Catalog Effective from August 2018-2019 §71810(b)(1)

Version 2018 - 2019.5 (August 2018)

MISSION STATEMENT

Gnomon specializes in computer graphics education for careers in the entertainment industry.

INSTITUTIONAL OBJECTIVE STATEMENT

Gnomon strives to be recognized globally as the foremost educational authority in 3D computer graphics; the School is committed to offering the highest quality education, instruction, and a comprehensive educational experience, thereby preparing graduates for successful careers.

Policies and procedures are subject to change. Though this catalog is produced as a reference guide, each student is responsible for keeping apprised of current policies pertaining to their course of study.

INTRODUCTION

Gnomon specializes in providing computer graphics education to students seeking careers in the entertainment industry. The school strives to emulate a production environment within its classrooms by utilizing instructors who are working professionals at film and game studios. Gnomon also provides post-secondary learning through the inclusion of academic and fine art courses designed to support the technical pipeline.

Gnomon recognizes that a quality artistic and technical education is only a portion of a student's holistic educational experience. Through studio tours, open houses, and industry-related events showcasing the latest artistic and CG techniques, students at Gnomon gain a broad understanding of the operational characteristics of different studios, an insight into the current job market, and the accumulated knowledge of how to navigate a career in the digital production industries. Gnomon students receive a full range of educational opportunities well beyond the traditional classroom setting, including a comprehensive student service program designed to support and empower student success.

This catalog details the institutional policies and procedures pertaining to the Gnomon student experience and includes important information on program and course specifics, student services, financial aid, academic policies, conduct policies, tuition, and more. Though the catalog is produced as a reference guide, each student is responsible for keeping apprised of current policies and procedures relating to their course of study. Policies and procedures are subject to change. Please visit <u>gnomon.edu/files/gnomon-catalog.pdf</u> for the most recent version of this catalog. For a printed copy of this catalog, please visit the Gnomon Store.

HISTORY OF GNOMON

Founded in 1997, Gnomon is located in the heart of Hollywood and provides specialized education in the visual effects field. The school offers vocational and degree programs for individuals without prior visual effects experience, online courses, and skill enrichment for individuals already in the industry. Gnomon's curriculum is guided by its esteemed Advisory Board, which is comprised of industry professionals. Utilizing their input, Gnomon programs and facilities are constantly evolving to reflect the changing demands of the entertainment industry. Most of Gnomon's instructors currently work in entertainment. The offered curriculum is continually developed, tested, and delivered by highly regarded professionals who work at and consult for studios including DreamWorks, Disney, Rhythm & Hues, Industrial Light & Magic, Sony Pictures Imageworks, Sony Interactive, Digital Domain, Electronic Arts, Activision, Rockstar Games, and Blizzard.

INSTRUCTION

Gnomon's goal is to create an educational environment unlike any other. The school strives to pioneer effective methods of learning and to provide a better way to prepare students for introductory careers in the computer graphics entertainment industry. Gnomon's technical instructors use their real-world experience to ensure that curriculum moves in tandem with the industry, while the School's general education instructors lay the groundwork for the programs through traditional courses, both academic and aesthetic, which bring art and liberal art school foundation education to the pipeline. To prepare students for the collaborative nature of a career in visual effects, Gnomon's courses parallel the inner workings of effects studios. The school's technical curricula take students through the completion of collaborative and individual projects. Gnomon students develop their creative concepts into fully realized production assets, utilizing methods and workflows used every day in the entertainment industry. Gnomon graduates enter the video game, visual effects, and film industries armed with competitive portfolios and a network of peers and industry-affiliated professionals to provide sustainable support.

ACCREDITATION

STATE APPROVAL

Gnomon is accredited by the Accrediting Commission of Career Schools and Colleges (ACCSC). ACCSC is recognized by the United States Department of Education as a private, non-profit, independent accrediting agency that provides accreditation to institutions that are predominantly organized to educate students for occupational, trade, and technical careers.

ACCSC's mission is to serve as a reliable authority on educational quality and to promote enhanced opportunities for students by establishing, sustaining, and enforcing valid standards and practices which contribute to the development of a highly trained and competitive workforce through quality careeroriented education.

Gnomon has been recognized by ACCSC as a 2015 ACCSC School of Excellence.

ACCSC Contact: 2101 Wilson Boulevard, Suite 302 Arlington, Virginia 22201 accsc.org Phone: 703.247.4212 Fax: 703.247.4533 Gnomon is approved to operate as a private postsecondary school in the State of California as based on provisions of the California Private Postsecondary Education Act (CPPEA) of 2009, which was effective January 1st, 2010. The CPPEA is administered by the Bureau for Private Postsecondary Education (BPPE), under the Department of Consumer Affairs. *§94909(a) (2) & §94897(l)*

Any questions a student may have regarding this Gnomon Student Catalog that have not been satisfactorily answered by the institution may be directed to the Bureau for Private Postsecondary Education (BPPE). S94909(a)(3)(A)

BPPE Contact: 2535 Capitol Oaks Drive, Suite 400 Sacramento, CA 95833 <u>bppe.ca.gov</u> Phone (local): (916) 431 – 6959 Toll-free Phone: (888) 370 – 7589 Fax: (916) 263 – 1897

NOTICE TO PROSPECTIVE STUDENTS

As a prospective student, you are encouraged to review this Gnomon Student Catalog prior to signing an Enrollment Agreement. You are also encouraged to review the School Performance Fact Sheet, which must be provided to you prior to signing an Enrollment Agreement. \$94909(a)(3)(B)

PROGRAMS: DEGREE

BACHELOR OF FINE ARTS (BFA) IN DIGITAL PRODUCTION

Gnomon's Bachelor of Fine Arts in Digital Production program is a full-time, four (4) year, or 12 quarter 3D Generalist course of study.

BACHELOR OF FINE ARTS (BFA) IN DIGITAL PRODUCTION OBJECTIVE

The objective of the Bachelor of Fine Arts in Digital Production program is to produce entry-level production artists who are versed in general academic knowledge, foundational arts, and production skills.

The BFA curriculum is geared towards students who desire entry into careers as digital artists in the video game, visual effects, or film industries. Digital class sizes are limited to eighteen (18) students or fewer, offering students ready access to each of their instructors. In addition to being graded and evaluated in every course, students benefit from in-depth feedback on their work through regular, formal critiques, ensuring the development of artistic, technical, and problem-solving skills.

Faculty teaching general education in the BFA Digital Production program possess, at minimum, a master's degree with a minimum of fifteen (15) semester credit hours (or the equivalent) in related subject areas which support the curriculum content. Faculty teaching technical education in the BFA Digital Production program possess, at minimum, four (4) years of related practical work experience in the subject area(s) taught and possess a related degree at least at the same level of the course the faculty member is teaching.

Program Specifics:

- Twelve (12) 10-week quarters
- Four (4) years to complete (48 months)
- 1,830 clock hours
- 180 quarter credit units of which 45 units are dedicated to General Education

Artwork by Christen Smith – Concept by Bryan Sola

Course Delivery

- Most courses consist of three (3) hours of lecture and demonstration per week
- A typical full-time student will spend two (2) hours of out-of-class work for each didactic course hour
- Instruction may be held any day of the week during stated class hours, 9:00am-10:00pm
- Students are encouraged to utilize additional on-campus, studio lab time to complete assignments

The Bachelor of Fine Arts in Digital Production program requires a minimum of 180 quarter credit units to complete, defined as:

Credit Hour: One quarter credit hour equals 30 units comprised of the following academic activities:

- One clock hour in a didactic learning environment = 2 units
- One clock hour in a supervised laboratory setting of instruction = 1.5 units
- One hour of out-of-class work and/or preparation for the didactic learning environment or supervised laboratory setting of instruction that is designed to measure the student's achieved competency relative to the required subject matter objectives = 0.5 unit

To obtain the Bachelor of Fine Arts in Digital Production degree, candidates must fulfill all the course requirements, adhere to all rules of conduct, and remain in good standing. Students in the BFA program must pass all courses with a C or better to remain in good standing. If a student does not pass a course the first time, the student will need to retake the course at their cost until a grade of C or better is attained. Repeated failure to pass the course may result in jeopardizing the student's academic standing, program completion within the maximum time frame offered, or ability to advance within the program. Please refer to Gnomon's Satisfactory Academic Policy (SAP) standards.

Financial aid is available for those who qualify. This school is authorized under Federal law to enroll nonimmigrant alien students.

Gnomon's gainful employment disclosure may be found at <u>www.gnomon.edu/about/gainful-employment</u>.

PROGRAMS: VOCATIONAL

DIGITAL PRODUCTION FOR ENTERTAINMENT (DP)

Gnomon's certificate in Digital Production for Entertainment (DP) is a full-time, two-year program. The objective of the DP program is to produce entry-level production artists who are versed in foundational arts and production skills. The DP course of study is intended for students who desire entry into careers as digital artists in the video game, visual effects, or film industries, and have a background in art. The curriculum is designed to expose students to production-specific concepts, tools, and techniques. Projects are geared towards providing students with real-world experience. Students follow a pre-set curriculum and are automatically registered into required courses each term. Digital class sizes are limited to eighteen (18) students.

Gnomon offers five areas of emphasized study for students enrolled in the Digital Production for Entertainment (DP) program. All graduates of this program have the same outcomes and placement opportunities regardless of chosen area of emphasis.

- Modeling and Texturing
- Character and Creature Animation
- Visual Effects Animation
- 3D Generalist
- Games

Gnomon's instructors are established industry professionals with, at minimum, four (4) years of production experience. In addition to being graded and evaluated in every course, students benefit from in-depth feedback on their work through regular, formal critiques, ensuring the development of artistic, technical, and problem-solving skills.

Financial aid is available for those who qualify. This school is authorized under Federal law to enroll nonimmigrant alien students.

Gnomon's gainful employment disclosure may be found at www.gnomon.edu/about/gainful-employment.

Artwork by Toby Lewin

EDUCATION FOR CAREERS IN 3D ARTISTRY

Gnomon's courses are specifically designed to develop entry-level production artists who possess both fundamental and specific skills that are transferable across media.

After studying fundamentals during the first two (2) terms, the remainder of the program allows for emphasized study in n area of interest. The program's outcomes are consistent for all graduates regardless of emphasis.

Modeling and Texturing

Students studying Modeling and Texturing are guided through the process of 3D asset creation for films and games. To develop a strong understanding of form, texture, and detail, students are trained in the fundamentals of anatomy, sculpture, painting, and design. With a balance of foundational education and software-based technical training, Gnomon's Modeling and Texturing curriculum offers students an indepth skill set relevant to the demands of the industry.

Character and Creature Animation

Students studying animation at Gnomon are trained to capture believable and appealing performances in their characters and creatures through the application of fundamental animation concepts, software techniques, and acting skills. Coursework covers a variety of animation methods including traditional and computer, as well as technical character rigging. With a balance of foundational education and software-based technical training, Gnomon's Character and Creature Animation curriculum offers students an in-depth skill set relevant to the demands of the industry.

Visual Effects Animation

Students studying Visual Effects explore the various processes by which imagery is created or manipulated outside of a live action shot, including the blending of background plates or matte paintings with 3D architectural, character, or elemental assets. Course content includes lighting and filming techniques, tracking and compositing of elements, and creating both particle and dynamic effects. Utilizing industry software such as Houdini, Maya, Nuke, After Effects, Photoshop, Realflow, and more, Gnomon's Visual Effects Animation curriculum offers students an indepth skill set relevant to the demands of the industry.

3D Generalist

Students studying Gnomon's 3D Generalist curriculum are trained on all aspects of 3D production. This area of study is ideal for students who desire a breadth of knowledge and a skill set that allows them to work in a variety of fields across the various entertainment industries. Curriculum covers multiple subjects with a focus on tools, processes, and workflow, utilizing industry software such as Maya, ZBrush, Photoshop, After Effects, Nuke, Mari, Houdini, and more. With a balance of foundational education and software-based technical training, Gnomon's 3D Generalist courses offer students an extensive skill set relevant to the demands of the industry.

Games

Students studying Gnomon's Games curriculum are trained on the tools, processes and workflows of game production utilizing industry software such as Unreal 4, Maya, ZBrush, Substance Painter and Designer, Photoshop, Marmoset Toolbag, and more. Courses cover multiple subjects and provide opportunities to create real-time artwork across a variety of disciplines. With a balance of foundational education and software-based technical training, Gnomon's Games curriculum offers students an extensive and in-depth skill set relevant to the demands of the industry.

Artwork by Sonja Christoph

DIGITAL PRODUCTION FOR ENTERTAINMENT (DP) PROGRAM OBJECTIVES

The objective of the DP program is to produce entry-level production artists who are versed in foundational arts and production skills.

Students will:

- Learn how to effectively use production tools to capture images using high-definition digital cameras, lighting rigs, and grip equipment;
- Study how to develop 3D imagery within a collaborative environment;
- Possess a knowledge of computer graphics tools and processes, in preparation for working in a multitude of studio production formats including games, episodic television, and film; and
- Build and maintain a representative compilation of work demonstrating proficiencies within computer graphics and related fields.

Graduates leave with a representative compilation of their work and a network of peers and industry-affiliated professionals.

Program Specifics

- Eight (8)10-week terms
- Two (2) years to complete (24 months)
- 1,905 clock hours
- 147 quarter credit units

Course Delivery

- Most courses consist of three (3) hours of lecture and demonstration per week
- A typical full-time student will spend two (2) out-of-class hours for each class hour
- Some courses may be offered online, with approval
- Instruction may be held any day of the week
- Students are encouraged to utilize additional studio lab time, up to 24 hours per week, to complete assignments

PROGRAMS: VOCATIONAL

ENTERTAINMENT DESIGN AND DIGITAL PRODUCTION (EDDP)

Gnomon's certificate in Entertainment Design & Digital Production (EDDP) is a full-time, three (3) year program comprised of one (1) year of foundational art and design courses with two (2) years of instruction in digital production. The objective of the EDDP program is to produce entry-level production artists who are versed in foundational arts and production skills. The curriculum is geared towards students who desire careers as digital artists in the video game, visual effects, or film industries, but have limited traditional art skills.

Gnomon offers five (5) areas of emphasized study for students enrolled in the Entertainment Design & Digital Production (EDDP) program. Students build general artistic and technical skills in the first six (6) terms, then choose from one area of emphasis. All graduates of this program have the same outcomes and placement opportunities regardless of chosen area of emphasis.

- Modeling and Texturing
- Character and Creature Animation
- Visual Effects Animation
- 3D Generalist
- Games

Gnomon's instructors are established industry professionals with extensive production experience. In addition to being graded and evaluated in every course, students benefit from in-depth feedback on their work through regular critiques. Digital class sizes are limited to eighteen (18) students and offer students access to each of their instructors.

Financial aid is available for those who qualify. This School is authorized under Federal law to enroll nonimmigrant alien students.

Gnomon's gainful employment disclosure may be found at <u>www.gnomon.edu/about/gainful-employment</u>.

Artwork by Francesco Corvino

EDUCATION FOR CAREERS IN 3D ARTISTRY

Gnomon's courses are specifically designed to develop entry-level production artists who possess both fundamental and specific skills that are transferable across media.

After studying fundamentals during the first six (6) terms, the remainder of the program allows for emphasized study in an area of interest. The program's outcomes are consistent for all graduates regardless of emphasis.

Modeling and Texturing

Students studying Modeling and Texturing are guided through the process of 3D asset creation for films and games. To develop a strong understanding of form, texture, and detail, students are trained in the fundamentals of anatomy, sculpture, painting, and design. With a balance of foundational education and software-based technical training, Gnomon's Modeling and Texturing curriculum offers students an indepth skill set relevant to the demands of the industry.

Character and Creature Animation

Students studying animation at Gnomon are trained to capture believable and appealing performances in their characters and creatures through the application of fundamental animation concepts, software techniques, and acting skills. Coursework covers a variety of animation methods including traditional and computer, as well as technical character rigging. With a balance of foundational education and software-based technical training, Gnomon's Character and Creature Animation curriculum offers students an in-depth skill set relevant to the demands of the industry.

Visual Effects Animation

Students studying Visual Effects explore the various processes by which imagery is created or manipulated outside of a live action shot, including the blending of background plates or matte paintings with 3D architectural, character, or elemental assets. Course content includes lighting and filming techniques, tracking and compositing of elements, and creating both particle and dynamic effects. Utilizing industry software such as Houdini, Maya, Nuke, After Effects, Photoshop, Realflow, and more, Gnomon's Visual Effects Animation curriculum offers students an in-depth skill set relevant to the demands of the industry.

3D Generalist

Students studying Gnomon's 3D Generalist curriculum are trained on all aspects of 3D production. This area of study is ideal for students who desire a breadth of knowledge and a skill set that allows them to work in a variety of fields across the various entertainment industries. Curriculum covers multiple subjects with a focus on tools, processes, and workflow, utilizing industry software such as Maya, ZBrush, Photoshop, After Effects, Nuke, Mari, Houdini, and more. With a balance of foundational education and software-based technical training, Gnomon's 3D Generalist courses offer students an extensive skill set relevant to the demands of the industry.

Games

Students studying Gnomon's Games curriculum are trained on the tools, processes and workflows of game production utilizing industry software such as Unreal 4, Maya, ZBrush, Substance Painter and Designer, Photoshop, Marmoset Toolbag, and more. Courses cover multiple subjects and provide opportunities to create real-time artwork across a variety of disciplines. With a balance of foundational education and software-based technical training, Gnomon's Games curriculum offers students an extensive and in-depth skill set relevant to the demands of the industry.

Artwork by Daniel Kho - Concept by Renan Nuche

ENTERTAINMENT DESIGN AND DIGITAL PRODUCTION (EDDP) PROGRAM OBJECTIVES

The objective of the EDDP program is to produce production-ready artists who are versed in foundational arts and production skills.

Students will:

- Learn how to effectively use production tools to capture images using high-definition digital cameras, lighting rigs, and grip equipment;
- Study how to develop 3D imagery within a collaborative environment;
- Possess a knowledge of computer graphics tools and processes, preparing them to work in a multitude of studio production formats including games, episodic television, and film; and
- Build and maintain a representative compilation of work demonstrating proficiencies within computer graphics and related fields.

Graduates leave with a representative compilation of their work and a network of peers and industry-affiliated professionals.

Program Specifics

- Twelve 10-week terms
- Three (3) years to complete (36 months)
- 2,805 clock hours
- 219 quarter credit units

Course Delivery

- Most courses consist of three (3) hours of lecture and demonstration per week
- A typical full-time student will spend two (2) out-of-class hours for each class hour
- Some courses may be offered online, with approval
- Instruction may be held any day of the week
- Students are encouraged to utilize additional studio lab time, up to 24 hours per week, to complete assignments

ENTERTAINMENT DESIGN AND DIGITAL PRODUCTION (EDDP) COURSE GRID

Entertainment Design and Digital Production core curriculum. Course descriptions may be found in Appendix 3.

TERM 1

Photoshop for Digital Production	3 credits
Life Drawing	3 credits
Overview of Digital Production	3 credits
Drawing in 3D	3 credits
Drawing Fundamentals 1	3 credits
Art History 1	3 credits

TERM 3

Storyboarding	3 credits
Animal Drawing	3 credits
Character Design	3 credits
Product Design	3 credits
Color Theory and Light	3 credits
Design History	3 credits

TERM 5

Introduction to 3D with Maya	3 credits
Introduction to Compositing	3 credits
Advanced Character Design	3 credits
Texturing and Shading 1	3 credits
Advanced Digital Painting	3 credits
History of Visual Effects	3 credits

TERM 2

Character Sculpture 1	3 credits
Costumed Figure Drawing	3 credits
Anatomy for Artists	3 credits
Graphic Design	3 credits
Drawing Fundamentals 2	3 credits
Art History 2	3 credits

TERM 4

ADMISSIONS

BACHELOR OF FINE ARTS IN DIGITAL PRODUCTION (BFA), DIGITAL PRODUCTION FOR ENTERTAINMENT (DP) & ENTERTAINMENT DESIGN AND DIGITAL PRODUCTION (EDDP) ADMISSIONS PROCEDURE

All applicants to our full-time programs must:

- Complete an online application form
- Submit a portfolio that demonstrates artistic ability as outlined in the published portfolio guidelines
- Pay an application fee
- Provide proof of high school completion or equivalent
- Complete an interview by an Admissions representative

All portfolios can be sent digitally to admissions@gnomon.edu.

Physical portfolios can be mailed to:

Attn: Admissions Gnomon 1015 N. Cahuenga Blvd. Ste. 5430i Los Angeles, CA 90038

Applications are accepted on an on-going basis, though students are encouraged to apply as soon as possible to obtain their desired start dates. (See the Gnomon Academic Calendar)

Once all components of the application have been completed, the Admissions Review Committee will survey the application.

A student may be denied admission for failure to meet any of the requirements listed above or if determined incapable of benefiting from the educational goals of the program. Applicants denied acceptance are encouraged to obtain further course advisement from the Admissions Office. Additionally, the Admissions Office reserves the right to revoke acceptance from any student who breaks Gnomon's school policies prior to attendance.

For further questions regarding admissions, students should contact <u>admissions@gnomon.edu</u>.

Artwork by Lucas Sparks - Concept by Naughty Dog

AVOCATIONAL INDIVIDUAL COURSES & DISTANCE EDUCATION

Gnomon's avocational individual courses are designed for artists seeking further education to improve their skills and expand their marketability in the industry. Immerse yourself in the creative environment of our Hollywood campus and study with industry professionals. Courses cover a variety of subjects within film, game, and visual effects production.

- Available evenings and weekends to accommodate work schedules
- Curricula and projects are geared toward providing students relevant skills
- Instruction from industry professionals
- Studio lab time is available
- Courses meet once per week for 10 weeks and are available four terms per year

Individual courses are outside of institutional accreditation and do not lead to a certificate/diploma.

ADMISSION REQUIREMENTS FOR INDIVIDUAL COURSES

Individual courses are available for enrollment without portfolio submission, however, it is strongly recommended that prospective students communicate with Gnomon's Admissions Office for course advisement prior to registering. In some cases, prerequisites may be required. Gnomon reserves the right to close any course or limit the enrollments for any course. Additionally, Gnomon reserves the right to reject individual course enrollment to any student who breaks Gnomon's school policies.

Certain avocational courses may transfer into Gnomon's vocational or degree programs. For more information, please contact <u>admissions@gnomon.edu</u>.

Artwork by Li Wan

POLICIES FOR INDIVIDUAL COURSES

HOW TO DROP A COURSE

Drop requests must be submitted via email to: registrar@gnomon.edu.

The request must include the following:

- Student's full legal name and Gnomon student ID number
- The date of request submission
- Name of the course(s) being dropped
- Briefly, why the course(s) is being dropped

The effective date of the drop is the day the drop request is received, not the last day of attendance. Failure to officially drop a course will result in a failing grade.

WITHDRAWAL AND REFUNDS

Students have the right to withdraw from the program of instruction at any time. If 60% or less of the period of attendance has been completed, a refund may be due.

Drop/refund request must be addressed to <u>registrar@gnomon.edu</u>. Tuition refunds are based on the date the written drop request is received via email (or the last date of attendance if no notice is received). Refunds will be made within 45 days of the date of cancellation. Please refer to the confirmation letter for the refund calendar. Requests will be processed during regular business hours: Monday through Friday from 9 a.m. to 6 p.m.

RESERVATION OF RIGHTS

Gnomon reserves the right to change tuition fees, scheduled dates of courses, course offerings, instructors, policies, and procedures pursuant to California Code of Regulations (CCR) and California Education Code (CEC). Gnomon also reserves the right to deny enrollment in courses to any student and the right to withdraw any student whose conduct fails to comply with the policies, rules, and standards of Gnomon.

For additional policies pertaining to Individual Courses, please see Gnomon's General Policies in this catalog. Gnomon's gainful employment disclosure may be found at <u>www.gnomon.edu/about/gainful-employment</u>.

INFORMATION & POLICIES FOR DISTANCE EDUCATION

Distance Education courses are designed to mirror the learning environment of Gnomon's physical courses. The same considerations are applied to students regardless if registering for an Individual or Distance Education course. Currently, Distance Education courses are limited to students within the state of California, or outside of the United States. Distance Education courses are avocational in nature, outside of institutional accreditation and do not lead to a certificate/diploma.

ADMISSIONS

Students interested in Distance Education courses should first complete the online "Preparedness Survey" located here: <u>http://online.gnomon.edu/survey/student-online-class-preparedness</u>.

- Students may register online. Please see gnomon.edu/courses/online/how-to-register
- At least 50% of tuition and fees are required to complete registration
- Space is reserved once a registration form, tuition, and applicable fees have been received
- Confirmation of enrollment is electronically mailed upon receipt of payment
- This transaction receipt can also serve as proof of student status for purchasing educational software. Please note that not all software manufacturers provide educational prices on their software
- In some cases, prerequisites may be required

For questions regarding online registration, visit our website at <u>gnomon.edu</u> or call (323) 466 – 6663.

DISTANCE EDUCATION COURSE AND SPECIFICS

- Courses are delivered as a live broadcast on a preset schedule, typically three (3) hours per week
- Instructors will, at their discretion, record their course lectures
- Weekly homework and/or final projects are assigned in every course
- Instructors will provide critiques and feedback on assignments during course lecture time
- Courses may transfer to Gnomon's vocational program. Contact an Admissions representative for more information

DISTANCE EDUCATION COMPUTER EQUIPMENT

- Students are responsible for providing/ maintaining their own computer equipment, software, broadband Internet access, and other material
- The predominant 3D software used is Autodesk Maya. Adobe Photoshop is also widely used
- Enrolled students will need to secure a version of software that is current with or newer than the one required by the course
- Other software requirements will vary. Please see the course descriptions on the Gnomon website for Individual Course requirements
- Students must meet the minimum system requirements and are required to have a webcam and microphone

STUDENT SERVICES FOR DISTANCE EDUCATION

Students enrolled in Individual Courses via distance education have access to many of the services described in the Student Services section of this catalog. Distance education courses are designed to not require services that are only accessible on campus, such as the physical lending library, on-campus computer labs, or walk-in mentoring and tutoring, however access to similar services or resources may be arranged by contacting <u>admissions@gnomon.edu</u>.

ATTENDANCE FOR DISTANCE EDUCATION

Student attendance is taken every week by the instructor and is also tracked by the online system. All students enrolled in an online course are required to have a working webcam for each class session. Instructors will validate attendance at the beginning of each class using your webcam presence. Failure to have a working webcam will result in the instructor marking the student absent for class session. Webcams allow students to communicate directly with the instructor of the class without the distractions of using the chat module in the application. This helps to facilitate a more interactive experience for both the student and instructor.

HOW TO DROP A COURSE FOR DISTANCE EDUCATION

Drop requests must be submitted via email to: registrar@gnomon.edu.

The request must include the following:

- Student's full legal name and Gnomon student ID number
- The date of request submission
- Name of the course(s) being dropped
- Briefly, why the course(s) is being dropped
- The effective date of the drop is the day the drop request is received, not the last day of attendance.
 Failure to officially drop a course will result in a failing grade.

WITHDRAWAL AND REFUNDS FOR DISTANCE EDUCATION

Students have the right to withdraw from the program of instruction at any time. If 60% or less of the period of attendance has been completed, a refund may be due.

Drop/refund request must be addressed to <u>registrar@</u> <u>gnomon.edu</u>. Tuition refunds are based on the date the written drop request is received via email (or the last date of attendance if no notice is received). Refunds will be made within 45 days of the date of cancellation. Please refer to the confirmation letter for the refund calendar.

Requests will be processed during regular business hours: Monday through Friday from 9 a.m. to 6 p.m.

FOUNDATION IN ART & DESIGN

FOUNDATION IN ART & DESIGN OBJECTIVES

The objective of the Foundation in Art and Design is to prepare students for entry to vocational or degree-level art and design scholastic programs.

Students follow a quarterly curriculum but are given the flexibility to enroll in any stand-alone quarter they choose, allowing them to begin their studies at the point most suitable to their existing proficiency. Foundation courses provide students an opportunity to assess their interest and proficiency in the visual arts, while developing fundamental skills that are essential building blocks to the subsequent development of a vocational skill set.

Gnomon's instructors are industry professionals with, at minimum, three (3) years of related practical work experience in the subject area(s) taught. In addition to being graded and evaluated in every course, students benefit from feedback on their work through critiques. Small class sizes are limited to eighteen (18) students or fewer, offering students access to each of their instructors.

The Foundation in Art and Design is ineligible for a degree or certificate of completion, is not vocational in nature, and does not lead to initial employment.

Course Specifics

- Four (4)10-week terms, up to one year of study
- 120 total clock hours, per term
- 16 quarter credit units, per term

Course Delivery

- Most courses consist of three (3) hours of lecture and demonstration per week
- A typical full-time student will spend two (2) hours of out-of-class for each course hour
- Instruction may be held any day of the week
- Students are encouraged to utilize additional on campus, studio lab time to complete assignments

Artwork by Hannah Kang - Concept by Chris Sanders

ADMISSIONS

FOUNDATION IN ART & DESIGN ADMISSIONS

Students interested in enrolling in the Foundation in Art and Design course of study must:

- Complete a consultation with an Admissions representative
- Provide proof of high school completion or equivalent
- Complete an online application
- Pay a \$25 enrollment fee

Applications are accepted on an on-going basis, though students are encouraged to apply as soon as possible to obtain their desired start dates (See the <u>Gnomon Academic Calendar</u>). A student may be denied admission for failure to meet any of the requirements listed above. Gnomon reserves the right to close any course or limit the enrollments for any course. Additionally, Gnomon reserves the right to deny enrollment to any student who breaks Gnomon's school policies.

For further questions regarding admissions, students should contact admissions@gnomon.edu.

FOUNDATION IN ART & DESIGN POLICIES

TRANSFER OF CREDIT TO A GNOMON PROGRAM

Specific courses may transfer to Gnomon's full-time programs. It is the student's responsibility to discuss transferability of Foundation courses with the Admissions Office and/or Registrar prior to enrollment.

Artwork by Leonardo Krajden

WITHDRAWALS AND REFUNDS

Students have the right to withdraw from the program of instruction at any time. If 60% or less of the period of attendance has been completed, a refund may be due.

Drop/refund request must be addressed to <u>registrar@gnomon.edu</u>. Tuition refunds are based on the date the written drop request is received via email (or the last date of attendance if no notice is received). Refunds will be made within 45 days of the date of cancellation. Please refer to the confirmation letter for the refund calendar.

Requests will be processed during regular business hours: Monday through Friday from 9 a.m. to 6 p.m.

STUDENT SERVICES FOR FOUNDATION IN ART & DESIGN

Students enrolled in the Foundation in Art and Design have access to many of the services described in the <u>Stu-</u> <u>dent Services</u> section of this catalog. The Foundation in Art and Design does not lead to initial employment, and is therefore not eligible for placement services.

GRIEVANCES

To ensure the quality of education at Gnomon, the student grievance process aims to provide a prompt and equitable resolution for allegations that a school decision or action may have violated institution policies, or adversely affected a student's status, rights, or privileges. See <u>Grievances</u> in this catalog for policies and procedures.

Artwork by Li Wan

INTERNATIONAL STUDENTS

Gnomon strongly recommends that International students review and familiarize themselves with all of the language on any legal document pertaining to their nonimmigrant status.

International students will need to work with either an attorney of their choosing or the appropriate Gnomon staff members with questions pertaining to their nonimmigrant status.

While Gnomon will assist in all nonimmigrant issues pertaining to the program, it is strongly encouraged that students utilize International legal counsel. Please be aware that Gnomon cannot guarantee the outcome or decision rendered by any governing federal agency that falls under the U.S. Department of Homeland Security.

All international students enrolled in a full-time program must pay a nonrefundable \$150.00 international student processing fee.

International applicants must meet the same admission requirements as U.S. citizens. In addition to the application, a Certificate of Finances must be completed and submitted with the application. All documents must be accompanied by an official English translation and evaluation from an approved service provider. All applicants are required to speak with an Admissions Representative via phone or in person to ensure that their program of interest is appropriate. Gnomon does not offer English language services. Applicants from countries in which the official language is not English are required to submit official evidence of English language proficiency. For examples of this requirement please see below in Evidence of English Proficiency Requirement.

While Gnomon requires students to speak and read English fluently to be admitted and participate in a course, any student whose primary language is not English may obtain translation services before enrollment for the purposes of understanding the terms of the Enrollment Agreement. Accordingly, if English is not the primary language of the student completing this agreement, and the student is unable to understand the terms and conditions of the agreement, the student has the right to obtain a clear explanation of the terms and conditions and all cancellation and refund policies in his or her primary language. Translation services for the enrollment agreement will be provided by a school official upon request at no cost. *§94906(a) & §94906 (b)*

If you have any further questions regarding international student information/services, please contact <u>regis-</u> <u>trar@gnomon.edu</u>.

Artwork by Jorik Dozy

EVIDENCE OF ENGLISH PROFICIENCY REQUIREMENT

Students must be able to read, write, speak, understand, and communicate in English. All applicants whose native language is not English are required to submit the results of the TOEFL or IELTS as evidence of English proficiency.

The minimum requirements by Gnomon are as follows:

- TOEFL score of at least 75 on the Internet-based test (IBT)
- IELTS band score of at least 6 on a 9-point scale

Applications from international students may not be reviewed if an English proficiency score is unavailable or not included.

LEAVE OF ABSENCE FOR INTERNATIONAL STUDENTS

International students must abide by the regulations of their nonimmigrant status and will only be granted a Leave of Absence (LOA) if the circumstances adhere to the regulations. Please refer to the "Title 8: Aliens and Nationality" section of the United States Citizen and Immigration Services website <u>www.uscis.gov</u>.

Please be advised that LOA's for International Students are not recommended due to United States Citizenship and Immigration Services (USCIS) regulations. To set up an appointment to discuss taking an LOA as an International student, please contact the Registrar at registrar@gnomon.edu.

CHANGE OF PROGRAM GRID FOR INTERNATIONAL STUDENTS

International students who change their area of emphasis, and thereby their program grid, must consult with the Registrar to review their nonimmigrant status and make any necessary adjustments. Please be advised that grid changes are not recommended for International students due to United States Citizenship and Immigration Services (USCIS) time restraints and regulations. To set up an appointment to discuss these regulations, please contact registrar@gnomon.edu.

Artwork by Nathan Boyd

SCHOLARSHIPS

MERIT-BASED SCHOLARSHIPS

Gnomon offers institutional, merit-based scholarships in the form of tuition discounts to those who qualify. Meritbased scholarships are awarded to incoming program applicants based on the strength of their application, portfolio, and admissions interview.

To be eligible for consideration, candidates must:

- Be an applicant to a Gnomon full-time program
- Have completed all application requirements prior to the corresponding application deadline
- Have no previous record of enrollment in a Gnomon full-time program

Scholarships are nontransferable and have no redeemable cash value. Award amounts will vary. A change of program or start date deferral could result in the cancellation of a scholarship award. For more information, please contact <u>admissions@gnomon.edu</u>.

NEED-BASED SCHOLARSHIPS

Gnomon offers need-based scholarships quarterly in the form of tuition discounts to current students in need of financial assistance.

To apply, students must:

- Complete a FAFSA for the current award year
- Write an essay of 250 words on a given topic

For more information, please contact finaid@gnomon.edu.

FINANCIAL AID

Gnomon participates in California State grants (Cal Grants A, B and C) and Title IV Federal financial aid programs (Pell and FSEOG Grants, Direct Loans, Work-Study). For qualifying individuals, State and Federal financial aid may apply towards the Digital Production for Entertainment (DP) and Entertainment Design & Digital Production (EDDP) certificate programs, and the Bachelor of Fine Arts (BFA) in Digital Production degree program.

Federal and State financial aid can only be applied to certificate and degree programs, and is not available to students enrolled in Foundation in Art & Design, Distance Education or Individual Courses. Private credit-based education loans may be available for Foundation in Art & Design and Individual Course options. Private credit-based education loans are not available to Distance Education enrollees. Please contact the Financial Aid Office at <u>finaid@gnomon.edu</u> or (323) 466 – 6663 for more information.

Students interested in financial aid should start by completing the Free Application for Federal Student Aid (FAFSA). The FAFSA is the gateway to all Federal aid sources and covers July 1st of one (1) year through June 30th of the next. This is called the "award year." The FAFSA must be completed each year in order for a student to continue to be considered. The FAFSA can be filed electronically at <u>fafsa.ed.gov</u>. Entering Gnomon's school code (040764) will give the school access to an applicant's FAFSA results. An FSA ID username and password are required and this will act as the student's electronic signature. Students will also be able to use this on all of the Federal Student Aid sites.

Within roughly 72 hours of submitting a FAFSA, Gnomon will receive a Student Aid Report (SAR). The SAR is a summary of information entered on the FAFSA and serves both for proofing the submitted information and as the student's official receipt of FAFSA submission. If errors are noted on the SAR, they can be corrected online at <u>fafsa.ed.gov</u>. Once the SAR is correct, contact the Financial Aid Office at <u>finaid@gnomon.edu</u> or by calling (323) 466 - 6663 for information on how to proceed.

Students who obtain loans to pay for educational programs must agree to repay the full amount of the loan plus interest.

FINANCIAL AID PROGRAMS

A brief description of each type of aid offered is as follows.

Federal Pell Grant

Federal Pell grants are based on financial need, cost of attendance, and student enrollment status. The maximum Federal Pell Grant award for the 2018-2019 Award Year is \$6,095.00. The maximum Pell eligible EFC is \$5,486.00 with a minimum award for a full-time student of \$652.00. Grant amounts are determined by the Financial Aid Office based on the results of the student's FAFSA. The FAFSA must be received before or during enrollment. FAFSAs received after withdrawal or completion of a program cannot be considered.

Federal Supplemental Educational Opportunity Grant (FSEOG)

FSEOG is another form of grant that is available to Pell grant recipients. Unlike the Pell grant, FSEOG is not an entitlement grant. Funds are allocated to Gnomon each year and are awarded until all funds are depleted.

Federal Direct Loans

Federal Direct Loans are for eligible students and parents to help pay for the cost of a student's education after high school. The U.S. Department of Education is the lender and a loan servicer will be assigned to provide services to students on behalf of the U.S. Department of Education.

Direct Subsidized Loans

Students who demonstrate financial need, are not in default on a previous student loan, and are enrolled at least half-time (a minimum of six [6] credit hours) are eligible for a Direct Subsidized loan. The government pays the interest while the student is in school, during the six (6) month post-enrollment grace period, or in an applicable loan deferment status. The interest rate for Direct Subsidized loans first disbursed between 07/1/2017 - 06/30/2018 is fixed at 4.45%.

Direct Unsubsidized Loans

Direct Unsubsidized loans are not need-based and the student is responsible for paying the interest that accrues while the student is in school, during the six (6) month post-enrollment grace period, or in an applicable loan deferment status. The interest rate for new Direct Unsubsidized loans first disbursed between 07/01/2017-06/30/2018 is fixed at 4.45%.

Direct PLUS (Parent Loans for Undergraduate Students) Loans

Parents can borrow on behalf of their dependent undergraduate students under this program. Because Direct PLUS loans are credit-based, they are not awarded or packaged automatically by the Financial Aid Office, but may be included on estimated Mastersheets for review. The amount is determined by the Financial Aid Office each year, and it equals the student's cost of attendance (tuition, fees and estimated living expenses) minus any financial aid the student receives.

Between 07/01/2017 - 06/30/2018, the interest rate is fixed at 7.00%. Interest is charged from the date of the first disbursement until the loan is paid in full. Parents may defer repayment on a Direct PLUS loan until six (6) months after the student ceases to be enrolled at least half-time (a minimum of six [6] credit hours). Parents can also decide to pay accruing interest monthly or quarterly, or allow interest to be capitalized. For parents considering a Direct PLUS loan, please contact the Financial Aid Office for information on the two (2) part application process.

State Financial Aid Programs

State financial aid in the form of Cal Grants are offered for all certificate and degree programs. To apply, students must complete a FAFSA and submit a GPA Verification Form by the March 2nd deadline each year. A student's eligibility for one of the three types of Cal Grants will be determined by the California Student Aid Commission. Students who already have a Bachelor's degree will not be eligible for a Cal Grant.

Cal Grant A

Cal Grant A will help pay for tuition and fees. A GPA requirement of 3.0 is required if using high school transcripts; a 2.4 GPA is required if using a college GPA.

Cal Grant B

Cal Grant B will provide only an 'annual Access Award' for the student's first year (which can be used to pay living expenses, books, supplies and transportation, as well as tuition and fees). After the first year, tuition and fee assistance will be included. The GPA requirement is at least a 2.0.

Cal Grant C

Specifically for certificate students, Cal Grant C will provide a books & supplies stipend (which can be used to pay living expenses, books, supplies and transportation, as well as tuition and fees) as well as reduced tuition and fee assistance for up to two years. There is no GPA requirement.

More information on the Cal Grant can be found here: <u>http://www.csac.ca.gov/cal-grant-faq-0</u>

Notice Regarding Private Education Loans

If you still need money after reaching the borrowing limits for Federal loans, you may consider private education loans as an alternative. Gnomon offers private education loans through Sallie Mae, but these must be coordinated with the Financial Aid Office. Prior to submitting a loan application, students must speak with the Admissions and Financial Aid offices to determine eligibility. Typically, students must be US Citizens or Permanent Residents, and must have good credit. A co-signer may be required.

Private education loans carry higher interest rates and fees than federal loans and may have less attractive repayment terms. The information in your credit report will be used to determine your eligibility and will have an impact on the interest rate you qualify for. If you would like to apply for a private loan, please contact the Financial Aid Office via email at finaid@gnomon.edu or by calling (323) 466 – 6663. It is also recommended that students review the information on this site beforehand: <u>studentaid.ed.gov/</u> sa/types/loans/federal-vs-private.

Notice to Students Regarding the Student Tuition Recovery Fund (STRF)* §76215 & §76020

The State of California created the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic losses suffered by students in educational programs who are California residents, or are enrolled in a residency program attending certain schools regulated by the Bureau for Private Postsecondary Education (BPPE). You may be eligible for STRF if you are a California resident or are enrolled in a residency program, prepaid tuition, paid the STRF assessment, or suffered an economic loss as a result of any of the following:

- The school closed before the course of instruction was completed;
- The school's failure to pay refunds or charges on behalf of a student to a third party for license fees;
- or any other purpose, or to provide equipment or materials for which a charge was collected within 180 days before the closure of the school.
- The school's failure to pay or reimburse loan proceeds under a federally guaranteed student loan program as required by law or to pay or reimburse proceeds received by the school prior to closure in excess of tuition and other costs;
- There was a material failure to comply with the Act or this Division within 30 days before the school closed or, if the material failure began earlier than 30 days prior to closure, the period determined by the Bureau; and
- An inability after diligent efforts to prosecute, prove, and collect on a judgment against the institution for a violation of the Act.

No claim can be paid to any student without a social security number or a taxpayer identification number. You are not eligible for protection from the STRF if either of the following applies:

- You are not a California resident, or are not enrolled in a residency program, or
- Your total charges are paid by a third party, such as an employer, government program or other payer, and you have no separate agreement to repay the third party.1

1 Effective January 1, 2015, the Student Tuition Recovery Fund (STRF) assessment will be zero (\$0.00) per \$1,000.00. Therefore, Gnomon will not collect STRF assessments from students until otherwise notified.

Artwork by Stefano Farci

REFUNDS & RETURNS FOR FINANCIAL AID STUDENTS

If a student withdraws from the institution and has attended 60% or less of the enrollment period, the prorated charge for the amount of time attended will be calculated and subtracted from the amount paid for the period in question. If the student did not receive any financial aid, any remaining credit balance will be refunded to the student.

The U.S. Department of Education certifies this institution as an eligible participant in the Federal Student Aid (FSA) programs established under the Higher Education Act of 1965 (HEA), as amended.

To calculate refunds under the Return of Title IV Funds policy, an institution must determine how much Federal assistance a student has earned which can be applied to the institutional charges.

If a student received more FSA funds than he or she earned under the Federal Return of Title IV Funds policy, the institution, and in some cases the student, is required to return the unearned funds to the appropriate Federal programs. The student must pay any unpaid balance to the institution that remains after the Return of Title IV Funds policy has been applied to the state/institutional policy. Any monies due an applicant or student will be refunded within 45 days of the date of cancellation, withdrawal, or termination. A withdrawal may be effectuated by the student's written notice or by the student's conduct, including, but not necessarily limited to, a student's lack of attendance.

If the amount of refund exceeds the unpaid balance of the loan, the remainder of the monies will be applied to any student financial aid programs from which the student received funding. Any remaining balance of funds will then be returned to the student.

If a student does not return following an approved leave of absence on the date indicated on the written request, refunds will be made within 45 days from the date the student was scheduled to have returned. For purposes of determining a refund, the last date of attendance is used when a student fails to return from an approved leave of absence.

RETURNING FUNDS TO THE FEDERAL PROGRAMS

If it is determined that a Federal refund is due, the statute and regulations clearly define the order in which remaining Federal student aid program funds are to be returned. Based on the student's financial aid award(s) (and his/her parent(s) in the case of PLUS Loans), the return of Federal funds will be returned to the appropriate program in the following order:

- 1. Federal Direct Unsubsidized Loans
- 2. Federal Direct Subsidized Loans
- 3. Federal Direct PLUS Loans
- 4. Federal Pell Grants
- 5. Federal Supplemental Education Opportunity Grant (SEOG)
- 6. Other federal, state, private and/or institutional sources of aid
- 7. The student

RETURN OF TITLE IV FUNDS REFUND POLICY

All institutions participating in the FSA programs are required to use a statutory schedule to determine the amount of FSA funds a student had earned when he or she ceases to attend, which is based on the period of time the student was in attendance.

If a recipient of the FSA Program withdraws from the institution during a payment period or a period of enrollment in which the student began attendance, the institution must calculate the amount of FSA program assistance the student did not earn, and those funds must be returned. Up through the 60% point in each payment period or period of enrollment (typically the last day of week six), a schedule is used to determine how much FSA program funds the student has earned at the time of withdrawal. After the 60% point in the payment period or period of enrollment, a student is considered as having earned 100% of the FSA funds and no refunds will be calculated.

The percentage of the payment period or period of enrollment completed is determined by the total number of calendar days in the payment period or period of enrollment for which the assistance is awarded, divided into the number of calendar days completed in that period as of the last date of attendance. Artwork by Alexandra Reeves

Scheduled breaks of at least five (5) consecutive days are excluded from the total number of calendar days in a payment period or period of enrollment (denominator) and the number of calendar days completed in that period (numerator). Days in which a student was on an approved leave of absence are also excluded in the calendar days for the payment period or period of enrollment.

Questions regarding refunds and/or returns may be directed to the Financial Aid Office via email at <u>finaid@gnomon.edu</u>.

VETERAN'S EDUCATIONAL BENEFITS

Gnomon is approved by the Veteran's Administration (VA) to provide educational benefits (Chapter 33, Yellow Ribbon, Vocational Rehabilitation, etc.), and is classified by the VA as an "Institute of Higher Learning" or IHL institution. There are several different types of educational benefits for veterans depending on the type, length, and date of service performed.

Veterans interested in applying their educational benefits to their enrollment at Gnomon should call the following number: (888) GI – BILL-1 or go to <u>benefits.</u> <u>va.gov/gibill</u> for more information. The Certificate of Eligibility will indicate how much of a student's benefits are eligible to be applied.

Once a student has determined how their benefits may be applied at Gnomon, the student may contact the Financial Aid Office at <u>finaid@gnomon.edu</u> or by calling (323) 466 – 6663.

A student should submit their Certificate of Eligibility when inquiring about financial assistance.

INSTRUCTION & LAB INFORMATION CLASS HOURS/COURSE LENGTH UNIT OF CREDIT

One class hour equals one class period of 50 minutes. To provide a comparison with programs in other postsecondary schools, the course length is expressed in quarter credit units and weeks. Each 50-minute period has a suggested 10-minute break which may be taken at the instructor's discretion.

INSTRUCTIONAL SCHEDULE

Courses are offered seven (7) days per week. Class periods are as follows:

1st period: 9 a.m. to 12 p.m. (noon) 2nd period: 1 p.m. to 4 p.m. 3rd period: 4 p.m. to 7 p.m. 4th period: 7 p.m. to 10 p.m.

Occasionally schedules may differ from the above, based on instructor or room availability.

LAB SCHEDULE

Gnomon operates computer labs and studios from 9 a.m. to 1 a.m. seven (7) days a week, excluding holidays. At least one Systems Engineer is on duty at all times. Students are encouraged to utilize Gnomon's facilities with the added benefit of learning from their peers and upperclassmen. Gnomon operates on a quarter term calendar. The unit of measure for the valuation of all courses is a quarter credit hour.

A credit hour is defined as an amount of work represented in intended learning outcomes and verified by evidence of student achievement for academic activities, as established by the institution and comprised of the following units: didactic learning environment, supervised laboratory setting of instruction, externship, and/or out-of-class work/preparation.

Credit Hour Breakdown:

One quarter credit hour equals 30 units comprised of the following academic activities:

- One clock hour in a didactic learning environment = 2 units
- One clock hour in a supervised laboratory setting of instruction = 1.5 units
- One hour of externship = 1 unit
- One hour of out-of-class work and/or preparation for the didactic learning environment or supervised laboratory setting of instruction designed to measure the student's achieved competency, relative to the required subject matter objectives = 0.5 unit

CHANGE OF PROGRAM GRID

This section pertains only to the Digital Production for Entertainment (DP) and Entertainment Design and Digital Production for Entertainment [EDDP) programs. Students wishing to change their emphasis of study, and thereby their program grid, must submit a written request to the Registrar no later than week seven (7) of the term. A student's decision to change their emphasis may require the student to meet with an Education Academic Mentor, take additional requirements of the new grid, and postpone program completion and graduation.

Students may contact the Registrar via email at <u>registrar@gnomon.edu</u> or by calling (323) 466 - 6663.

International students who change their emphasis must consult with the Registrar to review their nonimmigrant status and make any necessary adjustments. Please be advised that grid changes are not recommended for International students due to United States Citizenship and Immigration Services (USCIS) time restraints and regulations.

To set up an appointment to discuss these regulations, please contact <u>registrar@gnomon.edu</u>.

COURSE SUBSTITUTIONS

Any student within the last four quarters/terms of a certificate program may request a course substitution. Students must fill out a Course Substitution Request Form and meet with the Director of Education: Vocational, or assigned. Course Substitution Request Forms are available in the education office, or Registrar. Substitutions are evaluated and approved by the Education Office with the best interest of the student in mind.

Artwork by Courtney Chun

Substitutions may be declined for many reasons, including but not limited to: improperly filled out form, schedule conflict, tenure, space availability, academic pacing, or GPA.

If the request is approved, students must deliver the signed Course Substitution Request Form to the Registrar.

TRANSFER CREDIT

All transfer of credit requests must be received during the application process prior to the start of the applicable full-time program. A maximum of 30% of total credits required for any Gnomon program are able to transfer, and must be submitted via the Transfer of Credit Evaluation Request Form. Once the Transfer of Credit Evaluation Request Form is successfully completed, students will receive an evaluation of transferable credit with the approved transfer credit decision during Orientation.

TRANSFER OF CREDIT FROM COURSES TAKEN AT GNOMON

Gnomon encourages prior and/or current students to continue their education. All courses taken at Gnomon that are applicable to a student's program of choice will be considered if:

- The course was taken within the last five (5) years
- The courses were completed with a C (2.0) or better
- The course is an equitable transfer
- The course was taken prior to program enrollment

Any prior or current Gnomon student must meet with the Admissions Office to determine the viability of transfer, meet admission requirements for the trans-

Page 52

fer program, including submission of required materials, and complete a Transfer of Credit Evaluation Form. All coursework for transfer credit must be approved by the Director of Education (or designee). On approval, credit will be noted on the transcript. The grade received will be used in programmatic GPA calculations.

TRANSFER OF CREDIT APPEAL PROCESS

Transfer of credit appeals will be considered on a case-by-case basis. A student may submit a written appeal of a transfer of credit decision within five (5) business days of the decision to the Director of Education (or assignee).

The appeal should, at a minimum, include:

- A written appeal
- Official transcripts
- The course syllabus, textbook(s), exam(s), and any other pertinent materials to demonstrate comparability

The outcome of an appeal will be approval or denial and all decisions are final. The student will be notified in writing of the results of the appeal within ten (10) business days of receipt. The notification will indicate any restrictions or conditions pertaining to the decision.

TRANSFER BETWEEN GNOMON PROGRAMS

In order to transfer between Gnomon programs, students must:

Artwork by Carlos Rizo

- Meet with the Admissions Office to determine the viability of transfer
- Meet with the Education Office for approvals
- Fulfill all necessary admissions requirements

Upon acceptance to the new program, students must follow all requirements of the transfer policy.

TRANSFER OF CREDIT FROM COURSES TAKEN FROM OTHER INSTITUTIONS

Transfer of credit will be considered toward a Gnomon certificate or degree only if:

- Earned at a regionally accredited post-secondary institution (or at a foreign academic institution recognized by its government)
- Previously earned credit is no more than five (5) years old
- A grade of A, B, C, or Pass was given
- •

Transfer of credits submitted to fulfill coursework requirements will be measured against Gnomon's curriculum and expectations of student learning. Gnomon reserves the right to recognize or refuse transfer credit as necessary for student achievement.

Typically, studio art and/or software course credits do not transfer due to Gnomon's highly specialized curriculum. As a transfer applicant, students must submit official transcripts of previous college work. Students may be required to submit transfer course content, course syllabi, and course descriptions. It is the student's responsibility to ensure that Gnomon receives all transfer request documents.

Artwork by Rico Suyang Wang

COURSE PROFICIENCY: FOR CERTIFICATE SEEKING STUDENTS ONLY

Students who have proficiency in a required course based on previous education and/or experience may petition for course proficiency. To petition out of a course based on proficiency, a student must meet with the Education Office, provide evidence of proficiency, and complete a Course Proficiency form.

The Education Office will then evaluate the request to determine if an examination is required to grant a course proficiency waiver. If an examination is required, the student must achieve at least 70% proficiency in the course material to be granted the waiver.

ADVANCED PLACEMENT (AP) CREDIT

Gnomon grants general education course credit towards the BFA in Digital Production degree for successful completion of examinations in the Advanced Placement Program of the College Entrance Examination Board. Only general education courses may be considered, and a score of 4 or 5 on the AP exam must be presented as an official score report.

ARTICULATION/TRANSFER AGREEMENTS

Gnomon has not entered into an articulation or transfer agreement with any other college or university. Notice Concerning Transferability of Credits and Credentials Earned at Gnomon

The transferability of credits you earn at Gnomon is at the complete discretion of an institution to which you may seek to transfer. Acceptance of the credits you earn in the educational program is also at the complete discretion of the institution to which you may seek to transfer. If the credits that you earn at this institution are not accepted at the institution to which you seek to transfer, you may be required to repeat some or all of your coursework at that institution.

For this reason, you should make certain that your attendance at this institution will meet your educational goals. This may include contacting an institution to which you may seek to transfer after attending Gnomon to determine if your credits will transfer. §94909(a)(15)

Questions regarding transfer credit may be directed to the Registrar via email at <u>registrar@gnomon.edu</u>.

ATTENDANCE

A strong attendance record is an essential element of student success. Students are expected to be on time and be present from beginning to end of each class and lab. Attendance is recorded. Students who are late for class may be marked absent.

Students who do not maintain excellent attendance may have their grade docked for unsatisfactory participation, which may result in a failing class grade, suspension, or termination.

Questions regarding attendance may be directed to the Education Operations Department via email at <u>educa-tion.admin@gnomon.edu</u>.

GRADING

Grading is based on aesthetic, conceptual, and technical merit, as well as a demonstrable willingness to learn. Students may be evaluated from the following grading standards:

- Final or midterm projects or exams
- Execution and presentation of projects
- Weekly assignments
- Course participation and professionalism
- Overall improvement

It is the instructor's prerogative to evaluate student work and assign grades in accordance with his/her academic and professional judgement.

GRADE DEFINITIONS

Grade	Percentage	Value		Narrative
A	90-100%	A+ A A-	4.3 4.0 3.7	A-level performance equates to excellence in thinking and performance with- in the domain of a subject and course, successful and timely delivery of at least 90% or more of assignments and superior knowledge acquired through critical thinking and practice.
В	80-89%	B+ B B-	3.3 3.0 2.7	B-level performance equates to sound thinking and performance within the domain of a subject and course, successful and timely delivery of 80% or more of assignments and sound knowledge acquired through critical thinking and practice.
С	70-79%	C+ C	2.3 2.0	C-level performance equates to adequate thinking and performance within the domain of a subject and course, successful and timely delivery of 70% or more of assignments and adequate knowledge acquired through critical thinking and practice.
C-		C-	1.7	Students must maintain a 2.0 or above in order to maintain good academic standing.
D	60-69%	D+ D D-	1.3 1.0 0.7	D-level performance equates to poor thinking and performance within the domain of a subject and course, successful and timely delivery of 60% or more of assignments and subpar knowledge acquired through critical thinking and practice.
F	59% & Below	F	0.00	The student is not developing critical thinking skills and understanding within the domain of a subject and course and/or the student failed to deliver 59% or less of assignments. The student is not achieving competence in his or her academic work.
I	Neutral	I	Neutral	Incomplete. Incompletes are only granted by the instructor and for exception- al circumstances. "I" is temporary and must be rectified no later than two weeks after the end of the term. If not submitted by the deadline, the Incom- plete grade will be replaced with a grade of an "F."
W	Neutral	W	Neutral	Withdrew. Withdrew from a course during Week 2 - Week 6. 'W' grades have no impact on term or cumulative grading calculations, and do not count to- ward a student's full-time status.

APPLICATION OF GRADES AND CREDITS

Gnomon uses a system of letter grades and grade point equivalents for evaluating coursework. Grades are configured on a 4.3 scale. The grade definitions chart on the previous page illustrates the impact of each grade on a student's academic progress and what marks are used in calculating the cumulative GPA.

REQUEST TO ADD/DROP A COURSE(S)

Add/Drop is a grace period during which full-time program students may add an additional course to a schedule or withdraw from a specific course.

The schedule for adding/dropping a course is as follows:

- By the end of Week 1 of the term, full-time program students may add or drop through the first 7 days of every quarter. The student must retake the class during the subsequent term. There are no exceptions to this policy. The Request to Add/ Drop a Course form is available via the Education Operations Office and must be returned to the Registrar. After Week 1, students may not add any additional courses
- From the beginning of Week 2 through the end of Week 6, students may request a 'W', which is a letter grade of withdrawal from the course in question. 'W' grades have no impact on term or cumulative grading calculations, and do not count toward a student's full-time status. This will not negatively impact the student's GPA, but the student must retake the class during the subsequent term. There are no exceptions to this policy. Students who are on Satisfactory Academic Progress Warning or Probation are not eligible for a 'W' grade. The form must be approved by either the Director of Education: BFA, Director of Education: Vocational (depending on which program the student is currently enrolled in), or assigned, with the 'W' request box checked, and must be returned to the Registrar
- From the beginning of Week 7 through the end of the quarter, if a student drops a course, the student will receive a grade of F. Students who fail a course may not subsequently withdraw from the course

Students who withdraw from a specific course by the end of Week 1 will have any charges associated with that class removed from their account. Students who withdraw from a specific course after Week 1 and by the end of Week 6 will have their tuition.

PETITION FOR GRADE CHANGE

At the completion of every term, grades are made available to students via the Gnomon Student Web Portal. Final grades submitted by instructors are considered permanent. Students may appeal to their instructors, in writing, if the student believes a grade is in error, and must present a case to justify a grade change.

Should an instructor grant the appeal, the instructor must complete the Request of Grade Change or Removal of Incomplete Form and submit it to the Education Operations Office via email. Upon receipt of the instructor's approved grade change, the revised grade will be become part of the student's permanent record.

If attempts to resolve the issue with the instructor are unsuccessful, the student may request an appeal via Petition for Grade Change form to the Education Operations Office. The deadline to submit the completed form is Sunday of Week 13 of the term the course was taken. Forms are available in the Education Operations Office or may be requested via email at <u>education.admin@gnomon.edu</u>. The Education Office will consider the evidence and make a final decision. Grade change petitions submitted after the (2) two-week deadline are handled at the Education Office's discretion.

Students on SAP Academic Warning must submit any grade appeals within five (5) business days of receiving a grade.

Artwork by Servando Lupini

INCOMPLETE GRADE MARK

A grade of 'l' stands for incomplete and is only granted in exceptional circumstances. An exceptional circumstance would be considered a situation or event which could not be foreseen, is beyond the student's control, and which prevents the student from completing necessary course work. Incomplete grade marks are contingent upon instructor approval and instructors are under no obligation to grant them.

Incomplete grades are temporary and must be rectified during the instructor approved timeframe, but under no circumstances later than two weeks after the end of the term.

Students on SAP Academic Warning or SAP Academic Probation may not receive an "Incomplete" grade mark and no additional time may be granted to submit coursework. All grades must be submitted on time.

PROCESS FOR REQUESTING AN INCOMPLETE

A Request for a Grade of Incomplete form must be initiated by the student and if approved by the instructor, must be submitted to the Education Operations Office no later than (1) one week after the term end (Week 10).

If approved, the student is expected to complete all course work within a specific time frame given by the instructor, but no later than (2) two weeks after the term end (Week 10). Failure to submit work or rectify the incomplete mark within the stated time-frame will result in the incomplete "I" mark converting to an "F."

Artwork by Toby Lewin

In order to be considered for an Incomplete, the student must:

- Initiate the request for an Incomplete by filling out the Request for a Grade of Incomplete form and submitting it to the instructor of the class for which the Incomplete is being requested. The instructor cannot initiate the Incomplete request
- Ensure that completion of the remaining work is within 2 weeks after the term end (Week 10)
- Submit the Request for a Grade of Incomplete form to the Education Operations Office before Sunday of Week 11 of the term

Questions regarding Incomplete Grade Marks or how to request an Incomplete may be directed to Education Operations via email: <u>educa-</u> <u>tion.admin@gnomon.edu</u>.

GRADE CHANGES

At the completion of every term, grades are made available to students via the Gnomon Student Web Portal. Final grades submitted by instructors are considered permanent. A grade change can be initiated only at the request of an instructor.

Students concerned about a grade must discuss it with the appropriate instructor first. If it becomes apparent that an error has been made, the instructor must contact the Education Operations Office. If submitted grades need to be changed or an approved Incomplete needs to be updated, the instructor must complete and submit the Request of Grade Change or Removal of Incomplete form to the Education Operations Office.

The Request of Grade Change or Removal of Incomplete form must be submitted prior to the conclusion of Week 1 of the next term. **REPEATING A COURSE**

All students in the Bachelor of Fine Arts in Digital Production program must pass all courses with a C or better, and all courses that are a prerequisite, to remain in good standing. If a student does not pass a course the first time, the student will need to retake the course at their cost until a grade of C or better is attained. Repeated failure to pass the course may result in jeopardizing the student's academic standing, program completion within the maximum time frame offered, or ability to advance within the program. Please refer to Gnomon's Satisfactory Academic Policy (SAP) standards.

LEAVE OF ABSENCE (LOA)

A Leave of Absence (LOA) is an approved interruption of a student's program of study at Gnomon.

Program students may request a single term leave of absence from their studies in the event of unforeseen circumstances, such as:

- Family emergencies and obligations
- Medical and health related issues
- Financial reasons

Students contemplating a Leave of Absence (LOA) are encouraged to seek consultation from the Education Office, Registrar, and the Financial Aid Office prior to requesting a leave.

To be granted an LOA, a student must:

- Submit the LOA form no later than ten (10) business days prior to the start of the term
- Make arrangements to discuss the LOA terms with the Education Office

Artwork by Leticia Reinaldo and Moran Tenenbaum - Concept by Moran Tennenbaum

Students in emergency situations may be granted leeway regarding submission of the LOA form.

Students returning from a Leave of Absence should contact the Education Office and Registrar no later than four (4) weeks prior to the start of the term in which the student is scheduled to return to finalize a new schedule, and the Financial Aid Office (if applicable) to re-establish their awards. Returning students resume studies at the same point in their academic program prior to the LOA issuance.

In the event a student does not return from a Leave of Absence, the student will be deemed withdrawn from the program and subject to a refund in accordance with the school's published refund policy.

LEAVE OF ABSENCE (LOA) FOR INTERNATIONAL STUDENTS

International students must abide by the regulations of their nonimmigrant status and will only be granted a Leave of Absence if circumstances adhere to the regulations. Please refer to the "Title 8: Aliens and Nationality" section of the United States Citizen and Immigration Services website: <u>uscis.gov</u>.

Questions regarding a Leave of Absence or taking a Leave of Absence as an international student may be directed to the Registrar at <u>registrar@gnomon.edu</u>.

CANCELLATION, WITHDRAWAL AND REFUNDS FOR PROGRAM STUDIES

Students have the right to withdraw from the program of instruction at any time. Students must complete a Program Cancellation/Withdrawal Request which is available via the Registrar. The form must be approved by either the Director of Education: BFA, Director of Education: Vocational (depending on which program the student is currently enrolled in), or designee.

If 60% or less of the period of attendance has been completed, a refund may be due. Tuition refunds are based on the date the written drop request is received via email (or the last date of attendance if no notice is received). Refunds will be made within 45 days of the date of cancellation. Please refer to the confirmation letter for the refund calendar. Requests will be processed during regular business hours: Monday through Friday from 9 a.m. to 6 p.m.

CANCELLATION ON OR BEFORE THE FIRST DAY OF CLASS

If tuition and fees are collected in advance of the start date of classes and a student does not begin classes or withdraw on the first day of classes, Gnomon retains the non-refundable registration fee of \$75.00 and will process a refund for all other tuition and fees paid.

Refunds will be paid within 45 days.

CANCELLATION DURING THE FIRST SEVEN (7) DAYS AFTER ENROLLMENT

Students have the right to cancel the enrollment agreement and obtain a refund of charges paid through attendance at the first class session, or the seventh day after enrollment, whichever is later. Cancellation shall occur when written notice of cancellation is received by the Office of Registrar. The written notice of cancellation may be submitted electronically, by mail, or in person.

Refunds will be paid within 45 days after the student's notice of cancellation is received. Students who have received federal student financial aid funds are entitled to a refund of moneys not paid from federal student financial aid program funds.

Beyond the first seven (7) days after enrollment, program students are subject to Gnomon's Refund policy.

REFUNDS

If a student withdraws from the institution and has attended 60% or less of the enrollment period, the prorated charge for the amount of time attended will be calculated and subtracted from the amount paid. If the student did not receive financial aid, any remaining credit balance will be refunded to the student. If the student did receive financial aid, please see the section, Refunds & Returns for Financial Aid Students. If the student received VA benefits, any applicable refund will be returned to the Department of Veterans Affairs.

For the purpose of determining a refund, a student shall be deemed to have withdrawn from a program of instruction when any of the following occurs:

- A. The student submits written notice of the date of intent to withdraw to the Registrar
- B. The institution terminates the student's enrollment for failure to maintain satisfactory progress; failure to abide by the rules and regulations of the institution; and/or failure to meet financial obligations to the school
- C. The student does not return from a leave of absence
- D. The student fails to attend classes for 14 consecutive days.

For the purpose of determining the amount of the refund, the date of the student's withdrawal shall be deemed the last date of recorded attendance. The amount owed equals the daily charge for the program (total institutional charge, minus non-refundable fees, divided by the number of days in the program), multiplied by the number of days scheduled to attend, prior to withdrawal.

Artwork by Yanni Roussos

SATISFACTORY ACADEMIC PROGRESS (SAP)

Gnomon is committed to supporting students in their educational pursuits. To that end, the School requires that students maintain timely academic progress towards completion of their academic program.

Gnomon maintains a definition of Satisfactory Academic Progress (SAP) that reflects the School's mission and is consistent with accepted practices in higher education. The academic progress of every student is carefully monitored to support student success. Any student not meeting the SAP requirements are informed and advised accordingly. This policy applies to all students who are enrolled in a certificate or degree program at Gnomon.

Gnomon requires students in the Digital Production for Entertainment (DP) and Entertainment Design & Digital Production (EDDP) certificate programs, and the Bachelor of Fine Arts in Digital Production (BFA) degree program to make timely academic progress each quarter towards completion. Reasonable progress is measured by the following two (2) standards:

Standard 1: Qualitative Standard

Students must meet the minimum requirement of a 2.00 cumulative and quarterly grade point average (GPA). GPAs are a qualitative measure of a student's academic progress. Cumulative GPA's include all Gnomon courses that have been graded and are determined to meet the program requirements. However, Withdrawal (W) grades have no impact on quarter or cumulative grading calculations.

Repeated courses are calculated with the best grade received. Incomplete (I) grades have no impact on the quarter or cumulative GPA grading calculations but SAP must be reviewed again once the Incomplete has been replaced with the new grade. Grades from courses transferred from other institutions are not included. Students can review their current cumulative and quarterly GPA using the Student Web Portal.

Gnomon reviews GPAs on a quarterly basis. To meet Standard 1: Qualitative Standard, students must achieve a minimum 2.00 cumulative GPA as well as a 2.00 quarterly GPA at the conclusion of each quarter. Please note, students must achieve a minimum 2.00 cumulative GPA at the end of their final term for the Digital Production of Entertainment (DP, term 8) and the Entertainment Design & Digital Production (EDDP, term 12) certificate programs to meet Standard 1: Qualitative Standard and be eligible for graduation. Students enrolled in the Bachelor of Fine Arts in Digital Production (BFA) degree program must achieve a minimum 2.00 quarterly and cumulative GPA at the end of their final term (Term 12) to meet Standard 1: Qualitative Standard and be eligible for graduation.

Standard 2: Quantitative Standard

Students must satisfactorily complete at least 67% of cumulative credit hours attempted, and complete the program within 150% of the maximum time frame offered for the program (PACE).

A quantitative measure of progress towards program completion is determined by the percentage of credit hours successfully completed divided by the credit

hours attempted. Credit hours from courses taken at Gnomon and/or transferred from other institutions are treated as both attempted and completed. For the degree program, each class must be passed with a C grade or better. If a student does not receive a C or better in a course, it must be retaken in the subsequent quarter. To determine PACE for Gnomons' programs, follow the steps below.

Step 1 - Determine which courses should be included in the calculation.

- Credit hours from Gnomon courses taken prior to program enrollment that have been accepted for credit towards the program
- Credit hours from courses transferred from other institutions;
- Credit hours from courses repeated while at Gnomon where the initial grade was unsatisfactory; and
- Credit hours from courses with an Incomplete (I) or Withdraw (W) status

Step 2 – Complete the calculation.

Take the total number of course credit hours completed and divide by the total number of course credit hours attempted. Students must satisfactorily complete at least 67%. For example: An academic year in a certificate program consists of three quarters with 21 credit hours taken per quarter for a total of 63. A student must complete at least 42 of the 63 units to meet Standard 2: Quantitative Standard (42 credit hours completed divided by 63 credit hours attempted = 67%).

Artwork by Alexandra Reeves

A student must complete an academic program within 150% of the published program length. Below are the thresholds for each program:

- Digital Production the program length is 8 quarters, or 2 calendar years. Therefore, 150% maximum time to completion can be no more than 12 quarters, or 3 calendar years. Requires 147 course credit hours for completion. The maximum number of course credit hours a student can attempt in this program is 220 (147 x 1.5 = 220)
- Entertainment Design and Digital Production the program length is 12 quarters, or 3 calendar years. Therefore, 150% maximum time to completion can be no more than 18 quarters, or 4 ½ calendar years. Requires 219 course credit hours for completion. The maximum course credit hours a student can attempt in this program is 328 (219 x 1.5 = 328)
- Bachelor of Fine Arts in Digital Production the program length is 12 quarters over 4 calendar years with 3 Summer quarters off (optional). The program must be completed within 6 calendars years, or at least 2 quarters completed each calendar year (with optional Summer quarters included)

If at some point it is determined impossible for a student to complete their program within the 150%- time frame, the student will be withdrawn at the time of determination prior to exceeding the limit, with no right to appeal. Questions regarding SAP policies may be directed to <u>sap@gnomon.edu</u>.

MONITORING SATISFACTORY ACADEMIC PROGRESS (SAP)

Satisfactory Academic Progress (SAP) is reviewed at the end of each quarter. Students who fully meet all the standards above are considered in good standing for SAP. Students who fail to meet the standards will be notified via Gnomon email and regular mail of the results and the impact on their program and financial aid eligibility.

If the parameters of either standard are deficient at SAP review, the student will be placed on Academic Warning for one (1) subsequent quarter and will still be eligible for financial aid. Once SAP has been reviewed after completion of the subsequent quarter and the SAP requirements have been met, the Academic Warning status will be released and the student will be notified via Gnomon email and regular mail. Students who fail to meet the SAP standards after the subsequent quarter will be Academically Withdrawn from the program, with no immediate right to appeal.

If adjustments such as the ones below are made to a student's academic record after their SAP status has been initially reviewed, a subsequent review will be performed:

- A grade has been changed due to resolution of an Incomplete, correction of an error or Petition of Grade Change approval
- The student changed programs and SAP standards are met for that program

Students are allowed up to two (2) occurrences of being placed on Academic Warning during their program. Students who fail to meet SAP standards for the third (3rd) time will be Academically Withdrawn from the School, with no immediate right to appeal. If a student transfers to a new program, the student will be allowed up to two (2) occurrences of being placed on Academic Warning within their new program. The same policy applies in the new program.

REINSTATEMENT AFTER DISMISSAL & APPEAL PROCESS

Any student who has been Academically Withdrawn may be re-instated after six (6) months and up to one (1) year through the SAP Reinstatement Appeal process. Students who have been withdrawn for other reasons (e.g. plagiarism, forgery, theft, harassment, misconduct) or are in violation of any Student Conduct Policy, may not have this option (please see the Gnomon Student Conduct policy). Students that have been Academically Withdrawn may take Individual Courses to improve their GPA, but may not receive financial aid.

If a student who has not successfully met SAP requirements and has been Academically Withdrawn from Gnomon wishes to return, the student will be advised the following:

- 1. Sign up for Individual Courses to improve their GPA and academic standing. Students may discuss possible courses with the Education Office after dismissal. If a student does not speak to the Education Office, the student may sign up for Individual Courses during their dismissal. There is no guarantee that the courses taken during dismissal will automatically transfer
- 2. Receive a 'C' grade or better in courses taken during the dismissal period
- 3. After six (6) months, but no later than one (1) year, a student may submit a SAP Reinstatement Appeal. (Please see below for SAP Reinstatement Appeal Guidelines)

If the SAP Reinstatement Appeal is successful, the student will be re-enrolled in the program with a status of Reinstatement Probation.

If the SAP Reinstatement Appeal is unsuccessful, the student will be advised to re-apply after one (1) year from the original dismissal date through the Admissions Office as a new student. Gnomon's Admissions requirements and Transfer Credit Policy for new students will apply.

SATISFACTORY ACADEMIC PROGRESS APPEAL GUIDELINES

A student wishing to return to Gnomon after being academically withdrawn for not meeting SAP requirements may submit a SAP Reinstatement Appeal. The Appeal may be submitted after six (6) months of being withdrawn, but no later than one (1) year after the withdrawal date.

The SAP Reinstatement Appeal must include:

- 1. SAP Reinstatement Appeal Form* This form must be typed, completed and signed.
- 2. Typed Personal Statement* A typed personal statement should include the following:
 - A. Description of the extenuating circumstances that prevented you from meeting the satisfactory academic progress standards
 - B. How have your circumstances changed so your failure of the situation will not reoccur?
 - C. What steps have you taken to ensure you will meet the satisfactory academic progress standards and be successful in your academics?

If any documentation to support extenuating circumstance(s) exists, please include it with your personal statement. Examples of extenuating circumstances include, but are not limited to: a period of illness or injury for the student, a period of illness or injury for an immediate family member requiring the stuArtwork by Diana Topalian - Concept by Steve Shi

dent's assistance, death of a family member, family difficulties (financial, divorce), etc.

 Courses taken during dismissal period (if applicable) Official transcripts must be submitted with the appeal, if courses were taken elsewhere. If courses were taken at Gnomon, unofficial transcripts must be submitted with the appeal. A copy of the student's unofficial transcripts is obtainable from the Registrar (email registrar@qnomon.edu) or through the Gnomon Stu-

*Required

dent Web Portal.

Following submission, the student will be notified of the Committee's decision within five (5) business days via Gnomon email and regular mail. The Committee's decision is final.

If the student's SAP Reinstatement Appeal is successful, the student will meet with the Education Office to determine a new academic schedule. The student will also be placed on Reinstatement Probation and the length of the probationary period will be determined by the Education Office.

If the student's SAP Reinstatement appeal is unsuccessful, the student may re-apply as a new student through the Admissions Office one (1) year after the withdrawal date. Gnomon's Admissions requirements and Transfer Credit Policy for new students will apply.

Artwork by Alvaro Zabala - Concept by Rou Rou

TERMINATION, DISMISSAL AND SUSPENSION ply with school standards, policies, regulations, and **TERMINATION POLICY AND** rules. Students may be placed on an applicable pro-**BORROWER'S AGREEMENT** bation. During this time, students are advised as to

A student may terminate their enrollment agreement by giving written notice to Gnomon, subject to the terms as outlined in the Refunds and Returns section of this catalog. Gnomon reserves the right to terminate the enrollment agreement in the event of (i) a student conduct issue, (ii) destruction of property by a student, (iii) nonpayment of tuition, (iv) unsatisfactory progress, (v) poor attendance and/or participation, or (vi) failure to satisfactorily complete all required courses prior to attempting 150% of the credit hours required to complete the quarter. A student's dissatisfaction with or non-receipt of educational services offered by Gnomon does not excuse the student from repayment of any grant, private loan, federal loan, or other loan whatsoever made to the student for enrollment and completion of study at Gnomon.

DISMISSAL AND SUSPENSION POLICY

Gnomon reserves the right to suspend or terminate any student whose attendance, academic performance, financial standing, or behavior does not comthe level of improvement or the action necessary to rectify the status.

REINSTATEMENT AFTER DISMISSAL

Students who wish to be reinstated after dismissal must reapply to the program and contact the Admissions Office. Students who were dismissed for Student Conduct breach may not reapply to any of Gnomons' programs or enroll in individual/online courses.

Re-enrollment or re-entrance will be approved only after one year has elapsed post-termination and evidence is shown to the administration's satisfaction that the conditions that caused the dismissal have been resolved. Gnomon may require additional information and/or exhibits depending on the circumstance of dismissal. Gnomon reserves the right to approve or deny additional re-enrollment or re-entrance attempts after the initial one year waiting period.

Artwork by Weiyo Sha

COURSE CHANGES AUDITING A COURSE

Gnomon does not permit course auditing. Only students who are properly registered for any given class, guest lecturers, full-time staff, and full-time instructors may attend that class, space permitting. Students are responsible for ensuring enrollment for each class in which they are participating. All other class participants are prohibited and will be removed.

Students who are currently enrolled in a section of a given course may make up a missed session of that course due to illness in another section, with administrative permission only. The Registrar and Education Operations Office must be notified by the instructor of any changes prior to the student making up the missed session. Students are not permitted to make up the same course taught by another instructor.

COURSE CANCELLATIONS AND CHANGES

Due to the nature of the industry that the school serves, Gnomon reserves the right to cancel/

reschedule a course or change faculty members. In the event of a course change, students will be notified as soon as possible via email. If the school cancels or discontinues a course or educational program, the school will make a full 100% refund of all charges. Refunds will be paid within 45 days.

MAKEUP COURSES

Gnomon instructors are working professionals and may miss a course during the term. An 11th week is built into each term. This functions as a makeup week, where if an instructor misses a class, a makeup session of that class is held during this week at the same time and place, depending on scheduling and lab availability. Missed classes may be made up during the term as well, at the instructor's discretion. Should a class be canceled during the term, Gnomon's administration will make all possible efforts to reschedule the class. Please keep the term schedule in mind when making plans and travel arrangements.

MAKEUP WORK

No make-up work is permitted unless an Incomplete (I) grade has been granted via Student Services.

Artwork by Michelle Jung – Concept by Vyacheslav Safronov

RECORDS RECORD RETENTION

Gnomon will maintain student records on campus for each student indefinitely.

FAMILY EDUCATION RIGHTS & PRIVACY ACT (FERPA) – EDUCATIONAL RECORDS

In accordance with the Family Education Rights and Privacy Act (FERPA) and Gnomon policies, students have the following rights:

1. The right of the student to inspect and review his or her education records within 45 days of the date that Gnomon receives a request for access.

Students may submit a written request that identifies the specific record(s) to the Registrar, or any other appropriate official.

The school official will make arrangements for access and notify the student of the time and place where the records may be viewed.

Records that are exempted from the right of inspection are:

• Financial records of the parents of the student

- Confidential letters and statements of recommendation
- Records of instructional, supervisory, counseling, and administrative personnel which are in their sole possession and are not accessible or revealed to any other person except a teacher
- 2. The right to request the amendment of education records that the student believes is inaccurate or misleading.

The student should write the school official responsible for the record, clearly identifying the part of the record (s) in question and specifying why it is inaccurate or misleading.

If the school decides not to amend the record as requested by the student, the school will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding hearing procedures will be provided to the student when notified of the right to a hearing.

> The right of consent to disclosures of identifiable information contained in the student's education records, except to the extent that FERPA and California law authorizes disclosure without consent.

> > Page 67

An exception to the policy against disclosure without

Artwork by Alvaro Zabala - Concept by Gop Gap

consent is disclosure to school officials with legitimate educational interests.

A school official is a person employed by the school in an administrative, supervisory, academic, research or support-staff position (including law enforcement unit personnel and health staff) and may include a student serving on an official committee or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record to fulfill his or her professional responsibilities.

4. Release of Educational Information

The school may disclose certain information, known as "directory information," at its discretion without consent.

If a student does not want this information released, the student must complete a Non-Release of Directory Information form, available from the Registrar. Upon request, the school may disclose education records without a student's consent to officials of other schools in which a student seeks or intends to enroll.

The school has established the following information as directory information: student name, address, email address, telephone number, date and place of birth, weight, height, age, major field of study, enrollment status (full-or part-time), dates of attendance, participation in officially recognized activities, degrees and awards received, student's photograph and the most recent educational institution attended.

Without the student's consent and upon authorization of the administration, the school may release copies of,

or otherwise divulge, material in student education records to the following agencies and individuals who are expressly forbidden from permitting access of said education records to third parties:

- A. An authorized representative of the Controller General of the United States, the Secretary of Education or administrative head of an education agency, state education officials, or third respective designees of the United States Office of Civil Rights, where such information is necessary to audit or evaluate a state or federally supported education program or pursuant to a federal or state law provided that, except when collection of personally identifiable information is specifically authorized by federal law, any data collected by such officials shall be protected in a manner which will not permit the personal identification of students or their parents by other than those officials, and such personally identifiable data shall be destroyed when no longer needed for such audit, evaluation and enforcement of federal legal requirements.
- B. Other state and local officials or authorities to the extent that information is specifically required to be reported.
- C. Officials of other public or private schools or schools' systems, including local, county, or state correctional facilities where educational programs are provided, where the student seeks r intends to enroll, or is directed to enroll as provided in Section 76225 of the Education Code.
- D. Agencies or organizations in connection with a student's application for, or receipt of, financial aid; provided that information

permitting the personal identification of students may be disclosed only as may be necessary of for such purposes as to determine the eligibility of the student for financial aid, to determine the amount of the financial aid, to determine the conditions which will be imposed regarding the financial aid, or to enforce the terms or conditions of the financial aid.

- E. Accrediting organizations in order to carry out their accrediting functions.
- F. Organizations conducting studies for, or on behalf of, educational agencies or institutions for the purpose of developing, validating, or administering predictive tests, administering student aid programs and improving instruction, if such studies are conducted in such a manner as will not permit the personal identification of students or their parents by persons other than representatives of such organizations and such information will be destroyed when no longer needed for the purpose for which it is collected.
- G. Appropriate persons in connection with an emergency if the knowledge of such information is necessary to protect the health or safety of a student or other persons, or subject to such regulation as may be issued by the Secretary of Education.
- H. Those who have obtained a subpoena or judicial order. The student is to be given

notice by mail or the school's compliance with the order.

5. The right to file a complaint with the U.S. Department of Education concerning alleged failure by the school to comply with the requirements of FERPA.

The name and address of the office that administers FERPA is:

Family Policy Compliance Office U.S. Department of Education 400 Maryland Avenue SW Washington, DC 20202-4605

TRANSCRIPT AND LETTER REQUESTS

An official transcript is maintained for each student with a complete record of all course grades and credits earned. Official transcripts and verification letters will be provided upon written request if there is no outstanding financial obligation due and are subject to payment of the prescribed fee. Official transcripts can be requested via email at <u>registrar@gnomon.edu</u>. Additional fees for rush orders will apply.

Students may also request official transcripts through the Student Web Portal under the "Student Services" tab. Payment can be made using credit card or PayPal.

Artwork by Angela Rico

STUDENT CONDUCT

It is the intention of the Student Conduct Code to make clear the school's expectations of behavior by students. A productive environment for education and the well-being of the entire Gnomon community are supported through the principles of respect, social responsibility, integrity, and honesty. Students are responsible for their own conduct as well as for holding others accountable to these same expectations. Any student who engages in academic or social misconduct shall be subject to disciplinary action by the appropriate office of the school.

The Student Conduct Code applies to students' behaviors both on and off campus if it is determined that a behavior affects another member of the community's safety, well-being, or learning environment. This can also apply to behavior that occurs through social media or other public online media. A student can be charged with a conduct violation while on a leave of absence. Gnomon reserves the right to withdraw from any student the privilege of attending Gnomon for any lawful reason that Gnomon deems appropriate.

In choosing to enroll at Gnomon, students become responsible for their conduct to those standards as stated in the Student Conduct Code. Gnomon may address student academic and non-academic misconduct through its own processes, and apply sanctions governing the terms of attendance and enrollment at Gnomon.

Gnomon reserves the right to respond to misconduct issues, whether law enforcement agencies are involved and/or criminal charges are pending. Students are subject to disciplinary action for several types of misconduct, including but not limited to:

- Dishonesty, such as cheating, multiple submission, plagiarism or knowingly furnishing false information to the school
- Forgery, alteration, or misuse of school documents, keys, or identification
- Filming lectures, either with a camera or their cell phones, under any circumstances
- Theft of, damage to, or destruction of any property of the school or property of others while on school premises
- Unauthorized entry to or use of school properties, equipment, or resources
- Disruption of teaching, research, administration, or other school activities, and/or combative behavior in any classroom, office or offsite location
- Physical abuse, threats of violence, all forms of sexual assault, or conduct that threatens the health or safety of any person on school property

or in connection with official school functions.

- Sexual harassment (verbal or physical)
- Bullying (verbal or physical)
- Disorderly conduct, disturbing the peace, or failure to comply with the direction of a school employee acting in his/her official capacity
- The use of "fighting words"
- The unlawful manufacture, distribution, dispensing, possession of, and/or use of drugs, drug paraphernalia, alcohol, or other controlled substances at this institution is strictly prohibited (see Gnomon's Drug and Alcohol Abuse Policy Statement). On-campus possession and use of medical marijuana is not allowed

Behavior that is subject to disciplinary action under the Student Conduct Code also includes:

- Alleged violations of federal, state or local law that threaten the safety or well-being of the campus community
- Any act that constitutes violent behavior as defined in NCSU REG04.05.02 – Campus/ Workplace Violence Prevention and Management, and any other behavior that adversely affects the school or its educational programs or mission

Any attempt to commit acts prohibited by the Code may also be addressed through the conduct process.

All members of the school community - students, faculty and staff - have the responsibility to report non-academic misconduct to Human Resources/ Acting Title IX. Artwork by by Rico Suyang Wang

For more information, please see "Student Conduct Policy" at <u>gnomon.edu/disclosures-policies</u>

LECTURE ETIQUETTE

Gnomon is sensitive to the fact that a great deal of information is given in course lectures. Students are encouraged to audio record lectures with instructor permission only, but please note that students must not film lectures, either with a camera or their cell phones, under any circumstances.

STUDIO/LAB ETIQUETTE

Students will be spending many hours in a shared lab space or in the Library and Learning Resource Center, and must observe the following rules:

- Eating and drinking is prohibited in all labs and designated areas of study
- Student work areas must be kept clean
- Loud talking or disruptive behavior is prohibited
- Listening to music, videos, or other multimedia content must be done through headphones

Please note that all lab hard drives are purged at the end of each term and no student work will be retained. Gnomon is not responsible for personal belongings or lost data.

Artwork by Steve Makowski

STUDENT/FACULTY RELATIONSHIPS

The integrity of the faculty-student relationship is the foundation of Gnomon's educational mission. "Gnomon specializes in computer graphics education for careers in the entertainment industry." This relationship invests considerable trust in the faculty member, who, in turn, bears authority and accountability as mentor, educator, and evaluator. The unequal institutional power inherent in this relationship heightens the vulnerability of the student and the potential for coercion. The pedagogical relationship between faculty member and student must be protected from influences or activities that can interfere with learning consistent with the goals and ideals of the school. Whenever a faculty member is responsible for the academic supervision of a student, a personal relationship between them of a romantic or sexual nature, even if consensual, is inappropriate. Any such relationship jeopardizes the integrity of the educational process.

PLAGIARISM AND ACADEMIC HONESTY POLICY

Gnomon maintains high academic standards, including integrity, honesty, and responsibility in education. The school assumes that Gnomon students have a basic understanding of the principles of academic honesty. While students are encouraged to draw inspiration and reference from other artists, students must resist plagiarism and maintain academic honesty. Gnomon does not tolerate academic dishonesty.

The following guidelines should assist students in clarifying behaviors that are not acceptable to the Gnomon community.

- Plagiarism occurs when another person's ideas, language, or image is borrowed or stolen and is not properly acknowledged. All ideas, arguments, art, image(s) and phrases submitted without attribution to other sources must be the creative product of the student. Thus, all and any item taken from the works of other authors or artists (published or unpublished) must be properly cited. The same applies to paraphrased text, opinions, data, examples, illustrations, and all other creative work. Violations of this standard constitute plagiarism
- When presenting written materials, words of another must be placed within quotation marks and a reference to the source provided. If material is paraphrased or restated in the student's words, a reference to the source must also be provided. Instructions for correctly attributing printed or online sources can be found in the MLA Style Guide, available free online
- Gnomon assumes that artists and designers commonly draw on other artists' work for reference and inspiration or to make a commentary on that artist's work. This type of exploration is encouraged. However, there is fine line between

"drawing inspiration" from a piece and making a literal copy. When a student represents a literal copy of another artist's work as his or her own, this is considered plagiarism

- Cheating is defined as accepting or giving aid to another during a written exam or for a written report unless authorized by the instructor or accepting or giving aid to another for an individual studio project unless authorized by the instructor. This includes representing another person's work as one's own or buying or selling written or visual work to be turned in for a class
- Students may not submit the same work for more than one assignment without the written permission of both instructors
- No students may disclose or exploit the ideas of another without that student's express written permission
- Gnomon will deal with violations of these academic honesty on an individual basis. A committee comprised of faculty and administrators will listen to all cases. If the group is convinced of the individual's intention to deceive; the student will be subject to disciplinary action

Artwork by Tiana Maros

As electronic information is volatile and easily reproduced, respect for the work and personal expression of others is especially critical in the visual effects and game communities. Students who violate authorial integrity and copyright will be subject to disciplinary action.

Instructors must notify the administration of students who have potentially violated Gnomon's Plagiarism and Academic Honesty Policy.

Recommended consequences of a student committing academic plagiarism/academic dishonesty include, but are not limited to:

- A failing grade for the course
- Suspension, probation or dismissal at the discretion of the Administration

The visual effects and games communities are inherently collaborative and tightly connected. Plagiarists face long-lasting detrimental effects on their careers.

Questions regarding Gnomon's Plagiarism and Academic Honesty Policy may be directed to the Education Office at <u>education@gnomon.edu</u>.

STUDENT EVALUATIONS

Within the last weeks of the course, students are asked to evaluate their courses and instructors through a Student Evaluation form, located on the Gnomon Student Web Portal. The responses help the administration identify areas that are satisfactory and where there may be room for improvement. Gnomon takes these student evaluations very seriously and ask that students do so as well.

Questions regarding student evaluations may be directed to the Education Operations Department via email at <u>education.admin@gnomon.edu</u>.

GRADUATION REQUIREMENTS FOR DP & EDDP PROGRAMS

Students seeking a certificate/diploma must achieve a minimum 2.0 cumulative GPA at the conclusion of their last term to qualify for graduation and remain within Satisfactory Academic Progress (SAP) guidelines.

Students must complete the program within 1.5 times the normal program length. Satisfactory arrangements for all exit processes must be met including but not limited to:

- Fulfilling all programmatic requirements
- Ensuring all financial obligations including the student's billing account has been satisfied

Upon completion of the above and all classroom and practical/laboratory education and training, the student will be issued a certificate or diploma attesting to his/ her successful completion of the applicable program.

GRADUATION REQUIREMENTS FOR BACHELOR OF FINE ARTS IN DIGITAL PRODUCTION

Students seeking a Bachelor of Fine Arts in Digital Production must achieve a cumulative GPA of a 2.0 or better to qualify for graduation. Students must complete the entire program within 1.5 times the normal program length. Please review all Satisfactory Academic Progress (SAP) policies and procedures in the Gnomon Student Catalog that clarify the policies between both qualitative (students must meet a cumulative and quarterly 2.0 grade average), and quantitative standards (students must complete the program within 150% of maximum time allotted), which is aligned with Department of Education guidelines.

Satisfactory arrangements for all exit processes must be met, and may include financial obligations, graduate interviews, and financial aid exit interviews. Upon completion of the above and all classroom education and training, the student will be issued a Bachelor of Fine Arts in Digital Production degree from Gnomon attesting to his/her successful completion of the applicable program.

Artwork by Alvaro Zabala – Concept by Justin Sweet

STUDENT SERVICES

ORIENTATION FOR FULL-TIME STUDENTS

Prior to starting a full-time program at Gnomon, all accepted students must attend an orientation session. Orientation materials, including the Gnomon Student Catalog and disclosures, are distributed to students in advance. Materials are reviewed and questions are addressed in the orientation session.

Orientation provides students with an overview of Gnomon's policies, procedures, and the criteria for successful matriculation. At Orientation, students become acquainted with the campus, the staff, and their peers. Gnomon staff members explain different offices' obligations, student assistance, and clarify students' rights and responsibilities. The Gnomon Student Catalog is distributed.

STUDENT WEB PORTAL

The Student Web Portal is a secure website that allows students access to information including schedules, grades, account balance and activity, and school notices.

Students will be issued logins and passwords that can be used to gain access to the Student Web Portal. Passwords can be changed at initial login. Requests for login assistance and other technical support questions may be directed to the Registrar at <u>registrar@gnomon.edu</u>.

STUDENT ID CARDS

Every Gnomon student is eligible to receive a Gnomon Student ID card. Please contact the Systems Engineer on duty to have one made.

Further questions regarding student ID cards, including misplaced cards, may be directed to the Systems Engineers via email at system.engineer@gnomon.edu.

PEER TUTORING

Gnomon's Peer Tutoring is solely run by student volunteers in collaboration with the Education and Education Operations Departments. The goal of Gnomon's Peer Tutoring is to nurture student success through voluntary tutoring delivered by verified and trained student peers. Peer Tutors have a specialty (or multiple specialties) to provide students the information needed so they may schedule an appointment with the appropriate tutor.

Any questions may be directed to the Education Operations Office at education.admin@gnomon.edu.

Log into the Student Web Portal at:

STUDENT GNOMON EMAILS

Gnomon provides all program students with an @ gnomon.edu email account which also include many Office 365 applications. All students, staff, and faculty members are expected to only use their official Gnomon email account for correspondence of academic and administrative nature.

If students do not receive a notification of their (a) gnomon.edu email accounts by the first day of class, the student should immediately contact the Technology Office via email at tech@gnomon.edu.

- School official use of email: Email is the main course for official communication within Gnomon. Gnomon has the reasonable expectation that such communication will be accessed and read in a timely fashion. Official email communication is only intended to meet the academic and administrative needs of the institution.
- Creation and dissemination of student email accounts: Official Gnomon student email accounts are provided to all program students. Students receive their email address and password a week prior to Orientation. Official email addresses will be included in directory information unless the students request otherwise, under FERPA, through the Registrar.
- Redirecting of email: Redirecting email does not absolve a student from the responsibilities associated with official communication sent to their @gnomon.edu email account. Such forwarding is done by the student, and at the student's own

Artwork by Stefan Kang Chun Yih

risk. Gnomon does not accept responsibility for services performed by outside providers.

4. Student responsibilities regarding use of email: Students are expected to access and read their email daily to remain current with Gnomon-related communication. Students have the responsibility to recognize that certain communication may be timecritical. Users should exercise extreme caution in using email to communicate confidential or sensitive matters, and should not assume that email is private or confidential. To avoid exceeding maximum storage allocation, routine maintenance of the account content by the student is expected.

Failure to check email, error in forwarding mail, or email returned to the school with "Mailbox Full" or "Undeliverable" are not acceptable excuses for missing official Gnomon communication via email.

LEARNING RESOURCE SYSTEM (LRS)

The Gnomon Library and Learning Resources offers students a variety of resources to support students in educational and professional goals. The Gnomon Library, located near the VR Lab and Figure Drawing Room, welcomes students to browse the collections for textbooks, art books, reference materials, trade and industry magazines, and other media. There are also many online resources available through the Student Portal, making it easy for students to access resources on-campus or off-site.

Artwork by Alexandra Reeves

Learning Resources, located near Labs 1, 2 and 3, is where students may checkout professional grade HD video cameras, still photography cameras, lighting equipment, tablets, and other equipment for instructional use. To check out materials or inquire about available resources, students may email the Systems Engineer at <u>learning.resources@gnomon.edu</u>.

To check out resources/equipment, students must:

- Complete the Gnomon Borrower Agreement: Equipment/Resources Form available from the on-duty Systems Engineer
- Abide by the rules and regulations set forth in the Gnomon Borrower Agreement: Equipment/ Resources
- Accept full financial responsibility for the care of the materials borrowed
- Return materials in the same condition

The Gnomon Stage is available to students to complete course assignments such as green screen shoots, photography, etc. and is also available to host student club meetings, student council meetings, etc. Questions regarding the Gnomon Stage or reservations may be directed to:

stagebookings@gnomon.edu.

With prior approval, the Television Center (TVC) building is available to students for location filming or photography to complete course assignments. Questions regarding location filming at the TVC may be directed to <u>facilities@gnomon.edu</u>. The Systems Engineer's Office is open for media and equipment checkouts from 9 a.m. to 12 a.m. (midnight), Monday through Sunday. All materials borrowed from the Library and Learning Resources must be used on the premises and returned the same day to avoid overdue charges.

Media may only be viewed using a student's personal device. Due to Public Performance restrictions, films may not be viewed/broadcast in the Student Lounge/ Media Center or in computer labs.

THE GNOMON STORE

The Gnomon Store sells art supplies and Gnomon merchandise such as t-shirts, hooded sweatshirts, and hats. Gnomon is proud to promote and sell books and other works authored by Gnomon-affiliated artists. The Gnomon Store is open Monday through Friday from 9to 6 p.m. and during some special events.

ACADEMIC MENTORING CENTER (AMC)

Upon acceptance into a full-time program at Gnomon, students have access to academic mentoring advisors. Academic advising provides support and motivation to address student needs and enhance overall student satisfaction. As advocates for students, academic mentoring advisors work closely with faculty and staff to promote academic success

Page 77

and campus involvement. In the Education Office, on the North side of the campus, is a room dedicated to advising students, including providing additional tutoring with homework, advice on managing course loads, and information on career options and emphasized study. The AMC is staffed by instructors with decades of industry and educational experience.

The AMC is open Monday through Friday from 9 a.m. to 6 p.m. Students must make appointments with members of the AMC for academic assistance. The AMC availability schedule is located on the AMC door but can also be viewed on the Gnomon Student Portal.

To set an appointment with an Academic Mentor, please contact the AMC representative directly or email <u>amc@gnomon.edu</u>.

Artwork by Alvaro Zabala

GNOMON STUDENT ASSISTANCE PROGRAM (GSAP)

The Gnomon Student Services Program (GSAP) is a confidential, free resource to assist students in managing a wide variety of issues that affect their daily lives such as:

- Stress and anxiety
- Depression
- Alcohol and drug dependency
- Family conflict
- Performance related fears
- Fitting in culturally

Students in need of counseling may call the service telephone number between the hours of 7:30 a.m. and 6:30 p.m. PST to speak with a qualified intake specialist. Should the student choose to seek counseling, an assigned counselor will contact them to schedule an appointment within 2-3 business days of their call.

Students receive three face-to-face sessions, per

Artwork by Toby Lewin

problem per year at no cost. The program also provides referrals to a variety of wellness-related community resources such as community and cultural events.

If a student feels that their situation requires immediate assistance, a 24-hour crisis hotline is available, through which the student can speak to a licensed counselor.

Additionally, the program offers discounts of up to 50% for prescription drugs, as well as discounts on legal, financial, and document preparation services. Students enrolled in a program at Gnomon are provided with a brochure and wallet card featuring the phone number and access information.

For more information, please contact the Student Affairs Office at studentaffairs@gnomon.edu.

HOUSING ACCOMMODATIONS

Gnomon is a non-residential campus and does not have dormitory facilities under its control. The school is not affiliated, does not endorse, and is not responsible for locating or assisting students with securing housing. \$71810(b)(13)(C)

The Admissions Office updates Gnomon's Student Resource Guide, which includes information about local housing that may be of interest. A student may request a copy of the Gnomon Student Resource Guide by emailing <u>admissions@gnomon.edu</u> or by calling 323.466.6663 for more information.

Gnomon also provides access to the Gnomon's Student Services Facebook page in order for new and incoming students to meet, share housing postings, and connect. Access to this group must be approved by speaking with an Admissions Representative.

For more information, please see:

gnomon.edu/admissions/domestic-students/resources

gnomon.edu/admissions/international-students/ resources

DISABILITY SERVICES (AMERICANS WITH DISABILITIES ACT AND SECTION 504 OF THE REHABILITATION ACT)

In compliance with state and federal laws and regulations, including the Americans with Disabilities Act of 1990 (ADA; as amended 2008) and Section 504 of the Rehabilitation Act of 1973 (Section 504), it is Gnomon school policy that not otherwise qualified individual with a recognized disability with Section 504, shall, solely because of their disability, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity of the school. The school recognizes that disabilities include mobility, sensory, health, psychological, and learning disabilities, and will provide reasonable accommodations to qualified individuals with disabilities to the extent that it is readily achievable to do so. The school is unable, however, to make accommodations that are unduly burdensome or that fundamentally alter the nature of the service, program, or activity.

Students diagnosed with a learning, psychological, or physical impairment are required to meet with the ADA/ Section 504 Coordinator ("Coordinator") to verify the disability and order to receive reasonable accommodations. Examples of documentation accepted by Gnomon for a learning or psychological disability are: an Individualized Education Plan (IEP), a 504 Plan, a psycho-educational evaluation, or a psychological evaluation.

Accommodations cannot be provided unless verification is provided directly to the Coordinator. Once verification is established, the student and the Coordinator discuss options for reasonable accommodations. The student is provided an "accommodation letter" to present to the relevant faculty. Accommodations are reviewed quarterly. No faculty member can give accommodations without an official written request from the Coordinator. Retroactive accommodations are not provided. All discussions and documentation will remain confidential.

Questions concerning Gnomon's disabilities services or accommodations should be forwarded to Student Affairs via email: studentaffairs@gnomon.edu.

Artwork by Aaron Corbin

PLACEMENT & CAREER SERVICES

Career guidance and placement is available through Gnomon's Placement and Alumni Relations Office.

Gnomon is proud to have alumni working at film, game, and visual effects studios worldwide and has consistently maintained an outstanding record of graduate placement. The Placement and Alumni Relations Office is the liaison between students and employers, serving the students by promoting Gnomon to the industry and ensuring the school has a growing network of studios and entertainment companies as part of the Gnomon community.

Gnomon's Placement Office offers assistance to all program students, and ensures that alumni are supported during their career. The Placement and Career Services staff is also pleased to assist students taking courses to further their professional development, if their work is at a sufficient level for production. Placement assistance is provided at the completion of studies to all graduates, but placement is not guaranteed.

Career services include:

- Professional career counseling
- Advisement on reels, resumes, and portfolios
- Guidance in researching openings at companies
- Referrals for available positions
- Introductions to individuals and companies in the industry
- Employer job fairs

For the most current placement statistics or further information, please contact the Placement and Alumni Relations Office via email at <u>placement@gnomon.edu</u>.

GNOMON EXTERNSHIP

The goal of the Externship Program for certificate-only students at Gnomon is to further support the school's mission. The Externship Program offers a unique opportunity to utilize knowledge gained in the classroom in a real-world, professional environment. Students in the Bachelor of Fine Arts in Digital Production program are not eligible to participate in the Externship Program.

Students are eligible to apply for externship opportunities at the following program intervals:

- Digital Production for Entertainment: Term 8
- Entertainment Design & Digital Production: Term 12

Any exceptions to the above will be made on an individual basis under guidance of the Placement & Alumni Relations Office.

Students interested in pursuing an externship should make arrangements with the Placement and Alumni Relations Office to discuss the application process and externship requirements. Externships are not mandatory.

Artwork by Kittitus Chinatiworn - Concept by Mike Redman

GENERAL POLICIES

EMAIL RESPONSIBILITY

Email is the primary form of communication utilized by Gnomon administration. Program students are responsible for using and checking their gnomon.edu email on a regular basis. All Gnomon related correspondence will be sent to students' gnomon.edu email addresses.

Students also have access to nearly all of the Office 365 applications including Word, Excel, etc. either from the web portal or by downloading the 365 suite and installing it on the student's home PC. The gnomon.edu email address also allows students to apply for educational discounts on software and equipment.

GRIEVANCES

To ensure the quality of education at Gnomon, the student grievance process aims to provide a prompt and equitable resolution for allegations that a school decision or action may have violated institution policies, or adversely affected a student's status, rights, or privileges. This procedure is not intended to be used as a mechanism for students to appeal grades.

Gnomon Procedure:

The student must make a reasonable effort to resolve the issue(s) on an informal basis. Students are encouraged to communicate their concerns directly to faculty or administration for suitable resolution. Should the informal process fail to reach an acceptable solution, students may also contact the Student Affairs Office (studentaffairs@gnomon.edu) to file an official written grievance. Should a student feel their concern has not been adequately addressed by Gnomon, the student may contact Bureau for Private Postsecondary Education (BPPE) or Accrediting Commission of Career Schools & Colleges (ACCSC).

Please see below for each individual procedure.

BPPE Procedure:

A student or any member of the public may file a complaint about this school with the Bureau for Private Postsecondary Education (BPPE) by calling (888)370-7589 or by completing a complaint form, which can be obtained on the bureau's website <u>bppe.ca.gov</u>. g94909(a)(3)(C)

ACCSC Procedure:

Schools accredited by the Accrediting Commission of Career Schools and Colleges must have a procedure and operational plan for handling student complaints. If a student does not feel that the school has adequately addressed a complaint or concern, the student may consider contacting the Accrediting Commission.

All complaints reviewed by the Commission must be in written form and should grant permission for the Commission to forward a copy of the complaint to the school for a response. This can be accomplished by filing the ACCSC Complaint Form. The complainant(s) will be kept informed as to the status of the complaint as well as the final resolution by the Commission.

Please direct all inquiries to:

Accrediting Commission of Career Schools & Colleges 2101 Wilson Boulevard, Suite 302, Arlington, VA 22201 (703) 247-4212 accsc.org

A copy of the ACCSC Complaint Form is available at the school and may be obtained by contacting Student Affairs at <u>studentaffairs@gnomon.edu</u> or online at <u>accsc.org</u>.

TITLE IX

Title IX of the Higher Education Amendments of 1972, 20 US Code § 1681(a), is a federal law which prohibits discrimination on the basis of sex in education programs or activities, and includes addressing sexual harassment, sexual violence, and other gender -based harassment occurring in an institution of education.

Gnomon is committed to fostering an educational and working climate free from sexual harassment, sexual assault, and sexual violence. To define conduct expectations and provide recourse for individuals whose rights have been violated, Gnomon implements a strategic coordination of policies, education, and clear and equitable procedures for reporting and resolution of complaints of sexual misconduct.

When sexual harassment or sexual assault has occurred, and is brought to the attention of the Title IX Representative, Gnomon will take steps to end the harassment or violence, prevent its re-occurrence, Artwork by Nitesh Nagda – Concept by Sergey Kolesov

and address its effects. A complainant has the right, and can expect to have reports taken seriously by Gnomon when formally reported, and for the prompt, equitable, reliable, and impartial investigation of complaints. The school's Title IX Coordinator has primary responsibility to respond appropriately to, and investigate suspected discrimination or harassment, and identify and remedy systemic problems.

With the guidance of the Title IX Representative, Gnomon will enact an initial assessment of the conduct, to the extent possible within the complainant's expressed preferences, if any, as to course of action, and the necessity for any interim remedies or

accommodations to protect the safety of the complainant and the community at large.

Inquiries and complaints regarding the application of Title IX and other laws, regulations and policies prohibiting discrimination may be directed to:

Acting Title IX Coordinator 1015 N. Cahuenga Blvd. Los Angeles, CA 90038 323.466.6663 <u>studentaffairs@gnomon.edu</u>

Questions regarding Title IX may also be directed to:

Office for Civil Rights San Francisco Office U.S. Department of Education 50 Beale Street, Suite 7200 San Francisco, CA 94105-1813 (415) 486 – 5555 OCR.SanFrancisco@ed.gov

Artwork by Peter Schwaegerle

NON-DISCRIMINATION POLICY

Gnomon does not discriminate in admission, treatment, or access to its programs or activities on the basis of race, color, national origin, ancestry, sex, gender, gender identification, sexual orientation, disability, age, religion, physical and/or mental disability, medical condition, veteran status, marital status or any other characteristic protected by institutional policy or state, local, or federal law. These practices include, but are not limited to, hiring, employment promotion and transfer, admissions policies, and administration of loan programs and participation in the benefits and services of education programs or related activities sponsored by Gnomon.

The institution complies with the Civil Rights Act of 1964, as amended; Title IX of the Education Amendment Act of 1972; Section 504 of the Rehabilitation Act of 1973; Age Discrimination Act of 1975; California SB-195 Equity in Higher Education Act, and any other applicable federal, state and local law. Gnomon is committed to a multicultural workplace and education programs involving cultural and ethnic diversity among the school's community.

For more information or if you believe you have been subject to discrimination on the basis of sex, sexual orientation, gender identity, or disability, please contact:

Acting Title IX and ADA/Section 504 Coordinator 1015 North Cahuenga Blvd. Los Angeles, CA 90038 <u>studentaffairs@gnomon.edu</u> 323.466.6663

HARASSMENT & SEXUAL MISCONDUCT POLICY

Gnomon is committed to providing a safe learning and working environment for students and employees that is free from all forms of discrimination, harassment, exploitation, or intimidation.

Sexual misconduct is a form of discrimination. Sexual harassment includes unwelcome sexual advances, requests for sexual favors, and/or verbal or physical conduct of a sexual nature.

This includes, but is not limited to, sexually-related drawings, pictures, jokes, teasing, uninvited touching, or other sexually-related comments. Gnomon strongly opposes harassment and sexual misconduct and such behavior is prohibited by school policy and federal and state law. This policy applies to all Gnomon community members, including students, faculty, administrators, staff, and third parties conducting business or having any official capacity with the school or on school property.

Gnomon is prepared to take prompt action to prevent and correct such behavior of individuals who engage in sexual harassment, as well as any other unlawful harassment based on factors such as race, color, national origin, ancestry, sex, gender, gender identification, sexual orientation, disability, age, religion, physical and/or mental disability, medical condition, veteran status, marital status, or any other characteristic protected by institutional policy or state, local, or federal law.

Artwork by Matt Millard

Violations of this policy are not permitted and may result in disciplinary action up to and including expulsion or termination.

Gnomon encourages any student or employee to immediately report these incidents. Gnomon is committed to protecting the privacy of all individuals involved in a report of sexual harassment, sexual misconduct, and sexual violence. Throughout the process of investigation of a report every effort will be made to protect the privacy interests of all individuals, and respect and safeguard private information, to the extent possible consistent with the legal obligations of Gnomon to investigate and respond effectively.

Adverse action will not be taken against a student or employee who, in good faith, reports or participates in the investigation of a violation of this policy. Retaliation against a person who properly reports, complains about, or participates in the investigation of such harassment is strictly prohibited.

For more information, or to file a complaint, please contact Gnomon's Acting Title IX at 1015 North Cahuenga Blvd., Los Angeles, CA 90038, by phone, 323.466.6663, or via email at <u>studentaf-fairs@gnomon.edu</u>.

This policy, the Sexual Misconduct Grievance Policy and Procedures, and reporting options are available in full at: <u>gnomon.edu/disclosures-policies</u>.

PERSONAL SAFETY

Gnomon is located in the Television Center (TVC), an industrial complex that provides 24-hour security/ surveillance. Students are encouraged to be aware of their surrounding and to take appropriate precautions:

- Walk in groups to cars at night
- Students who witness anyone or anything suspicious should notify the security officer on duty
- Avoid taking short cuts and going to poorly lit areas
- Stay in places with good visibility and be observant of surroundings

TVC Security Office: (323) 462-3992 TVC Security Mobile: (323) 381-2820

RESERVATION OF RIGHTS

Gnomon reserves the right to change tuition fees, scheduled dates of courses, course offerings, instructors, policies, and procedures pursuant to California Code of Regulations (CCR) and California Education Code (CEC). Gnomon also reserves the right to deny enrollment in courses to any student and the right to withdraw any student whose conduct fails to comply with the policies, rules, and standards of Gnomon.

Gnomon has no pending petition in bankruptcy, is not operating as a debtor in possession, has not filed a petition within the preceding five years, and has not had a

Page 85

Artwork by Nitesh Nagda - Concept by Jordan Grimmer

petition in bankruptcy filed against it within the preceding five years that resulted in reorganization under Chapter 11 of the United States Bankruptcy Code. *§94909(a)(12)*

STUDENT WORK

Gnomon reserves the right to retain any and all student work for marketing, exhibition, publication, or for the student gallery. Gnomon labs and facilities may not be used for paid production work.

STUDENT LIABILITY

Physical injury and/or medical problems, as well as loss of or damage to personal property resulting from natural disasters, theft, or other causes are not the responsibility of Gnomon. Gnomon recommends that students carry personal insurance.

Personal property accountability is the responsibility of every student, faculty, and staff. Each individual must take reasonable precautions to protect their personal property.

The School does not assume responsibility for any lost or stolen personal property. Please keep all personal property under observation and/or secured.

Students who are the victim of a theft should immediately report it to campus security. Thieves target credit cards, cash, computers, laptops, cameras, art supplies, bicycles, book-bags or satchels, and other electronic equipment, in particular.

The following are some preventative measures that can be taken to protect a one's personal property:

- Avoid leaving personal items unattended. This includes laptops, CD players, iPods, cell phones, or any other items that might draw attention.
- Avoid leaving any personal item overnight any place on campus.
- Keep a list of serial numbers and descriptions of valuables in a safe place. If possible, take a picture of these items as well. Items without serial numbers can be engraved with a unique number for identification purposes.

It is recommended that students check their or their family's personal homeowner's insurance policy and secure coverage if needed.

Artwork by Santhosh Koneru

STUDENT ACTIVITIES

CAMPUS EVENTS

Gnomon offers students several opportunities to participate in various social activities and industryrelated events to promote peer and community connections. Activities and events are planned and supervised by Gnomon staff in coordination with student volunteers and industry organizations.

Events include:

- Lecture series focused on the film, visual effects, and games industries, featuring prominent speakers from various studios
- Gnomon Gallery openings
- Software partner user groups held on Gnomon's campus

For more information about Gnomon Events go to gnomon.edu/community/events or join our official mailing list at gnomon.edu/enews.

STUDENT COUNCIL

Student Council meets once per quarter to address any issues students may be experiencing. The Student Council is entirely voluntary and student managed.

Leadership is in the form of the Student Council Board. These students meet with the general student population at minimum once per quarter. Following this meeting, the Board meets with its Staff Advisor to discuss topics addressed in the general meeting, and collaborate on ongoing and future projects. Common topics covered in each meeting include student concerns, hardware/software issues, faculty/ class issues, and facilities. Suggestions for future programming, which drive decision-making and strategic planning within the scope of student services are proposed to, and addressed by, Administration.

STUDENT ASSEMBLY

Gnomon holds an all-student assembly on the Stage when appropriate. Students are provided lunch while given the opportunity to converse with Education staff and faculty, meet other students, discuss on- and offcampus activities, and receive any important updates relating to their programs.

STUDENT CLUBS

There are various on-campus, student-run clubs which provide an energetic community forum for collaboration, learning, and experience within specific disciplines.

A staff or faculty liaison will help facilitate scheduling, speakers, and organization. Club activities include, but are not limited to: guest speakers, sketch events, career -specific lectures, and social gatherings. Students are welcome to join multiple clubs.

Questions regarding student clubs may be directed to <u>studentaffairs@gnomon.edu</u>.

Artwork by Voon Jiat Lim

FACILITY POLICIES & PROCEDURES

FACILITIES

Located in Hollywood, home to hundreds of film, game, and television studios, Gnomon is truly in the heart of the industry.

The Gnomon campus is located at 1015 North Cahuenga Boulevard, Los Angeles, CA 90038, in the center of the famed Television Center Building (TVC). Gnomon's facilities are designed to create a production-like environment with an atmosphere conducive to creativity and learning. Gnomon's 34,000 squarefoot facility houses nine (9) state-of-the-art computer labs, one (1) sculpture studio, one (1) drawing studio, one VR lab, three (3) lecture labs and a sound stage equipped with a 70-foot green screen cyclorama, video, and audio equipment to host presentations and limited stage lighting equipment.

Other resources available for students include two (2) kitchens, three (3) student lounges equipped with large screen televisions, vending machines, the Gnomon Store, the Gnomon Gallery, and the Gnomon Library (See <u>Appendix 4</u> for the <u>Gnomon Campus Map</u>).

PARKING

Street parking is available, but is metered and can be limited. Alternately, parking is available in the lot directly south of the Gnomon campus on Romaine and Cahuenga. To use this lot, students must obtain a keycard which can be purchased online through the Student Web Portal for \$140.00 per term. Each keycard is active until the first week of the following term. There is a \$15.00 replacement fee if the keycard is damaged, lost, or stolen. Keycards must be returned at the end of the term.

HOLIDAYS

Gnomon traditionally observes Easter, Thanksgiving, and Christmas. Notifications will be posted if any other holidays will be observed.

Artwork by Nicolas Acuna

PREVENTIVE HEALTH AND SAFETY MEASURES

Gnomon facilities provide ergonomically designed workspaces, low reflection wall paint, low frequency lighting that reduces screen reflectivity and glare, along with ergonomically designed chairs at every lab workstation. Safety precautions are considered when setting up office and lab spaces at Gnomon. Health and Safety binders are located in each studio/ lab space and contain information on preventative health and safety measures. Students are encouraged to use them for reference in applicable situations.

ACCIDENTS AND INJURIES

In the event of a life-threatening emergency, call 911 immediately. First aid kits are located in the Systems Engineer's Office, the Main Lobby, all student kitchens, offices and classrooms.

All injuries should be reported to an instructor, Systems Engineer or Administrative staff member immediately. A Gnomon Accident/Injury Report must be completed and submitted to the Facilities Office as soon as possible.

Please email <u>facilities@gnomon.edu</u> to obtain the Gnomon Accident/Injury Report or for more information.

If an accident occurs outside of the school classrooms but within the Television Center Complex, please report the issue immediately to TVC security and the Systems Engineer or administrative staff on duty. The Gnomon Accident/Injury Report must be filled out along with a TVC incident report form.

BICYCLES, SKATEBOARDS, AND SCOOTERS

Bicycles, skateboards, hoverboards, scooters, and other such forms of transportation may not be ridden within the Television Center Complex (TVC). Students and visitors are asked to walk with the above while on campus. Bicycles should only be locked to the bicycle racks provided in designated areas.

SMOKING POLICY

Gnomon respects the smoking policies of the Television Center Complex (TVC) and existing state law. Smoking is prohibited in any enclosed space including labs, classrooms, walkways, catwalks and other common areas. Cigarette smoking only is allowed on the north campus, including the Tiki area and picnic tables adjacent to the enclosed parking area. Students will honor designated smoking and nonsmoking signs posted throughout TVC.

Artwork by Nicolas Acuna

Students should be considerate and maintain a distance of at least 30 feet from any building, entrance, exit, or operable window while smoking. This policy covers the smoking of any tobacco product and the use of oral tobacco products, "spit" tobacco and ecigarettes, and it applies to staff, faculty, students, and visitors.

ALCOHOL AND DRUGS POLICY

In accordance with the Drug-Free Schools and Campuses Regulations (EDGAR Part 86), Federal Drug-Free Workplace Act 34 CFR Part 85, Subpart F and California Drug-Free Workplace Act Page 2 of 28 Rev. 11.18.2015pa of 1990, this institution is committed to maintaining a drug-free workplace and a drug-free school.

The unlawful manufacture, distribution, dispensing, and possession or use of drugs, drug paraphernalia, alcohol, or other controlled substances at this institution is strictly prohibited. Being under the influence of illicit drugs and/or alcohol on campus at any time is strictly prohibit. Applicable Student Conduct Code sanctions will be enforced.

On-campus possession and use of medical marijuana is not allowed. Students and employees are required, as a condition of enrollment and/or employment, to abide by this policy. (see: <u>Drug and Alcohol</u> <u>Abuse Policy Statement</u>)

WEAPONS POLICY

Using or possessing any firearm, explosive, or weapon of any kind, regardless of whether the person has a lawfully-issued permit to carry a concealed weapon, is not permitted.

EMERGENCY NOTIFICATION SYSTEM

Gnomon is committed to providing a safe learning and working environment for students, faculty, and staff. With the exception of term breaks and holidays indicated in the student catalog, Gnomon is open seven days a week.

In the event of natural disasters, severe weather conditions, or other emergencies, Gnomon may close in the interest of safety.

Should this action be necessary, Gnomon will provide as much notice as possible allowed by circumstances to minimize inconvenience.

- Closing for the day: When possible, the decision and announcement will be made by 8 a.m.
- Closing during the day: When conditions warrant closing of Gnomon during the day, administration will relay this information to all students, faculty, and staff Evening courses: In the event that day courses are cancelled, evening courses will also be considered cancelled

Page 90

Artwork by Ashley Stegon

Students, faculty and staff will be contacted through "messageSender," a Campus Alert System designed to instantly alert an entire campus community via SMS, voice-calls, and emails in the event of an emergency or dangerous situation. This message will come from the designated phone number: (323) 300 – 6162. Depending on the nature of the emergency, one or more methods of notification will be used.

VISITORS/MINORS AT GNOMON

Visitors are welcome at Gnomon. However, if visitors plan to stay for an extended period of time, permission must be granted by the administration.

All employees of Gnomon have the authority to ask anyone who is being disruptive or disrespectful to leave the premises. Minors under the age of 18 must be accompanied by an adult at all times.

CAMPUS SECURITY

The Campus Security Act (Public Law 102-26) requires postsecondary institutions to disclose the number of instances in which certain specific types of crimes have occurred in any building or on any property owned or controlled by this institution used for activities related to the educational purpose of the institution, and/or any building or property owned or controlled by student organizations recognized by this institution.

For a current statistics report, see "2015 Campus Security Act Disclosure Statement" in Appendix 7.

Artwork by Caleb Arthur

TUITION & FEES

PAYING TUITION

RETURNING AND INCOMING STUDENTS

Tuition and student fees are due no later than the first Friday of the term.

Financial Aid students are responsible for any difference in tuition not covered by federal funding.

Please be advised:

Students are responsible for determining the tuition amount owed and for making payment prior to the above deadline. Students should reference the Gnomon Student Web Portal to access the total amount due and to make timely payment.

In the event tuition payments may be delayed, payment arrangements must be secured by the above deadlines. Requests must be submitted in writing (email is acceptable) to the Bursar via email at <u>bursar@gnomon.edu</u>.

LATE FEES/PENALTIES

Payments made more than five (5) business days after the scheduled due date are subject to a 2% late fee of the balance due. If the payment remains delinquent after ten (10) business days, a hold will be placed on all of the student's Gnomon accounts and he/she will not be permitted to attend courses until payment is rectified. Continued delinquent payment may result in the student account being sent to collections.

THIRD PARTY PAYMENTS

Please be advised that Federal law dictates that Gnomon is to maintain privacy regulations regarding student affairs and communications for students who are of legal age. Should payment arrangements be made by anyone other than the student, it is the student's responsibility to relay the information to said party regarding payment deadlines or any subsequent changes to tuition.

Artwork by Kittitus Chinatiworn

PAYMENT OPTIONS

Student tuition payments, or payment arrangements (Gnomon payment plan, third party payers, financial aid, and/or private loans) are required to officially complete registration and reserve a space in the course/program.

FINANCIAL AID

Gnomon offers Federal Student Aid for qualifying students in the Digital Production for Entertainment (DP), Entertainment Design & Digital Production (EDDP) certificate programs, and the Bachelor of Fine Arts in Digital Production degree program. Fulltime students who are U.S. citizens or eligible noncitizens may be eligible to receive Pell Grants and/or Direct Loan financial assistance. Students interested in applying for aid should contact the Financial Aid Office at (323) 466 – 6663 or via email at finaid@gnomon.edu.

PAYMENT METHODS

Gnomon accepts for payment:

- Company and personal checks
- All major credit cards
- Corporate purchase orders
- Gnomon payment plans (see below)
- Money orders
- Cashier's checks
- Wire Transfer
- Private education loans
- International payment through Flywire

Gnomon Payment Plans are contractual agreements with students to defer payment over the term:

- Tuition is divided into three installments plus a 3% administrative charge
- The first installment of 50% is due at the time of registration
- Remaining installments are due over the course of the term
- Payments made more than five (5) business days after a scheduled due date are subject to a 2% late fee
- Continued failure to make payment will result in the student's computer account being frozen and suspension from course until payment is rectified

Private Student Loans are available, but must be coordinated with the Financial Aid Office:

- Gnomon offers loans through SLM Financial, a Sallie Mae Company
- Prior to submitting a loan application, students must speak with Admissions and Financial Aid
- Students must be a US citizen, a US national, or a permanent resident, and must be creditworthy. A co -signer may also be required

If you have further questions regarding tuition, fees or payment options, please contact our Bursar via email at <u>bursar@gnomon.edu</u>.

Student Work by Angela Rico - Concept by Nick Gindraux

APPENDIX 1 FOUNDATION IN ART & DESIGN COURSE DESCRIPTIONS

Animal Drawing

Learn animal anatomy, biomechanics, and dynamic form

In this course, students learn the foundations of animal anatomy. Students will be exposed to live animals in a variety of settings, learning the basic musculoskeletal anatomy of quadrupeds, illustration techniques, and dynamic form and gesture. Lectures cover biomechanics, methodologies of gesture, the biology of creature design, and the specifics of equine gaiting, behavior, and communication. Students will create a creature for a final project and present it for critique. Students are expected to cover the costs of admissions, parking, and supplies, estimated to be between \$50 to \$80.

Character Design

Learn the fundamental aspects of character design

This course teaches the process of character design in the entertainment industry. Students create characters from start to finish, going through the pre-production stages of research, concept, and the craft of editing before a final presentation of a well-developed character. Thumbnailing, silhouette design, figure invention and posing, prop and costume design, character archetypes, storytelling, and illustration techniques will be discussed. At-home assignments developing characters with industry-standard methods round out this course. Students are expected to cover the cost of supplies, estimated to be between \$0 to \$15.

Color Theory and Light

Explore the fundamentals of color theory

This course explores the practical 2D applications of the fundamentals of light and color. Lectures and demonstrations cover topics such as bounced light, camera effects, value patterns, shadows, and atmospherics. Value scale and color wheel exercises, and at-home assignments in traditional media reinforce learned successful applications of color harmonies and atmospheric principles. Gaining experience in the foundation of color provides students with the ability to expand on existing visual techniques. Students are expected to cover the cost of supplies, estimated between \$80 to \$120.

Costumed Figure Drawing

Apply foundational figure drawing techniques to costumed characters

This course explores drawing fully-realized characters in costume. Students will learn to analyze figures with a special emphasis on understanding the anatomical form beneath the costume. The course provides a strong foundation in figure construction, utilizing light and shadow, and the mechanics of drapery. Exercises are designed to explore storytelling, composition, caricature, and characterization, with at-home assignments revolving around master copies and costume research from various cultures. Students are expected to cover the cost of supplies, est mated to be between \$30 to \$35.

Creature Design

Learn the creation of creatures through traditional and digital methods

In this course, students learn the processes used to develop fantasy creatures. Students will research and develop creature designs from idealization to completion. Anatomy, form, storytelling, and character development aid in creating believable and appealing designs. In-class demonstrations and lectures on the applications of biology to design are used to establish an understanding of how to illustrate complex creatures. Discussions of industry experts fosters inspiration for students' own methodologies. Students are expected to cover the cost of supplies, estimated to be between \$0 to \$20.

Digital Painting

Learn the traditional principles of perspective

This course teaches students how to approach a variety of subjects using traditional methods of perspective. Students will develop an understanding of managing scale, measurement, shadows, composition, and the overall mechanics of one-, two-, and three-point perspective, all supported by in-class lectures and demonstrations. Complex at-home assignments utilize these methods to illustrate relevant subjects such as spacecraft and vehicles, building towards the presentation of final projects. Students are expected to cover the cost of supplies, estimated between \$50 to \$80.

Digital Painting 2

Study advanced methods of painting in Adobe Photoshop for film and games

This course builds on the principles learned in Digital Painting, and through weekly lectures, in-class practice, and out of class assignments, expands student learning in developing high-end concept art using various film and game, industry-aligned software. Emphasis is placed on storytelling, painting technique, and the ability to complete finished pieces. Classes include a mixture of weekly painting demonstrations, discussions of cinematic concept methods, and in-class exercises, as well as portfolio critiques and industry tips. Students will explore various styles of painting through homework assignments and work toward polished conceptual projects.

Drawing Fundamentals 1

Communicate complex design ideas via visual media

In this course, students learn to recognize and effectively utilize complex and abstract forms to communicate ideas. Students will develop skills in expressing value, shadows, shading, perspective, and composition in both traditional and digital platforms. Lectures and demonstrations support in-depth homework assignments, creative projects, and a final presentation. This course is a cornerstone of learning foundational methods of communicating visual constructs. Students are expected to cover the cost of supplies, estimated between \$75 and \$100.

Drawing Fundamentals 2

Apply illustration techniques to industrial design

This course is a continuation of Drawing Fundamentals 1. Students focus on developing advanced sketching and illustration techniques as applied to industrial design. Students will use traditional methods of ideation based on source materials to produce polished final pieces in digital platforms. Complex homework assignments tap into the principles of design as outlined in lectures, demonstrations, and critiques. Students are expected to cover the cost of supplies, estimated between \$50 and \$75.

Drawing in 3D

Learn to create the illusion of 3 dimensions on a 2 dimensional surface

This course teaches students how to create the illusion of depth using traditional drawing methods. Students will learn methods of manipulating scale, measurement, shadows, and composition to accurately depict 3 dimensional objects in space. Students will learn to use one, two or three points to define objects in perspective. Students will learn to use drawing devices such as rulers and templates to create the illusion of depth. The principles they learn will be applied to illustrate complex objects such as vehicles, architecture and weapons from various angles. Students are expected to cover the cost of supplies estimated at \$50 to \$80.

Environment Design

Design environments for film, animation, and games

This course covers the basics of designing different types of environments for animation, film, and games. Students learn perspective, composition, and research techniques to create believable detail, clear tonal reads, and modeling. The application of the expressive differences between interior and exterior environments within established values will be utilized towards a final project.

Gesture Drawing

Develop skills in gesture drawing from a live model

This course is a complement to Life Drawing, focusing on the expression of gesture in the human form. Inclass drawing sessions use live models, both nude and costumed, in a variety of character and story-driven poses. Students will learn critical elements of dynamic drawing, such as pose analysis, silhouette development, proportion, balance, and critical thinking in terms of storytelling and design. By drawing quickly and spontaneously, students learn to be more creative, inventive, and versatile as visual artists. Students are expected to cover the cost of supplies, estimated between \$30 to \$60.

Life Drawing

Develop skills in foundational figure drawing

In this course, students learn to draw the human figure, utilizing both traditional and non-traditional principles and techniques. Styled after a foundation art school figure drawing course, the principles of form and gesture are applied to in-class live model sketching and homework figurative studies. Communicating gesture, creating accurate anatomy and proportion, and developing a body of figurative portfolio work are inherent to this course, supported by in-class demonstrations and lectures. Students are expected to cover the cost of supplies, estimated between \$50 to \$80.

Photoshop for Digital Production

Build an understanding of the principles of Adobe Photoshop

This course provides students with a working foundation of the interface and tools of Adobe Photoshop. Through lectures, demonstrations, and exercises, students learn tools for photographic retouching, color treatment, use of layers and selections, photographic manipulation, and compositing. Students will gain the ability to create and utilize advanced photo manipulation and image editing techniques to create 2D images and assist 3D design. Over the 10 weeks students will become practiced in the flexibility and power of Adobe Photoshop as it relates to a digital production workflow.

Prop and Weapon Design

Design and digitally build conceptual props

This course explores the design methods used to build conceptual props based on a given script. Students will sketch and ideate prop and weapon designs in traditional media for a specific application in a digital platform. They will utilize form language, thumbnailing, reference, research, and materials studies. Lectures cover these design methods and how to craft concept in a group.

Vehicle and Mech Design

Design vehicles and mechs for digital entertainment

This course teaches students to sketch, style, and render vehicles and mechs using digital rendering techniques. Students learn design cues and a visual language that allows an audience to understand vehicles' roles in film and game narratives. Lectures, demos, master studies, and homework development contribute to an in-depth understanding of the purpose of vehicle and mech design

Artwork by Rhonda Chan

APPENDIX 2 BACHELOR OF FINE ARTS IN DIGITAL PRODUCTION COURSE DESCRIPTIONS

Advanced Compositing

Evaluate the best approach to a shot using The Foundry's NUKE

This course builds on the principles learned in Art of Compositing. Through lectures, demonstrations, and out of class assignments, students learn to develop advanced compositing techniques inside of The Foundry's Nuke. Compositing techniques such as tracking removal, core matting, keying challenges, multi pass compositing, 2D depth of field and motion blur, 3D projections, matte painting integration, and 3D relighting will be covered. Students will explore various styles of compositing, learning to accelerate their workflow in a professional manner, through complex projects for critique.

Anatomy for Artists

Explore the foundations of human anatomy through structural analysis

In this course, students learn the foundations of anatomy through illustrating the structure of the human body. Understanding the functionalities of the musculoskeletal system, proportion, dynamic form, and how light and shadow affect the body are critical elements of this course. Classes include lectures, drawing demonstrations, and drawing exercises with live models. Academystyle master copies and skeletal studies based on in-class work comprise the homework assignments. Students are expected to cover the cost of supplies, estimated between \$50 to \$80.

Animal Drawing

Learn animal anatomy, biomechanics, and dynamic form

In this course, students learn the foundations of animal anatomy. Students will be exposed to live animals in a variety of settings, learning the basic musculoskeletal anatomy of quadrupeds, illustration techniques, and dynamic form and gesture. Lectures cover biomechanics, methodologies of gesture, the biology of creature design, and the specifics of equine gaiting, behavior, and communication. Students will create a creature for a final project and present it for critique. Students are expected to cover the costs of admissions, parking, and supplies, estimated to be between \$50 to \$80.

Animation and Visual Effects 1

Discover how to achieve high-quality digital effects

This course exposes students to the methods used to achieve high-quality visual effects animation. Tools are learned in context with how they are used in a professional production environment, and problem-solving is critical to coursework. This course focuses on Maya's core tool set for producing motion keyframing, procedural modeling and animation, dynamics, and sound synchronization. Weekly exercises will help cement this important tool set into students' workflows in preparation for working within different production pipelines.

Animation and Visual Effects 2

Learn how to use advanced tools to create production quality animation and digital effects

In this course, students combine skills gained in Animation and Visual Effects 1 with newly introduced concepts to create complex exercises. Advanced assignments in animation, lighting, rendering, simulation, camerawork, and the creation of animatics will broaden students' comprehension of the art of animation. The class covers concepts related to the visual, spatial, sound, motion, interactive, and temporal elements and features of digital technology for their use in the creation and application of digital media-based work. Digital cinematography will be addressed in lectures to help students achieve compelling compositions and camera animations. Students will gain exposure to the MASH motion graphics tool as well as multiple dynamic simulation tools including particles, fluids, and cloth FXs in this course.

Art History 1

Survey of the cultural impacts of Western art, architecture, and design

This course is a survey of Western architecture, art, and design, and the cultural implications of critical works of art through history. Diverse artistic traditions and methodologies from prehistory to modernism will be covered as students expand their research techniques and develop analytical skills. An emphasis is placed on integrating the development of art forms with the geographic, sociopolitical, philosophical, and religious characteristics of these cultures. Individual and group projects round out this course of study. Students are expected to cover the cost of supplies, estimated between \$10 to \$15.

Art History 2

Explore connections between the history of art, design, and architecture

This course is an advanced exploration of the history of art, using knowledge gained in Art History 1. Students will expand their research abilities, analyze and evaluate critical works of art, and relate their discoveries to the impact of the visualization of technology. Through an intensive in-class study of cultures and artistic movements the world over, combined with lecture, discourse, and relevant at-home assignments, students obtain a greater understanding of art's varying and complex relationship to our own desire to create.

Art of Compositing

Develop essential introductory techniques to compositing using The Foundry's Nuke

This course builds on the principles learned in Introduction to Compositing. Through weekly lectures, in-class practice, and out of class assignments, students learn compositing techniques using The Foundry's Nuke. Emphasis is placed on the user interface, node-based workflows, color correction, rotoscoping, color management, painting, tracking, color keying, matting, and 3D workflows. Classes include compositing demonstrations, discussions of node-based methods, project critiques, and industry tips. Students will explore various styles of compositing utilizing Nuke, working towards a final project for presentation.

Character Animation 1

Learn the fundamentals of animation with Autodesk Maya

This course introduces students to 3D character animation using Autodesk Maya, using the application of the twelve principles of animation. Production workflows and techniques are learned through lecture, demonstration, and practicing animation fundamentals: keyframing, tangents, graph editor, dope sheets, and operating a character rig. Students focus on building a solid foundation of timing, focusing on strong body and weight mechanics and good posing, and developing animation skills through exercises and critique. Students are expected to cover the cost of supplies, estimated to be between \$70 to \$75.

Character Animation 2

Translate body mechanics into 3D animation

This course covers the processes and techniques used to create believable and appealing bipedal body mechanics in animation. The exploration of topics such as walking, running, jumping, throwing, and heavy lifting will be utilized to create physically accurate motion for bipedal characters. Through in-class lectures and demos, and at-home exercises, students will develop a better understanding of the subtleties of good animation, working towards producing demo reel-quality scenes.

Character Animation 3

Apply emotion and performance to character animation

This course is an advanced exploration of the acting and performance aspects of character animation. Building upon the mechanical and technical concepts covered in the previous two animation courses, students will be introduced to methods for adding appeal, purpose, and emotion to their characters. Through in-class lectures and demos and at-home exercises, students will develop a better understanding of the subtleties of good animation, working towards producing demo reelquality scenes.

Character Animation 4

Develop complex facial animation techniques

This course provides students with an in-depth look at the process of creating strong, appealing facial animations and lip-sync techniques. Students learn to create emotionally convincing performances through expression and dialogue. Through in-class lectures, demonstrations, and at-home exercises, students develop a better understanding of the subtleties of good animation.

Character Design

Learn the fundamental aspects of character design

This course teaches the process of character design in the entertainment industry. Students create characters from start to finish, going through the pre-production stages of research, concept, and the craft of editing before a final presentation of a well-developed character. Thumbnailing, silhouette design, figure invention and posing, prop and costume design, character archetypes, storytelling, and illustration techniques will be discussed. At-home assignments developing characters with industrystandard methods round out this course. Students are expected to cover the cost of supplies, estimated to be between \$0 to \$15.

Character Modeling and Sculpting

Use classical techniques to create bipedal production models

This course teaches students to build balanced bipedal characters, merging the traditional art of sculpting with digital modeling techniques. Autodesk Maya, in conjunction with Pixologic's ZBrush, is used to create appealing and functional characters in 3D. Students will focus on the technical processes needed to create detailed production models. Lectures and demonstrations cover the use of anatomy as it pertains to modeling bipeds, clothing, and accessories, as well as the technical needs for creating high quality deformable characters for animation. Over the term students will complete a fully modeled and sculpted character with animation-ready topology for critique.

Character Rigging for Production

Explore the complex challenges in rigging for production

This course builds on the principles learned in Character Rigging Fundamentals, and through weekly lectures, inclass practice, and out of class assignments, expands student learning in creating deformation on a biped character rig in Autodesk Maya. Emphasis is placed on deformation techniques, including skin clusters, painting skin weights, corrective blendshapes, facial rigs using blendshapes, cloth setups, the basics of muscles, and quadruped rigs. Classes include rigging demonstrations, discussions of production workflows, and project critiques. Students will explore various styles of rigging through homework assignments and work towards a final project that is a character rig.

Character Rigging Fundamentals

Learn the foundations of character rigging in Autodesk Maya

This course builds on the principles learned in Introduction to 3D with Maya, and through lectures, in-class practice, and out of class assignments, expands student learning in developing character animation rigs inside of Autodesk's Maya. Emphasis is placed on understanding how to create joints, attributes, constraints, basic skinning, inverse and forward kinematics controls, and ik spline, while building a basic biped rig. Classes include a mixture of rigging demonstrations and discussions of the role of a rigger in production, as well as setup critiques and industry tips. Students will explore various styles of rigging through weekly assignments and work towards creating a biped rig in Maya.

Character Sculpture 1

Sculpt a character using traditional methods

This course teaches students to design characters in 3D. Understanding the methods of traditional sculpting is an integral part of learning the foundations of 3D design. Beginning with character design fundamentals, students learn armature construction, dynamic and neutral posing, and then concentrate heavily on primary and secondary forms, texturing and detailing their pieces. Lectures and demonstrations support and inform the overall process of completing a sculpture to a polished, professional finish. Students are expected to cover the cost of supplies, estimated between \$175 to \$210.

Character Sculpture 2

Sculpt form and anatomy using traditional methods

This course builds on techniques learned in Character Sculpture 1, focusing heavily on the figurative fundamentals essential to successfully creating realistic characters. Students gain further skills in anatomical rendering in 3D through the execution of academy-style scale models of the head and torso. Each class of the course provides theoretical lectures and in-depth practical demonstrations by the instructor. The classroom is workshop-oriented and students follow along with the instructor through the sculpting process to expand their sculpting capabilities. Students are expected to cover the cost of supplies, estimated between \$100 to \$150.

Color Theory and Light

Explore the fundamentals of color theory

This course explores the practical 2D applications of the fundamentals of light and color. Lectures and demonstrations cover topics such as bounced light, camera effects, value patterns, shadows, and atmospherics. Value scale and color wheel exercises, and at-home assignments in traditional media reinforce learned successful applications of color harmonies and atmospheric principles. Gaining experience in the foundation of color provides students with the ability to expand on existing visual techniques. Students are expected to cover the cost of supplies, estimated between \$80 to \$120.

Creature Animation 1

Adapt traditional mechanics to animal animation

This course expands on the skills learned in Character Animation 1-4. Students develop a better understanding of animal anatomy and behavior as the foundation of creature animation. Through detailed analyses of reference footage, aided by in-class demonstrations and lectures, students will produce professional-quality animation cycles. This course also introduces technical methods to students in order to optimize work flow in professional production environments. Students are expected to cover the cost of supplies, estimated to be between \$15 - \$30.

Creature Modeling and Sculpting

Apply advanced ZBrush methods to creature modeling

In this course, students learn to create complex and believable 3D creatures in Pixologic's ZBrush. Classes will focus on designing, researching, and creating appealing forms as they relate to inventing creatures for the entertainment industry. Real-world demonstrations, lectures, and critiques center on resolving pipeline and design issues that may occur during the creation process. Students will design, sculpt, and render high quality 3D creatures using Pixologic's ZBrush throughout the term, culminating in a posed, high-quality, production-ready creature concept model created from their imagination.

Cultural Studies

An exploration of the sociopolitical and historical perceptions of identity

In this course, students will identify the sociopolitical and historical perceptions of a variety of cultural concepts. Changing attitudes about class, economy, gender roles, and the shifting landscapes of a global identity will be discussed. Students will apply knowledge gained through analysis of readings and lectures to their overall comprehension of the identities of relevant cultures.

Demo Reel 1-2

Create a professional-quality demo reel

This course is a portfolio development class structured so students can create polished, professionalquality deliverables. Students work with the instructor to develop multiple portfolio pieces throughout the term. Feedback and critique promote professional growth and provide a real understanding of what is needed to create projects for production in the entertainment industry.

Demo Reel 3

Create a professional-quality demo reel

This course is a portfolio development class structured so students can create final professionalquality deliverables. Each student has a set timeline per design to model, texture, develop shaders, light, and render a piece. Feedback and critique promote professional growth. By the end of the term, students have a more firm understanding of what is necessary to succeed in the visual effects industry. Students will complete their reels for Placement.

Demo Reel 4

Complete final projects for generalist portfolio reel

This course is a portfolio development class structured so students can create final professionalquality deliverables. Each student has a set timeline per design to model, texture, develop shaders, light, and render a piece. Feedback and critique promote professional growth. By the end of the term, students have a more firm understanding of what is necessary to succeed in the visual effects industry. Students will complete their reels for Placement.

Digital Matte Painting

Create complex matte paintings in 2D and 3D

This course builds on the principles learned in Digital Painting. Students will learn the art of digital matte painting using Adobe Photoshop and The Foundry's Nuke. Emphasis is placed on photo manipulation, lighting, atmosphere, compositions, color matching, layer setups, 3D render paintovers, 2.5D projections, set extensions, and plate cleanup. Classes include a mixture of demonstrations, group discussions of production workflows, and in-class exercises, as well as portfolio critiques and industry tips. Students will explore various styles of matte painting and work towards a polished final project.

Digital Painting

Learn the basics of painting in Adobe Photoshop

In this course students learn the basics of painting in Adobe Photoshop. Fundamental concepts such as perspective, value, color, and composition are reinforced as students apply painting tools to the techniques of digital art production. Through lectures, demonstrations, and in-class exercises, students apply fundamental concepts such as layers, blending photo information with digital painting, and brush creation to their assignments and a final project.

Digital Photography

Learn the technical basics of digital photography

This course covers the basics of digital photography and its role in the visual effects and game industries. The fundamentals of color theory, lighting, and composition are central to students' learning. The class will expand to advanced production topics including color correction, color grading, accurately photographing textures for use in 3D, spherical panoramic photography, high-dynamic range imaging, working with camera raw files, and post-production workflow. Hands-on exercises, in-class lectures, and demonstrations will help students become familiar with the photographic processes necessary for success in the film and games industries. Students are expected to cover the cost of supplies, estimated at \$45.

Digital Sculpting

Learn the technical basics of sculpting with Pixologic ZBrush

This course introduces Pixologic's ZBrush and its role in digital sculpting, 3D art, 3D printing, and illustration. Students learn the interface, tools, and workflows used to proficiently create digital models and sculptures using ZBrush and Maya. Artistic processes including creating models from the ground up, high frequency detail creation, and texturing techniques are taught using the robust ZBrush feature set. Tools such as the powerful sculpting brushes, ZSpheres, Dynamesh, and more are used to show students how to create high quality 3D sculptures with confidence. Production workflows such as importing, exporting, and map generation are also covered to ensure students utilize the work created in ZBrush in other applications.

Digital Sets

Learn advanced techniques for creating natural and architectural environments

This course provides an examination of the techniques and strategies used to create rich and believable digital sets, environments, and realistic assets. Topics covered include photography, photogrammetry using Agisoft Photoscan, manual and procedural modeling tools like SpeedTree and World Machine, texturing, and environmental lighting. Over the course of the term, students will learn the process of building fantastic believable worlds in 3D using a wide range of techniques and tools for use in multiple rendering engines. Students are expected to cover the cost of supplies, estimated at \$45.

Dynamic Effects 1

Learn the foundation of dynamics in Autodesk Maya

In this course, students learn to master advanced nParticle and Maya's native particle systems. An introduction to Maya fluids and beginning shot production will be covered, along with techniques for understanding and exploring particle emission, emitters, and how to creatively control particle motion with fields and custom velocities.

Dynamic Effects 2

Learn to create fundamental dynamic effects

In this course, students learn the fundamental workflows and approaches to creating a wide range of dynamic effects in live action plates, including nParticles, Krakatoa, Maya Fluids, and instance-based dynamic solutions. Lecture, demonstration, and critique are critical elements within this course.

Dynamic Effects 3

Simulate fluids with Autodesk Maya

This course builds upon Dynamics 1 and 2, teaching students to conceive of real-world effects in a shot. Lectures and demonstrations provide insight into techniques used to craft complex effects. Students will learn advanced production destruction workflows using industry standard plug solutions for Maya.

Dynamic Effects 4

Build a dynamic effects sequence with Autodesk Maya

This course focuses on the finishing processes which prepare students for Demo Reel. Students will be guided through advanced production techniques, utilizing multiple fluid solvers and advanced cloud and particle workflows in Houdini, Maya Fluids, and Phoenix FD. The methods for setting up dynamic and non-dynamic simulations for live action and full CG production shot assets and sequences will be covered. It is recommended students take an introductory Houdini class before taking this class.

Earth Science

Study the elements of earth science

This survey course introduces students to the basic concepts of earth science and the processes which shape the physical realms of our planet, the solar system, the galaxy, and the universe. Understanding geotectonics, identifying earth materials, and applying this knowledge to an interpretation of earth history is central to this general education course. Students are expected to cover the costs of supplies, estimated to be between \$25 to \$30.

Environment Design

Design environments for film, animation, and games

This course covers the basics of designing different types of environments for animation, film, and games. Students learn perspective, composition, and research techniques to create believable detail, clear tonal reads, and modeling. The application of the expressive differences between interior and exterior environments within established values will be utilized towards a final project.

Figure Drawing

Develop skills in foundational figure drawing

In this course, students learn to draw the human figure, utilizing both traditional and non-traditional principles and techniques. Styled after a foundation art school figure drawing course, the principles of form and gesture are applied to in-class live model sketching and homework figurative studies. Communicating gesture, creating accurate anatomy and proportion, and developing a body of figurative portfolio work are inherent to this course, supported by in-class demonstrations and lectures. Students are expected to cover the cost of supplies, estimated between \$0 to \$20.

Game Creation 1

Gain an in-depth understanding of the process of game creation

This course is designed to give students an introductory understanding of working with game content in the Unreal Engine 4 toolset. Through lectures and demonstrations, students will grasp the Unreal Engine 4 import pipeline, set up an interactive asset, build a short cinematic, and create simple material networks. Classes include a mixture of weekly in-engine demonstrations, discussions of asset creation methods, and in-class critique of homework and projects. Students will learn basic game production pipeline through homework assignments and work towards a final class project for review.

Game Creation 2

Create immersive real-time worlds in games

This course builds on the topics and techniques presented in Game Creation 1. With an emphasis on creating realtime worlds, students will dig into workflows and techniques for creating terrains, foliage, and destructible meshes, utilizing Unreal Engine 4's specific tools for creating natural environments. Classes include a mixture of weekly in-engine demonstrations, discussions of world building methods, and in-class critique of homework and projects. Students will learn these environment tools through homework assignments which build towards a final class project.

Hard Surface Modeling 1

Learn the fundamentals of creating 3D models

In this course, students learn the fundamentals of creating 3D models with polygon geometry. Lectures delve into the various production techniques of asset creation through the exploration of polygonal modeling and the preparation of constructed models for texturing. The basic toolset in Autodesk Maya will be covered, and students will benefit from lectures about the technical and aesthetic issues that professional modelers face while modeling environments and man-made objects. Students will create weekly models through the term and the class will culminate in a final project consisting of an intermediate to complex model like a vehicle, robot, or prop.

Hard Surface Modeling 2

Learn advanced hard surface modeling techniques

This course teaches students to model complex assets such as vehicles, robots, and weapons. Lectures focus on the use of polygonal modeling tools in the development of form and detail, as well as production-specific issues pertaining to poly count, surface quality, and topology. Over the term, students become familiar with the techniques used to create high-quality hard surface models efficiently. Classes cover different modeling techniques from box modeling to sculpting and resurfacing. Students will complete two production quality models over the course of the term.

HD Digital Filmmaking for VFX

Learn the essentials of digital camerawork for CG projects

This course builds on the principles learned in Animation and Visual Effects, and through weekly lectures and out of class assignments, expands student learning in the essentials for integrating digital camera work into CG projects. Lectures include the technical aspects of the DV format, equipment choices and usage, terminology, and staging and lighting techniques. Students learn the essentials of DV camera operation and the technical side of video formats. The output methodology for different applications is discussed so that students can take their DV footage and integrate it into their final CG projects. Compositing integration includes chroma keying and color matching in Nuke, post color grading in Premiere, and Speed Grade. Classes include a mixture of camera and software demonstrations and in-class exercises, as well as project critiques and industry tips. Students will explore various styles of shooting digital video footage through homework assignments and work towards a polished final project.

History and Principles of Animation

Survey the historical techniques of animation

This course introduces students to the history and techniques of animation. Lectures and demonstrations use the Twelve Principles of Animation as a springboard into deconstructing the visuals of both animated and live-action films. Students learn to address issues such as planning a scene, thumbnailing, understanding traditional animation techniques, and to improve their draftsmanship. Executing basic animation tests, sketchbook development, and working towards completing an animated walk cycle are critical elements to this course. Students are expected to cover the cost of supplies, estimated between \$15 to \$20.

Houdini 1

Learn the technical basics of SideFX Houdini

This course builds on the fundamental concepts of 3D by developing procedural content creation inside of SideFX's Houdini. Emphasis is placed on creating 3D scenes utilizing a procedural node based network, including animation, scattering, vegetation, terrain, and oceans, all rendered inside Houdini. Classes include a mixture of weekly demonstrations and discussions, as well as project critiques and industry tips. Students will explore various styles of procedural networks through homework assignments, working towards a polished final project created using Houdini.

Introduction to 3D with Maya

Learn the technical basics of Autodesk Maya

This course focuses on the foundation of 3D computer graphics using Autodesk Maya. Students are introduced to the Maya interface and philosophy, as well as 3D modeling, texturing, lighting, rendering, and animation. Lectures cover the applications of these tools in the film and game industries. This course will prepare students to face both artistic and technical challenges when creating accurate and compelling 3D images, helping to build a foundational understanding of both technical workflows and art and design aesthetics. Students will work on multiple projects throughout the course for critique that will help establish a solid 3D skill set in both realistic and conceptual 3D computer generated art.

Introduction to Compositing

Use layering to create composited imagery in After Effects

This class introduces students to the basics of compositing. Through weekly lectures, in-class exercises, and homework assignments, students will learn the fundamental concepts of compositing inside of Adobe's After Effects. Emphasis is placed on the user interface, compositions, keyframing, layers, footage, color keying, 3D layers, and a variety of tools utilized in compositing workflows. Classes include After Effects demonstrations and discussions of compositing methods, as well as project critiques and industry tips. Students will explore various styles of compositing through their assignments, working towards a final project for presentation.

Language Arts 1

Study the art and craft of writing

In this course, students will conduct in-depth analyses of historically significant written works and apply rhetoric and argument in order to develop a well-defined cultural perspective. Literary themes will be discussed and explored in coherently-written texts and essays. A focused progression through the stages of the writing process is critical to the completion of this course.

Language Arts 2

Develop advanced skills in the art and craft of writing

The focus of this course will be on furthering students' studies of the art and craft of advanced writing, using skills gained in Language Arts 1. Rhetoric, discourse, creativity, analysis, and relevant methodologies will be utilized in lectures and complex exercises.

Lighting and Rendering 1

Learn the basics of lighting in Autodesk Maya and V-Ray

This course builds on the principles learned in Introduction to 3D in Maya. Students will learn to create artistic and cinematic lighting setups with Autodesk's Maya and Chaos Group's VRay. Instruction covers creating renders that enhance visual storytelling through lighting, techniques to light characters, products, exterior and interior environments, and lighting for live action footage. Classes include a mixture of weekly lighting demonstrations, discussions of cinematic approaches using industry standard methods, project critiques, and industry tips. Students will explore various styles of lighting through homework assignments and work towards completing a polished final project for review.

Lighting and Rendering 2

Study the technical aspects of lighting in Autodesk Maya and V-Ray

This course builds on the principles learned in Lighting and Rendering 1. Through weekly lectures and demonstrations, students gain experience in the technical side of lighting and rendering inside of Autodesk's Maya, Chaos Group's VRay, and The Foundry's Nuke. Emphasis is placed on image sampling, quality versus speed in the render, GI sampling, frame sequences, handling artifacts, baking GI, multi pass rendering and assembly in Nuke, motion blur, depth of field, atmospheric fog, caustics, and 3D integration into live action in Nuke. Classes will cover technical rendering demonstrations, discussions of production problems, project critiques, and industry tips. Students will explore various methods of troubleshooting 3D renders through homework assignments and work towards a polished final project.

Lighting and Rendering 3

Study alternative solutions for industry standard rendering softwares and techniques

This course builds on the principles learned in Lighting and Rendering 2. Students will learn to create renders utilizing Solid Angle's Arnold and Redshift inside of Autodesk's Maya. Emphasis is placed on experiencing a shotbased production environment, learning the fundamentals of unbiased rendering with Arnold, and biased gpu rendering with Redshift. An in-depth look of both renderers' materials, lights, object properties, and render settings will be taught. Classes include a mixture of weekly technical demonstrations, discussions of production workflows, project critiques, and industry tips. Students will explore various styles of shot production workflows, working towards a polished final shot sequence.

Lighting and Rendering 4

Create high quality images using production rendering techniques

This course builds on the principles learned in Lighting and Rendering 3, and through weekly lectures, in-class practice, and homework assignments, expands student learning in developing production rendering techniques in Autodesk's Maya, Chaos Group's VRay, and The Foundry's Nuke. Emphasis is placed on production workflows and integrating more control between Maya and Nuke, blurring the lines between what control is possible between the 3D and 2D software. Methods are taught through VRay Render Elements, including compositing raw elements the right way, handling antialiasing of renders, deep compositing, and 2.5D relighting with Normals and World position. Classes include a mixture of lighting and rendering demonstrations and in -class exercises, as well as project critiques and industry tips. Students will explore various styles of production workflows through complex assignments and work towards a polished final project.

Look Development

Delve into the technical challenges of creating surfaces for look development

This course builds on the principles learned in multiple intermediate courses, such as Lighting and Rendering and Texturing and Shading. Students will learn the tools and techniques necessary for look development with Autodesk's Maya, Chaos Group's VRay, and The Foundry's Nuke and Mari. In-class lectures cover developing the look of and polishing 3D renders in different areas of the production environment, including characters and environments. Topics include subsurface scattering for characters, translucent materials, human eyes, vegetation, and terrains, as well as the utilization of multi mattes to polish 3D renders. Student learning will benefit from demonstrations of creating atmosphere and mixing live action elements with cg effects. Homework assignments and a polished final project for critique and review round out this advanced course.

Matchmoving and Integration

Use camera tracking to integrate 3D scenes into a live action plate

This course will introduce the base concepts of tracking a live action plate and seamlessly integrating 3D geometry into it. Students will learn how to use The Pixel Farm's PFTrack to match a camera from footage. Color correction and finishing techniques are taught inside of The Foundry's Nuke.

Maya Modules

Learn advanced specialized toolsets in Autodesk Maya

This course is an advanced 3D animation and design course where students will explore lesser known and specialized systems inside and out of Autodesk Maya. Topics covered in lectures and demonstrations will include dynamics, fur, hair, cloth, arbitrary primitive generation, and procedural asset creation. Tools like XGen, nCloth, and Paint Effects will be used to showcase the depth and power available to artists in Maya. Students will also learn to build clothing in Marvelous Designer for use in a Maya animation and rendering pipeline. Weekly assignments will guide students through these complex processes of creating character FX and simulations, allowing these powerful tools to bring future projects to life.

Narrative Structure

Develop a deep understanding of narrative structure through story and character analysis

This course further explores the representations of structure as it applies to various forms of narrative using the skills gained in Language Arts 2. Lectures, discussions, and exercises dissect complex interpretations of story and character through traditional methods of analysis. Students will delve into the psychology of storytelling and clarify how mood and tone are manipulated and expressed within a visual context. Using source material, students will develop a term-long cinematic or game project which expresses the meaningful application of purpose-driven storytelling. Students will gain experience in professional presentation and time management. Students are expected to cover the cost of supplies, estimated to be between \$0 to \$10.

Oral Communication

Explore communication techniques and planning skills in collaborative work environments

This course in public and interpersonal speaking includes organization of speech materials, participation in panel discussions and critiques, and presentations of informal talks and formal speeches. Communication and planning skills required for interpersonal, academic, and career success are emphasized, as are methods for goal-setting and learning professional employment strategies.

Overview of Digital Production

Survey the processes of production in film, games, and visual effects

This course provides students with a thorough understanding of the processes involved in the production of content for film, games, and visual effects. Students learn the different types of facilities that produce VFX media and how their pipelines may differ. This course also explores the tasks that artists complete on a daily basis, including visual story development, designing, use of software, modeling and texturing, lighting, animation, and visual effects. Students are expected to cover the costs of field trip parking and travel, estimated to be between \$20 to \$30.

Perspective

Learn the traditional principles of perspective

This course teaches students how to approach a variety of subjects using traditional methods of perspective. Students will develop an understanding of managing scale, measurement, shadows, composition, and the overall mechanics of one-, two-, and three-point perspective, all supported by in-class lectures and demonstrations. Complex at-home assignments utilize these methods to illustrate relevant subjects such as spacecraft and vehicles, building towards the presentation of final projects. Students are expected to cover the cost of supplies, estimated between \$50 to \$80.

Photoshop for Digital Production

Build an understanding of the principles of Adobe Photoshop

This course provides students with a working foundation of the interface and tools of Adobe Photoshop. Through lectures, demonstrations, and exercises, students learn tools for photographic retouching, color treatment, use of layers and selections, photographic manipulation, and compositing. Students will gain the ability to create and utilize advanced photo manipulation and image editing techniques to create 2D images and assist 3D design. Over the 10 weeks students will become practiced in the flexibility and power of Adobe Photoshop as it relates to a digital production workflow.

Portfolio Preparation

Intensive workshop experience in portfolio preparation

This course addresses multiple aspects of creating a professional portfolio. Students will create a simple and appealing branding package for web and print materials. Methods taught for crafting demo reels and personal websites will ensure students are prepared for employment opportunities upon graduation.

Previsualization and Animatics

Visualize complex 3D scenes for production

This course examines the digital previsualization processes of modern filmmaking which supplement traditional storyboarding techniques. Through demonstrations and exercises, students learn to utilize animation and modeling in order to stage and art direct complex sequences before they are shot on film. Lectures focus on lighting, camera placement, movement, editing, and storytelling.

Props and Weapons for Games

Learn the fundamentals of prop and weapon design for games

This course presents the fundamentals for creating artistically creative prop models optimized for real-time engines. Priority is placed on gaining an in-depth understanding of normal maps and how important they are throughout the entire process, and a strong understanding of taking an asset from start to finish for game development. Students will learn presentation skills for delivering assets, to prepare for critiques through homework assignments, and work towards a final class project.

Quantitative Principles 1

Learn the fundamental applications of mathematics

This course covers basic mathematics and its role in the technological sciences. Utilizing common traditional mathematical methods in exercises and projects, students explore innovative solutions to relevant technical problems. The impact computer science has had on art and technology will be discussed.

Quantitative Principles 2

Study advanced mathematical principles

Applying knowledge gained in Quantitative Principles 1, this course is structured to further guide students through the process of developing complex mathematically-based systems in order to enhance productivity and efficiency. Problem-solving, design strategies, scripting customizations, and the on-going applications of advanced concepts will support a deeper understanding of the implications of computing.

Social Science

Explore the sociological relationships between creativity and culture

In this course, students will utilize scientific principles as well as sociological exploration to gain an understanding of the interrelationships between science, creativity, and the contextualization of cultural and social factors as vital to understanding systems and their impact on society.

Storyboarding

Learn the basics of film grammar for storyboarding

This course introduces the fundamental cinematic and storytelling grammar necessary for a career in film, games, or visual effects. Students will learn the technical basics of storyboarding to gain a more complex understanding of the visual language of film. Through lectures, in-class film analysis, discussion, and exercises in and out of class, students learn to translate what drives story and character into previsualization and storyboarding. The intersection of literary and visual storytelling, the technical aspects of camera, and how to pitch ideas in the industry are critical to the development of midterm and final projects for presentation.

Texture and Shading 1

Design and map materials for modeling with Autodesk Maya's Hypershade

This course builds on the techniques learned in Introduction to 3D with Maya. Through weekly lectures and out of class assignments, students develop textures and shaders using Autodesk Maya, Chaos Group's VRay, and Adobe Photoshop. Lectures and demonstrations cover how to use Maya's Hypershade, image-based file textures in 2D and 3D, texture painting in Adobe Photoshop, shading techniques with VRay Materials, and basic render setups to demonstrate how lighting affects materials. Students will be expected to create their own final projects using custom textures and shaders built from the techniques in class.

Texture and Shading 2

Create realistic texture maps on 3D surfaces

This course builds on the principles learned in Texturing and Shading 1. Through weekly lectures and out of class assignments, students learn to develop textures and shaders with Autodesk Maya, Allegorithmic's Substance Painter and Bitmap 2 Material, and Chaos Group's VRay. Emphasis is placed on telling the story behind the materials to help drive the process of how textures illustrate various looks, including weathered and aged effects. The process will include a variety of 3D painting and procedural techniques including 3D painting, projection painting, and utilization of masks and blend materials. Classes include a mixture of weekly painting demonstrations and discussions of aging methods as well as assignment critiques and industry tips.

Texture and Shading 3

Learn the art of texturing and shading hard surface assets

This course builds on the techniques learned in Texturing and Shading 2, and through weekly lectures and homework assignments, expands student learning in how to develop high resolution textures using The Foundry's Mari. Emphasis is placed on introducing the Mari interface, general workflow, udims, layers, projection painting, and integrating Mari and Nuke. Students will learn how to render the textures inside of Autodesk's Maya with Chaos Group's VRay. Classes include a mixture of painting demonstrations and discussions of texturing workflows, as well as project critiques and industry tips. Students will create various weekly projects, working towards a polished final project.
Texture and Shading for Games

Create physically-based materials for real-time applications

This course immerses students in the process of creating real-time physically based materials widely used in industry standard game engines. Lectures, in-class demonstrations, and exercises cover material network creation methodologies and workflows in Unreal Engine 4. Topics covered include utilizing masks, layers and baked maps, blending environment materials, and working with decals. Students will learn efficient material creation techniques through homework assignments and the creation of a critiqued final class project.

Visual Communication 1

Communicate complex design ideas via visual media

In this course, students learn to recognize and effectively utilize complex and abstract forms to communicate ideas. Students will develop skills in expressing value, shadows, shading, perspective, and composition in both traditional and digital platforms. Lectures and demonstrations support in-depth homework assignments, creative projects, and a final presentation. This course is a cornerstone of learning foundational methods of communicating visual constructs. Students are expected to cover the cost of supplies, estimated between \$75 and \$100.

Visual Effects for Games 1

Design, create, and optimize visual effects for games

In this course, students learn to design, create, and optimize visual effects for video games. Students create special post-process effects used to enhance the overall look of a video game. Lectures, demonstrations, and exercises focus on the use of the Unreal Development Kit, Photoshop, and Maya.

Artwork by Stephen Cunnane

APPENDIX 3 DIGITAL PRODUCTION FOR ENTERTAINMENT (DP) & ENTERTAINMENT DESIGN AND DIGITAL PRODUCTION (EDDP) COURSE DESCRIPTIONS

Acting for Animators

Simulate realistic movement and emotion in animation

This course explores the importance of acting and gesture to create emotion and characterization in 3D animation. Students will study acting techniques that are relevant to animation, learn posing and timing methods, and gain the ability to approach animation using acting as a reference tool. Through the study of film, in-class presentations, and acting exercises, students learn to convey nuanced yet purposeful emotions through facial expressions, gestures, and movement. Students will develop their own ideas into an animated project based on their research throughout the term. Students are expected to cover the cost of supplies, estimated to be between \$0 and \$15.

Advanced Character Design

Design complex characters through reference and research

This course takes character design further by teaching students to create concepts under the constraints of a real-world professional experience in the film or games industries. Fundamentals of form and archetype are coupled with research, demonstrations, and homework assignments to further students' comprehension of all aspects of character design, from the broad strokes of storytelling to refining visual details of costume.

Advanced Compositing

Evaluate the best approach to a shot using The Found-ry's NUKE

This course builds on the principles learned in Art of Compositing. Through lectures, demonstrations, and out of class assignments, students learn to develop advanced compositing techniques inside of The Foundry's Nuke. Compositing techniques such as tracking removal, core matting, keying challenges, exr multi pass compositing, 2D depth of field and motion blur, 3D projections, matte painting integration, and 3D relighting will be covered. Students will explore various styles of compositing, learning to accelerate their workflow in a professional manner, through complex projects for critique.

Advanced Digital Painting

Create high-end concept paintings for film and games

This course builds on the principles learned in Digital Painting, and through weekly lectures, in-class practice, and out of class assignments, expands student learning in developing high-end concept art using various film and game, industry-aligned software. Emphasis is placed on storytelling, painting technique, and the ability to complete finished pieces. Classes include a mixture of weekly painting demonstrations, discussions of cinematic concept methods, and in-class exercises, as well as portfolio critiques and industry tips. Students will explore various styles of painting through homework assignments and work toward polished conceptual projects.

Advanced Digital Sculpting

Use advanced techniques in Pixologic's ZBrush to create 3D printable models

This course focuses on using advanced hard surface sculpting techniques in Pixologic's ZBrush to create models for film, games, and 3D printing. Concepts focusing on form, design, and articulation will be combined with lectures on workflow techniques and troubleshooting. The robust tool set of ZBrush - including but not limited to ZModeler, Dynamesh, ZRemesher, Panel Loops, Sculptris Pro and 3D Widget Deformers like Project Primitive - will be shown to empower students to create high-quality hard surface models quickly. Students will apply distinctive features and options within the software towards a finalized, detailed, ready-to-print or rendered hard surface model.

Anatomy for Artists

Learn the elements of human anatomy through figure drawing

In this course, students learn the foundations of anatomy through illustrating the structure of the human body. Understanding the functionalities of the musculoskeletal system, proportion, dynamic form, and how light and shadow affect the body are critical elements of this course. Classes include lectures, drawing demonstrations, and drawing exercises with live models. Academy-style master copies and skeletal studies based on in-class work comprise the homework assignments. Students are expected to cover the cost of supplies, estimated between \$50 to \$80.

Anatomy in ZBrush

Study constructive anatomy using Pixologic's ZBrush

This course tackles an in-depth anatomical study of the human musculoskeletal system using Pixologic's ZBrush. Lectures and demonstrations address focusing on specific structural landmarks, how multiple factors such as age or body type affect the proportion and structure of human physiology, and software techniques.

Anatomy of Games

Explore the principles of successful game creation

This course explores the history and principles behind some of the most successful games ever produced. By delving into early games like dice and board games and then taking the leap into electronic and video games, students learn the roles that game play, art, and design each play in the creation of a game. Field trips, lectures, and group projects round out the course experience. Students are expected to cover the costs of field trip parking and travel, estimated to be between \$0 to \$10.

Animal Drawing

Learn animal anatomy, biomechanics, and dynamic form

In this course, students learn the foundations of animal anatomy. Students will be exposed to live animals in a variety of settings, learning the basic musculoskeletal anatomy of quadrupeds, illustration techniques, and dynamic form and gesture. Lectures cover biomechanics, methodologies of gesture, the biology of creature design, and the specifics of equine gaiting, behavior, and communication. Students will create a creature for a final project and present it for critique. Students are expected to cover the costs of admissions, parking, and supplies, estimated to be between \$50 to \$80.

Animation and Visual Effects 1

Discover how to achieve high-quality digital effects

This course exposes students to the methods used to achieve high-quality visual effects animation. Tools are learned in context with how they are used in a professional production environment, and problem-solving is critical to coursework. This course focuses on Maya's core tool set for producing motion keyframing, procedural modeling and animation, dynamics, and sound synchronization. Weekly exercises will help cement this important tool set into students' workflows in preparation for working within many different production pipelines.

Animation and Visual Effects 2

Learn to use advanced tools to create production quality animation and digital effects

In this course, students combine skills gained in Animation and Visual Effects 1 with newly introduced concepts to create complex animation and visual effects exercises. Assignments in animation, lighting, rendering, simulation, camerawork, and the creation of animatics will broaden students' comprehension of the art of 3D animation. This course covers concepts related to the visual, spatial, sound, motion, interactive, and temporal elements and features of digital technology for their use in the creation and application of digital media -based work. Digital cinematography will be addressed in lectures to help students achieve compelling compositions and camera animations. Students will gain exposure to the MASH motion graphics tool as well as multiple dynamic simulation tools including particles, fluids, and cloth FXs over this ten-week course.

Animation for Games

Learn Advanced body mechanics for game design

This course covers the processes and practices of creating character animation for the games industry. Lectures provide a solid understanding of the role of animation in game development, as well as a better understanding of movement, mechanics, and storytelling through the interactive medium. Students will learn the technical and artistic processes of game animation while adhering to the needs of game engines.

Art History 1

Survey of the cultural impacts of Western art, architecture, and design

This course is a survey of Western architecture, art, and design, and the cultural implications of critical works of art through history. Diverse artistic traditions and methodologies from prehistory to modernism will be covered as students expand their research techniques and develop analytical skills. An emphasis is placed on integrating the development of art forms with the geographic, sociopolitical, philosophical, and religious characteristics of these cultures. Individual and group projects round out this course of study. Students are expected to cover the cost of supplies, estimated between \$10 to \$15.

Art History 2

Explore connections between the history of art, design, and architecture

This course is an advanced exploration of the history of art, using knowledge gained in Art History 1. Students will expand their research abilities, analyze and evaluate critical works of art, and relate their discoveries to the impact of the visualization of technology. Through an intensive inclass study of cultures and artistic movements the world over, combined with lecture, discourse, and relevant athome assignments, students obtain a greater understanding of art's varying and complex relationship to our own desire to create.

Art of Compositing

Develop essential introductory techniques to compositing using The Foundry's Nuke

This course builds on the principles learned in Introduction to Compositing. Through weekly lectures, in-class practice, and out of class assignments, students learn compositing techniques using The Foundry's Nuke. Emphasis is placed on the user interface, node-based workflows, color correction, rotoscoping, color management, painting, tracking, color keying, matting, and 3D workflows. Classes include compositing demonstrations, discussions of node-based methods, project critiques, and industry tips. Students will explore various styles of compositing utilizing Nuke, working towards a final project for presentation.

Business of Production

Explore communication techniques and planning skills in collaborative work environments

This course explores the techniques required to establish a cooperative and creative atmosphere in production. Topics covered include dealing effectively with directors and team members, how to create work on schedule and within budget, and behind-the-scene looks at the gaming industry, feature animation, and visual effects production. Students benefit from class lectures, industry guest speakers, and learning collaborative methods of digital production. Assignments embracing real-world identity branding and business networking are critical to this course.

Career Realities

Navigate a career in digital production

This course explores the realities of a career in the digital production industry, including working in visual effects, film, animation, and game development. Students will focus on the importance of career professionalism through designing a brand identity. Lectures and exercises cover navigating industry jobs, goal-setting, workplace behavior, and self-marketing. Emphasis is placed on developing presentation skills and strategies suitable for gaining employment.

Character Animation 1

Learn the fundamentals of animation with Autodesk Maya

This course introduces students to 3D character animation using Autodesk Maya, using the application of the twelve principles of animation. Production workflows and techniques are learned through lecture, demonstration, and practicing animation fundamentals: keyframing, tangents, graph editor, dope sheets, and operating a character rig. Students focus on building a solid foundation of timing, focusing on strong body and weight mechanics and good posing, and developing animation skills through exercises and critique. Students are expected to cover the cost of supplies, estimated to be between \$70 to \$75.

Character Animation 2

Translate body mechanics into 3D animation

This course covers the processes and techniques used to create believable and appealing bipedal body mechanics in animation. The exploration of topics such as walking, running, jumping, throwing, and heavy lifting will be utilized to create physically accurate motion for bipedal characters. Through in-class lectures and demos, and at-home exercises, students will develop a better understanding of the subtleties of good animation, working towards producing demo reel-quality scenes.

Character Animation 3

Apply emotion and performance to character animation

This course is an advanced exploration of the acting and performance aspects of character animation. Building upon the mechanical and technical concepts covered in the previous two animation courses, students will be introduced to methods for adding appeal, purpose, and emotion to their characters. Through in-class lectures and demos and at-home exercises, students will develop a better understanding of the subtleties of good animation, working towards producing demo reel-quality scenes.

Character Animation 4

Develop complex facial animation techniques

This course provides students with an in-depth look at the process of creating strong, appealing facial animations and lip-sync techniques. Students learn to create emotionally convincing performances through expression and dialogue. Through in-class lectures, demonstrations, and athome exercises, students develop a better understanding of the subtleties of good animation.

Character Creation for Games

Optimize artistic approaches to deformable character creation

This course explores the fundamentals of creating animation-ready and deformable 3D characters for interactive products. Subjects covered will include maximizing detail in the allowed triangle count and texture size, visual hierarchical detail, color theory, faked volume using light, and predictive creation. Various techniques will be demonstrated on how best to deliver creative character models optimized for game engines.

Character Design

Learn the fundamental aspects of character design

This course teaches the process of character design in the entertainment industry. Students create characters from start to finish, going through the pre-production stages of research, concept, and the craft of editing before a final presentation of a well-developed character. Thumbnailing, silhouette design, figure invention and posing, prop and costume design, character archetypes, storytelling, and illustration techniques will be discussed. At-home assignments developing characters with industry-standard methods round out this course. Students are expected to cover the cost of supplies, estimated to be between \$0 to \$15.

Character Development

Explore advanced character development and design

This course advances students' skills in character design through the study of storytelling, research, and development. Students apply design methodologies learned in Character Design and Visual Structure to characters, costumes, props, and world-building. Inclass lectures and in-depth analyses of film and theatre expand student understanding of how characters express meaning in story. The development, design, and refinement of a character over the term is the goal of this course.

Character Modeling and Sculpting

Use classical techniques to create bipedal production models

This course teaches students to build balanced bipedal characters, merging the traditional art of sculpting with digital modeling techniques. Autodesk Maya, in conjunction with Pixologic's ZBrush, is used to create appealing and functional characters in 3D. Students will focus on the technical processes needed to create detailed production models. Lectures and demonstrations cover the use of anatomy as it pertains to modeling bipeds, clothing, and accessories, as well as the technical needs for creating high quality deformable characters for animation. Over the term students will complete a fully modeled and sculpted character with animationready topology for critique.

Character Rigging For Production

Explore the complex challenges in rigging for production

This course builds on the principles learned in Character Rigging Fundamentals, and through weekly lectures, inclass practice, and out of class assignments, expands student learning in creating deformation on a biped character rig in Autodesk Maya. Emphasis is placed on deformation techniques, including skin clusters, painting skin weights, corrective blendshapes, facial rigs using blendshapes, cloth setups, the basics of muscles, and quadruped rigs. Classes include rigging demonstrations, discussions of production workflows, and project critiques. Students will explore various styles of rigging through homework assignments and work towards a final project that is a character rig.

Character Rigging Fundamentals

Learn the foundations of character rigging in Autodesk Maya

This course builds on the principles learned in Introduction to 3D with Maya, and through lectures, in-class practice, and out of class assignments, expands student learning in developing character animation rigs inside of Autodesk's Maya. Emphasis is placed on understanding how to create joints, attributes, constraints, basic skinning, inverse and forward kinematics controls, and ik spline, while building a basic biped rig. Classes include a mixture of rigging demonstrations and discussions of the role of a rigger in production, as well as setup critiques and industry tips. Students will explore various styles of rigging through weekly assignments and work towards creating a biped rig in Maya.

Character Sculpture 1

Sculpt a character using traditional methods

This course teaches students to design characters in 3D. Understanding the methods of traditional sculpting is an integral part of learning the foundations of 3D design. Beginning with character design fundamentals, students learn armature construction, dynamic and neutral posing, and then concentrate heavily on primary and secondary forms, texturing and detailing their pieces. Lectures and demonstrations support and inform the overall process of completing a sculpture to a polished, professional finish. Students are expected to cover the cost of supplies, estimated between \$175 to \$210.

Character Sculpture 2

Sculpt form and anatomy using traditional methods

This course builds on techniques learned in Character Sculpture 1, focusing heavily on the figurative fundamentals essential to successfully creating realistic characters. Students gain further skills in anatomical rendering in 3D through the execution of academy-style scale models of the head and torso. Each class of the course provides theoretical lectures and in-depth practical demonstrations by the instructor. The classroom is workshop-oriented and students follow along with the instructor through the sculpting process to expand their sculpting capabilities. Students are expected to cover the cost of supplies, estimated between \$100 to \$150.

Character Sculpture 3

Sculpt a large-scale character bust using traditional methods

In this course, students create a life-sized character or creature bust. The processes of correctly researching ideas, developing a character's backstory, character ideation, roughing out a quarter-scale maquette, and finally sculpting a life-size version will be taught. Students also share and critique each other's concepts in an open class forum for the betterment of their projects. This is a traditional portfolio building class. Students are expected to cover the cost of supplies, estimated between \$100 to \$150.

Cinematography for Visual Effects

Explore traditional and digital effects through the history of cinematography

This course examines the relationships between traditional cinematography, visual effects, and CG animation. A range of technical concepts and their practical applications are covered, including color temperature, green/blue screens, depth of field, match moving, motion control, and digital storyboarding. Students will also learn about traditional filmmaking elements such as matte painting, telecine, miniatures and models, rough and final layout, concept and key art, and lighting and compositing concepts.

Color Theory and Light

Explore the fundamentals of color theory

This course explores the practical 2D applications of the fundamentals of light and color. Lectures and demonstrations cover topics such as bounced light, camera effects, value patterns, shadows, and atmospherics. Value scale and color wheel exercises, and at-home assignments in traditional media reinforce learned successful applications of color harmonies and atmospheric principles. Gaining experience in the foundation of color provides students with the ability to expand on existing visual techniques. Students are expected to cover the cost of supplies, estimated between \$80 to \$120.

Costumed Figure Drawing

Apply foundational figure drawing techniques to costumed characters

This course explores drawing fully-realized characters in costume. Students will learn to analyze figures with a special emphasis on understanding the anatomical form beneath the costume. The course provides a strong foundation in figure construction, utilizing light and shadow, and the mechanics of drapery. Exercises are designed to explore storytelling, composition, caricature, and characterization, with at-home assignments revolving around master copies and costume research from various cultures. Students are expected to cover the cost of supplies, estimated to be between \$30 to \$35.

Creature Animation 1

Adapt traditional mechanics to animal animation

This course expands on the skills learned in Character Animation 1-4. Students develop a better understanding of animal anatomy and behavior as the foundation of creature animation. Through detailed analyses of reference footage, aided by in-class demonstrations and lectures, students will produce professional-quality animation cycles. This course also introduces technical methods to students in order to optimize work flow in professional production environments. Students are expected to cover the cost of supplies, estimated to be between \$15 to \$30.

Creature Animation 2

Adapt complex mechanics to creature animation

In this course students focus on creating quality animations of fantasy creatures. A technical understanding of anatomy and locomotion contribute to developing professional performances in creatures. Students learn to analyze the motivations, limitations, and characterized behaviors of a fantastical creature. Emphasis is placed on conceiving and animating a final scene featuring two contrasting characters interacting with one another. Students are expected to cover the cost of supplies, estimated to be between \$0 to \$15.

Creature Design

Learn the creation of creatures through traditional and digital methods

In this course, students learn the processes used to develop fantasy creatures. Students will research and develop creature designs from idealization to completion. Anatomy, form, storytelling, and character development aid in creating believable and appealing designs. In-class demonstrations and lectures on the applications of biology to design are used to establish an understanding of how to illustrate complex creatures. Discussions of industry experts fosters inspiration for students' own methodologies. Students are expected to cover the cost of supplies, estimated to be between \$0 to \$20.

Creature Modeling and Sculpting

Learn to create believable 3D creatures

In this course, students learn to create complex and believable 3D creatures in Pixologic's ZBrush. Classes will focus on designing, researching, and creating appealing forms as they relate to inventing creatures for the entertainment industry. Real-world demonstrations, lectures, and critiques center on resolving pipeline and design issues that may occur during the creation process. Students will design, sculpt, and render high quality 3D creatures using Pixologic's ZBrush throughout the term, culminating in a posed, high-quality, productionready creature concept model created from their imagination.

Demo Reel: Animation

Create a professional-quality demo reel

This course is a portfolio development class structured so students can create polished, professional-quality deliverables. Students work with the instructor to develop multiple portfolio pieces throughout the term. Feedback and critique promote professional growth and provide a real understanding of what is needed to create projects for production in the entertainment industry.

Demo Reel: Generalist

Create a professional-quality demo reel

This course is a portfolio development class structured so students can create polished, professional-quality deliverables. Students work with the instructor to develop multiple portfolio pieces throughout the term. Feedback and critique promote professional growth and provide a real understanding of what is needed to create projects for production in the entertainment industry.

Demo Reel: Visual Effects Animation

Create a professional-quality demo reel

This course is a portfolio development class structured so students can create polished, professional-quality deliverables. Students work with the instructor to develop multiple portfolio pieces throughout the term. Feedback and critique promote professional growth and provide a real understanding of what is needed to create projects for production in the entertainment industry.

Demo Reel: Modeling and Texturing

Create a professional-quality demo reel

This course is a portfolio development class structured so students can create polished, professional-quality deliverables. Students work with the instructor to develop multiple portfolio pieces throughout the term. Feedback and critique promote professional growth and provide a real understanding of what is needed to create projects for production in the entertainment industry.

Demo Reel: Games

Create a professional-quality demo reel

This course is a portfolio development class structured so students can create polished, professional-quality deliverables. Students work with the instructor to develop multiple portfolio pieces throughout the term. Feedback and critique promote professional growth and provide a real understanding of what is needed to create projects for production in the entertainment industry.

Design History

Survey form, function, influence, and style in modern design

This course analyzes the form, function, and styling found in architecture, products, and vehicles of the modern age. Students learn about the origins of design and its purpose throughout history and examine how designs influence everyday life. The course begins with the Arts and Crafts movement and explores how the aesthetics and functionality of design directly affect mainstream products, architecture, and vehicles. Students also learn how traditional design provides a thematic foundation to film and games through lectures, in -class discussions, relevant assignments, and the development of a final project for presentation.

Digital Matte Painting

Create complex matte paintings in 2D and 3D

This course builds on the principles learned in Digital Painting. Students will learn the art of digital matte painting using Adobe Photoshop and The Foundry's Nuke. Emphasis is placed on photo manipulation, lighting, atmosphere, compositions, color matching, layer setups, 3D render paint overs, 2.5D projections, set extensions, and plate cleanup. Classes include a mixture of demonstrations, group discussions of production workflows, and in-class exercises, as well as portfolio critiques and industry tips. Students will explore various styles of matte painting and work towards a polished final project.

Digital Painting

Learn the basics of painting in Adobe Photoshop

In this course students learn the basics of painting in Adobe Photoshop. Fundamental concepts such as perspective, value, color, and composition are reinforced as students apply painting tools to the techniques of digital art production. Through lectures, demonstrations, and inclass exercises, students apply fundamental concepts such as layers, blending photo information with digital painting, and brush creation to their assignments and a final project.

Digital Photography

Learn the technical basics of digital photography

This course covers the basics of digital photography and its role in the visual effects and game industries. The fundamentals of color theory, lighting, and composition are central to students' learning. The class will expand to advanced production topics including color correction, color grading, accurately photographing textures for use in 3D, spherical panoramic photography, high-dynamic range imaging, working with camera raw files, and postproduction workflow. Hands-on exercises, in-class lectures, and demonstrations will help students become familiar with the photographic processes necessary for success in the film and games industries. Students are expected to cover the cost of supplies, estimated at \$45.

Digital Sculpting

Learn the technical basics of sculpting with Pixologic's ZBrush

This course introduces Pixologic's ZBrush and its role in digital sculpting, 3D art, 3D printing, and illustration. Students learn the interface, tools, and workflows used to proficiently create digital models and sculptures using ZBrush and Maya. Artistic processes including creating models from the ground up, high frequency detail creation, and texturing techniques are taught using the robust ZBrush feature set. Tools such as the powerful sculpting brushes, ZSpheres, Dynamesh, and more are used to show students how to create high quality 3D sculptures with confidence. Production workflows such as importing, exporting, and map generation are also covered to ensure students utilize the work created in ZBrush in other applications.

Digital Sets

Learn advanced techniques for creating natural and architectural environments

This course provides an examination of the techniques and strategies used to create rich and believable digital sets, environments, and realistic assets. Topics covered include photography, photogrammetry using Agisoft Photoscan, manual and procedural modeling tools like SpeedTree and World Machine, texturing, and environmental lighting. Over the course of the term, students will learn the process of building fantastic believable worlds in 3D using a wide range of techniques and tools for use in multiple rendering engines. Students are expected to cover the cost of supplies, estimated at \$45.

Drawing Fundamentals 1

Communicate complex design ideas via visual media

In this course, students learn to recognize and effectively utilize complex and abstract forms to communicate ideas. Students will develop skills in expressing value, shadows, shading, perspective, and composition in both traditional and digital platforms. Lectures and demonstrations support in-depth homework assignments, creative projects, and a final presentation. This course is a cornerstone of learning foundational methods of communicating visual constructs. Students are expected to cover the cost of supplies, estimated between \$75 and \$100.

Drawing Fundamentals 2

Apply illustration techniques to industrial design

This course is a continuation of Drawing Fundamentals 1.Students focus on developing advanced sketching and illustration techniques as applied to industrial design. Students will use traditional methods of ideation based on source materials to produce polished final pieces in digital platforms. Complex homework assignments tap into the principles of design as outlined in lectures, demonstrations, and critiques. Students are expected to cover the cost of supplies, estimated between \$50 and \$75.

Drawing in 3D

Learn the traditional principles of perspective

This course teaches students how to approach a variety of subjects using traditional methods of perspective. Students will develop an understanding of managing scale, measurement, shadows, composition, and the overall mechanics of one-, two-, and three-point perspective, all supported by in-class lectures and demonstrations. Complex at-home assignments utilize these methods to illustrate relevant subjects such as spacecraft and vehicles, building towards the presentation of final projects. Students are expected to cover the cost of supplies, estimated between \$50 to \$80.

Dynamic Effects 1

Learn the foundation of dynamics in Autodesk Maya

In this course, students learn to master advanced nParticle and Maya's native particle systems. An introduction to Maya fluids and beginning shot production will be covered, along with techniques for understanding and exploring particle emission, emitters, and how to creatively control particle motion with fields and custom velocities.

Dynamic Effects 2

Learn to create fundamental dynamic effects

In this course, students learn the fundamental workflows and approaches to creating a wide range of dynamic effects in live action plates, including nParticles, Krakatoa, Maya Fluids, and instance-based dynamic solutions. Lecture, demonstration, and critique are critical elements within this course.

Dynamic Effects 3

Simulate fluids with Autodesk Maya

This course builds upon Dynamics 1 and 2, teaching students to conceive of real-world effects in a shot. Lectures and demonstrations provide insight into techniques used to craft complex effects. Students will learn advanced production destruction workflows using industry standard plug solutions for Maya.

Dynamic Effects 4

Build a dynamic effects sequence with Autodesk Maya and Houdini FX

This course focuses on the finishing processes which prepare students for Demo Reel. Students will be guided through advanced production techniques, utilizing multiple fluid solvers and advanced cloud and particle workflows in Houdini, Maya Fluids, and Phoenix FD. The methods for setting up dynamic and non-dynamic simulations for live action and full CG production shot assets and sequences will be covered. It is recommended students take an introductory Houdini class before taking this class.

Environment Creation for Games

Learn to build interactive environments for games

This course presents students with the techniques currently used in game production to create complex realtime environments. Course lecture topics cover building modular assets on a grid, sculpting tiled textures, and set dressing. Proficiencies highlighted in the class include scene composition and efficiency, modeling and sculpting, baking and transferring maps, creating textures and materials, and level assembly. Students will progressively learn skills through homework assignments which build towards developing a lit and color graded final portfolio piece for presentation and critique.

Environment Design

Design environments for film, animation, and games

This course covers the basics of designing different types of environments for animation, film, and games. Students learn perspective, composition, and research techniques to create believable detail, clear tonal reads, and modeling. The application of the expressive differences between interior and exterior environments within established values will be utilized towards a final project.

Expressions and Scripting

Study advanced scripting techniques in Autodesk Maya

This course builds on the principles learned in Introduction to 3D with Maya. Students will gain experience in basic scripting inside of Autodesk Maya using Mel and Python. Emphasis is placed on the core concepts of scripting and understanding how Maya functions under the user interface. The fundamentals of scripting will be taught, including creating shelf buttons, syntax, object types, arguments, conditional statements, loops, and design patterns. Classes include a mixture of weekly scripting demonstrations, lectures and discussions of production workflows, and in-class exercises. Students will explore various styles of scripting through homework assignments and work towards a functional final project.

Facial Rigging

Learn the nuances of facial rigging in Autodesk Maya

This course focuses on topics related to advanced facial deformations for characters. Special attention is given to realistic human faces and their range of motion. Topics include facial anatomy, expression and emotion, lip sync, and setting up intuitive controls for animation. Soft eyes, sticky-lips and tongue rigs will also be demonstrated.

Film History

Survey a history of genre cinema

This course is an exploration of the history and development of motion pictures, with an emphasis on comedies, horror, and feature animation. Students will learn to place works of cinema within cultural and stylistic contexts and defend their views through rational discourse and supportive discussion. Lectures and viewings of classic and contemporary films will be supported by at-home assignments expanding on in-class work. Midterm and final projects will give students the opportunity to present their cinematic influences.

Game Creation 1

Gain an in-depth understanding of the process of game creation

This course is designed to give students an introductory understanding of working with game content in the Unreal Engine 4 toolset. Through lectures and demonstrations, students will grasp the Unreal Engine 4 import pipeline, set up an interactive asset, build a short cinematic, and create simple material networks. Classes include a mixture of weekly in-engine demonstrations, discussions of asset creation methods, and in-class critique of homework and projects. Students will learn basic game production pipeline through homework assignments and work towards a final class project for review.

Game Creation 2

Learn to create immersive real-time worlds in Unreal 4

This course builds on the topics and techniques presented in Game Creation 1. With an emphasis on creating real-time worlds, students will dig into workflows and techniques for creating terrains, foliage, and destructible meshes, utilizing Unreal Engine 4's specific tools for creating natural environments. Classes include a mixture of weekly in-engine demonstrations, discussions of world building methods, and in-class critique of homework and projects. Students will learn these environment tools through homework assignments which build towards a final class project.

Game Creation 3

Explore the technical side of real-time game creation

This course builds on the basics learned in Game Creation 1 and delves into Unreal Engine 4's toolset for incorporating animation into real-time projects. Students will learn the character asset production pipeline, beginning with rigging and animation in Maya and building to export and implementation in Unreal Engine 4. Classes include a mixture of weekly in-engine demonstrations and in-class critique of homework and projects. Students will create a series of homework assignments and a final project for review and critique.

Game Creation 4

Explore the technical production techniques necessary for game creation

This course expands on techniques from the previous Game Creation courses and explores intermediate and advanced techniques in visual scripting through Unreal Engine 4's blueprinting system. Classes are split between lectures on the logical underpinning of scripting techniques, live demonstrations of those techniques, and guided hands-on lab work where students can put their learning to practical use. Students will learn Blueprint scripting concepts to create mechanics and interactions through their homework assignments, which build towards a final class project.

Game Design

Define game design through exploration of fundamental ideas and techniques

This course focuses on the fundamental ideas and techniques that define cogent game design. Through a series of exercises, students will build a proof-of-concept project with clear storytelling and game mechanics. Environment, character, and prop design will also be integral to project development. This is an intensive course designed to provide students with the means to rapidly prototype their own games. Students are expected to cover the cost of supplies, estimated to be between \$0 to \$20.

Gesture Drawing

Develop skills in gesture drawing from a live model

This course is a complement to Life Drawing, focusing on the expression of gesture in the human form. In-class drawing sessions use live models, both nude and costumed, in a variety of character and story-driven poses. Students will learn critical elements of dynamic drawing, such as pose analysis, silhouette development, proportion, balance, and critical thinking in terms of storytelling and design. By drawing quickly and spontaneously, students learn to be more creative, inventive, and versatile as visual artists. Students are expected to cover the cost of supplies, estimated between \$30 to \$60.

Graphic Design

Apply traditional methods of graphic design to products for entertainment

This course focuses on graphic design as a visual medium for both practical and entertainment purposes. Traditional methodologies of design are applied towards relevant studies in film, games, and visual effects. Through lectures, exercises, and a final project, students hone their sensibilities in development for print, film, game design, and web media.

Hard Surface Modeling 1

Learn the fundamentals of creating 3D models

In this course, students learn the fundamentals of creating 3D models with polygon geometry. Lectures delve into the various production techniques of asset creation through the exploration of polygonal modeling and the preparation of constructed models for texturing. The basic toolset in Autodesk Maya will be covered, and students will benefit from lectures about the technical and aesthetic issues that professional modelers face while modeling environments and man-made objects. Students will create weekly models through the term and the class will culminate in a final project consisting of an intermediate to complex model like a vehicle, robot, or prop.

Hard Surface Modeling 2

Learn advanced hard surface modeling techniques

This course teaches students to model complex assets such as vehicles, robots, and weapons. Lectures focus on the use of polygonal modeling tools in the development of form and detail, as well as production-specific issues pertaining to poly count, surface quality, and topology. Over the term, students become familiar with the techniques used to create high-quality hard surface models efficiently. Classes cover different modeling techniques from box modeling to sculpting and resurfacing. Students will complete two production quality models over the course of the term.

HD Digital Filmmaking for VFX

Learn the essentials of digital camerawork for CG projects

This course builds on the principles learned in Animation and Visual Effects, and through weekly lectures and out of class assignments, expands student learning in the essentials for integrating digital camera work into CG projects. Lectures include the technical aspects of the DV format, equipment choices and usage, terminology, and staging and lighting techniques. Students learn the essentials of DV camera operation and the technical side of video formats. The output methodology for different applications is discussed so that students can take their DV footage and integrate it into their final CG projects. Compositing integration includes chroma keying and color matching in Nuke, post color grading in Premiere, and Speed Grade. Classes include a mixture of camera and software demonstrations and in-class exercises, as well as project critiques and industry tips. Students will explore various styles of shooting digital video footage through homework assignments and work towards a polished final project.

History and Principles of Animation

Survey the historical techniques of animation

This course introduces students to the history and techniques of animation. Lectures and demonstrations use the Twelve Principles of Animation as a springboard into deconstructing the visuals of both animated and live-action films. Students learn to address issues such as planning a scene, thumbnailing, understanding traditional animation techniques, and to improve their draftsmanship. Executing basic animation tests, sketchbook development, and working towards completing an animated walk cycle are critical elements to this course. Students are expected to cover the cost of supplies, estimated between \$15 to \$20.

History of Visual Effects

Survey and analyze the history of visual effects in film and games

This course covers the history of visual effects, from the first matte paintings and stop-motion animations to the most outrageous effects used today in film and games. Through lecture and analysis, students learn how visual effects have been employed for over a century to create illusions of the fantastic. Students also develop the skills necessary to understand the applications of the current digital VFX pipeline through readings, discussion, and individual research.

Houdini 1

Learn the technical basics of SideFX Houdini

This course builds on the fundamental concepts of 3D by developing procedural content creation inside of SideFX's Houdini. Emphasis is placed on creating 3D scenes utilizing a procedural node based network, including animation, scattering, vegetation, terrain, and oceans, all rendered inside Houdini. Classes include a mixture of weekly demonstrations and discussions, as well as project critiques and industry tips. Students will explore various styles of procedural networks through homework assignments, working towards a polished final project created using Houdini.

Houdini 2

Use SideFX Houdini to create complex visual effects animation

This course builds on the principles learned in Houdini 1. Through lectures and homework assignments, students learn to develop introductory simulations using SideFX's Houdini. Emphasis is placed on Houdini's dynamics tool kit, including particles, volume-based fluids, flip fluids, and pyro effects. Classes include a mixture of weekly dynamic simulations demonstrations and discussions of the procedural methods used, as well as project critiques and industry tips. Students will explore various styles of painting, building individual final projects.

Houdini 3

Explore various effects, tools, and techniques in SideFX Houdini

This course builds on the principles learned in Houdini 2, and through weekly lectures, in-class practice, and out of class assignments, expands student learning in developing high-end effects animation in SideFX's Houdini. Emphasis is placed on VEX Scripting, Point Clouds, Shading, timing control, and interactive illumination to create a lightning bolt setup. Learn to build a custom growth solver with vector math, fuzzy logic, chaos theory, and VEXpressions. Students will learn the creation of destruction with fracture patterns, vdb fracturing, boolean fracturing, and packed primitives, as well as Liquid Explosion with Flip fluids, pyro, vector math, microsolves, pyro shader, and interactive illumination. Classes include procedural simulations demonstrations and discussions of production workflows, as well as project critiques and industry tips. Students will explore various styles of effects workflows through homework assignments and work towards completing several individual projects.

Houdini 4

Learn advanced Houdini production techniques

This course builds on the principles learned in Houdini 3, expanding student learning in developing high-end workflows inside of SideFX's Houdini. Students will develop the skills needed to set up and organize an fx-driven production shot through procedural workflows for a sequencebased environment. They will also learn to create micro tools to assist in streamlining workflows. Learn to implement fx setups that are stable and procedural so that setups can work on different incoming geometry. The classroom environment will support and implement constructive criticism on in-class exercises, as well as provide project critiques and industry tips. Students will explore various styles of procedural effects methods through homework assignments and work towards taking an fx shot from idea to final comp.

Improvisational Acting

Learn the process of improv as it applies to character animation

In this course, students learn traditional improvisational acting techniques. Class sessions focus on the processes animators use to organically develop a character around a set of circumstances. Students will develop problemsolving skills through teamwork exercises and by creating compelling scenes. Through improvisational games, as well as extracurricular theatrical experiences, students learn a valuable acting method which expands individual creativity and character development.

Interview and Resume Workshop

Prepare for a job in the visual effects industry

This course is designed to help students successfully produce professional job marketing campaigns. Students will learn personal identity branding, to create a vision for an approach to getting employed, and to prepare for interviewing. Lectures focus on crafting a professional presence for job-hunting, directed towards companies specializing in computer graphics for film, games, and visual effects. Weekly projects and a final presentation provide opportunities for students to develop their own branding. Students are expected to cover the costs of supplies, estimated between \$5 to \$100.

Introduction to 3D with Maya

Learn the technical basics of Autodesk Maya

This course focuses on the foundation of 3D computer graphics using Autodesk Maya. Students are introduced to the Maya interface and philosophy, as well as 3D modeling, texturing, lighting, rendering, and animation. Lectures cover the applications of these tools in the film and game industries. This course will prepare students to face both artistic and technical challenges when creating accurate and compelling 3D images, helping to build a foundational understanding of both technical workflows and art and design aesthetics. Students will work on multiple projects throughout the course for critique that will help establish a solid 3D skill set in both realistic and conceptual 3D computer generated art.

Introduction to Compositing

Use layering to create composited imagery in After Effects

This class introduces students to the basics of compositing. Through weekly lectures, in-class exercises, and homework assignments, students will learn the fundamental concepts of compositing inside of Adobe's After Effects. Emphasis is placed on the user interface, compositions, keyframing, layers, footage, color keying, 3D layers, and a variety of tools utilized in compositing workflows. Classes include After Effects demonstrations and discussions of compositing methods, as well as project critiques and industry tips. Students will explore various styles of compositing through their assignments, working towards a final project for presentation.

Level Design

Explore the process of 2D and 3D level design for games

This course clarifies the techniques of level design in games and the process of defining and generating a playable space. Students learn how the design of a level allows a game to evolve, per the rules and conditions set forth in the design process. Lectures cover the responsibilities of a level designer, including creating a variety of game play elements, game pipelines, and engagement with artists to ensure smooth and seamless game play.

Life Drawing 1

Develop skills in foundational figure drawing

In this course, students learn to draw the human figure, utilizing both traditional and non-traditional principles and techniques. Styled after a foundation art school figure drawing course, the principles of form and gesture are applied to in-class live model sketching and homework figurative studies. Communicating gesture, creating accurate anatomy and proportion, and developing a body of figurative portfolio work are inherent to this course, supported by in-class demonstrations and lectures. Students are expected to cover the cost of supplies, estimated between \$50 to \$80.

Life Drawing 2

Learn the principles and techniques of drawing moving figures

This course builds upon knowledge gained in previous figure drawing courses and focuses on teaching students advanced techniques of observation, in order to recreate the human form in motion. Broad actions are reduced to a series of poses to isolate key gestures within these actions. Students will learn to examine various muscle groups, identifying areas of relaxation and tension, while also studying the use of concepts like balance, counterbalance, and gravity to generate a more dynamic execution.

Lighting and Rendering 1

Learn the basics of lighting in Autodesk Maya and V-Ray

This course builds on the principles learned in Introduction to 3D in Maya. Students will learn to create artistic and cinematic lighting setups with Autodesk's Maya and Chaos Group's VRay. Instruction covers creating renders that enhance visual storytelling through lighting, techniques to light characters, products, exterior and interior environments, and lighting for live action footage. Classes include a mixture of weekly lighting demonstrations, discussions of cinematic approaches using industry standard methods, project critiques, and industry tips. Students will explore various styles of lighting through homework assignments and work towards completing a polished final project for review.

Lighting and Rendering 2

Study the technical aspects of lighting in Autodesk Maya and V-Ray

This course builds on the principles learned in Lighting and Rendering 1. Through weekly lectures and demonstrations, students gain experience in the technical side of lighting and rendering inside of Autodesk's Maya, Chaos Group's VRay, and The Foundry's Nuke. Emphasis is placed on image sampling, quality versus speed in the render, GI sampling, frame sequences, handling artifacts, baking GI, multi pass rendering and assembly in Nuke, motion blur, depth of field, atmospheric fog, caustics, and 3D integration into live action in Nuke. Classes will cover technical rendering demonstrations, discussions of production problems, project critiques, and industry tips. Students will explore various methods of troubleshooting 3D renders through homework assignments and work towards a polished final project.

Lighting and Rendering 3

Study alternative solutions for industry standard rendering softwares and techniques

This course builds on the principles learned in Lighting and Rendering 2. Students will learn to create renders utilizing Solid Angle's Arnold and Redshift inside of Autodesk's Maya. Emphasis is placed on experiencing a shot-based production environment, learning the fundamentals of unbiased rendering with Arnold, and biased gpu rendering with Redshift. An in-depth look of both renderers' materials, lights, object properties, and render settings will be taught. Classes include a mixture of weekly technical demonstrations, discussions of production workflows, project critiques, and industry tips. Students will explore various styles of shot production workflows, working towards a polished final shot sequence.

Lighting and Rendering 4

Create high quality images using production rendering techniques

This course builds on the principles learned in Lighting and Rendering 3, and through weekly lectures, in-class practice, and homework assignments, expands student learning in developing production rendering techniques in Autodesk's Maya, Chaos Group's VRay, and The Foundry's Nuke. Emphasis is placed on production workflows and integrating more control between Maya and Nuke, blurring the lines between what control is possible between the 3D and 2D software. Methods are taught through VRay Render Elements, including compositing raw elements the right way, handling antialiasing of renders, deep compositing, and 2.5D relighting with Normals and World position. Classes include a mixture of lighting and rendering demonstrations and in-class exercises, as well as project critiques and industry tips. Students will explore various styles of production workflows through complex assignments and work towards a polished final project.

Lighting and Rendering with Arnold

Learn to shade, light, and render scenes in the Arnold Renderer

This course covers the entire process of building materials, lighting and rendering for film and commercial production using Solid Angle's Arnold Renderer. The Arnold Renderer is an unbiased, physically-based, path tracing rendering engine that has taken the industry by storm. Students learn to handle extremely large data sets while maintaining simple, achievable workflows.

Liquid Simulations

Create production liquid simulation solutions for visual effects

This course focuses on intermediate to advanced approaches to creating production-quality liquid simulations. Tools like Flip simulations in Houdini, Bifrost, and Phoenix FD in Maya will be the focus of the class. Students will begin with the fundamentals of how these solvers work and progress to designing and creating high quality production shots.

Long Pose Figure Drawing

Learn advanced techniques for drawing the human figure

In this advanced figure drawing course, students expand upon previously-learned skills to illustrate the figure in greater detail. By developing students' understanding of lighting, value structure, and composition, this course encourages students to refine their drawing skills and deepen their understanding of the human form. Taking the time to draw figures to completion is an essential preparation for both traditional and digital painting.

Look Development

Delve into the technical challenges of creating surfaces for look development

This course builds on the principles learned in multiple intermediate courses, such as Lighting and Rendering and Texturing and Shading. Students will learn the tools and techniques necessary for look development with Autodesk's Maya, Chaos Group's VRay, and The Foundry's Nuke and Mari. In-class lectures cover developing the look of and polishing 3D renders in different areas of the production environment, including characters and environments. Topics include subsurface scattering for characters, translucent materials, human eyes, vegetation, and terrains, as well as the utilization of multi mattes to polish 3D renders. Student learning will benefit from demonstrations of creating atmosphere and mixing live action elements with cg effects. Homework assignments and a polished final project for critique and review round out this advanced course.

Matchmoving and Integration

Use camera tracking to integrate 3D scenes into a live action plate

This course will introduce the base concepts of tracking a live action plate and seamlessly integrating 3D geometry into it. Students will learn how to use The Pixel Farm's PFTrack to match a camera from footage. Color correction and finishing techniques are taught inside of The Foundry's Nuke.

Maya Modules

Learn advanced specialized toolsets in Autodesk Maya

This course is an advanced 3D animation and design course where students will explore lesser known and specialized systems inside and out of Autodesk Maya. Topics covered in lectures and demonstrations will include dynamics, fur, hair, cloth, arbitrary primitive generation, and procedural asset creation. Tools like XGen, nCloth, and Paint Effects will be used to showcase the depth and power available to artists in Maya. Students will also learn to build clothing in Marvelous Designer for use in a Maya animation and rendering pipeline. Weekly assignments will guide students through these complex processes of creating character FX and simulations, allowing these powerful tools to bring future projects to life.

Motion Capture with MotionBuilder

Learn the motion capture production pipeline

This course covers several areas of a motion capture production pipeline for film and games. Topics covered include character preparation, post capture data processing and clean up, re-targeting and character solving fundamentals, motion editing, prepping files for final animation and a full shoot on a motion capture stage. Students also learn virtual production concepts, previsualization, and layout in Motion Builder.

Motion Graphics 1

Learn the essential elements of motion graphics for film and television

This course introduces students to the creation of motion graphics for film and television. Students explore how motion design is utilized in feature film title sequences, film and broadcast trailer graphics, branding, show openings, and popular commercials. Lectures cover the essential elements of motion graphics, with an emphasis given to design, conceptualization, and the ability to sell ideas in a professional production environment.

Motion Graphics 2

Learn advanced techniques in motion graphics

This course emphasizes sophisticated design, advanced 2D/3D animation, illustration, storyboarding, and visual effects for motion graphics. The technical aspects of motion graphics, including green screen compositing, audio, tracking for motion graphics, multilayer rendering, particle effects, dynamics, and flawless delivery, are covered in lecture and demonstration. Realworld client scenarios are explored and students learn a basic approach to pitching their ideas.

Natural Environments with Maya

Create natural outdoor environments in Autodesk Maya

This course explores a variety of tools and techniques for creating natural outdoor environments. Lectures delve into how to build complex realistic scenes. Both manual and procedural methods are utilized, as well as techniques for populating scenes with instancing, proxies, and scripts. Students gain knowledge in how to design and create complex, photo-real landscapes.

Overview of Digital Production

Survey the processes of production in film, broadcast, and games

This course provides students with a thorough understanding of the processes involved in the production of content for film, games, and visual effects. Students learn the different types of facilities that produce VFX media and how their pipelines may differ. This course also explores the tasks that artists complete on a daily basis, including visual story development, designing, use of software, modeling and texturing, lighting, animation, and visual effects. Students are expected to cover the costs of field trip parking and travel, estimated to be between \$20 to \$30.

Painting with Color, Light and Composition

Learn classical painting methods with traditional materials

This course focuses on introducing the properties of light, value, color, and design to traditional painting. An emphasis is placed on solving the problems of representing the figure in space by applying the elements of perspective and composition. By painting from direct observation using a costumed figure, as well as crafting master copies, students learn to mentally prioritize the problem-solving methods critical to life studies. Students are expected to cover the cost of supplies, estimated between \$90 to \$130.

Perspective

Learn the traditional principles of perspective

This course teaches students how to approach a variety of subject matters including architecture, the human figure, products, and vehicles within the context of the principles of perspective. Students learn to utilize the rules of one-, two-, and three-point perspective through a series of sketch exercises and complex homework assignments. Students are expected to cover the cost of supplies, estimated between \$50 to \$80.

Photoshop for Digital Production

Build an understanding of the principles of Adobe Photoshop

This course provides students with a working foundation of the interface and tools of Adobe Photoshop. Through lectures, demonstrations, and exercises, students learn tools for photographic retouching, color treatment, use of layers and selections, photographic manipulation, and compositing. Students will gain the ability to create and utilize advanced photo manipulation and image editing techniques to create 2D images and assist 3D design. Over the 10 weeks students will become practiced in the flexibility and power of Adobe Photoshop as it relates to a digital production workflow.

Portfolio and Résumé Workshop

Prepare for a job in the visual effects industry

This course is designed to help students successfully produce professional job marketing campaigns. An emphasis is placed on understanding and building their personal brands through portfolio and reel execution. Lectures focus on crafting a professional, relevant presence for jobhunting, directed towards companies specializing in commercials, film, games, and visual effects.

Previsualization and Animatics

Visualize complex 3D scenes for production

This course examines the digital previsualization processes of modern filmmaking which supplement traditional storyboarding techniques. Through demonstrations and exercises, students learn to utilize animation and modeling in order to stage and art direct complex sequences before they are shot on film. Lectures focus on lighting, camera placement, movement, editing, and storytelling.

Product Design

Design and digitally build conceptual props

This course explores the design methods used to build conceptual props and products based on a given script. Students will sketch and ideate prop designs in traditional media for a specific application in a digital platform, utilizing form language, thumbnailing, reference and research, and materials studies. Lectures cover these design methods and how to craft concept in a group. Students will work in both 2D and 3D towards building a final project for presentation.

Props and Weapons for Games

Learn the fundamentals of prop and weapon design for games

This course presents the fundamentals for creating artistically creative prop models optimized for real-time engines. Priority is placed on gaining an in-depth understanding of normal maps and how important they are throughout the entire process, and a strong understanding of taking an asset from start to finish for game development. Students will learn presentation skills for delivering assets, to prepare for critiques through homework assignments, and work towards a final class project.

Rotoscoping

Explore the various techniques of rotoscoping for production

This course uses examples of digital video live action imagery to demonstrate the uses of various rotoscoping, paint, and wire techniques for visual effects production. Lectures and homework exercises explore software used to aid students in developing their own composited visual effects shot using 2D, 3D, and filmed elements.

Scripting for Production

Learn to create production tools and interfaces using Py-thon

This course builds on the principles learned in Expressions and Scripting. Students will explore Python scripting and creating tools with user interfaces inside of Autodesk Maya. Emphasis is placed on creating production-ready tools with user interfaces built in PySide and Qt Designer. Lectures and exercises cover user interface design and creating an asset browser through standard application development techniques. Classes include a mixture of weekly scripting demonstrations and discussions of production workflows, as well as project critiques and industry tips. Students will explore various styles of creating production tools through homework assignments and work towards a functional final project.

Story Development

Experiment with techniques for story development

This course explores the development or adaptation of a story into an animated project. Students learn what makes a story engaging both visually and verbally through analysis and the professional development techniques required for revision and pitching. Exercises and lecture revolve around character and story, with students creating scene breakdowns, storyboards, and a final animatic project created either as an individual or in a group.

Storyboarding

Learn the basics of film grammar for storyboarding

This course introduces the fundamental cinematic and storytelling grammar necessary for a career in film, games, or visual effects. Students will learn the technical basics of storyboarding to gain a more complex understanding of the visual language of film. Through lectures, in-class film analysis, discussion, and exercises in and out of class, students learn to translate what drives story and character into previsualization and storyboarding. The intersection of literary and visual storytelling, the technical aspects of camera, and how to pitch ideas in the industry are critical to the development of midterm and final projects for presentation.

Stylized Character Creation

Create stylized characters for games and animation

In this course, students learn to translate 2D designs into appealing 3D characters using Pixologic's ZBrush and Autodesk Maya. Design principles and 3D techniques are utilized to build professional-quality stylized characters for feature animation and games pipelines. Demonstrations, lectures, and critiques focus on the artistic and technical concerns of the character creation pipeline. Students will learn to build, sculpt, and pose their characters, creating a final clean render for critique which touches on all the features of stylized characterization by the end of the course.

Texturing and Shading 1

Design and map materials for modeling with Autodesk Maya's Hypershade

This course builds on the techniques learned in Introduction to 3D with Maya. Through weekly lectures and out of class assignments, students develop textures and shaders using Autodesk Maya, Chaos Group's VRay, and Adobe Photoshop. Lectures and demonstrations cover how to use Maya's Hypershade, imagebased file textures in 2D and 3D, texture painting in Adobe Photoshop, shading techniques with VRay Materials, and basic render setups to demonstrate how lighting affects materials. Students will be expected to create their own final projects using custom textures and shaders built from the techniques in class.

Texture and Shading 2

Create realistic texture maps on 3D surfaces

This course builds on the principles learned in Texturing and Shading 1. Through weekly lectures and out of class assignments, students learn to develop textures and shaders with Autodesk Maya, Allegorithmic's Substance Painter and Bitmap 2 Material, and Chaos Group's VRay. Emphasis is placed on telling the story behind the materials to help drive the process of how textures illustrate various looks, including weathered and aged effects. The process will include a variety of 3D painting and procedural techniques including 3D painting, projection painting, and utilization of masks and blend materials. Classes include a mixture of weekly painting demonstrations and discussions of aging methods as well as assignment critiques and industry tips.

Texture and Shading 3

Learn the art of texturing and shading hard surface assets

This course builds on the techniques learned in Texturing and Shading 2, and through weekly lectures and homework assignments, expands student learning in how to develop high resolution textures using The Foundry's Mari. Emphasis is placed on introducing the Mari interface, general workflow, udims, layers, projection painting, and integrating Mari and Nuke. Students will learn how to render the textures inside of Autodesk's Maya with Chaos Group's VRay. Classes include a mixture of painting demonstrations and discussions of texturing workflows, as well as project critiques and industry tips. Students will create various weekly projects, working towards a polished final project.

Texture and Shading 4

Use advanced software to texture and shade creatures and characters

This course builds on the principles learned in Texturing and Shading 3. Students will learn to develop high resolution textures for characters and creatures utilizing The Foundry's Mari and Pixologic's ZBrush. Lectures and demonstrations will cover a broad scope of methods, including: texturing realistic human skin, teeth, eyes, shading the layers of human skin, realistic creature skin, crafting 3D hair and fur, creating believable cloth and sculpting wrinkles, final details, displacement maps, and anatomy fixes. Students will explore various styles of character and creature texturing and shading through homework assignments and work towards a polished final project.

Texture and Shading for Games

Create physically-based materials for real-time applications

This course immerses students in the process of creating real-time physically based materials widely used in industry standard game engines. Lectures, in-class demonstrations, and exercises cover material network creation methodologies and workflows in Unreal Engine 4. Topics covered include utilizing masks, layers and baked maps, blending environment materials, and working with decals. Students will learn efficient material creation techniques through homework assignments and the creation of a critiqued final class project.

Timing for Animation

Apply 2D animation techniques to computer animation

This course teaches students to apply traditional 2D animation techniques to computer animation. From the bouncing ball with attitude to a fully developed character, students learn to create personality and character through timing. Different methods of animating a scene on paper and techniques for translating drawings to 3D are addressed through lectures, demonstrations, and homework projects.

Vehicle Design

Design transportation for digital entertainment

This course teaches students to sketch, style, and render vehicles using digital rendering techniques. Students learn design cues and a visual language that allows an audience to understand vehicles' roles in film and game narratives. Lectures, demos, master studies, and homework development contribute to an in-depth understanding of the purpose of vehicle design.

Visual Effects Design

Design visual effects for preproduction

This course focuses on conceptual design in visual effects shot production. Storyboarding, camera blocking, research, and development will be taught along with advanced tools inside Maya and Houdini. Students will learn how to seamlessly exchange data and simulations back and forth between programs, optimize workflows, and successfully composite and complete a shot.

Visual Effects for Games 1

Design, create, and optimize visual effects for games

In this course, students learn to design, create, and optimize visual effects for video games. Students create special post-process effects used to enhance the overall look of a video game. Lectures, demonstrations, and exercises focus on the use of the Unreal Development Kit, Photoshop, and Maya.

Visual Effects for Games 2

Learn further techniques to create visual effects for games

Building upon skills developed in Visual Effects for Games 1, this course takes students' abilities to design, create, and optimize visual effects for video games to the next level. Lectures, demonstrations, and exercises expand upon previously-gained techniques to give students the ability to craft advanced particle effects for games.

Visual Structure

Develop an understanding of the methods of visual storytelling

This course teaches students to understand how the elements of structure are used to describe story and character in visual media. Using source material, students will develop a term-long cinematic or game project which expresses the meaningful application of purpose-driven storytelling. Lectures, exercises, in-class discussions, and complex projects will explore the impact of mood, tone, color, and design on the audience. Students will gain experience in professional presentation and time management. Students are expected to cover the cost of supplies, estimated to be between \$0 to \$10.

3 Effective January 1, 2015, the Student Tuition Recovery Fund (STRF) assessment rate will be zero (\$0) per \$1,000.00. Therefore, Gnomon will not collect STRF assessments from students until otherwise noted.

¹Tuition/Fee Increases: Gnomon reserves the right to increase tuition/fees once each calendar year. Tuition/Fee increases will not exceed 5% per calendar year.

APPENDIX 6 DRUG AND ALCOHOL ABUSE POLICY STATEMENT

In accordance with the Drug-Free Schools and Campuses Regulations (EDGAR Part 86), Federal Drug-Free Workplace Act 34 CFR Part 85, Subpart F, and California Drug-Free Workplace Act of 1990 this institution is committed to maintaining a drug-free workplace and a drug-free school. Drug and alcohol abuse can lead to liver, heart and other chronic diseases, low birth weight, birth defects and infant mortality.

The unlawful manufacture, distribution, dispensing, possession or use of drugs, drug paraphernalia, alcohol or other controlled substances at this institution is strictly prohibited. On-campus possession and use of medical marijuana is not allowed. Students and employees are required, as a condition of enrollment and/or employment, to abide by this policy.

To the extent allowed by local state and federal laws, this institution will impose disciplinary action against students and employees for violating these standards of conduct. These actions may include suspension, expulsion, termination of employment, referral for prosecution, and/or required completion of a drug or alcohol rehabilitation or similar program.

In addition to institutional sanctions, students and employees convicted of the unlawful possession or distribution of illicit drugs or alcohol could face local, state, and federal legal penalties which include the loss of eligibility for federal financial aid, fines, imprisonment, and the seizure of drug related assets.

Drug awareness programs, counseling, treatment, rehabilitation, and other related services are available on an ongoing basis to students and employees through the National Treatment Referral System 24-hour hotline (800-662-HELP). This hotline number can tell you how and where to get help for alcohol and other drug problems. Students and employees seeking assistance in overcoming a drug or alcohol related problem are encouraged to contact this organization.

PARENTAL NOTIFICATION POLICY

In accordance with the Family Educational Rights and Privacy Act (FERPA), Gnomon reserves the right to notify the parents/guardians of students under 21 years of age, and the parents/guardians of dependent students, regardless of age, of any incident in which the student is found responsible for violating the school alcohol and drug policy.

SPECIAL REQUIREMENTS FOR EMPLOYEES ENGAGED ON FEDERAL OR STATE CONTRACTS AND GRANTS

This institution, as required by federal regulation (34CFR 85.635 and Appendix C), will report all employees convicted of a criminal drug offense occurring in the workplace to the U.S. Department of Education. Consistent with these same regulations, employees, as a condition of employment, are required to provide written notice to this institution of their conviction for a criminal drug offense occurring at the workplace within five (5) days after that conviction.

In addition, students receiving Pell Grants who are convicted of a criminal drug offense during the period of enrollment for which the Pell Grant was awarded, are required by federal regulation to report that conviction in writing to the:

Director of Grants and Services

United States Department of Education 400 Maryland Avenue SW. Room 3124, GSA Regional Office Bldg. #3 Washington, DC 20202-4571

The report must be made within 10 days after the conviction.

APPENDIX 7 2016 CAMPUS SECURITY ACT DISCLOSURE STATEMENT

Gnomon prepares a report each year in compliance with federal law that discloses campus crime. The crime statistics are compiled using reports made to TVC security, Gnomon faculty and staff, and the Hollywood Police Department.

A copy of the crime statistics is filed with the U.S. Department of Education and is available online at: <u>ope.ed.gov/campussafety/</u>

The Annual Security Report is published annually in compliance with the Campus Crime Statistics Act of 1998. The Campus Security Act (Public Law 102-26) requires postsecondary institutions to disclose the number of instances in which certain specific types of crimes have occurred in any building or on any property owned or controlled by this institution which is used for activities related to the educational purpose of the institution and/or any building or property owned or controlled by student organizations recognized by this institution. In compliance with that law, the following reflects this institutions' crime statistics for the period of 01/01/2014 - 12/31/2016.

This institution does not employ campus security personnel but encourages employees, instructors, and students to immediately report suspected criminal activity or other emergencies to the nearest available campus security officer, school official, and/or in the event of emergency, to directly contact local law enforcement or other emergency response agencies by dialing 911.

Only staff members, instructors, students, and other parties having business with this institution should be on institutional property. Other individuals present on institutional property at any time without the express permission of the appropriate institutional official(s) shall be viewed as trespassing and may as such be subject to a fine and/or arrest. In addition, employees, instructors and students present on institutional property during periods of non-operation without the express permission of the appropriate institutional official(s) shall also be viewed as trespassing and may also be subject to a fine and/or arrest.

Though this institution does not offer regularly scheduled crime awareness or prevention programs, students are encouraged to exercise proper care in seeing to their own personal safety and the safety of others.
