and in global educational opportunities that can all be a part of the program.

The program is accredited by the Commission on Collegiate Nursing Education (CCNE) and is approved by the Board of Registration in Nursing of the Commonwealth of Massachusetts (BORN). Accreditation and approval indicate that the program meets educational standards for faculty, curriculum design, student quality, and overall university support. The School of Nursing has also been designated as a National Hartford Center of Gerontological Nursing Excellence for its contributions in the area of geriatric nursing and research. The school subscribes to the standards established by the American Association of Colleges of Nursing (AACN), of which it is a member.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

Nursing (BSN), Accelerated Program for Second-Degree Students

The Accelerated Bachelor of Science in Nursing (ABSN) hybrid program, which comprises 16 months of full-time study, combines online didactic course work and hands-on learning involving both clinical placements and experience in the skills laboratory. The program offers students an opportunity to work closely with nursing faculty to master the core skills necessary to excel in their nursing career. The program also seeks to prepare students to successfully take and pass the National Council Licensure Examination for Registered Nurses (NCLEX-RN) and earn an RN license.

The ABSN curriculum includes 67 credits of undergraduate courses with online learning modules incorporating lectures and learning activities. The majority of these credits are completed online through an e-learning platform that allows students to listen to lectures, submit assignments, complete interactive learning modules, and engage in discussion with faculty and classmates.

The Bouvé College of Health Sciences School of Nursing has an extensive network of clinical affiliations at health centers, major teaching hospitals, and community hospitals that allow students to engage in clinical experiences covering a wide range of nursing specialties that include adult health, OB-GYN, pediatrics, behavioral and mental health, acute care, public health, health education, and management/leadership.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

Code	Title	Hours
SEMESTER 1		
NRSG 2220 and NRSG 2221	Nursing Interventions, Assessment, and Community Care and Lab for NRSG 2220	5
NRSG 2312	Pathophysiology	4
NRSG 3302 and NRSG 3303	Nursing with Women and Families and Clinical for NRSG 3302	5
PHSC 4340	Pharmacology for the Health Professions	4
SEMESTER 2		
NRSG 2210	Influences on Health and Illness: A Nursing Perspective	3
NRSG 3320 and NRSG 3321	Nursing Care of Adults 1 and Clinical for NRSG 3320	6
NRSG 3400 and NRSG 3401	Nursing and the Promotion of Mental Health and Clinical for NRSG 3400	5
NRSG 3323 and NRSG 3324	Intermediate Interventions and Assessment and Lab for NRSG 3323	2
SEMESTER 3		
NRSG 3420 and NRSG 3421	Nursing Care of Adults 2 and Clinical for NRSG 3420	6
NRSG 4502 and NRSG 4503	Nursing Care of the Child and Clinical for NRSG 4502	6

HLTH 5450	Healthcare Research	4
SEMESTER 4		
NRSG 4604 and NRSG 4605	Public Health Community Nursing and Clinical for NRSG 4604	5
NRSG 4610	Managing and Leading in Healthcare	4
NRSG 4995	Comprehensive Nursing Practicum	5
NRSG 6306	Health Informatics	3

Program Requirement

67 total semester hours required

Nursing, RN-to-BSN

The Bouvé College of Health Sciences School of Nursing prepares qualified individuals to take the next step in their career to become a baccalaureate-prepared registered nurse. The RN to BSN program offers a comprehensive curriculum to prepare students as practitioners and leaders in the professional role. Program participation may be completed on a part-time or a full-time basis depending on preference. The program consists of online course work and one clinical experience in the area of public health nursing. For more information, contact the School of Nursing program call center at 888.206.6004.

Program Requirements

Complete all courses listed below unless otherwise indicated. Also complete any corequisite labs, recitations, clinicals, or tools courses where specified and complete any additional courses needed beyond specific college and major requirements to satisfy graduation credit requirements.

University-Wide Requirements

All undergraduate students are required to complete the University-Wide Requirements (p. 41).

NUPath Requirements

All undergraduate students are required to complete the NUPath Requirements (p. 37).

Major Requirements

Code	Title	Hours
NRSG 2312	Pathophysiology	4
NRSG 4604 and NRSG 4605	Public Health Community Nursing and Clinical for NRSG 4604	5
NRSG 4610	Managing and Leading in Healthcare	4
NRSG 4620	Innovations in Nursing Practice	4
NRSG 5100	Professional Development and Scientific Basis	3
NRSG 5101	Computer and Nursing Informatics	3
NRSG 5118	Healthcare System and Professional Role Development	3
NRSG 5120	Statistics for Health Science	3

Supporting Courses

Code	Title	Hours
ENGW 3250	Writing for the Professions	4
HLTH 1510	Introduction to Healthcare Ethics	4
HLTH 5450	Healthcare Research	4

PHTH 2300	Communication Skills for the Health Professions	4

The School of Pharmacy is dedicated to excellence in pharmacy-related education, research, and service, including the provision of patient care. We prepare students with knowledge, skills, and values for careers in pharmacy practice and the pharmaceutical sciences. Our programs promote intellectual growth, professionalism, and lifelong learning. Through the generation and dissemination of new knowledge and through scholarship and community service, the school contributes to improved individual and population health.

The six-year (two years of preprofessional and four years of professional courses) program at Northeastern University leading to the professional Doctor of Pharmacy degree (PharmD) fully integrates campus-based learning with experiential learning, including the university's signature cooperative education (co-op) program, to provide students with the knowledge, skills, and abilities necessary to succeed in the pharmacy profession. Our students promote and ensure the safe and effective use of drugs and provide medication therapy management services. In addition to preparing and dispensing prescribed medications, our students provide information to patients about medications and their uses; advise physicians, other prescribers, and other healthcare practitioners on medication selection, dosages, interactions, and adverse effects; and monitor patient responses to drug therapy.

Our students are well equipped to provide patient care services in a variety of settings. Most of our graduates work in community pharmacies or in healthcare facilities such as hospitals and ambulatory clinics. Additional practice opportunities exist in health maintenance organizations, private practice groups, long-term-care facilities, home healthcare, the Public Health Service, the armed services, and law enforcement agencies such as the Federal Drug Administration (FDA) or Drug Enforcement Administration (DEA). Graduates may also find employment in drug development, marketing and research within the pharmaceutical industry, colleges of pharmacy, and professional association management. In addition, many of our graduates go on to pharmacy practice residencies, fellowships, and leading graduate programs.

Pharmacy students are admitted with the expectation that by working with faculty, staff, and each other, they will develop the knowledge, skills, and attitudes necessary for academic and professional success. Students follow academic progression plans for their respective years of graduation. Any deviation from the prescribed curriculum will require faculty/staff permission and an approved plan of study from the school's Academic Standing Committee.

The pharmacy curriculum includes introductory (cooperative education) and advanced pharmacy practice experiences (IPPEs and APPEs). These pharmacy practice experiences are provided primarily under the direct supervision of qualified pharmacist preceptors and occasionally with other qualified healthcare professionals. The school is affiliated with many world-class practice sites throughout the United States, providing students with access to experienced clinicians and scholars. Although every effort is made to accommodate individual circumstances and requests, students should be prepared to travel outside the Boston area to complete some of their pharmacy practice experiences. Availability of a car may be required, as some sites are not accessible by public transportation. All expenses associated with pharmacy practice experiences, including travel and housing, are the responsibility of the student.

IPPEs are competitive placements that are based on job availability in a geographic region. The placements are facilitated by the school's cooperative education coordinators. Students are required to earn a satisfactory (S) grade on one IPPE in a community setting and on one IPPE in an institutional/hospital practice setting.

APPE placements are provided based on site/preceptor availability and the final approval of the school's Office of Experiential Education. Students may be able to petition for out-of-system APPEs; however, availability for such requests is limited.

To be eligible for a Doctor of Pharmacy degree (PharmD), a student must successfully complete all courses in the curriculum including the IPPEs (co-op) and APPEs; meet the academic progression standards of the program; meet the technical standards of the program; and satisfy all other requirements as stated in the *Bouvé College of Health Sciences Undergraduate Student Information Manual*. The pharmacy program, which is fully accredited by the Accreditation Council for Pharmacy Education (ACPE), subscribes and adheres to the standards established by ACPE.

Students enrolled in the PharmD program will be awarded a Bachelor of Science in Pharmacy Studies after successful completion of all didactic and laboratory courses in semesters 1 through 10 of the pharmacy curriculum. The Bachelor of Science in Pharmacy Studies does not allow for individuals to pursue licensure for direct patient care in the practice of pharmacy. To earn the PharmD degree, students must complete an additional 36 semester hours of APPEs (see "Requirements for the Doctor of Pharmacy Advanced Pharmacy Practice Experiences" below) with an overall GPA of 3.000 or greater in the Bouvé College of Health Sciences graduate program.

Pharmacy graduates must meet specific requirements to qualify for professional licensure in the state where they plan to practice as a registered pharmacist. These requirements include graduating from an accredited school of pharmacy, passing national and state board examinations, and completing internship hours. The internship is a period of practical experience conducted under the supervision of a registered pharmacist. Massachusetts requires 1,500 internship hours, all of which are satisfied through IPPEs (co-op) and APPEs.

The Bachelor of Science in Pharmaceutical Sciences is geared toward highly motivated students who are strongly focused on careers in biomedical/pharmaceutical research, biomedicine, and/or the pharmaceutical/biotech industries. The educational approach is an innovative paradigm that immerses students into undergraduate research at the earliest possible time and promotes graduate-style mentorship and experiential learning in the context of an intensive scientific curriculum with specialized educational opportunities. Pharmaceutical sciences are by nature highly interdisciplinary: they include pharmacology, physiology, structural biology, medicinal chemistry, pharmaceuticals, and the allied

fields of toxicology, chemical biology, nanomedicine, and a spectrum of emerging health science disciplines that span classical life sciences, engineering, and biotechnology. All students take courses in basic chemistry, basic biology, organic chemistry, physiology, pharmacology, medicinal chemistry, and pharmaceutical sciences and can then further specialize their education with elective courses in areas of their interest and their developing career trajectory. Entering students are expected to initiate a self-directed search for opportunities to participate in laboratory research. In the first year, students take Introduction to Health Science Research, a course that introduces students to the scientific literature, hypothesis generation, and use of the scientific method to investigate unsolved problems. To facilitate student identification and research, this course also introduces students to faculty researchers from within and outside of the university with the goal of matching students with faculty research mentors. Graduates of the Bachelor of Science in Pharmaceutical Sciences program will have a solid foundation in the science of drug discovery, delivery, evaluation, and development, as well as specialized training at the undergraduate level in research labs. The program prepares students to pursue graduate studies, professional programs, or to enter the biopharmaceutical industry. The BS degree requires a minimum of four years of study and provides for at least one co-op period.
