ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Minor, Elementary Education (Partner)

Total Program: 18 Credit Hours

Minor Core - 12 Credit Hours

GEDU 2143 - FOUNDATIONS OF EDUCATION & INSTRUCTIONAL DESIGN

This course is a study of the nature and character of American education and how it has been influenced by our social structure, social values, and history. The course includes an introduction to subject area competencies, professional skills and competencies, benchmarks for the pre-professional level of accomplished practices for teachers, and the expectations for ethical and professional behavior. Students will learn the principles of effective instructional design and delivery in the K-8 setting and gain practice in writing standards-based lesson plans that include differentiated instruction and assessment.

Prerequisites & Notes

None

Credits: 3

GEDU 2233 - EDUCATIONAL PSYCHOLOGY

This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.

Prerequisites & Notes

None

Credits: 3

GEDU 3023 - TRAUMA INFORMED TEACHING

This course is a study of the impacts and types of trauma that affect K-12 student well-being and classroom learning. Adverse Childhood Experiences (ACEs) studies and classroom strategies for mitigating the effects of childhood trauma are outlined. Focus given to the review of trauma's impact on the K-12 student and how the teacher can create a trauma-informed classroom to proactively empathize and care for affected students.

Prerequisites & Notes

None

Credits: 3

GEDU 4333 - CLASSROOM & BEHAVIOR MANAGEMENT

This course is the study of models and strategies of behavior management appropriate for specific populations of students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, conflict resolution, culture, and demographics. The course includes methodology for managing a learning environment utilizing research-based best practices in education.

Prerequisites & Notes

None

Credits: 3

Minor Electives - Select Two:**GEDU 2013 - SURVEY OF TEACHING METHODS**

This course offers a survey of current methods and techniques for teaching across disciplines. Emphasis is placed on K-8 pedagogy and best practices of teaching and learning.

Prerequisites & Notes

None

Credits: 3

GEDU 3493 - LITERACY FOUNDATIONS I: THE SCIENCE OF READING

This course is a study of scientific theory and effective approaches for reading instruction, focusing on reading as the interactive weaving of word recognition and language comprehension. The essential components of literacy are studied: oral language, phonological awareness, phonics, fluency, vocabulary, and comprehension. Characteristics of proficient readers, striving readers, and readers with dyslexia are examined along with practices for differentiating reading instruction.

Prerequisites & Notes

None

Credits: 3

GEDU 3503 - INSTRUCTIONAL TECHNOLOGY

This course is designed to develop skills and techniques needed for the selection, utilization, and production of classroom instructional materials and for application and integration of educational technology and media to all areas of the curriculum, appropriate to students' developmental level.

Prerequisites & Notes

None

Credits: 3

Other Programs

Associate of Arts, Education (Online, Site-based)

Southeastern University's Associate of Arts in Education (AA in Education) degree is designed for students who wish to acquire skills that are both foundational and will prepare them for opportunities in the field of education. This program consists of 62 credit hours. Over the course of three 16-week semesters, students will complete 47 credit hours of general education courses and 15 credit hours of education courses such as content and instructional design for educators, educational psychology, and children's literature and development. (Please note that graduating from this program does not certify students as licensed educators in the state of Florida. However, it serves as an excellent segue into SEU's bachelor of science in education degrees, which prepare students for state certification.)

Foundational Core - 47 Credit Hours

Intellectual and Practical Skills - 12 Credit Hours

ENGL 1133 - ENGLISH COMPOSITION I

Study and practice in the critical reading and effective writing of expository prose, with an emphasis on fluency and style.

Credits: 3

ENGL 1233 - ENGLISH COMPOSITION II

This course includes study and practice in the critical reading and effective writing of argumentative and expository prose, with an emphasis on the documented paper. A research paper is required.

Prerequisites & Notes

ENGL 1133

Credits: 3

Mathematics: Select One (1) of the Following (3 Credits):

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1223 - QUANTITATIVE REASONING

This course emphasizes quantitative reasoning skills and is designed to prepare students to think critically about the world they live in. Applications in consumer education, civic engagement, and personal finance will be presented. Topics include logic, probability, statistics, exponential growth, and data analysis.

Prerequisites & Notes

NULL

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1323 - EXPLORATION IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. Possible topics for this course are set theory, elementary number theory, history of mathematics, numbers and number systems, financial mathematics, systems of equations, and matrices.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Engaging Human Culture and the Natural World - 16 Credit Hours

Natural Science with Lab: Select One (1) of the Following plus Lab (4 Credits):

NSCI 2704 - INTRODUCTION TO FORENSIC SCIENCE LECTURE/LAB

This course is an overview of the application of forensic science, how it applies to the criminal justice system, and an overview of forensic lab techniques with an emphasis on physical evidence recovery and analysis including trace evidence, blood splatter, fingerprinting, and DNA analysis. This course is designed to provide students an understanding of the techniques and abilities of forensic science with regard to investigative and criminalistic activities. This course meets the science (with lab) general education requirement and the specialized needs of the Criminal Justice program.

Prerequisites & Notes

NULL

Credits: 4

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

Behavioral Science: Select One (1) of the Following (3 credits):

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

PSYC 1233 - PERSONAL AND SOCIAL ADJUSTMENT

This course is an introduction to human adjustments and the resulting forms of behavior. Emphasis is placed on the fundamental principles underlying normal behavior. This course helps students apply mental health principles to everyday living.

Prerequisites & Notes

NULL

Credits: 3

Social Science: Select One (1) of the Following (3 Credits):

SSCI 2033 - HUMANS IN SOCIETY

This course introduces the student to the multidisciplinary field of social science by exploring the social theories, phenomena, institutions, and forces that shape society. Emphasis is placed on exploring the existence and perpetuation of social problems as a means of introducing the social sciences and applying critical thinking skills to these diverse issues.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2233 - MARRIAGE AND FAMILY

This course is a study of the major issues related to courtship, marriage, and family formation. Special attention is given to the social conditions influencing courtship, marriage, divorce, and family life. Topics include dating rituals, gender differences, expectations, parenting, family dysfunction, family violence, and strategies for sound relating. The role of family counselors and therapists is also discussed.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

BBUS 2203 - MICROECONOMICS

This survey course develops the concepts of individual economic units, such as households, firms, and industries. In this study, topics will include economic behaviors relating to spending, saving, investment, labor economics, and prices.

Prerequisites & Notes

BBUS 2103

Credits: 3

Historical Perspective: Select One (1) of the Following (3 Credits):

HIST 1033 - WORLD CIVILIZATION TO 1600

A survey of world history from the beginning of civilization to 1600. Introduction to the origins and early development of individual civilizations. Stresses interdependency and interrelations among cultures, and compares social, political, and religious movements.

Prerequisites & Notes

NULL

Credits: 3

HIST 1043 - WORLD CIVILIZATION SINCE 1600

A survey of world history from 1600 to the present. Emphasis is placed on various nationalistic movements including the English, American, and French Revolutions; the rise of new nations; scientific expansion; changes in religious sects; world conflicts; and status of the world at the present.

Prerequisites & Notes

NULL

Credits: 3

HIST 2013 - AMERICAN HISTORY TO 1877

A survey of American history from discovery to 1877. Topics include the colonial period, the revolutionary era, the Constitution, Jeffersonianism, economic and territorial expansion, sectional tensions, the Civil War, and Reconstruction.

Prerequisites & Notes

NULL

Credits: 3

HIST 2023 - AMERICAN HISTORY 1877 TO THE PRESENT

A survey of American history from 1877 to the present. Topics include the New South, the New West, foreign affairs, industrialization, the Progressive Era, the World Wars, the Depression, the Cold War, and present issues.

Prerequisites & Notes

NULL

Credits: 3

PPOL 2433 - UNITED STATES & NEVADA CONSTITUT

This course is a study of the legal culture in the United States, including the British common law system, origins of the U.S. and State of Nevada Constitutions, amendments, and landmark cases. This course is required to be taken by Las Vegas, NV extension site students only.

Prerequisites & Notes

NULL

Credits: 3

*Required for Nevada students.

Humanities: Select One (1) of the Following (3 Credits):

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2203 - DRAMATIC INTERP OF ANCIENT LITERATU

Dramatic interpretation of Homer's Odyssey, Virgil's Aeneid, and Sophocles' Oedipus Rex. Students read and analyze ancient masterworks and then practice the rhetorical canons of memoria and delivery to present dramatic interpretations both individually and in groups. Creative presentations of themes from ancient literature provide additional opportunity to practice extemporaneous speaking and delivery of ancient texts in oral form.

Prerequisites & Notes

NULL

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

Spiritual Formation - 10 Credit Hours

CORE 1001 - COLLEGE AND CHRISTIAN CALLING

This course serves as an introduction to the mission of Southeastern University and the academic tradition of liberal arts education. The course prepares students for academic and social success by focusing on the areas of success factors for higher education, Christian higher education as calling, and personal and spiritual formation.

Prerequisites & Notes

NULL

Credits: 1

BIOT 1433 - THE OLD TESTAMENT INTERPRETATION

The course serves as an introduction to Old Testament interpretation. It provides an elemental framework for interpreting the Old Testament by exploring its ancient Near Eastern contexts; discussing literary, thematic, and theological constructs; and demonstrating how it informs Christian thought and practice.

Prerequisites & Notes

NULL

Credits: 3

BINT 1533 - THE NEW TESTAMENT INTERPRETATION

This course serves as an introduction to the New Testament in the context of its first century environments. The course examines the teachings and interpretations of the New Testament as well as the role of the Scriptures in the Church.

Prerequisites & Notes

NULL

Credits: 3

THEO 2123 - CHRISTIAN THOUGHT AND PRACTICE

This course surveys the history of Christian thought and practices. Doctrinal topics introduced in the course include the doctrines of God, Jesus Christ, the Holy Spirit, humanity, salvation, the church, scripture, and last things. The course explores the application of Christian practices and spiritual disciplines such as prayer, communion, baptism, and social responsibility to the students' community.

Prerequisites & Notes

NULL

Credits: 3

Personal and Social Responsibility - 9 Credit Hours

THEO 3123 - INTRODUCTION OF ETHICS

This course examines the philosophical and theological principles and issues related to ethics. It addresses meta-ethical questions about the relationship between moral language and concepts and various metaphysical and post-metaphysical views; normative ethical theories; theological structures and implications of ethics; and contemporary ethical issues.

Prerequisites & Notes

NULL

Credits: 3

Major Core - 15 Credit Hours

EDUC 2233 - EDUCATIONAL PSYCHOLOGY

This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.

Prerequisites & Notes

None

Credits: 3

EDUC 3503 - INSTRUCTIONAL TECHNOLOGY

This course is designed to develop skills and techniques needed for the selection, utilization, and production of classroom instructional materials and for application and integration of educational technology and media to all areas of

the curriculum, appropriate to PreK-12 students' developmental level.

Prerequisites & Notes

None

Credits: 3

Total Program Hours - 62 Credit Hours

****It is the responsibility of the student to read, review, and fulfill the requirements and total hours of this degree audit for their applicable degree.****

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

AND

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

OR

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

Area III, Natural Science and Mathematics - 11 Credit Hours

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes
NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

Credits: 3

Spring Semester

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

EDUC 2143 - FOUNDATIONS OF EDUCATION & INSTRUCTIONAL DESIGN

This course is a study of the nature and character of American education and how it has been influenced by our social structure, social values, and history. The course includes an introduction to subject area competencies, professional skills and competencies, benchmarks for the pre-professional level of accomplished practices for teachers, and the Code of Ethics and Professional Conduct. Students will learn the principles of effective instructional design and delivery in the PreK-12 setting and gain practice in writing Florida standards-based lesson plans that include differentiated instruction and assessment.

Prerequisites & Notes

None

Credits: 3

EDUC 2233 - EDUCATIONAL PSYCHOLOGY

This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.

Prerequisites & Notes

None

Credits: 3

EDUC 2131 - FIELD STUDY 1

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe K-12 settings (approximately 30 hours) and participate in low-level classroom tasks. The College of Education will work cooperatively with schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the General Knowledge Test (GKT) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Year Two

Fall Semester

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

EDUC 3493 - LITERACY FOUNDATIONS 1: THE SCIENCE OF READING

This course is a study of scientific theory and effective approaches for reading instruction, focusing on reading as the interactive weaving of word recognition and language comprehension. The essential components of literacy are studied: oral language, phonological awareness, phonics, fluency, vocabulary, and comprehension. Characteristics of proficient readers, striving readers, and readers with dyslexia are examined along with practices for differentiating reading instruction.

Prerequisites & Notes

None

Credits: 3

EDUC 3713 - FAITH INTEGRATION IN EDUCATION

This course is designed to assist educators in effectively and legally integrating their Christian faith into school and classroom settings.

Prerequisites & Notes

None

Credits: 3

Public Policy Course- 3 Credit Hours

Cross-Cultural Course- 3 Credit Hours

Spring Semester

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for

application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

EDUC 3353 - EMPOWERING ESOL TEACHERS

This course is an overview of curriculum, instructional methods and materials, testing and evaluation, and cross-cultural communication processes and linguistic principles as related to instructing English Language Learners (ELLs) in the PreK-12 classroom.

Prerequisites & Notes

None

Credits: 3

EDUC 3351 - FIELD STUDY 2

In this course, students will be placed in a K-12 setting to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the K-12 setting (approximately 45 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with area schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Professional Education Test (PEd) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

Natural-Scientific Inquiry (4 credits) Select one:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Economics Course- 3 Credit Hours

Year Three

Fall Semester

EDUC 3133 - ASSESSMENT OF LEARNERS

This course focuses on the educational levels and needs of all students, including exceptional, culturally and/or linguistically diverse, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and curriculum-based assessments are included. Use of test results in program planning is emphasized.

Prerequisites & Notes

None

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Upper Level History Course- 6 Credit Hours

Spring Semester

EDUC 3663 - LITERATURE FOR SECONDARY TEACHERS

This course is a study of specific literature typically taught in secondary schools and aligned to the FLDOE competencies and skills and national/state/district-adopted content standards.

Prerequisites & Notes

None

Credits: 3

ESED 3113 - SURVEY OF THE EXCEPTIONAL LEARNER

This is a required course for certification in all Education programs, including Music Education. This is an introductory course that examines the history, characteristics, and issues in exceptional education. The course covers all areas of exceptionality and their manifestations from early childhood through adulthood. It is designed to provide students with a firm grounding in the foundations of special education and expose them to the reconstruction of the field, in order that they may better deal with new and ever-changing developments. In addition to classroom meetings, a minimum of 10 hours of observation/participation in a clinical setting is required. This course is recommended to be taken prior to any other Exceptional Student Education courses.

Prerequisites & Notes

None

Credits: 3

EDUC 4221 - FIELD STUDY 3

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the K-12 setting (approximately 60 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with local schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Subject Area Exam (SAE) for their major and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

GENERAL ELECTIVE - 2 HR ELECTIVE

Select a 2 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 2

Upper Level History Course- 3 Credit Hours

Year Four

Fall Semester

EDUC 3503 - INSTRUCTIONAL TECHNOLOGY

This course is designed to develop skills and techniques needed for the selection, utilization, and production of classroom instructional materials and for application and integration of educational technology and media to all areas of the curriculum, appropriate to PreK-12 students' developmental level.

Prerequisites & Notes

None

Credits: 3

EDUC 3523 - TEACHING LITERACY IN CONTENT AREAS

This course will provide students with strategies and tools for becoming a facilitating and reflective practitioner, teaching reading across content areas, and helping students discover that content area learning is made richer when reading, writing, speaking, and listening are taught together. Particular emphasis is placed on a balanced approach to reading, specific reading and comprehension strategies for content reading, the role of reflection in helping students to think critically, reading for diverse students, and the use of appropriate texts and media.

Prerequisites & Notes

None

Credits: 3

EDUC 4433 - CLASSROOM & BEHAVIOR MANAGEMENT - SECONDARY SCHOOL

This course is the study of models and strategies of behavior management appropriate for specific populations of students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, conflict resolution, culture, and demographics. The course includes methodology for managing a learning environment utilizing research-based best practices in education.

Prerequisites & Notes

None

Credits: 3

EDUC 3243 - TEACHING SOCIAL SCIENCE IN SEC SCHOOL

This course is a study of strategies, techniques, materials, technology, and current research used in the teaching of social science concepts to secondary school students. Students will review the traditional and contemporary standards involved, develop an awareness of the professional resources available for teachers, and prepare unit lesson plans with related assessment procedures on a variety of topics. Emphasis is on effective teacher behaviors in areas of instructional organization and development, presentation of subject matter, and verbal/nonverbal communication.

Prerequisites & Notes

None

Credits: 3

Upper Level History Course- 3 Credit Hours

Spring Semester

EDUC 4912 - STUDENT TEACHING

This course provides five seminar-style opportunities for student teachers to examine the experiences they are concurrently having in the full-time student internship in the PreK-12 setting. Seminars are designed to respond to the immediate needs of the student teachers and offer support, encouragement, and insights into the teaching process and profession. Guest speakers will play an important role in enriching the program and providing first-hand experiences from the classroom and administrative levels.

Prerequisites & Notes

Attempt all required portions of the FTCE

Credits: 12

Certificate, Comprehensive Post Secondary Transition

Foundational Core - 3 Link Units

SEU Foundations- 1 Link Unit

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

Worldview Formation (1 of these for 3 credit hours = 1 Link Unit)

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 1 Link Unit

Discursive Inquiry (1 of these for 3 credit hours = 1 Link Unit)

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Major Core - 8 Link Units

LKES 0102 - INDEPENDENT LIVING II

Independent Living 2 is the financial course in the Link Program Independent Living curriculum. This course is designed to improve financial literacy. Students will experience the impact of their financial decisions in both the simulation and in the classroom. Students' decisions have real in-class consequences, creating an environment where their choices dictate their experiences and their grades.

Prerequisites & Notes

LKES 0101

Credits: 1

LKES 0331 - SELF ADVOCACY I

Self-advocacy aims to equip students with important skills they need to advocate for themselves in school, the workplace, and in life. All students develop the skills, behaviors, and attitudes, through direct instruction and/or added support, as necessary, that enable students to learn and grow in self-knowledge, self-determination, social interactions, communications styles, and understanding of their rights and responsibilities.

Prerequisites & Notes

None

Credits: 1

LKES 0341 - SELF ADVOCACY II

Self-advocacy 2 aims to strengthen advocacy skills introduced in Self Advocacy 1. All students develop the skills, behaviors, and attitudes, through direct instruction and/or added support, as necessary, that enable students to learn and grow in self-knowledge, self-determination, communications styles, and understanding of their rights and responsibilities.

Prerequisites & Notes

LKES 0331

Credits: 1

LKES 0211 - WORK READINESS I

This course is an introduction to the necessary social and life skills that are needed in order to gain employment post-graduation. Students will take a variety of strengths and interest assessments, strengthen their own professional skills, and learn the importance of communication in the workplace and business etiquette. This class also addresses how to build a resume, job interview preparation, and mock interviews.

Prerequisites & Notes

None

Credits: 1

Electives (Inclusive Courses)- 5 Credit Hours

Total Program Link Units- 16

College of Natural and Health Sciences

Mission

The mission of the College of Natural and Health Sciences is to provide a

Christ-centered, experiential learning environment that prepares students to excel in their future academic and professional careers.

Dean

Aimee Franklin, PhD.

Dean, College of Natural and Health Sciences

Associate Professor of Science

Site-Based (Partnership)

Associate of Arts, Pre-Nursing (Site-Based Partnership)

Associate of Arts, Pre-Nursing: 2-Year Plan

Students who intend to pursue a BS in Nursing must earn a B- or higher in all science and lab courses.

Total Program Hours - 60 Credit Hours

Foundational Core- 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

Quantitative Inquiry - 3 Credit Hours

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

Socio-Historical Inquiry - 6 Credit Hours

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following: (3 Credit Hours)

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 24 Credit Hours

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

CHEM 1213 - INTRO TO CHEMISTRY

This course is an introduction to basic concepts of general chemistry, introduction of periodic properties of elements and compounds, basic atomic-molecular structure, and properties of substances and reactions related to gas laws.

Prerequisites & Notes

Corequisite: CHEM 121L

Credits: 3

CHEM 121L - INTRO TO CHEMISTRY LAB

This course is the laboratory course to accompany CHEM 1213.

Prerequisites & Notes

Corequisite: CHEM 1213

Credits: 1

BIOL 2403 - INTRODUCTION TO MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi. This course is primarily for students in the BSN program and focuses on organisms relevant to their field.

Prerequisites & Notes

Prerequisite: BIOL 2083 BIOL 2183

Corequisite: BIOL 240L

Credits: 3

BIOL 240L - INTRODUCTION TO MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 2403.

Prerequisites & Notes

Prerequisite:

BIOL 2083

BIOL 2183

Corequisite:

BIOL 2403

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

THEO 3123 - INTRODUCTION OF ETHICS

This course examines the philosophical and theological principles and issues related to ethics. It addresses meta-ethical questions about the relationship between moral language and concepts and various metaphysical and post-metaphysical views; normative ethical theories; theological structures and implications of ethics; and contemporary ethical issues.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (Minor, Electives, Experiential Learning) - 2 Credit Hours

To meet the Divine Design requirement, student may earn credit hours in general elective courses, declare minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 hr), PRAC 1002 (2 hrs), PRAC 1003 (3 hrs), PRAC 1004 (4 hrs), up to 12 credit hours. General Electives are any college-level courses that do not satisfy the above program requirements. Student must complete the above program requirements, with remaining credit hours earned in Divine Design to meet the total program hours.

Other Programs

Bachelor of Science, Biology Concentration in Veterinary Medicine Four Year Plan B

Year One

Fall Semester

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite: BIOL 1233

Credits: 1

MATH 1413 - PRECALCULUS

This course covers algebraic relations and functions, systems of equations, rational functions, polynomials, exponential functions and logarithms, trigonometric functions and their inverses, graphs, and identities. A placement exam is given at the beginning of each course. Students must demonstrate proficiency to remain in this course. A math score on the ACT of 21 or the SAT of 500 is required. Cost for items and materials provided by our Bookstore are charged as a fee attached to the course.

Prerequisites & Notes

NULL

Credits: 3

ENGL 1133 - ENGLISH COMPOSITION I

Study and practice in the critical reading and effective writing of expository prose, with an emphasis on fluency and style.

Credits: 3

Select One(1) of the Following - 3 Credit Hours

SSCI 2233 - MARRIAGE AND FAMILY

This course is a study of the major issues related to courtship, marriage, and family formation. Special attention is given to the social conditions influencing courtship, marriage, divorce, and family life. Topics include dating rituals, gender differences, expectations, parenting, family dysfunction, family violence, and strategies for sound relating. The role of family counselors and therapists is also discussed.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

BUSI 2103 - MACROECONOMICS

This course will cover basic concepts of supply and demand, production possibilities, the circular flow concept and related topics of GDP, inflation, and employment/unemployment, fiscal and monetary policy, and the workings of the monetary system.

*Do not register for this course if you have taken BBUS 2103

Prerequisites & Notes

None

Credits: 3

POLS 4133 - CORNERSTONE IN POLITICAL SCIENCE

The purpose of this course is to connect students with major competencies in the field of political science. The competencies covered in this course are economics and financial literacy related to politics, governing versus campaigning, decorum of communication in politics, the art of compromise, and the sanctity of the right to vote. As a capstone course, students will demonstrate mastery of the competencies through coursework and experiential learning.

Prerequisites & Notes

NULL

Credits: 3

POLS 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

NSCI 2433 - ANIMAL DIVERSITY

This course introduces foundational principles of zoology, including taxonomy, animal biology, architecture and ecology. Emphasis will be placed on the survey of invertebrate and vertebrate biodiversity.

Prerequisites & Notes

Corequisite: NSCI 243L

Credits: 3

NSCI 243L - ANIMAL DIVERSITY LAB

This course is a laboratory to accompany NSCI 2433.

Prerequisites & Notes

Corequisite: NSCI 2433

Credits: 1

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

Select One(1) of the Following - 3 Credit Hours

BINT 1533 - THE NEW TESTAMENT INTERPRETATION

This course serves as an introduction to the New Testament in the context of its first century environments. The course examines the teachings and interpretations of the New Testament as well as the role of the Scriptures in the Church.

Prerequisites & Notes

NULL

Credits: 3

BIOT 1433 - THE OLD TESTAMENT INTERPRETATION

The course serves as an introduction to Old Testament interpretation. It provides an elemental framework for interpreting the Old Testament by exploring its ancient Near Eastern contexts; discussing literary, thematic, and theological constructs; and demonstrating how it informs Christian thought and practice.

Prerequisites & Notes

NULL

Credits: 3

THEO 2123 - CHRISTIAN THOUGHT AND PRACTICE

This course surveys the history of Christian thought and practices. Doctrinal topics introduced in the course include the doctrines of God, Jesus Christ, the Holy Spirit, humanity, salvation, the church, scripture, and last things. The course explores the application of Christian practices and spiritual disciplines such as prayer, communion, baptism, and social responsibility to the students' community.

Prerequisites & Notes

NULL

Credits: 3

Year Two

Fall Semester

BIOL 2633 - CELL & MOLECULAR BIOLOGY

This course is an in-depth study of the structure and molecular functions of a composite cell. The anatomy and physiology of the cell will be covered.

Prerequisites & Notes

Prerequisite: BIOL 1233, BIOL 123L

Credits: 3

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1233 - ENGLISH COMPOSITION II

This course includes study and practice in the critical reading and effective writing of argumentative and expository prose, with an emphasis on the documented paper. A research paper is required.

Prerequisites & Notes

ENGL 1133

Credits: 3

Spring Semester

BIOL 2533 - GENERAL GENETICS

This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243, BIOL 124L

Corequisite:

BIOL 253L

Credits: 3

BIOL 253L - GENERAL GENETICS LAB

This course is the laboratory to accompany BIOL 2533. It is designed as an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243

BIOL 124L

Corequisite:

BIOL 2533

Credits: 1

PHYS 2633 - GENERAL PHYSICS II

This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: PHYS 2533

Credits: 3

PHYS 263L - GENERAL PHYSICS II LAB

Laboratory to accompany PHYS 2633.

Prerequisites & Notes

NULL

Credits: 1

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L

Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

Select One(1) of the Following - 3 Credit Hours

PSYC 1233 - PERSONAL AND SOCIAL ADJUSTMENT

This course is an introduction to human adjustments and the resulting forms of behavior. Emphasis is placed on the fundamental principles underlying normal behavior. This course helps students apply mental health principles to everyday living.

Prerequisites & Notes

NULL

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

Year Three

Fall Semester

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L & MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

COMM 1433 - FUNDAMENTALS OF SPEECH

This course is a study in both theory and practice in the principles of effective speech development and presentation.

* Do not register for this course if you have taken DCOM 1433

Prerequisites & Notes

None

Credits: 3

Spring Semester

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure

and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods.

Prerequisites & Notes

Prerequisite:

CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Select One(1) of the Following - 3 Credit Hours**HIST 1043 - WORLD CIVILIZATION SINCE 1600**

A survey of world history from 1600 to the present. Emphasis is placed on various nationalistic movements including the English, American, and French Revolutions; the rise of new nations; scientific expansion; changes in religious sects; world conflicts; and status of the world at the present.

Prerequisites & Notes

NULL

Credits: 3

HIST 1033 - WORLD CIVILIZATION TO 1600

A survey of world history from the beginning of civilization to 1600. Introduction to the origins and early development of individual civilizations. Stresses interdependency and interrelations among cultures, and compares social, political, and religious movements.

Prerequisites & Notes

NULL

Credits: 3

HIST 2013 - AMERICAN HISTORY TO 1877

A survey of American history from discovery to 1877. Topics include the colonial period, the revolutionary era, the Constitution, Jeffersonianism, economic and territorial expansion, sectional tensions, the Civil War, and Reconstruction.

Prerequisites & Notes

NULL

Credits: 3

HIST 2023 - AMERICAN HISTORY 1877 TO THE PRESENT

A survey of American history from 1877 to the present. Topics include the New South, the New West, foreign affairs, industrialization, the Progressive Era, the World Wars, the Depression, the Cold War, and present issues.

Prerequisites & Notes

NULL

Credits: 3

POLS 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

Year Four

Fall Semester

CHEM 3353 - BIOCHEMISTRY I

This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Prerequisites & Notes

Prerequisite: CHEM 2133 & MATH 2144

Credits: 3

Select Two(2) of the Following - 6 Credit Hours

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

NSCI 3003 - ANIMAL PHYS. AND MOL. BIOLOGY

This course reviews and investigates the fundamental molecular processes and mechanisms that regulate the functions of various organ systems of animals (emphasis on vertebrates) to maintain homeostasis.

Prerequisites & Notes

Prerequisite: BIOL 1243 or NSCI 2433

Credits: 3

NSCI 3403 - AVIAN BIOLOGY (ORNITHOLOGY)

This course introduces the biology, ecology, and conservation of birds with a particular emphasis on Florida's avifauna.

Prerequisites & Notes

NULL

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

NSCI 340L - AVIAN BIOLOGY (ORNITHOLOGY) LAB

This is a laboratory course to accompany NSCI 3403.

Prerequisites & Notes

Corequisite: NSCI 3403

Credits: 1

Select One(1) of the Following - 3 Credit Hours

BINT 1533 - THE NEW TESTAMENT INTERPRETATION

This course serves as an introduction to the New Testament in the context of its first century environments. The course examines the teachings and interpretations of the New Testament as well as the role of the Scriptures in the Church.

Prerequisites & Notes

NULL

Credits: 3

BIOT 1433 - THE OLD TESTAMENT INTERPRETATION

The course serves as an introduction to Old Testament interpretation. It provides an elemental framework for interpreting the Old Testament by exploring its ancient Near Eastern contexts; discussing literary, thematic, and theological constructs; and demonstrating how it informs Christian thought and practice.

Prerequisites & Notes

NULL

Credits: 3

THEO 2123 - CHRISTIAN THOUGHT AND PRACTICE

This course surveys the history of Christian thought and practices. Doctrinal topics introduced in the course include the doctrines of God, Jesus Christ, the Holy Spirit, humanity, salvation, the church, scripture, and last things. The course explores the application of Christian practices and spiritual disciplines such as prayer, communion, baptism, and social responsibility to the students' community.

Prerequisites & Notes

NULL

Credits: 3

Select One(1) of the Following - 3 Credit Hours

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

MUSC 1103 - HISTORY OF JAZZ

This course examines the most significant styles of American music in chronological order beginning with its roots and continuing through the present day.

Prerequisites & Notes

NONE

Credits: 3

MUSC 1233 - MUSIC THEORY II

This course is a study of the fundamental principles of harmonic progression and harmonic rhythm, seventh chords, modulation, secondary dominants, leading-tone chords, and four-part composition. Included in this course is the study of small musical forms.

Prerequisites & Notes

Prerequisite: MUSC 1133; Corequisite: MUSC 1052

Credits: 3

Spring Semester

BIOL 2113 - BIOETHICS

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: **BIOL 1243 or BIOL 2183**

Credits: 3

Select One(1) of the Following - 3 Credit Hours

BIOL 4033 - RESEARCH RESIDENCY PROGRAM

This course is intended to provide a practical experience in clinical research at an inpatient setting for one full semester, approved by the department chair, and spearheaded by a qualified off-site supervisor who provides continuous evaluation of the intern's performance. This course will help establish the concepts that guide a successful research design. Furthermore, this course will expose students to the various opportunities of growth found within a large

regional medical center.

Prerequisites & Notes

Prerequisite or corequisite: CHEM 3353

Credits: 3

BIOL 4903 - SENIOR CAPSTONE COURSE

Students will be required to propose a scientific research study related to the chosen concentration using the knowledge gained through the respective degree programs. This course is designed to review the student portfolio which will be developed over the course of obtaining the General Biology or Biology degree. Culmination of the student's degree will require completion of all items listed in the requirements for the student portfolio, including completion of research papers, presentations, and demonstration of knowledge of specific concepts in Chemistry, Biology, and Physics.

Prerequisites & Notes

Prerequisite: BIOL 2633 , BIOL 2533 , BIOL 253L , CHEM 2143 , CHEM 214L , MATH 2144

Credits: 3

BIOL 4373 - RESEARCH IN BIOLOGICAL SCIENCES

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Approval by Department Chair

Credits: 1-3 Variable

CHEM 4373 - RESEARCH IN CHEMISTRY

This course is a practical experience in chemical research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Prerequisite: Approval by Department Chair

Credits: 3

NSCI 4403 - SCIENCE FIELD STUDY I

This course provides the student supervised work/research experience in a setting relevant to the major area of study but outside the department and university.

Prerequisites & Notes

Prerequisite: Faculty Advisor or Department Chair Approval

Credits: 1-3

NSCI 4413 - SCIENCE FIELD STUDY II

This course provides the student supervised work/research experience in a setting relevant to the major area of study but outside the department and university.

Prerequisites & Notes

Prerequisite: Faculty Advisor or Department Chair Approval

Credits: 1-3

Select One(1) of the Following - 3 Credit Hours

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:
BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

NSCI 3003 - ANIMAL PHYS. AND MOL. BIOLOGY

This course reviews and investigates the fundamental molecular processes and mechanisms that regulate the functions of various organ systems of animals (emphasis on vertebrates) to maintain homeostasis.

Prerequisites & Notes

Prerequisite: BIOL 1243 or NSCI 2433

Credits: 3

NSCI 3403 - AVIAN BIOLOGY (ORNITHOLOGY)

This course introduces the biology, ecology, and conservation of birds with a particular emphasis on Florida's avifauna.

Prerequisites & Notes

NULL

Credits: 3

NSCI 340L - AVIAN BIOLOGY (ORNITHOLOGY) LAB

This is a laboratory course to accompany NSCI 3403.

Prerequisites & Notes

Corequisite: NSCI 3403

Credits: 1

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

Select One(1) of the Following - 3 Credit Hours

BINT 1533 - THE NEW TESTAMENT INTERPRETATION

This course serves as an introduction to the New Testament in the context of its first century environments. The course examines the teachings and interpretations of the New Testament as well as the role of the Scriptures in the Church.

Prerequisites & Notes

NULL

Credits: 3

BIOT 1433 - THE OLD TESTAMENT INTERPRETATION

The course serves as an introduction to Old Testament interpretation. It provides an elemental framework for interpreting the Old Testament by exploring its ancient Near Eastern contexts; discussing literary, thematic, and theological constructs; and demonstrating how it informs Christian thought and practice.

Prerequisites & Notes

NULL

Credits: 3

THEO 2123 - CHRISTIAN THOUGHT AND PRACTICE

This course surveys the history of Christian thought and practices. Doctrinal topics introduced in the course include the doctrines of God, Jesus Christ, the Holy Spirit, humanity, salvation, the church, scripture, and last things. The course explores the application of Christian practices and spiritual disciplines such as prayer, communion, baptism, and social responsibility to the students' community.

Prerequisites & Notes

NULL

Credits: 3

Select One(1) of the Following - 3 Credit Hours

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

ENGL 2513 - BRITISH LITERATURE I

This course introduces students to British literature from Old English through the Neo-classical period. Students will develop skills in reading, writing about, and interpreting literary cultural texts while drawing on relevant cultural contexts, critical frameworks, and personal faith.

Prerequisites & Notes

NULL

Credits: 3

ENGL 3633 - AMERICAN LITERATURE

A survey of prose and poetry with attention given to socio-political backgrounds and growth of American thought as expressed through selected authors from the colonial period to 1945.

Prerequisites & Notes

NULL

Credits: 3

ENGL 3933 - AFRICAN AMERICAN LITERATURE

A survey of significant African-American writing from 1746 to the present, with attention given to social, political, and cultural contexts.

Prerequisites & Notes

NULL

Credits: 3

ENGL 4533 - CONTEMPORARY LITERATURE

This course is the study of recent American, British, and World literature, with an emphasis on the dimensions of cultural diversity. This course is intended to provide a critical introduction to the literary and cultural issues of literature since 1945 and to a representative selection of the major writers of the contemporary period.

Prerequisites & Notes

NULL

Credits: 3

Total Program Hours - 120 Credit Hours

* Precalculus is a prerequisite to Calculus 1 and General Chemistry 1; it does not count toward the 120-hour minimum.

A minimum of 3 hours from Senior Research & Capstone must be taken during your Senior Year.

Bachelor of Science, Biology: Veterinary Medicine Four Year Plan B**Year One****FALL SEMESTER - 14 Credit Hours****CORE 1111 - COMMUNITY AND COLLEGE SUCCESS**

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite:BIOL 1233

Credits: 1

MATH 1413 - PRECALCULUS

This course covers algebraic relations and functions, systems of equations, rational functions, polynomials, exponential functions and logarithms, trigonometric functions and their inverses, graphs, and identities. A placement exam is given at the beginning of each course. Students must demonstrate proficiency to remain in this course. A math score on the ACT of 21 or the SAT of 500 is required. Cost for items and materials provided by our Bookstore are charged as a fee attached to the course.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry- Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

SPRING SEMESTER - 17 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:
CORE 1111

Credits: 2

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:
BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

NSCI 2433 - ANIMAL DIVERSITY

This course introduces foundational principles of zoology, including taxonomy, animal biology, architecture and ecology. Emphasis will be placed on the survey of invertebrate and vertebrate biodiversity.

Prerequisites & Notes

Corequisite: NSCI 243L

Credits: 3

NSCI 243L - ANIMAL DIVERSITY LAB

This course is a laboratory to accompany NSCI 2433.

Prerequisites & Notes

Corequisite: NSCI 2433

Credits: 1

Year Two

FALL SEMESTER - 16 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

BIOL 2633 - CELL & MOLECULAR BIOLOGY

This course is an in-depth study of the structure and molecular functions of a composite cell. The anatomy and physiology of the cell will be covered.

Prerequisites & Notes

Prerequisite: BIOL 1233, BIOL 123L

Credits: 3

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

SPRING SEMESTER - 14 Credit Hours

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L

Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

BIOL 2533 - GENERAL GENETICS

This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243, BIOL 124L

Corequisite:

BIOL 253L

Credits: 3

BIOL 253L - GENERAL GENETICS LAB

This course is the laboratory to accompany BIOL 2533. It is designed as an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243

BIOL 124L

Corequisite:

BIOL 2533

Credits: 1

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Year Three

FALL SEMESTER - 18 Credit Hours

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L & MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

Divine Design (6 Credit Hours)

SPRING SEMESTER - 15 Credit Hours**BIOL 2113 - BIOETHICS**

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: **BIOL 1243 or BIOL 2183**

Credits: 3

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods.

Prerequisites & Notes

Prerequisite:

CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

Divine Design (3 Credit Hours)

Year Four

FALL SEMESTER - 16 Credit Hours

CHEM 3353 - BIOCHEMISTRY I

This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Prerequisites & Notes

Prerequisite: CHEM 2133 & MATH 2144

Credits: 3

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

Biology Specialization - Select One:

Concentration in Veterinary Medicine - Minimum 9 Hours

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

NSCI 3003 - ANIMAL PHYS. AND MOL. BIOLOGY

This course reviews and investigates the fundamental molecular processes and mechanisms that regulate the functions of various organ systems of animals (emphasis on vertebrates) to maintain homeostasis.

Prerequisites & Notes

Prerequisite: BIOL 1243 or NSCI 2433

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

NSCI 3403 - AVIAN BIOLOGY (ORNITHOLOGY)

This course introduces the biology, ecology, and conservation of birds with a particular emphasis on Florida's avifauna.

Prerequisites & Notes

NULL

Credits: 3

NSCI 340L - AVIAN BIOLOGY (ORNITHOLOGY) LAB

This is a laboratory course to accompany NSCI 3403.

Prerequisites & Notes

Corequisite: NSCI 3403

Credits: 1

Divine Design (3 Credits)

NSCI 4403 - SCIENCE FIELD STUDY I

This course provides the student supervised work/research experience in a setting relevant to the major area of study but outside the department and university.

Prerequisites & Notes

Prerequisite: Faculty Advisor or Department Chair Approval

Credits: 1-3

NSCI 4413 - SCIENCE FIELD STUDY II

This course provides the student supervised work/research experience in a setting relevant to the major area of study but outside the department and university.

Prerequisites & Notes

Prerequisite: Faculty Advisor or Department Chair Approval

Credits: 1-3

BIOL 4373 - RESEARCH IN BIOLOGICAL SCIENCES

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Approval by Department Chair

Credits: 1-3 Variable

CHEM 4373 - RESEARCH IN CHEMISTRY

This course is a practical experience in chemical research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Prerequisite: Approval by Department Chair

Credits: 3

BIOL 4023 - BIOLOGY FIELD STUDY

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a qualified off-site supervisor, who provides continuous evaluation of the intern's performance.

Prerequisites & Notes

Approval by department chair

Credits: 1-3

SPRING SEMESTER - 13 Credit Hours

PHYS 2633 - GENERAL PHYSICS II

This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: PHYS 2533

Credits: 3

PHYS 263L - GENERAL PHYSICS II LAB

Laboratory to accompany PHYS 2633.

Prerequisites & Notes

NULL

Credits: 1

BIOL 4903 - SENIOR CAPSTONE COURSE

Students will be required to propose a scientific research study related to the chosen concentration using the knowledge gained through the respective degree programs. This course is designed to review the student portfolio which will be developed over the course of obtaining the General Biology or Biology degree. Culmination of the student's degree will require completion of all items listed in the requirements for the student portfolio, including completion of research papers, presentations, and demonstration of knowledge of specific concepts in Chemistry, Biology, and Physics.

Prerequisites & Notes

Prerequisite: BIOL 2633 , BIOL 2533 , BIOL 253L , CHEM 2143 , CHEM 214L , MATH 2144

Credits: 3

Biology Specialization - Select One:

Concentration in Veterinary Medicine - Minimum 9 Hours

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of

disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

NSCI 3003 - ANIMAL PHYS. AND MOL. BIOLOGY

This course reviews and investigates the fundamental molecular processes and mechanisms that regulate the functions of various organ systems of animals (emphasis on vertebrates) to maintain homeostasis.

Prerequisites & Notes

Prerequisite: BIOL 1243 or NSCI 2433

Credits: 3

NSCI 3403 - AVIAN BIOLOGY (ORNITHOLOGY)

This course introduces the biology, ecology, and conservation of birds with a particular emphasis on Florida's avifauna.

Prerequisites & Notes

NULL

Credits: 3

NSCI 340L - AVIAN BIOLOGY (ORNITHOLOGY) LAB

This is a laboratory course to accompany NSCI 3403.

Prerequisites & Notes

Corequisite: NSCI 3403

Credits: 1

Divine Design (3 Credit Hours)

Bachelor of Science, General Biology Four Year Plan B

Year One

FALL SEMESTER - 14 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite: BIOL 1233

Credits: 1

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

MATH 1413 - PRECALCULUS

This course covers algebraic relations and functions, systems of equations, rational functions, polynomials, exponential functions and logarithms, trigonometric functions and their inverses, graphs, and identities. A placement exam is given at the beginning of each course. Students must demonstrate proficiency to remain in this course. A math score on the ACT of 21 or the SAT of 500 is required. Cost for items and materials provided by our Bookstore are charged as a fee attached to the course.

Prerequisites & Notes

NULL

Credits: 3

SPRING SEMESTER - 16 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:
CORE 1111

Credits: 2

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:
BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:
BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

Year Two

FALL SEMESTER - 16 Credit Hours

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

BIOL 2633 - CELL & MOLECULAR BIOLOGY

This course is an in-depth study of the structure and molecular functions of a composite cell. The anatomy and physiology of the cell will be covered.

Prerequisites & Notes

Prerequisite: BIOL 1233, BIOL 123L

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Socio-Historical Inquiry - Select One:**PSYC 1133 - INTRODUCTION TO PSYCHOLOGY**

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

SPRING SEMESTER - 17 Credit Hours

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L

Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

BIOL 2113 - BIOETHICS

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: **BIOL 1243 or BIOL 2183**

Credits: 3

BIOL 2533 - GENERAL GENETICS

This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243, BIOL 124L

Corequisite:

BIOL 253L

Credits: 3

BIOL 253L - GENERAL GENETICS LAB

This course is the laboratory to accompany BIOL 2533. It is designed as an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243

BIOL 124L

Corequisite:

BIOL 2533

Credits: 1

Biology Specialization - Select One:

Concentration in General Biology - Minimum 18 hours (MUST INCLUDE 3 COURSES WITH LABS)

-F (Fall only), S (Spring only, FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

NSCI 1433 - BOTANY

This course is an introductory course in plant anatomy, physiology and taxonomy. The history of mankind's medicinal use of plants and current updates will be covered.

Prerequisites & Notes

Corequisite: NSCI 143L

Credits: 3

NSCI 143L - BOTANY LAB

This course helps students apply what they have learned about plant anatomy, physiology and taxonomy through hands-on activities and field trips.

Prerequisites & Notes

Corequisite: NSCI 1433

Credits: 1

NSCI 2433 - ANIMAL DIVERSITY

This course introduces foundational principles of zoology, including taxonomy, animal biology, architecture and ecology. Emphasis will be placed on the survey of invertebrate and vertebrate biodiversity.

Prerequisites & Notes

Corequisite: NSCI 243L

Credits: 3

NSCI 243L - ANIMAL DIVERSITY LAB

This course is a laboratory to accompany NSCI 2433.

Prerequisites & Notes

Corequisite: NSCI 2433

Credits: 1

NSCI 3003 - ANIMAL PHYS. AND MOL. BIOLOGY

This course reviews and investigates the fundamental molecular processes and mechanisms that regulate the functions of various organ systems of animals (emphasis on vertebrates) to maintain homeostasis.

Prerequisites & Notes

Prerequisite: BIOL 1243 or NSCI 2433

Credits: 3

NSCI 3333 - ECOLOGY

This course introduces foundational principles of ecology, the study of relationships between organisms and the surrounding environment. This course will provide students with a broader understanding of how the physical and chemical characteristics of the environment influence the distribution and abundance of various species of organisms in an ecosystem.

Prerequisites & Notes

Corequisite: NSCI 333L

Credits: 3

NSCI 333L - ECOLOGY LAB

This is a laboratory to accompany NSCI 3333. Students will discern the interconnectivity between and among various species of organisms through the conduct of actual laboratory and field surveys in various habitats applying critical analysis to explain ecological phenomena learned in lecture.

Prerequisites & Notes

Corequisite: NSCI 3333

Credits: 1

NSCI 3403 - AVIAN BIOLOGY (ORNITHOLOGY)

This course introduces the biology, ecology, and conservation of birds with a particular emphasis on Florida's avifauna.

Prerequisites & Notes

NULL

Credits: 3

NSCI 340L - AVIAN BIOLOGY (ORNITHOLOGY) LAB

This is a laboratory course to accompany NSCI 3403.

Prerequisites & Notes

Corequisite: NSCI 3403

Credits: 1

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Year Three

FALL SEMESTER - 15 Credit Hours

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L & MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

Divine Design (6 Credit Hours)

SPRING SEMESTER - 15 Credit Hours

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods.

Prerequisites & Notes

Prerequisite:

CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

Biology Specialization - Select One with Lab:

Concentration in General Biology - Minimum 18 hours (MUST INCLUDE 3 COURSES WITH LABS)

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

NSCI 1433 - BOTANY

This course is an introductory course in plant anatomy, physiology and taxonomy. The history of mankind's medicinal use of plants and current updates will be covered.

Prerequisites & Notes

Corequisite: NSCI 143L

Credits: 3

NSCI 143L - BOTANY LAB

This course helps students apply what they have learned about plant anatomy, physiology and taxonomy through hands-on activities and field trips.

Prerequisites & Notes

Corequisite: NSCI 1433

Credits: 1

NSCI 2433 - ANIMAL DIVERSITY

This course introduces foundational principles of zoology, including taxonomy, animal biology, architecture and ecology. Emphasis will be placed on the survey of invertebrate and vertebrate biodiversity.

Prerequisites & Notes

Corequisite: NSCI 243L

Credits: 3

NSCI 243L - ANIMAL DIVERSITY LAB

This course is a laboratory to accompany NSCI 2433.

Prerequisites & Notes

Corequisite: NSCI 2433

Credits: 1

NSCI 3003 - ANIMAL PHYS. AND MOL. BIOLOGY

This course reviews and investigates the fundamental molecular processes and mechanisms that regulate the functions of various organ systems of animals (emphasis on vertebrates) to maintain homeostasis.

Prerequisites & Notes

Prerequisite: BIOL 1243 or NSCI 2433

Credits: 3

NSCI 3333 - ECOLOGY

This course introduces foundational principles of ecology, the study of relationships between organisms and the surrounding environment. This course will provide students with a broader understanding of how the physical and chemical characteristics of the environment influence the distribution and abundance of various species of organisms in an ecosystem.

Prerequisites & Notes

Corequisite: NSCI 333L

Credits: 3

NSCI 333L - ECOLOGY LAB

This is a laboratory to accompany NSCI 3333. Students will discern the interconnectivity between and among various species of organisms through the conduct of actual laboratory and field surveys in various habitats applying critical analysis to explain ecological phenomena learned in lecture.

Prerequisites & Notes

Corequisite: NSCI 3333

Credits: 1

NSCI 3403 - AVIAN BIOLOGY (ORNITHOLOGY)

This course introduces the biology, ecology, and conservation of birds with a particular emphasis on Florida's avifauna.

Prerequisites & Notes

NULL

Credits: 3

NSCI 340L - AVIAN BIOLOGY (ORNITHOLOGY) LAB

This is a laboratory course to accompany NSCI 3403.

Prerequisites & Notes

Corequisite: NSCI 3403

Credits: 1

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

Divine Design (6 Credit Hours)

Year Four

FALL SEMESTER - 14 Credit Hours

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

Biology Specialization - Select One:

Concentration in General Biology - Minimum 18 hours (MUST INCLUDE 3 COURSES WITH LABS)

-F (Fall only), S (Spring only, FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

NSCI 1433 - BOTANY

This course is an introductory course in plant anatomy, physiology and taxonomy. The history of mankind's medicinal use of plants and current updates will be covered.

Prerequisites & Notes

Corequisite: NSCI 143L

Credits: 3

NSCI 143L - BOTANY LAB

This course helps students apply what they have learned about plant anatomy, physiology and taxonomy through hands-on activities and field trips.

Prerequisites & Notes

Corequisite: NSCI 1433

Credits: 1

NSCI 2433 - ANIMAL DIVERSITY

This course introduces foundational principles of zoology, including taxonomy, animal biology, architecture and ecology. Emphasis will be placed on the survey of invertebrate and vertebrate biodiversity.

Prerequisites & Notes

Corequisite: NSCI 243L

Credits: 3

NSCI 243L - ANIMAL DIVERSITY LAB

This course is a laboratory to accompany NSCI 2433.

Prerequisites & Notes

Corequisite: NSCI 2433

Credits: 1

NSCI 3003 - ANIMAL PHYS. AND MOL. BIOLOGY

This course reviews and investigates the fundamental molecular processes and mechanisms that regulate the functions of various organ systems of animals (emphasis on vertebrates) to maintain homeostasis.

Prerequisites & Notes

Prerequisite: BIOL 1243 or NSCI 2433

Credits: 3

NSCI 3333 - ECOLOGY

This course introduces foundational principles of ecology, the study of relationships between organisms and the surrounding environment. This course will provide students with a broader understanding of how the physical and chemical characteristics of the environment influence the distribution and abundance of various species of organisms in an ecosystem.

Prerequisites & Notes

Corequisite: NSCI 333L

Credits: 3

NSCI 333L - ECOLOGY LAB

This is a laboratory to accompany NSCI 3333. Students will discern the interconnectivity between and among various species of organisms through the conduct of actual laboratory and field surveys in various habitats applying critical analysis to explain ecological phenomena learned in lecture.

Corequisite: NSCI 3333

Credits: 1

NSCI 3403 - AVIAN BIOLOGY (ORNITHOLOGY)

This course introduces the biology, ecology, and conservation of birds with a particular emphasis on Florida's avifauna.

Prerequisites & Notes

NULL

Credits: 3

NSCI 340L - AVIAN BIOLOGY (ORNITHOLOGY) LAB

This is a laboratory course to accompany NSCI 3403.

Prerequisites & Notes

Corequisite: NSCI 3403

Credits: 1

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

Divine Design (6 Credit Hours)

SPRING SEMESTER - 14 Credit Hours

PHYS 2633 - GENERAL PHYSICS II

This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: PHYS 2533

Credits: 3

PHYS 263L - GENERAL PHYSICS II LAB

Laboratory to accompany PHYS 2633.

Prerequisites & Notes

NULL

Credits: 1

BIOL 4903 - SENIOR CAPSTONE COURSE

Students will be required to propose a scientific research study related to the chosen concentration using the knowledge gained through the respective degree programs. This course is designed to review the student portfolio which will be developed over the course of obtaining the General Biology or Biology degree. Culmination of the student's degree will require completion of all items listed in the requirements for the student portfolio, including completion of research papers, presentations, and demonstration of knowledge of specific concepts in Chemistry, Biology, and Physics.

Prerequisites & Notes

Prerequisite: BIOL 2633 , BIOL 2533 , BIOL 253L , CHEM 2143 , CHEM 214L , MATH 2144

Credits: 3

Biology Specialization - Select Two:

Select One with Lab.

Concentration in General Biology - Minimum 18 hours (MUST INCLUDE 3 COURSES WITH LABS)

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

NSCI 1433 - BOTANY

This course is an introductory course in plant anatomy, physiology and taxonomy. The history of mankind's medicinal use of plants and current updates will be covered.

Prerequisites & Notes

Corequisite: NSCI 143L

Credits: 3

NSCI 143L - BOTANY LAB

This course helps students apply what they have learned about plant anatomy, physiology and taxonomy through hands-on activities and field trips.

Prerequisites & Notes

Corequisite: NSCI 1433

Credits: 1

NSCI 2433 - ANIMAL DIVERSITY

This course introduces foundational principles of zoology, including taxonomy, animal biology, architecture and ecology. Emphasis will be placed on the survey of invertebrate and vertebrate biodiversity.

Prerequisites & Notes

Corequisite: NSCI 243L

Credits: 3

NSCI 243L - ANIMAL DIVERSITY LAB

This course is a laboratory to accompany NSCI 2433.

Prerequisites & Notes

Corequisite: NSCI 2433

Credits: 1

NSCI 3003 - ANIMAL PHYS. AND MOL. BIOLOGY

This course reviews and investigates the fundamental molecular processes and mechanisms that regulate the functions of various organ systems of animals (emphasis on vertebrates) to maintain homeostasis.

Prerequisites & Notes

Prerequisite: BIOL 1243 or NSCI 2433

Credits: 3

NSCI 3333 - ECOLOGY

This course introduces foundational principles of ecology, the study of relationships between organisms and the surrounding environment. This course will provide students with a broader understanding of how the physical and chemical characteristics of the environment influence the distribution and abundance of various species of organisms in an ecosystem.

Prerequisites & Notes

Corequisite: NSCI 333L

NSCI 333L - ECOLOGY LAB

This is a laboratory to accompany NSCI 3333. Students will discern the interconnectivity between and among various species of organisms through the conduct of actual laboratory and field surveys in various habitats applying critical analysis to explain ecological phenomena learned in lecture.

Prerequisites & Notes

Corequisite: NSCI 3333

Credits: 1

NSCI 3403 - AVIAN BIOLOGY (ORNITHOLOGY)

This course introduces the biology, ecology, and conservation of birds with a particular emphasis on Florida's avifauna.

Prerequisites & Notes

NULL

Credits: 3

NSCI 340L - AVIAN BIOLOGY (ORNITHOLOGY) LAB

This is a laboratory course to accompany NSCI 3403.

Prerequisites & Notes

Corequisite: NSCI 3403

Credits: 1

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Credits: 3

Divine Design (3 Credit Hours)

Kinesiology

Dean

Aimee Franklin

Dean, College of Natural and Health Sciences

Associate Professor of Science

Chair

TBA

Main Campus (Lakeland, FL)

Bachelor of Science, Kinesiology: Exercise Science

Bachelor of Science, Kinesiology: Exercise Science Four Year Plan

Students must earn a C- or above within all major core and a C- or better in Introduction to Chemistry, which is required in Foundational Core as the Natural Science course for this major.

Total Program Hours - 120 Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours**Discursive Inquiry - 6 Credit Hours****ENGL 1113 - COLLEGE COMPOSITION**

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours**BIOL 1333 - ESSENTIALS OF HUMAN A & P**

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

Quantitative Inquiry - Select One (1) of the Following (3 Credit Hours):

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select Two (2) of the Following (6 Credit Hours):

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 37 Credit Hours

KINS 2203 - INTRODUCTION TO KINESIOLOGY

This course is an introduction to the fundamental principles of human movement and their relationship to fitness and activity. The course will introduce the subdisciplines of Kinesiology including Sport Psychology, Motor Learning, Biomechanics, Exercise Physiology and Sport Pedagogy. The application of Kinesiology content will be discussed as it relates to professional development.

Prerequisites & Notes

NULL

Credits: 3

KINS 3123 - ADAPTIVE PHYSICAL EDUCATION

An analysis of the neuromuscular and perceptual motor development of individuals with limited abilities and a study of activities designed to improve their motor skills. An introduction to some special populations in the clinical setting will also be introduced.

Prerequisites & Notes

NULL

Credits: 3

KINS 3303 - APPLIED BIOMECHANICS

This course is the study of basic biomechanical principles and concepts and their application in the analysis of various human movements with emphasis on sport and exercise skills.

Prerequisites & Notes

Prerequisite: KINS 2203 (required); BIOL 2083 or BIOL 1333 (preferred)

Credits: 3

KINS 3403 - ENERGY SUPPLIES

This course addresses the nutrition needs of active people and athletes. Course topics include carbohydrate, protein, fat, vitamin, mineral, and water requirements for fitness and sport. Weight control, popular nutrition supplements, and ergogenic aids will also be reviewed.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 3503 - EXERCISE TESTING

This course examines the specific testing procedures used to assess fitness levels and physiological responses during exercise.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 4403 - PHYSIOLOGY OF EXERCISE

This course investigates physiological mechanisms responsible for adaptations to acute and chronic exercise in the metabolic, endocrine, pulmonary, cardiovascular, and neuromuscular systems.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 4503 - DESIGN OF FITNESS & WEIGHT TRAINING

In this course students will obtain detailed knowledge of the essentials of exercise science in order to design appropriate, effective, and safe long-term exercise programs.

This course provides each student with the opportunity to design a fitness program for a specific sport or training goal. At the end of the semester, the student will have a personal fitness manual for their specific sport or training goal that they created through personal research.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 4533 - CARE & PREVENTION OF INJURIES

This course is designed to introduce students to entry level knowledge of sport related injuries. The course includes units that deal with the history of athletic training, basic anatomy of common injuries in athletics, evaluation procedures of such injuries, preventative measures to reduce the incidence of injuries and basic treatment and rehabilitation procedures that are used after an injury occurs.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

SRMT 2103 - INTRODUCTION TO SPORT MANAGEMENT

This course explores the meaning of sport management. Its scope, principles, issues, and future trends are introduced, discussed, and analyzed. It examines the job responsibilities and competencies required of sport managers in a variety of sports or sport-related organizations. It provides the student with an overview of the different facets and career opportunities that are available in the field of sport management.

Prerequisites & Notes

ENGL 2113 or ENGL 1233

Credits: 3

SRMT 3203 - MENTAL HEALTH AND SPORT PSYCHOLOGY

This course is an introduction to the many facets of applied sport psychology, the mental aspects of sports, and the contemporary performance enhancement techniques utilized in sport psychology throughout the world. It includes the theory and practice of sport psychology with areas of the theoretical basis of mental aspects of training processes and competition, mental training techniques for psychomotor performance, and basic issues of performance psychology.

Prerequisites & Notes

SRMT 2103

Credits: 3

SRMT 3403 - SPORT ETHICS

This course is a study of contemporary moral issues in sports, including the relative fairness of performance-enhancing drugs and techniques, cheating and deception, the role of violence in sports, and the nature of sporting behavior.

Prerequisites & Notes

SRMT 2103 or KINS 2203

Credits: 3

CHEM 1213 - INTRO TO CHEMISTRY

This course is an introduction to basic concepts of general chemistry, introduction of periodic properties of elements and compounds, basic atomic-molecular structure, and properties of substances and reactions related to gas laws.

Prerequisites & Notes

Corequisite: CHEM 121L

Credits: 3

CHEM 121L - INTRO TO CHEMISTRY LAB

This course is the laboratory course to accompany CHEM 1213.

Prerequisites & Notes

Corequisite: CHEM 1213

Credits: 1

Divine Design (Major Specific Experiential Learning) - 6 Credit Hours

KINS 4013 - KINESIOLOGY PRACTICUM I

A course designed to provide students with practical hands-on experience in the instruction of exercise technique in resistance training, plyometric training, aerobic and anaerobic training programs under the direction and supervision of the Kinesiology faculty.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 4023 - KINESIOLOGY PRACTICUM II

This course provides the opportunity for Exercise Science, Pre-PT, Pre-OT, and Pre-AT students to gain hands on or observational experience required for their post-bachelors continued education. Students will be required to complete 70 hours with an industry professional in their chosen concentration. Students are responsible for securing their practicum location and for their own transportation to their practicum sites. This course will also prepare students for the application process for admittance into their chosen graduate program.

Prerequisites & Notes

Prerequisite: KINS 2203 and KINS 4013

Credits: 3

Divine Design - 43 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Bachelor of Science, Kinesiology: Exercise Science Four Year Plan

Year One

FALL SEMESTER - 15 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

Quantitative Inquiry - Select One

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (4 Credit Hours)

SPRING SEMESTER - 16 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

KINS 2203 - INTRODUCTION TO KINESIOLOGY

This course is an introduction to the fundamental principles of human movement and their relationship to fitness and activity. The course will introduce the subdisciplines of Kinesiology including Sport Psychology, Motor Learning, Biomechanics, Exercise Physiology and Sport Pedagogy. The application of Kinesiology content will be discussed as it relates to professional development.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (8 Credit Hours)

Year Two

FALL SEMESTER - 15 Credit Hours

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

SRMT 2103 - INTRODUCTION TO SPORT MANAGEMENT

This course explores the meaning of sport management. Its scope, principles, issues, and future trends are introduced, discussed, and analyzed. It examines the job responsibilities and competencies required of sport managers in a variety of sports or sport-related organizations. It provides the student with an overview of the different facets and career opportunities that are available in the field of sport management.

Prerequisites & Notes

ENGL 2113 or ENGL 1233

Credits: 3

Socio-Historical Inquiry - Select One

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

Divine Design (2 Credit Hours)

SPRING SEMESTER - 14 Credit Hours

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

SRMT 3203 - MENTAL HEALTH AND SPORT PSYCHOLOGY

This course is an introduction to the many facets of applied sport psychology, the mental aspects of sports, and the contemporary performance enhancement techniques utilized in sport psychology throughout the world. It includes the theory and practice of sport psychology with areas of the theoretical basis of mental aspects of training processes and competition, mental training techniques for psychomotor performance, and basic issues of performance psychology.

Prerequisites & Notes

SRMT 2103

Credits: 3

Socio-Historical Inquiry - Select One**SSCI 2133 - INTRODUCTION TO SOCIOLOGY**

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

Divine Design (2 Credit Hours)

Year Three

FALL SEMESTER - 16 Credit Hours

KINS 3303 - APPLIED BIOMECHANICS

This course is the study of basic biomechanical principles and concepts and their application in the analysis of various human movements with emphasis on sport and exercise skills.

Prerequisites & Notes

Prerequisite: KINS 2203 (required); BIOL 2083 or BIOL 1333 (preferred)

Credits: 3

SRMT 3403 - SPORT ETHICS

This course is a study of contemporary moral issues in sports, including the relative fairness of performance-enhancing drugs and techniques, cheating and deception, the role of violence in sports, and the nature of sporting behavior.

Prerequisites & Notes

SRMT 2103 or KINS 2203

Credits: 3

CHEM 1213 - INTRO TO CHEMISTRY

This course is an introduction to basic concepts of general chemistry, introduction of periodic properties of elements and compounds, basic atomic-molecular structure, and properties of substances and reactions related to gas laws.

Prerequisites & Notes

Corequisite: CHEM 121L

Credits: 3

CHEM 121L - INTRO TO CHEMISTRY LAB

This course is the laboratory course to accompany CHEM 1213.

Prerequisites & Notes

Corequisite: CHEM 1213

Credits: 1

Divine Design (6 Credit Hours)

SPRING SEMESTER - 15 Credit Hours

KINS 3123 - ADAPTIVE PHYSICAL EDUCATION

An analysis of the neuromuscular and perceptual motor development of individuals with limited abilities and a study of activities designed to improve their motor skills. An introduction to some special populations in the clinical setting will also be introduced.

Prerequisites & Notes

NULL

Credits: 3

KINS 3403 - ENERGY SUPPLIES

This course addresses the nutrition needs of active people and athletes. Course topics include carbohydrate, protein, fat, vitamin, mineral, and water requirements for fitness and sport. Weight control, popular nutrition supplements, and ergogenic aids will also be reviewed.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 4533 - CARE & PREVENTION OF INJURIES

This course is designed to introduce students to entry level knowledge of sport related injuries. The course includes units that deal with the history of athletic training, basic anatomy of common injuries in athletics, evaluation procedures of such injuries, preventative measures to reduce the incidence of injuries and basic treatment and rehabilitation procedures that are used after an injury occurs.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

Divine Design (6 Credit Hours)

Year Four

FALL SEMESTER - 15 Credit Hours

KINS 3503 - EXERCISE TESTING

This course examines the specific testing procedures used to assess fitness levels and physiological responses during exercise.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 4013 - KINESIOLOGY PRACTICUM I

A course designed to provide students with practical hands-on experience in the instruction of exercise technique in resistance training, plyometric training, aerobic and anaerobic training programs under the direction and supervision of the Kinesiology faculty.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 4403 - PHYSIOLOGY OF EXERCISE

This course investigates physiological mechanisms responsible for adaptations to acute and chronic exercise in the metabolic, endocrine, pulmonary, cardiovascular, and neuromuscular systems.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

Divine Design (6 Credit Hours)

Electives are any college-level courses that do not satisfy specific program requirements.

SPRING SEMESTER - 14 Credit Hours

KINS 4023 - KINESIOLOGY PRACTICUM II

This course provides the opportunity for Exercise Science, Pre-PT, Pre-OT, and Pre-AT students to gain hands on or observational experience required for their post-bachelors continued education. Students will be required to complete 70 hours with an industry professional in their chosen concentration. Students are responsible for securing their practicum location and for their own transportation to their practicum sites. This course will also prepare students for the application process for admittance into their chosen graduate program.

Prerequisites & Notes

Prerequisite: KINS 2203 and KINS 4013

Credits: 3

KINS 4503 - DESIGN OF FITNESS & WEIGHT TRAINING

In this course students will obtain detailed knowledge of the essentials of exercise science in order to design appropriate, effective, and safe long-term exercise programs.

This course provides each student with the opportunity to design a fitness program for a specific sport or training goal. At the end of the semester, the student will have a personal fitness manual for their specific sport or training goal that they created through personal research.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

Divine Design (8 Credit Hours)

Bachelor of Science, Kinesiology: Pre-Athletic Training

Bachelor of Science, Kinesiology: Pre-Athletic Training Four Year Plan

The Kinesiology/Pre-Athletic Training major will both equip you with an in-depth knowledge of the human body and how it moves, plus train you in all the necessary skills needed to perform the duties of an athletic trainer. The invaluable experience, skill sets, and knowledge found in this degree will set you well on your way to working alongside the best of the best.

Total Program Hours - 120 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

Quantitative Inquiry - 3 Credit Hours

MATH 1413 - PRECALCULUS

This course covers algebraic relations and functions, systems of equations, rational functions, polynomials, exponential functions and logarithms, trigonometric functions and their inverses, graphs, and identities. A placement exam is given at the beginning of each course. Students must demonstrate proficiency to remain in this course. A math score on the ACT of 21 or the SAT of 500 is required. Cost for items and materials provided by our Bookstore are charged as a fee attached to the course.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - 6 Credit Hours

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 37 Credit Hours**KINS 2203 - INTRODUCTION TO KINESIOLOGY**

This course is an introduction to the fundamental principles of human movement and their relationship to fitness and activity. The course will introduce the subdisciplines of Kinesiology including Sport Psychology, Motor Learning, Biomechanics, Exercise Physiology and Sport Pedagogy. The application of Kinesiology content will be discussed as it relates to professional development.

Prerequisites & Notes

NULL

Credits: 3

KINS 3303 - APPLIED BIOMECHANICS

This course is the study of basic biomechanical principles and concepts and their application in the analysis of various human movements with emphasis on sport and exercise skills.

Prerequisites & Notes

Prerequisite: KINS 2203 (required); BIOL 2083 or BIOL 1333 (preferred)

Credits: 3

KINS 3403 - ENERGY SUPPLIES

This course addresses the nutrition needs of active people and athletes. Course topics include carbohydrate, protein, fat, vitamin, mineral, and water requirements for fitness and sport. Weight control, popular nutrition supplements, and ergogenic aids will also be reviewed.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 4203 - MOTOR CONTROL & LEARNING

This course is a study of the development of human motor performance by exploring theories of learning as they apply to the acquisition of gross motor skills.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 4403 - PHYSIOLOGY OF EXERCISE

This course investigates physiological mechanisms responsible for adaptations to acute and chronic exercise in the metabolic, endocrine, pulmonary, cardiovascular, and neuromuscular systems.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 4533 - CARE & PREVENTION OF INJURIES

This course is designed to introduce students to entry level knowledge of sport related injuries. The course includes units that deal with the history of athletic training, basic anatomy of common injuries in athletics, evaluation procedures of such injuries, preventative measures to reduce the incidence of injuries and basic treatment and rehabilitation procedures that are used after an injury occurs.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 4633 - ORTHOPEDIC EVAL. OF ATHL. INJURIES

This course is a study of principles and processes involved in the recognition, assessment, and orthopedic evaluation of athletic injuries. Application is made to sport and rehabilitation.

Prerequisites & Notes

Prerequisite: KINS 2203; KINS 4533

Credits: 3

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite:BIOL 1233

Credits: 1

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

Divine Design (Major Specific Experiential Learning) -6 Credit Hours

KINS 4013 - KINESIOLOGY PRACTICUM I

A course designed to provide students with practical hands-on experience in the instruction of exercise technique in resistance training, plyometric training, aerobic and anaerobic training programs under the direction and supervision of the Kinesiology faculty.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 4033 - CLINICAL KINESIOLOGY PRACTICUM II

This course provides the opportunity for Pre-PT, Pre-OT, and Pre-AT students to gain hands-on or observational experience required for their post-bachelors continued education. Students will be required to complete 70 hours with an industry professional in their chosen concentration. Students are responsible for securing their practicum location and for their own transportation to their practicum sites. This course will also prepare students for the application process for admittance into their chosen graduate program.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

Divine Design- 43 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Bachelor of Science, Kinesiology: Pre-Occupational Therapy

Bachelor of Science, Kinesiology: Pre-Occupational Therapy Four Year Plan

The Kinesiology/ Pre-Occupational Therapy major is a strong choice for students interested in working with children and adults with behavioral challenges, learning disabilities and special needs, as well as interest in helping these patients develop the skills needed to function in daily life.

Total Program Hours - 120 Credit Hours**Foundational Core - 34 Credit Hours****SEU Foundations - 3 Credit Hours****CORE 1111 - COMMUNITY AND COLLEGE SUCCESS**

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours**BIBL 1113 - THE STORY OF SCRIPTURE**

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

Quantitative Inquiry - Select One (1) of the Following (3 Credit Hours):

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - 6 Credit Hours

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 32 Credit Hours

KINS 2203 - INTRODUCTION TO KINESIOLOGY

This course is an introduction to the fundamental principles of human movement and their relationship to fitness and activity. The course will introduce the subdisciplines of Kinesiology including Sport Psychology, Motor Learning, Biomechanics, Exercise Physiology and Sport Pedagogy. The application of Kinesiology content will be discussed as it relates to professional development.

Prerequisites & Notes

NULL

Credits: 3

KINS 3123 - ADAPTIVE PHYSICAL EDUCATION

An analysis of the neuromuscular and perceptual motor development of individuals with limited abilities and a study of activities designed to improve their motor skills. An introduction to some special populations in the clinical setting will also be introduced.

Prerequisites & Notes

NULL

Credits: 3

KINS 3303 - APPLIED BIOMECHANICS

This course is the study of basic biomechanical principles and concepts and their application in the analysis of various human movements with emphasis on sport and exercise skills.

Prerequisites & Notes

Prerequisite: KINS 2203 (required); BIOL 2083 or BIOL 1333 (preferred)

Credits: 3

KINS 3403 - ENERGY SUPPLIES

This course addresses the nutrition needs of active people and athletes. Course topics include carbohydrate, protein, fat, vitamin, mineral, and water requirements for fitness and sport. Weight control, popular nutrition supplements, and ergogenic aids will also be reviewed.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 4203 - MOTOR CONTROL & LEARNING

This course is a study of the development of human motor performance by exploring theories of learning as they apply to the acquisition of gross motor skills.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 4403 - PHYSIOLOGY OF EXERCISE

This course investigates physiological mechanisms responsible for adaptations to acute and chronic exercise in the metabolic, endocrine, pulmonary, cardiovascular, and neuromuscular systems.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite: BIOL 1233

Credits: 1

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (Major Specific Experiential Learning) - 6 Credit Hours

KINS 4013 - KINESIOLOGY PRACTICUM I

A course designed to provide students with practical hands-on experience in the instruction of exercise technique in resistance training, plyometric training, aerobic and anaerobic training programs under the direction and supervision of the Kinesiology faculty.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 4033 - CLINICAL KINESIOLOGY PRACTICUM II

This course provides the opportunity for Pre-PT, Pre-OT, and Pre-AT students to gain hands-on or observational experience required for their post-bachelors continued education. Students will be required to complete 70 hours with an industry professional in their chosen concentration. Students are responsible for securing their practicum location and for their own transportation to their practicum sites. This course will also prepare students for the application process for admittance into their chosen graduate program.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

Divine Design - 48 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Bachelor of Science, Kinesiology: Pre-Physical Therapy

Bachelor of Science, Kinesiology: Pre-Physical Therapy Four Year Plan

Students must earn a C- or above in all courses within the major core and a C- or better in the following Foundational Core requirements: Natural Science, Math & Behavioral Science. While a C- is the minimum requirement for these courses, courses marked with an * require a minimum grade of C for entrance into graduate programs. Please see your advisor if you need additional information about the graduate program minimum requirements.

Total Program Hours - 120 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

Quantitative Inquiry - 3 Credit Hours

MATH 1413 - PRECALCULUS

This course covers algebraic relations and functions, systems of equations, rational functions, polynomials, exponential functions and logarithms, trigonometric functions and their inverses, graphs, and identities. A placement exam is given at the beginning of each course. Students must demonstrate proficiency to remain in this course. A math score on the ACT of 21 or the SAT of 500 is required. Cost for items and materials provided by our Bookstore are charged as a fee attached to the course.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - 6 Credit Hours

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 52 Credit Hours

KINS 2203 - INTRODUCTION TO KINESIOLOGY

This course is an introduction to the fundamental principles of human movement and their relationship to fitness and activity. The course will introduce the subdisciplines of Kinesiology including Sport Psychology, Motor Learning, Biomechanics, Exercise Physiology and Sport Pedagogy. The application of Kinesiology content will be discussed as it relates to professional development.

Prerequisites & Notes

NULL

Credits: 3

KINS 3303 - APPLIED BIOMECHANICS

This course is the study of basic biomechanical principles and concepts and their application in the analysis of various human movements with emphasis on sport and exercise skills.

Prerequisites & Notes

Prerequisite: KINS 2203 (required); BIOL 2083 or BIOL 1333 (preferred)

Credits: 3

KINS 4203 - MOTOR CONTROL & LEARNING

This course is a study of the development of human motor performance by exploring theories of learning as they apply to the acquisition of gross motor skills.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 4533 - CARE & PREVENTION OF INJURIES

This course is designed to introduce students to entry level knowledge of sport related injuries. The course includes units that deal with the history of athletic training, basic anatomy of common injuries in athletics, evaluation procedures of such injuries, preventative measures to reduce the incidence of injuries and basic treatment and rehabilitation procedures that are used after an injury occurs.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 4633 - ORTHOPEDIC EVAL. OF ATHL. INJURIES

This course is a study of principles and processes involved in the recognition, assessment, and orthopedic evaluation of athletic injuries. Application is made to sport and rehabilitation.

Prerequisites & Notes

Prerequisite: KINS 2203; KINS 4533

Credits: 3

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite: BIOL 1233

Credits: 1

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L

Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

PHYS 2633 - GENERAL PHYSICS II

This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: PHYS 2533

Credits: 3

PHYS 263L - GENERAL PHYSICS II LAB

Laboratory to accompany PHYS 2633.

Prerequisites & Notes

NULL

Credits: 1

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Divine Design (3 Credit Hours)

Year Two

FALL SEMESTER - 16 Credit Hours

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

MATH 1413 - PRECALCULUS

This course covers algebraic relations and functions, systems of equations, rational functions, polynomials, exponential functions and logarithms, trigonometric functions and their inverses, graphs, and identities. A placement exam is given at the beginning of each course. Students must demonstrate proficiency to remain in this course. A math score on the ACT of 21 or the SAT of 500 is required. Cost for items and materials provided by our Bookstore are charged as a fee attached to the course.

Prerequisites & Notes

NULL

Credits: 3

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

Divine Design (3 Credit Hours)

SPRING SEMESTER - 15 Credit Hours

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

Divine Design (2 Credit Hours)

Year Three

FALL SEMESTER - 16 Credit Hours

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

KINS 3303 - APPLIED BIOMECHANICS

This course is the study of basic biomechanical principles and concepts and their application in the analysis of various human movements with emphasis on sport and exercise skills.

Prerequisites & Notes

Prerequisite: KINS 2203 (required); BIOL 2083 or BIOL 1333 (preferred)

Credits: 3

KINS 4013 - KINESIOLOGY PRACTICUM I

A course designed to provide students with practical hands-on experience in the instruction of exercise technique in resistance training, plyometric training, aerobic and anaerobic training programs under the direction and supervision of the Kinesiology faculty.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (3 Credit Hours)

SPRING SEMESTER - 16 Credit Hours

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L

Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

KINS 4533 - CARE & PREVENTION OF INJURIES

This course is designed to introduce students to entry level knowledge of sport related injuries. The course includes units that deal with the history of athletic training, basic anatomy of common injuries in athletics, evaluation procedures of such injuries, preventative measures to reduce the incidence of injuries and basic treatment and rehabilitation procedures that are used after an injury occurs.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 4033 - CLINICAL KINESIOLOGY PRACTICUM II

This course provides the opportunity for Pre-PT, Pre-OT, and Pre-AT students to gain hands-on or observational experience required for their post-bachelors continued education. Students will be required to complete 70 hours with an industry professional in their chosen concentration. Students are responsible for securing their practicum location and for their own transportation to their practicum sites. This course will also prepare students for the application process for admittance into their chosen graduate program.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

Divine Design (6 Credit Hours)

Year Four

FALL SEMESTER - 13 Credit Hours

KINS 4203 - MOTOR CONTROL & LEARNING

This course is a study of the development of human motor performance by exploring theories of learning as they apply to the acquisition of gross motor skills.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 4533 - CARE & PREVENTION OF INJURIES

This course is designed to introduce students to entry level knowledge of sport related injuries. The course includes units that deal with the history of athletic training, basic anatomy of common injuries in athletics, evaluation procedures of such injuries, preventative measures to reduce the incidence of injuries and basic treatment and rehabilitation procedures that are used after an injury occurs.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

Divine Design (6 Credit Hours)

SPRING SEMESTER - 15 Credit Hours

PHYS 2633 - GENERAL PHYSICS II

This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: PHYS 2533

Credits: 3

PHYS 263L - GENERAL PHYSICS II LAB

Laboratory to accompany PHYS 2633.

Prerequisites & Notes

NULL

Credits: 1

KINS 4633 - ORTHOPEDIC EVAL. OF ATHL. INJURIES

This course is a study of principles and processes involved in the recognition, assessment, and orthopedic evaluation of athletic injuries. Application is made to sport and rehabilitation.

Prerequisites & Notes

Prerequisite: KINS 2203; KINS 4533

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (5 Credit Hours)

Minor, Athletic Coaching

Students may take the Athletic Coaching Core to receive the required training to credential them to accept a coaching position within the secondary education setting.

Total of 18 Credit Hours

Required Courses - 15 Credit Hours

KINS 3133 - THEORY/PRACTICE OF COACHING

A study in the theory and practice of the fundamental techniques, organizational problems, and strategies involved in athletic coaching.

Prerequisites & Notes

NULL

Credits: 3

KINS 4533 - CARE & PREVENTION OF INJURIES

This course is designed to introduce students to entry level knowledge of sport related injuries. The course includes units that deal with the history of athletic training, basic anatomy of common injuries in athletics, evaluation procedures of such injuries, preventative measures to reduce the incidence of injuries and basic treatment and rehabilitation procedures that are used after an injury occurs.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

PEDU 3321 - COACHING FOOTBALL

This course covers the skills, techniques, and methods applicable to coaching football.

Prerequisites & Notes

NULL

Credits: 1

PEDU 3331 - COACHING BASKETBALL

This course is a study of the human aspects of the sport experience through the perspective of the biblical worldview of sport psychology, philosophy, ethics, and theology. Additionally, the course will examine the role of sport in coaching, learning the basics of basketball, and the impact of Coaching Christianity.

Prerequisites & Notes

NULL

Credits: 1

PEDU 3341 - COACHING BASEBALL/SOFTBALL

This course is designed to provide the foundations of coaching baseball and softball to help current and future coaches accomplish the development of successful baseball and softball programs. This course provides aspects of the competitions of baseball and softball.

Prerequisites & Notes

NULL

Credits: 1

PEDU 4003 - DESIGN/CONTENT OF TEACHING P.E.

This course focuses on principles of successful teaching including lesson plans, motivating students, learning communities, class organization & management, assessment, various models of teaching, role & philosophy of the physical educator & curriculum for teaching physical education.

Prerequisites & Notes

NULL

Credits: 3

SRMT 3203 - MENTAL HEALTH AND SPORT PSYCHOLOGY

This course is an introduction to the many facets of applied sport psychology, the mental aspects of sports, and the contemporary performance enhancement techniques utilized in sport psychology throughout the world. It includes the theory and practice of sport psychology with areas of the theoretical basis of mental aspects of training processes and competition, mental training techniques for psychomotor performance, and basic issues of performance psychology.

Prerequisites & Notes

SRMT 2103

Credits: 3

Select One (1) of the Following - 3 Credit Hours

PEDU 502 - TENNIS/RAQUETBALL

This course is designed to teach and implement the basic fundamentals of tennis through the applied concepts of the game. We will discuss and practice the rules and regulations involved in tennis, along with techniques and basic strategy needed to learn and play the game. May repeat up to three times.

Prerequisites & Notes

NULL

Credits: 2

PEDU 0601 - WEIGHT TRAINING

Instruction in the techniques of weight training, with emphasis on performance and appreciation. May repeat up to three times.

Prerequisites & Notes

NULL

Credits: 1

PEDU 701 - BEGINNING TAEKWONDO

An introductory course in tae kwon do. The focus is on the art and science of tae kwon do and the application of basic tae kwon do fundamentals. These will include basic fundamentals, one-step spar, and forms. The course may be repeated up to three times.

Prerequisites & Notes

NULL

Credits: 1

PEDU 711 - INTERMEDIATE TAEKWONDO

This is an intermediate course in Taekwondo. The focus is on the art and science of taekwondo and is designed to build upon the skills acquired in the beginner taekwondo course. These skills will include intermediate fundamentals, intermediate one-step sparring, Tae Guek forms 1-4, tournament competition, and stretching and conditioning. May

repeat up to three times.

Prerequisites & Notes

NULL

Credits: 1

PEDU 3223 - ADMINISTRATION OF P.E. & ATHLETICS

This course is designed to give individuals a sociological perspective on sports in society on the global level. It will examine politics, economics, education, the mass media, gender, race, and financial compensation as each relates to sports.

Prerequisites & Notes

NULL

Credits: 3

SRMT 2103 - INTRODUCTION TO SPORT MANAGEMENT

This course explores the meaning of sport management. Its scope, principles, issues, and future trends are introduced, discussed, and analyzed. It examines the job responsibilities and competencies required of sport managers in a variety of sports or sport-related organizations. It provides the student with an overview of the different facets and career opportunities that are available in the field of sport management.

Prerequisites & Notes

ENGL 2113 or ENGL 1233

Credits: 3

SRMT 3003 - SPORT IN A DIVERSE SOCIETY

This course is designed to give individuals a sociological perspective on sport in society on the global level. It will examine politics, economics, education, the mass media, gender, race, and financial compensation as each relates to sport.

Prerequisites & Notes

None

Credits: 3

SRMT 3103 - SPORT LAW

The course covers the sport legal issues of negligence and product liability, contract law, labor, tort, and antitrust law influence, and the impact and direct development of relationships between leagues, teams, athletes, agents, television, internet, advertisers, and fans.

Prerequisites & Notes

SRMT 2103

Credits: 3

SRMT 3403 - SPORT ETHICS

This course is a study of contemporary moral issues in sports, including the relative fairness of performance-enhancing drugs and techniques, cheating and deception, the role of violence in sports, and the nature of sporting behavior.

Prerequisites & Notes

SRMT 2103 or KINS 2203

Credits: 3

SRMT 3523 - SPORT FACILITY & EVENT MANAGEMENT

This course covers numerous issues from construction-related concerns to marketing facilities, naming rights, and event management. It is comprehensive, focusing on applied, rather than theoretical knowledge.

Prerequisites & Notes

SRMT 2103

Credits: 3

SRMT 3603 - SPORT & SPIRITUALITY

This course is a study of the human aspects of the sport experience through the perspective of the biblical worldview of sport psychology, philosophy, ethics, and theology. Additionally, the course will examine the role of sport in the early church, the rise of sport evangelism, and the impact of Muscular Christianity.

Prerequisites & Notes

None

Credits: 3

SRMT 4303 - SPORT LEADERSHIP

The course is designed as a senior-level study of the administrative techniques and procedures for successful program management in sport work environments. The six focuses are taken from the NASSM (North American Society for Sport Management) program standards.

Prerequisites & Notes

SRMT 2103

Credits: 3

Minor, Kinesiology

Total of 19 Credit Hours

Required Courses - 13 Credit Hours

PEDU 0601 - WEIGHT TRAINING

Instruction in the techniques of weight training, with emphasis on performance and appreciation. May repeat up to three times.

Prerequisites & Notes

NULL

Credits: 1

KINS 4403 - PHYSIOLOGY OF EXERCISE

This course investigates physiological mechanisms responsible for adaptations to acute and chronic exercise in the metabolic, endocrine, pulmonary, cardiovascular, and neuromuscular systems.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 3403 - ENERGY SUPPLIES

This course addresses the nutrition needs of active people and athletes. Course topics include carbohydrate, protein, fat, vitamin, mineral, and water requirements for fitness and sport. Weight control, popular nutrition supplements, and ergogenic aids will also be reviewed.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 3303 - APPLIED BIOMECHANICS

This course is the study of basic biomechanical principles and concepts and their application in the analysis of various human movements with emphasis on sport and exercise skills.

Prerequisites & Notes

Prerequisite: KINS 2203 (required); BIOL 2083 or BIOL 1333 (preferred)

Credits: 3

KINS 2203 - INTRODUCTION TO KINESIOLOGY

This course is an introduction to the fundamental principles of human movement and their relationship to fitness and activity. The course will introduce the subdisciplines of Kinesiology including Sport Psychology, Motor Learning, Biomechanics, Exercise Physiology and Sport Pedagogy. The application of Kinesiology content will be discussed as it relates to professional development.

Prerequisites & Notes

NULL

Credits: 3

Select from the Following - 6 Credit Hours

KINS 4503 - DESIGN OF FITNESS & WEIGHT TRAINING

In this course students will obtain detailed knowledge of the essentials of exercise science in order to design appropriate, effective, and safe long-term exercise programs.

This course provides each student with the opportunity to design a fitness program for a specific sport or training goal. At the end of the semester, the student will have a personal fitness manual for their specific sport or training goal that they created through personal research.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 4533 - CARE & PREVENTION OF INJURIES

This course is designed to introduce students to entry level knowledge of sport related injuries. The course includes units that deal with the history of athletic training, basic anatomy of common injuries in athletics, evaluation procedures of such injuries, preventative measures to reduce the incidence of injuries and basic treatment and rehabilitation procedures that are used after an injury occurs.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

SRMT 2103 - INTRODUCTION TO SPORT MANAGEMENT

This course explores the meaning of sport management. Its scope, principles, issues, and future trends are introduced, discussed, and analyzed. It examines the job responsibilities and competencies required of sport managers in a variety of sports or sport-related organizations. It provides the student with an overview of the different facets and career opportunities that are available in the field of sport management.

Prerequisites & Notes

ENGL 2113 or ENGL 1233

Credits: 3

SRMT 3203 - MENTAL HEALTH AND SPORT PSYCHOLOGY

This course is an introduction to the many facets of applied sport psychology, the mental aspects of sports, and the contemporary performance enhancement techniques utilized in sport psychology throughout the world. It includes the theory and practice of sport psychology with areas of the theoretical basis of mental aspects of training processes and competition, mental training techniques for psychomotor performance, and basic issues of performance psychology.

Prerequisites & Notes

SRMT 2103

Credits: 3

SRMT 3403 - SPORT ETHICS

This course is a study of contemporary moral issues in sports, including the relative fairness of performance-enhancing drugs and techniques, cheating and deception, the role of violence in sports, and the nature of sporting behavior.

Prerequisites & Notes

SRMT 2103 or KINS 2203

Credits: 3

SRMT 3603 - SPORT & SPIRITUALITY

This course is a study of the human aspects of the sport experience through the perspective of the biblical worldview of sport psychology, philosophy, ethics, and theology. Additionally, the course will examine the role of sport in the early church, the rise of sport evangelism, and the impact of Muscular Christianity.

Prerequisites & Notes

None

Credits: 3

Minor, Physical Education

Total of 18 Credit Hours

PEDU 1122 - PRINCIPLES OF PHYSICAL EDUCATION

A study of current trends in physical education with emphasis on the philosophy of teaching, individual appraisals of knowledge and professional attitudes, and the principles for development of a broad understanding to physical education.

Prerequisites & Notes

NULL

Credits: 2

PEDU 3133 - THEORY/PRACTICE COACHING

A study in the theory and practice of the fundamental techniques, organizational problems, and strategy involved in athletic coaching.

Prerequisites & Notes

NULL

Credits: 3

PEDU 3223 - ADMINISTRATION OF P.E. & ATHLETICS

This course is designed to give individuals a sociological perspective on sports in society on the global level. It will examine politics, economics, education, the mass media, gender, race, and financial compensation as each relates to

sports.

Prerequisites & Notes

NULL

Credits: 3

PEDU 4003 - DESIGN/CONTENT OF TEACHING P.E.

This course focuses on principles of successful teaching including lesson plans, motivating students, learning communities, class organization & management, assessment, various models of teaching, role & philosophy of the physical educator & curriculum for teaching physical education.

Prerequisites & Notes

NULL

Credits: 3

SRMT 3203 - MENTAL HEALTH AND SPORT PSYCHOLOGY

This course is an introduction to the many facets of applied sport psychology, the mental aspects of sports, and the contemporary performance enhancement techniques utilized in sport psychology throughout the world. It includes the theory and practice of sport psychology with areas of the theoretical basis of mental aspects of training processes and competition, mental training techniques for psychomotor performance, and basic issues of performance psychology.

Prerequisites & Notes

SRMT 2103

Credits: 3

Other Programs

Bachelor of Science, Kinesiology: Pre-Athletic Training Four Year Plan

Year One

FALL SEMESTER - 14 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite:BIOL 1233

Credits: 1

Divine Design (3 Credit Hours)

SPRING SEMESTER - 14 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:
CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

KINS 2203 - INTRODUCTION TO KINESIOLOGY

This course is an introduction to the fundamental principles of human movement and their relationship to fitness and activity. The course will introduce the subdisciplines of Kinesiology including Sport Psychology, Motor Learning, Biomechanics, Exercise Physiology and Sport Pedagogy. The application of Kinesiology content will be discussed as it relates to professional development.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (6 Credit Hours)

Year Two

FALL SEMESTER - 16 Credit Hours

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

Divine Design (6 Credit Hours)

SPRING SEMESTER - 15 Credit Hours

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Credits: 3

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

KINS 4013 - KINESIOLOGY PRACTICUM I

A course designed to provide students with practical hands-on experience in the instruction of exercise technique in resistance training, plyometric training, aerobic and anaerobic training programs under the direction and supervision of the Kinesiology faculty.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

Divine Design (6 Credit Hours)

SPRING SEMESTER - 14 Credit Hours

KINS 4633 - ORTHOPEDIC EVAL. OF ATHL. INJURIES

This course is a study of principles and processes involved in the recognition, assessment, and orthopedic evaluation of athletic injuries. Application is made to sport and rehabilitation.

Prerequisites & Notes

Prerequisite: KINS 2203; KINS 4533

Credits: 3

KINS 4033 - CLINICAL KINESIOLOGY PRACTICUM II

This course provides the opportunity for Pre-PT, Pre-OT, and Pre-AT students to gain hands-on or observational experience required for their post-bachelors continued education. Students will be required to complete 70 hours with an industry professional in their chosen concentration. Students are responsible for securing their practicum location and for their own transportation to their practicum sites. This course will also prepare students for the application process for admittance into their chosen graduate program.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (6 Credit Hours)

Bachelor of Science, Kinesiology: Pre-Occupational Therapy Four Year Plan

Year One

FALL SEMESTER - 14 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite:BIOL 1233

Credits: 1

Divine Design (3 Credit Hours)

SPRING SEMESTER - 14 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:
CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

KINS 2203 - INTRODUCTION TO KINESIOLOGY

This course is an introduction to the fundamental principles of human movement and their relationship to fitness and activity. The course will introduce the subdisciplines of Kinesiology including Sport Psychology, Motor Learning, Biomechanics, Exercise Physiology and Sport Pedagogy. The application of Kinesiology content will be discussed as it relates to professional development.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (6 Credit Hours)

Year Two

FALL SEMESTER - 16 Credit Hours

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (3 Credit Hours)

SPRING SEMESTER - 15 Credit Hours

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

Divine Design (2 Credit Hours)

Year Three

FALL SEMESTER - 15 Credit Hours

KINS 3303 - APPLIED BIOMECHANICS

This course is the study of basic biomechanical principles and concepts and their application in the analysis of various human movements with emphasis on sport and exercise skills.

Prerequisites & Notes

Prerequisite: KINS 2203 (required); BIOL 2083 or BIOL 1333 (preferred)

Credits: 3

KINS 4013 - KINESIOLOGY PRACTICUM I

A course designed to provide students with practical hands-on experience in the instruction of exercise technique in resistance training, plyometric training, aerobic and anaerobic training programs under the direction and supervision of the Kinesiology faculty.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (6 Credit Hours)

SPRING SEMESTER - 15 Credit Hours

KINS 3123 - ADAPTIVE PHYSICAL EDUCATION

An analysis of the neuromuscular and perceptual motor development of individuals with limited abilities and a study of activities designed to improve their motor skills. An introduction to some special populations in the clinical setting will also be introduced.

Prerequisites & Notes

NULL

Credits: 3

KINS 4033 - CLINICAL KINESIOLOGY PRACTICUM II

This course provides the opportunity for Pre-PT, Pre-OT, and Pre-AT students to gain hands-on or observational experience required for their post-bachelors continued education. Students will be required to complete 70 hours with an industry professional in their chosen concentration. Students are responsible for securing their practicum location and for their own transportation to their practicum sites. This course will also prepare students for the application process for admittance into their chosen graduate program.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

Divine Design (9 Credit Hours)

Year Four

FALL SEMESTER - 15 Credit Hours

KINS 4203 - MOTOR CONTROL & LEARNING

This course is a study of the development of human motor performance by exploring theories of learning as they apply to the acquisition of gross motor skills.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

KINS 4403 - PHYSIOLOGY OF EXERCISE

This course investigates physiological mechanisms responsible for adaptations to acute and chronic exercise in the metabolic, endocrine, pulmonary, cardiovascular, and neuromuscular systems.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

Divine Design (9 Credit Hours)

SPRING SEMESTER - 16 Credit Hours

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

KINS 3403 - ENERGY SUPPLIES

This course addresses the nutrition needs of active people and athletes. Course topics include carbohydrate, protein, fat, vitamin, mineral, and water requirements for fitness and sport. Weight control, popular nutrition supplements, and ergogenic aids will also be reviewed.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

Divine Design (10 Credit Hours)

Mathematics

Dean

Aimee Franklin, Ph.D.

Dean, College of Natural and Health Sciences

Associate Professor of Science

Chair, Coordinators, & Faculty

Main Campus (Lakeland, FL)

Minor, Mathematics

Total of 18 Credit Hours

Required Courses - 11 Credit Hours

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

MATH 2244 - CALCULUS II

This course involves the study of antiderivatives, definite integrals, logarithmic, exponential and trigonometric functions.

Prerequisites & Notes

NULL

Credits: 4

Mathematic Electives - 7 Credit Hours

Select seven (7) hours from any mathematics courses 3000 level or higher.

MATH 2213 - DISCRETE MATHEMATICS

An introduction to topics in discrete mathematics including propositional and predicate logic, functions and sets, induction and other proof techniques, recurrences, and modular arithmetic.

Prerequisites & Notes

NULL

Credits: 3

MATH 3044 - CALCULUS III

This course focuses on integration, polar coordinates, vectors in space, indeterminate forms and proper integrals.

Prerequisites & Notes

NULL

Credits: 4

MATH 3123 - PROBABILITY

This course is an introduction to the study of randomness. Topics include discrete and continuous probability distributions, conditional probability, independence, combinatorial probability, expected value and variance, and laws of large numbers.

Prerequisites & Notes

NULL

Credits: 3

MATH 3133 - NUMBER THEORY

This course is a study of number theory including Euclid's algorithm, prime numbers, greatest common divisors, common multiples, prime factorization, congruence, diophantine problems, and quadratic residues.

Prerequisites & Notes

NULL

Credits: 3

MATH 3223 - STATISTICAL METHODS I

This course is a study of the theory and techniques of statistical analysis; random variables, discrete and continuous distributions, estimation, and statistical hypothesis testing.

Prerequisites & Notes

NULL

Credits: 3

MATH 3234 - LINEAR ALGEBRA

This course is a study of vector spaces, transformations, matrices, eigenvalues, and systems of linear equations.

Prerequisites & Notes

NULL

Credits: 4

MATH 3243 - HISTORY OF MATHEMATICS

This course surveys the history of mathematics from antiquity to modern mathematics, using assigned readings, problems, discussion, research topics and present results orally and in writing. Required for all mathematics majors, and those seeking to teach in middle or high school.

Prerequisites & Notes

NULL

Credits: 3

MATH 3333 - DIFFERENTIAL EQUATIONS

This course entails various methods for solving first order ordinary differential equations and higher order linear differential equations. Methods involving series solutions, the Laplace transform, and numerical procedures are introduced. Some applications modeled by first order or second order linear differential equations are considered.

Prerequisites & Notes

NULL

Credits: 3

MATH 3733 - MATHEMATICAL COMPUTING

This is designed to teach Application Development from a programming perspective. One of a variety of current languages is used based on the decision of the instructor, with approval from the department chair. The main purpose of this course is to teach students basic programming logic. Basic computer proficiency is required to take this course.

Prerequisites & Notes

NULL

Credits: 3

MATH 4073 - SPECIAL TOPICS IN MATHEMATICS

This course is intended to investigate specialized topics in mathematics not addressed by other courses. Content is determined by the department to address special needs or interests. The course may be repeated for a maximum of three times. The same topic may not be repeated.

Prerequisites & Notes

NULL

Credits: 3

MATH 4133 - ABSTRACT ALGEBRA

This course is a study of set theory, relations and functions, equivalence relations, integers, mathematical induction, elementary number theory, groups, rings, fields, and polynomials.

Prerequisites & Notes

NULL

Credits: 3

MATH 4243 - INTRODUCTION TO REAL ANALYSIS

This course is a study of the theory of Calculus. Topics will include basic topology, sequences, functions, limits, continuity, and differentiation.

Prerequisites & Notes

NULL

Credits: 3

MATH 4314 - INTRO TO ACTUARIAL MATHEMATICS

This course covers amount function, dollar-weighted and time-weighted rates, force interest; special annuity types, bonds, capitalization, and applications. Yield curves, spot rates, forward rates, duration, convexity, and immunization and additional financial concepts.

Prerequisites & Notes

MATH 2244

Credits: 4

MATH 4423 - STATISTICAL METHODS II

This course combines statistical methods with practical applications and computer software. Statistical models such as principles of linear models, simple and multiple linear regression, analysis of variance for basic designs, multiple comparisons, random effects, and analysis of covariance are studied. The statistical models are studied in context of actual data sets using statistical software.

Prerequisites & Notes

NULL

Credits: 3

MATH 4432 - ACTUARIAL APPLICATIONS

To gain an understanding of the basic principles and methods of mathematical statistics, and to obtain experience in applying these principles to practical applications. This course will cover topics covered on the P and FM exams of the SOA for actuary. This course may be taken twice.

Prerequisites & Notes

NULL

Credits: 2

Bachelor of Science, Mathematics

Bachelor of Science, Mathematics - Start Year (Even) - Four Year Plan

Bachelor of Science, Mathematics - Start Year (Odd) - Four Year Plan

Total Program Hours- 120 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - Select One (1) of the following with Lab (4 Credit Hours):

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry - 3 Credit Hours**MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS**

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select Two (2) of the Following (6 Credit Hours):**HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY**

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 49 Credit Hours

Mathematics Major Core - 43 Credit Hours

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

MATH 2213 - DISCRETE MATHEMATICS

An introduction to topics in discrete mathematics including propositional and predicate logic, functions and sets, induction and other proof techniques, recurrences, and modular arithmetic.

Prerequisites & Notes

NULL

Credits: 3

MATH 2244 - CALCULUS II

This course involves the study of antiderivatives, definite integrals, logarithmic, exponential and trigonometric functions.

Prerequisites & Notes

NULL

Credits: 4

MATH 3044 - CALCULUS III

This course focuses on integration, polar coordinates, vectors in space, indeterminate forms and proper integrals.

Prerequisites & Notes

NULL

Credits: 4

MATH 3123 - PROBABILITY

This course is an introduction to the study of randomness. Topics include discrete and continuous probability distributions, conditional probability, independence, combinatorial probability, expected value and variance, and laws of large numbers.

Prerequisites & Notes

NULL

Credits: 3

MATH 3133 - NUMBER THEORY

This course is a study of number theory including Euclid's algorithm, prime numbers, greatest common divisors, common multiples, prime factorization, congruence, diophantine problems, and quadratic residues.

Prerequisites & Notes

NULL

Credits: 3

MATH 3234 - LINEAR ALGEBRA

This course is a study of vector spaces, transformations, matrices, eigenvalues, and systems of linear equations.

Prerequisites & Notes

NULL

Credits: 4

MATH 3243 - HISTORY OF MATHEMATICS

This course surveys the history of mathematics from antiquity to modern mathematics, using assigned readings, problems, discussion, research topics and present results orally and in writing. Required for all mathematics majors,

and those seeking to teach in middle or high school.

Prerequisites & Notes

NULL

Credits: 3

MATH 3333 - DIFFERENTIAL EQUATIONS

This course entails various methods for solving first order ordinary differential equations and higher order linear differential equations. Methods involving series solutions, the Laplace transform, and numerical procedures are introduced. Some applications modeled by first order or second order linear differential equations are considered.

Prerequisites & Notes

NULL

Credits: 3

MATH 3733 - MATHEMATICAL COMPUTING

This is designed to teach Application Development from a programming perspective. One of a variety of current languages is used based on the decision of the instructor, with approval from the department chair. The main purpose of this course is to teach students basic programming logic. Basic computer proficiency is required to take this course.

Prerequisites & Notes

NULL

Credits: 3

MATH 4133 - ABSTRACT ALGEBRA

This course is a study of set theory, relations and functions, equivalence relations, integers, mathematical induction, elementary number theory, groups, rings, fields, and polynomials.

Prerequisites & Notes

NULL

Credits: 3

MATH 4243 - INTRODUCTION TO REAL ANALYSIS

This course is a study of the theory of Calculus. Topics will include basic topology, sequences, functions, limits, continuity, and differentiation.

Prerequisites & Notes

NULL

Credits: 3

MATH 4443 - MATHEMATICS CAPSTONE

This course is designed to provide opportunities for the pure mathematics major to consolidate their mathematical knowledge; to obtain a perspective on the meaning and significance of that knowledge.

Prerequisites & Notes

NULL

Credits: 3

Note:

1. Students must complete MATH 2144 (Calculus I), MATH 2224 (Calculus II), and MATH 2213 (Discrete Mathematics) with a grade of C minus (C-) or higher to continue as a math major.
2. Students must complete all major coursework with a grade of C minus (C-) or higher at Southeastern University or elsewhere.
3. To graduate as a math major at Southeastern University, students must maintain a cumulative GPA of 2.0 in all major courses.

Mathematics Electives - 6 Credit Hours

MATH 3223 - STATISTICAL METHODS I

This course is a study of the theory and techniques of statistical analysis; random variables, discrete and continuous distributions, estimation, and statistical hypothesis testing.

Prerequisites & Notes

NULL

Credits: 3

MATH 4314 - INTRO TO ACTUARIAL MATHEMATICS

This course covers amount function, dollar-weighted and time-weighted rates, force interest; special annuity types, bonds, capitalization, and applications. Yield curves, spot rates, forward rates, duration, convexity, and immunization and additional financial concepts.

Prerequisites & Notes

MATH 2244

Credits: 4

MATH 4423 - STATISTICAL METHODS II

This course combines statistical methods with practical applications and computer software. Statistical models such as principles of linear models, simple and multiple linear regression, analysis of variance for basic designs, multiple comparisons, random effects, and analysis of covariance are studied. The statistical models are studied in context of actual data sets using statistical software.

Prerequisites & Notes

NULL

Credits: 3

MATH 4073 - SPECIAL TOPICS IN MATHEMATICS

This course is intended to investigate specialized topics in mathematics not addressed by other courses. Content is determined by the department to address special needs or interests. The course may be repeated for a maximum of three times. The same topic may not be repeated.

Prerequisites & Notes

NULL

Credits: 3

Divine Design - 37 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Bachelor of Science, Mathematics: Actuarial

Bachelor of Science, Mathematics: Actuarial Four Year Plan (Begin Even Year)

Bachelor of Science, Mathematics: Actuarial Four Year Plan (Begin Odd Year)

Total Program Hours - 120 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:
CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:
CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - Select One (1) of the following with Lab (4 Credit Hours):

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an

introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry - 3 Credit Hours

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select Two (2) of the Following (6 Credit Hours):

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 60 Credit Hours

Math Core - 42 Credit Hours

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

MATH 2213 - DISCRETE MATHEMATICS

An introduction to topics in discrete mathematics including propositional and predicate logic, functions and sets, induction and other proof techniques, recurrences, and modular arithmetic.

Prerequisites & Notes

NULL

Credits: 3

MATH 2244 - CALCULUS II

This course involves the study of antiderivatives, definite integrals, logarithmic, exponential and trigonometric functions.

Prerequisites & Notes

NULL

Credits: 4

MATH 3044 - CALCULUS III

This course focuses on integration, polar coordinates, vectors in space, indeterminate forms and proper integrals.

Prerequisites & Notes

NULL

Credits: 4

MATH 3123 - PROBABILITY

This course is an introduction to the study of randomness. Topics include discrete and continuous probability distributions, conditional probability, independence, combinatorial probability, expected value and variance, and laws of large numbers.

Prerequisites & Notes

NULL

Credits: 3

MATH 3223 - STATISTICAL METHODS I

This course is a study of the theory and techniques of statistical analysis; random variables, discrete and continuous distributions, estimation, and statistical hypothesis testing.

Prerequisites & Notes

NULL

Credits: 3

MATH 3234 - LINEAR ALGEBRA

This course is a study of vector spaces, transformations, matrices, eigenvalues, and systems of linear equations.

Prerequisites & Notes

NULL

Credits: 4

MATH 3733 - MATHEMATICAL COMPUTING

This is designed to teach Application Development from a programming perspective. One of a variety of current languages is used based on the decision of the instructor, with approval from the department chair. The main purpose of this course is to teach students basic programming logic. Basic computer proficiency is required to take this course.

Prerequisites & Notes

NULL

Credits: 3

MATH 4314 - INTRO TO ACTUARIAL MATHEMATICS

This course covers amount function, dollar-weighted and time-weighted rates, force interest; special annuity types, bonds, capitalization, and applications. Yield curves, spot rates, forward rates, duration, convexity, and immunization and additional financial concepts.

Prerequisites & Notes

MATH 2244

Credits: 4

MATH 4423 - STATISTICAL METHODS II

This course combines statistical methods with practical applications and computer software. Statistical models such as principles of linear models, simple and multiple linear regression, analysis of variance for basic designs, multiple comparisons, random effects, and analysis of covariance are studied. The statistical models are studied in context of actual data sets using statistical software.

Prerequisites & Notes

NULL

Credits: 3

MATH 4432 - ACTUARIAL APPLICATIONS

To gain an understanding of the basic principles and methods of mathematical statistics, and to obtain experience in applying these principles to practical applications. This course will cover topics covered on the P and FM exams of the

SOA for actuary. This course may be taken twice.

Prerequisites & Notes

NULL

Credits: 2

*Cumulative Course: Required to take twice for a total of 4 credit hours.

MATH 4453 - ACTUARIAL SCIENCE CAPSTONE

This course intended for to enhance student competencies in by applying advanced statistical methodology to the challenges imposed by real data. Additionally, develop effective writing skills to effectively communicate project requirements and findings. Students will be exposed to several aspects of statistical practices including elements of statistical consulting, study design, setting project goals and deliverables, applying appropriate methodology, performing accurate analyses, and providing clear and concise explanations of results.

Prerequisites & Notes

NULL

Credits: 3

Note:

1. Students must complete MATH 2144 (Calculus I), MATH 2224 (Calculus II), and MATH 2213 (Discrete Mathematics) with a grade of C minus (C-) or higher to continue as a math major.
2. Students must complete all major coursework with a grade of C minus (C-) or higher at Southeastern University or elsewhere.
3. To graduate as a math major at Southeastern University, students must maintain a cumulative GPA of 2.0 in all major courses.

Business Core - 18 Credit Hours

BUSI 2103 - MACROECONOMICS

This course will cover basic concepts of supply and demand, production possibilities, the circular flow concept and related topics of GDP, inflation, and employment/unemployment, fiscal and monetary policy, and the workings of the monetary system.

*Do not register for this course if you have taken BBUS 2103

Prerequisites & Notes

None

Credits: 3

BUSI 2203 - MICROECONOMICS

This survey course develops the concepts of individual economic units, such as households, firms, and industries. In this study, topics will include economic behaviors relating to spending, saving, investment, labor economics, and

prices.

Prerequisites & Notes

None

Credits: 3

BUSI 2133 - PRINCIPLES OF FINANCIAL ACCOUNTING

This course provides an introduction to financial accounting and basic accounting statements. Focus is on business records, the collection of financial data, the development of statements and the interpretation of this information. Extensive work is done on quantitative problem solving.

Prerequisites & Notes

None

Credits: 3

BUSI 2233 - PRINCIPLES OF MANAGERIAL ACCOUNTING

As a survey and examination of the fundamental cycles and operations of managerial accounting this course includes analysis, interpretation and application of financial principles for organizational decision-making. Relevant information relating to cost/volume/profit analysis and capital budgeting are key concepts covered.

Prerequisites & Notes

BUSI 2133

Credits: 3

BUSI 3103 - PRINCIPLES OF FINANCE

This course covers financial organization and the principles and practices of decision making involving acquiring and allocating capital, dividend policy, operating and financial leverage, financial markets and related topics.

Prerequisites & Notes

BUSI 2233

Credits: 3

CTIS 2133 - DATA MANAGEMENT ANALYSIS

This course uses raw data in spreadsheets and databases to produce actionable information to drive management decisions. The course will focus on the data management resources available in standard spreadsheet and database packages.

Prerequisites & Notes

NULL

Credits: 3

Divine Design - 26 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Other Programs

Bachelor of Science, Mathematics - Start Year (Even) - Four Year Plan

Year One

FALL SEMESTER - 15 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

Natural-Scientific Inquiry - Select One with Lab:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

SPRING SEMESTER - 15 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

MATH 2244 - CALCULUS II

This course involves the study of antiderivatives, definite integrals, logarithmic, exponential and trigonometric functions.

Prerequisites & Notes

NULL

Credits: 4

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Year Two

FALL SEMESTER - 15 Credit Hours

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

MATH 2213 - DISCRETE MATHEMATICS

An introduction to topics in discrete mathematics including propositional and predicate logic, functions and sets, induction and other proof techniques, recurrences, and modular arithmetic.

Prerequisites & Notes

NULL

Credits: 3

MATH 3123 - PROBABILITY

This course is an introduction to the study of randomness. Topics include discrete and continuous probability distributions, conditional probability, independence, combinatorial probability, expected value and variance, and laws of large numbers.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

SPRING SEMESTER - 15 Credit Hours

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

MATH 3223 - STATISTICAL METHODS I

This course is a study of the theory and techniques of statistical analysis; random variables, discrete and continuous distributions, estimation, and statistical hypothesis testing.

Prerequisites & Notes

NULL

Credits: 3

MATH 4133 - ABSTRACT ALGEBRA

This course is a study of set theory, relations and functions, equivalence relations, integers, mathematical induction, elementary number theory, groups, rings, fields, and polynomials.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (6 Credit Hours)

Year Three

FALL SEMESTER - 16 Credit Hours

MATH 3044 - CALCULUS III

This course focuses on integration, polar coordinates, vectors in space, indeterminate forms and proper integrals.

Prerequisites & Notes

NULL

Credits: 4

MATH 3133 - NUMBER THEORY

This course is a study of number theory including Euclid's algorithm, prime numbers, greatest common divisors, common multiples, prime factorization, congruence, diophantine problems, and quadratic residues.

Prerequisites & Notes

NULL

Credits: 3

MATH 4423 - STATISTICAL METHODS II

This course combines statistical methods with practical applications and computer software. Statistical models such as principles of linear models, simple and multiple linear regression, analysis of variance for basic designs, multiple comparisons, random effects, and analysis of covariance are studied. The statistical models are studied in context of actual data sets using statistical software.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (6 Credit Hours)

SPRING SEMESTER - 15 Credit Hours

MATH 3333 - DIFFERENTIAL EQUATIONS

This course entails various methods for solving first order ordinary differential equations and higher order linear differential equations. Methods involving series solutions, the Laplace transform, and numerical procedures are introduced. Some applications modeled by first order or second order linear differential equations are considered.

Prerequisites & Notes

NULL

Credits: 3

MATH 4243 - INTRODUCTION TO REAL ANALYSIS

This course is a study of the theory of Calculus. Topics will include basic topology, sequences, functions, limits, continuity, and differentiation.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (9 Credit Hours)

Year Four

FALL SEMESTER - 16 Credit Hours

MATH 3234 - LINEAR ALGEBRA

This course is a study of vector spaces, transformations, matrices, eigenvalues, and systems of linear equations.

Prerequisites & Notes

NULL

Credits: 4

MATH 3243 - HISTORY OF MATHEMATICS

This course surveys the history of mathematics from antiquity to modern mathematics, using assigned readings, problems, discussion, research topics and present results orally and in writing. Required for all mathematics majors, and those seeking to teach in middle or high school.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (9 Credit Hours)

SPRING SEMESTER - 13 Credit Hours

MATH 3733 - MATHEMATICAL COMPUTING

This is designed to teach Application Development from a programming perspective. One of a variety of current languages is used based on the decision of the instructor, with approval from the department chair. The main purpose of this course is to teach students basic programming logic. Basic computer proficiency is required to take this course.

Prerequisites & Notes

NULL

Credits: 3

MATH 4453 - ACTUARIAL SCIENCE CAPSTONE

This course intended for to enhance student competencies in by applying advanced statistical methodology to the challenges imposed by real data. Additionally, develop effective writing skills to effectively communicate project requirements and findings. Students will be exposed to several aspects of statistical practices including elements of statistical consulting, study design, setting project goals and deliverables, applying appropriate methodology, performing accurate analyses, and providing clear and concise explanations of results.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (7 Credit Hours)

Bachelor of Science, Mathematics - Start Year (Odd) - Four Year Plan

Year One

FALL SEMESTER - 15 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

Natural-Scientific Inquiry - Select One:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

SPRING SEMESTER - 15 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of

inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:
CORE 1111

Credits: 2

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

MATH 2244 - CALCULUS II

This course involves the study of antiderivatives, definite integrals, logarithmic, exponential and trigonometric functions.

Prerequisites & Notes

NULL

Credits: 4

MATH 3733 - MATHEMATICAL COMPUTING

This is designed to teach Application Development from a programming perspective. One of a variety of current languages is used based on the decision of the instructor, with approval from the department chair. The main purpose of this course is to teach students basic programming logic. Basic computer proficiency is required to take this course.

Prerequisites & Notes

NULL

Credits: 3

Year Two

FALL SEMESTER - 16 Credit Hours

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

MATH 2213 - DISCRETE MATHEMATICS

An introduction to topics in discrete mathematics including propositional and predicate logic, functions and sets, induction and other proof techniques, recurrences, and modular arithmetic.

Prerequisites & Notes

NULL

Credits: 3

MATH 3044 - CALCULUS III

This course focuses on integration, polar coordinates, vectors in space, indeterminate forms and proper integrals.

Prerequisites & Notes

NULL

Credits: 4

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

SPRING SEMESTER - 15 Credit Hours

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

MATH 3333 - DIFFERENTIAL EQUATIONS

This course entails various methods for solving first order ordinary differential equations and higher order linear differential equations. Methods involving series solutions, the Laplace transform, and numerical procedures are introduced. Some applications modeled by first order or second order linear differential equations are considered.

Prerequisites & Notes

NULL

Credits: 3

MATH 4243 - INTRODUCTION TO REAL ANALYSIS

This course is a study of the theory of Calculus. Topics will include basic topology, sequences, functions, limits, continuity, and differentiation.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (3 Credit Hours)

Year Three

FALL SEMESTER - 16 Credit Hours

MATH 3234 - LINEAR ALGEBRA

This course is a study of vector spaces, transformations, matrices, eigenvalues, and systems of linear equations.

Prerequisites & Notes

NULL

Credits: 4

MATH 3243 - HISTORY OF MATHEMATICS

This course surveys the history of mathematics from antiquity to modern mathematics, using assigned readings, problems, discussion, research topics and present results orally and in writing. Required for all mathematics majors, and those seeking to teach in middle or high school.

Prerequisites & Notes

NULL

Credits: 3

MATH 3123 - PROBABILITY

This course is an introduction to the study of randomness. Topics include discrete and continuous probability distributions, conditional probability, independence, combinatorial probability, expected value and variance, and laws of large numbers.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (6 Credit Hours)

SPRING SEMESTER - 15 Credit Hours

MATH 3223 - STATISTICAL METHODS I

This course is a study of the theory and techniques of statistical analysis; random variables, discrete and continuous distributions, estimation, and statistical hypothesis testing.

Prerequisites & Notes

NULL

Credits: 3

MATH 4133 - ABSTRACT ALGEBRA

This course is a study of set theory, relations and functions, equivalence relations, integers, mathematical induction, elementary number theory, groups, rings, fields, and polynomials.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (9 Credit Hours)

Year Four

FALL SEMESTER - 15 Credit Hours

MATH 3133 - NUMBER THEORY

This course is a study of number theory including Euclid's algorithm, prime numbers, greatest common divisors, common multiples, prime factorization, congruence, diophantine problems, and quadratic residues.

Prerequisites & Notes

NULL

Credits: 3

MATH 4423 - STATISTICAL METHODS II

This course combines statistical methods with practical applications and computer software. Statistical models such as principles of linear models, simple and multiple linear regression, analysis of variance for basic designs, multiple comparisons, random effects, and analysis of covariance are studied. The statistical models are studied in context of actual data sets using statistical software.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (9 Credit Hours)

SPRING SEMESTER - 13 Credit Hours

MATH 4453 - ACTUARIAL SCIENCE CAPSTONE

This course intended for to enhance student competencies in by applying advanced statistical methodology to the challenges imposed by real data. Additionally, develop effective writing skills to effectively communicate project requirements and findings. Students will be exposed to several aspects of statistical practices including elements of statistical consulting, study design, setting project goals and deliverables, applying appropriate methodology, performing accurate analyses, and providing clear and concise explanations of results.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (10 Credit Hours)

Bachelor of Science, Mathematics: Actuarial Four Year Plan (Begin Even Year)

Year One

FALL SEMESTER - 15 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

Natural-Scientific Inquiry - Select One:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students

engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

SPRING SEMESTER - 15 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

MATH 2244 - CALCULUS II

This course involves the study of antiderivatives, definite integrals, logarithmic, exponential and trigonometric functions.

Prerequisites & Notes

NULL

Credits: 4

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Year Two

FALL SEMESTER - 15 Credit Hours

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

MATH 2213 - DISCRETE MATHEMATICS

An introduction to topics in discrete mathematics including propositional and predicate logic, functions and sets, induction and other proof techniques, recurrences, and modular arithmetic.

Prerequisites & Notes

NULL

Credits: 3

MATH 3123 - PROBABILITY

This course is an introduction to the study of randomness. Topics include discrete and continuous probability distributions, conditional probability, independence, combinatorial probability, expected value and variance, and laws of large numbers.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

Business Core Elective - Select One:

BUSI 2103 - MACROECONOMICS

This course will cover basic concepts of supply and demand, production possibilities, the circular flow concept and related topics of GDP, inflation, and employment/unemployment, fiscal and monetary policy, and the workings of the monetary system.

*Do not register for this course if you have taken BBUS 2103

Prerequisites & Notes

None

Credits: 3

BUSI 2133 - PRINCIPLES OF FINANCIAL ACCOUNTING

This course provides an introduction to financial accounting and basic accounting statements. Focus is on business records, the collection of financial data, the development of statements and the interpretation of this information. Extensive work is done on quantitative problem solving.

Prerequisites & Notes

None

Credits: 3

BUSI 2203 - MICROECONOMICS

This survey course develops the concepts of individual economic units, such as households, firms, and industries. In this study, topics will include economic behaviors relating to spending, saving, investment, labor economics, and

prices.

Prerequisites & Notes

None

Credits: 3

BUSI 2233 - PRINCIPLES OF MANAGERIAL ACCOUNTING

As a survey and examination of the fundamental cycles and operations of managerial accounting this course includes analysis, interpretation and application of financial principles for organizational decision-making. Relevant information relating to cost/volume/profit analysis and capital budgeting are key concepts covered.

Prerequisites & Notes

BUSI 2133

Credits: 3

BUSI 3103 - PRINCIPLES OF FINANCE

This course covers financial organization and the principles and practices of decision making involving acquiring and allocating capital, dividend policy, operating and financial leverage, financial markets and related topics.

Prerequisites & Notes

BUSI 2233

Credits: 3

CTIS 2133 - DATA MANAGEMENT ANALYSIS

This course uses raw data in spreadsheets and databases to produce actionable information to drive management decisions. The course will focus on the data management resources available in standard spreadsheet and database packages.

Prerequisites & Notes

NULL

Credits: 3

SPRING SEMESTER - 15 Credit Hours

MATH 3223 - STATISTICAL METHODS I

This course is a study of the theory and techniques of statistical analysis; random variables, discrete and continuous distributions, estimation, and statistical hypothesis testing.

Prerequisites & Notes

NULL

Credits: 3

MATH 3733 - MATHEMATICAL COMPUTING

This is designed to teach Application Development from a programming perspective. One of a variety of current languages is used based on the decision of the instructor, with approval from the department chair. The main purpose of this course is to teach students basic programming logic. Basic computer proficiency is required to take this course.

Prerequisites & Notes

NULL

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

NULL

Credits: 3

Year Three

FALL SEMESTER - 14 Credit Hours

MATH 3044 - CALCULUS III

This course focuses on integration, polar coordinates, vectors in space, indeterminate forms and proper integrals.

Prerequisites & Notes

NULL

Credits: 4

MATH 4314 - INTRO TO ACTUARIAL MATHEMATICS

This course covers amount function, dollar-weighted and time-weighted rates, force interest; special annuity types, bonds, capitalization, and applications. Yield curves, spot rates, forward rates, duration, convexity, and immunization and additional financial concepts.

Prerequisites & Notes

MATH 2244

Credits: 4

MATH 4423 - STATISTICAL METHODS II

This course combines statistical methods with practical applications and computer software. Statistical models such as principles of linear models, simple and multiple linear regression, analysis of variance for basic designs, multiple comparisons, random effects, and analysis of covariance are studied. The statistical models are studied in context of actual data sets using statistical software.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (3 Credit Hours)

SPRING SEMESTER - 14 Credit Hours

MATH 4432 - ACTUARIAL APPLICATIONS

To gain an understanding of the basic principles and methods of mathematical statistics, and to obtain experience in applying these principles to practical applications. This course will cover topics covered on the P and FM exams of the SOA for actuary. This course may be taken twice.

Prerequisites & Notes

NULL

Credits: 2

Business Core Elective - Select Two:

BUSI 2103 - MACROECONOMICS

This course will cover basic concepts of supply and demand, production possibilities, the circular flow concept and related topics of GDP, inflation, and employment/unemployment, fiscal and monetary policy, and the workings of the monetary system.

*Do not register for this course if you have taken BBUS 2103

*Do not register for this course if you have taken BBUS 2103

Prerequisites & Notes

None

Credits: 3

BUSI 2133 - PRINCIPLES OF FINANCIAL ACCOUNTING

This course provides an introduction to financial accounting and basic accounting statements. Focus is on business records, the collection of financial data, the development of statements and the interpretation of this information. Extensive work is done on quantitative problem solving.

Prerequisites & Notes

None

Credits: 3

BUSI 2203 - MICROECONOMICS

This survey course develops the concepts of individual economic units, such as households, firms, and industries. In this study, topics will include economic behaviors relating to spending, saving, investment, labor economics, and prices.

Prerequisites & Notes

None

Credits: 3

BUSI 2233 - PRINCIPLES OF MANAGERIAL ACCOUNTING

As a survey and examination of the fundamental cycles and operations of managerial accounting this course includes analysis, interpretation and application of financial principles for organizational decision-making. Relevant information relating to cost/volume/profit analysis and capital budgeting are key concepts covered.

Prerequisites & Notes

BUSI 2133

Credits: 3

BUSI 3103 - PRINCIPLES OF FINANCE

This course covers financial organization and the principles and practices of decision making involving acquiring and allocating capital, dividend policy, operating and financial leverage, financial markets and related topics.

Prerequisites & Notes

BUSI 2233

Credits: 3

CTIS 2133 - DATA MANAGEMENT ANALYSIS

This course uses raw data in spreadsheets and databases to produce actionable information to drive management decisions. The course will focus on the data management resources available in standard spreadsheet and database packages.

Prerequisites & Notes

NULL

Credits: 3

Bachelor of Science, Mathematics: Actuarial Four Year Plan (Begin Odd Year)

Year One

FALL SEMESTER - 15 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

Natural-Scientific Inquiry - Select One with Lab:**NSCI 1023 - INTRO TO SCIENCE AND TECH**

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

SPRING SEMESTER - 15 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

MATH 2244 - CALCULUS II

This course involves the study of antiderivatives, definite integrals, logarithmic, exponential and trigonometric functions.

Prerequisites & Notes

NULL

Credits: 4

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Year Two

FALL SEMESTER - 14 Credit Hours

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

MATH 2213 - DISCRETE MATHEMATICS

An introduction to topics in discrete mathematics including propositional and predicate logic, functions and sets, induction and other proof techniques, recurrences, and modular arithmetic.

Prerequisites & Notes

NULL

Credits: 3

MATH 3044 - CALCULUS III

This course focuses on integration, polar coordinates, vectors in space, indeterminate forms and proper integrals.

Prerequisites & Notes

NULL

Credits: 4

MATH 4314 - INTRO TO ACTUARIAL MATHEMATICS

This course covers amount function, dollar-weighted and time-weighted rates, force interest; special annuity types, bonds, capitalization, and applications. Yield curves, spot rates, forward rates, duration, convexity, and immunization and additional financial concepts.

Prerequisites & Notes

MATH 2244

Credits: 4

SPRING SEMESTER - 17 Credit Hours

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

MATH 4432 - ACTUARIAL APPLICATIONS

To gain an understanding of the basic principles and methods of mathematical statistics, and to obtain experience in applying these principles to practical applications. This course will cover topics covered on the P and FM exams of the SOA for actuary. This course may be taken twice.

Prerequisites & Notes

NULL

Credits: 2

Business Core Elective - Select One:

BUSI 2103 - MACROECONOMICS

This course will cover basic concepts of supply and demand, production possibilities, the circular flow concept and related topics of GDP, inflation, and employment/unemployment, fiscal and monetary policy, and the workings of the monetary system.

*Do not register for this course if you have taken BBUS 2103

Prerequisites & Notes

None

Credits: 3

BUSI 2133 - PRINCIPLES OF FINANCIAL ACCOUNTING

This course provides an introduction to financial accounting and basic accounting statements. Focus is on business records, the collection of financial data, the development of statements and the interpretation of this information. Extensive work is done on quantitative problem solving.

Prerequisites & Notes

None

Credits: 3

BUSI 2203 - MICROECONOMICS

This survey course develops the concepts of individual economic units, such as households, firms, and industries. In this study, topics will include economic behaviors relating to spending, saving, investment, labor economics, and prices.

Prerequisites & Notes

None

Credits: 3

BUSI 2233 - PRINCIPLES OF MANAGERIAL ACCOUNTING

As a survey and examination of the fundamental cycles and operations of managerial accounting this course includes analysis, interpretation and application of financial principles for organizational decision-making. Relevant information relating to cost/volume/profit analysis and capital budgeting are key concepts covered.

Prerequisites & Notes

BUSI 2133

Credits: 3

BUSI 3103 - PRINCIPLES OF FINANCE

This course covers financial organization and the principles and practices of decision making involving acquiring and allocating capital, dividend policy, operating and financial leverage, financial markets and related topics.

Prerequisites & Notes

BUSI 2233

Credits: 3

CTIS 2133 - DATA MANAGEMENT ANALYSIS

This course uses raw data in spreadsheets and databases to produce actionable information to drive management decisions. The course will focus on the data management resources available in standard spreadsheet and database packages.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

Divine Design (3 Credit Hours)

Year Three

FALL SEMESTER - 16 Credit Hours

MATH 3123 - PROBABILITY

This course is an introduction to the study of randomness. Topics include discrete and continuous probability distributions, conditional probability, independence, combinatorial probability, expected value and variance, and laws of large numbers.

Prerequisites & Notes

NULL

Credits: 3

MATH 3234 - LINEAR ALGEBRA

This course is a study of vector spaces, transformations, matrices, eigenvalues, and systems of linear equations.

Prerequisites & Notes

NULL

Credits: 4

Business Core Elective - Select One:

BUSI 2103 - MACROECONOMICS

This course will cover basic concepts of supply and demand, production possibilities, the circular flow concept and related topics of GDP, inflation, and employment/unemployment, fiscal and monetary policy, and the workings of the monetary system.

*Do not register for this course if you have taken BBUS 2103

Prerequisites & Notes

None

Credits: 3

BUSI 2133 - PRINCIPLES OF FINANCIAL ACCOUNTING

This course provides an introduction to financial accounting and basic accounting statements. Focus is on business records, the collection of financial data, the development of statements and the interpretation of this information. Extensive work is done on quantitative problem solving.

Prerequisites & Notes

None

Credits: 3

BUSI 2203 - MICROECONOMICS

This survey course develops the concepts of individual economic units, such as households, firms, and industries. In this study, topics will include economic behaviors relating to spending, saving, investment, labor economics, and prices.

Prerequisites & Notes

None

Credits: 3

BUSI 2233 - PRINCIPLES OF MANAGERIAL ACCOUNTING

As a survey and examination of the fundamental cycles and operations of managerial accounting this course includes analysis, interpretation and application of financial principles for organizational decision-making. Relevant information relating to cost/volume/profit analysis and capital budgeting are key concepts covered.

Prerequisites & Notes

BUSI 2133

Credits: 3

BUSI 3103 - PRINCIPLES OF FINANCE

This course covers financial organization and the principles and practices of decision making involving acquiring and allocating capital, dividend policy, operating and financial leverage, financial markets and related topics.

Prerequisites & Notes

BUSI 2233

Credits: 3

CTIS 2133 - DATA MANAGEMENT ANALYSIS

This course uses raw data in spreadsheets and databases to produce actionable information to drive management decisions. The course will focus on the data management resources available in standard spreadsheet and database packages.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (6 Credit Hours)

SPRING SEMESTER - 14 Credit Hours

MATH 3223 - STATISTICAL METHODS I

This course is a study of the theory and techniques of statistical analysis; random variables, discrete and continuous distributions, estimation, and statistical hypothesis testing.

Prerequisites & Notes

NULL

Credits: 3

MATH 3733 - MATHEMATICAL COMPUTING

This is designed to teach Application Development from a programming perspective. One of a variety of current languages is used based on the decision of the instructor, with approval from the department chair. The main purpose of this course is to teach students basic programming logic. Basic computer proficiency is required to take this course.

Prerequisites & Notes

NULL

Credits: 3

MATH 4432 - ACTUARIAL APPLICATIONS

To gain an understanding of the basic principles and methods of mathematical statistics, and to obtain experience in applying these principles to practical applications. This course will cover topics covered on the P and FM exams of the SOA for actuary. This course may be taken twice.

Credits: 3

BUSI 2233 - PRINCIPLES OF MANAGERIAL ACCOUNTING

As a survey and examination of the fundamental cycles and operations of managerial accounting this course includes analysis, interpretation and application of financial principles for organizational decision-making. Relevant information relating to cost/volume/profit analysis and capital budgeting are key concepts covered.

Prerequisites & Notes

BUSI 2133

Credits: 3

BUSI 3103 - PRINCIPLES OF FINANCE

This course covers financial organization and the principles and practices of decision making involving acquiring and allocating capital, dividend policy, operating and financial leverage, financial markets and related topics.

Prerequisites & Notes

BUSI 2233

Credits: 3

CTIS 2133 - DATA MANAGEMENT ANALYSIS

This course uses raw data in spreadsheets and databases to produce actionable information to drive management decisions. The course will focus on the data management resources available in standard spreadsheet and database packages.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (3 Credit Hours)

Year Four

FALL SEMESTER - 15 Credit Hours

MATH 4423 - STATISTICAL METHODS II

This course combines statistical methods with practical applications and computer software. Statistical models such as principles of linear models, simple and multiple linear regression, analysis of variance for basic designs, multiple comparisons, random effects, and analysis of covariance are studied. The statistical models are studied in context of actual data sets using statistical software.

Prerequisites & Notes

NULL

Credits: 3

Business Core Elective - Select Two:

BUSI 2103 - MACROECONOMICS

This course will cover basic concepts of supply and demand, production possibilities, the circular flow concept and related topics of GDP, inflation, and employment/unemployment, fiscal and monetary policy, and the workings of the monetary system.

*Do not register for this course if you have taken BBUS 2103

Credits: 3

CTIS 2133 - DATA MANAGEMENT ANALYSIS

This course uses raw data in spreadsheets and databases to produce actionable information to drive management decisions. The course will focus on the data management resources available in standard spreadsheet and database packages.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (6 Credit Hours)

SPRING SEMESTER - 14 Credit Hours

MATH 4453 - ACTUARIAL SCIENCE CAPSTONE

This course intended for to enhance student competencies in by applying advanced statistical methodology to the challenges imposed by real data. Additionally, develop effective writing skills to effectively communicate project requirements and findings. Students will be exposed to several aspects of statistical practices including elements of statistical consulting, study design, setting project goals and deliverables, applying appropriate methodology, performing accurate analyses, and providing clear and concise explanations of results.

Prerequisites & Notes

NULL

Credits: 3

Business Core Elective - Select One:

BUSI 2103 - MACROECONOMICS

This course will cover basic concepts of supply and demand, production possibilities, the circular flow concept and related topics of GDP, inflation, and employment/unemployment, fiscal and monetary policy, and the workings of the monetary system.

Bachelor of Science, Biochemistry

Bachelor of Science, Biochemistry Four Year Plan

Department of Natural Sciences Guidelines and Policies:

1. A student who has accumulated more than one (1) grade below a B minus (including grades of WF) in the course sequence BIOL 1233, BIOL 1243, CHEM 1533 and CHEM 1633 at Southeastern University or elsewhere, whether repeated or not, will not be permitted to continue in that major.
2. A student who does not complete MATH 2144 Calculus I by the end of the Freshman year (2nd semester) with a grade of B minus or higher at Southeastern University or elsewhere, whether repeated or not, will not be permitted to continue in the major.
3. A student who has accumulated three (3) or more grades below C minus (including grades of WF) in any of the following Math courses (MATH 2144, MATH 2244) or Chemistry courses (CHEM 1533, CHEM 1633, CHEM 2133 or CHEM 2143) taken for college credit at Southeastern University or elsewhere, whether repeated or not, will not be permitted to continue in the major.

*Courses count toward Foundational Core

Total Program Hours - 120 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite: BIOL 1233

Credits: 1

Quantitative Inquiry - 3 Credit Hours

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select Two (2) of the Following (6 Credit Hours):

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 71 Credit Hours

Pre-Biology Core - 20 Credit Hours

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L

Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

MATH 2244 - CALCULUS II

This course involves the study of antiderivatives, definite integrals, logarithmic, exponential and trigonometric functions.

Prerequisites & Notes

NULL

Credits: 4

Biology Core - 10 Credit Hours

BIOL 2533 - GENERAL GENETICS

This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243, BIOL 124L

Corequisite:

BIOL 253L

Credits: 3

BIOL 253L - GENERAL GENETICS LAB

This course is the laboratory to accompany BIOL 2533. It is designed as an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243

BIOL 124L

Corequisite:

BIOL 2533

Credits: 1

BIOL 2633 - CELL & MOLECULAR BIOLOGY

This course is an in-depth study of the structure and molecular functions of a composite cell. The anatomy and physiology of the cell will be covered.

Prerequisites & Notes

Prerequisite: BIOL 1233, BIOL 123L

Credits: 3

BIOL 2113 - BIOETHICS

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: **BIOL 1243 or BIOL 2183**

Credits: 3

Chemistry and Physics Core - 29 Credit Hours

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

PHYS 2633 - GENERAL PHYSICS II

This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: PHYS 2533

Credits: 3

PHYS 263L - GENERAL PHYSICS II LAB

Laboratory to accompany PHYS 2633.

Prerequisites & Notes

NULL

Credits: 1

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L & MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods.

Prerequisites & Notes

Prerequisite:

CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

CHEM 3153 - PHYSICAL CHEMISTRY

This course is a study of the basic physical principles of chemical processes. This is a math-intensive course. This course will focus on thermodynamics, roles of energy in determining molecular structure and reactivity, and kinetics. Moreover, quantum mechanics are used to connect the microscopic, molecular level to the bulk properties of substances.

Prerequisites & Notes

Prerequisites: CHEM 1633 & MATH 2144

Credits: 3

CHEM 315L - PHYSICAL CHEMISTRY LAB

This is the laboratory course to accompany CHEM 3153 with an emphasis on experimental work employing physicochemical techniques to study thermodynamics, chemical kinetics, quantum mechanics, and spectroscopy with applications to investigate biological systems and processes.

Prerequisites & Notes

Prerequisite:

CHEM 1633

MATH 2144

Corequisite:

CHEM 3153

Credits: 1

CHEM 3353 - BIOCHEMISTRY I

This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Prerequisites & Notes

Prerequisite: CHEM 2133 & MATH 2144

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

Biochemistry Specialization - Minimum 12 Credit Hours

(MUST INCLUDE 9 CREDIT HOURS OF CHEMISTRY)

* Students may enroll for two different special topics courses for a total of 6 hours only to count toward the required 12 hours of Biochemistry specialization.

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:
BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:
BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

BIOL 4433 - DIAGNOSTIC CLINICAL FOUNDATIONS

This course will mainly utilize Problem-based learning, or PBL, as its pedagogical practice. This practice is employed in many medical and graduate programs. While there are variants of the technique, the approach includes the presentation of a clinical case or vignette to a small group of students who engage in discussion and problem solving over several class meetings. The professor will act as a facilitator who only provides supportive guidance for the students. The discussion of the problem is structured to enable students to create conceptual models to explain the multidisciplinary problem presented in the case. As students reveal the limits of their knowledge, they identify learning issues. Between classes, students research their learning issues and share results at the next class session.

Prerequisites & Notes

Prerequisite:
BIOL 2083

BIOL 2183

BIOL 3703

Credits: 3

CHEM 3033 - ANALYTICAL CHEMISTRY

An overview of quantitative and qualitative chemical analysis; classical methods of gravimetric and volumetric analysis, concepts of acid-base theory, titrations, precipitation and complex formation, redox chemistry and statistical treatment of data. Introduces basic principles of modern electrochemical behavior, spectroscopic, and chromatographic analysis.

Prerequisites & Notes

Prerequisite: CHEM 1633

Credits: 3

CHEM 303L - ANALYTICAL CHEMISTRY LAB

This is a laboratory course to accompany CHEM 3033 - Analytical Chemistry.

Prerequisites & Notes

Prerequisite: CHEM 1633

Credits: 1

CHEM 3203 - ENZYMOLOGY

This course is an introduction to the basic principles of enzymology including structure, reactivity, kinetics, and reaction mechanisms.

Prerequisites & Notes

Prerequisite: CHEM 2133 & CHEM 3353

Credits: 3

CHEM 3323 - INSTRUMENTAL METHODS ANALYSIS

Theory and application of instrumental methods of quantitative and qualitative analyses with emphasis on electrolytic, optical and chromatographic techniques using a combination of problem-based learning approaches, case studies and traditional lectures. The student will develop critical thinking skills in the areas of instrument selection and method development and data interpretation.

Prerequisites & Notes

Prerequisite: CHEM 1633 & CHEM 2133 (preferred)

Corequisite: CHEM 332L or Department Chair approval

Credits: 3

CHEM 332L - INSTRUMENTAL METHODS ANALYSIS LAB

This course is a laboratory course designed to accompany CHEM 3323. Emphasis is placed on separation methods such as chromatography along with spectroscopy. Instrumental techniques, as well as identification and quantitation using ultraviolet, visible, infrared, and nuclear magnetic resonance spectroscopies, electrophoresis, mass spectrometry, GC, HPLC, atomic absorption, and other instrumentation, may also be explored.

Prerequisites & Notes

Prerequisite:
CHEM 3033

CHEM 303L

Corequisite:

CHEM 3323

Credits: 1

CHEM 4103 - CHEMISTRY OF CANCER

This course is a study of the chemical concepts of carcinogenesis. In addition, this course examines the causes of cancer, the chemistry of approved anti-cancer drugs, mechanisms of interaction with the body, side effects, classifications of drugs, and environmental carcinogens. The roles of important biomolecules, such as lipids, proteins, carbohydrates, and nucleic acids, in carcinogenesis will be discussed as well as the repair mechanisms employed at a molecular level to combat nucleic acid damage and unregulated cell growth.

Prerequisites & Notes

Prerequisites: CHEM 2133

Credits: 3

CHEM 4223 - NEUROCHEMISTRY

This course is a study into the chemical and biochemical concepts of neurotransmitters in neuroscience. The roles of metals; small molecules; and important biomolecules, such as lipids, proteins, carbohydrates, and nucleic acids; in neuroscience will be discussed as well as the pathologies of tauopathy, amyloid genesis, aggregation, and neurological/neuromuscular disorders with respect to mechanisms and treatments. The biochemical basis of neuroactive drugs, toxins, and diseases will be discussed. In addition, perceptive insights into the complex fields of drug abuse, compulsive behaviors, addiction, treatment, recovery, and prevention will also be addressed.

Prerequisites & Notes

Prerequisite: CHEM 2133

Credits: 3

CHEM 4423 - MEDICINAL CHEMISTRY

This course is an introduction to the field of medicinal chemistry with a special focus on methods of drug design, synthesis, structure-activity relationships, and modes of action. In addition, it will acquaint students with modern applications of chemical techniques in the development of drug candidates to cure diseases based on the modulation of current drug targets, including proteins, nucleic acids, and other receptor-based functionalities. Focuses on structure-activity relationships, pharmacokinetics, and pharmacodynamics.

Prerequisites & Notes

Prerequisite: CHEM 2133

Credits: 3

CHEM 4433 - INORGANIC & BIOINORGANIC CHEMISTRY

A theoretical introduction to the concepts of chemical systems of inorganic chemistry with particular emphasis on the roles in biochemistry. Topics may include, atomic structure, nuclear chemistry, molecular symmetry, chemical periodicity, descriptive chemistry of the elements, simple bonding models, solids, metals & coordination chemistry, crystal field theory, ligand substitution reactions, electron transfer reactions, reaction mechanism, factors affecting chemical activity and select applications to the subfield of bioinorganic chemistry.

Prerequisites & Notes

Prerequisite: CHEM 1633

Credits: 3

BIOL 4633 - SPECIAL TOPICS IN BIOLOGY

This course is a seminar for the investigation of specialized topics in biology not addressed by other courses. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

To be determined according to topic

Credits: 3

BIOL 4653 - SPECIAL TOPICS IN BIOLOGY III

This course is a seminar for the investigation of specialized topics in biology not addressed by other courses. Content is determined by the department to address special needs or interests. This course may be repeated for a maximum of six hours. The same topic may not be repeated.

Prerequisites & Notes

To be determined according to topic

Credits: 3

CHEM 4003 - CURRENT TOPICS IN CHEMISTRY I

This course is an in-depth look at recent developments in one of the main areas of chemistry. The particular topic will vary by semester. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

Prerequisite: To be determined according to topic

Credits: 3

CHEM 4013 - CURRENT TOPICS IN CHEMISTRY II

This course is an in-depth look at recent developments in one of the main areas of chemistry. The particular topic will vary by semester. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

Prerequisite: To be determined according to topic

Credits: 3

CHEM 4023 - CURRENT TOPICS IN CHEMISTRY III

This course is an in-depth look at recent developments in one of the main areas of chemistry. The particular topic will vary by semester. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

Prerequisite: To be determined according to topic

Credits: 3

Divine Design- 15 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

BIOL 4023 - BIOLOGY FIELD STUDY

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a qualified off-site supervisor, who provides continuous evaluation of the intern's performance.

Prerequisites & Notes

Approval by department chair

Credits: 1-3

BIOL 4033 - RESEARCH RESIDENCY PROGRAM

This course is intended to provide a practical experience in clinical research at an inpatient setting for one full semester, approved by the department chair, and spearheaded by a qualified off-site supervisor who provides continuous evaluation of the intern's performance. This course will help establish the concepts that guide a successful research design. Furthermore, this course will expose students to the various opportunities of growth found within a large regional medical center.

Prerequisites & Notes

Prerequisite or corequisite: CHEM 3353

Credits: 3

BIOL 4373 - RESEARCH IN BIOLOGICAL SCIENCES

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Approval by Department Chair

Credits: 1-3 Variable

CHEM 4373 - RESEARCH IN CHEMISTRY

This course is a practical experience in chemical research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Prerequisite: Approval by Department Chair

Credits: 3

Bachelor of Science, Biology: Dentistry

Biology Majors-Academic Policies

Bachelor of Science, Biology: Dentistry Four Year Plan A

Bachelor of Science, Biology: Dentistry Four Year Plan B

Department of Natural Sciences Guidelines and Policies:

1. Students are required to earn a grade of "C-" or better in all Biology, Chemistry, Math, and Physics courses.
2. Students must complete all of the Pre-Biology Core courses at Southeastern University or elsewhere with a C minus or higher to continue in this major.
3. A student who does not complete MATH 2144 Calculus I by the end of the Sophomore year (4th semester) with a grade of C minus or higher at Southeastern University or elsewhere, whether repeated or not, will not be permitted to continue in the major.
4. A student who has accumulated three (3) or more grades below C minus (including grades of WF) in any of the following Math courses (MATH 1414, MATH 2023, MATH 2144, or MATH 2244) or Chemistry courses (CHEM 1533, CHEM 1633, CHEM 2133 or CHEM 2134) taken for college credit at Southeastern University or elsewhere will not be permitted to continue in the major.

*Courses count toward Foundational Core

Total Program Hours - 120 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite: BIOL 1233

Credits: 1

Quantitative Inquiry - 3 Credit Hours

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select Two (2) of the Following (6 Credit Hours):

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 71 Credit Hours

Pre-Biology Core - 16 Credit Hours

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L

Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

Biology Core - 29 Credit Hours

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

BIOL 2113 - BIOETHICS

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: **BIOL 1243 or BIOL 2183**

Credits: 3

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

BIOL 2533 - GENERAL GENETICS

This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243, BIOL 124L

Corequisite:

BIOL 253L

Credits: 3

BIOL 253L - GENERAL GENETICS LAB

This course is the laboratory to accompany BIOL 2533. It is designed as an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243

BIOL 124L

Corequisite:

BIOL 2533

Credits: 1

BIOL 2633 - CELL & MOLECULAR BIOLOGY

This course is an in-depth study of the structure and molecular functions of a composite cell. The anatomy and physiology of the cell will be covered.

Prerequisites & Notes

Prerequisite: BIOL 1233, BIOL 123L

Credits: 3

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:
BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 4903 - SENIOR CAPSTONE COURSE

Students will be required to propose a scientific research study related to the chosen concentration using the knowledge gained through the respective degree programs. This course is designed to review the student portfolio which will be developed over the course of obtaining the General Biology or Biology degree. Culmination of the student's degree will require completion of all items listed in the requirements for the student portfolio, including completion of research papers, presentations, and demonstration of knowledge of specific concepts in Chemistry, Biology, and Physics.

Prerequisites & Notes

Prerequisite: BIOL 2633 , BIOL 2533 , BIOL 253L , CHEM 2143 , CHEM 214L , MATH 2144

Credits: 3

Chemistry and Physics Core - 21 Credit Hours

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

PHYS 2633 - GENERAL PHYSICS II

This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: PHYS 2533

Credits: 3

PHYS 263L - GENERAL PHYSICS II LAB

Laboratory to accompany PHYS 2633.

Prerequisites & Notes

NULL

Credits: 1

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L & MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods.

Prerequisites & Notes

Prerequisite:

CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

CHEM 3353 - BIOCHEMISTRY I

This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Prerequisites & Notes

Prerequisite: CHEM 2133 & MATH 2144

Credits: 3

Concentration in Dentistry - Minimum 5 Credit Hours

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

* Students may enroll for one Special Topics Course for a total of 3 hours only to count toward the required 5 hours of Dentistry Concentration.

NSCI 2433 - ANIMAL DIVERSITY

This course introduces foundational principles of zoology, including taxonomy, animal biology, architecture and ecology. Emphasis will be placed on the survey of invertebrate and vertebrate biodiversity.

Prerequisites & Notes

Corequisite: NSCI 243L

Credits: 3

NSCI 243L - ANIMAL DIVERSITY LAB

This course is a laboratory to accompany NSCI 2433.

Prerequisites & Notes

Corequisite: NSCI 2433

Credits: 1

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

BIOL 4633 - SPECIAL TOPICS IN BIOLOGY

This course is a seminar for the investigation of specialized topics in biology not addressed by other courses. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

To be determined according to topic

Credits: 3

BIOL 4653 - SPECIAL TOPICS IN BIOLOGY III

This course is a seminar for the investigation of specialized topics in biology not addressed by other courses. Content is determined by the department to address special needs or interests. This course may be repeated for a maximum of six hours. The same topic may not be repeated.

Prerequisites & Notes

To be determined according to topic

Credits: 3

CHEM 4003 - CURRENT TOPICS IN CHEMISTRY I

This course is an in-depth look at recent developments in one of the main areas of chemistry. The particular topic will vary by semester. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

Prerequisite: To be determined according to topic

Credits: 3

CHEM 4013 - CURRENT TOPICS IN CHEMISTRY II

This course is an in-depth look at recent developments in one of the main areas of chemistry. The particular topic will vary by semester. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

Prerequisite: To be determined according to topic

Credits: 3

CHEM 4023 - CURRENT TOPICS IN CHEMISTRY III

This course is an in-depth look at recent developments in one of the main areas of chemistry. The particular topic will vary by semester. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

Prerequisite: To be determined according to topic

Credits: 3

Divine Design- 15 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

BIOL 4373 - RESEARCH IN BIOLOGICAL SCIENCES

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Approval by Department Chair

Credits: 1-3 Variable

BIOL 4033 - RESEARCH RESIDENCY PROGRAM

This course is intended to provide a practical experience in clinical research at an inpatient setting for one full semester, approved by the department chair, and spearheaded by a qualified off-site supervisor who provides continuous evaluation of the intern's performance. This course will help establish the concepts that guide a successful research design. Furthermore, this course will expose students to the various opportunities of growth found within a large regional medical center.

Prerequisites & Notes

Prerequisite or corequisite: CHEM 3353

Credits: 3

CHEM 4373 - RESEARCH IN CHEMISTRY

This course is a practical experience in chemical research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Prerequisite: Approval by Department Chair

Credits: 3

BIOL 4023 - BIOLOGY FIELD STUDY

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a qualified off-site supervisor, who provides continuous evaluation of the intern's performance.

Prerequisites & Notes

Approval by department chair

Credits: 1-3

Bachelor of Science, Biology: Medical Sciences

Biology Majors-Academic Policies

Bachelor of Science, Biology: Medical Sciences 4 Year Plan A

Bachelor of Science, Biology: Medical Sciences 4 Year Plan B

Department of Natural Sciences Guidelines and Policies:

1. Students are required to earn a grade of "C-" or better in all Biology, Chemistry, Math, and Physics courses.
2. Students must complete all of the Pre-Biology Core courses at Southeastern University or elsewhere with a C minus or higher to continue in this major.
3. A student who does not complete MATH 2144 Calculus I by the end of the Sophomore year (4th semester) with a grade of C minus or higher at Southeastern University or elsewhere, whether repeated or not, will not be permitted to continue in the major.
4. A student who has accumulated three (3) or more grades below C minus (including grades of WF) in any of the following Math courses (MATH 1414, MATH 2023, MATH 2144, or MATH 2244) or Chemistry courses (CHEM 1533, CHEM 1633, CHEM 2133 or CHEM 2134) taken for college credit at Southeastern University or elsewhere will not be permitted to continue in the major.

*Courses count toward Foundational Core

Total Program - 120 Credit Hours**Foundational Core - 34 Credit Hours****SEU Foundations - 3 Credit Hours****CORE 1111 - COMMUNITY AND COLLEGE SUCCESS**

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite: BIOL 1233

Credits: 1

Quantitative Inquiry - 3 Credit Hours

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select Two (2) of the Following (6 Credit Hours):

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

*Recommended by AMCAS for those taking the MCAT exam

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

*Recommended by AMCAS for those taking the MCAT exam

CREATIVE-AESTHETIC INQUIRY - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 71 Credit Hours

Pre-Biology Core - 16 Credit Hours

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L

Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

Biology Core - 21 Credit Hours

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

BIOL 2113 - BIOETHICS

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: **BIOL 1243** or **BIOL 2183**

Credits: 3

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

BIOL 2533 - GENERAL GENETICS

This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243, BIOL 124L

Corequisite:

BIOL 253L

Credits: 3

BIOL 253L - GENERAL GENETICS LAB

This course is the laboratory to accompany BIOL 2533. It is designed as an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243

BIOL 124L

Corequisite:

BIOL 2533

Credits: 1

BIOL 2633 - CELL & MOLECULAR BIOLOGY

This course is an in-depth study of the structure and molecular functions of a composite cell. The anatomy and physiology of the cell will be covered.

Prerequisites & Notes

Prerequisite: BIOL 1233, BIOL 123L

Credits: 3

BIOL 4903 - SENIOR CAPSTONE COURSE

Students will be required to propose a scientific research study related to the chosen concentration using the knowledge gained through the respective degree programs. This course is designed to review the student portfolio which will be developed over the course of obtaining the General Biology or Biology degree. Culmination of the student's degree will require completion of all items listed in the requirements for the student portfolio, including completion of research papers, presentations, and demonstration of knowledge of specific concepts in Chemistry, Biology, and Physics.

Prerequisites & Notes

Prerequisite: BIOL 2633 , BIOL 2533 , BIOL 253L , CHEM 2143 , CHEM 214L , MATH 2144

Credits: 3

Chemistry and Physics Core - 21 Credit Hours

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

PHYS 2633 - GENERAL PHYSICS II

This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: PHYS 2533

Credits: 3

PHYS 263L - GENERAL PHYSICS II LAB

Laboratory to accompany PHYS 2633.

Prerequisites & Notes

NULL

Credits: 1

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L & MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods.

Prerequisites & Notes

Prerequisite:

CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

CHEM 3353 - BIOCHEMISTRY I

This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Prerequisites & Notes

Prerequisite: CHEM 2133 & MATH 2144

Credits: 3

Concentration in Medical Sciences - Minimum 13 Credit Hours

(MUST INCLUDE 2 COURSES WITH LABS)

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

* Students may enroll for one Special Topics Course for a total of 3 hours only to count toward the required 13 hours of Medical Science Concentration.

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

BIOL 4433 - DIAGNOSTIC CLINICAL FOUNDATIONS

This course will mainly utilize Problem-based learning, or PBL, as its pedagogical practice. This practice is employed in many medical and graduate programs. While there are variants of the technique, the approach includes the presentation of a clinical case or vignette to a small group of students who engage in discussion and problem solving over several class meetings. The professor will act as a facilitator who only provides supportive guidance for the students. The discussion of the problem is structured to enable students to create conceptual models to explain the multidisciplinary problem presented in the case. As students reveal the limits of their knowledge, they identify learning issues. Between classes, students research their learning issues and share results at the next class session.

Prerequisites & Notes

Prerequisite:

BIOL 2083

BIOL 2183

BIOL 3703

Credits: 3

CHEM 4423 - MEDICINAL CHEMISTRY

This course is an introduction to the field of medicinal chemistry with a special focus on methods of drug design, synthesis, structure-activity relationships, and modes of action. In addition, it will acquaint students with modern applications of chemical techniques in the development of drug candidates to cure diseases based on the modulation of

current drug targets, including proteins, nucleic acids, and other receptor-based functionalities. Focuses on structure-activity relationships, pharmacokinetics, and pharmacodynamics.

Prerequisites & Notes

Prerequisite: CHEM 2133

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

Recommended by AMCAS for those taking the MCAT exam

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

Recommended by AMCAS for those taking the MCAT exam

BIOL 4633 - SPECIAL TOPICS IN BIOLOGY

This course is a seminar for the investigation of specialized topics in biology not addressed by other courses. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

To be determined according to topic

Credits: 3

BIOL 4653 - SPECIAL TOPICS IN BIOLOGY III

This course is a seminar for the investigation of specialized topics in biology not addressed by other courses. Content is determined by the department to address special needs or interests. This course may be repeated for a maximum of six hours. The same topic may not be repeated.

Prerequisites & Notes

To be determined according to topic

Credits: 3

CHEM 4003 - CURRENT TOPICS IN CHEMISTRY I

This course is an in-depth look at recent developments in one of the main areas of chemistry. The particular topic will vary by semester. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

Prerequisite: To be determined according to topic

Credits: 3

CHEM 4013 - CURRENT TOPICS IN CHEMISTRY II

This course is an in-depth look at recent developments in one of the main areas of chemistry. The particular topic will vary by semester. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

Prerequisite: To be determined according to topic

Credits: 3

CHEM 4023 - CURRENT TOPICS IN CHEMISTRY III

This course is an in-depth look at recent developments in one of the main areas of chemistry. The particular topic will vary by semester. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

Prerequisite: To be determined according to topic

Credits: 3

Divine Design- 15 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

BIOL 4033 - RESEARCH RESIDENCY PROGRAM

This course is intended to provide a practical experience in clinical research at an inpatient setting for one full semester, approved by the department chair, and spearheaded by a qualified off-site supervisor who provides continuous evaluation of the intern's performance. This course will help establish the concepts that guide a successful research design. Furthermore, this course will expose students to the various opportunities of growth found within a large regional medical center.

Prerequisites & Notes

Prerequisite or corequisite: CHEM 3353

Credits: 3

BIOL 4023 - BIOLOGY FIELD STUDY

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a qualified off-site supervisor, who provides continuous evaluation of the intern's performance.

Prerequisites & Notes

Approval by department chair

Credits: 1-3

CHEM 4373 - RESEARCH IN CHEMISTRY

This course is a practical experience in chemical research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Prerequisite: Approval by Department Chair

Credits: 3

BIOL 4373 - RESEARCH IN BIOLOGICAL SCIENCES

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Approval by Department Chair

Credits: 1-3 Variable

Bachelor of Science, Biology: Pharmacy

Biology Majors-Academic Policies

Bachelor of Science, Biology: Pharmacy Four Year Plan A

Bachelor of Science, Biology: Pharmacy Four Year Plan B

Department of Natural Sciences Guidelines and Policies:

1. Students are required to earn a grade of "C-" or better in all Biology, Chemistry, Math, and Physics courses.
2. Students must complete all of the Pre-Biology Core courses at Southeastern University or elsewhere with a C minus or higher to continue in this major.

3. A student who does not complete MATH 2144 Calculus I by the end of the Sophomore year (4th semester) with a grade of C minus or higher at Southeastern University or elsewhere, whether repeated or not, will not be permitted to continue in the major.

4. A student who has accumulated three (3) or more grades below C minus (including grades of WF) in any of the following Math courses (MATH 1414, MATH 2023, MATH 2144, or MATH 2244) or Chemistry courses (CHEM 1533, CHEM 1633, CHEM 2133 or CHEM 2134) taken for college credit at Southeastern University or elsewhere will not be permitted to continue in the major.

*Courses count toward Foundational Core

Total Program Hours - 120 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite:BIOL 1233

Credits: 1

Quantitative Inquiry - 3 Credit Hours**MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS**

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select Two (2) of the Following (6 Credit Hours):**HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY**

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders,

and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 71 Credit Hours

Pre-Biology Core - 16 Credit Hours

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L

Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

Biology Core - 31 Credit Hours

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite: BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

BIOL 2113 - BIOETHICS

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: **BIOL 1243 or BIOL 2183**

Credits: 3

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

BIOL 2533 - GENERAL GENETICS

This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243, BIOL 124L

Corequisite:

BIOL 253L

Credits: 3

BIOL 253L - GENERAL GENETICS LAB

This course is the laboratory to accompany BIOL 2533. It is designed as an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243

BIOL 124L

Corequisite:

BIOL 2533

Credits: 1

BIOL 2633 - CELL & MOLECULAR BIOLOGY

This course is an in-depth study of the structure and molecular functions of a composite cell. The anatomy and physiology of the cell will be covered.

Prerequisites & Notes

Prerequisite: BIOL 1233, BIOL 123L

Credits: 3

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4903 - SENIOR CAPSTONE COURSE

Students will be required to propose a scientific research study related to the chosen concentration using the knowledge gained through the respective degree programs. This course is designed to review the student portfolio which will be developed over the course of obtaining the General Biology or Biology degree. Culmination of the student's degree will require completion of all items listed in the requirements for the student portfolio, including completion of research papers, presentations, and demonstration of knowledge of specific concepts in Chemistry, Biology, and Physics.

Prerequisites & Notes

Prerequisite: BIOL 2633 , BIOL 2533 , BIOL 253L , CHEM 2143 , CHEM 214L , MATH 2144

Credits: 3

Chemistry and Physics Core - 18 Credit Hours

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

PHYS 2633 - GENERAL PHYSICS II

This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: PHYS 2533

Credits: 3

PHYS 263L - GENERAL PHYSICS II LAB

Laboratory to accompany PHYS 2633.

Prerequisites & Notes

NULL

Credits: 1

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L & MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods.

Prerequisites & Notes

Prerequisite:

CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

Concentration in Pharmacy - Minimum 6 Credit Hours

* Students may enroll for one Special Topics Course for a total of 3 hours only to count toward the required 6 hours of pharmacy concentration.

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

CHEM 3353 - BIOCHEMISTRY I

This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Prerequisites & Notes

Prerequisite: CHEM 2133 & MATH 2144

Credits: 3

CHEM 4423 - MEDICINAL CHEMISTRY

This course is an introduction to the field of medicinal chemistry with a special focus on methods of drug design, synthesis, structure-activity relationships, and modes of action. In addition, it will acquaint students with modern applications of chemical techniques in the development of drug candidates to cure diseases based on the modulation of current drug targets, including proteins, nucleic acids, and other receptor-based functionalities. Focuses on structure-activity relationships, pharmacokinetics, and pharmacodynamics.

Prerequisites & Notes

Prerequisite: CHEM 2133

Credits: 3

BIOL 4633 - SPECIAL TOPICS IN BIOLOGY

This course is a seminar for the investigation of specialized topics in biology not addressed by other courses. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

To be determined according to topic

Credits: 3

BIOL 4653 - SPECIAL TOPICS IN BIOLOGY III

This course is a seminar for the investigation of specialized topics in biology not addressed by other courses. Content is determined by the department to address special needs or interests. This course may be repeated for a maximum of six hours. The same topic may not be repeated.

Prerequisites & Notes

To be determined according to topic

Credits: 3

CHEM 4003 - CURRENT TOPICS IN CHEMISTRY I

This course is an in-depth look at recent developments in one of the main areas of chemistry. The particular topic will vary by semester. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

Prerequisite: To be determined according to topic

Credits: 3

CHEM 4013 - CURRENT TOPICS IN CHEMISTRY II

This course is an in-depth look at recent developments in one of the main areas of chemistry. The particular topic will vary by semester. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

Prerequisite: To be determined according to topic

Credits: 3

This course is an in-depth look at recent developments in one of the main areas of chemistry. The particular topic will vary by semester. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

Prerequisite: To be determined according to topic

Credits: 3

Divine Design- 15 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not

satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

BIOL 4033 - RESEARCH RESIDENCY PROGRAM

This course is intended to provide a practical experience in clinical research at an inpatient setting for one full semester, approved by the department chair, and spearheaded by a qualified off-site supervisor who provides continuous evaluation of the intern's performance. This course will help establish the concepts that guide a successful research design. Furthermore, this course will expose students to the various opportunities of growth found within a large regional medical center.

Prerequisites & Notes

Prerequisite or corequisite: CHEM 3353

Credits: 3

BIOL 4373 - RESEARCH IN BIOLOGICAL SCIENCES

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Approval by Department Chair

Credits: 1-3 Variable

CHEM 4373 - RESEARCH IN CHEMISTRY

This course is a practical experience in chemical research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Prerequisite: Approval by Department Chair

Credits: 3

BIOL 4023 - BIOLOGY FIELD STUDY

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a qualified off-site supervisor, who provides continuous evaluation of the intern's performance.

Prerequisites & Notes

Approval by department chair

Credits: 1-3

Bachelor of Science, Biology: Veterinary Medicine

Biology Majors-Academic Policies

Bachelor of Science, Biology: Veterinary Medicine Four Year Plan A

Bachelor of Science, Biology: Veterinary Medicine Four Year Plan B

Department of Natural Sciences Guidelines and Policies:

1. Students are required to earn a grade of "C-" or better in all Biology, Chemistry, Math, and Physics courses.
2. Students must complete all of the Pre-Biology Core courses at Southeastern University or elsewhere with a C minus or higher to continue in this major.
3. A student who does not complete MATH 2144 Calculus I by the end of the Sophomore year (4th semester) with a grade of C minus or higher at Southeastern University or elsewhere, whether repeated or not, will not be permitted to continue in the major.
4. A student who has accumulated three (3) or more grades below C minus (including grades of WF) in any of the following Math courses (MATH 1414, MATH 2023, MATH 2144, or MATH 2244) or Chemistry courses (CHEM 1533, CHEM 1633, CHEM 2133 or CHEM 2134) taken for college credit at Southeastern University or elsewhere will not be permitted to continue in the major.

*Courses count toward Foundational Core

Total Program Hours - 120 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite: BIOL 1233

Credits: 1

Quantitative Inquiry - 3 Credit Hours

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select Two (2) of the Following (6 Credit Hours):

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 71 Credit Hours

Pre-Biology Core - 16 Credit Hours

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:
BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam
Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L
Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

Biology Core - 25 Credit Hours

(MUST INCLUDE 2 COURSES WITH LABS)

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

NSCI 2433 - ANIMAL DIVERSITY

This course introduces foundational principles of zoology, including taxonomy, animal biology, architecture and ecology. Emphasis will be placed on the survey of invertebrate and vertebrate biodiversity.

Prerequisites & Notes

Corequisite: NSCI 243L

Credits: 3

NSCI 243L - ANIMAL DIVERSITY LAB

This course is a laboratory to accompany NSCI 2433.

Prerequisites & Notes

Corequisite: NSCI 2433

Credits: 1

BIOL 2113 - BIOETHICS

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: **BIOL 1243 or BIOL 2183**

Credits: 3

BIOL 2533 - GENERAL GENETICS

This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243, BIOL 124L

Corequisite:

BIOL 253L

Credits: 3

BIOL 253L - GENERAL GENETICS LAB

This course is the laboratory to accompany BIOL 2533. It is designed as an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243

BIOL 124L

Corequisite:

BIOL 2533

Credits: 1

BIOL 2633 - CELL & MOLECULAR BIOLOGY

This course is an in-depth study of the structure and molecular functions of a composite cell. The anatomy and physiology of the cell will be covered.

Prerequisites & Notes

Prerequisite: BIOL 1233, BIOL 123L

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMENTAL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4903 - SENIOR CAPSTONE COURSE

Students will be required to propose a scientific research study related to the chosen concentration using the knowledge gained through the respective degree programs. This course is designed to review the student portfolio which will be developed over the course of obtaining the General Biology or Biology degree. Culmination of the student's degree will require completion of all items listed in the requirements for the student portfolio, including completion of research papers, presentations, and demonstration of knowledge of specific concepts in Chemistry, Biology, and Physics.

Prerequisites & Notes

Prerequisite: BIOL 2633 , BIOL 2533 , BIOL 253L , CHEM 2143 , CHEM 214L , MATH 2144

Credits: 3

Chemistry and Physics Core - 21 Credit Hours

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

PHYS 2633 - GENERAL PHYSICS II

This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: PHYS 2533

Credits: 3

PHYS 263L - GENERAL PHYSICS II LAB

Laboratory to accompany PHYS 2633.

Prerequisites & Notes

NULL

Credits: 1

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L & MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods.

Prerequisites & Notes

Prerequisite:

CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

CHEM 3353 - BIOCHEMISTRY I

This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Prerequisites & Notes

Prerequisite: CHEM 2133 & MATH 2144

Credits: 3

Concentration in Veterinary Medicine Core - Minimum 9 Credit Hours

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

* Students may enroll for one Special Topics Course for a total of 3 hours only to count toward the required 9 hours of veterinary Concentration.

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

NSCI 3003 - ANIMAL PHYS. AND MOL. BIOLOGY

This course reviews and investigates the fundamental molecular processes and mechanisms that regulate the functions of various organ systems of animals (emphasis on vertebrates) to maintain homeostasis.

Prerequisites & Notes

Prerequisite: BIOL 1243 or NSCI 2433

Credits: 3

NSCI 3403 - AVIAN BIOLOGY (ORNITHOLOGY)

This course introduces the biology, ecology, and conservation of birds with a particular emphasis on Florida's avifauna.

Prerequisites & Notes

NULL

Credits: 3

NSCI 340L - AVIAN BIOLOGY (ORNITHOLOGY) LAB

This is a laboratory course to accompany NSCI 3403.

Prerequisites & Notes

Corequisite: NSCI 3403

Credits: 1

BIOL 4633 - SPECIAL TOPICS IN BIOLOGY

This course is a seminar for the investigation of specialized topics in biology not addressed by other courses. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

To be determined according to topic

Credits: 3

BIOL 4653 - SPECIAL TOPICS IN BIOLOGY III

This course is a seminar for the investigation of specialized topics in biology not addressed by other courses. Content is determined by the department to address special needs or interests. This course may be repeated for a maximum of six hours. The same topic may not be repeated.

Prerequisites & Notes

To be determined according to topic

Credits: 3

CHEM 4003 - CURRENT TOPICS IN CHEMISTRY I

This course is an in-depth look at recent developments in one of the main areas of chemistry. The particular topic will vary by semester. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

Prerequisite: To be determined according to topic

Credits: 3

CHEM 4013 - CURRENT TOPICS IN CHEMISTRY II

This course is an in-depth look at recent developments in one of the main areas of chemistry. The particular topic will vary by semester. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

Prerequisite: To be determined according to topic

Credits: 3

CHEM 4023 - CURRENT TOPICS IN CHEMISTRY III

This course is an in-depth look at recent developments in one of the main areas of chemistry. The particular topic will vary by semester. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

Prerequisite: To be determined according to topic

Credits: 3

Divine Design - 15 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

NSCI 4403 - SCIENCE FIELD STUDY I

This course provides the student supervised work/research experience in a setting relevant to the major area of study but outside the department and university.

Prerequisites & Notes

Prerequisite: Faculty Advisor or Department Chair Approval

Credits: 1-3

NSCI 4413 - SCIENCE FIELD STUDY II

This course provides the student supervised work/research experience in a setting relevant to the major area of study but outside the department and university.

Prerequisites & Notes

Prerequisite: Faculty Advisor or Department Chair Approval

Credits: 1-3

BIOL 4373 - RESEARCH IN BIOLOGICAL SCIENCES

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Approval by Department Chair

Credits: 1-3 Variable

BIOL 4023 - BIOLOGY FIELD STUDY

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a qualified off-site supervisor, who provides continuous evaluation of the intern's performance.

Prerequisites & Notes

Approval by department chair

Credits: 1-3

CHEM 4373 - RESEARCH IN CHEMISTRY

This course is a practical experience in chemical research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Prerequisite: Approval by Department Chair

Credits: 3

Bachelor of Science, Communication Sciences & Disorders

Bachelor of Science, Communication Sciences & Disorders Four Year Plan

Department of Natural Sciences Guidelines and Policies:

120 hours needed. A minimum grade of C- is required in all religion, professional or specialization education courses. (Student must complete all listed required courses & the remaining course credits must be met in general electives in order to meet the total program hours. Catalog requires a minimum of 0 elective hours for this program.)

1. No grade lower than a "C" in any general education course; professional education course, or specialization course;
2. Minimum cumulative GPA of 2.5 for all general education courses;
3. Minimum grade of "B" in Fundamentals of Speech;

TOTAL PROGRAM HOURS - 120 Credit Hours**FOUNDATIONAL CORE - 34 Credit Hours****SEU FOUNDATIONAL CORE - 3 Credit Hours****CORE 1111 - COMMUNITY AND COLLEGE SUCCESS**

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

WORLDVIEW FORMATION - 9 Credit Hours**BIBL 1113 - THE STORY OF SCRIPTURE**

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

HABITS OF INQUIRY- 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

Quantitative Inquiry - 3 Credit Hours

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select Two (2) of the Following (6 Credit Hours):

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

MAJOR REQUIREMENTS- 49 Credit Hours

CSDS 1003 - INTRO. TO COMM. DISORDERS

This course is designed to introduce students to the field of communication disorders. Topics addressed are related to the function of speech, language, and hearing and how they support human communication. Communication disorders across the lifespan are also discussed. Students in various disciplines such as education, psychology, linguistics, social work, or family studies could benefit from this course.

Prerequisites & Notes

NULL

Credits: 3

CHEM 1213 - INTRO TO CHEMISTRY

This course is an introduction to basic concepts of general chemistry, introduction of periodic properties of elements and compounds, basic atomic-molecular structure, and properties of substances and reactions related to gas laws.

Prerequisites & Notes

Corequisite: CHEM 121L

Credits: 3

CSDS 2003 - A&P OF SPEECH & HEARING

This course will introduce students to the anatomical structure and physiological mechanisms essential for speech production and hearing. Anatomy and physiology for respiration, phonation, articulation, resonance will be discussed in addition to innervation specific to speech and hearing.

Prerequisites & Notes

NULL

Credits: 3

CSDS 2013 - SPEECH AND HEARING SCIENCE

This course is a study in the physiological frameworks and theories underlying the mechanisms of speech and hearing. Acoustic principles of speech and hearing are discussed.

Prerequisites & Notes

NULL

Credits: 3

CSDS 2043 - CSD SEMINAR

This course prepares students to understand scopes of practice, degree requirements, and necessary preparation to work in the field of communication sciences and disorders. Students are instructed in preparation for graduate study and ongoing requirements for licensure or certification by state. This seminar is required for every Communication Sciences and Disorders (CSD) major.

Prerequisites & Notes

NULL

Credits: 0-1

CSDS 3003 - MULTICULTURAL ASPECTS OF COMM.

This course will provide a framework designed to help students understand the relationship between culture and communication through both sociological and Biblical perspectives. Students will examine the impact these variables have on clinical service provision to clients from various cultural and linguistic backgrounds.

Prerequisites & Notes

NULL

Credits: 3

CSDS 2033 - PHONETICS

This course is an in-depth study of the perception and production of speech sounds and their representations in the International Phonetic Alphabet (IPA) with emphasis on analyzing and transcribing phonemes at the word level and in connected speech for English and its various dialects and for speech sound disorders.

Prerequisites & Notes

NULL

Credits: 3

CSDS 2023 - ARTICULATION & PHONOLOGY

This course is a study of the relationship between phonology and articulation in the context of human communication. Identification, classification, analysis, and remediation of phonological and articulation disorders will also be addressed.

Prerequisites & Notes

Prerequisite: CSDS 2003 & CSDS 2033

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

CSDS 3033 - LANGUAGE DISORDERS & INTERVENTIONS

This course focuses on oral and written language acquisition and development, as well as the nature of delayed or disordered language from birth to adolescence. Emphasis is placed on diagnosis and clinical management within the components of language, phonology, morphology, syntax, semantics, and pragmatics.

Prerequisites & Notes

NULL

Credits: 3

CSDS 3073 - FLUENCY & VOICE DISORDERS

This course explores typical and atypical development with oral fluency and voice disorders. The course explores causes of acquired fluency and voice disorders. Students will be introduced to treatments for fluency and voice disorders.

Prerequisites & Notes

NULL

Credits: 3

CSDS 3083 - FAITH INTEGRATION IN CSD

This course is designed to engage students in critical thought and reflection as they apply the tenets of their faith into the formation of thought and practice in their chosen vocation, including working with those with disabilities.

Prerequisites & Notes

NULL

Credits: 3

CSDS 3203 - AUDIOLOGY AND AURAL REHABILITATION

This course is an introduction to audiology and aural rehabilitation. Basic audiological evaluation, interpretation of evaluative data, and the impact of hearing disorders on all aspects of communication across the lifespan will be addressed.

Prerequisites & Notes

NULL

Credits: 3

CSDS 4023 - CLINICAL METHODS

This course explores clinical procedures utilized within the field of communication sciences and disorders. Students will be instructed in clinical setting types, service delivery models, utilization of screening, diagnostic and therapeutic techniques, clinical writing and guided clinical observation.

Prerequisites & Notes

NULL

Credits: 3

CSDS 4033 - LANGUAGE & LITERACY

This course explores the influence of language disorders on the development of literacy. The course will apply knowledge of language disorders to the essential components of literacy (oral language, phonemic awareness, phonics, reading fluency, vocabulary, comprehension strategies, and written language).

Prerequisites & Notes

NULL

Credits: 3

CSDS 4043 - CLINICAL PRACTICUM

This course provides clinical research and field work within settings related to communication sciences and disorders. Placements will provide experiences in the implementation of preventative and therapeutic services supporting speech, language, and hearing. Settings vary.

Prerequisites & Notes

Prerequisite: Must be a senior and approval granted by the program coordinator.

Credits: 3

CSDS 4053 - NEUROLOGY OF COMM. DISORDERS

This course is an introduction to speech and language disorders resulting from disease and/or injury to the peripheral and central nervous system. Communication disorders such as aphasia, apraxia, dysarthria, dementia, and cognitive communication disorders will be discussed.

Prerequisites & Notes

NULL

Credits: 3

DIVINE DESIGN - 37 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Bachelor of Science, General Biology

Bachelor of Science, General Biology Four Year Plan A

Bachelor of Science, General Biology Four Year Plan B

Department of Natural Sciences Guidelines and Policies:

1. Students are required to earn a grade of "C-" or better in all Biology, Chemistry, Math, and Physics courses.
2. Students must complete all of the Pre-Biology Core courses at Southeastern University or elsewhere with a C minus or higher to continue in this major.
3. A student who does not complete MATH 2144 Calculus I by the end of the Sophomore year (4th semester) with a grade of C minus or higher at Southeastern University or elsewhere, whether repeated or not, will not be permitted to continue in the major.
4. A student who has accumulated three (3) or more grades below C minus (including grades of WF) in any of the following Math courses (MATH 1414, MATH 2023, MATH 2144, or MATH 2244) or Chemistry courses (CHEM 1533, CHEM 1633, CHEM 2133 or CHEM 2134) taken for college credit at Southeastern University or elsewhere will not be permitted to continue in the major.

*Courses count toward Foundational Core

Total Program Hours - 120 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours**Discursive Inquiry - 6 Credit Hours****ENGL 1113 - COLLEGE COMPOSITION**

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours**BIOL 1233 - BIOLOGY I**

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite:BIOL 1233

Credits: 1

Quantitative Inquiry - 3 Credit Hours**MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS**

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select Two (2) of the Following (6 Credit Hours):

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 68 Credit Hours

Pre-Biology Core - 16 Credit Hours

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L

Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

Biology Core - 16 Credit Hours

BIOL 2113 - BIOETHICS

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: **BIOL 1243 or BIOL 2183**

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 2533 - GENERAL GENETICS

This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243, BIOL 124L

Corequisite:

BIOL 253L

Credits: 3

BIOL 253L - GENERAL GENETICS LAB

This course is the laboratory to accompany BIOL 2533. It is designed as an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243

BIOL 124L

Corequisite:

BIOL 2533

Credits: 1

BIOL 2633 - CELL & MOLECULAR BIOLOGY

This course is an in-depth study of the structure and molecular functions of a composite cell. The anatomy and physiology of the cell will be covered.

Prerequisites & Notes

Prerequisite: BIOL 1233, BIOL 123L

Credits: 3

BIOL 4903 - SENIOR CAPSTONE COURSE

Students will be required to propose a scientific research study related to the chosen concentration using the knowledge gained through the respective degree programs. This course is designed to review the student portfolio which will be developed over the course of obtaining the General Biology or Biology degree. Culmination of the student's degree will

require completion of all items listed in the requirements for the student portfolio, including completion of research papers, presentations, and demonstration of knowledge of specific concepts in Chemistry, Biology, and Physics.

Prerequisites & Notes

Prerequisite: BIOL 2633 , BIOL 2533 , BIOL 253L , CHEM 2143 , CHEM 214L , MATH 2144

Credits: 3

Chemistry and Physics Core - 18 Credit Hours

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

PHYS 2633 - GENERAL PHYSICS II

This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: PHYS 2533

Credits: 3

PHYS 263L - GENERAL PHYSICS II LAB

Laboratory to accompany PHYS 2633.

Prerequisites & Notes

NULL

Credits: 1

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in

mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L & MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via

methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods.

Prerequisites & Notes

Prerequisite:

CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

Concentration in General Biology - Minimum 18 Credit Hours

(MUST INCLUDE 3 COURSES WITH LABS)

*Students may enroll in two special topics courses for a total of 6 hours to count toward the required 18 hours of General Biology Concentration.

NSCI 1433 - BOTANY

This course is an introductory course in plant anatomy, physiology and taxonomy. The history of mankind's medicinal use of plants and current updates will be covered.

Prerequisites & Notes

Corequisite: NSCI 143L

Credits: 3

NSCI 143L - BOTANY LAB

This course helps students apply what they have learned about plant anatomy, physiology and taxonomy through hands-on activities and field trips.

Prerequisites & Notes

Corequisite: NSCI 1433

Credits: 1

NSCI 2433 - ANIMAL DIVERSITY

This course introduces foundational principles of zoology, including taxonomy, animal biology, architecture and ecology. Emphasis will be placed on the survey of invertebrate and vertebrate biodiversity.

Prerequisites & Notes

Corequisite: NSCI 243L

Credits: 3

NSCI 243L - ANIMAL DIVERSITY LAB

This course is a laboratory to accompany NSCI 2433.

Prerequisites & Notes

Corequisite: NSCI 2433

Credits: 1

NSCI 3003 - ANIMAL PHYS. AND MOL. BIOLOGY

This course reviews and investigates the fundamental molecular processes and mechanisms that regulate the functions of various organ systems of animals (emphasis on vertebrates) to maintain homeostasis.

Prerequisites & Notes

Prerequisite: BIOL 1243 or NSCI 2433

Credits: 3

NSCI 3333 - ECOLOGY

This course introduces foundational principles of ecology, the study of relationships between organisms and the surrounding environment. This course will provide students with a broader understanding of how the physical and chemical characteristics of the environment influence the distribution and abundance of various species of organisms in an ecosystem.

Prerequisites & Notes

Corequisite: NSCI 333L

Credits: 3

NSCI 333L - ECOLOGY LAB

This is a laboratory to accompany NSCI 3333. Students will discern the interconnectivity between and among various species of organisms through the conduct of actual laboratory and field surveys in various habitats applying critical analysis to explain ecological phenomena learned in lecture.

Prerequisites & Notes

Corequisite: NSCI 3333

Credits: 1

NSCI 3403 - AVIAN BIOLOGY (ORNITHOLOGY)

This course introduces the biology, ecology, and conservation of birds with a particular emphasis on Florida's avifauna.

Prerequisites & Notes

NULL

Credits: 3

NSCI 340L - AVIAN BIOLOGY (ORNITHOLOGY) LAB

This is a laboratory course to accompany NSCI 3403.

Prerequisites & Notes

Corequisite: NSCI 3403

Credits: 1

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:
BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

BIOL 4633 - SPECIAL TOPICS IN BIOLOGY

This course is a seminar for the investigation of specialized topics in biology not addressed by other courses. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

To be determined according to topic

Credits: 3

BIOL 4653 - SPECIAL TOPICS IN BIOLOGY III

This course is a seminar for the investigation of specialized topics in biology not addressed by other courses. Content is determined by the department to address special needs or interests. This course may be repeated for a maximum of six hours. The same topic may not be repeated.

Prerequisites & Notes

To be determined according to topic

Credits: 3

Divine Design (Major Specific Experiential Learning) - 3 Credit Hours

NSCI 4413 - SCIENCE FIELD STUDY II

This course provides the student supervised work/research experience in a setting relevant to the major area of study but outside the department and university.

Prerequisites & Notes

Prerequisite: Faculty Advisor or Department Chair Approval

Credits: 1-3

NSCI 4403 - SCIENCE FIELD STUDY I

This course provides the student supervised work/research experience in a setting relevant to the major area of study but outside the department and university.

Prerequisites & Notes

Prerequisite: Faculty Advisor or Department Chair Approval

Credits: 1-3

BIOL 4373 - RESEARCH IN BIOLOGICAL SCIENCES

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Approval by Department Chair

Credits: 1-3 Variable

CHEM 4373 - RESEARCH IN CHEMISTRY

This course is a practical experience in chemical research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Prerequisite: Approval by Department Chair

Credits: 3

BIOL 4023 - BIOLOGY FIELD STUDY

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a qualified off-site supervisor, who provides continuous evaluation of the intern's performance.

Prerequisites & Notes

Approval by department chair

Credits: 1-3

Divine Design- 15 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Bachelor of Science, Health Science & Business

Bachelor of Science, Health Science and Business Four Year Plan

Department of Natural Sciences Guidelines and Policies:

1. Students are required to earn a grade of "C-" or better in all Biology, Chemistry, Math, and Physics courses.
2. Students must complete all of the Pre-Biology Core courses at Southeastern University or elsewhere with a C minus or higher to continue in this major.
3. A student who does not complete MATH 2144 Calculus I by the end of the Sophomore year (4th semester) with a grade of C minus or higher at Southeastern University or elsewhere, whether repeated or not, will not be permitted to continue in the major.
4. A student who has accumulated three (3) or more grades below C minus (including grades of WF) in any of the following Math courses (MATH 1414, MATH 2023, MATH 2144, or MATH 2244) or Chemistry courses (CHEM 1533, CHEM 1633, CHEM 2133 or CHEM 2134) taken for college credit at Southeastern University or elsewhere will not be permitted to continue in the major.

*Courses count toward Foundational Core

TOTAL PROGRAM HOURS - 120 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite: BIOL 1233

Credits: 1

Quantitative Inquiry - 3 Credit Hours

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select Two (2) of the Following (6 Credit Hours):

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

MAJOR REQUIREMENTS - 70 Credit Hours

Pre-Biology Core - 15 Credit Hours

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L

Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

- or -

MATH 1413 - PRECALCULUS

This course covers algebraic relations and functions, systems of equations, rational functions, polynomials, exponential functions and logarithms, trigonometric functions and their inverses, graphs, and identities. A placement exam is given at the beginning of each course. Students must demonstrate proficiency to remain in this course. A math score on the ACT of 21 or the SAT of 500 is required. Cost for items and materials provided by our Bookstore are charged as a fee attached to the course.

Prerequisites & Notes

NULL

Credits: 3

- or -

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

Biology Core - 10 Credit Hours

BIOL 2113 - BIOETHICS

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: **BIOL 1243 or BIOL 2183**

Credits: 3

BIOL 2533 - GENERAL GENETICS

This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243, BIOL 124L

Corequisite:

BIOL 253L

Credits: 3

BIOL 253L - GENERAL GENETICS LAB

This course is the laboratory to accompany BIOL 2533. It is designed as an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243

BIOL 124L

Corequisite:

BIOL 2533

Credits: 1

BIOL 2633 - CELL & MOLECULAR BIOLOGY

This course is an in-depth study of the structure and molecular functions of a composite cell. The anatomy and physiology of the cell will be covered.

Prerequisites & Notes

Prerequisite: BIOL 1233, BIOL 123L

Credits: 3

Physics Core - 8 Credit Hours**PHYS 2533 - GENERAL PHYSICS I**

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

PHYS 2633 - GENERAL PHYSICS II

This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: PHYS 2533

Credits: 3

PHYS 263L - GENERAL PHYSICS II LAB

Laboratory to accompany PHYS 2633.

Prerequisites & Notes

NULL

Credits: 1

Concentration in Health Sciences - Minimum 13 Credit Hours**(MUST INCLUDE 2 COURSES WITH LABS)**

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:
BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

BIOL 4433 - DIAGNOSTIC CLINICAL FOUNDATIONS

This course will mainly utilize Problem-based learning, or PBL, as its pedagogical practice. This practice is employed in many medical and graduate programs. While there are variants of the technique, the approach includes the presentation of a clinical case or vignette to a small group of students who engage in discussion and problem solving over several class meetings. The professor will act as a facilitator who only provides supportive guidance for the students. The discussion of the problem is structured to enable students to create conceptual models to explain the multidisciplinary problem presented in the case. As students reveal the limits of their knowledge, they identify learning issues. Between classes, students research their learning issues and share results at the next class session.

Prerequisites & Notes

Prerequisite:

BIOL 2083

BIOL 2183

BIOL 3703

Credits: 3

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated

hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L & MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical

methods.

Prerequisites & Notes

Prerequisite:
CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

CHEM 3353 - BIOCHEMISTRY I

This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Prerequisites & Notes

Prerequisite: CHEM 2133 & MATH 2144

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

CHEM 4423 - MEDICINAL CHEMISTRY

This course is an introduction to the field of medicinal chemistry with a special focus on methods of drug design, synthesis, structure-activity relationships, and modes of action. In addition, it will acquaint students with modern applications of chemical techniques in the development of drug candidates to cure diseases based on the modulation of current drug targets, including proteins, nucleic acids, and other receptor-based functionalities. Focuses on structure-activity relationships, pharmacokinetics, and pharmacodynamics.

Prerequisites & Notes

Prerequisite: CHEM 2133

Credits: 3

Business Core - 21 Credit Hours

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

BUSI 1013 - INTRO TO ACCOUNTING AND FINANCE

This course provides an introduction to the basics of accounting and finance. It is intended for business minors and places emphasis on the understanding of the language of accounting and finance, recording of transactions, financial statements, time value of money, financial ratios, and managerial decision-making, using accounting and finance information.

Prerequisites & Notes

None

Credits: 3

BUSI 2203 - MICROECONOMICS

This survey course develops the concepts of individual economic units, such as households, firms, and industries. In this study, topics will include economic behaviors relating to spending, saving, investment, labor economics, and prices.

Prerequisites & Notes

None

Credits: 3

BUSI 3203 - PRINCIPLES OF MANAGEMENT

As a survey of administration and management, this course covers the fundamentals of planning, organizing, staffing, leading, and controlling. The course integrates the functions of management with appropriate quantitative and behavioral concepts.

Prerequisites & Notes

BUSI 2123 OR BUSI 2113

Credits: 3

BUSI 3303 - MARKETING

This course examines the structures, functions and behaviors of marketing systems. The basic exchange functions of pricing, product development and management, promotion and distribution are studied within the contexts of decision-making, consumer satisfaction, and the environments of business.

Prerequisites & Notes

BUSI 2113 or BUSI 2123

Credits: 3

BUSI 3403 - BUSINESS LAW I

This course discusses legal principles which apply to normal business transactions, contracts, agency, property, insurance, wills and trusts, and torts.

Prerequisites & Notes

None

Credits: 3

Select One (1) of the Following (3 Credit Hours):

BUSI 3103 - PRINCIPLES OF FINANCE

This course covers financial organization and the principles and practices of decision making involving acquiring and allocating capital, dividend policy, operating and financial leverage, financial markets and related topics.

Prerequisites & Notes

BUSI 2233

Credits: 3

BUSI 3513 - QUANTITATIVE METHODS

This course covers quantitative aspects of problem-solving and decision-making. This includes waiting lines, inventory, Markov process, probability, game theory, forecasting, and linear programming. Emphasis is on practical quantitative and qualitative knowledge, skills, and abilities for the business major.

Prerequisites & Notes

MATH 2023

Credits: 3

BUSI 3853 - MANAGEMENT INFORMATION SYSTEMS

This course addresses the basics of information technology, information systems, and the management of information systems. Students apply abstract and systems thinking skills to design and implement an information system.

Prerequisites & Notes

CTIS 2133

Credits: 3

BUSI 4603 - BUSINESS POLICIES

This course is designed as the capstone learning experience for all business majors. The course will integrate separate functional activities into a comprehensive understanding of how teamwork benefits the operation of an organization. Emphasis is placed upon policy formulation and documentation of a strategic plan for a simulated organization.

Prerequisites & Notes

All business core requirements and senior status

Credits: 3

MKTG 3133 - PROFESSIONAL SELLING

This course will focus on developing and applying essential professional selling skills through the use of interpersonal communication to effectively market goods and services and yourself. Emphasis is placed upon the personal selling process through study and application.

Prerequisites & Notes

BUSI 3303

Credits: 3

MKTG 4113 - ADVERTISING

This course covers advertising, creative philosophies, copy preparation, ad-layout techniques for diverse advertising media, media planning, and media-buying tactics.

Prerequisites & Notes

BUSI 3303

Credits: 3

MNGT 3183 - ORGANIZATIONAL BEHAVIOR

This is a study of behavioral science theory and practice exploring management, leadership, motivation, group dynamics, relations and organizational systems. Topics will concentrate on applying organizational resources for optimal efficiency.

Prerequisites & Notes

NULL

Credits: 3

LDRS 2123 - LEADERSHIP PRINCIPLES

This course focuses upon the development and challenges of effective leadership by reviewing historical leaders and the development of various leadership theories. This includes leader traits, skills, and behaviors; models; and other approaches to leadership.

Prerequisites & Notes

None

Credits: 3

LDRS 2223 - LEADERSHIP THEORY

This course focuses upon the development and challenges of effective leadership by reviewing influential writings and speeches, along with various leadership theories and philosophies. This includes adaptive, authentic, authoritarian, cross-cultural, democratic, ethical, Great Man Theory, servant, and transformational leadership, along with women in leadership and followership.

Prerequisites & Notes

None

Credits: 3

**DIVINE DESIGN (MAJOR SPECIFIC EXPERIENTIAL LEARNING) -
3 Credit Hours**

Business or Science Internship: Select One (1) of the Following (3 Credit Hours):

BIOL 4023 - BIOLOGY FIELD STUDY

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a qualified off-site supervisor, who provides continuous evaluation of the intern's performance.

Prerequisites & Notes

Approval by department chair

Credits: 1-3

BIOL 4033 - RESEARCH RESIDENCY PROGRAM

This course is intended to provide a practical experience in clinical research at an inpatient setting for one full semester, approved by the department chair, and spearheaded by a qualified off-site supervisor who provides continuous evaluation of the intern's performance. This course will help establish the concepts that guide a successful research design. Furthermore, this course will expose students to the various opportunities of growth found within a large regional medical center.

Prerequisites & Notes

Prerequisite or corequisite: CHEM 3353

Credits: 3

BIOL 4373 - RESEARCH IN BIOLOGICAL SCIENCES

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Approval by Department Chair

Credits: 1-3 Variable

CHEM 4373 - RESEARCH IN CHEMISTRY

This course is a practical experience in chemical research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Prerequisite: Approval by Department Chair

Credits: 3

MKTG 4903 - MARKETING INTERNSHIP

This course involves work experience on and/or off campus, in an organization involving on-the-job training in a marketing related area. Intern will be supervised by a faculty coordinator and a supervisor in the organization. Reports of work experience are submitted to the coordinator.

Repeatable: Course can be repeated 2 times for a total of 6 credit hours

Prerequisites & Notes

Approval of the Chair of the Department of Business

Credits: 3

MNGT 4903 - MANAGEMENT INTERNSHIP

This is a supervised, structured work experience designed to augment and develop practical experience in conjunction with regular coursework. Participants are strongly encouraged to utilize this option to explore potential career paths. Junior standing and at least 2.5 cumulative GPA are requirements of this course.

Prerequisites & Notes

DA

Credits: 3

DIVINE DESIGN- 16 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Minor, Biology

Total of 18 Credit Hours

Required

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite: BIOL 1233

Credits: 1

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

Select from the following - 10-11 Credit Hours

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

BIOL 2533 - GENERAL GENETICS

This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243, BIOL 124L

Corequisite:

BIOL 253L

Credits: 3

BIOL 253L - GENERAL GENETICS LAB

This course is the laboratory to accompany BIOL 2533. It is designed as an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243

BIOL 124L

Corequisite:

BIOL 2533

Credits: 1

BIOL 2633 - CELL & MOLECULAR BIOLOGY

This course is an in-depth study of the structure and molecular functions of a composite cell. The anatomy and physiology of the cell will be covered.

Prerequisites & Notes

Prerequisite: BIOL 1233, BIOL 123L

Credits: 3

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L

Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

NSCI 2433 - ANIMAL DIVERSITY

This course introduces foundational principles of zoology, including taxonomy, animal biology, architecture and ecology. Emphasis will be placed on the survey of invertebrate and vertebrate biodiversity.

Prerequisites & Notes

Corequisite: NSCI 243L

Credits: 3

NSCI 243L - ANIMAL DIVERSITY LAB

This course is a laboratory to accompany NSCI 2433.

Prerequisites & Notes

Corequisite: NSCI 2433

Credits: 1

NSCI 3333 - ECOLOGY

This course introduces foundational principles of ecology, the study of relationships between organisms and the surrounding environment. This course will provide students with a broader understanding of how the physical and chemical characteristics of the environment influence the distribution and abundance of various species of organisms in an ecosystem.

Prerequisites & Notes

Corequisite: NSCI 333L

Credits: 3

NSCI 333L - ECOLOGY LAB

This is a laboratory to accompany NSCI 3333. Students will discern the interconnectivity between and among various species of organisms through the conduct of actual laboratory and field surveys in various habitats applying critical analysis to explain ecological phenomena learned in lecture.

Prerequisites & Notes

Corequisite: NSCI 3333

Credits: 1

Minor, Chemistry

Total of 20 Credit Hours

Select 17 Credit Hours at the 3000 level

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L & MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods.

Prerequisites & Notes

Prerequisite:

CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

CHEM 3033 - ANALYTICAL CHEMISTRY

An overview of quantitative and qualitative chemical analysis; classical methods of gravimetric and volumetric analysis, concepts of acid-base theory, titrations, precipitation and complex formation, redox chemistry and statistical treatment of data. Introduces basic principles of modern electrochemical behavior, spectroscopic, and chromatographic analysis.

Prerequisites & Notes

Prerequisite: CHEM 1633

Credits: 3

CHEM 303L - ANALYTICAL CHEMISTRY LAB

This is a laboratory course to accompany CHEM 3033 - Analytical Chemistry.

Prerequisites & Notes

Prerequisite: CHEM 1633

Credits: 1

CHEM 3153 - PHYSICAL CHEMISTRY

This course is a study of the basic physical principles of chemical processes. This is a math-intensive course. This course will focus on thermodynamics, roles of energy in determining molecular structure and reactivity, and kinetics. Moreover, quantum mechanics are used to connect the microscopic, molecular level to the bulk properties of substances.

Prerequisites & Notes

Prerequisites: CHEM 1633 & MATH 2144

Credits: 3

CHEM 315L - PHYSICAL CHEMISTRY LAB

This is the laboratory course to accompany CHEM 3153 with an emphasis on experimental work employing physicochemical techniques to study thermodynamics, chemical kinetics, quantum mechanics, and spectroscopy with applications to investigate biological systems and processes.

Prerequisites & Notes

Prerequisite:
CHEM 1633

MATH 2144

Corequisite:

CHEM 3153

Credits: 1

CHEM 3203 - ENZYMOLOGY

This course is an introduction to the basic principles of enzymology including structure, reactivity, kinetics, and reaction mechanisms.

Prerequisites & Notes

Prerequisite: CHEM 2133 & CHEM 3353

Credits: 3

CHEM 3323 - INSTRUMENTAL METHODS ANALYSIS

Theory and application of instrumental methods of quantitative and qualitative analyses with emphasis on electrolytic, optical and chromatographic techniques using a combination of problem-based learning approaches, case studies and traditional lectures. The student will develop critical thinking skills in the areas of instrument selection and method development and data interpretation.

Prerequisites & Notes

Prerequisite: CHEM 1633 & CHEM 2133 (preferred)

Corequisite: CHEM 332L or Department Chair approval

Credits: 3

CHEM 332L - INSTRUMENTAL METHODS ANALYSIS LAB

This course is a laboratory course designed to accompany CHEM 3323. Emphasis is placed on separation methods such as chromatography along with spectroscopy. Instrumental techniques, as well as identification and quantitation using ultraviolet, visible, infrared, and nuclear magnetic resonance spectroscopies, electrophoresis, mass spectrometry, GC, HPLC, atomic absorption, and other instrumentation, may also be explored.

Prerequisites & Notes

Prerequisite:

CHEM 3033

CHEM 303L

Corequisite:

CHEM 3323

Credits: 1

CHEM 3353 - BIOCHEMISTRY I

This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Prerequisites & Notes

Prerequisite: CHEM 2133 & MATH 2144

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

Select 3 Credit Hours at the 4000 level

CHEM 4003 - CURRENT TOPICS IN CHEMISTRY I

This course is an in-depth look at recent developments in one of the main areas of chemistry. The particular topic will vary by semester. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

Prerequisite: To be determined according to topic

Credits: 3

CHEM 4013 - CURRENT TOPICS IN CHEMISTRY II

This course is an in-depth look at recent developments in one of the main areas of chemistry. The particular topic will vary by semester. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

Prerequisite: To be determined according to topic

Credits: 3

CHEM 4023 - CURRENT TOPICS IN CHEMISTRY III

This course is an in-depth look at recent developments in one of the main areas of chemistry. The particular topic will vary by semester. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

Prerequisite: To be determined according to topic

Credits: 3

CHEM 4103 - CHEMISTRY OF CANCER

This course is a study of the chemical concepts of carcinogenesis. In addition, this course examines the causes of cancer, the chemistry of approved anti-cancer drugs, mechanisms of interaction with the body, side effects, classifications of drugs, and environmental carcinogens. The roles of important biomolecules, such as lipids, proteins, carbohydrates, and nucleic acids, in carcinogenesis will be discussed as well as the repair mechanisms employed at a molecular level to combat nucleic acid damage and unregulated cell growth.

Prerequisites & Notes

Prerequisites: CHEM 2133

Credits: 3

CHEM 4223 - NEUROCHEMISTRY

This course is a study into the chemical and biochemical concepts of neurotransmitters in neuroscience. The roles of metals; small molecules; and important biomolecules, such as lipids, proteins, carbohydrates, and nucleic acids; in neuroscience will be discussed as well as the pathologies of tauopathy, amyloid genesis, aggregation, and neurological/neuromuscular disorders with respect to mechanisms and treatments. The biochemical basis of neuroactive drugs, toxins, and diseases will be discussed. In addition, perceptive insights into the complex fields of drug abuse, compulsive behaviors, addiction, treatment, recovery, and prevention will also be addressed.

Prerequisites & Notes

Prerequisite: CHEM 2133

Credits: 3

CHEM 4373 - RESEARCH IN CHEMISTRY

This course is a practical experience in chemical research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Prerequisite: Approval by Department Chair

Credits: 3

CHEM 4423 - MEDICINAL CHEMISTRY

This course is an introduction to the field of medicinal chemistry with a special focus on methods of drug design, synthesis, structure-activity relationships, and modes of action. In addition, it will acquaint students with modern applications of chemical techniques in the development of drug candidates to cure diseases based on the modulation of current drug targets, including proteins, nucleic acids, and other receptor-based functionalities. Focuses on structure-activity relationships, pharmacokinetics, and pharmacodynamics.

Prerequisites & Notes

Prerequisite: CHEM 2133

Credits: 3

CHEM 4433 - INORGANIC & BIOINORGANIC CHEMISTRY

A theoretical introduction to the concepts of chemical systems of inorganic chemistry with particular emphasis on the roles in biochemistry. Topics may include, atomic structure, nuclear chemistry, molecular symmetry, chemical periodicity, descriptive chemistry of the elements, simple bonding models, solids, metals & coordination chemistry, crystal field theory, ligand substitution reactions, electron transfer reactions, reaction mechanism, factors affecting chemical activity and select applications to the subfield of bioinorganic chemistry.

Prerequisites & Notes

Prerequisite: CHEM 1633

Credits: 3

Minor, Communication Sciences & Disorders

Total of 18 Credit Hours

Minor Core - 18 Credit Hours

CSDS 1003 - INTRO. TO COMM. DISORDERS

This course is designed to introduce students to the field of communication disorders. Topics addressed are related to the function of speech, language, and hearing and how they support human communication. Communication disorders across the lifespan are also discussed. Students in various disciplines such as education, psychology, linguistics, social work, or family studies could benefit from this course.

Prerequisites & Notes

NULL

Credits: 3

CSDS 2003 - A&P OF SPEECH & HEARING

This course will introduce students to the anatomical structure and physiological mechanisms essential for speech production and hearing. Anatomy and physiology for respiration, phonation, articulation, resonance will be discussed in addition to innervation specific to speech and hearing.

Prerequisites & Notes

NULL

Credits: 3

CSDS 2023 - ARTICULATION & PHONOLOGY

This course is a study of the relationship between phonology and articulation in the context of human communication. Identification, classification, analysis, and remediation of phonological and articulation disorders will also be addressed.

Prerequisites & Notes

Prerequisite: CSDS 2003 & CSDS 2033

Credits: 3

CSDS 2033 - PHONETICS

This course is an in-depth study of the perception and production of speech sounds and their representations in the International Phonetic Alphabet (IPA) with emphasis on analyzing and transcribing phonemes at the word level and in connected speech for English and its various dialects and for speech sound disorders.

Prerequisites & Notes

NULL

Credits: 3

CSDS 3033 - LANGUAGE DISORDERS & INTERVENTIONS

This course focuses on oral and written language acquisition and development, as well as the nature of delayed or disordered language from birth to adolescence. Emphasis is placed on diagnosis and clinical management within the components of language, phonology, morphology, syntax, semantics, and pragmatics.

Prerequisites & Notes

NULL

Credits: 3

CSDS 3203 - AUDIOLOGY AND AURAL REHABILITATION

This course is an introduction to audiology and aural rehabilitation. Basic audiological evaluation, interpretation of evaluative data, and the impact of hearing disorders on all aspects of communication across the lifespan will be addressed.

Prerequisites & Notes

NULL

Credits: 3

Minor, Neuroscience

Total of 18 Credit Hours

At least 10 credit hours should be completed for the minor only (not shared or double-counted with another major).

Foundational Biology Courses (7-8 Credit Hours)

**Biology I and II (with labs) can double count between a declared major and this minor.*

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite: BIOL 1233

Credits: 1

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

BIOL 2633 - CELL & MOLECULAR BIOLOGY

This course is an in-depth study of the structure and molecular functions of a composite cell. The anatomy and physiology of the cell will be covered.

Prerequisites & Notes

Prerequisite: BIOL 1233, BIOL 123L

Credits: 3

Elective Requirements (10-11 Credit Hours)

CSDS 4053 - NEUROLOGY OF COMM. DISORDERS

This course is an introduction to speech and language disorders resulting from disease and/or injury to the peripheral and central nervous system. Communication disorders such as aphasia, apraxia, dysarthria, dementia, and cognitive communication disorders will be discussed.

Prerequisites & Notes

NULL

Credits: 3

PSYC 4033 - PHYSIOLOGICAL PSYCHOLOGY

This course is a study of the physiological components of behavior. Topics include structure and function of the nervous system; theory of brain functions; and current problems, theories, and techniques in physiological psychology.

Prerequisites & Notes

PSYC 1133 or PSYC 1233; PSYC 2133; BIOL 1333, BIOL 133L

Credits: 3

PSYC 4083 - LEARNING AND COGNITION

This course is an introduction to the psychological study of learning and cognition. Topics examined will include classical conditioning, operant conditioning, observational learning, perception, attention, and memory. Traditional views as well as current trends will be discussed.

Prerequisites & Notes

PSYC 2133

Credits: 3

KINS 4203 - MOTOR CONTROL & LEARNING

This course is a study of the development of human motor performance by exploring theories of learning as they apply to the acquisition of gross motor skills.

Prerequisites & Notes

Prerequisite: KINS 2203

Credits: 3

CHEM 4223 - NEUROCHEMISTRY

This course is a study into the chemical and biochemical concepts of neurotransmitters in neuroscience. The roles of metals; small molecules; and important biomolecules, such as lipids, proteins, carbohydrates, and nucleic acids; in neuroscience will be discussed as well as the pathologies of tauopathy, amyloid genesis, aggregation, and neurological/neuromuscular disorders with respect to mechanisms and treatments. The biochemical basis of neuroactive drugs, toxins, and diseases will be discussed. In addition, perceptive insights into the complex fields of drug abuse, compulsive behaviors, addiction, treatment, recovery, and prevention will also be addressed.

Prerequisites & Notes

Prerequisite: CHEM 2133

Credits: 3

CHEM 4373 - RESEARCH IN CHEMISTRY

This course is a practical experience in chemical research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Prerequisite: Approval by Department Chair

Credits: 3

BIOL 4373 - RESEARCH IN BIOLOGICAL SCIENCES

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Approval by Department Chair

Credits: 1-3 Variable

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

BIOL 4633 - SPECIAL TOPICS IN BIOLOGY

This course is a seminar for the investigation of specialized topics in biology not addressed by other courses. Content is determined by the department to address special needs or interests.

Prerequisites & Notes

To be determined according to topic

Credits: 3

Other Programs

Bachelor of Science, Biochemistry Four Year Plan

Year One

FALL SEMESTER - 16 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite:BIOL 1233

Credits: 1

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

SPRING SEMESTER - 17 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L

Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

MATH 2244 - CALCULUS II

This course involves the study of antiderivatives, definite integrals, logarithmic, exponential and trigonometric functions.

Prerequisites & Notes

NULL

Credits: 4

Year Two

FALL SEMESTER - 15 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L & MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas

chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:
CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

BIOL 2633 - CELL & MOLECULAR BIOLOGY

This course is an in-depth study of the structure and molecular functions of a composite cell. The anatomy and physiology of the cell will be covered.

Prerequisites & Notes

Prerequisite: BIOL 1233, BIOL 123L

Credits: 3

SPRING SEMESTER - 16 Credit Hours

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods.

Prerequisites & Notes

Prerequisite:

CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

BIOL 2533 - GENERAL GENETICS

This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243, BIOL 124L

Corequisite:

BIOL 253L

Credits: 3

BIOL 253L - GENERAL GENETICS LAB

This course is the laboratory to accompany BIOL 2533. It is designed as an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:
BIOL 1243

BIOL 124L

Corequisite:

BIOL 2533

Credits: 1

PHYS 2633 - GENERAL PHYSICS II

This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: PHYS 2533

Credits: 3

PHYS 263L - GENERAL PHYSICS II LAB

Laboratory to accompany PHYS 2633.

Prerequisites & Notes

NULL

Credits: 1

Year Three

FALL SEMESTER - 15 Credit Hours

CHEM 3353 - BIOCHEMISTRY I

This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Prerequisites & Notes

Prerequisite: CHEM 2133 & MATH 2144

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Biology Specialization - Select One with Lab:

Biochemistry Specialization (3-4 Credit Hours)

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

BIOL 4433 - DIAGNOSTIC CLINICAL FOUNDATIONS

This course will mainly utilize Problem-based learning, or PBL, as its pedagogical practice. This practice is employed in many medical and graduate programs. While there are variants of the technique, the approach includes the presentation of a clinical case or vignette to a small group of students who engage in discussion and problem solving over several class meetings. The professor will act as a facilitator who only provides supportive guidance for the students. The discussion of the problem is structured to enable students to create conceptual models to explain the multidisciplinary problem presented in the case. As students reveal the limits of their knowledge, they identify learning issues. Between classes, students research their learning issues and share results at the next class session.

Prerequisites & Notes

Prerequisite:

BIOL 2083

BIOL 2183

BIOL 3703

Credits: 3

Divine Design (3 Credit Hours)

SPRING SEMESTER - 14 Credit Hours

CHEM 3153 - PHYSICAL CHEMISTRY

This course is a study of the basic physical principles of chemical processes. This is a math-intensive course. This course will focus on thermodynamics, roles of energy in determining molecular structure and reactivity, and kinetics. Moreover, quantum mechanics are used to connect the microscopic, molecular level to the bulk properties of substances.

Prerequisites & Notes

Prerequisites: CHEM 1633 & MATH 2144

Credits: 3

CHEM 315L - PHYSICAL CHEMISTRY LAB

This is the laboratory course to accompany CHEM 3153 with an emphasis on experimental work employing physicochemical techniques to study thermodynamics, chemical kinetics, quantum mechanics, and spectroscopy with applications to investigate biological systems and processes.

Prerequisites & Notes

Prerequisite:

CHEM 1633

MATH 2144

Corequisite:

CHEM 3153

Credits: 1

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

Chemistry Specialization - Select One with Lab:

Biochemistry Specialization (3-4 Credit Hours)

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

CHEM 3033 - ANALYTICAL CHEMISTRY

An overview of quantitative and qualitative chemical analysis; classical methods of gravimetric and volumetric analysis, concepts of acid-base theory, titrations, precipitation and complex formation, redox chemistry and statistical treatment of data. Introduces basic principles of modern electrochemical behavior, spectroscopic, and chromatographic analysis.

Prerequisites & Notes

Prerequisite: CHEM 1633

Credits: 3

CHEM 303L - ANALYTICAL CHEMISTRY LAB

This is a laboratory course to accompany CHEM 3033 - Analytical Chemistry.

Prerequisites & Notes

Prerequisite: CHEM 1633

Credits: 1

CHEM 3203 - ENZYMOLOGY

This course is an introduction to the basic principles of enzymology including structure, reactivity, kinetics, and reaction mechanisms.

Prerequisites & Notes

Prerequisite: CHEM 2133 & CHEM 3353

Credits: 3

CHEM 4103 - CHEMISTRY OF CANCER

This course is a study of the chemical concepts of carcinogenesis. In addition, this course examines the causes of cancer, the chemistry of approved anti-cancer drugs, mechanisms of interaction with the body, side effects, classifications of drugs, and environmental carcinogens. The roles of important biomolecules, such as lipids, proteins, carbohydrates, and nucleic acids, in carcinogenesis will be discussed as well as the repair mechanisms employed at a molecular level to combat nucleic acid damage and unregulated cell growth.

Prerequisites & Notes

Prerequisites: CHEM 2133

Credits: 3

CHEM 4223 - NEUROCHEMISTRY

This course is a study into the chemical and biochemical concepts of neurotransmitters in neuroscience. The roles of metals; small molecules; and important biomolecules, such as lipids, proteins, carbohydrates, and nucleic acids; in neuroscience will be discussed as well as the pathologies of tauopathy, amyloid genesis, aggregation, and neurological/neuromuscular disorders with respect to mechanisms and treatments. The biochemical basis of neuroactive drugs, toxins, and diseases will be discussed. In addition, perceptive insights into the complex fields of drug abuse, compulsive behaviors, addiction, treatment, recovery, and prevention will also be addressed.

Prerequisites & Notes

Prerequisite: CHEM 2133

Credits: 3

CHEM 4433 - INORGANIC & BIOINORGANIC CHEMISTRY

A theoretical introduction to the concepts of chemical systems of inorganic chemistry with particular emphasis on the roles in biochemistry. Topics may include, atomic structure, nuclear chemistry, molecular symmetry, chemical periodicity, descriptive chemistry of the elements, simple bonding models, solids, metals & coordination chemistry, crystal field theory, ligand substitution reactions, electron transfer reactions, reaction mechanism, factors affecting chemical activity and select applications to the subfield of bioinorganic chemistry.

Prerequisites & Notes

Prerequisite: CHEM 1633

Credits: 3

CHEM 3323 - INSTRUMENTAL METHODS ANALYSIS

Theory and application of instrumental methods of quantitative and qualitative analyses with emphasis on electrolytic, optical and chromatographic techniques using a combination of problem-based learning approaches, case studies and traditional lectures. The student will develop critical thinking skills in the areas of instrument selection and method development and data interpretation.

Prerequisites & Notes

Prerequisite: CHEM 1633 & CHEM 2133 (preferred)

Corequisite: CHEM 332L or Department Chair approval

Credits: 3

CHEM 332L - INSTRUMENTAL METHODS ANALYSIS LAB

This course is a laboratory course designed to accompany CHEM 3323. Emphasis is placed on separation methods such as chromatography along with spectroscopy. Instrumental techniques, as well as identification and quantitation using ultraviolet, visible, infrared, and nuclear magnetic resonance spectroscopies, electrophoresis, mass spectrometry, GC, HPLC, atomic absorption, and other instrumentation, may also be explored.

Prerequisites & Notes

Prerequisite:

CHEM 3033

CHEM 303L

Corequisite:

CHEM 3323

Credits: 1

CHEM 4423 - MEDICINAL CHEMISTRY

This course is an introduction to the field of medicinal chemistry with a special focus on methods of drug design, synthesis, structure-activity relationships, and modes of action. In addition, it will acquaint students with modern applications of chemical techniques in the development of drug candidates to cure diseases based on the modulation of current drug targets, including proteins, nucleic acids, and other receptor-based functionalities. Focuses on structure-activity relationships, pharmacokinetics, and pharmacodynamics.

Prerequisites & Notes

Prerequisite: CHEM 2133

Credits: 3

Divine Design (3 Credit Hours)

Year Four

FALL SEMESTER - 15 Credit Hours

Socio-Historical Inquiry - Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Chemistry Specialization - Select One with Lab:

Biochemistry Specialization: Minimum 9 Hours of Chemistry

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

CHEM 3033 - ANALYTICAL CHEMISTRY

An overview of quantitative and qualitative chemical analysis; classical methods of gravimetric and volumetric analysis, concepts of acid-base theory, titrations, precipitation and complex formation, redox chemistry and statistical treatment of data. Introduces basic principles of modern electrochemical behavior, spectroscopic, and chromatographic analysis.

Prerequisites & Notes

Prerequisite: CHEM 1633

Credits: 3

CHEM 303L - ANALYTICAL CHEMISTRY LAB

This is a laboratory course to accompany CHEM 3033 - Analytical Chemistry.

Prerequisites & Notes

Prerequisite: CHEM 1633

Credits: 1

CHEM 3203 - ENZYMOLOGY

This course is an introduction to the basic principles of enzymology including structure, reactivity, kinetics, and reaction mechanisms.

Prerequisites & Notes

Prerequisite: CHEM 2133 & CHEM 3353

Credits: 3

CHEM 3323 - INSTRUMENTAL METHODS ANALYSIS

Theory and application of instrumental methods of quantitative and qualitative analyses with emphasis on electrolytic, optical and chromatographic techniques using a combination of problem-based learning approaches, case studies and traditional lectures. The student will develop critical thinking skills in the areas of instrument selection and method development and data interpretation.

Prerequisites & Notes

Prerequisite: CHEM 1633 & CHEM 2133 (preferred)

Corequisite: CHEM 332L or Department Chair approval

Credits: 3

CHEM 332L - INSTRUMENTAL METHODS ANALYSIS LAB

This course is a laboratory course designed to accompany CHEM 3323. Emphasis is placed on separation methods such as chromatography along with spectroscopy. Instrumental techniques, as well as identification and quantitation using ultraviolet, visible, infrared, and nuclear magnetic resonance spectroscopies, electrophoresis, mass spectrometry, GC, HPLC, atomic absorption, and other instrumentation, may also be explored.

Prerequisites & Notes

Prerequisite:

CHEM 3033

CHEM 303L

Corequisite:

CHEM 3323

Credits: 1

CHEM 4103 - CHEMISTRY OF CANCER

This course is a study of the chemical concepts of carcinogenesis. In addition, this course examines the causes of cancer, the chemistry of approved anti-cancer drugs, mechanisms of interaction with the body, side effects, classifications of drugs, and environmental carcinogens. The roles of important biomolecules, such as lipids, proteins, carbohydrates, and nucleic acids, in carcinogenesis will be discussed as well as the repair mechanisms employed at a molecular level to combat nucleic acid damage and unregulated cell growth.

Prerequisite: CHEM 2133

Credits: 3

CHEM 4423 - MEDICINAL CHEMISTRY

This course is an introduction to the field of medicinal chemistry with a special focus on methods of drug design, synthesis, structure-activity relationships, and modes of action. In addition, it will acquaint students with modern applications of chemical techniques in the development of drug candidates to cure diseases based on the modulation of current drug targets, including proteins, nucleic acids, and other receptor-based functionalities. Focuses on structure-activity relationships, pharmacokinetics, and pharmacodynamics.

Prerequisites & Notes

Prerequisite: CHEM 2133

Credits: 3

CHEM 4433 - INORGANIC & BIOINORGANIC CHEMISTRY

A theoretical introduction to the concepts of chemical systems of inorganic chemistry with particular emphasis on the roles in biochemistry. Topics may include, atomic structure, nuclear chemistry, molecular symmetry, chemical periodicity, descriptive chemistry of the elements, simple bonding models, solids, metals & coordination chemistry, crystal field theory, ligand substitution reactions, electron transfer reactions, reaction mechanism, factors affecting chemical activity and select applications to the subfield of bioinorganic chemistry.

Prerequisites & Notes

Prerequisite: CHEM 1633

Credits: 3

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

Divine Design (6 Credit Hours)

SPRING SEMESTER - 12 Credit Hours**BIOL 2113 - BIOETHICS**

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: **BIOL 1243 or BIOL 2183**

Credits: 3

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Topics may include, atomic structure, nuclear chemistry, molecular symmetry, chemical periodicity, descriptive chemistry of the elements, simple bonding models, solids, metals & coordination chemistry, crystal field theory, ligand substitution reactions, electron transfer reactions, reaction mechanism, factors affecting chemical activity and select applications to the subfield of bioinorganic chemistry.

Prerequisites & Notes

Prerequisite: CHEM 1633

Credits: 3

Divine Design (3 Credit Hours)

Bachelor of Science, Biology: Dentistry Four Year Plan A

Year One

FALL SEMESTER - 16 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite:BIOL 1233

Credits: 1

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

SPRING SEMESTER - 16 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L

Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions,

estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Year Two

FALL SEMESTER - 15 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L &MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

BIOL 2633 - CELL & MOLECULAR BIOLOGY

This course is an in-depth study of the structure and molecular functions of a composite cell. The anatomy and physiology of the cell will be covered.

Prerequisites & Notes

Prerequisite: BIOL 1233, BIOL 123L

Credits: 3

SPRING SEMESTER - 16 Credit Hours

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development,

and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical

methods.

Prerequisites & Notes

Prerequisite:
CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

BIOL 253L - GENERAL GENETICS LAB

This course is the laboratory to accompany BIOL 2533. It is designed as an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:
BIOL 1243

BIOL 124L

Corequisite:

BIOL 2533

Credits: 1

BIOL 2533 - GENERAL GENETICS

This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:
BIOL 1243, BIOL 124L

Corequisite:

BIOL 253L

Credits: 3

Year Three

FALL SEMESTER - 16 Credit Hours

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Biology Specialization - Select one:

Concentration in Dentistry - Minimum 5 hours

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

NSCI 2433 - ANIMAL DIVERSITY

This course introduces foundational principles of zoology, including taxonomy, animal biology, architecture and ecology. Emphasis will be placed on the survey of invertebrate and vertebrate biodiversity.

Prerequisites & Notes

Corequisite: NSCI 243L

Credits: 3

NSCI 243L - ANIMAL DIVERSITY LAB

This course is a laboratory to accompany NSCI 2433.

Prerequisites & Notes

Corequisite: NSCI 2433

Credits: 1

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

Divine Design (3 Credit Hours)

SPRING SEMESTER - 14 Credit Hours

PHYS 2633 - GENERAL PHYSICS II

This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: PHYS 2533

Credits: 3

PHYS 263L - GENERAL PHYSICS II LAB

Laboratory to accompany PHYS 2633.

Prerequisites & Notes

NULL

Credits: 1

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (3 Credit Hours)

Year Four

FALL SEMESTER - 13 Credit Hours

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Divine Design Elective (3 Credit Hours)

BIOL 4023 - BIOLOGY FIELD STUDY

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a qualified off-site supervisor, who provides continuous evaluation of the intern's performance.

Prerequisites & Notes

Approval by department chair

Credits: 1-3

BIOL 4033 - RESEARCH RESIDENCY PROGRAM

This course is intended to provide a practical experience in clinical research at an inpatient setting for one full semester, approved by the department chair, and spearheaded by a qualified off-site supervisor who provides continuous evaluation of the intern's performance. This course will help establish the concepts that guide a successful research design. Furthermore, this course will expose students to the various opportunities of growth found within a large regional medical center.

Prerequisites & Notes

Prerequisite or corequisite: CHEM 3353

Credits: 3

BIOL 4373 - RESEARCH IN BIOLOGICAL SCIENCES

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Approval by Department Chair

Credits: 1-3 Variable

CHEM 3353 - BIOCHEMISTRY I

This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Prerequisites & Notes

Prerequisite: CHEM 2133 & MATH 2144

Credits: 3

CHEM 4373 - RESEARCH IN CHEMISTRY

This course is a practical experience in chemical research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Prerequisite: Approval by Department Chair

Credits: 3

SPRING SEMESTER - 14 Credit Hours

BIOL 2113 - BIOETHICS

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: **BIOL 1243 or BIOL 2183**

Credits: 3

BIOL 4903 - SENIOR CAPSTONE COURSE

Students will be required to propose a scientific research study related to the chosen concentration using the knowledge gained through the respective degree programs. This course is designed to review the student portfolio which will be developed over the course of obtaining the General Biology or Biology degree. Culmination of the student's degree will require completion of all items listed in the requirements for the student portfolio, including completion of research papers, presentations, and demonstration of knowledge of specific concepts in Chemistry, Biology, and Physics.

Prerequisites & Notes

Prerequisite: BIOL 2633 , BIOL 2533 , BIOL 253L , CHEM 2143 , CHEM 214L , MATH 2144

Credits: 3

Biology Specialization - Select One:

Concentration in Dentistry - Minimum 5 hours

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

NSCI 2433 - ANIMAL DIVERSITY

This course introduces foundational principles of zoology, including taxonomy, animal biology, architecture and ecology. Emphasis will be placed on the survey of invertebrate and vertebrate biodiversity.

Prerequisites & Notes

Corequisite: NSCI 243L

Credits: 3

NSCI 243L - ANIMAL DIVERSITY LAB

This course is a laboratory to accompany NSCI 2433.

Prerequisites & Notes

Corequisite: NSCI 2433

Credits: 1

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to

vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:
BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

Divine Design Elective (6 Credit Hours)**BIOL 4023 - BIOLOGY FIELD STUDY**

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a qualified off-site supervisor, who provides continuous evaluation of the intern's performance.

Prerequisites & Notes

Approval by department chair

Credits: 1-3

BIOL 4033 - RESEARCH RESIDENCY PROGRAM

This course is intended to provide a practical experience in clinical research at an inpatient setting for one full semester, approved by the department chair, and spearheaded by a qualified off-site supervisor who provides continuous evaluation of the intern's performance. This course will help establish the concepts that guide a successful research design. Furthermore, this course will expose students to the various opportunities of growth found within a large regional medical center.

Prerequisites & Notes

Prerequisite or corequisite: CHEM 3353

Credits: 3

BIOL 4373 - RESEARCH IN BIOLOGICAL SCIENCES

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Approval by Department Chair

Credits: 1-3 Variable

CHEM 4373 - RESEARCH IN CHEMISTRY

This course is a practical experience in chemical research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Prerequisite: Approval by Department Chair

Credits: 3

Bachelor of Science, Biology: Dentistry Four Year Plan B

Year One

FALL SEMESTER - 15 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite:BIOL 1233

Credits: 1

MATH 1413 - PRECALCULUS

This course covers algebraic relations and functions, systems of equations, rational functions, polynomials, exponential functions and logarithms, trigonometric functions and their inverses, graphs, and identities. A placement exam is given

at the beginning of each course. Students must demonstrate proficiency to remain in this course. A math score on the ACT of 21 or the SAT of 500 is required. Cost for items and materials provided by our Bookstore are charged as a fee attached to the course.

Prerequisites & Notes

NULL

Credits: 3

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite: BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

SPRING SEMESTER - 17 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:
BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:
BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

Year Two

FALL SEMESTER - 16 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

BIOL 2633 - CELL & MOLECULAR BIOLOGY

This course is an in-depth study of the structure and molecular functions of a composite cell. The anatomy and physiology of the cell will be covered.

Prerequisites & Notes

Prerequisite: BIOL 1233, BIOL 123L

Credits: 3

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

SPRING SEMESTER - 14 Credit Hours

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L

Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

BIOL 2113 - BIOETHICS

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: **BIOL 1243 or BIOL 2183**

Credits: 3

BIOL 2533 - GENERAL GENETICS

This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243, BIOL 124L

Corequisite:

BIOL 253L

Credits: 3

BIOL 253L - GENERAL GENETICS LAB

This course is the laboratory to accompany BIOL 2533. It is designed as an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243

BIOL 124L

Corequisite:

BIOL 2533

Credits: 1

Year Three

FALL SEMESTER - 15 Credit Hours

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L & MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

CHEM 3353 - BIOCHEMISTRY I

This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Prerequisites & Notes

Prerequisite: CHEM 2133 & MATH 2144

Credits: 3

SPRING SEMESTER - 18 Credit Hours

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods.

Prerequisites & Notes

Prerequisite:

CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

PHYS 2633 - GENERAL PHYSICS II

This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: PHYS 2533

Credits: 3

PHYS 263L - GENERAL PHYSICS II LAB

Laboratory to accompany PHYS 2633.

Prerequisites & Notes

NULL

Credits: 1

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (6 Credit Hours)

Year Four

FALL SEMESTER - 16 CREDIT HOURS

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

Biology Specialization - Select One:

Concentration in Dentistry - Minimum 5 hours

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

NSCI 2433 - ANIMAL DIVERSITY

This course introduces foundational principles of zoology, including taxonomy, animal biology, architecture and ecology. Emphasis will be placed on the survey of invertebrate and vertebrate biodiversity.

Prerequisites & Notes

Corequisite: NSCI 243L

Credits: 3

NSCI 243L - ANIMAL DIVERSITY LAB

This course is a laboratory to accompany NSCI 2433.

Prerequisites & Notes

Corequisite: NSCI 2433

Credits: 1

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Divine Design Elective (6 Credit Hours)

SPRING SEMESTER - 12 Credit Hours

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 4903 - SENIOR CAPSTONE COURSE

Students will be required to propose a scientific research study related to the chosen concentration using the knowledge gained through the respective degree programs. This course is designed to review the student portfolio which will be developed over the course of obtaining the General Biology or Biology degree. Culmination of the student's degree will require completion of all items listed in the requirements for the student portfolio, including completion of research papers, presentations, and demonstration of knowledge of specific concepts in Chemistry, Biology, and Physics.

Prerequisites & Notes

Prerequisite: BIOL 2633 , BIOL 2533 , BIOL 253L , CHEM 2143 , CHEM 214L , MATH 2144

Credits: 3

Biology Specialization - Select One:

Concentration in Dentistry - Minimum 5 hours

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

NSCI 2433 - ANIMAL DIVERSITY

This course introduces foundational principles of zoology, including taxonomy, animal biology, architecture and ecology. Emphasis will be placed on the survey of invertebrate and vertebrate biodiversity.

Prerequisites & Notes

Corequisite: NSCI 243L

Credits: 3

NSCI 243L - ANIMAL DIVERSITY LAB

This course is a laboratory to accompany NSCI 2433.

Prerequisites & Notes

Corequisite: NSCI 2433

Credits: 1

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

Divine Design Elective (3 Credit Hours)

Bachelor of Science, Biology: Medical Sciences 4 Year Plan A

Year One

FALL SEMESTER - 16 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite:BIOL 1233

Credits: 1

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

SPRING SEMESTER - 16 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L

Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Year Two**FALL SEMESTER - 15 Credit Hours****BIBL 1113 - THE STORY OF SCRIPTURE**

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L &MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

BIOL 2633 - CELL & MOLECULAR BIOLOGY

This course is an in-depth study of the structure and molecular functions of a composite cell. The anatomy and physiology of the cell will be covered.

Prerequisites & Notes

Prerequisite: BIOL 1233, BIOL 123L

Credits: 3

SPRING SEMESTER - 16 Credit Hours

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods.

Prerequisites & Notes

Prerequisite:

CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

BIOL 2533 - GENERAL GENETICS

This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243, BIOL 124L

Corequisite:

BIOL 253L

Credits: 3

BIOL 253L - GENERAL GENETICS LAB

This course is the laboratory to accompany BIOL 2533. It is designed as an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243

BIOL 124L

Corequisite:

BIOL 2533

Credits: 1

Year Three

FALL SEMESTER - 16 Credit Hours

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

*Recommended by AMCAS for those taking the MCAT exam

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

CHEM 3353 - BIOCHEMISTRY I

This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Prerequisites & Notes

Prerequisite: CHEM 2133 & MATH 2144

Credits: 3

*Recommended by AMCAS for those taking the MCAT exam

Divine Design (3 Credit Hours)

SPRING SEMESTER - 14 Credit Hours

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

*Recommended by AMCAS for those taking the MCAT exam

PHYS 2633 - GENERAL PHYSICS II

This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: PHYS 2533

Credits: 3

PHYS 263L - GENERAL PHYSICS II LAB

Laboratory to accompany PHYS 2633.

Prerequisites & Notes

NULL

Credits: 1

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

*Recommended by AMCAS for those taking the MCAT exam

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

*Recommended by AMCAS for those taking the MCAT exam

Year Four

FALL SEMESTER - 15 Credit Hours

Biology Specialization - Select Two:

Concentration in Medical Sciences - Minimum 13 hours (MUST INCLUDE 2 COURSES WITH LABS)

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

BIOL 4433 - DIAGNOSTIC CLINICAL FOUNDATIONS

This course will mainly utilize Problem-based learning, or PBL, as its pedagogical practice. This practice is employed in many medical and graduate programs. While there are variants of the technique, the approach includes the presentation of a clinical case or vignette to a small group of students who engage in discussion and problem solving over several class meetings. The professor will act as a facilitator who only provides supportive guidance for the students. The discussion of the problem is structured to enable students to create conceptual models to explain the multidisciplinary problem presented in the case. As students reveal the limits of their knowledge, they identify learning issues. Between classes, students research their learning issues and share results at the next class session.

Prerequisites & Notes

Prerequisite:

BIOL 2083

BIOL 2183

BIOL 3703

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

CHEM 4423 - MEDICINAL CHEMISTRY

This course is an introduction to the field of medicinal chemistry with a special focus on methods of drug design, synthesis, structure-activity relationships, and modes of action. In addition, it will acquaint students with modern applications of chemical techniques in the development of drug candidates to cure diseases based on the modulation of current drug targets, including proteins, nucleic acids, and other receptor-based functionalities. Focuses on structure-activity relationships, pharmacokinetics, and pharmacodynamics.

Prerequisites & Notes

Prerequisite: CHEM 2133

Credits: 3

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

Divine Design (9 Credit Hours)

SPRING SEMESTER - 12 Credit Hours

BIOL 2113 - BIOETHICS

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: **BIOL 1243 or BIOL 2183**

Credits: 3

BIOL 4903 - SENIOR CAPSTONE COURSE

Students will be required to propose a scientific research study related to the chosen concentration using the knowledge gained through the respective degree programs. This course is designed to review the student portfolio which will be developed over the course of obtaining the General Biology or Biology degree. Culmination of the student's degree will require completion of all items listed in the requirements for the student portfolio, including completion of research papers, presentations, and demonstration of knowledge of specific concepts in Chemistry, Biology, and Physics.

Prerequisites & Notes

Prerequisite: BIOL 2633 , BIOL 2533 , BIOL 253L , CHEM 2143 , CHEM 214L , MATH 2144

Credits: 3

Biology Specialization - Select One:

Concentration in Medical Sciences - Minimum 13 hours (MUST INCLUDE 2 COURSES WITH LABS)

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

BIOL 4433 - DIAGNOSTIC CLINICAL FOUNDATIONS

This course will mainly utilize Problem-based learning, or PBL, as its pedagogical practice. This practice is employed in many medical and graduate programs. While there are variants of the technique, the approach includes the presentation of a clinical case or vignette to a small group of students who engage in discussion and problem solving over several class meetings. The professor will act as a facilitator who only provides supportive guidance for the students. The discussion of the problem is structured to enable students to create conceptual models to explain the multidisciplinary problem presented in the case. As students reveal the limits of their knowledge, they identify learning issues. Between classes, students research their learning issues and share results at the next class session.

Prerequisites & Notes

Prerequisite:

BIOL 2083

BIOL 2183

BIOL 3703

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

CHEM 4423 - MEDICINAL CHEMISTRY

This course is an introduction to the field of medicinal chemistry with a special focus on methods of drug design, synthesis, structure-activity relationships, and modes of action. In addition, it will acquaint students with modern applications of chemical techniques in the development of drug candidates to cure diseases based on the modulation of current drug targets, including proteins, nucleic acids, and other receptor-based functionalities. Focuses on structure-activity relationships, pharmacokinetics, and pharmacodynamics.

Prerequisites & Notes

Prerequisite: CHEM 2133

Credits: 3

Divine Design (3 Credit Hours)

Bachelor of Science, Biology: Medical Sciences 4 Year Plan B**Year One****FALL SEMESTER - 15 Credit Hours**

*Pre-Calculus is a pre-requisite to Calc. I and Gen. Chem I, credits do not count toward your major.

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite:BIOL 1233

Credits: 1

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

MATH 1413 - PRECALCULUS

This course covers algebraic relations and functions, systems of equations, rational functions, polynomials, exponential functions and logarithms, trigonometric functions and their inverses, graphs, and identities. A placement exam is given at the beginning of each course. Students must demonstrate proficiency to remain in this course. A math score on the ACT of 21 or the SAT of 500 is required. Cost for items and materials provided by our Bookstore are charged as a fee attached to the course.

Prerequisites & Notes

NULL

Credits: 3

SPRING SEMESTER - 17 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:
BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:
BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:
BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

Year Two

FALL SEMESTER - 16 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions,

estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

BIOL 2633 - CELL & MOLECULAR BIOLOGY

This course is an in-depth study of the structure and molecular functions of a composite cell. The anatomy and physiology of the cell will be covered.

Prerequisites & Notes

Prerequisite: BIOL 1233, BIOL 123L

Credits: 3

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

SPRING SEMESTER - 17 Credit Hours

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L

Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

*Recommended by AMCAS for those taking the MCAT exam

BIOL 2533 - GENERAL GENETICS

This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243, BIOL 124L

Corequisite:

BIOL 253L

Credits: 3

BIOL 253L - GENERAL GENETICS LAB

This course is the laboratory to accompany BIOL 2533. It is designed as an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243

BIOL 124L

Corequisite:

BIOL 2533

Credits: 1

Divine Design (3 Credit Hours)

Year Three

FALL SEMESTER - 15 Credit Hours

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L & MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Biology Specialization - Select One:

Concentration in Medical Sciences - Minimum 13 hours (MUST INCLUDE 2 COURSES WITH LABS)

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:
BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

BIOL 4433 - DIAGNOSTIC CLINICAL FOUNDATIONS

This course will mainly utilize Problem-based learning, or PBL, as its pedagogical practice. This practice is employed in many medical and graduate programs. While there are variants of the technique, the approach includes the presentation of a clinical case or vignette to a small group of students who engage in discussion and problem solving over several class meetings. The professor will act as a facilitator who only provides supportive guidance for the students. The discussion of the problem is structured to enable students to create conceptual models to explain the multidisciplinary problem presented in the case. As students reveal the limits of their knowledge, they identify learning issues. Between classes, students research their learning issues and share results at the next class session.

Prerequisites & Notes

BIOL 2083

BIOL 2183

BIOL 3703

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

S

*Recommended by AMCAS for those taking the MCAT exam

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

S

*Recommended by AMCAS for those taking the MCAT exam

SPRING SEMESTER - 15 CREDIT HOURS

BIOL 2113 - BIOETHICS

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: BIOL 1243 or BIOL 2183

Credits: 3

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods.

Prerequisites & Notes

Prerequisite:

CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

PHYS 2633 - GENERAL PHYSICS II

This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: PHYS 2533

Credits: 3

PHYS 263L - GENERAL PHYSICS II LAB

Laboratory to accompany PHYS 2633.

Prerequisites & Notes

NULL

Credits: 1

Divine Design (3 Credit Hours)

Year Four

FALL SEMESTER - 15 Credit Hours

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

*Recommended by AMCAS for those taking the MCAT exam

CHEM 3353 - BIOCHEMISTRY I

This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Prerequisites & Notes

Prerequisite: CHEM 2133 & MATH 2144

Credits: 3

*Recommended by AMCAS for those taking the MCAT exam

Biology Specialization - Select One:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

BIOL 4433 - DIAGNOSTIC CLINICAL FOUNDATIONS

This course will mainly utilize Problem-based learning, or PBL, as its pedagogical practice. This practice is employed in many medical and graduate programs. While there are variants of the technique, the approach includes the presentation of a clinical case or vignette to a small group of students who engage in discussion and problem solving over several class meetings. The professor will act as a facilitator who only provides supportive guidance for the students. The discussion of the problem is structured to enable students to create conceptual models to explain the multidisciplinary problem presented in the case. As students reveal the limits of their knowledge, they identify learning issues. Between classes, students research their learning issues and share results at the next class session.

Prerequisites & Notes

Prerequisite:

BIOL 2083

BIOL 2183

BIOL 3703

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

Divine Design (6 Credit Hours)

SPRING SEMESTER - 15 Credit Hours

BIOL 4903 - SENIOR CAPSTONE COURSE

Students will be required to propose a scientific research study related to the chosen concentration using the knowledge gained through the respective degree programs. This course is designed to review the student portfolio which will be developed over the course of obtaining the General Biology or Biology degree. Culmination of the student's degree will require completion of all items listed in the requirements for the student portfolio, including completion of research papers, presentations, and demonstration of knowledge of specific concepts in Chemistry, Biology, and Physics.

Prerequisites & Notes

Prerequisite: BIOL 2633 , BIOL 2533 , BIOL 253L , CHEM 2143 , CHEM 214L , MATH 2144

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

*Recommended by AMCAS for those taking the MCAT exam

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

*Recommended by AMCAS for those taking the MCAT exam

Biology Specialization - Select One:

Concentration in Medical Sciences - Minimum 13 hours (MUST INCLUDE 2 COURSES WITH LABS)

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready

students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

BIOL 4433 - DIAGNOSTIC CLINICAL FOUNDATIONS

This course will mainly utilize Problem-based learning, or PBL, as its pedagogical practice. This practice is employed in many medical and graduate programs. While there are variants of the technique, the approach includes the presentation of a clinical case or vignette to a small group of students who engage in discussion and problem solving over several class meetings. The professor will act as a facilitator who only provides supportive guidance for the students. The discussion of the problem is structured to enable students to create conceptual models to explain the multidisciplinary problem presented in the case. As students reveal the limits of their knowledge, they identify learning issues. Between classes, students research their learning issues and share results at the next class session.

Prerequisites & Notes

Prerequisite:

BIOL 2083

BIOL 2183

BIOL 3703

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

*Recommended by AMCAS for those taking the MCAT exam

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

*Recommended by AMCAS for those taking the MCAT exam

Divine Design (3 Credit Hours)

Bachelor of Science, Biology: Pharmacy Four Year Plan A

Year One

FALL SEMESTER - 16 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite:BIOL 1233

Credits: 1

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

SPRING SEMESTER - 16 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L

Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Year Two

FALL SEMESTER - 15 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L & MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

BIOL 2633 - CELL & MOLECULAR BIOLOGY

This course is an in-depth study of the structure and molecular functions of a composite cell. The anatomy and physiology of the cell will be covered.

Prerequisites & Notes

Prerequisite: BIOL 1233, BIOL 123L

Credits: 3

SPRING SEMESTER - 16 Credit Hours

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods.

Prerequisites & Notes

Prerequisite:

CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

BIOL 2533 - GENERAL GENETICS

This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243, BIOL 124L

Corequisite:

BIOL 253L

Credits: 3

BIOL 253L - GENERAL GENETICS LAB

This course is the laboratory to accompany BIOL 2533. It is designed as an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:
BIOL 1243

BIOL 124L

Corequisite:

BIOL 2533

Credits: 1

Year Three

FALL SEMESTER - 16 Credit Hours

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:
CORE 1112 or Junior Standing

Credits: 3

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

Socio-Historical Inquiry - Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (3 Credit Hours)

SPRING SEMESTER - 13 Credit Hours

BIOL 2113 - BIOETHICS

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: **BIOL 1243 or BIOL 2183**

Credits: 3

PHYS 2633 - GENERAL PHYSICS II

This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: PHYS 2533

Credits: 3

PHYS 263L - GENERAL PHYSICS II LAB

Laboratory to accompany PHYS 2633.

Prerequisites & Notes

NULL

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Year Four

FALL SEMESTER - 16 Credit Hours

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

Biology Specialization - Select One:

Concentration in Pharmacy

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

CHEM 3353 - BIOCHEMISTRY I

This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Prerequisites & Notes

Prerequisite: CHEM 2133 & MATH 2144

Credits: 3

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

CHEM 4423 - MEDICINAL CHEMISTRY

This course is an introduction to the field of medicinal chemistry with a special focus on methods of drug design, synthesis, structure-activity relationships, and modes of action. In addition, it will acquaint students with modern applications of chemical techniques in the development of drug candidates to cure diseases based on the modulation of current drug targets, including proteins, nucleic acids, and other receptor-based functionalities. Focuses on structure-activity relationships, pharmacokinetics, and pharmacodynamics.

Prerequisites & Notes

Prerequisite: CHEM 2133

Credits: 3

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

Divine Design (3 Credit Hours)

SPRING SEMESTER - 12 Credit Hours

BIOL 4903 - SENIOR CAPSTONE COURSE

Students will be required to propose a scientific research study related to the chosen concentration using the knowledge gained through the respective degree programs. This course is designed to review the student portfolio which will be developed over the course of obtaining the General Biology or Biology degree. Culmination of the student's degree will require completion of all items listed in the requirements for the student portfolio, including completion of research papers, presentations, and demonstration of knowledge of specific concepts in Chemistry, Biology, and Physics.

Prerequisites & Notes

Prerequisite: BIOL 2633 , BIOL 2533 , BIOL 253L , CHEM 2143 , CHEM 214L , MATH 2144

Credits: 3

Biology Specialization - Select One:

Concentration in Pharmacy

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

CHEM 3353 - BIOCHEMISTRY I

This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Prerequisites & Notes

Prerequisite: CHEM 2133 & MATH 2144

Credits: 3

CHEM 4423 - MEDICINAL CHEMISTRY

This course is an introduction to the field of medicinal chemistry with a special focus on methods of drug design, synthesis, structure-activity relationships, and modes of action. In addition, it will acquaint students with modern applications of chemical techniques in the development of drug candidates to cure diseases based on the modulation of current drug targets, including proteins, nucleic acids, and other receptor-based functionalities. Focuses on structure-activity relationships, pharmacokinetics, and pharmacodynamics.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite:BIOL 1233

Credits: 1

MATH 1413 - PRECALCULUS

This course covers algebraic relations and functions, systems of equations, rational functions, polynomials, exponential functions and logarithms, trigonometric functions and their inverses, graphs, and identities. A placement exam is given at the beginning of each course. Students must demonstrate proficiency to remain in this course. A math score on the ACT of 21 or the SAT of 500 is required. Cost for items and materials provided by our Bookstore are charged as a fee attached to the course.

Prerequisites & Notes

NULL

Credits: 3

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

SPRING SEMESTER - 17 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:
CORE 1111

Credits: 2

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:
BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:
BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

Year Two

FALL SEMESTER - 16 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from

Genesis to Revelation.

Credits: 3

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

BIOL 2633 - CELL & MOLECULAR BIOLOGY

This course is an in-depth study of the structure and molecular functions of a composite cell. The anatomy and physiology of the cell will be covered.

Prerequisites & Notes

Prerequisite: BIOL 1233, BIOL 123L

Credits: 3

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

SPRING SEMESTER - 14 Credit Hours

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L

Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

BIOL 2533 - GENERAL GENETICS

This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243, BIOL 124L

Corequisite:

BIOL 253L

Credits: 3

BIOL 253L - GENERAL GENETICS LAB

This course is the laboratory to accompany BIOL 2533. It is designed as an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243

BIOL 124L

Corequisite:

BIOL 2533

Credits: 1

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Year Three

FALL SEMESTER - 17 Credit Hours

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L & MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of

the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

SPRING SEMESTER - 14 Credit Hours

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods.

Prerequisites & Notes

Prerequisite:

CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

Biology Specialization - Select One:

Concentration in Pharmacy

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

CHEM 3353 - BIOCHEMISTRY I

This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Prerequisites & Notes

Prerequisite: CHEM 2133 & MATH 2144

Credits: 3

CHEM 4423 - MEDICINAL CHEMISTRY

This course is an introduction to the field of medicinal chemistry with a special focus on methods of drug design, synthesis, structure-activity relationships, and modes of action. In addition, it will acquaint students with modern applications of chemical techniques in the development of drug candidates to cure diseases based on the modulation of current drug targets, including proteins, nucleic acids, and other receptor-based functionalities. Focuses on structure-activity relationships, pharmacokinetics, and pharmacodynamics.

Prerequisites & Notes

Prerequisite: CHEM 2133

Credits: 3

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Year Four

FALL SEMESTER - 16 Credit Hours

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

Divine Design (9 Credit Hours)

BIOL 4033 - RESEARCH RESIDENCY PROGRAM

This course is intended to provide a practical experience in clinical research at an inpatient setting for one full semester, approved by the department chair, and spearheaded by a qualified off-site supervisor who provides continuous evaluation of the intern's performance. This course will help establish the concepts that guide a successful research design. Furthermore, this course will expose students to the various opportunities of growth found within a large regional medical center.

Prerequisites & Notes

Prerequisite or corequisite: CHEM 3353

Credits: 3

BIOL 4373 - RESEARCH IN BIOLOGICAL SCIENCES

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Approval by Department Chair

Credits: 1-3 Variable

CHEM 4373 - RESEARCH IN CHEMISTRY

This course is a practical experience in chemical research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Prerequisite: Approval by Department Chair

Credits: 3

BIOL 4023 - BIOLOGY FIELD STUDY

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a qualified off-site supervisor, who provides continuous evaluation of the intern's performance.

Prerequisites & Notes

Approval by department chair

Credits: 1-3

SPRING SEMESTER - 16 Credit Hours**BIOL 2113 - BIOETHICS**

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: **BIOL 1243** or **BIOL 2183**

Credits: 3

BIOL 4903 - SENIOR CAPSTONE COURSE

Students will be required to propose a scientific research study related to the chosen concentration using the knowledge gained through the respective degree programs. This course is designed to review the student portfolio which will be developed over the course of obtaining the General Biology or Biology degree. Culmination of the student's degree will require completion of all items listed in the requirements for the student portfolio, including completion of research papers, presentations, and demonstration of knowledge of specific concepts in Chemistry, Biology, and Physics.

Prerequisites & Notes

Prerequisite: BIOL 2633 , BIOL 2533 , BIOL 253L , CHEM 2143 , CHEM 214L , MATH 2144

Credits: 3

PHYS 2633 - GENERAL PHYSICS II

This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: PHYS 2533

Credits: 3

PHYS 263L - GENERAL PHYSICS II LAB

Laboratory to accompany PHYS 2633.

Prerequisites & Notes

NULL

Credits: 1

Biology Specialization - Select One:

Concentration in Pharmacy

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

CHEM 3353 - BIOCHEMISTRY I

This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Prerequisites & Notes

Prerequisite: CHEM 2133 & MATH 2144

Credits: 3

CHEM 4423 - MEDICINAL CHEMISTRY

This course is an introduction to the field of medicinal chemistry with a special focus on methods of drug design, synthesis, structure-activity relationships, and modes of action. In addition, it will acquaint students with modern applications of chemical techniques in the development of drug candidates to cure diseases based on the modulation of current drug targets, including proteins, nucleic acids, and other receptor-based functionalities. Focuses on structure-activity relationships, pharmacokinetics, and pharmacodynamics.

Prerequisites & Notes

Prerequisite: CHEM 2133

Credits: 3

Divine Design (3 Credit Hours)

BIOL 4033 - RESEARCH RESIDENCY PROGRAM

This course is intended to provide a practical experience in clinical research at an inpatient setting for one full semester, approved by the department chair, and spearheaded by a qualified off-site supervisor who provides continuous evaluation of the intern's performance. This course will help establish the concepts that guide a successful research design. Furthermore, this course will expose students to the various opportunities of growth found within a large regional medical center.

Prerequisites & Notes

Prerequisite or corequisite: CHEM 3353

Credits: 3

BIOL 4373 - RESEARCH IN BIOLOGICAL SCIENCES

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Approval by Department Chair

Credits: 1-3 Variable

CHEM 4373 - RESEARCH IN CHEMISTRY

This course is a practical experience in chemical research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Prerequisite: Approval by Department Chair

Credits: 3

BIOL 4023 - BIOLOGY FIELD STUDY

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a qualified off-site supervisor, who provides continuous evaluation of the intern's performance.

Prerequisites & Notes

Approval by department chair

Credits: 1-3

Bachelor of Science, Biology: Veterinary Medicine Four Year Plan A

Year One

FALL SEMESTER - 16 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite:BIOL 1233

Credits: 1

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

SPRING SEMESTER - 16 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:
CORE 1111

Credits: 2

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:
BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:
BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L

Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Year Two

FALL SEMESTER - 14 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated

hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L & MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

BIOL 2633 - CELL & MOLECULAR BIOLOGY

This course is an in-depth study of the structure and molecular functions of a composite cell. The anatomy and physiology of the cell will be covered.

Prerequisites & Notes

Prerequisite: BIOL 1233, BIOL 123L

Credits: 3

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

SPRING SEMESTER - 15 Credit Hours

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods.

Prerequisites & Notes

Prerequisite:

CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

BIOL 2533 - GENERAL GENETICS

This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243, BIOL 124L

Corequisite:

BIOL 253L

Credits: 3

BIOL 253L - GENERAL GENETICS LAB

This course is the laboratory to accompany BIOL 2533. It is designed as an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243

BIOL 124L

Corequisite:

BIOL 2533

Credits: 1

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Year Three

FALL SEMESTER - 16 Credit Hours

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Biology Specialization - Select One:

Concentration in Veterinary Medicine - Minimum 9 hours

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

NSCI 3003 - ANIMAL PHYS. AND MOL. BIOLOGY

This course reviews and investigates the fundamental molecular processes and mechanisms that regulate the functions of various organ systems of animals (emphasis on vertebrates) to maintain homeostasis.

Prerequisites & Notes

Prerequisite: BIOL 1243 or NSCI 2433

Credits: 3

NSCI 3403 - AVIAN BIOLOGY (ORNITHOLOGY)

This course introduces the biology, ecology, and conservation of birds with a particular emphasis on Florida's avifauna.

Prerequisites & Notes

NULL

Credits: 3

NSCI 340L - AVIAN BIOLOGY (ORNITHOLOGY) LAB

This is a laboratory course to accompany NSCI 3403.

Prerequisites & Notes

Corequisite: NSCI 3403

Credits: 1

Divine Design (6 Credit Hours)

SPRING SEMESTER - 14 Credit Hours

NSCI 2433 - ANIMAL DIVERSITY

This course introduces foundational principles of zoology, including taxonomy, animal biology, architecture and ecology. Emphasis will be placed on the survey of invertebrate and vertebrate biodiversity.

Prerequisites & Notes

Corequisite: NSCI 243L

Credits: 3

NSCI 243L - ANIMAL DIVERSITY LAB

This course is a laboratory to accompany NSCI 2433.

Prerequisites & Notes

Corequisite: NSCI 2433

Credits: 1

PHYS 2633 - GENERAL PHYSICS II

This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: PHYS 2533

Credits: 3

PHYS 263L - GENERAL PHYSICS II LAB

Laboratory to accompany PHYS 2633.

Prerequisites & Notes

NULL

Credits: 1

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

Divine Design (3 Credit Hours)

Year Four

FALL SEMESTER - 13 Credit Hours

CHEM 3353 - BIOCHEMISTRY I

This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Prerequisites & Notes

Prerequisite: CHEM 2133 & MATH 2144

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

Biology Specialization - Select One:

Concentration in Veterinary Medicine - Minimum 9 hours

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of

the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

NSCI 3003 - ANIMAL PHYS. AND MOL. BIOLOGY

This course reviews and investigates the fundamental molecular processes and mechanisms that regulate the functions of various organ systems of animals (emphasis on vertebrates) to maintain homeostasis.

Prerequisites & Notes

Prerequisite: BIOL 1243 or NSCI 2433

Credits: 3

NSCI 3403 - AVIAN BIOLOGY (ORNITHOLOGY)

This course introduces the biology, ecology, and conservation of birds with a particular emphasis on Florida's avifauna.

Prerequisites & Notes

NULL

Credits: 3

NSCI 340L - AVIAN BIOLOGY (ORNITHOLOGY) LAB

This is a laboratory course to accompany NSCI 3403.

Prerequisites & Notes

Corequisite: NSCI 3403

Credits: 1

Divine Design (3 Credit Hours)

SPRING SEMESTER - 16 Credit Hours

BIOL 2113 - BIOETHICS

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: **BIOL 1243 or BIOL 2183**

Credits: 3

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4903 - SENIOR CAPSTONE COURSE

Students will be required to propose a scientific research study related to the chosen concentration using the knowledge gained through the respective degree programs. This course is designed to review the student portfolio which will be developed over the course of obtaining the General Biology or Biology degree. Culmination of the student's degree will require completion of all items listed in the requirements for the student portfolio, including completion of research papers, presentations, and demonstration of knowledge of specific concepts in Chemistry, Biology, and Physics.

Prerequisites & Notes

Prerequisite: BIOL 2633 , BIOL 2533 , BIOL 253L , CHEM 2143 , CHEM 214L , MATH 2144

Credits: 3

Biology Specialization - Select One:

Concentration in Veterinary Medicine - Minimum 9 hours

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

NSCI 3003 - ANIMAL PHYS. AND MOL. BIOLOGY

This course reviews and investigates the fundamental molecular processes and mechanisms that regulate the functions of various organ systems of animals (emphasis on vertebrates) to maintain homeostasis.

Prerequisites & Notes

Prerequisite: BIOL 1243 or NSCI 2433

Credits: 3

NSCI 3403 - AVIAN BIOLOGY (ORNITHOLOGY)

This course introduces the biology, ecology, and conservation of birds with a particular emphasis on Florida's avifauna.

Prerequisites & Notes

NULL

Credits: 3

NSCI 340L - AVIAN BIOLOGY (ORNITHOLOGY) LAB

This is a laboratory course to accompany NSCI 3403.

Prerequisites & Notes

Corequisite: NSCI 3403

Credits: 1

Divine Design (3 Credit Hours)

Bachelor of Science, General Biology Four Year Plan A

Year One

FALL SEMESTER - 16 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite:BIOL 1233

Credits: 1

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

SPRING SEMESTER - 16 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L

Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Year Two

FALL SEMESTER - 14 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L & MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

BIOL 2633 - CELL & MOLECULAR BIOLOGY

This course is an in-depth study of the structure and molecular functions of a composite cell. The anatomy and physiology of the cell will be covered.

Prerequisites & Notes

Prerequisite: BIOL 1233, BIOL 123L

Credits: 3

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

SPRING SEMESTER - 15 Credit Hours**THEO 1213 - LIVED THEOLOGY**

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

BIOL 2113 - BIOETHICS

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: **BIOL 1243 or BIOL 2183**

Credits: 3

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods.

Prerequisites & Notes

Prerequisite:
CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

BIOL 2533 - GENERAL GENETICS

This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:
BIOL 1243, BIOL 124L

Corequisite:

BIOL 253L

Credits: 3

BIOL 253L - GENERAL GENETICS LAB

This course is the laboratory to accompany BIOL 2533. It is designed as an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:
BIOL 1243

BIOL 124L

Corequisite:

BIOL 2533

Credits: 1

Year Three**FALL SEMESTER - 16 Credit Hours****CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR**

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

Biology Specialization - Select One:

Concentration in General Biology - Minimum 18 hours (MUST INCLUDE 3 COURSES WITH LABS)

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

NSCI 1433 - BOTANY

This course is an introductory course in plant anatomy, physiology and taxonomy. The history of mankind's medicinal use of plants and current updates will be covered.

Prerequisites & Notes

Corequisite: NSCI 143L

Credits: 3

NSCI 143L - BOTANY LAB

This course helps students apply what they have learned about plant anatomy, physiology and taxonomy through hands-on activities and field trips.

Prerequisites & Notes

Corequisite: NSCI 1433

Credits: 1

NSCI 2433 - ANIMAL DIVERSITY

This course introduces foundational principles of zoology, including taxonomy, animal biology, architecture and ecology. Emphasis will be placed on the survey of invertebrate and vertebrate biodiversity.

Prerequisites & Notes

Corequisite: NSCI 243L

Credits: 3

NSCI 243L - ANIMAL DIVERSITY LAB

This course is a laboratory to accompany NSCI 2433.

Prerequisites & Notes

Corequisite: NSCI 2433

Credits: 1

NSCI 3003 - ANIMAL PHYS. AND MOL. BIOLOGY

This course reviews and investigates the fundamental molecular processes and mechanisms that regulate the functions of various organ systems of animals (emphasis on vertebrates) to maintain homeostasis.

Prerequisites & Notes

Prerequisite: BIOL 1243 or NSCI 2433

Credits: 3

NSCI 3333 - ECOLOGY

This course introduces foundational principles of ecology, the study of relationships between organisms and the surrounding environment. This course will provide students with a broader understanding of how the physical and chemical characteristics of the environment influence the distribution and abundance of various species of organisms in an ecosystem.

Prerequisites & Notes

Corequisite: NSCI 333L

Credits: 3

NSCI 333L - ECOLOGY LAB

This is a laboratory to accompany NSCI 3333. Students will discern the interconnectivity between and among various species of organisms through the conduct of actual laboratory and field surveys in various habitats applying critical analysis to explain ecological phenomena learned in lecture.

Prerequisites & Notes

Corequisite: NSCI 3333

Credits: 1

NSCI 3403 - AVIAN BIOLOGY (ORNITHOLOGY)

This course introduces the biology, ecology, and conservation of birds with a particular emphasis on Florida's avifauna.

Prerequisites & Notes

NULL

Credits: 3

NSCI 340L - AVIAN BIOLOGY (ORNITHOLOGY) LAB

This is a laboratory course to accompany NSCI 3403.

Prerequisites & Notes

Corequisite: NSCI 3403

Credits: 1

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

Socio-Historical Inquiry - Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (3 Credit Hours)

SPRING SEMESTER - 14 Credit Hours

PHYS 2633 - GENERAL PHYSICS II

This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: PHYS 2533

Credits: 3

PHYS 263L - GENERAL PHYSICS II LAB

Laboratory to accompany PHYS 2633.

Prerequisites & Notes

NULL

Credits: 1

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

Biology Specialization - Select One with Lab:

Concentration in General Biology - Minimum 18 hours (MUST INCLUDE 3 COURSES WITH LABS)

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

NSCI 1433 - BOTANY

This course is an introductory course in plant anatomy, physiology and taxonomy. The history of mankind's medicinal use of plants and current updates will be covered.

Prerequisites & Notes

Corequisite: NSCI 143L

Credits: 3

NSCI 143L - BOTANY LAB

This course helps students apply what they have learned about plant anatomy, physiology and taxonomy through hands-on activities and field trips.

Prerequisites & Notes

Corequisite: NSCI 1433

Credits: 1

NSCI 2433 - ANIMAL DIVERSITY

This course introduces foundational principles of zoology, including taxonomy, animal biology, architecture and ecology. Emphasis will be placed on the survey of invertebrate and vertebrate biodiversity.

Prerequisites & Notes

Corequisite: NSCI 243L

Credits: 3

NSCI 243L - ANIMAL DIVERSITY LAB

This course is a laboratory to accompany NSCI 2433.

Prerequisites & Notes

Corequisite: NSCI 2433

Credits: 1

NSCI 3003 - ANIMAL PHYS. AND MOL. BIOLOGY

This course reviews and investigates the fundamental molecular processes and mechanisms that regulate the functions of various organ systems of animals (emphasis on vertebrates) to maintain homeostasis.

Prerequisites & Notes

Prerequisite: BIOL 1243 or NSCI 2433

Credits: 3

NSCI 3333 - ECOLOGY

This course introduces foundational principles of ecology, the study of relationships between organisms and the surrounding environment. This course will provide students with a broader understanding of how the physical and chemical characteristics of the environment influence the distribution and abundance of various species of organisms in an ecosystem.

Prerequisites & Notes

Corequisite: NSCI 333L

Credits: 3

NSCI 333L - ECOLOGY LAB

This is a laboratory to accompany NSCI 3333. Students will discern the interconnectivity between and among various species of organisms through the conduct of actual laboratory and field surveys in various habitats applying critical analysis to explain ecological phenomena learned in lecture.

Prerequisites & Notes

Corequisite: NSCI 3333

Credits: 1

NSCI 3403 - AVIAN BIOLOGY (ORNITHOLOGY)

This course introduces the biology, ecology, and conservation of birds with a particular emphasis on Florida's avifauna.

Prerequisites & Notes

NULL

Credits: 3

NSCI 340L - AVIAN BIOLOGY (ORNITHOLOGY) LAB

This is a laboratory course to accompany NSCI 3403.

Prerequisites & Notes

Corequisite: NSCI 3403

Credits: 1

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

Divine Design (3 Credit Hours)

Year Four

FALL SEMESTER - 16 Credit Hours

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

Biology Specialization - Select Two:

Select one with Lab.

Concentration in General Biology - Minimum 18 hours (MUST INCLUDE 3 COURSES WITH LABS)

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

NSCI 1433 - BOTANY

This course is an introductory course in plant anatomy, physiology and taxonomy. The history of mankind's medicinal use of plants and current updates will be covered.

Prerequisites & Notes

Corequisite: NSCI 143L

Credits: 3

NSCI 143L - BOTANY LAB

This course helps students apply what they have learned about plant anatomy, physiology and taxonomy through hands-on activities and field trips.

Prerequisites & Notes

Corequisite: NSCI 1433

Credits: 1

NSCI 2433 - ANIMAL DIVERSITY

This course introduces foundational principles of zoology, including taxonomy, animal biology, architecture and ecology. Emphasis will be placed on the survey of invertebrate and vertebrate biodiversity.

Prerequisites & Notes

Corequisite: NSCI 243L

Credits: 3

NSCI 243L - ANIMAL DIVERSITY LAB

This course is a laboratory to accompany NSCI 2433.

Prerequisites & Notes

Corequisite: NSCI 2433

Credits: 1

NSCI 3003 - ANIMAL PHYS. AND MOL. BIOLOGY

This course reviews and investigates the fundamental molecular processes and mechanisms that regulate the functions of various organ systems of animals (emphasis on vertebrates) to maintain homeostasis.

Prerequisites & Notes

Prerequisite: BIOL 1243 or NSCI 2433

Credits: 3

NSCI 3333 - ECOLOGY

This course introduces foundational principles of ecology, the study of relationships between organisms and the surrounding environment. This course will provide students with a broader understanding of how the physical and chemical characteristics of the environment influence the distribution and abundance of various species of organisms in an ecosystem.

Prerequisites & Notes

Corequisite: NSCI 333L

Credits: 3

NSCI 333L - ECOLOGY LAB

This is a laboratory to accompany NSCI 3333. Students will discern the interconnectivity between and among various species of organisms through the conduct of actual laboratory and field surveys in various habitats applying critical analysis to explain ecological phenomena learned in lecture.

Prerequisites & Notes

Corequisite: NSCI 3333

Credits: 1

NSCI 3403 - AVIAN BIOLOGY (ORNITHOLOGY)

This course introduces the biology, ecology, and conservation of birds with a particular emphasis on Florida's avifauna.

Prerequisites & Notes

NULL

Credits: 3

NSCI 340L - AVIAN BIOLOGY (ORNITHOLOGY) LAB

This is a laboratory course to accompany NSCI 3403.

Prerequisites & Notes

Corequisite: NSCI 3403

Credits: 1

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

Divine Design (6 Credit Hours)

SPRING SEMESTER - 13 Credit Hours**BIOL 4903 - SENIOR CAPSTONE COURSE**

Students will be required to propose a scientific research study related to the chosen concentration using the knowledge gained through the respective degree programs. This course is designed to review the student portfolio which will be

developed over the course of obtaining the General Biology or Biology degree. Culmination of the student's degree will require completion of all items listed in the requirements for the student portfolio, including completion of research papers, presentations, and demonstration of knowledge of specific concepts in Chemistry, Biology, and Physics.

Prerequisites & Notes

Prerequisite: BIOL 2633 , BIOL 2533 , BIOL 253L , CHEM 2143 , CHEM 214L , MATH 2144

Credits: 3

Biology Specialization - Select One with Lab:

Concentration in General Biology - Minimum 18 hours (MUST INCLUDE 3 COURSES WITH LABS)

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

NSCI 1433 - BOTANY

This course is an introductory course in plant anatomy, physiology and taxonomy. The history of mankind's medicinal use of plants and current updates will be covered.

Prerequisites & Notes

Corequisite: NSCI 143L

Credits: 3

NSCI 143L - BOTANY LAB

This course helps students apply what they have learned about plant anatomy, physiology and taxonomy through hands-on activities and field trips.

Prerequisites & Notes

Corequisite: NSCI 1433

Credits: 1

NSCI 2433 - ANIMAL DIVERSITY

This course introduces foundational principles of zoology, including taxonomy, animal biology, architecture and ecology. Emphasis will be placed on the survey of invertebrate and vertebrate biodiversity.

Prerequisites & Notes

Corequisite: NSCI 243L

Credits: 3

NSCI 243L - ANIMAL DIVERSITY LAB

This course is a laboratory to accompany NSCI 2433.

Prerequisites & Notes

Corequisite: NSCI 2433

Credits: 1

NSCI 3333 - ECOLOGY

This course introduces foundational principles of ecology, the study of relationships between organisms and the surrounding environment. This course will provide students with a broader understanding of how the physical and chemical characteristics of the environment influence the distribution and abundance of various species of organisms in an ecosystem.

Prerequisites & Notes

Corequisite: NSCI 333L

Credits: 3

NSCI 333L - ECOLOGY LAB

This is a laboratory to accompany NSCI 3333. Students will discern the interconnectivity between and among various species of organisms through the conduct of actual laboratory and field surveys in various habitats applying critical analysis to explain ecological phenomena learned in lecture.

Prerequisites & Notes

Corequisite: NSCI 3333

Credits: 1

NSCI 3003 - ANIMAL PHYS. AND MOL. BIOLOGY

This course reviews and investigates the fundamental molecular processes and mechanisms that regulate the functions of various organ systems of animals (emphasis on vertebrates) to maintain homeostasis.

Prerequisites & Notes

Prerequisite: BIOL 1243 or NSCI 2433

Credits: 3

NSCI 3403 - AVIAN BIOLOGY (ORNITHOLOGY)

This course introduces the biology, ecology, and conservation of birds with a particular emphasis on Florida's avifauna.

Prerequisites & Notes

NULL

Credits: 3

NSCI 340L - AVIAN BIOLOGY (ORNITHOLOGY) LAB

This is a laboratory course to accompany NSCI 3403.

Prerequisites & Notes

Corequisite: NSCI 3403

Credits: 1

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

Divine Design (6 Credit Hours)

Bachelor of Science, Health Science and Business Four Year Plan

Year One

FALL SEMESTER - 15 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite: BIOL 1233

Credits: 1

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1413 - PRECALCULUS

This course covers algebraic relations and functions, systems of equations, rational functions, polynomials, exponential functions and logarithms, trigonometric functions and their inverses, graphs, and identities. A placement exam is given at the beginning of each course. Students must demonstrate proficiency to remain in this course. A math score on the ACT of 21 or the SAT of 500 is required. Cost for items and materials provided by our Bookstore are charged as a fee attached to the course.

Prerequisites & Notes

NULL

Credits: 3

Biology Specialization with Lab - Select one:

Concentration in Health Sciences - Minimum 13 hours (MUST INCLUDE 2 COURSES WITH LABS)

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

BIOL 4433 - DIAGNOSTIC CLINICAL FOUNDATIONS

This course will mainly utilize Problem-based learning, or PBL, as its pedagogical practice. This practice is employed in many medical and graduate programs. While there are variants of the technique, the approach includes the presentation of a clinical case or vignette to a small group of students who engage in discussion and problem solving over several class meetings. The professor will act as a facilitator who only provides supportive guidance for the students. The discussion of the problem is structured to enable students to create conceptual models to explain the multidisciplinary problem presented in the case. As students reveal the limits of their knowledge, they identify learning issues. Between classes, students research their learning issues and share results at the next class session.

Prerequisites & Notes

Prerequisite:

BIOL 2083

BIOL 2183

BIOL 3703

Credits: 3

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L & MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods.

Prerequisites & Notes

Prerequisite:

CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

CHEM 3353 - BIOCHEMISTRY I

This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Prerequisites & Notes

Prerequisite: CHEM 2133 & MATH 2144

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

SPRING SEMESTER - 15 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

BUSI 2203 - MICROECONOMICS

This survey course develops the concepts of individual economic units, such as households, firms, and industries. In this study, topics will include economic behaviors relating to spending, saving, investment, labor economics, and prices.

Prerequisites & Notes

None

Credits: 3

Biology Specialization - Select One:

Concentration in Health Sciences - Minimum 13 hours (MUST INCLUDE 2 COURSES WITH LABS)

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

BIOL 4433 - DIAGNOSTIC CLINICAL FOUNDATIONS

This course will mainly utilize Problem-based learning, or PBL, as its pedagogical practice. This practice is employed in many medical and graduate programs. While there are variants of the technique, the approach includes the presentation of a clinical case or vignette to a small group of students who engage in discussion and problem solving over several class meetings. The professor will act as a facilitator who only provides supportive guidance for the students. The discussion of the problem is structured to enable students to create conceptual models to explain the multidisciplinary problem presented in the case. As students reveal the limits of their knowledge, they identify learning issues. Between classes, students research their learning issues and share results at the next class session.

Prerequisites & Notes

Prerequisite:

BIOL 2083

BIOL 2183

BIOL 3703

Credits: 3

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L & MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods.

Prerequisites & Notes

Prerequisite:

CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

CHEM 3353 - BIOCHEMISTRY I

This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Prerequisites & Notes

Prerequisite: CHEM 2133 & MATH 2144

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

Year Two

FALL SEMESTER - 16 Credit Hours

BUSI 1013 - INTRO TO ACCOUNTING AND FINANCE

This course provides an introduction to the basics of accounting and finance. It is intended for business minors and places emphasis on the understanding of the language of accounting and finance, recording of transactions, financial statements, time value of money, financial ratios, and managerial decision-making, using accounting and finance information.

Prerequisites & Notes

None

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

BIOL 2633 - CELL & MOLECULAR BIOLOGY

This course is an in-depth study of the structure and molecular functions of a composite cell. The anatomy and physiology of the cell will be covered.

Prerequisites & Notes

Prerequisite: BIOL 1233, BIOL 123L

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

SPRING SEMESTER - 14 Credit Hours**THEO 1213 - LIVED THEOLOGY**

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L

Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

BIOL 2533 - GENERAL GENETICS

This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243, BIOL 124L

Corequisite:

BIOL 253L

Credits: 3

BIOL 253L - GENERAL GENETICS LAB

This course is the laboratory to accompany BIOL 2533. It is designed as an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243

BIOL 124L

Corequisite:

BIOL 2533

Credits: 1

Year Three

FALL SEMESTER - 14 CREDIT HOURS

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

BUSI 3403 - BUSINESS LAW I

This course discusses legal principles which apply to normal business transactions, contracts, agency, property, insurance, wills and trusts, and torts.

Prerequisites & Notes

None

Credits: 3

Creative-Aesthetic Inquiry- Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Divine Design (1 Credit Hour)

SPRING SEMESTER - 16 Credit Hours

PHYS 2633 - GENERAL PHYSICS II

This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: PHYS 2533

Credits: 3

PHYS 263L - GENERAL PHYSICS II LAB

Laboratory to accompany PHYS 2633.

Prerequisites & Notes

NULL

Credits: 1

BUSI 3203 - PRINCIPLES OF MANAGEMENT

As a survey of administration and management, this course covers the fundamentals of planning, organizing, staffing, leading, and controlling. The course integrates the functions of management with appropriate quantitative and behavioral concepts.

Prerequisites & Notes

BUSI 2123 OR BUSI 2113

Credits: 3

BUSI 3303 - MARKETING

This course examines the structures, functions and behaviors of marketing systems. The basic exchange functions of pricing, product development and management, promotion and distribution are studied within the contexts of decision-making, consumer satisfaction, and the environments of business.

Prerequisites & Notes

BUSI 2113 or BUSI 2123

Credits: 3

Socio-Historical Inquiry - Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Divine Design Elective (3 Credits)

Year Four

FALL SEMESTER - 15 Credit Hours

Biology Specialization - Select one:

Concentration in Health Sciences - Minimum 13 hours (MUST INCLUDE 2 COURSES WITH LABS)

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready

students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

BIOL 4433 - DIAGNOSTIC CLINICAL FOUNDATIONS

This course will mainly utilize Problem-based learning, or PBL, as its pedagogical practice. This practice is employed in many medical and graduate programs. While there are variants of the technique, the approach includes the presentation of a clinical case or vignette to a small group of students who engage in discussion and problem solving over several class meetings. The professor will act as a facilitator who only provides supportive guidance for the students. The discussion of the problem is structured to enable students to create conceptual models to explain the multidisciplinary problem presented in the case. As students reveal the limits of their knowledge, they identify learning issues. Between classes, students research their learning issues and share results at the next class session.

Prerequisites & Notes

Prerequisite:

BIOL 2083

BIOL 2183

BIOL 3703

Credits: 3

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L & MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer

chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods.

Prerequisites & Notes

Prerequisite:

CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

CHEM 3353 - BIOCHEMISTRY I

This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Prerequisites & Notes

Prerequisite: CHEM 2133 & MATH 2144

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

Socio-Historical Inquiry - Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing

historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Business Specialization - Select one:

BUSI 3103 - PRINCIPLES OF FINANCE

This course covers financial organization and the principles and practices of decision making involving acquiring and allocating capital, dividend policy, operating and financial leverage, financial markets and related topics.

Prerequisites & Notes

BUSI 2233

Credits: 3

BUSI 3513 - QUANTITATIVE METHODS

This course covers quantitative aspects of problem-solving and decision-making. This includes waiting lines, inventory, Markov process, probability, game theory, forecasting, and linear programming. Emphasis is on practical quantitative and qualitative knowledge, skills, and abilities for the business major.

Prerequisites & Notes

MATH 2023

Credits: 3

BUSI 3853 - MANAGEMENT INFORMATION SYSTEMS

This course addresses the basics of information technology, information systems, and the management of information systems. Students apply abstract and systems thinking skills to design and implement an information system.

Prerequisites & Notes

CTIS 2133

Credits: 3

BUSI 4603 - BUSINESS POLICIES

This course is designed as the capstone learning experience for all business majors. The course will integrate separate functional activities into a comprehensive understanding of how teamwork benefits the operation of an organization. Emphasis is placed upon policy formulation and documentation of a strategic plan for a simulated organization.

Prerequisites & Notes

All business core requirements and senior status

Credits: 3

MKTG 3133 - PROFESSIONAL SELLING

This course will focus on developing and applying essential professional selling skills through the use of interpersonal communication to effectively market goods and services and yourself. Emphasis is placed upon the personal selling process through study and application.

Prerequisites & Notes

BUSI 3303

Credits: 3

MKTG 4113 - ADVERTISING

This course covers advertising, creative philosophies, copy preparation, ad-layout techniques for diverse advertising media, media planning, and media-buying tactics.

Prerequisites & Notes

BUSI 3303

Credits: 3

MNGT 3183 - ORGANIZATIONAL BEHAVIOR

This is a study of behavioral science theory and practice exploring management, leadership, motivation, group dynamics, relations and organizational systems. Topics will concentrate on applying organizational resources for optimal efficiency.

Prerequisites & Notes

NULL

Credits: 3

LDRS 2123 - LEADERSHIP PRINCIPLES

This course focuses upon the development and challenges of effective leadership by reviewing historical leaders and the development of various leadership theories. This includes leader traits, skills, and behaviors; models; and other approaches to leadership.

Prerequisites & Notes

None

Credits: 3

LDRS 2223 - LEADERSHIP THEORY

This course focuses upon the development and challenges of effective leadership by reviewing influential writings and speeches, along with various leadership theories and philosophies. This includes adaptive, authentic, authoritarian, cross-cultural, democratic, ethical, Great Man Theory, servant, and transformational leadership, along with women in leadership and followership.

Prerequisites & Notes

None

Credits: 3

Divine Design (6 Credit Hours)

SPRING SEMESTER - 14 Credit Hours

BIOL 2113 - BIOETHICS

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: **BIOL 1243** or **BIOL 2183**

Credits: 3

Biology Specialization - Select one:

Concentration in Health Sciences - Minimum 13 hours (MUST INCLUDE 2 COURSES WITH LABS)

-F (Fall only), S (Spring only), FO (Fall odd years only), FE (Fall even years only), SO (Spring odd years only), & SE (Spring even years only).

The rotation schedule is subject to change. Students must double check course offerings with advisor.

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

BIOL 3163 - IMMUNOLOGY

In this course, students explore fundamental immunological processes to provide an orientation to immunology. Topics covered include innate and adaptive immunity as well as the function and anatomy of the cells, tissues, and organs of the immune system.

Prerequisites & Notes

Prerequisite: BIOL 1243, CHEM 1633

Credits: 3

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

BIOL 3333 - HISTOLOGY

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite: BIOL 2633

Corequisite: BIOL 333L

Credits: 3

BIOL 333L - HISTOLOGY LAB

This course is a microscopic study of human body organ cells, basic tissue types, and organization into specific organs and organ systems.

Prerequisites & Notes

Prerequisite:

BIOL 2633

Corequisite:

BIOL 3333

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4013 - MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi.

Prerequisites & Notes

Prerequisite: BIOL 2633 and CHEM 1633

Corequisite: BIOL 401L

Credits: 3

BIOL 401L - MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 4013.

Prerequisites & Notes

Corequisite: BIOL 4013

Credits: 1

BIOL 4133 - DEVELOPMENTAL BIOLOGY

This course is the study of embryology focusing on the anatomical, cellular, and molecular aspects of germ cell formation, fertilization, early development and morphogenesis, induction, and differentiation as they apply to vertebrates with a specific focus on human development.

Prerequisites & Notes

Prerequisite:

BIOL 2533

BIOL 2633

Corequisite:

BIOL 413L

Credits: 3

BIOL 413L - DEVELOPMNTL ANATOMY LAB(EMBRYOLOGY)

Laboratory to accompany BIOL 4133 Developmental Anatomy (Embryology).

Prerequisites & Notes

Corequisite: BIOL 4133

Credits: 1

BIOL 4223 - PRINCIPLES OF NEUROSCIENCE

In this course, students are introduced to the organization and function of the nervous system. Topics covered include neural signaling, channels and transporters, neurotransmitters, synaptic transmission, sensory processing, synaptic plasticity, and memory. Students will also be introduced to pathophysiology of neurological and psychological disorders.

Prerequisites & Notes

Prerequisite: BIOL 2633

Credits: 3

BIOL 4433 - DIAGNOSTIC CLINICAL FOUNDATIONS

This course will mainly utilize Problem-based learning, or PBL, as its pedagogical practice. This practice is employed in many medical and graduate programs. While there are variants of the technique, the approach includes the presentation of a clinical case or vignette to a small group of students who engage in discussion and problem solving over several class meetings. The professor will act as a facilitator who only provides supportive guidance for the students. The discussion of the problem is structured to enable students to create conceptual models to explain the multidisciplinary problem presented in the case. As students reveal the limits of their knowledge, they identify learning issues. Between classes, students research their learning issues and share results at the next class session.

Prerequisites & Notes

Prerequisite:

BIOL 2083

BIOL 2183

BIOL 3703

Credits: 3

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L & MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

CHEM 2143 - ORGANIC CHEMISTRY II

CHEM 2143 is a continuation of organic chemistry I. This course is designed to provide a thorough treatment of the chemistry of ethers, thiols, polyenes, aromatic compounds, phenols, aldehydes, ketones, carboxylic acids, acid derivatives, enolates, amines, heterocycles, and an introduction to biomolecules. The relationships between structure and reactivity will be studied in greater detail, as well as the mechanism of organic reactions and the applications of spectroscopy for organic structure elucidation.

Prerequisites & Notes

Prerequisite:

CHEM 2133, CHEM 213L & MATH 2144

Corequisite: CHEM 214L

Credits: 3

CHEM 214L - ORGANIC CHEMISTRY II LAB

CHEM 214L is the laboratory course that accompanies CHEM 2143. CHEM 214L will have a special emphasis on organic synthesis as well as the use of modern instrumentation for the characterization of synthetic products via methods of analysis including IR, NMR, UV/Vis spectroscopy, gas chromatography, and other modern analytical methods.

Prerequisites & Notes

Prerequisite:

CHEM 2133

CHEM 213L

MATH 2144

Corequisite:

CHEM 2143

Credits: 2

CHEM 3353 - BIOCHEMISTRY I

This course is an introduction to the structures and cellular functions of carbohydrates, lipids, proteins, and nucleic acids. Topics include basic concepts of enzymes and kinetics, biological membranes, and transport, and biosignaling.

Prerequisites & Notes

Prerequisite: CHEM 2133 & MATH 2144

Credits: 3

CHEM 3363 - BIOCHEMISTRY II

This course is a continuation of CHEM 3353 with an emphasis on bioenergetics and metabolism. Topics include glycolysis, citric acid cycle, fatty acid catabolism, and lipid biosynthesis. Metabolic pathways of amino acids, nucleotides, and hormones will also be discussed.

Prerequisites & Notes

Prerequisite: CHEM 3353

Corequisite: CHEM 336L

Credits: 3

CHEM 336L - BIOCHEMISTRY LAB

This is a laboratory to accompany the courses, Biochemistry I and II. This course involves the introduction of biochemical laboratory principles and techniques. Emphasis is placed on the isolation, identification, and characterization of important biomolecules.

Prerequisites & Notes

Prerequisite: CHEM 313L

Corequisite: CHEM 3363

Credits: 1

Divine Design (6 Credit Hours)

Divine Design (Major Specific Experiential Learning) - 3 Credit Hours

BIOL 4023 - BIOLOGY FIELD STUDY

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a qualified off-site supervisor, who provides continuous evaluation of the intern's performance.

Prerequisites & Notes

Approval by department chair

Credits: 1-3

BIOL 4033 - RESEARCH RESIDENCY PROGRAM

This course is intended to provide a practical experience in clinical research at an inpatient setting for one full semester, approved by the department chair, and spearheaded by a qualified off-site supervisor who provides continuous evaluation of the intern's performance. This course will help establish the concepts that guide a successful research design. Furthermore, this course will expose students to the various opportunities of growth found within a large regional medical center.

Prerequisites & Notes

Prerequisite or corequisite: CHEM 3353

Credits: 3

BIOL 4373 - RESEARCH IN BIOLOGICAL SCIENCES

This course is a practical experience in biological research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Approval by Department Chair

Credits: 1-3 Variable

CHEM 4373 - RESEARCH IN CHEMISTRY

This course is a practical experience in chemical research for one full semester, approved by the department chair, and supervised by a principal investigator, who provides continuous evaluation of the student's research.

Prerequisites & Notes

Prerequisite: Approval by Department Chair

Credits: 3

MKTG 4903 - MARKETING INTERNSHIP

This course involves work experience on and/or off campus, in an organization involving on-the-job training in a marketing related area. Intern will be supervised by a faculty coordinator and a supervisor in the organization. Reports of work experience are submitted to the coordinator.

Repeatable: Course can be repeated 2 times for a total of 6 credit hours

Prerequisites & Notes

Approval of the Chair of the Department of Business

Credits: 3

MNGT 4903 - MANAGEMENT INTERNSHIP

This is a supervised, structured work experience designed to augment and develop practical experience in conjunction with regular coursework. Participants are strongly encouraged to utilize this option to explore potential career paths. Junior standing and at least 2.5 cumulative GPA are requirements of this course.

Prerequisites & Notes

DA

Credits: 3

Nursing

Dean

Aimee Franklin

Dean, College of Natural and Health Sciences

Associate Professor of Biology

Chair, Coordinators, & Faculty

Susan Tasker-Weaver

Director, Department of Nursing

Associate Professor of Nursing

Jeanna L. Kerchner

Chair of Undergraduate Program

Assistant Professor of Nursing

Kimberly L. Acevedo

Associate Professor of Nursing

Laurie A. Pomella

Associate Professor of Nursing

Niki M. Musick

Assistant Professor of Nursing

Kara L. Dorsey

Full Time Instructor of Nursing

The Pre-Licensure BSN program is designed for students who hold no professional nursing degree or license and want to become professional nurses.

Southeastern University's College of Natural and Health Sciences awards the degree of Bachelor of Science in Nursing (BSN). Upon completion of the nursing program, students meet the educational qualifications of the Florida Board of Nursing (FBON) to apply for the NCLEX-RN (national) licensure exam in the state of their choice. Students who pass this examination will then be licensed to practice professional nursing as a registered nurse (RN) by the particular state wherein they selected to take the examination.

The RN-BSN track provides registered nurses a plan of study (POS) leading to the completion of a BSN degree. This post-licensure track is designed to build on the nurse's prior knowledge from their Associate Degree in Nursing (ADN) education, including arts, sciences, and humanities courses, and enhances the nurse's knowledge and practice. Each student's POS is individualized and flexible according to their personal, professional, and educational needs, allowing students to take one or more courses every eight weeks. Students will transfer or complete lower-division courses,

including arts, sciences, and humanities in any sequence preferred, prior to taking the final upper-division (NURS 4502) Nursing Capstone course. Students may integrate lower-division courses with upper-division courses as necessary.

Main Campus (Lakeland, FL)

Bachelor of Science, Nursing

Bachelor of Science, Nursing Four Year Plan

There are two different and separate tracks to obtain a Bachelor of Science in Nursing (BSN) degree. This is the Pre-Licensure BSN track designed for students who hold no professional nursing degree or license and desire to become a professional registered nurse (RN).

The second BSN track is for registered nurses (RNs) who have an Associate degree and currently hold a license to practice. This track is fully online and developed for the working nurse who desires to continue their educational career. Information for this track is located under Programs of Study>Nursing>Online Bachelor of Science, Nursing (RN to BSN - Online).

Equipping students to serve Christ and the world as competent professional nurses through Spirit-empowered ethical practice informed by critical thinking, life-long learning, and leadership.

The vision of the Nursing Program, also developed to reflect the vision of the University, is described below:

The Southeastern University Nursing Program will offer a professional education program that prepares students to provide excellent nursing care to individuals, families, and communities through the integration of faith, learning, and service.

Faculty will provide a Christ-centered, student-focused learning community that encourages students to grow in their role as professional nurses.

Students will gain an educational foundation that allows them to provide safe, evidence-based, and culturally competent care for all patients, with special emphasis on the underserved. They will use clinical judgment to integrate evolving technology and research findings into caring interventions that improve patients' health and support the sick and dying, their families, and communities.

Students will commit to life-long learning, rigorous scholarship, leadership, and collaborative interprofessional practice as a means of serving their communities. The baccalaureate degree program in nursing at Southeastern University is accredited by the Commission on Collegiate Nursing Education (<http://www.ccnaccreditation.org>).

Southeastern University's College of Natural and Health Sciences awards the degree of Bachelor of Science in Nursing (BSN). Upon completion of the nursing program, students meet the educational qualifications of the Florida Board of Nursing (FBON) for applying for the NCLEX-RN (national) licensure exam in the state of their choice. Students who pass this examination will then be licensed to practice professional nursing as a registered nurse (RN) by the particular state wherein they selected to take the examination

Total Program Hours - 120 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

DISCURSIVE INQUIRY - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

NATURAL-SCIENTIFIC INQUIRY - Select One (1) of the Following (4 Credit Hours):

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

QUANTITATIVE INQUIRY - Select One(1) of the Following (3 Credit Hours):

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

SOCIO-HISTORICAL INQUIRY - Select Two (2) of the Following (6 Credit Hours):

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

CREATIVE-AESTHETIC INQUIRY - Select One(1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 68 Credit Hours

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

CHEM 1213 - INTRO TO CHEMISTRY

This course is an introduction to basic concepts of general chemistry, introduction of periodic properties of elements and compounds, basic atomic-molecular structure, and properties of substances and reactions related to gas laws.

Prerequisites & Notes

Corequisite: CHEM 121L

Credits: 3

CHEM 121L - INTRO TO CHEMISTRY LAB

This course is the laboratory course to accompany CHEM 1213.

Prerequisites & Notes

Corequisite: CHEM 1213

Credits: 1

BIOL 2403 - INTRODUCTION TO MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi. This course is primarily for students in the BSN program and focuses on organisms relevant to their field.

Prerequisites & Notes

Prerequisite: BIOL 2083 BIOL 2183

Corequisite: BIOL 240L

Credits: 3

BIOL 240L - INTRODUCTION TO MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 2403.

Prerequisites & Notes

Prerequisite:

BIOL 2083

BIOL 2183

Corequisite:

BIOL 2403

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of

disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

BIOL 2113 - BIOETHICS

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: BIOL 1243 or BIOL 2183

Credits: 3

NURS 3003 - HEALTH ASSESSMENT

This course prepares students to complete a physical, psychosocial, spiritual, and cultural assessment for patients throughout the life span. The course focuses on differentiating between normal and abnormal findings. Students will develop beginning competence in performing a complete physical assessment and health history, using interview, observation, palpation, and auscultation techniques. They will also perform specialized assessments, including mental status exams, pain, nutritional, family and cultural assessments, as well as domestic violence and substance abuse evaluations, and be able to choose assessment techniques appropriate in specific patient care situations.

Prerequisites & Notes

NULL

Credits: 3

NURS 3106 - FOUNDATIONS OF NURSING CARE

This course introduces the foundations of nursing practice, beginning with frameworks for evidenced-based nursing practice, nursing roles, and basic legal and ethical principles of care. The concepts of communication and documentation; safety and quality; infection control; mobility, sleep, rest and comfort; oxygenation; nutrition; fluid and electrolytes; elimination; medication administration, and patient education are introduced using the nursing process as a framework for developing, implementing, and evaluating care. Care of the pre- and post- operative patient is also introduced.

Prerequisites & Notes

NULL

Credits: 6

NURS 3223 - ESSENTIALS OF PATHOPHYSIOLOGY

This course explores the etiology, pathogenesis, clinical manifestations, and treatment of pathological disorders. This course considers the anatomy and physiology of each body system and the disease processes that may occur. The emphasis is on the clinical implication of pathophysiologic concepts and relationship to patient history, physical examination findings, lab and diagnostic studies, therapies and follow-up care.

Prerequisites & Notes

NULL

Credits: 3

NURS 3124 - APPLIED PHARMACOLOGY

This course prepares students to integrate pharmacologic principles into the care of patients and to administer drugs with consideration to safety, lifespan, cultural, legal and ethical implications. Drugs affecting cardiac, renal, respiratory, endocrine, gastrointestinal, reproductive, and central/ autonomic nervous systems, as well as anti-infective, anti-inflammatory and chemotherapeutic agents are presented. Relevant nursing interventions, including patient education, are emphasized.

Prerequisites & Notes

NULL

Credits: 4

NURS 3133 - PSYCHIATRIC NURSING

This course provides a conceptual framework to develop, implement, and evaluate nursing care to patients with mental health and/or substance abuse issues. Effective communication and development of therapeutic relationships in all settings are emphasized including safe, effective psychiatric nursing care for patients across the lifespan.

Prerequisites & Notes

NULL

Credits: 3

NURS 3144 - MEDICAL-SURGICAL NURSING I

This course introduces students to the care of patients with chronic medical-surgical conditions related to cardiac, respiratory, gastrointestinal, urinary, reproductive, musculoskeletal, sensory, and endocrine problems. This course

prepares students to develop, implement, and evaluate evidence-based nursing care to adults with simple to intermediate needs that can be met in acute and long-term care settings or in the home environment.

Prerequisites & Notes

NULL

Credits: 4

NURS 3153 - RESEARCH AND EVIDENCE-BASED PRACTICE

This course prepares students to evaluate and synthesize research data, particularly from outcomes, intervention, and translational research. Students use these skills to analyze practice protocols, making recommendations for their improvement.

Prerequisites & Notes

NULL

Credits: 3

NURS 4204 - MEDICAL SURGICAL NURSING II

This course builds on student competencies developed in NURS 3144 Medical-Surgical Nursing I. Evidence-based nursing care appropriate for adults with intermediate to complex medical-surgical conditions are addressed, with particular emphasis on acute conditions such as shock and multiple organ dysfunction, acute respiratory distress or failure or other conditions requiring critical care intervention. Emergency nursing and disaster nursing will also be explored.

Prerequisites & Notes

NULL

Credits: 4

NURS 4212 - CARE OF THE CHILDBEARING FAMILY

This course prepares the student to assess, plan, implement, and evaluate care for the childbearing family prior to and through pregnancy, labor and delivery, and postpartum care. The nurse's role in health promotion and care during high-risk situations are both considered.

Prerequisites & Notes

NULL

Credits: 2

NURS 4322 - PEDIATRIC NURSING

This course focuses on child development and health promotion as well as evidence-based nursing care for specific health problems common to children from infants to adolescents. It prepares students to provide nursing care to all children in a variety of care settings.

Prerequisites & Notes

NULL

Credits: 2

NURS 4243 - TRANSITN INTO PROFSSNL NURSN PRACT

This capstone course provides an opportunity to prepare for practice as a registered professional nurse and explore leadership roles such as designer/manager/coordinator of care as well as membership in the profession. The course explores concepts associated with leadership such as interpersonal communication, conflict, change, strategic decision-making, team building, power, politics and influence, and delegation. Building upon the competencies developed in the previous semesters students will enhance their clinical judgment in a variety of nursing situations. The students will prepare for the licensing process and the NCLEX-RN examination. This capstone course provides an opportunity to prepare for practice as a registered professional nurse and explore leadership roles such as designer/manager/coordinator of care as well as membership in the profession. The course explores concepts associated with leadership such as interpersonal communication, conflict, change, strategic decision-making, team building, power, politics and influence, and delegation. Building upon the competencies developed in the previous semesters students will enhance their clinical judgment in a variety of nursing situations. The students will prepare for the licensing process and the NCLEX-RN examination.

Prerequisites & Notes

NULL

Credits: 3

NURS 4314 - COMMUNITY NURSING AND CARE OF THE AGGREGATE

This course provides a solid foundation in community and public health nursing concepts. It examines interventions for individuals, families, and communities including health promotion and the multifaceted role of the community-oriented nurse. The focus will be on developing competence in assessing the needs of a population, developing and implementing appropriate interventions and evaluating their effectiveness.

Prerequisites & Notes

NULL

Credits: 4

NURS 4333 - QUALITY AND SAFETY

This course explores the concepts of quality and safety in healthcare, including evidence-based care, nurse-sensitive indicators, patient centered care, working conditions, and patient safety and quality tools. Students learn strategies to collect and analyze data related to the safety and quality of selected processes and recommend changes as necessary.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (Major Specific Experiential Learning) - 18 Credit Hours

NURS 300L - HEALTH ASSESSMENT SKILLS LAB

This course is the companion clinical course to NURS 3003. Students participate in skills lab learning the ways and tools of health assessment.

Prerequisites & Notes

Corequisite: NURS 3003, NURS 3106, NURS 310L, & NURS 3223

Credits: 1

NURS 310L - FOUNDATIONS NURS CLINICAL

This course focuses on developing competence in nursing interventions required to deliver safe and effective patient care to stable patients. Students practice relevant skills necessary to provide care discussed in class by integrating them into skills practice through demonstration, practice, and skill checks as well as actual patient situations. Students spend a total of 90 contact hours between nursing skills lab and clinical rotations.

Prerequisites & Notes

Corequisite: NURS 3106, NURS 3003, NURS 300L, NURS 3223

Credits: 2

NURS 313L - PSYCHIATRIC NURSING CLINICAL

This course provides an opportunity for students to develop beginning level competence in caring for patients with mental health and substance abuse issues. The clinical hours are shared between simulation laboratory developing skills and direct patient care specific to care of the mental health patient.

Prerequisites & Notes

NULL

Credits: 2

NURS 314L - MEDICAL-SURGICAL NURSING I CLINICAL

This course provides opportunities for students to develop beginning level competence in caring for patients with simple to intermediate chronic medical-surgical needs. These clinical hours are shared between simulation laboratory developing skills and direct patient care specific to medical-surgical nursing.

Prerequisites & Notes

NULL

Credits: 3

NURS 420L - MEDICAL-SURGICAL NURSING II CLINICAL

This course provides an opportunity for students to develop beginning level competence in caring for patients with acute medical-surgical needs. These clinical hours are shared between simulation laboratory developing skills and direct patient care specific to medical-surgical nursing.

Prerequisites & Notes

NULL

Credits: 3

NURS 421L - CARE OF THE CHILDBEARING FAMILY CLINICAL

This course provides an opportunity for students to develop beginning level competence in caring for the childbearing family. These clinical hours are shared between simulation laboratory developing skills and direct patient care specific to care of the childbearing families.

Prerequisites & Notes

NULL

Credits: 1

NURS 432L - PEDIATRIC NURSING CLINICAL

This course provides students the opportunity to care for children with appropriate health promotion and illness needs. These clinical hours are shared between simulation laboratory developing skills and direct patient care specific to pediatric patients and a variety of settings serving infants, children, and adolescents.

Prerequisites & Notes

NULL

Credits: 1

NURS 424L - TRANSITION TO PROFESSIONAL NURSING CLINICAL PRACTICE

This capstone clinical course provides the student an opportunity to prepare for practice as a registered professional nurse and explore leadership roles in healthcare settings. Building upon the competencies developed in the previous semesters students will enhance their clinical judgment in a variety of nursing situations as they learn to care for a team of patients working side by side with a clinical preceptor.

Prerequisites & Notes

NULL

Credits: 3

NURS 431L - COMMUNITY NURSING AND CARE OF THE AGGREGATE CLINICAL

This course provides an opportunity to provide care to a group of patients, assessing their needs, and developing, implementing, and evaluating an appropriate intervention(s). Students also care for individual clients within a community setting with particular attention to strategies to support patients as they transition from one level of care to another.

Prerequisites & Notes

NULL

Credits: 2

Associate of Science, Nursing

Associate of Science, Nursing Plan A

Associate of Science, Nursing Plan B

Total Program Hours - 70 Credit Hours

**It is the responsibility of the student to read, review, and fulfill the requirements and total hours of this degree audit for their applicable degree.

Foundational Core - 22 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Habits of Inquiry- 19 Credit Hours

Discursive Inquiry (3 Credit Hours) Select One:

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Natural-Scientific Inquiry- (4 Credit Hours) Select One:

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

Quantitative Inquiry- (3 Credit Hours) Select One:

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

Socio-Historical Inquiry- (6 Credit Hours) Select Two:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry- (3 Credit Hours) Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

Major Core - 48 Credit Hours

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

BIOL 2403 - INTRODUCTION TO MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi. This course is primarily for students in the BSN program and focuses on organisms relevant to their field.

Prerequisites & Notes

Prerequisite: BIOL 2083 BIOL 2183

Corequisite: BIOL 240L

Credits: 3

BIOL 240L - INTRODUCTION TO MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 2403.

Prerequisites & Notes

Prerequisite:

BIOL 2083

BIOL 2183

Corequisite:

BIOL 2403

Credits: 1

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

NURS 2011 - NURSING IN SOCIETY

This course is designed to assimilate all concepts within the three domains of Nursing: Individual, Nursing and Healthcare. Emphasis is placed on the complex alterations in health and wellness as they pertain to the three domains. Concepts related to the Individual domain includes the topics of biophysical, psychosocial, and sexuality. The Nursing domain includes aspects distinct to nursing practice and the profession. The course serves to assist the student to synthesize the many diverse and complex concepts unique to the healthcare environment related to nursing in society. Two hours of lecture provided weekly.

Credits: 1

NURS 2013 - MENTAL HEALTH NURSING

This course provides the conceptual framework to develop, implement, and evaluate nursing care to patients with mental health and/or substance abuse issues. Effective therapeutic communication techniques and the development of

therapeutic relationships in multiple clinical settings are emphasized and include safe, effective psychiatric nursing care for patients across the lifespan. Clinical hours are shared between the simulation lab and direct patient care.

Prerequisites & Notes

Prerequisites: NURS 2109, NURS 3023, BIOL 2403, BIOL 240L

Corequisites: NURS 2016, SSCI 2133, PSYC 2333

Credits: 6

NURS 2016 - NURSING CARE OF THE FAMILY

This course prepares the student to assess, plan, implement, and evaluate care for the family prior to and throughout pregnancy, labor and delivery, post-partum care, and to the pediatric population. The nurse's role in health promotion and care during high-risk situations are both considered, as well as health promotion and illness care to infants, children, and adolescents. Clinical hours are shared between the simulation lab and direct patient care.

Prerequisites & Notes

Prerequisites: NURS 2109, NURS 3023, BIOL 2403, BIOL 240L

Corequisites: NURS 2013, SSCI 2133, PSYC 2333

Credits: 6

NURS 2019 - FUNDAMENTALS OF NURSING CARE

This course introduces the fundamentals of nursing practice, beginning with frameworks for evidenced-based nursing practice, nursing roles, and basic legal and ethical principles of care. Concepts of professional communication and documentation, safety and quality care, infection control, mobility, sleep, rest and comfort, oxygenation, nutrition, fluid and electrolytes, elimination, medication administration, and patient education are introduced using the nursing process as a framework for developing, implementing, and evaluating care. Care of the pre- and post-operative patient is also introduced. This course focuses on developing competence in nursing interventions required to deliver safe and effective patient care to stable patients with chronic illness and disease. Students practice relevant skills necessary to provide safe patient care by integrating them into simulation and patient scenarios. Clinical hours for the course are distributed between the skills labs and direct patient care.

Prerequisites & Notes

Prerequisite:

Application and admittance into the ADN program

BIOL 2083 , BIOL 208L , CORE 1111, ENGL 1113, MATH 1213, PSYC 1133

Co-requisite:

BIOL 2183, BIOL 218L, CORE 1112, NURS 2223

Credits: 6

NURS 2109 - ADULT MEDICAL-SURGICAL NURSING

This course provides opportunities for students to develop beginning level competence in caring for patients with simple to intermediate chronic medical-surgical needs. This course introduces students to the care of patients with chronic medical-surgical conditions related to cardiac, respiratory, gastrointestinal, urinary, reproductive, musculoskeletal, sensory, and endocrine problems; and prepares students to develop, implement, and evaluate evidence-based nursing care to adults with simple to intermediate needs that can be met in acute and long-term care settings or in the home environment. Clinical experiences and skills development are shared between the simulation laboratory and in direct patient care that is specific to intermediate medical-surgical nursing.

Prerequisites & Notes

Prerequisite:

BIOL 2183, BIOL 218L, CORE 1112, NURS 2019, NURS 2223

Co-requisite:

BIOL 2403, BIOL 240L, NURS 3023, PSYC 2333

Credits: 6

NURS 2209 - ADVANCED NURSING CARE

This course builds on student competencies developed in NURS 2109 (Adult Medical-Surgical Nursing). Evidence-based nursing care appropriate for adults with intermediate to complex medical-surgical conditions is addressed, with particular emphasis on acute conditions such as shock and multiple organ dysfunction, acute respiratory distress or failure or other conditions requiring critical care intervention. Emergency nursing and disaster nursing are also explored. Clinical hours are shared between the simulation lab and direct patient care.

Prerequisites & Notes

Prerequisites: NURS 2013, NURS 2016, SSCI 2133

Corequisites: NURS 2011 , Creative-Aesthetic Elective

Credits: 9

NURS 2223 - HEALTH ASSESSMENT

This course prepares students to complete physical, psychosocial, spiritual, and cultural assessments for patients across the life span. The course focuses on differentiating between normal and abnormal findings. Students will develop beginning competence in performing a complete physical assessment and health history using interview, observation, palpation, and auscultation techniques. Students will also perform specialized assessments, including mental status exams, pain assessments, nutritional and cultural assessments, as well as domestic violence and substance abuse evaluations, and be able to choose assessment techniques that appropriate in specific patient care situations. Students will practice and apply learned skills in the simulation and skills laboratory.

Prerequisites & Notes

Prerequisite:

Application and admittance into the ADN program

BIOL 2083, BIOL 208L, CORE 1111, ENGL 1113, MATH 1213, PSYC 1133

Co-requisite:

BIOL 2183, BIOL 218L, CORE 1112, NURS 2019

Credits: 3

NURS 3023 - APPLIED PHARMACOLOGY

This course prepares students to integrate pharmacologic principles into the care of patients and to administer drugs with consideration to safety, lifespan, cultural, legal and ethical implications. Drugs affecting cardiac, renal, respiratory, endocrine, gastrointestinal, reproductive, and central/autonomic nervous systems, as well as anti-infective, anti-inflammatory and chemotherapeutic agents are presented. Relevant nursing interventions, including patient education, are emphasized.

Prerequisites & Notes

Prerequisite:

BIOL 2183, BIOL 218L, CORE 1112, NURS 2019, NURS 2223

Co-requisite:

BIOL 2403, BIOL 240L, NURS 2019, PSYC 2333

Credits: 3

Online

Bachelor of Science, Nursing (RN to BSN - Online)

Bachelor of Science, RN to BSN Program (Online) Three-Year-Plan

There are two different and separate tracks to obtain a Bachelor of Science in Nursing (BSN) degree. This is RN to BSN track for registered nurses (RNs) who have an Associate degree and currently hold a license to practice. This track is fully online and developed for the working nurse who desires to continue their educational career.

The second BSN track is the Pre-Licensure BSN track designed for students who hold no professional nursing degree or license and desire to become a professional registered nurse (RN). Information for this track is located under Programs of Study>Nursing>Main Campus Bachelor of Science, Nursing.

Equipping students to serve Christ and the world as competent professional nurses through Spirit-empowered ethical practice informed by critical thinking, life-long learning, and leadership.

The vision of the Nursing Program, also developed to reflect the vision of the University, is described below:

The Southeastern University Nursing Program will offer a professional education program that prepares students to provide excellent nursing care to individuals, families, and communities through the integration of faith, learning, and service.

Faculty will provide a Christ-centered, student-focused learning community that encourages students to grow in their role as professional nurses.

Students will gain an educational foundation that allows them to provide safe, evidence-based, and culturally competent care for all patients, with special emphasis on the underserved. They will use clinical judgment to integrate evolving technology and research findings into caring interventions that improve patients' health and support the sick and dying, their families, and communities.

Students will commit to life-long learning, rigorous scholarship, leadership, and collaborative interprofessional practice as a means of serving their communities.

The baccalaureate degree program in nursing at Southeastern University is accredited by the Commission on Collegiate Nursing Education (<http://www.ccnaccreditation.org>).

Total Program Hours - 120 Credit Hours

Foundational Core - 33 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:
CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for

application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

Quantitative Inquiry - 3 Credit Hours

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

Socio-Historical Inquiry - 6 Credit Hours

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

-or-

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

-or-

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

-or-

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

-or-

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 48 Credit Hours

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

CHEM 1213 - INTRO TO CHEMISTRY

This course is an introduction to basic concepts of general chemistry, introduction of periodic properties of elements and compounds, basic atomic-molecular structure, and properties of substances and reactions related to gas laws.

Prerequisites & Notes

Corequisite: CHEM 121L

Credits: 3

CHEM 121L - INTRO TO CHEMISTRY LAB

This course is the laboratory course to accompany CHEM 1213.

Prerequisites & Notes

Corequisite: CHEM 1213

Credits: 1

BIOL 2403 - INTRODUCTION TO MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi. This course is primarily for students in the BSN program and focuses on organisms relevant to their field.

Prerequisites & Notes

Prerequisite: BIOL 2083 BIOL 2183

Corequisite: BIOL 240L

Credits: 3

BIOL 240L - INTRODUCTION TO MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 2403.

Prerequisites & Notes

Prerequisite:

BIOL 2083

BIOL 2183

Corequisite:

BIOL 2403

Credits: 1

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

NURS 2113 - NUTRITION FOR NURSES

This course provides an overview of nutrition including wellness, food nutrients, health promotion and nutrition therapy for various disease processes.

Prerequisites & Notes

NULL

Credits: 3

NURS 3013 - NURSING HISTORY AND THEORY

This course provides an introduction of the history of nursing and the nursing theories developed throughout the eras of nursing practice. The discussion of history nursing will guide the different nursing theories discussed from Nightingale to present day. It will include the development of nursing theory including components and concepts found in nursing theories. The connections between theory and their importance for practice and the nursing profession will be discussed. This course is a synthesis of theoretical and clinical knowledge and skills for the professional baccalaureate-prepared nurse.

Prerequisites & Notes

NULL

Credits: 3

NURS 3153 - RESEARCH AND EVIDENCE-BASED PRACTICE

This course prepares students to evaluate and synthesize research data, particularly from outcomes, intervention, and translational research. Students use these skills to analyze practice protocols, making recommendations for their improvement.

Prerequisites & Notes

NULL

Credits: 3

NURS 3203 - TRANSITION TO BSN ROLE

This course explores the BSN competencies, which differ from those of a nurse holding an associate degree. The course will focus on a deep understanding of the changing U.S. health care delivery system, including its relationship to nursing theories, standards and scope of practice, and roles and responsibilities of the nurse. The role of the professional nurse in policy development and political action at the employer, local, state, and national levels are emphasized.

Prerequisites & Notes

NULL

Credits: 3

NURS 3214 - HEALTH ASSESSMENT FOR THE RN

This course builds upon the RN's current competence in physical assessment. The course focuses on increasing students' skill level in performing a complete physical examination and health history. A variety of specialized assessments, including mental status exams, pain, nutritional, family and cultural assessments, as well as domestic violence and substance abuse evaluations are considered with strategies to integrate findings into the plan of care. Students complete 45 contact hours completing health assessments/health history on "patients" recording with permission and sent to the instructor of record.

Prerequisites & Notes

NULL

Credits: 4

NURS 4333 - QUALITY AND SAFETY

This course explores the concepts of quality and safety in healthcare, including evidence-based care, nurse-sensitive indicators, patient centered care, working conditions, and patient safety and quality tools. Students learn strategies to collect and analyze data related to the safety and quality of selected processes and recommend changes as necessary.

Prerequisites & Notes

NULL

Credits: 3

NURS 4415 - COMMUNITY NURSING AND POPULATION HEALTH

This course provides a solid foundation in community and public health nursing concepts; interventions for individuals, families, and communities; health promotion; and the multifaceted role of the community-oriented nurse. The focus will be on developing competence in assessing the needs of a population, developing and implementing appropriate interventions and evaluating their effectiveness. They will spend 90 hours preparing a project to provide care to a group of patients, assessing needs, then developing, implementing, and evaluating an appropriate intervention(s). Students also care for individual clients within a community setting, with particular attention to strategies to support patients as they transition from one level of care to another.

Prerequisites & Notes

NULL

Credits: 5

NURS 4502 - CAPSTONE PROJECT

This course is a synthesis of theoretical and clinical knowledge and skills for the professional baccalaureate-prepared nurse. This course focuses on critical thinking, professional collaboration, and level of practice. It provides the opportunity to develop a philosophy of nursing statement as well as reconstructing a professional CV/Resume as well as generating a professional e-Portfolio.

Prerequisites & Notes

NULL

Credits: 2

Divine Design - 39 Credit Hours

RN Licensure - The Divine Design section of the audit will include the 30 hours of RN Licensure transfer credit leaving 9 hours for students to earn.

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

AND

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

OR

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

Area III, Natural Science and Mathematics - 11 Credit Hours

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Area IV, History, Social and Behavioral Sciences - 12 Credit Hours

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Arkansas

Science

Select one course not taken in Foundational Core

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Social Sciences

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

Kentucky

Social/Behavioral Sciences

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Montana

Montana requires 6 credit hours of natural science with a laboratory experience. Students may choose to take BIOL 1334 to complete the requirement or any other science course to meet the credit hour requirement.

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

Nevada

3 credit hours needed. The Socio-Historical requirement must be fulfilled by taking PPOL 2433 or by earning credit for one of the following combinations of classes from an accredited Nevada college: 1) HIST 100, 2) PCS 101, 3) HIST 101 and HIST 102, or 4) or HIST 101 and 217.

Ohio

Ohio students need an additional two credit hours in one or more of the following areas: Oral and Written Communication, Mathematics, Statistics and Logic, Arts, Humanities, Culture and Diversity, Natural Sciences, Technology and Innovation.

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

* if not already taken or 2 more credits to get to 36 hours

Oklahoma

In addition to the courses listed below, Oklahoma students need an additional 7 credit hours in one ore more of the following: History, Social Science, Behavioral Science, Humanities, Math, Natural Science, Language, or Fine Arts.

PPOL 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Associate of Arts, Pre-Nursing

Associate of Arts, Pre-Nursing: 2-Year Plan

Students who intend to pursue a BS in Nursing must earn a B- or higher in all science and lab courses.

Total Program Hours - 60 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

Quantitative Inquiry - 3 Credit Hours

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

Socio-Historical Inquiry - 6 Credit Hours

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following: (3 Credit Hours)

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 24 Credit Hours

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

CHEM 1213 - INTRO TO CHEMISTRY

This course is an introduction to basic concepts of general chemistry, introduction of periodic properties of elements and compounds, basic atomic-molecular structure, and properties of substances and reactions related to gas laws.

Prerequisites & Notes

Corequisite: CHEM 121L

Credits: 3

CHEM 121L - INTRO TO CHEMISTRY LAB

This course is the laboratory course to accompany CHEM 1213.

Prerequisites & Notes

Corequisite: CHEM 1213

Credits: 1

BIOL 2403 - INTRODUCTION TO MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi. This course is primarily for students in the BSN program and focuses on organisms relevant to their field.

Prerequisites & Notes

Prerequisite: BIOL 2083 BIOL 2183

Corequisite: BIOL 240L

Credits: 3

BIOL 240L - INTRODUCTION TO MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 2403.

Prerequisites & Notes

Prerequisite:

BIOL 2083

BIOL 2183

Corequisite:

BIOL 2403

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

THEO 3123 - INTRODUCTION OF ETHICS

This course examines the philosophical and theological principles and issues related to ethics. It addresses meta-ethical questions about the relationship between moral language and concepts and various metaphysical and post-metaphysical views; normative ethical theories; theological structures and implications of ethics; and contemporary ethical issues.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (Minor, Electives, Experiential Learning) - 2 Credit Hours

To meet the Divine Design requirement, student may earn credit hours in general elective courses, declare minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 hr), PRAC 1002 (2 hrs), PRAC 1003 (3 hrs), PRAC 1004 (4 hrs), up to 12 credit hours. General Electives are any college-level courses that do not satisfy the above program requirements. Student must complete the above program requirements, with remaining credit hours earned in Divine Design to meet the total program hours.

Site-Based (Partnership)**Bachelor of Science, Nursing (RN to BSN - Site based Partnership)**

There are two different and separate tracks to obtain a Bachelor of Science in Nursing (BSN) degree. This is RN to BSN track for registered nurses (RNs) who have an Associate degree and currently hold a license to practice. This track is fully online and developed for the working nurse who desires to continue their educational career.

The second BSN track is the Pre-Licensure BSN track designed for students who hold no professional nursing degree or license and desire to become a professional registered nurse (RN). Information for this track is located under Programs of Study>Nursing>Main Campus Bachelor of Science, Nursing.

Equipping students to serve Christ and the world as competent professional nurses through Spirit-empowered ethical practice informed by critical thinking, life-long learning, and leadership.

The vision of the Nursing Program, also developed to reflect the vision of the University, is described below:

The Southeastern University Nursing Program will offer a professional education program that prepares students to provide excellent nursing care to individuals, families, and communities through the integration of faith, learning, and service.

Faculty will provide a Christ-centered, student-focused learning community that encourages students to grow in their role as professional nurses.

Students will gain an educational foundation that allows them to provide safe, evidence-based, and culturally competent care for all patients, with special emphasis on the underserved. They will use clinical judgment to integrate evolving technology and research findings into caring interventions that improve patients' health and support the sick and dying, their families, and communities.

Students will commit to life-long learning, rigorous scholarship, leadership, and collaborative interprofessional practice as a means of serving their communities.

The baccalaureate degree program in nursing at Southeastern University is accredited by the Commission on Collegiate Nursing Education (<http://www.ccnaccreditation.org>).

Total Program Hours - 120 Credit Hours

Foundational Core - 33 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

Quantitative Inquiry - 3 Credit Hours

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

Socio-Historical Inquiry - 6 Credit Hours

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

- or -

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

- or -

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

- or -

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

- or -

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 48 Credit Hours

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

CHEM 1213 - INTRO TO CHEMISTRY

This course is an introduction to basic concepts of general chemistry, introduction of periodic properties of elements and compounds, basic atomic-molecular structure, and properties of substances and reactions related to gas laws.

Prerequisites & Notes

Corequisite: CHEM 121L

Credits: 3

CHEM 121L - INTRO TO CHEMISTRY LAB

This course is the laboratory course to accompany CHEM 1213.

Prerequisites & Notes

Corequisite: CHEM 1213

Credits: 1

BIOL 2403 - INTRODUCTION TO MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi. This course is primarily for students in the BSN program and focuses on organisms relevant to their field.

Prerequisites & Notes

Prerequisite: BIOL 2083 BIOL 2183

Corequisite: BIOL 240L

Credits: 3

BIOL 240L - INTRODUCTION TO MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 2403.

Prerequisites & Notes

Prerequisite:

BIOL 2083

BIOL 2183

Corequisite:

BIOL 2403

Credits: 1

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

NURS 3203 - TRANSITION TO BSN ROLE

This course explores the BSN competencies, which differ from those of a nurse holding an associate degree. The course will focus on a deep understanding of the changing U.S. health care delivery system, including its relationship to nursing theories, standards and scope of practice, and roles and responsibilities of the nurse. The role of the professional nurse in policy development and political action at the employer, local, state, and national levels are emphasized.

Prerequisites & Notes

NULL

Credits: 3

NURS 3214 - HEALTH ASSESSMENT FOR THE RN

This course builds upon the RN's current competence in physical assessment. The course focuses on increasing students' skill level in performing a complete physical examination and health history. A variety of specialized assessments, including mental status exams, pain, nutritional, family and cultural assessments, as well as domestic violence and substance abuse evaluations are considered with strategies to integrate findings into the plan of care. Students complete 45 contact hours completing health assessments/health history on "patients" recording with permission and sent to the instructor of record.

Prerequisites & Notes

NULL

Credits: 4

NURS 2113 - NUTRITION FOR NURSES

This course provides an overview of nutrition including wellness, food nutrients, health promotion and nutrition therapy for various disease processes.

Prerequisites & Notes

NULL

Credits: 3

NURS 3013 - NURSING HISTORY AND THEORY

This course provides an introduction of the history of nursing and the nursing theories developed throughout the eras of nursing practice. The discussion of history nursing will guide the different nursing theories discussed from Nightingale to present day. It will include the development of nursing theory including components and concepts found in nursing theories. The connections between theory and their importance for practice and the nursing profession will be discussed. This course is a synthesis of theoretical and clinical knowledge and skills for the professional baccalaureate-prepared nurse.

Prerequisites & Notes

NULL

Credits: 3

NURS 3153 - RESEARCH AND EVIDENCE-BASED PRACTICE

This course prepares students to evaluate and synthesize research data, particularly from outcomes, intervention, and translational research. Students use these skills to analyze practice protocols, making recommendations for their improvement.

Prerequisites & Notes

NULL

Credits: 3

NURS 4333 - QUALITY AND SAFETY

This course explores the concepts of quality and safety in healthcare, including evidence-based care, nurse-sensitive indicators, patient centered care, working conditions, and patient safety and quality tools. Students learn strategies to collect and analyze data related to the safety and quality of selected processes and recommend changes as necessary.

Prerequisites & Notes

NULL

Credits: 3

NURS 4415 - COMMUNITY NURSING AND POPULATION HEALTH

This course provides a solid foundation in community and public health nursing concepts; interventions for individuals, families, and communities; health promotion; and the multifaceted role of the community-oriented nurse. The focus will be on developing competence in assessing the needs of a population, developing and implementing appropriate interventions and evaluating their effectiveness. They will spend 90 hours preparing a project to provide care to a group of patients, assessing needs, then developing, implementing, and evaluating an appropriate intervention(s). Students also care for individual clients within a community setting, with particular attention to strategies to support patients as they transition from one level of care to another.

Prerequisites & Notes

NULL

Credits: 5

NURS 4502 - CAPSTONE PROJECT

This course is a synthesis of theoretical and clinical knowledge and skills for the professional baccalaureate-prepared nurse. This course focuses on critical thinking, professional collaboration, and level of practice. It provides the opportunity to develop a philosophy of nursing statement as well as reconstructing a professional CV/Resume as well as generating a professional e-Portfolio.

Prerequisites & Notes

NULL

Credits: 2

Divine Design - 39 Credit Hours

RN Licensure - The Divine Design section of the audit will include the 30 hours of RN Licensure transfer credit leaving 9 hours for students to earn.

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

AND

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

OR

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

Area III, Natural Science and Mathematics - 11 Credit Hours

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Area IV, History, Social and Behavioral Sciences - 12 Credit Hours

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing

historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Other Programs

Bachelor of Science, Nursing Four Year Plan

Year One

FALL SEMESTER - 14 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

SPRING SEMESTER - 15 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:
CORE 1111

Credits: 2

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Year Two

FALL SEMESTER - 16 Credit Hours

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CHEM 1213 - INTRO TO CHEMISTRY

This course is an introduction to basic concepts of general chemistry, introduction of periodic properties of elements and compounds, basic atomic-molecular structure, and properties of substances and reactions related to gas laws.

Prerequisites & Notes

Corequisite: CHEM 121L

Credits: 3

CHEM 121L - INTRO TO CHEMISTRY LAB

This course is the laboratory course to accompany CHEM 1213.

Prerequisites & Notes

Corequisite: CHEM 1213

Credits: 1

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

SPRING SEMESTER - 13 Credit Hours

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

BIOL 2113 - BIOETHICS

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: BIOL 1243 or BIOL 2183

Credits: 3

BIOL 2403 - INTRODUCTION TO MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi. This course is primarily for students in the BSN program and focuses on organisms relevant to their field.

Prerequisites & Notes

Prerequisite: BIOL 2083 BIOL 2183

Corequisite: BIOL 240L

Credits: 3

BIOL 240L - INTRODUCTION TO MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 2403.

Prerequisites & Notes

Prerequisite:

BIOL 2083

BIOL 2183

Corequisite:

BIOL 2403

Credits: 1

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

Year Three**FALL SEMESTER - 15 Credit Hours****NURS 3003 - HEALTH ASSESSMENT**

This course prepares students to complete a physical, psychosocial, spiritual, and cultural assessment for patients throughout the life span. The course focuses on differentiating between normal and abnormal findings. Students will develop beginning competence in performing a complete physical assessment and health history, using interview, observation, palpation, and auscultation techniques. They will also perform specialized assessments, including mental status exams, pain, nutritional, family and cultural assessments, as well as domestic violence and substance abuse evaluations, and be able to choose assessment techniques appropriate in specific patient care situations.

Prerequisites & Notes

NULL

Credits: 3

NURS 300L - HEALTH ASSESSMENT SKILLS LAB

This course is the companion clinical course to NURS 3003. Students participate in skills lab learning the ways and tools of health assessment.

Prerequisites & Notes

Corequisite: NURS 3003, NURS 3106, NURS 310L, & NURS 3223

Credits: 1

NURS 3106 - FOUNDATIONS OF NURSING CARE

This course introduces the foundations of nursing practice, beginning with frameworks for evidenced-based nursing practice, nursing roles, and basic legal and ethical principles of care. The concepts of communication and documentation; safety and quality; infection control; mobility, sleep, rest and comfort; oxygenation; nutrition; fluid and electrolytes; elimination; medication administration, and patient education are introduced using the nursing process as a framework for developing, implementing, and evaluating care. Care of the pre- and post- operative patient is also introduced.

Prerequisites & Notes

NULL

Credits: 6

NURS 310L - FOUNDATIONS NURS CLINICAL

This course focuses on developing competence in nursing interventions required to deliver safe and effective patient care to stable patients. Students practice relevant skills necessary to provide care discussed in class by integrating them into skills practice through demonstration, practice, and skill checks as well as actual patient situations. Students spend a total of 90 contact hours between nursing skills lab and clinical rotations.

Prerequisites & Notes

Corequisite: NURS 3106, NURS 3003, NURS 300L, NURS 3223

Credits: 2

NURS 3223 - ESSENTIALS OF PATHOPHYSIOLOGY

This course explores the etiology, pathogenesis, clinical manifestations, and treatment of pathological disorders. This course considers the anatomy and physiology of each body system and the disease processes that may occur. The emphasis is on the clinical implication of pathophysiologic concepts and relationship to patient history, physical examination findings, lab and diagnostic studies, therapies and follow-up care.

Prerequisites & Notes

NULL

Credits: 3

SPRING SEMESTER - 16 Credit Hours

NURS 3124 - APPLIED PHARMACOLOGY

This course prepares students to integrate pharmacologic principles into the care of patients and to administer drugs with consideration to safety, lifespan, cultural, legal and ethical implications. Drugs affecting cardiac, renal, respiratory, endocrine, gastrointestinal, reproductive, and central/ autonomic nervous systems, as well as anti-infective, anti-inflammatory and chemotherapeutic agents are presented. Relevant nursing interventions, including patient education, are emphasized.

Prerequisites & Notes

NULL

Credits: 4

NURS 3133 - PSYCHIATRIC NURSING

This course provides a conceptual framework to develop, implement, and evaluate nursing care to patients with mental health and/or substance abuse issues. Effective communication and development of therapeutic relationships in all settings are emphasized including safe, effective psychiatric nursing care for patients across the lifespan.

Prerequisites & Notes

NULL

Credits: 3

NURS 313L - PSYCHIATRIC NURSING CLINICAL

This course provides an opportunity for students to develop beginning level competence in caring for patients with mental health and substance abuse issues. The clinical hours are shared between simulation laboratory developing skills and direct patient care specific to care of the mental health patient.

Prerequisites & Notes

NULL

Credits: 2

NURS 3144 - MEDICAL-SURGICAL NURSING I

This course introduces students to the care of patients with chronic medical-surgical conditions related to cardiac, respiratory, gastrointestinal, urinary, reproductive, musculoskeletal, sensory, and endocrine problems. This course prepares students to develop, implement, and evaluate evidence-based nursing care to adults with simple to intermediate needs that can be met in acute and long-term care settings or in the home environment.

Prerequisites & Notes

NULL

Credits: 4

NURS 314L - MEDICAL-SURGICAL NURSING I CLINICAL

This course provides opportunities for students to develop beginning level competence in caring for patients with simple to intermediate chronic medical-surgical needs. These clinical hours are shared between simulation laboratory developing skills and direct patient care specific to medical-surgical nursing.

Prerequisites & Notes

NULL

Credits: 3

Year Four

FALL SEMESTER - 16 Credit Hours

NURS 3153 - RESEARCH AND EVIDENCE-BASED PRACTICE

This course prepares students to evaluate and synthesize research data, particularly from outcomes, intervention, and translational research. Students use these skills to analyze practice protocols, making recommendations for their improvement.

Prerequisites & Notes

NULL

Credits: 3

NURS 4204 - MEDICAL SURGICAL NURSING II

This course builds on student competencies developed in NURS 3144 Medical-Surgical Nursing I. Evidence-based nursing care appropriate for adults with intermediate to complex medical-surgical conditions are addressed, with particular emphasis on acute conditions such as shock and multiple organ dysfunction, acute respiratory distress or failure or other conditions requiring critical care intervention. Emergency nursing and disaster nursing will also be explored.

Prerequisites & Notes

NULL

Credits: 4

NURS 420L - MEDICAL-SURGICAL NURSING II CLINICAL

This course provides an opportunity for students to develop beginning level competence in caring for patients with acute medical-surgical needs. These clinical hours are shared between simulation laboratory developing skills and direct patient care specific to medical-surgical nursing.

Prerequisites & Notes

NULL

Credits: 3

NURS 4212 - CARE OF THE CHILDBEARING FAMILY

This course prepares the student to assess, plan, implement, and evaluate care for the childbearing family prior to and through pregnancy, labor and delivery, and postpartum care. The nurse's role in health promotion and care during high-risk situations are both considered.

Prerequisites & Notes

NULL

Credits: 2

NURS 421L - CARE OF THE CHILDBEARING FAMILY CLINICAL

This course provides an opportunity for students to develop beginning level competence in caring for the childbearing family. These clinical hours are shared between simulation laboratory developing skills and direct patient care specific to care of the childbearing families.

Prerequisites & Notes

NULL

Credits: 1

NURS 4322 - PEDIATRIC NURSING

This course focuses on child development and health promotion as well as evidence-based nursing care for specific health problems common to children from infants to adolescents. It prepares students to provide nursing care to all children in a variety of care settings.

Prerequisites & Notes

NULL

Credits: 2

NURS 432L - PEDIATRIC NURSING CLINICAL

This course provides students the opportunity to care for children with appropriate health promotion and illness needs. These clinical hours are shared between simulation laboratory developing skills and direct patient care specific to pediatric patients and a variety of settings serving infants, children, and adolescents.

Prerequisites & Notes

NULL

Credits: 1

SPRING SEMESTER - 15 Credit Hours

NURS 4243 - TRANSITN INTO PROFSSNL NURSN PRACT

This capstone course provides an opportunity to prepare for practice as a registered professional nurse and explore leadership roles such as designer/manager/coordinator of care as well as membership in the profession. The course explores concepts associated with leadership such as interpersonal communication, conflict, change, strategic decision-making, team building, power, politics and influence, and delegation. Building upon the competencies developed in the previous semesters students will enhance their clinical judgment in a variety of nursing situations. The students will prepare for the licensing process and the NCLEX-RN examination. This capstone course provides an opportunity to prepare for practice as a registered professional nurse and explore leadership roles such as designer/manager/coordinator of care as well as membership in the profession. The course explores concepts associated with leadership such as interpersonal communication, conflict, change, strategic decision-making, team building, power, politics and influence, and delegation. Building upon the competencies developed in the previous semesters

students will enhance their clinical judgment in a variety of nursing situations. The students will prepare for the licensing process and the NCLEX-RN examination.

Prerequisites & Notes

NULL

Credits: 3

NURS 424L - TRANSTN TO PROFSL NRSNG CLNCL PRTC

This capstone clinical course provides the student an opportunity to prepare for practice as a registered professional nurse and explore leadership roles in healthcare settings. Building upon the competencies developed in the previous semesters students will enhance their clinical judgment in a variety of nursing situations as they learn to care for a team of patients working side by side with a clinical preceptor.

Prerequisites & Notes

NULL

Credits: 3

NURS 4314 - COMMUNITY NURSING AND CARE OF THE AGGREGATE

This course provides a solid foundation in community and public health nursing concepts. It examines interventions for individuals, families, and communities including health promotion and the multifaceted role of the community-oriented nurse. The focus will be on developing competence in assessing the needs of a population, developing and implementing appropriate interventions and evaluating their effectiveness.

Prerequisites & Notes

NULL

Credits: 4

NURS 431L - COMMUNITY NURSING AND CARE OF THE AGGREGATE CLINICAL

This course provides an opportunity to provide care to a group of patients, assessing their needs, and developing, implementing, and evaluating an appropriate intervention(s). Students also care for individual clients within a community setting with particular attention to strategies to support patients as they transition from one level of care to another.

Prerequisites & Notes

NULL

Credits: 2

NURS 4333 - QUALITY AND SAFETY

This course explores the concepts of quality and safety in healthcare, including evidence-based care, nurse-sensitive indicators, patient centered care, working conditions, and patient safety and quality tools. Students learn strategies to collect and analyze data related to the safety and quality of selected processes and recommend changes as necessary.

Prerequisites & Notes

NULL

Credits: 3

Bachelor of Science, RN to BSN Program (Online) Three-Year-Plan

Year One

FALL SEMESTER - 14 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

SPRING SEMESTER - 15 Credit Hours

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

BIOL 2403 - INTRODUCTION TO MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi. This course is primarily for students in the BSN program and focuses on organisms relevant to their field.

Prerequisites & Notes

Prerequisite: BIOL 2083 BIOL 2183

Corequisite: BIOL 240L

Credits: 3

BIOL 240L - INTRODUCTION TO MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 2403.

Prerequisites & Notes

Prerequisite:

BIOL 2083

BIOL 2183

Corequisite:

BIOL 2403

Credits: 1

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Year Two

FALL SEMESTER - 16 Credit Hours

CHEM 1213 - INTRO TO CHEMISTRY

This course is an introduction to basic concepts of general chemistry, introduction of periodic properties of elements and compounds, basic atomic-molecular structure, and properties of substances and reactions related to gas laws.

Prerequisites & Notes

Corequisite: CHEM 121L

Credits: 3

CHEM 121L - INTRO TO CHEMISTRY LAB

This course is the laboratory course to accompany CHEM 1213.

Prerequisites & Notes

Corequisite: CHEM 1213

Credits: 1

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

SPRING SEMESTER - 15 Credit Hours

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

Divine Design (9 Credit Hours)

Year Three

FALL SEMESTER - 16 Credit Hours

NURS 2113 - NUTRITION FOR NURSES

This course provides an overview of nutrition including wellness, food nutrients, health promotion and nutrition therapy for various disease processes.

Prerequisites & Notes

NULL

Credits: 3

NURS 3013 - NURSING HISTORY AND THEORY

This course provides an introduction of the history of nursing and the nursing theories developed throughout the eras of nursing practice. The discussion of history nursing will guide the different nursing theories discussed from Nightingale to present day. It will include the development of nursing theory including components and concepts found in nursing theories. The connections between theory and their importance for practice and the nursing profession will be discussed. This course is a synthesis of theoretical and clinical knowledge and skills for the professional baccalaureate-prepared nurse.

Prerequisites & Notes

NULL

Credits: 3

NURS 3153 - RESEARCH AND EVIDENCE-BASED PRACTICE

This course prepares students to evaluate and synthesize research data, particularly from outcomes, intervention, and translational research. Students use these skills to analyze practice protocols, making recommendations for their improvement.

Prerequisites & Notes

NULL

Credits: 3

NURS 3203 - TRANSITION TO BSN ROLE

This course explores the BSN competencies, which differ from those of a nurse holding an associate degree. The course will focus on a deep understanding of the changing U.S. health care delivery system, including its relationship to nursing theories, standards and scope of practice, and roles and responsibilities of the nurse. The role of the professional nurse in policy development and political action at the employer, local, state, and national levels are emphasized.

Prerequisites & Notes

NULL

Credits: 3

NURS 3214 - HEALTH ASSESSMENT FOR THE RN

This course builds upon the RN's current competence in physical assessment. The course focuses on increasing students' skill level in performing a complete physical examination and health history. A variety of specialized assessments, including mental status exams, pain, nutritional, family and cultural assessments, as well as domestic violence and substance abuse evaluations are considered with strategies to integrate findings into the plan of care. Students complete 45 contact hours completing health assessments/health history on "patients" recording with permission and sent to the instructor of record.

Prerequisites & Notes

NULL

Credits: 4

SPRING SEMESTER - 14 Credit Hours

NURS 4415 - COMMUNITY NURSING AND POPULATION HEALTH

This course provides a solid foundation in community and public health nursing concepts; interventions for individuals, families, and communities; health promotion; and the multifaceted role of the community-oriented nurse. The focus will be on developing competence in assessing the needs of a population, developing and implementing appropriate interventions and evaluating their effectiveness. They will spend 90 hours preparing a project to provide care to a group of patients, assessing needs, then developing, implementing, and evaluating an appropriate intervention(s). Students also care for individual clients within a community setting, with particular attention to strategies to support patients as they transition from one level of care to another.

Prerequisites & Notes

NULL

Credits: 5

NURS 4502 - CAPSTONE PROJECT

This course is a synthesis of theoretical and clinical knowledge and skills for the professional baccalaureate-prepared nurse. This course focuses on critical thinking, professional collaboration, and level of practice. It provides the opportunity to develop a philosophy of nursing statement as well as reconstructing a professional CV/Resume as well as generating a professional e-Portfolio.

Prerequisites & Notes

NULL

Credits: 2

RN Licensure - 30 Credit Hours

Credits for RN Licensure will be awarded during the Capstone course

Associate of Science, Nursing Plan A

TOTAL PROGRAM HOURS - 70 Credit Hours

YEAR ONE

Fall Semester

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community

awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Spring Semester

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

NURS 2019 - FUNDAMENTALS OF NURSING CARE

This course introduces the fundamentals of nursing practice, beginning with frameworks for evidenced-based nursing practice, nursing roles, and basic legal and ethical principles of care. Concepts of professional communication and documentation, safety and quality care, infection control, mobility, sleep, rest and comfort, oxygenation, nutrition, fluid and electrolytes, elimination, medication administration, and patient education are introduced using the nursing process as a framework for developing, implementing, and evaluating care. Care of the pre- and post-operative patient is also introduced. This course focuses on developing competence in nursing interventions required to deliver safe and effective patient care to stable patients with chronic illness and disease. Students practice relevant skills necessary to provide safe patient care by integrating them into simulation and patient scenarios. Clinical hours for the course are distributed between the skills labs and direct patient care.

Prerequisites & Notes

Prerequisite:

Application and admittance into the ADN program

BIOL 2083 , BIOL 208L , CORE 1111, ENGL 1113, MATH 1213, PSYC 1133

Co-requisite:

BIOL 2183, BIOL 218L, CORE 1112, NURS 2223

Credits: 6

NURS 2223 - HEALTH ASSESSMENT

This course prepares students to complete physical, psychosocial, spiritual, and cultural assessments for patients across the life span. The course focuses on differentiating between normal and abnormal findings. Students will develop beginning competence in performing a complete physical assessment and health history using interview, observation, palpation, and auscultation techniques. Students will also perform specialized assessments, including mental status exams, pain assessments, nutritional and cultural assessments, as well as domestic violence and substance abuse evaluations, and be able to choose assessment techniques that appropriate in specific patient care situations. Students will practice and apply learned skills in the simulation and skills laboratory.

Prerequisites & Notes

Prerequisite:

Application and admittance into the ADN program

BIOL 2083, BIOL 208L, CORE 1111, ENGL 1113, MATH 1213, PSYC 1133

Co-requisite:

BIOL 2183, BIOL 218L, CORE 1112, NURS 2019

Credits: 3

Summer Semester

BIOL 2403 - INTRODUCTION TO MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi. This course is primarily for students in the BSN program and focuses on organisms relevant to their field.

Prerequisites & Notes

Prerequisite: BIOL 2083 BIOL 2183

Corequisite: BIOL 240L

Credits: 3

BIOL 240L - INTRODUCTION TO MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 2403.

Prerequisites & Notes

Prerequisite:

BIOL 2083

BIOL 2183

Corequisite:

BIOL 2403

Credits: 1

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

NURS 2109 - ADULT MEDICAL-SURGICAL NURSING

This course provides opportunities for students to develop beginning level competence in caring for patients with simple to intermediate chronic medical-surgical needs. This course introduces students to the care of patients with chronic medical-surgical conditions related to cardiac, respiratory, gastrointestinal, urinary, reproductive, musculoskeletal, sensory, and endocrine problems; and prepares students to develop, implement, and evaluate evidence-based nursing care to adults with simple to intermediate needs that can be met in acute and long-term care settings or in the home environment. Clinical experiences and skills development are shared between the simulation laboratory and in direct patient care that is specific to intermediate medical-surgical nursing.

Prerequisites & Notes

Prerequisite:

BIOL 2183, BIOL 218L, CORE 1112, NURS 2019, NURS 2223

Co-requisite:

BIOL 2403, BIOL 240L, NURS 3023, PSYC 2333

Credits: 6

NURS 3023 - APPLIED PHARMACOLOGY

This course prepares students to integrate pharmacologic principles into the care of patients and to administer drugs with consideration to safety, lifespan, cultural, legal and ethical implications. Drugs affecting cardiac, renal, respiratory, endocrine, gastrointestinal, reproductive, and central/autonomic nervous systems, as well as anti-infective, anti-inflammatory and chemotherapeutic agents are presented. Relevant nursing interventions, including patient education, are emphasized.

Prerequisites & Notes

Prerequisite:

BIOL 2183, BIOL 218L, CORE 1112, NURS 2019, NURS 2223

Co-requisite:

BIOL 2403, BIOL 240L, NURS 2019, PSYC 2333

Credits: 3

YEAR TWO**Fall Semester****SSCI 2133 - INTRODUCTION TO SOCIOLOGY**

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

NURS 2013 - MENTAL HEALTH NURSING

This course provides the conceptual framework to develop, implement, and evaluate nursing care to patients with mental health and/or substance abuse issues. Effective therapeutic communication techniques and the development of therapeutic relationships in multiple clinical settings are emphasized and include safe, effective psychiatric nursing care for patients across the lifespan. Clinical hours are shared between the simulation lab and direct patient care.

Prerequisites & Notes

Prerequisites: NURS 2109, NURS 3023, BIOL 2403, BIOL 240L

Corequisites: NURS 2016, SSCI 2133, PSYC 2333

Credits: 6

NURS 2016 - NURSING CARE OF THE FAMILY

This course prepares the student to assess, plan, implement, and evaluate care for the family prior to and throughout pregnancy, labor and delivery, post-partum care, and to the pediatric population. The nurse's role in health promotion and care during high-risk situations are both considered, as well as health promotion and illness care to infants, children, and adolescents. Clinical hours are shared between the simulation lab and direct patient care.

Prerequisites & Notes

Prerequisites: NURS 2109, NURS 3023, BIOL 2403, BIOL 240L

Corequisites: NURS 2013, SSCI 2133, PSYC 2333

Credits: 6

Spring Semester

NURS 2011 - NURSING IN SOCIETY

This course is designed to assimilate all concepts within the three domains of Nursing: Individual, Nursing and Healthcare. Emphasis is placed on the complex alterations in health and wellness as they pertain to the three domains. Concepts related to the Individual domain includes the topics of biophysical, psychosocial, and sexuality. The Nursing domain includes aspects distinct to nursing practice and the profession. The course serves to assist the student to synthesize the many diverse and complex concepts unique to the healthcare environment related to nursing in society. Two hours of lecture provided weekly.

Credits: 1

NURS 2209 - ADVANCED NURSING CARE

This course builds on student competencies developed in NURS 2109 (Adult Medical-Surgical Nursing). Evidence-based nursing care appropriate for adults with intermediate to complex medical-surgical conditions is addressed, with particular emphasis on acute conditions such as shock and multiple organ dysfunction, acute respiratory distress or failure or other conditions requiring critical care intervention. Emergency nursing and disaster nursing are also explored. Clinical hours are shared between the simulation lab and direct patient care.

Prerequisites & Notes

Prerequisites: NURS 2013, NURS 2016, SSCI 2133

Corequisites: NURS 2011 , Creative-Aesthetic Elective

Credits: 9

Creative-Aesthetic Inquiry - Choose One (1) of the following:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

Associate of Arts, Pre-Nursing: 2-Year Plan

YEAR ONE

Fall Semester - 14 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

BIOL 3703 - MEDICAL TERMINOLOGY

This course teaches the medical terminology and vocabulary used by individuals working in healthcare settings. The focus of this course is on medical and clinical terminology relating to human anatomy and physiology from an organ system perspective. An emphasis is placed on those terms relating to the clinical diagnosis and pathophysiology of disease states. Students will also learn how to use prefixes, suffixes, and word roots to determine the meaning of new terms. Common shorthand used in the medical field such as acronyms and clinical abbreviations are merged to ready

students for clinical engagement.

Prerequisites & Notes

NULL

Credits: 3

BIOL 2083 - HUMAN ANATOMY AND PHYSIOLOGY I

This course is the first of a two-term sequence in human anatomy and physiology. Course topics include scientific measurement, basic inorganic and organic chemistry, cytology, and histology followed by detailed investigation of the skin, skeleton, joints, muscles, and nervous system.

Prerequisites & Notes

Corequisite:BIOL 208L

Credits: 3

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

Spring Semester - 15 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 218L

Credits: 3

BIOL 218L - HUMAN ANATOMY AND PHYSIOLOGY II LAB

Exercises will reinforce the lecture topics through experimentation, microscopic work, and dissection (where applicable).

Prerequisites & Notes

Prerequisites:

BIOL 2083

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

YEAR TWO

Fall Semester - 16 Credit Hours

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

CHEM 1213 - INTRO TO CHEMISTRY

This course is an introduction to basic concepts of general chemistry, introduction of periodic properties of elements and compounds, basic atomic-molecular structure, and properties of substances and reactions related to gas laws.

Prerequisites & Notes

Corequisite: CHEM 121L

Credits: 3

CHEM 121L - INTRO TO CHEMISTRY LAB

This course is the laboratory course to accompany CHEM 1213.

Prerequisites & Notes

Corequisite: CHEM 1213

Credits: 1

Spring Semester - 15 Credit Hours

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

THEO 3123 - INTRODUCTION OF ETHICS

This course examines the philosophical and theological principles and issues related to ethics. It addresses meta-ethical questions about the relationship between moral language and concepts and various metaphysical and post-metaphysical views; normative ethical theories; theological structures and implications of ethics; and contemporary ethical issues.

Prerequisites & Notes

NULL

Credits: 3

BIOL 2403 - INTRODUCTION TO MICROBIOLOGY

This course is an introduction to the biology of microorganisms, including structure and physiology of bacteria, algae, viruses, protozoa, and lower fungi. This course is primarily for students in the BSN program and focuses on organisms relevant to their field.

Prerequisites & Notes

Prerequisite: BIOL 2083 BIOL 2183

Corequisite: BIOL 240L

Credits: 3

BIOL 240L - INTRODUCTION TO MICROBIOLOGY LAB

This course is a laboratory to accompany BIOL 2403.

Prerequisites & Notes

Prerequisite:

BIOL 2083

BIOL 2183

Corequisite:

BIOL 2403

Credits: 1

Creative-Aesthetic Inquiry -Select One (1) of the Following:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

BIOL 208L - HUMAN ANATOMY AND PHYSIOLOGY I LAB

Exercises in this course will reinforce the lecture topics through experimentation, microscopic investigation, and dissection (where applicable).

Prerequisites & Notes

Corequisite: BIOL 2083

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Summer Semester

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

NURS 2019 - FUNDAMENTALS OF NURSING CARE

This course introduces the fundamentals of nursing practice, beginning with frameworks for evidenced-based nursing practice, nursing roles, and basic legal and ethical principles of care. Concepts of professional communication and documentation, safety and quality care, infection control, mobility, sleep, rest and comfort, oxygenation, nutrition, fluid and electrolytes, elimination, medication administration, and patient education are introduced using the nursing process as a framework for developing, implementing, and evaluating care. Care of the pre- and post-operative patient is also introduced. This course focuses on developing competence in nursing interventions required to deliver safe and effective patient care to stable patients with chronic illness and disease. Students practice relevant skills necessary to provide safe patient care by integrating them into simulation and patient scenarios. Clinical hours for the course are distributed between the skills labs and direct patient care.

Prerequisites & Notes

Prerequisite:

Application and admittance into the ADN program

BIOL 2083 , BIOL 208L , CORE 1111, ENGL 1113, MATH 1213, PSYC 1133

Co-requisite:

BIOL 2183, BIOL 218L, CORE 1112, NURS 2223

Credits: 6

BIOL 2183 - HUMAN ANATOMY AND PHYSIOLOGY II

This course is a continuation of BIOL 2083. Students will study the following topics: the circulatory system (with special emphasis on the heart), the lymphatic system, the immune system, the respiratory system, the digestive system, cellular metabolism, the urinary system, fluid-electrolyte balance, the endocrine system, reproduction, development, and a brief survey of genetics.

BIOL 208L

Corequisite:

BIOL 2183

Credits: 1

NURS 2223 - HEALTH ASSESSMENT

This course prepares students to complete physical, psychosocial, spiritual, and cultural assessments for patients across the life span. The course focuses on differentiating between normal and abnormal findings. Students will develop beginning competence in performing a complete physical assessment and health history using interview, observation, palpation, and auscultation techniques. Students will also perform specialized assessments, including mental status exams, pain assessments, nutritional and cultural assessments, as well as domestic violence and substance abuse evaluations, and be able to choose assessment techniques that appropriate in specific patient care situations. Students will practice and apply learned skills in the simulation and skills laboratory.

Prerequisites & Notes

Prerequisite:

Application and admittance into the ADN program

BIOL 2083, BIOL 208L, CORE 1111, ENGL 1113, MATH 1213, PSYC 1133

School of Music

Mission

The Southeastern University School of Music is committed to providing its students with a Christ-centered learning environment that focuses on preparing them for graduate studies in music as well as professional careers in the music field.

Drawing on the breadth and depth of expertise provided by our faculty, the School of Music offers exposure to and training in several genres and styles of music, including Western classical art music, jazz, modern pop/rock music, traditional and contemporary worship music, and music from cultures around the world. In this it is our aim to 1) provide students with a greater awareness of the possibilities of careers within music, 2) connect seemingly disparate styles and cultures of music into a deeper yet functional understanding of the purpose of music, and 3) lead students to a greater appreciation of God's creativity and goodness through music.

We take seriously our responsibility, in Christ, to foster each student's God-given talents and gifts. Through the integration of faith and learning, it is our desire and purpose to encourage our students and assist them in realizing the call of God in their lives.

Chair

Tyson J. Voigt, DMA
Chair, School of Music
Program Lead for BS Worship Studies
Associate Professor of Percussion

Main Campus (Lakeland, FL)

Bachelor of Arts, Music

Bachelor of Arts, Music: Four-Year Plan

You must pass all Music Department courses with a C- or higher.

The Bachelor of Arts in Music is a flexible degree program designed to give students the opportunity to pursue the skills necessary for professional work as a vocal or instrumental performer. Students in this program work closely with faculty to develop the tools to be successful in their chosen path in music. The program emphasizes pertinent and real world skills in performance, composition, recording technology, and more, all while developing a strong grasp on music theory, music history, and ear training.

Students needing developmental assistance in piano skills will be required to take class piano for three semesters or until able to pass piano proficiency exam. These courses count as elective credit. **Class Piano courses are 1 credit.**

See audit for Ensemble and Applied Lesson requirements.

Total Program Hours - 120 Credit Hours

Foundational Core (34 Credit Hours)

SEU Foundations (3 Credit Hours)

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry (22 Credit Hours)**Discursive Inquiry (6 Credit Hours)****ENGL 1113 - COLLEGE COMPOSITION**

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry- Select (1) One of the Following with Lab: (4 Credit Hours)**BIOL 1333 - ESSENTIALS OF HUMAN A & P**

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

- or -

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

- or -

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

- or -

NSCI 1024 - INTRO TO SCIENCE AND TECHNOLOGY

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues as demonstrated in laboratory activities. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Credits: 4

- or -

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

- or -

NSCI 1044 - NUTRITION SCIENCE

This online course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 4

Quantitative Inquiry Select (1) One of the Following: (3 Credit Hours)

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

- or -

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

- or -

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry- Select (2) Two of the Following: (6 Credit Hours)

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

- or -

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

- or -

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

- or -

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select (1) One of the the Following: (3 Credit Hours)

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

- or -

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

- or -

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

- or -

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

Major Core- 49 Credits Hours

MUSC 1032 - INTRODUCTION TO MUSIC TECHNOLOGY

This course is an introduction to common technologies used throughout the various fields of music. Students in the course will explore basic web promotion, website development, multimedia licensing laws, social media business promotion, audio and video recording, post-production technology, and music notation software.

Prerequisites & Notes

NULL

Credits: 2

MUAK 1012 - CLASS PIANO I

This course presents the skills and techniques needed for private piano study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

Prerequisites & Notes

Music majors only

Credits: 1

MUAK 1022 - CLASS PIANO II

This class provides the necessary skills and techniques needed for private study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

Prerequisites & Notes

Prerequisite:

MUAK 1012

Credits: 1

MUAK 1032 - CLASS PIANO III

This class provides the necessary skills and techniques needed for private study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

Prerequisites & Notes

Prerequisite:

MUAK 1022

Credits: 1

MUAI 1811 - CLASS GUITAR FOR BEGINNERS

NULL

Prerequisites & Notes

NULL

Credits: 1

MUSC 1133 - MUSIC THEORY I

This course is a study of fundamental musical concepts with emphasis on notation, rhythm, key signatures, intervals, scales, major/minor tonality, and chord construction found in Western music.

Prerequisites & Notes

Prerequisite: MUSC 1002 or theory placement exam

Corequisite: MUSC 1042

Credits: 3

MUSC 1233 - MUSIC THEORY II

This course is a study of the fundamental principles of harmonic progression and harmonic rhythm, seventh chords, modulation, secondary dominants, leading-tone chords, and four-part composition. Included in this course is the study of small musical forms.

Prerequisites & Notes

Prerequisite: MUSC 1133; Corequisite: MUSC 1052

Credits: 3

MUSC 2133 - MUSIC THEORY III

This course is an advanced study of melodic, rhythmic, harmonic, formal elements, and compositional techniques of the Common Practice era.

Prerequisites & Notes

Prerequisite: MUSC 1233; Corequisite: MUSC 2041

Credits: 3

MUSC 2233 - MUSIC THEORY IV

This course is an advanced study of melodic, rhythmic, harmonic and formal elements of music as well as compositional techniques from the late 19th century to the present.

Prerequisites & Notes

Prerequisite: MUSC 2133; Corequisite: MUSC 2051

Credits: 3

MUSC 1041 - AURAL THEORY I

Singing at sight and melodic and harmonic dictation. Basic familiarization with the keyboard.

Prerequisites & Notes

Prerequisite: MUSC 1002 or theory placement exam

Corequisite: MUSC 1133

Credits: 2

MUSC 1051 - AURAL THEORY II

Singing at sight with melodic and harmonic dictation. Basic familiarization with the keyboard.

Prerequisites & Notes

NULL

Credits: 1

MUSC 2041 - AURAL THEORY III

A continuation of MUSC 1051.

Prerequisites & Notes

NULL

Credits: 1

MUSC 2051 - AURAL THEORY IV

A continuation of MUSC 2041.

Prerequisites & Notes

NULL

Credits: 1

MUSC 3502 - APPLIED MUSIC EDUCATION

This course provides music education and conducting students with consistent opportunities to conduct, perform, rehearse, lead, and reflect upon music teaching activities relevant to K-12 settings. Students will gain practical experience in facilitating music instruction under the guidance and support of the professor(s).

Credits: 1-2

MUSC 3533 - MUSIC HISTORY AND LITERATURE I

This course is a survey of musical styles and practices from the Medieval era through the early Romantic period with emphasis on listening and analysis.

Prerequisites & Notes

NULL

Credits: 3

MUSC 3633 - MUSIC HISTORY AND LITERATURE II

This course is a study of historical events, styles, composers, performers, and trends in classical, jazz, film, and popular music from the twentieth century to present.

Prerequisites & Notes

NULL

Credits: 3

MUSC 3732 - MUSIC HISTORY AND LITERATURE III

This course is a study of basic styles and cultures of music from around the world and how they have developed through history.

Prerequisites & Notes

NULL

Credits: 2

MUSC 322L - CONDUCTING I LAB

This course is a study of conducting techniques and skills. This course includes instruction in basic baton technique and simple score study. Special emphasis is placed on conducting posture and the development of clear beat patterns. Students also learn to indicate various articulation styles, dynamics, cuing, entrances, and releases.

Prerequisites & Notes

Co-requisite: MUSC 3502

Prerequisites: MUSC 1133, MUSC 1233

Credits: 1

MUSC 323L - CONDUCTING II LAB

This course is a study of advanced conducting techniques and skills. This course includes instruction in basic baton technique and simple score study. Topics covered in the course include conducting fermatas, tempo changes, orchestral score study, conducting non-metric passages, and mixed meter. Additional emphasis is placed on developing listening skills and solving complex conducting problems.

Prerequisites & Notes

Prerequisites: MUSC 1133 , MUSC 1233 , MUSC 2133 , MUSC 322L

Co-requisite: MUSC 3502

Credits: 1

MUSC 4101 - SENIOR RECITAL

This course requires students to demonstrate the successful completion of the senior level recital.

Prerequisites & Notes

Prerequisites: Permission of the instructor.

Corequisites: MUAI/MUAK/MUAV 3000 Level

Credits: 1

Large Ensemble (6 Credit Hours):

Six semesters of at least one ensemble

MUSC 1031 - CHAMBER ORCHESTRA

This class is a performance ensemble that studies and performs the orchestral repertoire from all historic periods and various styles.

Prerequisites & Notes

IN

Credits: 1

MUSC 1111 - CHAMBER SINGERS

This course is a performance ensemble dedicated to the performance of both sacred and secular mixed choral literature. Repertoire performed is appropriate for small choral ensembles.

Prerequisites & Notes

Prerequisite: Instructor Permission

Credits: 1

MUSC 1211 - CONCERT CHOIR

This is a performance ensemble dedicated to the performance of both sacred and secular mixed choral literature. Repertoire performed is appropriate for large choral ensembles.

Prerequisites & Notes

AD

Credits: 1

MUSC 1411 - WIND ENSEMBLE

This course is a performance ensemble that studies and performs the wind band repertoire from all historic periods and various styles.

Prerequisites & Notes

Prerequisite: Permission of instructor

Credits: 1

MUSC 1511 - JAZZ ENSEMBLE

The Jazz Band is a performance ensemble that is designed to explore various aspects of the repertoire for the big band that includes, dance band, swing, bebop, and contemporary works.

Prerequisites & Notes

Audition with instructor.

Credits: 1

MUSC 1611 - WOMEN'S CHORUS

A course designed to explore sacred and secular choral literature for women's chorus.

Prerequisites & Notes

NULL

Credits: 1

Applied Lessons (8 Credit Hours)

Four at 1000 Level, and Three at 3000 Level; Two-Credits During Recital Semester

Divine Design - 37 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Bachelor of Music Education

Bachelor of Music Education: Choral (Even Four-Year Plan)

Bachelor of Music Education: Choral (Odd Four-Year Plan)

Bachelor of Music Education: Instrumental (Even Four-Year Plan)

Bachelor of Music Education: Instrumental (Odd Four-Year Plan)

Music majors must pass all music courses with a C- or higher.

The Bachelor of Music Education degree program thoroughly prepares students to teach music in elementary, middle school, and high school settings. Our rigorous curriculum requires students to develop mastery of their major instrument or voice as well as strong pedagogical knowledge of secondary instruments and keyboard. Excellent courses in musicianship, knowledge of music technology, mastery of a wide range of musical styles, as well as nearly 700 hours of hands-on practicum experiences in K–12 classrooms enables our students to earn desirable teaching positions in public and private schools. Southeastern University music education graduates receive high praise for their achievements in the classroom, and many of our graduates have earned "Teacher of the Year" accolades in their first

three years of employment. Furthermore, graduates from the program have found success pursuing master's and doctoral degrees in the field.

After their sophomore year, all music education majors ought to apply for admission into the College of Education.

Admission to the College of Education

Application for official admission into the College of Education (COE) must be submitted by November 30 of the sophomore year in order to be accepted for the spring or by April 30 of the sophomore year for acceptance in the fall. Students will be notified by March 1 for fall applications and October 1 for spring applications. Transfer students must submit this application during their first sophomore semester of enrollment at SEU provided they have passed all portions of the GK exam. Applications can be found on the Undergraduate Education Forum (<https://library.seu.edu/UndergradEdForum>).

Admission Requirements into the College of Education:

- Enrollment as a degree-seeking student at the university;
- No grade lower than a "C-" (70) in any religion course, professional education course, or specialization course;
- Minimum cumulative GPA of 2.5 for all general education courses. If you become ineligible to continue in your program, you may re-apply for admittance when eligibility has been re-established by making a written request to the Compliance Committee. (You may apply one more time.)
- Minimum grade of "B" (84) in Fundamentals of Speech, Oral Interpretation, or Introduction to Music Education;
- Completed personality profile (MBTI);
- Official documentation of passing scores on all sections of the GK test, including any retakes and remediation.

State Approval/Reciprocity

All teacher education programs have met requirements for Florida State Approved Programs.

Students who plan to teach in Florida schools must file an application with the Office of Teacher Certification for the State of Florida and complete the post-degree requirements for the teaching credential.

Students graduating from Florida state-approved teacher certification programs are currently eligible for initial certification to teach in all members of the National Association of State Directors of Teacher Education and Certification (NASDTEC), an interstate reciprocity contract allowing certified teachers to obtain teaching jobs in other states and territories. An applicant's eligibility for certification according to the interstate agreement contract will be determined after the application for a Florida teaching certificate is on file in the Teacher Certification Office. For more information on state-specific certification requirements click [here](#).

Total Program Hours - 130 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours**Discursive Inquiry - 6 Credit Hours****ENGL 1133 - ENGLISH COMPOSITION I**

Study and practice in the critical reading and effective writing of expository prose, with an emphasis on fluency and style.

Credits: 3

EDUC 3353 - EMPOWERING ESOL TEACHERS

This course is an overview of curriculum, instructional methods and materials, testing and evaluation, and cross-cultural communication processes and linguistic principles as related to instructing English Language Learners (ELLs) in the PreK-12 classroom.

Prerequisites & Notes

None

Credits: 3

Natural-Scientific Inquiry - Select One (1) of the Following (4 Credit Hours):**BIOL 1333 - ESSENTIALS OF HUMAN A & P**

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

- or -

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

- or -

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

- or -

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

- or -

NSCI 1024 - INTRO TO SCIENCE AND TECHNOLOGY

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students

engage in development of reasoning and problem-solving skills associated with scientific issues as demonstrated in laboratory activities. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Credits: 4

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

- or -

NSCI 1044 - NUTRITION SCIENCE

This online course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Major Core- 53 Credits Hours

MUAK 1012 - CLASS PIANO I

This course presents the skills and techniques needed for private piano study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

Prerequisites & Notes

Music majors only

Credits: 1

MUAK 1022 - CLASS PIANO II

This class provides the necessary skills and techniques needed for private study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

Prerequisites & Notes

Prerequisite:

MUAK 1012

Credits: 1

MUAK 1032 - CLASS PIANO III

This class provides the necessary skills and techniques needed for private study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

Prerequisites & Notes

Prerequisite:

MUAK 1022

Credits: 1

MUAI 1811 - CLASS GUITAR FOR BEGINNERS

NULL

Prerequisites & Notes

NULL

Credits: 1

MUSC 1032 - INTRODUCTION TO MUSIC TECHNOLOGY

This course is an introduction to common technologies used throughout the various fields of music. Students in the course will explore basic web promotion, website development, multimedia licensing laws, social media business promotion, audio and video recording, post-production technology, and music notation software.

Prerequisites & Notes

NULL

Credits: 2

MUSC 1041 - AURAL THEORY I

Singing at sight and melodic and harmonic dictation. Basic familiarization with the keyboard.

Prerequisites & Notes

Prerequisite: MUSC 1002 or theory placement exam

Corequisite: MUSC 1133

Credits: 2

MUSC 1133 - MUSIC THEORY I

This course is a study of fundamental musical concepts with emphasis on notation, rhythm, key signatures, intervals, scales, major/minor tonality, and chord construction found in Western music.

Prerequisites & Notes

Prerequisite: MUSC 1002 or theory placement exam

Corequisite: MUSC 1042

MUSC 1051 - AURAL THEORY II

Singing at sight with melodic and harmonic dictation. Basic familiarization with the keyboard.

Prerequisites & Notes

NULL

Credits: 1

MUSC 1233 - MUSIC THEORY II

This course is a study of the fundamental principles of harmonic progression and harmonic rhythm, seventh chords, modulation, secondary dominants, leading-tone chords, and four-part composition. Included in this course is the study of small musical forms.

Prerequisites & Notes

Prerequisite: MUSC 1133; Corequisite: MUSC 1052

Credits: 3

MUSC 2041 - AURAL THEORY III

A continuation of MUSC 1051.

Prerequisites & Notes

NULL

Credits: 1

MUSC 2133 - MUSIC THEORY III

This course is an advanced study of melodic, rhythmic, harmonic, formal elements, and compositional techniques of the Common Practice era.

Prerequisites & Notes

Prerequisite: MUSC 1233; Corequisite: MUSC 2041

Credits: 3

MUSC 2051 - AURAL THEORY IV

A continuation of MUSC 2041.

Prerequisites & Notes

NULL

Credits: 1

MUSC 2233 - MUSIC THEORY IV

This course is an advanced study of melodic, rhythmic, harmonic and formal elements of music as well as compositional techniques from the late 19th century to the present.

Prerequisites & Notes

Prerequisite:MUSC 2133; Corequisite: MUSC 2051

Credits: 3

MUSC 3732 - MUSIC HISTORY AND LITERATURE III

This course is a study of basic styles and cultures of music from around the world and how they have developed through history.

Prerequisites & Notes

NULL

Credits: 2

MUSC 4223 - MUSIC CLASSROOM MANAGEMENT

This course is the study of various models and strategies for effective secondary (6-12) school music classroom management. It provides identification of cultural variations in the classroom, the nuances of working with ELL students, the impact of cultural variations on student behavior and attitudes, the examination of the legal requirements for teachers in the Florida Child Abuse Law, a review of general methods of teaching, and a review of generic teaching competencies.

Prerequisites & Notes

NULL

Credits: 3

EDUC 3133 - ASSESSMENT OF LEARNERS

This course focuses on the educational levels and needs of all students, including exceptional, culturally and/or linguistically diverse, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and curriculum-based assessments are included. Use of test results in program planning is emphasized.

Prerequisites & Notes

None

Credits: 3

EDUC 2233 - EDUCATIONAL PSYCHOLOGY

This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.

Prerequisites & Notes

None

Credits: 3

EDUC 3523 - TEACHING LITERACY IN CONTENT AREAS

This course will provide students with strategies and tools for becoming a facilitating and reflective practitioner, teaching reading across content areas, and helping students discover that content area learning is made richer when reading, writing, speaking, and listening are taught together. Particular emphasis is placed on a balanced approach to reading, specific reading and comprehension strategies for content reading, the role of reflection in helping students to think critically, reading for diverse students, and the use of appropriate texts and media.

Prerequisites & Notes

None

Credits: 3

ESED 3113 - SURVEY OF THE EXCEPTIONAL LEARNER

This is a required course for certification in all Education programs, including Music Education. This is an introductory course that examines the history, characteristics, and issues in exceptional education. The course covers all areas of exceptionality and their manifestations from early childhood through adulthood. It is designed to provide students with a firm grounding in the foundations of special education and expose them to the reconstruction of the field, in order that they may better deal with new and ever-changing developments. In addition to classroom meetings, a minimum of 10 hours of observation/participation in a clinical setting is required. This course is recommended to be taken prior to any other Exceptional Student Education courses.

Prerequisites & Notes

None

Credits: 3

Applied Lessons (1000 Level)

Four 2-Credit Lessons at 1000 Level

Applied Lessons (3000 Level)

Three 2-Credit Lessons at 3000 Level

Divine Design - 43 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

MUSC 2503 - INTRO TO MUSIC EDUCATION W/ FIELD

This is a course for music majors to participate in field experiences, lectures, readings, discussions, and writing assignments designed to provide an introduction to the profession of music education. Informed by a Christian worldview, emphasis will be placed on acquiring the personal, professional, and musical skills needed for effective music teaching and learning.

Prerequisites & Notes

None.

Credits: 3

MUSC 3502 - APPLIED MUSIC EDUCATION

This course provides music education and conducting students with consistent opportunities to conduct, perform, rehearse, lead, and reflect upon music teaching activities relevant to K-12 settings. Students will gain practical experience in facilitating music instruction under the guidance and support of the professor(s).

Credits: 1-2

MUSC 250L - MUSIC EDUCATION LAB

A course for all music education majors to review a variety of aspects of music education through observation, reading, and teaching experiences. This course is intended to develop a detailed understanding of music curricula, instructional practices, and administrative procedures at the elementary and secondary levels. Emphasis will be placed on personal, professional, and musical skills necessary for effective music teaching and learning.

Prerequisites & Notes

NULL

Credits: 0

MUSC 231L - STRINGS TECHNIQUES LAB

This course offers instruction in the techniques and skills used in playing and teaching string instruments.

Prerequisites & Notes

Corequisite: MUSC 3502

Credits: 1

MUSC 322L - CONDUCTING I LAB

This course is a study of conducting techniques and skills. This course includes instruction in basic baton technique and simple score study. Special emphasis is placed on conducting posture and the development of clear beat patterns. Students also learn to indicate various articulation styles, dynamics, cuing, entrances, and releases.

Prerequisites & Notes

Co-requisite: MUSC 3502

Prerequisites: MUSC 1133, MUSC 1233

Credits: 1

MUSC 323L - CONDUCTING II LAB

This course is a study of advanced conducting techniques and skills. This course includes instruction in basic baton technique and simple score study. Topics covered in the course include conducting fermatas, tempo changes,

orchestral score study, conducting non-metric passages, and mixed meter. Additional emphasis is placed on developing listening skills and solving complex conducting problems.

Prerequisites & Notes

Prerequisites: MUSC 1133 , MUSC 1233 , MUSC 2133 , MUSC 322L

Co-requisite: MUSC 3502

Credits: 1

MUSC 381L - CHORAL METHODS

This course provides prospective secondary music teachers and church musicians with an overview of the materials, learning outcomes, teaching strategies, and methodologies needed to teach vocal music in school and conduct church choirs.

Prerequisites & Notes

Prerequisite: MUSC 3222

Corequisite: MUSC 3502

Credits: 1

MUSC 3942 - METHODS TEACHING MUSIC ELEMENTARY

This is a course for music education majors to prepare students for specialized music teaching in primary (Pre-K-3rd)/elementary (1-6) schools. Emphasis is placed on developing and evaluating music curriculum, lesson planning, and selection and utilization of methods, instructional materials and technology. The course includes field-based experiences.

Prerequisites & Notes

Prerequisites: EDUC 2133, EDUC 2233, EDUC 3123, MUSC 2503

Corequisite: MUSC 3502

Credits: 2

MUSC 3952 - METHODS TEACHING MUSIC SECONDARY

This is a course for music education majors to prepare preservice teachers for specialized music teaching in the middle grades (5-9) and secondary (6-12) schools. Emphasis is placed on developing and evaluating music curriculum, lesson planning, and selection and utilization of methods, instructional materials and technology. The course includes field-based experiences.

Prerequisites & Notes

Prerequisite: EDUC 2133, EDUC 2233, EDUC 3123, MUSC 2503

Corequisite: MUSC 3502

Credits: 2

EDUC 4912 - STUDENT TEACHING

This course provides five seminar-style opportunities for student teachers to examine the experiences they are concurrently having in the full-time student internship in the PreK-12 setting. Seminars are designed to respond to the immediate needs of the student teachers and offer support, encouragement, and insights into the teaching process and profession. Guest speakers will play an important role in enriching the program and providing first-hand experiences from the classroom and administrative levels.

Prerequisites & Notes

Attempt all required portions of the FTCE

Credits: 12

Primary Large Ensemble

Must be taken for seven semesters.

Emphasis: Select one (1) of the Following (4 Credit Hours):

Instrumental Track

MUSC 211L - PERCUSSION TECHNIQUES LAB

The course provides instruction in the techniques and skills used in playing and teaching percussion instruments.

Prerequisites & Notes

Corequisite: MUSC 3502

Credits: 1

MUSC 221L - WOODWINDS TECHNIQUES LAB

The course provides instruction in the techniques and skills used in playing and teaching woodwind instruments.

Prerequisites & Notes

Corequisite: MUSC 3502

Credits: 1

MUSC 321L - BRASS TECHNIQUES LAB

This course provides instruction in the techniques and skills used in playing and teaching brass instruments.

Prerequisites & Notes

Corequisite: MUSC 3502

Credits: 1

MUSC 3311 - STRING TECHNIQUES II

This course offers instruction in the techniques and skills used in playing and teaching string instruments.

Prerequisites & Notes

Required for String Majors Only

Credits: 1

- or -

MUSC 4611 - MARCHING BAND TECHNIQUES

This course covers the various aspects involved in the instruction, management and administration of the marching band. Emphasis is placed on viewing the marching band as one of the components of a balanced instrumental music program.

Prerequisites & Notes

Required for Wind and Percussion Majors Only

Credits: 1

Choral Track**MUSC 1912 - DICTION FOR SINGERS I**

Survey course designed to instruct the voice student in the correct pronunciation of Italian and German as they relate to art music. Through the use of the International Phonetic Alphabet, the student will learn to transcribe Italian and German texts in order to pronounce them more accurately and effectively. Emphasis will be placed on studying and singing works in Italian and German.

Prerequisites & Notes

NULL

Credits: 2

MUSC 213L - INTRO TO WINDS AND PERCUSSION LAB

This course is designed to provide choral music education majors with an introduction to the basic pedagogical and performance skills necessary to teach instruments commonly found in K-12 band programs.

Prerequisites & Notes

Corequisite: MUSC 3502

Credits: 1

Bachelor of Science, Commercial Music

Bachelor of Science, Commercial Music Four Year Plan

Music majors must pass all music courses with a C- or higher.

The Commercial Music program equips students to become multi-faceted 21st century musicians. Commercial music majors take classes that will provide them with foundational knowledge in songwriting, studio recording, live sound

technology, copyright law, performance, and more. The goal is to produce well-rounded contemporary musicians who are equipped to generate revenue from multiple musical sources. Potential careers include performer, live sound technician, music producer, artist management, and more.

Total Program Hours - 120 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours; Select One with Lab:

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

OR

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

Quantitative Inquiry - 3 Credit Hours; Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry- 6 Credit Hours; Select Two:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - 3 Credit Hours; Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 49 Credit Hours

MUAK 1012 - CLASS PIANO I

This course presents the skills and techniques needed for private piano study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

Prerequisites & Notes

Music majors only

Credits: 1

MUAK 1022 - CLASS PIANO II

This class provides the necessary skills and techniques needed for private study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

Prerequisites & Notes

Prerequisite:

MUAK 1012

Credits: 1

MUAK 1032 - CLASS PIANO III

This class provides the necessary skills and techniques needed for private study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

Prerequisites & Notes

Prerequisite:

MUAK 1022

Credits: 1

MUAI 1811 - CLASS GUITAR FOR BEGINNERS

NULL

Prerequisites & Notes

NULL

Credits: 1

MUSC 1032 - INTRODUCTION TO MUSIC TECHNOLOGY

This course is an introduction to common technologies used throughout the various fields of music. Students in the course will explore basic web promotion, website development, multimedia licensing laws, social media business promotion, audio and video recording, post-production technology, and music notation software.

Prerequisites & Notes

NULL

Credits: 2

MUSC 1133 - MUSIC THEORY I

This course is a study of fundamental musical concepts with emphasis on notation, rhythm, key signatures, intervals, scales, major/minor tonality, and chord construction found in Western music.

Prerequisites & Notes

Prerequisite: MUSC 1002 or theory placement exam

Corequisite: MUSC 1042

Credits: 3

MUSC 1041 - AURAL THEORY I

Singing at sight and melodic and harmonic dictation. Basic familiarization with the keyboard.

Prerequisites & Notes

Prerequisite: MUSC 1002 or theory placement exam

Corequisite: MUSC 1133

Credits: 2

MUSC 1233 - MUSIC THEORY II

This course is a study of the fundamental principles of harmonic progression and harmonic rhythm, seventh chords, modulation, secondary dominants, leading-tone chords, and four-part composition. Included in this course is the study of small musical forms.

Prerequisites & Notes

Prerequisite: MUSC 1133; Corequisite: MUSC 1052

Credits: 3

MUSC 1051 - AURAL THEORY II

Singing at sight with melodic and harmonic dictation. Basic familiarization with the keyboard.

Prerequisites & Notes

NULL

Credits: 1

MUSC 2411 - RHYTHM SECTION TECHNIQUES

This course is a workshop for the study and development of musical techniques for the rhythm section of a rock, pop, or jazz band. Rhythm section includes guitar, bass, drums, percussion, and keyboards. Emphasis will be placed on the methods of performance, communication, and organization of a rhythm section in a church context.

Prerequisites & Notes

NULL

Credits: 1

MUSC 3143 - AUDIO AND PRODUCTION TECHNOLOGY I

This course is a study of entry level techniques to produce music, audio, and multimedia content using computer technologies. It provides hands-on experience in entry level techniques in worship support ministries including sound reinforcement, theatrical lighting, and multimedia projection. Emphasis will be placed on the practical application of these technologies in a church setting. During the semester, students will apply learned techniques and principles during student-organized, in-class concert productions and individualized digital music projects.

Credits: 3

MUSC 3153 - AUDIO AND PRODUCTION TECHNOLOGY II

This course is a study of the intermediate and advanced techniques to produce music, audio, and multimedia content using computer technologies. It provides hands-on experience in intermediate and advanced techniques in worship support ministries including sound reinforcement, theatrical lighting, and multimedia projection. Emphasis will be placed on the practical application of these technologies in a church setting. During the semester, students will apply learned techniques and principles during student-organized, in-class concert productions and individualized digital music projects.

Credits: 3

MUSC 3403 - RECORDING ARTS I

This course is an introduction to the engineering and producing practices and theories of the audio recording studio. The student will have hands on experience with digital and analogue mixing consoles, multi-track recording, signal processing, and microphone placement.

Prerequisites & Notes

NULL

Credits: 3

MUSC 3413 - RECORDING ARTS II

This course, as a continuation of Recording Arts I, explores the engineering and producing practices and theories of the audio recording studio. The student will have hands-on experience with digital and analogue mixing consoles, multi-track recording, signal processing, and microphone placement. Attention will also be given to the concepts and practice of psychoacoustics in relation to quality audio recordings, audio mastering, critical listening and response, and studio session management.

Prerequisites & Notes

NULL

Credits: 3

MUSC 3423 - MUSIC BUSINESS SEMINAR

This course explores various aspects of business and law as they relate to the music industry. Subject areas include record label functions, publishing, management and public relations, and promoting musical products.

Prerequisites & Notes

NULL

Credits: 3

MUSC 3533 - MUSIC HISTORY AND LITERATURE I

This course is a survey of musical styles and practices from the Medieval era through the early Romantic period with emphasis on listening and analysis.

Prerequisites & Notes

NULL

Credits: 3

MUSC 3633 - MUSIC HISTORY AND LITERATURE II

This course is a study of historical events, styles, composers, performers, and trends in classical, jazz, film, and popular music from the twentieth century to present.

Prerequisites & Notes

NULL

Credits: 3

MUSC 3732 - MUSIC HISTORY AND LITERATURE III

This course is a study of basic styles and cultures of music from around the world and how they have developed through history.

Prerequisites & Notes

NULL

Credits: 2

MUSC 4021 - SENIOR CAPSTONE

Available only for students in BS Music Industry or BS Worship Studies. This course requires students to demonstrate the culmination of their studies via successful completion of a senior level capstone project as outlined by their assigned instructor.

Prerequisites & Notes

Prerequisites: Permission of the instructor.

Credits: 1

Large Ensemble (4 Credit Hours)

Applied Lessons (6 Credit Hours)

Four Semesters of Lessons at 1000 Level, and Two Semesters of Lessons at 3000 Level. *Primary Instrument Lessons

Divine Design- 41 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Bachelor of Science, Worship Studies

Bachelor of Science, Worship Studies Four Year Plan

Music majors must pass all music courses with a C- or higher.

The Worship Studies program is designed specifically for those called to serve the church through music. This program prepares students for the demands of service as a worship leader, worship pastor, music director, or other related music ministry position specifically in the instruction of various styles of contemporary and traditional music. The audio technology, music theory, instrumental, and vocal techniques taught here equip students with the skills they need to confidently fulfill various roles upon graduation.

Total Program Hours: 120 Credit Hours

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 49 Credit Hours

MUAK 1012 - CLASS PIANO I

This course presents the skills and techniques needed for private piano study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

Prerequisites & Notes

Music majors only

Credits: 1

MUAK 1022 - CLASS PIANO II

This class provides the necessary skills and techniques needed for private study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

Prerequisites & Notes

Prerequisite:

MUAK 1012

Credits: 1

MUAK 1032 - CLASS PIANO III

This class provides the necessary skills and techniques needed for private study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

Prerequisites & Notes

Prerequisite:

MUAK 1022

Credits: 1

MUAI 1811 - CLASS GUITAR FOR BEGINNERS

NULL

Prerequisites & Notes

NULL

Credits: 1

MUSC 1032 - INTRODUCTION TO MUSIC TECHNOLOGY

This course is an introduction to common technologies used throughout the various fields of music. Students in the course will explore basic web promotion, website development, multimedia licensing laws, social media business promotion, audio and video recording, post-production technology, and music notation software.

Prerequisites & Notes

NULL

Credits: 2

MUSC 1133 - MUSIC THEORY I

This course is a study of fundamental musical concepts with emphasis on notation, rhythm, key signatures, intervals, scales, major/minor tonality, and chord construction found in Western music.

Prerequisites & Notes

Prerequisite: MUSC 1002 or theory placement exam

Corequisite: MUSC 1042

Credits: 3

MUSC 1041 - AURAL THEORY I

Singing at sight and melodic and harmonic dictation. Basic familiarization with the keyboard.

Prerequisites & Notes

Prerequisite: MUSC 1002 or theory placement exam

Corequisite: MUSC 1133

Credits: 2

MUSC 1233 - MUSIC THEORY II

This course is a study of the fundamental principles of harmonic progression and harmonic rhythm, seventh chords, modulation, secondary dominants, leading-tone chords, and four-part composition. Included in this course is the study of small musical forms.

Prerequisites & Notes

Prerequisite: MUSC 1133; Corequisite: MUSC 1052

Credits: 3

MUSC 1051 - AURAL THEORY II

Singing at sight with melodic and harmonic dictation. Basic familiarization with the keyboard.

Prerequisites & Notes

NULL

Credits: 1

MUSC 2411 - RHYTHM SECTION TECHNIQUES

This course is a workshop for the study and development of musical techniques for the rhythm section of a rock, pop, or jazz band. Rhythm section includes guitar, bass, drums, percussion, and keyboards. Emphasis will be placed on the methods of performance, communication, and organization of a rhythm section in a church context.

Prerequisites & Notes

NULL

Credits: 1

MUSC 3143 - AUDIO AND PRODUCTION TECHNOLOGY I

This course is a study of entry level techniques to produce music, audio, and multimedia content using computer technologies. It provides hands-on experience in entry level techniques in worship support ministries including sound reinforcement, theatrical lighting, and multimedia projection. Emphasis will be placed on the practical application of these technologies in a church setting. During the semester, students will apply learned techniques and principles during student-organized, in-class concert productions and individualized digital music projects.

Credits: 3

MUSC 202L - WORSHIP LEADING I LAB

This course provides hands-on experience in worship leading. Students will apply techniques and principles learned in Worship Leading I while leading worship in a small group setting.

Prerequisites & Notes

NULL

Credits: 1

MUSC 203L - WORSHIP LEADING II LAB

This course provides hands-on experience in worship leading utilizing a large worship team. Students will apply techniques and principles learned in Worship Leading II while leading worship in a large group setting.

Prerequisites & Notes

NULL

Credits: 1

MUSC 3502 - APPLIED MUSIC EDUCATION

This course provides music education and conducting students with consistent opportunities to conduct, perform, rehearse, lead, and reflect upon music teaching activities relevant to K-12 settings. Students will gain practical experience in facilitating music instruction under the guidance and support of the professor(s).

Credits: 1-2

MUSC 322L - CONDUCTING I LAB

This course is a study of conducting techniques and skills. This course includes instruction in basic baton technique and simple score study. Special emphasis is placed on conducting posture and the development of clear beat patterns. Students also learn to indicate various articulation styles, dynamics, cuing, entrances, and releases.

Prerequisites & Notes

Co-requisite: MUSC 3502

Prerequisites: MUSC 1133, MUSC 1233

Credits: 1

MUSC 3403 - RECORDING ARTS I

This course is an introduction to the engineering and producing practices and theories of the audio recording studio. The student will have hands on experience with digital and analogue mixing consoles, multi-track recording, signal processing, and microphone placement.

Prerequisites & Notes

NULL

Credits: 3

MUSC 3533 - MUSIC HISTORY AND LITERATURE I

This course is a survey of musical styles and practices from the Medieval era through the early Romantic period with emphasis on listening and analysis.

Prerequisites & Notes

NULL

Credits: 3

MUSC 3633 - MUSIC HISTORY AND LITERATURE II

This course is a study of historical events, styles, composers, performers, and trends in classical, jazz, film, and popular music from the twentieth century to present.

Prerequisites & Notes

NULL

Credits: 3

MUSC 3732 - MUSIC HISTORY AND LITERATURE III

This course is a study of basic styles and cultures of music from around the world and how they have developed through history.

Prerequisites & Notes

NULL

Credits: 2

MUSC 4222 - HYMNOLOGY

This course is a study of the worship music from early Christianity to modern hymnody with attention given to message, music, and effectiveness in worship and evangelism.

Prerequisites & Notes

NULL

Credits: 2

MUSC 4322 - MUSIC ADMINISTRATION/ORGANIZATION

This course is a study of the administrative role of the director of music. Emphasis will be placed on planning, programming, budgeting, and evaluating various music and arts related programs.

Prerequisites & Notes

UP

Credits: 2

MUSC 4021 - SENIOR CAPSTONE

Available only for students in BS Music Industry or BS Worship Studies. This course requires students to demonstrate the culmination of their studies via successful completion of a senior level capstone project as outlined by their assigned instructor.

Prerequisites & Notes

Prerequisites: Permission of the instructor.

Credits: 1

Applied Lessons (6 Credit Hours)

Four Semesters of Lessons at 1000 Level, and Two Semesters of Lessons at 3000 Level. *Primary Instrument Lessons.

Large Ensemble (4 Credit Hours)

Four Semesters of at least One Large Ensemble.

Divine Design - 37 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Certificate, Instrumental Performance

*Permission of music faculty required before certificate can be added.

Music majors must pass all music courses with a C- or higher.

Total Program - 18 Credit Hours

Applied Lessons - 8 Credit Hours

Four Consecutive Semesters at 3xx2 Level

Large Ensemble - Select from the Following: (4 Credit Hours)

Four Consecutive Semesters

MUSC 1031 - CHAMBER ORCHESTRA

This class is a performance ensemble that studies and performs the orchestral repertoire from all historic periods and various styles.

Prerequisites & Notes

IN

Credits: 1

MUSC 1401 - CONTEMPORARY BAND

Members of this ensemble are expected to perform at each concert scheduled throughout the semester.

Prerequisites & Notes

NULL

Credits: 1

MUSC 1411 - WIND ENSEMBLE

This course is a performance ensemble that studies and performs the wind band repertoire from all historic periods and various styles.

Prerequisites & Notes

Prerequisite: Permission of instructor

Credits: 1

MUSC 1511 - JAZZ ENSEMBLE

The Jazz Band is a performance ensemble that is designed to explore various aspects of the repertoire for the big band that includes, dance band, swing, bebop, and contemporary works.

Prerequisites & Notes

Audition with instructor.

Credits: 1

Small Ensemble- Select from the Following: (4 Credit Hours)

Four Consecutive Semesters

MUSC 1011 - STRING QUARTET & SMALL ENSEMBLES

This course provides a setting for students to perform for one another on their instruments.

Prerequisites & Notes

Prerequisite: Permission of instructor

Credits: 1

MUSC 1221 - GUITAR ENSEMBLE

This course explores the performance of ensemble literature for guitar.

Prerequisites & Notes

AD

Credits: 1

MUSC 1301 - PERCUSSION ENSEMBLE

A performance ensemble for the complete percussion family of instruments which includes but is not limited to mallets, timpani, and snare drum.

Prerequisites & Notes

NULL

Credits: 1

MUSC 1811 - BRASS ENSEMBLE

This course emphasizes the study and performances of ensemble literature for brass instruments. Open to students by audition only.

Prerequisites & Notes

AD

Credits: 1

Performance Recitals - 2 Credit Hours

MUSC 3201 - JUNIOR RECITAL

This course requires students to demonstrate the successful completion of the junior level recital.

Prerequisites & Notes

Prerequisites: Permission of the instructor.

Corequisites: MUAI/MUAV/MUAK 3000 Level

Credits: 1

MUSC 4101 - SENIOR RECITAL

This course requires students to demonstrate the successful completion of the senior level recital.

Prerequisites & Notes

Prerequisites: Permission of the instructor.

Corequisites: MUAI/MUAK/MUAV 3000 Level

Credits: 1

Certificate, Piano Performance

Music majors must pass all music courses with a C- or higher.

Total Program - 13 Credit Hours

Piano Lab - 4 Credit Hours

Four consecutive semesters of Piano Lab MUPL 1010 for credit (to include studies of piano literature, pedagogy, improvisation, and ensemble playing).

Applied Piano - 9 Credit Hours

At least three semesters Applied Piano at the MUAK 1103 level.

Junior Recital - 0 Credit Hours

Senior Recital - 0 Credit Hours

Certificate, Vocal Performance

*Permission of music faculty required before certificate can be added.

Music majors must pass all music courses with a C- or higher.

Total Program Hours - 18 Credit Hours

Applied Lessons - 9 Credit Hours

Music Theory- (8 Credit Hours)

MUSC 2133 - MUSIC THEORY III

This course is an advanced study of melodic, rhythmic, harmonic, formal elements, and compositional techniques of the Common Practice era.

Prerequisites & Notes

Prerequisite: MUSC 1233; Corequisite: MUSC 2041

Credits: 3

MUSC 2041 - AURAL THEORY III

A continuation of MUSC 1051.

Prerequisites & Notes

NULL

Credits: 1

MUSC 2233 - MUSIC THEORY IV

This course is an advanced study of melodic, rhythmic, harmonic and formal elements of music as well as compositional techniques from the late 19th century to the present.

Prerequisites & Notes

Prerequisite: MUSC 2133; Corequisite: MUSC 2051

Credits: 3

MUSC 2051 - AURAL THEORY IV

A continuation of MUSC 2041.

Prerequisites & Notes

NULL

Credits: 1

Composition- (8 Credit Hours)

MUSC 3423 - MUSIC BUSINESS SEMINAR

This course explores various aspects of business and law as they relate to the music industry. Subject areas include record label functions, publishing, management and public relations, and promoting musical products.

Prerequisites & Notes

NULL

Credits: 3

MUSC 4211 - COMPOSITION APPLIED LESSONS

This course provides applied composition lessons to individual students. Individual compositional work is required.

Prerequisites & Notes

NULL

Credits: 1

- or -

MUSC 4212 - COMPOSITION APPLIED LESSONS

This course provides applied composition lessons to individual students. Individual compositional work is required.

Prerequisites & Notes

NULL

Credits: 2

MUSC 4441 - MUSIC COMPOSITION SENIOR PROJECT

This course demonstrates the skills and knowledge that a student has acquired over the course of their academic career as a Music Composition minor.

Prerequisites & Notes

Prerequisite: Department chair approval required

Credits: 1

Certificate, Music Technology

Exclusively available to undergraduate music majors

Total Credit Hours - 18

Certificate in Music Technology - 18 Credit Hours

MUSC 3143 - AUDIO AND PRODUCTION TECHNOLOGY I

This course is a study of entry level techniques to produce music, audio, and multimedia content using computer technologies. It provides hands-on experience in entry level techniques in worship support ministries including sound

reinforcement, theatrical lighting, and multimedia projection. Emphasis will be placed on the practical application of these technologies in a church setting. During the semester, students will apply learned techniques and principles during student-organized, in-class concert productions and individualized digital music projects.

Credits: 3

MUSC 3403 - RECORDING ARTS I

This course is an introduction to the engineering and producing practices and theories of the audio recording studio. The student will have hands on experience with digital and analogue mixing consoles, multi-track recording, signal processing, and microphone placement.

Prerequisites & Notes

NULL

Credits: 3

MUSC 3153 - AUDIO AND PRODUCTION TECHNOLOGY II

This course is a study of the intermediate and advanced techniques to produce music, audio, and multimedia content using computer technologies. It provides hands-on experience in intermediate and advanced techniques in worship support ministries including sound reinforcement, theatrical lighting, and multimedia projection. Emphasis will be placed on the practical application of these technologies in a church setting. During the semester, students will apply learned techniques and principles during student-organized, in-class concert productions and individualized digital music projects.

Credits: 3

MUSC 3413 - RECORDING ARTS II

This course, as a continuation of Recording Arts I, explores the engineering and producing practices and theories of the audio recording studio. The student will have hands-on experience with digital and analogue mixing consoles, multi-track recording, signal processing, and microphone placement. Attention will also be given to the concepts and practice of psychoacoustics in relation to quality audio recordings, audio mastering, critical listening and response, and studio session management.

Prerequisites & Notes

NULL

Credits: 3

Select One (1) from the Following: (3 Credit Hours)

MUSC 3423 - MUSIC BUSINESS SEMINAR

This course explores various aspects of business and law as they relate to the music industry. Subject areas include record label functions, publishing, management and public relations, and promoting musical products.

Prerequisites & Notes

NULL

Credits: 3

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

Certificate in Worship Studies

Total Program Hours - 18 Credit Hours

Certificate in Worship Studies - 18 Credit Hours

MUSC 2411 - RHYTHM SECTION TECHNIQUES

This course is a workshop for the study and development of musical techniques for the rhythm section of a rock, pop, or jazz band. Rhythm section includes guitar, bass, drums, percussion, and keyboards. Emphasis will be placed on the methods of performance, communication, and organization of a rhythm section in a church context.

Prerequisites & Notes

NULL

Credits: 1

MUSC 202L - WORSHIP LEADING I LAB

This course provides hands-on experience in worship leading. Students will apply techniques and principles learned in Worship Leading I while leading worship in a small group setting.

Prerequisites & Notes

NULL

Credits: 1

MUSC 203L - WORSHIP LEADING II LAB

This course provides hands-on experience in worship leading utilizing a large worship team. Students will apply techniques and principles learned in Worship Leading II while leading worship in a large group setting.

Prerequisites & Notes

NULL

Credits: 1

MUSC 3143 - AUDIO AND PRODUCTION TECHNOLOGY I

This course is a study of entry level techniques to produce music, audio, and multimedia content using computer technologies. It provides hands-on experience in entry level techniques in worship support ministries including sound reinforcement, theatrical lighting, and multimedia projection. Emphasis will be placed on the practical application of these technologies in a church setting. During the semester, students will apply learned techniques and principles during student-organized, in-class concert productions and individualized digital music projects.

Credits: 3

MUSC 4322 - MUSIC ADMINISTRATION/ORGANIZATION

This course is a study of the administrative role of the director of music. Emphasis will be placed on planning, programming, budgeting, and evaluating various music and arts related programs.

Prerequisites & Notes

UP

Credits: 2

MUSC 4222 - HYMNOLOGY

This course is a study of the worship music from early Christianity to modern hymnody with attention given to message, music, and effectiveness in worship and evangelism.

Prerequisites & Notes

NULL

Credits: 2

Secondary Applied Lessons - 2 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MUSC 1032 - INTRODUCTION TO MUSIC TECHNOLOGY

This course is an introduction to common technologies used throughout the various fields of music. Students in the course will explore basic web promotion, website development, multimedia licensing laws, social media business promotion, audio and video recording, post-production technology, and music notation software.

Prerequisites & Notes

NULL

Credits: 2

MUAK 1012 - CLASS PIANO I

This course presents the skills and techniques needed for private piano study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

Prerequisites & Notes

Music majors only

Credits: 1

MUSC 1041 - AURAL THEORY I

Singing at sight and melodic and harmonic dictation. Basic familiarization with the keyboard.

Prerequisites & Notes

Prerequisite: MUSC 1002 or theory placement exam

Corequisite: MUSC 1133

Credits: 2

MUSC 1133 - MUSIC THEORY I

This course is a study of fundamental musical concepts with emphasis on notation, rhythm, key signatures, intervals, scales, major/minor tonality, and chord construction found in Western music.

Prerequisites & Notes

Prerequisite: MUSC 1002 or theory placement exam

Corequisite: MUSC 1042

Credits: 3

MUSC 250L - MUSIC EDUCATION LAB

A course for all music education majors to review a variety of aspects of music education through observation, reading, and teaching experiences. This course is intended to develop a detailed understanding of music curricula, instructional practices, and administrative procedures at the elementary and secondary levels. Emphasis will be placed on personal, professional, and musical skills necessary for effective music teaching and learning.

Prerequisites & Notes

NULL

Credits: 0

Applied Lessons (1000 Level)

Choral Ensemble

SPRING SEMESTER - 17 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

MUAK 1022 - CLASS PIANO II

This class provides the necessary skills and techniques needed for private study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

Prerequisites & Notes

Prerequisite:

MUAK 1012

Credits: 1

MUSC 1051 - AURAL THEORY II

Singing at sight with melodic and harmonic dictation. Basic familiarization with the keyboard.

Prerequisites & Notes

NULL

Credits: 1

MUSC 1233 - MUSIC THEORY II

This course is a study of the fundamental principles of harmonic progression and harmonic rhythm, seventh chords, modulation, secondary dominants, leading-tone chords, and four-part composition. Included in this course is the study of small musical forms.

Prerequisites & Notes

Prerequisite: MUSC 1133; Corequisite: MUSC 1052

Credits: 3

MUSC 250L - MUSIC EDUCATION LAB

A course for all music education majors to review a variety of aspects of music education through observation, reading, and teaching experiences. This course is intended to develop a detailed understanding of music curricula, instructional practices, and administrative procedures at the elementary and secondary levels. Emphasis will be placed on personal, professional, and musical skills necessary for effective music teaching and learning.

Natural-Scientific Inquiry - Select One with Lab:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Credits: 1

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

Applied Lessons (1000 Level)

2-Credit Recommended

Voice/Instrumental Lab

Large Ensemble

Select One:

- DIVINE DESIGN - 1 Credit Hour
- OR -

MUAK 1012 - CLASS PIANO I

This course presents the skills and techniques needed for private piano study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

Prerequisites & Notes

Music majors only

Credits: 1

SPRING SEMESTER - 15 Credit Hours

MUSC 1233 - MUSIC THEORY II

This course is a study of the fundamental principles of harmonic progression and harmonic rhythm, seventh chords, modulation, secondary dominants, leading-tone chords, and four-part composition. Included in this course is the study of small musical forms.

Prerequisites & Notes

Prerequisite: MUSC 1133; Corequisite: MUSC 1052

Credits: 3

MUSC 1051 - AURAL THEORY II

Singing at sight with melodic and harmonic dictation. Basic familiarization with the keyboard.

Prerequisites & Notes

NULL

Credits: 1

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Select One:

- DIVINE DESIGN - 1 Credit Hour

- OR -

MUAK 1022 - CLASS PIANO II

This class provides the necessary skills and techniques needed for private study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

Prerequisites & Notes

Prerequisite:

MUAK 1012

Credits: 1

Large Ensemble

Applied Lessons (1000 Level)

Voice/Instrumental Lab

Year Two

FALL SEMESTER - 17 Credit Hours

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

MUSC 2041 - AURAL THEORY III

A continuation of MUSC 1051.

Prerequisites & Notes

NULL

Credits: 1

MUSC 2133 - MUSIC THEORY III

This course is an advanced study of melodic, rhythmic, harmonic, formal elements, and compositional techniques of the Common Practice era.

Prerequisites & Notes

Prerequisite: MUSC 1233; Corequisite: MUSC 2041

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Quantitative Inquiry - Select One:

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Select One:

- **DIVINE DESIGN**

MUAK 1032 - CLASS PIANO III

This class provides the necessary skills and techniques needed for private study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

Prerequisites & Notes

Applied Lessons (1000 Level)

Voice/Instrumental Lab

Divine Design (4 Credit Hours)

SPRING SEMESTER - 15 Credit Hours

MUSC 2233 - MUSIC THEORY IV

This course is an advanced study of melodic, rhythmic, harmonic and formal elements of music as well as compositional techniques from the late 19th century to the present.

Prerequisites & Notes

Prerequisite:MUSC 2133; Corequisite: MUSC 2051

Credits: 3

MUSC 2051 - AURAL THEORY IV

A continuation of MUSC 2041.

Prerequisites & Notes

NULL

Credits: 1

MUAK 1000 - KEYBOARD PROFICIENCY EXAM

This is a pass/fail check item to fulfill the keyboard proficiency requirement of all non-piano music majors.

Prerequisites & Notes

NULL

Credits: 0

MUAI 1811 - CLASS GUITAR FOR BEGINNERS

NULL

Prerequisites & Notes

NULL

Credits: 1

MUSC 3533 - MUSIC HISTORY AND LITERATURE I

This course is a survey of musical styles and practices from the Medieval era through the early Romantic period with emphasis on listening and analysis.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders,

and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

Divine Design (3 Credit Hours)

Year Three

FALL SEMESTER - 16 Credit Hours

MUSC 3633 - MUSIC HISTORY AND LITERATURE II

This course is a study of historical events, styles, composers, performers, and trends in classical, jazz, film, and popular music from the twentieth century to present.

Prerequisites & Notes

NULL

Credits: 3

MUSC 322L - CONDUCTING I LAB

This course is a study of conducting techniques and skills. This course includes instruction in basic baton technique and simple score study. Special emphasis is placed on conducting posture and the development of clear beat patterns. Students also learn to indicate various articulation styles, dynamics, cuing, entrances, and releases.

Prerequisites & Notes

Co-requisite: MUSC 3502

Prerequisites: MUSC 1133, MUSC 1233

Credits: 1

MUSC 1032 - INTRODUCTION TO MUSIC TECHNOLOGY

This course is an introduction to common technologies used throughout the various fields of music. Students in the course will explore basic web promotion, website development, multimedia licensing laws, social media business promotion, audio and video recording, post-production technology, and music notation software.

Prerequisites & Notes

NULL

Credits: 2

MUSC 3502 - APPLIED MUSIC EDUCATION

This course provides music education and conducting students with consistent opportunities to conduct, perform, rehearse, lead, and reflect upon music teaching activities relevant to K-12 settings. Students will gain practical experience in facilitating music instruction under the guidance and support of the professor(s).

Credits: 1-2

Select One:

- DIVINE DESIGN Credits: 3

- OR -

MUSC 2503 - INTRO TO MUSIC EDUCATION W/ FIELD

This is a course for music majors to participate in field experiences, lectures, readings, discussions, and writing assignments designed to provide an introduction to the profession of music education. Informed by a Christian world-view, emphasis will be placed on acquiring the personal, professional, and musical skills needed for effective music teaching and learning.

Prerequisites & Notes

None.

Credits: 3

Large Ensemble

Applied Lessons (3000 Level)

Voice/Instrumental Lab

Divine Design (5 Credit Hours)

SPRING SEMESTER - 13 Credit Hours

MUSC 3632 - MUSIC HISTORY AND LITERATURE IN THE CONCERT HALL

This course is a study of basic styles of music history as they developed in public forums, life at court, and the concert hall.

Prerequisites & Notes

NULL

Credits: 2

MUSC 323L - CONDUCTING II LAB

This course is a study of advanced conducting techniques and skills. This course includes instruction in basic baton technique and simple score study. Topics covered in the course include conducting fermatas, tempo changes, orchestral score study, conducting non-metric passages, and mixed meter. Additional emphasis is placed on developing listening skills and solving complex conducting problems.

Prerequisites & Notes

Prerequisites: MUSC 1133 , MUSC 1233 , MUSC 2133 , MUSC 322L

Co-requisite: MUSC 3502

Credits: 1

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

FALL SEMESTER - 15 Credit Hours

Natural-Scientific Inquiry - Select One (with Lab):

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

Large Ensemble

Applied Lessons (3000 Level)

Voice/Instrumental Lab

Divine Design (9 Credit Hours)

SPRING SEMESTER - 15 Credit Hours

MUSC 4101 - SENIOR RECITAL

This course requires students to demonstrate the successful completion of the senior level recital.

Prerequisites & Notes

Prerequisites: Permission of the instructor.

Corequisites: MUAI/MUAK/MUAV 3000 Level

Credits: 1

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

Large Ensemble

Applied Lessons (3000 Level)

Voice/Instrumental Lab

Divine Design (9 Credit Hours)

Bachelor of Science, Commercial Music Four Year Plan

YEAR ONE

Fall Semester - 15 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

MUSC 1002 - INTRODUCTION TO MUSIC THEORY

This course is an orientation to music designed to help students acquire foundational knowledge of the fundamentals of music.

Prerequisites & Notes

NULL

Credits: 2

MUAK 1012 - CLASS PIANO I

This course presents the skills and techniques needed for private piano study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

Prerequisites & Notes

Music majors only

Credits: 1

Creative-Aesthetic Inquiry - Select One:

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

Applied Lessons (1000 Level)

Spring Semester- 14 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

MUSC 1041 - AURAL THEORY I

Singing at sight and melodic and harmonic dictation. Basic familiarization with the keyboard.

Prerequisites & Notes

Prerequisite: MUSC 1002 or theory placement exam

Corequisite: MUSC 1133

Credits: 2

MUSC 1133 - MUSIC THEORY I

This course is a study of fundamental musical concepts with emphasis on notation, rhythm, key signatures, intervals, scales, major/minor tonality, and chord construction found in Western music.

Prerequisites & Notes

Prerequisite: MUSC 1002 or theory placement exam

Corequisite: MUSC 1042

Credits: 3

MUSC 1032 - INTRODUCTION TO MUSIC TECHNOLOGY

This course is an introduction to common technologies used throughout the various fields of music. Students in the course will explore basic web promotion, website development, multimedia licensing laws, social media business promotion, audio and video recording, post-production technology, and music notation software.

Prerequisites & Notes

NULL

Credits: 2

MUAK 1022 - CLASS PIANO II

This class provides the necessary skills and techniques needed for private study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

FALL SEMESTER - 17 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community

awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MUSC 1032 - INTRODUCTION TO MUSIC TECHNOLOGY

This course is an introduction to common technologies used throughout the various fields of music. Students in the course will explore basic web promotion, website development, multimedia licensing laws, social media business promotion, audio and video recording, post-production technology, and music notation software.

Prerequisites & Notes

NULL

Credits: 2

MUAK 1012 - CLASS PIANO I

This course presents the skills and techniques needed for private piano study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

Prerequisites & Notes

Music majors only

Credits: 1

MUSC 1041 - AURAL THEORY I

Singing at sight and melodic and harmonic dictation. Basic familiarization with the keyboard.

Prerequisites & Notes

Prerequisite: MUSC 1002 or theory placement exam

Corequisite: MUSC 1133

Credits: 2

MUSC 1133 - MUSIC THEORY I

This course is a study of fundamental musical concepts with emphasis on notation, rhythm, key signatures, intervals, scales, major/minor tonality, and chord construction found in Western music.

Prerequisites & Notes

Prerequisite: MUSC 1002 or theory placement exam

Corequisite: MUSC 1042

Credits: 3

MUSC 250L - MUSIC EDUCATION LAB

A course for all music education majors to review a variety of aspects of music education through observation, reading, and teaching experiences. This course is intended to develop a detailed understanding of music curricula, instructional practices, and administrative procedures at the elementary and secondary levels. Emphasis will be placed on personal, professional, and musical skills necessary for effective music teaching and learning.

Prerequisites & Notes

NULL

Credits: 0

Applied Lessons (1000 Level)

Choral Ensemble

SPRING SEMESTER - 17 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

MUAK 1022 - CLASS PIANO II

This class provides the necessary skills and techniques needed for private study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

Prerequisites & Notes

Prerequisite:
MUAK 1012

Credits: 1

MUSC 1051 - AURAL THEORY II

Singing at sight with melodic and harmonic dictation. Basic familiarization with the keyboard.

Prerequisites & Notes

NULL

Credits: 1

MUSC 1233 - MUSIC THEORY II

This course is a study of the fundamental principles of harmonic progression and harmonic rhythm, seventh chords, modulation, secondary dominants, leading-tone chords, and four-part composition. Included in this course is the study of small musical forms.

Prerequisites & Notes

Prerequisite: MUSC 1133; Corequisite: MUSC 1052

Credits: 3

MUSC 250L - MUSIC EDUCATION LAB

A course for all music education majors to review a variety of aspects of music education through observation, reading, and teaching experiences. This course is intended to develop a detailed understanding of music curricula, instructional practices, and administrative procedures at the elementary and secondary levels. Emphasis will be placed on personal, professional, and musical skills necessary for effective music teaching and learning.

Prerequisites & Notes

NULL

Credits: 0

Natural Science with Lab - Select One

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

Applied Lessons (1000 Level)

Choral Ensemble

Year Two

FALL SEMESTER - 16 Credit Hours

MUSC 2503 - INTRO TO MUSIC EDUCATION W/ FIELD

This is a course for music majors to participate in field experiences, lectures, readings, discussions, and writing assignments designed to provide an introduction to the profession of music education. Informed by a Christian world-view, emphasis will be placed on acquiring the personal, professional, and musical skills needed for effective music teaching and learning.

Prerequisites & Notes

None.

Credits: 3

MUSC 1912 - DICTION FOR SINGERS I

Survey course designed to instruct the voice student in the correct pronunciation of Italian and German as they relate to art music. Through the use of the International Phonetic Alphabet, the student will learn to transcribe Italian and German texts in order to pronounce them more accurately and effectively. Emphasis will be placed on studying and singing works in Italian and German.

Prerequisites & Notes

NULL

Credits: 2

EDUC 2233 - EDUCATIONAL PSYCHOLOGY

This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.

Prerequisites & Notes

None

Credits: 3

MUAK 1032 - CLASS PIANO III

This class provides the necessary skills and techniques needed for private study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

Prerequisites & Notes

Prerequisite:

MUAK 1022

Credits: 1

MUSC 2041 - AURAL THEORY III

A continuation of MUSC 1051.

Prerequisites & Notes

NULL

Credits: 1

MUSC 2133 - MUSIC THEORY III

This course is an advanced study of melodic, rhythmic, harmonic, formal elements, and compositional techniques of the Common Practice era.

Prerequisites & Notes

Prerequisite: MUSC 1233; Corequisite: MUSC 2041

Credits: 3

MUSC 250L - MUSIC EDUCATION LAB

A course for all music education majors to review a variety of aspects of music education through observation, reading, and teaching experiences. This course is intended to develop a detailed understanding of music curricula, instructional practices, and administrative procedures at the elementary and secondary levels. Emphasis will be placed on personal, professional, and musical skills necessary for effective music teaching and learning.

Pass GKT

SPRING SEMESTER - 17 Credit Hours

MUSC 3633 - MUSIC HISTORY AND LITERATURE II

This course is a study of historical events, styles, composers, performers, and trends in classical, jazz, film, and popular music from the twentieth century to present.

Prerequisites & Notes

NULL

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

EDUC 3133 - ASSESSMENT OF LEARNERS

This course focuses on the educational levels and needs of all students, including exceptional, culturally and/or linguistically diverse, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and curriculum-based assessments are included. Use of test results in program planning is emphasized.

Prerequisites & Notes

None

Credits: 3

MUSC 3502 - APPLIED MUSIC EDUCATION

This course provides music education and conducting students with consistent opportunities to conduct, perform, rehearse, lead, and reflect upon music teaching activities relevant to K-12 settings. Students will gain practical experience in facilitating music instruction under the guidance and support of the professor(s).

Credits: 1-2

MUSC 381L - CHORAL METHODS

This course provides prospective secondary music teachers and church musicians with an overview of the materials, learning outcomes, teaching strategies, and methodologies needed to teach vocal music in school and conduct church choirs.

Prerequisites & Notes

Prerequisite: MUSC 3222

Corequisite: MUSC 3502

Credits: 1

MUSC 3942 - METHODS TEACHING MUSIC ELEMENTARY

This is a course for music education majors to prepare students for specialized music teaching in primary (Pre-K-3rd)/elementary (1-6) schools. Emphasis is placed on developing and evaluating music curriculum, lesson planning, and selection and utilization of methods, instructional materials and technology. The course includes field-based experiences.

Prerequisites & Notes

Prerequisites: EDUC 2133, EDUC 2233, EDUC 3123, MUSC 2503

Corequisite: MUSC 3502

Credits: 2

MUSC 250L - MUSIC EDUCATION LAB

A course for all music education majors to review a variety of aspects of music education through observation, reading, and teaching experiences. This course is intended to develop a detailed understanding of music curricula, instructional practices, and administrative procedures at the elementary and secondary levels. Emphasis will be placed on personal, professional, and musical skills necessary for effective music teaching and learning.

FALL SEMESTER - 17 Credit Hours

ESED 3113 - SURVEY OF THE EXCEPTIONAL LEARNER

This is a required course for certification in all Education programs, including Music Education. This is an introductory course that examines the history, characteristics, and issues in exceptional education. The course covers all areas of exceptionality and their manifestations from early childhood through adulthood. It is designed to provide students with a firm grounding in the foundations of special education and expose them to the reconstruction of the field, in order that they may better deal with new and ever-changing developments. In addition to classroom meetings, a minimum of 10 hours of observation/participation in a clinical setting is required. This course is recommended to be taken prior to any other Exceptional Student Education courses.

Prerequisites & Notes

None

Credits: 3

EDUC 3523 - TEACHING LITERACY IN CONTENT AREAS

This course will provide students with strategies and tools for becoming a facilitating and reflective practitioner, teaching reading across content areas, and helping students discover that content area learning is made richer when reading, writing, speaking, and listening are taught together. Particular emphasis is placed on a balanced approach to reading, specific reading and comprehension strategies for content reading, the role of reflection in helping students to think critically, reading for diverse students, and the use of appropriate texts and media.

Prerequisites & Notes

None

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

MUSC 4101 - SENIOR RECITAL

This course requires students to demonstrate the successful completion of the senior level recital.

Prerequisites & Notes

Prerequisites: Permission of the instructor.

Corequisites: MUAI/MUAK/MUAV 3000 Level

Credits: 1

MUSC 3502 - APPLIED MUSIC EDUCATION

This course provides music education and conducting students with consistent opportunities to conduct, perform, rehearse, lead, and reflect upon music teaching activities relevant to K-12 settings. Students will gain practical experience in facilitating music instruction under the guidance and support of the professor(s).

ESED 3113 - SURVEY OF THE EXCEPTIONAL LEARNER

This is a required course for certification in all Education programs, including Music Education. This is an introductory course that examines the history, characteristics, and issues in exceptional education. The course covers all areas of exceptionality and their manifestations from early childhood through adulthood. It is designed to provide students with a firm grounding in the foundations of special education and expose them to the reconstruction of the field, in order that they may better deal with new and ever-changing developments. In addition to classroom meetings, a minimum of 10 hours of observation/participation in a clinical setting is required. This course is recommended to be taken prior to any other Exceptional Student Education courses.

Prerequisites & Notes

None

Credits: 3

EDUC 3523 - TEACHING LITERACY IN CONTENT AREAS

This course will provide students with strategies and tools for becoming a facilitating and reflective practitioner, teaching reading across content areas, and helping students discover that content area learning is made richer when reading, writing, speaking, and listening are taught together. Particular emphasis is placed on a balanced approach to reading, specific reading and comprehension strategies for content reading, the role of reflection in helping students to think critically, reading for diverse students, and the use of appropriate texts and media.

Prerequisites & Notes

None

Credits: 3

MUSC 3502 - APPLIED MUSIC EDUCATION

This course provides music education and conducting students with consistent opportunities to conduct, perform, rehearse, lead, and reflect upon music teaching activities relevant to K-12 settings. Students will gain practical experience in facilitating music instruction under the guidance and support of the professor(s).

Credits: 1-2

MUSC 4101 - SENIOR RECITAL

This course requires students to demonstrate the successful completion of the senior level recital.

Prerequisites & Notes

Prerequisites: Permission of the instructor.

Corequisites: MUAI/MUAK/MUAV 3000 Level

Credits: 1

MUSC 221L - WOODWINDS TECHNIQUES LAB

The course provides instruction in the techniques and skills used in playing and teaching woodwind instruments.

Prerequisites & Notes

Corequisite: MUSC 3502

Credits: 1

MUSC 211L - PERCUSSION TECHNIQUES LAB

The course provides instruction in the techniques and skills used in playing and teaching percussion instruments.

Credits: 2

MUAK 1022 - CLASS PIANO II

This class provides the necessary skills and techniques needed for private study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

Prerequisites & Notes

Prerequisite:

MUAK 1012

Credits: 1

Choral Ensemble

Applied Lessons (1000 Level)

2-credit suggested

Year Two

FALL SEMESTER - 16 Credit Hours

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

MUSC 3143 - AUDIO AND PRODUCTION TECHNOLOGY I

This course is a study of entry level techniques to produce music, audio, and multimedia content using computer technologies. It provides hands-on experience in entry level techniques in worship support ministries including sound reinforcement, theatrical lighting, and multimedia projection. Emphasis will be placed on the practical application of these technologies in a church setting. During the semester, students will apply learned techniques and principles during student-organized, in-class concert productions and individualized digital music projects.

Credits: 3

MUSC 1051 - AURAL THEORY II

Singing at sight with melodic and harmonic dictation. Basic familiarization with the keyboard.

Prerequisites & Notes

NULL

Credits: 1

MUSC 1233 - MUSIC THEORY II

This course is a study of the fundamental principles of harmonic progression and harmonic rhythm, seventh chords, modulation, secondary dominants, leading-tone chords, and four-part composition. Included in this course is the study of small musical forms.

Prerequisites & Notes

Prerequisite: MUSC 1133; Corequisite: MUSC 1052

Credits: 3

MUSC 3533 - MUSIC HISTORY AND LITERATURE I

This course is a survey of musical styles and practices from the Medieval era through the early Romantic period with emphasis on listening and analysis.

Prerequisites & Notes

NULL

Credits: 3

MUAK 1032 - CLASS PIANO III

This class provides the necessary skills and techniques needed for private study, as well as knowledge of appropriate repertoire. Lessons are taught in a group setting. Special emphasis is given to the piano proficiency requirements.

Prerequisites & Notes

Prerequisite:

MUAK 1022

Credits: 1

Applied Lessons (1000 Level)

2-credit suggested

Large Ensemble**SPRING SEMESTER - 15 Credit Hours****CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR**

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

MUSC 3502 - APPLIED MUSIC EDUCATION

This course provides music education and conducting students with consistent opportunities to conduct, perform, rehearse, lead, and reflect upon music teaching activities relevant to K-12 settings. Students will gain practical experience in facilitating music instruction under the guidance and support of the professor(s).

Credits: 1-2

MUSC 322L - CONDUCTING I LAB

This course is a study of conducting techniques and skills. This course includes instruction in basic baton technique and simple score study. Special emphasis is placed on conducting posture and the development of clear beat patterns. Students also learn to indicate various articulation styles, dynamics, cuing, entrances, and releases.

Prerequisites & Notes

Co-requisite: MUSC 3502

Prerequisites: MUSC 1133, MUSC 1233

Credits: 1

MUSC 3633 - MUSIC HISTORY AND LITERATURE II

This course is a study of historical events, styles, composers, performers, and trends in classical, jazz, film, and popular music from the twentieth century to present.

Prerequisites & Notes

NULL

Credits: 3

MUAI 1811 - CLASS GUITAR FOR BEGINNERS

NULL

Prerequisites & Notes

NULL

Credits: 1

MUSC 2411 - RHYTHM SECTION TECHNIQUES

This course is a workshop for the study and development of musical techniques for the rhythm section of a rock, pop, or jazz band. Rhythm section includes guitar, bass, drums, percussion, and keyboards. Emphasis will be placed on the methods of performance, communication, and organization of a rhythm section in a church context.

Prerequisites & Notes

NULL

Credits: 1

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Applied Lessons (1000 Level)

Large Ensemble

Year Three

FALL SEMESTER - 15 Credit Hours

MUSC 2503 - INTRO TO MUSIC EDUCATION W/ FIELD

This is a course for music majors to participate in field experiences, lectures, readings, discussions, and writing assignments designed to provide an introduction to the profession of music education. Informed by a Christian world-view, emphasis will be placed on acquiring the personal, professional, and musical skills needed for effective music teaching and learning.

Prerequisites & Notes

None.

Credits: 3

MUSC 3113 - WORSHIP LEADING I

This course is an introduction to the study of worship leading in a small group setting. Emphasis will be placed on the development of the spiritual life of the worship leader as well as the musical and leadership skills necessary to lead a small group during corporate worship. The lab course provides hands-on experience in worship leading. Students will apply techniques and principles learned in Worship Leading I while leading worship in a small group setting.

Prerequisites & Notes

Prerequisite: MUSC 1002

Credits: 3

Natural-Scientific Inquiry - Select One with Lab:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

Applied Lessons

Divine Design (4 Credit Hours)

SPRING SEMESTER - 15 Credit Hours**MUSC 3213 - WORSHIP LEADING II**

This course is a rigorous study of worship leading in a medium-to-large group setting. Emphasis will be placed on leadership in the church as well as the musical and ministerial skills necessary to lead corporate worship in a wide variety of settings and demographics.

Prerequisites & Notes

Pre-requisite: MUSC 3113

Credits: 3

MUSC 3732 - MUSIC HISTORY AND LITERATURE III

This course is a study of basic styles and cultures of music from around the world and how they have developed through history.

Prerequisites & Notes

NULL

Credits: 2

Quantitative Inquiry - Select One:**MATH 1213 - COLLEGE ALGEBRA**

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Applied Lessons

Divine Design (6 Credit Hours)

Year Four

FALL SEMESTER - 14 Credit Hours

MUSC 4322 - MUSIC ADMINISTRATION/ORGANIZATION

This course is a study of the administrative role of the director of music. Emphasis will be placed on planning, programming, budgeting, and evaluating various music and arts related programs.

Prerequisites & Notes

UP

Credits: 2

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (10 Credit Hours)

SPRING SEMESTER - 13 Credit Hours

MUSC 4222 - HYMNOLOGY

This course is a study of the worship music from early Christianity to modern hymnody with attention given to message, music, and effectiveness in worship and evangelism.

Prerequisites & Notes

NULL

Credits: 2

MUSC 4021 - SENIOR CAPSTONE

Available only for students in BS Music Industry or BS Worship Studies. This course requires students to demonstrate the culmination of their studies via successful completion of a senior level capstone project as outlined by their assigned instructor.

Prerequisites & Notes

Prerequisites: Permission of the instructor.

Bachelor of Arts, Humanities: Classical Studies

Bachelor of Arts, Humanities: Classical Studies (4-Year Plan)

Required Core Humanities Classes

Theology (18 Required Hours)

THEO 1003 - WESTERN THEOLOGICAL TRADITION I

This course offers an introductory intellectual consideration of theological tradition regarding the nature, significance, duties, and destiny of man in his relation to God as that tradition was taught by such great witnesses and scholars as the Apostolic Fathers, St. Justin, St. Irenaeus, St. Augustine, St. John of Damascus, St. Anselm, and St. Thomas.

Prerequisites & Notes

EDI Global only

Credits: 3

THEO 1013 - WESTERN THEOLOGICAL TRADITION II

The development of theology from Occam and the sixteenth-century division of Christendom to the twentieth century, including texts and documents from Renaissance thinkers, the Deists, Enlightenment critics, and theologians of the

Catholic Revival.

Prerequisites & Notes

EDI Global only.

Credits: 3

BIBL 1003 - SACRED SCRIPTURE (OLD TESTAMENT)

This course studies the images and themes of the Old Testament as revealed literature that has been the single most fruitful source for knowledge of things human and divine. On the basis of a careful reading and following a literary and theological methodology, the Bible is studied for its moral and theological significance.

Prerequisites & Notes

EDI Global only

Credits: 3

BIBL 1203 - SACRED SCRIPTURE: NEW TESTAMENT

This course studies the images and themes of the New Testament as revealed literature that has been the single most fruitful source for knowledge of things human and divine. On the basis of a careful reading and following a literary and theological methodology, the Bible is studied for its historical, moral, and theological significance.

Prerequisites & Notes

EDI Global only

Credits: 3

THEO 2013 - WESTERN SPIRITUAL TRADITION

Reviewing the Christian tradition of spiritual life, this course reviews core Christian literature on spirituality, with selections from Romans, I John, Acts, Galatians, and Matthew, Apostolic fathers, Early Church Fathers, and writers on spirituality such as the epistles of St. Clement of Rome and St. Ignatius of Antioch, Origen, St. Bernard of Clairvaux, Thomas à Kempis, St. Francis de Sales, John Tauler, St. Thomas More, Newman, Lewis, and others.

Prerequisites & Notes

EDI Global only.

Credits: 3

THEO 3003 - EARLY FATHERS

This course offers an opportunity to master selections from the theological literature of the early Church Fathers (especially from the Greek and Syriac East) in which important issues such as God, Christology, images, and the incorporation of philosophy in a larger Christian wisdom were treated. Readings include texts and selections taken from the theologians of the first millennium including St. Anselm, the Apostolic Fathers, St. Cyril of Alexandria, St. Irenaeus, St. Cyril of Jerusalem, Dionysius of Alexandria, St. Basil, St. Melito, St. Athanasius, St. Gregory the Great, St. Leo, and Boethius.

Prerequisites & Notes

EDI Global only.

Credits: 3

THEO 3033 - AUGUSTINE

This course presents selected texts fundamental to St. Augustine's thought and to the Augustinian tradition and investigates the importance of Augustinian themes in the intellectual history of the West.

Prerequisites & Notes

EDI Global only.

Credits: 3

THEO 3043 - THOMAS AQUINAS

Selected questions from the Summa Theologica that define themes central to the thought of St. Thomas and to the medieval debate are studied. The influence of St. Thomas's thought on the nineteenth-century revival in the interest in Scholasticism is also studied. The text for this course is St. Thomas Aquinas, Summa Theologiae.

Prerequisites & Notes

EDI Global only.

Credits: 3

Required Confessional Class - Pick One:

THEO 3053 - CONFESSIONAL ELECTIVE NEWMAN & MODERNITY

This course has as its subject John Henry Newman, his biography and intellectual biography, his contribution to the Oxford Movement and to Catholic theology, and his role as a major and prophetic expositor of the theological themes of modernity.

Prerequisites & Notes

EDI Global only.

Credits: 3

THEO 3073 - CONFESSIONAL ELECTIVE 16TH CENTURY REFORMATION THOUGHT

This course evaluates the major historical and theological contributors to the Protestant Reformation, including Continental and English thought. Readings focus on primary figures of the early Reformation, including Luther, Melancthon, Calvin, Zwingli, Bullinger, Bucer, Cranmer, Collet, Erasmus, and Knox.

Prerequisites & Notes

EDI Global only.

Credits: 3

THEO 3083 - CONFESSIONAL ELECTIVE MODERN EVANGELICAL THOUGHT

This course has as its subject modern Evangelical thought, its historic roots and diverse branches, including its manifestations in America, Europe, and the Global South.

Prerequisites & Notes

EDI Global only.

Credits: 3

Philosophy (18 Required Hours)

PHIL 1003 - INTRO TO PHILOSOPHICAL THOUGHT

This course introduces students to the foundational concepts and issues in Western philosophy. Students will explore the development of philosophical thought, learn basic logic skills, and engage with the core questions that have shaped human understanding and inquiry. The course aims to provide a comprehensive overview of the major philosophers: Socrates, Plato and Aristotle. The student will gain an understanding of the questions, and the answers offered by these philosophers throughout history.

Prerequisites & Notes

EDI Global only

Credits: 3

PHIL 1013 - PHILOSOPHY OF NATURE

Philosophy of nature seeks to identify the primary causes and principles of the natural world and thereby to explain this world. Therefore, students will be led to contemplate the natural world as a whole, so as to discover the principles that constitute natural beings and, ultimately, the Principle that moves the natural world. Focusing on change as the primary phenomenon that natural things exhibit, philosophy of nature deals with such topics as matter, motion, nature, chance, the infinite, space, and time. Philosophy of nature also addresses, in preliminary fashion, the relationship of man to nature.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 2023 - PHILOSOPHY OF MAN

A philosophic investigation of the ontology of the human being, from a historic Judeo-Christian framework.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 2033 - ETHICS

This course offers an introduction to moral philosophy through an investigation of the tradition of ethical thought that has informed Western civilization. The course examines various accounts of the human desire for what is good;

questions concerning moral choice and the nature of good and evil actions; distinctions between utility, right, and duty; and conceptions of human happiness. In so doing, this course examines the nature and role of the virtues and of the moral law.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 3003 - EPISTEMOLOGY

The philosophy of knowledge, or epistemology, investigates fundamental problems concerning how man is able to know. Of special concern are the relations among the sciences, the different types of knowledge, and different modes of knowing as studied in history, religion, first principles, poetry, and mathematics.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 3013 - METAPHYSICS

Metaphysics, the highest branch of philosophy, is the systematic study of being qua being. Beginning with the study of finite being and concluding with natural theology, metaphysics seeks to identify the principles, structures, and properties pertaining to existents as existing. This course offers an introduction to this most fundamental of all philosophical investigations. Students will contemplate such basic metaphysical topics as finite and infinite being, substance and accident, essence and existence, the transcendentals of being, analogical predication of being, participation, first principles, and the existence and attributes of God.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 3023 - POLITICS AND PHILOSOPHY

This course offers an introduction to the philosophical study of political activity. Students become acquainted with various manifestations of the political community in the West since the time of the ancient Greeks. Students examine the distinctive characters of the Greek polis, the Roman res publica, the Medieval realm, and the modern state, while investigating the assigned authors' attempts to answer questions concerning the limits of political activity, the nature of law, and the character of the political community.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 3033 - AESTHETICS

The main goals of the course are to introduce the student to the history and logic of Western philosophy's ways of thinking about questions of beauty and aesthetics from classical Greece down to the present.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 1023 - APOLOGETICS I

This course will introduce the discipline of Christian apologetics—its history, biblical grounding, methods, and application. Prominent theistic arguments, including cosmological, design, and moral arguments, will be explored. Students will be mentored in effective application in rhetorical writing as well as real world evangelistic situations.

Credits: 3

PHIL 1123 - APOLOGETICS II

This course will build upon the foundation developed in Christian Apologetics I. Arguments supporting the existence and divine identity of Jesus of Nazareth, the Resurrection, and miracles will be explored. In addition, the problem of evil and the problem of religious pluralism will be analyzed. Students will be mentored in effective application in rhetorical writing as well as real world evangelistic situations.

Prerequisites & Notes

EDI Global only.

Credits: 3

Trivium and Quadrivium (15 Required Hours)**PHIL 1223 - GRAMMAR LOGIC RHETORIC I**

This course intends to provide students with the tools of learning. The term trivium denotes the three liberal arts of grammar, logic, and rhetoric concerned with methods of discourse, or linguistic operations. These arts are meant to prepare a student for the study of the higher disciplines of philosophy and theology by means of the study of language. The method of the course is an intensive study of grammar, logic, and rhetoric, and the student will acquire both theoretical and practical knowledge of these arts in this class.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 1233 - GRAMMAR LOGIC RHETORIC II

Second semester of TRIV 1371, focusing on Rhetoric. The method of the course is an intensive study of grammar, logic, and rhetoric, and the student will acquire both theoretical and practical knowledge of these arts in this class.

Prerequisites & Notes

EDI Global only.

Credits: 3

MATH 1003 - MATHEMATICS I

Mathematics studied as a liberal art through close reading and discussion of Euclid's Elements, books I-V. Directed not only toward developing the student's mathematical competence through demonstration of propositions, this course emphasizes reflection upon the meaning and nature of mathematics. Topics investigated include:

Book I: The geometry of triangles and parallelograms, through the Pythagorean Theorem.

Book II: Geometrical algebra

Book III: The geometry of circles.

Book IV: The geometry of circles, continued.

Book V: The general theory of ratio and proportion.

Book VI: Application of the theory of ratio, and proportion to plane figures.

Prerequisites & Notes

EDI Global only

Credits: 3

MATH 1203 - MATHEMATICS II

Euclid II will complete the introduction of students to the concepts and methods of Greek geometry through intensive study of the latter books of the Elements. Emphasis will be placed on understanding and achieving rigor in mathematical proofs. Classes will be conducted in a participatory manner, with students demonstrating propositions.

Prerequisites & Notes

Prerequisite: MATH 1003

EDI Global only.

Credits: 3

MUSC 2003 - MUSIC

Music will be structured as a series of topics, each illustrating a historical philosophic and aesthetic writings about music and recordings of music literature, building on philosophers and composers such as: Plato, Aristotle, Aristoxenus, St. Augustine, Vitry, St. Thomas Aquinas, Rousseau, Palestrina, Descartes, Vincenzo Galilei, Beethoven, Wagner, Feuerbach, Schopenhauer, Hegel, Stravinsky, and Adorno and others.

Prerequisites & Notes

EDI Global only.

Credits: 3

NSCI 2013 - BASIC ASTRONOMY

The history of the heavens and man's study of their motion. Selections from Ptolemy, Copernicus, Galileo, and Kepler are read.

Prerequisites & Notes

EDI Global only.

Credits: 3

Interdisciplinary Electives - 6 Hours

HIST 3673 - AMERICAN POLITICAL TRADITION

This course introduces students to the basic concepts, beliefs, and principles of the American political tradition – the special and valuable inheritance of all Americans – through a consideration of some of its key documents from the founding era. As a course in the indigenous American tradition, it is meant to complement and particularize the course in Political Philosophy, the scope of which is broader and more general, encompassing in its investigation most of the major thinkers in the Western political tradition that stretches back to Plato.

Prerequisites & Notes

EDI Global only.

Credits: 3

SSCI 2113 - SOCIOLOGY

A critical examination of modern social and behavioral theorists, with particular emphasis on their methodological approaches. This course focuses on the founders of modern sociological and psychological theory but also includes contemporary thinkers. Texts for this course address both intrapersonal and interpersonal dynamics, exploring the nature of the person in himself and in his relation to others.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 2113 - IMAGINATIVE APOLOGETICS I

This course will introduce the discipline of imaginative apologetics: the practice of using literature and cinema to effectively convey deep truths about God and humankind. Using essays along with the imaginative works (books, films, etc.) as the case study, students will learn how imaginative works are used in the practice of apologetics. In addition, they will develop foundational skills in the philosophical and theological analysis of literature and cinema.

Prerequisites & Notes

EDI Global only

Credits: 3

PHIL 2123 - IMAGINATIVE APOLOGETICS II

This course will build upon the foundation developed in Imaginative Apologetics I. Using essays along with imaginative works from prominent authors and related film adaptations as a case study, students will hone their analytical skills and learn to put imaginative apologetics into practice through a mentored imaginative project.

Prerequisites & Notes

EDI Global only.

Credits: 3

Classical Studies (Major) 42 Required Hours

Latin Track - 24 Hours

LANG 1003 - LATIN I: GRAMMAR & TEXTS

This is the first course in the initial three-semester sequence in which the student undertakes the mastery of basic Latin forms, syntax, and vocabulary. The analytic approach of forms and syntax is retained, with attendant English-to-Latin composition, while attention to the comprehension of Latin sentences and connected prose is not neglected.

Prerequisites & Notes

EDI Global only.

Credits: 3

LANG 1013 - LATIN II: SYNTAX & TEXTS

This is the second course in the initial three-semester sequence in the study of basic Latin forms, syntax, and vocabulary. The method of study pursued in Latin I is continued in this course. The semester concludes with the formation and basic usage of the subjunctive.

Prerequisites & Notes

EDI Global only.

Credits: 3

LANG 2043 - LATIN III: ADVANCED TEXTS A

This is the final course in the initial three-semester sequence in the study of basic Latin forms, syntax, and vocabulary. The first half of the course comprises a study of remaining Latin forms. The second half of the semester is devoted entirely to the reading of selections of unaltered Latin in order that the student may begin to attain accuracy and felicity in translation.

Prerequisites & Notes

EDI Global only.

Credits: 3

LANG 2053 - LATIN IV: ADVANCED TEXTS B

The entire semester is employed in the reading of selections from Augustine's Confessions to enable the student to acquire the faculty to translate and comprehend Latin prose. The Latin forms and syntax in the text continue to be scrutinized so that the basic understanding of the language is habitually reinforced. Augustine's abundant use of standard classical rhetorical devices provides the opportunity for concentrated attention to the formal aspects of Latin style.

Prerequisites & Notes

EDI Global only.

Credits: 3

LANG 3013 - LATIN TEXT

A text in Latin is chosen for each seminar with a view to its relevance to the disciplines of theology, philosophy, and literature rather than for its philological interest. In addition to reading the text each student will deliver a seminar presentation on pertinent secondary scholarship or other classical works in translation. The primary aim of the course is for the student to begin to appreciate the sensibility of the text in the original language and to begin to heed the import of that exact meaning for its significance in its own particular discipline. The student may repeat the text seminar any number of times as the texts change.

Prerequisites & Notes

EDI Global only.

Credits: 3

Greek Track - 24 Hours

LANG 1023 - GREEK I: GRAMMAR & TEXTS

The Greek alphabet and the pronunciation of classical and Hellenistic Greek are introduced straightaway. The declension of nouns and adjectives and the conjugation of regular verbs are studied systematically. Vocabulary lists are introduced in each lesson and are reinforced by the translation of both Greek-to-English and English-to-Greek sentences. By the end of the semester, the readings in the lesson are centered on unaltered passages of Greek set texts; thus, a serious literary text is the basis of study from the very first course.

Prerequisites & Notes

EDI Global only.

Credits: 3

LANG 1033 - GREEK II: SYNTAX & TEXTS

Unaltered passages from Greek set texts are the center of each lesson. Additional forms and syntactic principles are introduced to complete the basic examination of the Greek language (pronouns, verbs, third- declension adjectives, and irregular verbs). Thus by the end of the semester the essential properties of the language have been covered.

Prerequisites & Notes

EDI Global only.

Credits: 3

LANG 2943 - GREEK III: ADVANCED TEXTS A

An additional set text provides the text for this course. Grammar and forms are systematically reviewed throughout the course, and time is usually available for the reading of some noteworthy selections from classical Greek texts.

Prerequisites & Notes

EDI Global only.

Credits: 3

LANG 2063 - GREEK IV: ADVANCED TEXTS B

A classic Greek text provides the reading material for this course. The major aim of the course is for the student to build confidence in understanding an ancient text. Attention continues to be directed to the basic features of the language in order to build a solid foundation for future work.

Prerequisites & Notes

EDI Global only.

Credits: 3

LANG 3143 - GREEK TEXT

A text in Greek is chosen for each seminar with a view to its relevance to the disciplines of theology, philosophy, and literature rather than for its philological interest. In addition to reading the text each student will deliver a seminar presentation on pertinent secondary scholarship or other classical works in translation. The primary aim of the course is for the student to begin to appreciate the sensibility of the text in the original language and to begin to heed the import of that exact meaning for its significance in its own particular discipline. The student may repeat the text seminar any number of times as the texts change.

Prerequisites & Notes

EDI Global only.

Credits: 3

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

AND

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

OR

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

Area III, Natural Science and Mathematics - 11 Credit Hours

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Area IV, History, Social and Behavioral Sciences - 12 Credit Hours

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

Year One

Fall Semester

THEO 1003 - WESTERN THEOLOGICAL TRADITION I

This course offers an introductory intellectual consideration of theological tradition regarding the nature, significance, duties, and destiny of man in his relation to God as that tradition was taught by such great witnesses and scholars as the Apostolic Fathers, St. Justin, St. Irenaeus, St. Augustine, St. John of Damascus, St. Anselm, and St. Thomas.

Prerequisites & Notes

EDI Global only

Credits: 3

PHIL 1003 - INTRO TO PHILOSOPHICAL THOUGHT

This course introduces students to the foundational concepts and issues in Western philosophy. Students will explore the development of philosophical thought, learn basic logic skills, and engage with the core questions that have shaped human understanding and inquiry. The course aims to provide a comprehensive overview of the major philosophers: Socrates, Plato and Aristotle. The student will gain an understanding of the questions, and the answers offered by these philosophers throughout history.

Prerequisites & Notes

EDI Global only

Credits: 3

LANG 1023 - GREEK I: GRAMMAR & TEXTS

The Greek alphabet and the pronunciation of classical and Hellenistic Greek are introduced straightaway. The declension of nouns and adjectives and the conjugation of regular verbs are studied systematically. Vocabulary lists are introduced in each lesson and are reinforced by the translation of both Greek-to-English and English-to-Greek sentences. By the end of the semester, the readings in the lesson are centered on unaltered passages of Greek set texts; thus, a serious literary text is the basis of study from the very first course.

Prerequisites & Notes

EDI Global only.

Credits: 3

LANG 1003 - LATIN I: GRAMMAR & TEXTS

This is the first course in the initial three-semester sequence in which the student undertakes the mastery of basic Latin forms, syntax, and vocabulary. The analytic approach of forms and syntax is retained, with attendant English-to-Latin composition, while attention to the comprehension of Latin sentences and connected prose is not neglected.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 1223 - GRAMMAR LOGIC RHETORIC I

This course intends to provide students with the tools of learning. The term trivium denotes the three liberal arts of grammar, logic, and rhetoric concerned with methods of discourse, or linguistic operations. These arts are meant to prepare a student for the study of the higher disciplines of philosophy and theology by means of the study of language. The method of the course is an intensive study of grammar, logic, and rhetoric, and the student will acquire both theoretical and practical knowledge of these arts in this class.

Prerequisites & Notes

EDI Global only.

Credits: 3

Spring Semester

BIBL 1003 - SACRED SCRIPTURE (OLD TESTAMENT)

This course studies the images and themes of the Old Testament as revealed literature that has been the single most fruitful source for knowledge of things human and divine. On the basis of a careful reading and following a literary and theological methodology, the Bible is studied for its moral and theological significance.

Prerequisites & Notes

EDI Global only

Credits: 3

PHIL 2023 - PHILOSOPHY OF MAN

A philosophic investigation of the ontology of the human being, from a historic Judeo-Christian framework.

Prerequisites & Notes

EDI Global only.

Credits: 3

LANG 1013 - LATIN II: SYNTAX & TEXTS

This is the second course in the initial three-semester sequence in the study of basic Latin forms, syntax, and vocabulary. The method of study pursued in Latin I is continued in this course. The semester concludes with the formation and basic usage of the subjunctive.

Prerequisites & Notes

EDI Global only.

Credits: 3

LANG 1033 - GREEK II: SYNTAX & TEXTS

Unaltered passages from Greek set texts are the center of each lesson. Additional forms and syntactic principles are introduced to complete the basic examination of the Greek language (pronouns, verbs, third- declension adjectives, and irregular verbs). Thus by the end of the semester the essential properties of the language have been covered.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 1233 - GRAMMAR LOGIC RHETORIC II

Second semester of TRIV 1371, focusing on Rhetoric. The method of the course is an intensive study of grammar, logic, and rhetoric, and the student will acquire both theoretical and practical knowledge of these arts in this class.

Prerequisites & Notes

EDI Global only.

Credits: 3

Year Two

Fall Semester

THEO 1013 - WESTERN THEOLOGICAL TRADITION II

The development of theology from Occam and the sixteenth- century division of Christendom to the twentieth century, including texts and documents from Renaissance thinkers, the Deists, Enlightenment critics, and theologians of the Catholic Revival.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 1013 - PHILOSOPHY OF NATURE

Philosophy of nature seeks to identify the primary causes and principles of the natural world and thereby to explain this world. Therefore, students will be led to contemplate the natural world as a whole, so as to discover the principles that constitute natural beings and, ultimately, the Principle that moves the natural world. Focusing on change as the primary phenomenon that natural things exhibit, philosophy of nature deals with such topics as matter, motion, nature, chance, the infinite, space, and time. Philosophy of nature also addresses, in preliminary fashion, the relationship of man to nature.

Prerequisites & Notes

EDI Global only.

Credits: 3

LANG 2043 - LATIN III: ADVANCED TEXTS A

This is the final course in the initial three-semester sequence in the study of basic Latin forms, syntax, and vocabulary. The first half of the course comprises a study of remaining Latin forms. The second half of the semester is devoted entirely to the reading of selections of unaltered Latin in order that the student may begin to attain accuracy and felicity in translation.

Prerequisites & Notes

EDI Global only.

Credits: 3

LANG 2943 - GREEK III: ADVANCED TEXTS A

An additional set text provides the text for this course. Grammar and forms are systematically reviewed throughout the course, and time is usually available for the reading of some noteworthy selections from classical Greek texts.

Prerequisites & Notes

EDI Global only.

Credits: 3

MATH 1003 - MATHEMATICS I

Mathematics studied as a liberal art through close reading and discussion of Euclid's Elements, books I-V. Directed not only toward developing the student's mathematical competence through demonstration of propositions, this course emphasizes reflection upon the meaning and nature of mathematics. Topics investigated include:

Book I: The geometry of triangles and parallelograms, through the Pythagorean Theorem.

Book II: Geometrical algebra

Book III: The geometry of circles.

Book IV: The geometry of circles, continued.

Book V: The general theory of ratio and proportion.

Book VI: Application of the theory of ratio, and proportion to plane figures.

Prerequisites & Notes

EDI Global only

Credits: 3

Spring Semester

THEO 2013 - WESTERN SPIRITUAL TRADITION

Reviewing the Christian tradition of spiritual life, this course reviews core Christian literature on spirituality, with selections from Romans, I John, Acts, Galatians, and Matthew, Apostolic fathers, Early Church Fathers, and writers on spirituality such as the epistles of St. Clement of Rome and St. Ignatius of Antioch, Origen, St. Bernard of Clairvaux, Thomas à Kempis, St. Francis de Sales, John Tauler, St. Thomas More, Newman, Lewis, and others.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 2033 - ETHICS

This course offers an introduction to moral philosophy through an investigation of the tradition of ethical thought that has informed Western civilization. The course examines various accounts of the human desire for what is good; questions concerning moral choice and the nature of good and evil actions; distinctions between utility, right, and duty; and conceptions of human happiness. In so doing, this course examines the nature and role of the virtues and of the moral law.

Prerequisites & Notes

EDI Global only.

Credits: 3

LANG 2053 - LATIN IV: ADVANCED TEXTS B

The entire semester is employed in the reading of selections from Augustine's Confessions to enable the student to acquire the faculty to translate and comprehend Latin prose. The Latin forms and syntax in the text continue to be scrutinized so that the basic understanding of the language is habitually reinforced. Augustine's abundant use of standard classical rhetorical devices provides the opportunity for concentrated attention to the formal aspects of Latin style.

Prerequisites & Notes

EDI Global only.

Credits: 3

LANG 2063 - GREEK IV: ADVANCED TEXTS B

A classic Greek text provides the reading material for this course. The major aim of the course is for the student to build confidence in understanding an ancient text. Attention continues to be directed to the basic features of the language in order to build a solid foundation for future work.

Prerequisites & Notes

EDI Global only.

Credits: 3

MATH 1203 - MATHEMATICS II

Euclid II will complete the introduction of students to the concepts and methods of Greek geometry through intensive study of the latter books of the Elements. Emphasis will be placed on understanding and achieving rigor in mathematical proofs. Classes will be conducted in a participatory manner, with students demonstrating propositions.

Prerequisites & Notes

Prerequisite: MATH 1003

EDI Global only.

Credits: 3

Year Three

Fall Semester

THEO 3003 - EARLY FATHERS

This course offers an opportunity to master selections from the theological literature of the early Church Fathers (especially from the Greek and Syriac East) in which important issues such as God, Christology, images, and the incorporation of philosophy in a larger Christian wisdom were treated. Readings include texts and selections taken from the theologians of the first millennium including St. Anselm, the Apostolic Fathers, St. Cyril of Alexandria, St. Irenaeus, St. Cyril of Jerusalem, Dionysius of Alexandria, St. Basil, St. Melito, St. Athanasius, St. Gregory the Great, St. Leo, and Boethius.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 3003 - EPISTEMOLOGY

The philosophy of knowledge, or epistemology, investigates fundamental problems concerning how man is able to know. Of special concern are the relations among the sciences, the different types of knowledge, and different modes of knowing as studied in history, religion, first principles, poetry, and mathematics.

Prerequisites & Notes

EDI Global only.

Credits: 3

LANG 3013 - LATIN TEXT

A text in Latin is chosen for each seminar with a view to its relevance to the disciplines of theology, philosophy, and literature rather than for its philological interest. In addition to reading the text each student will deliver a seminar presentation on pertinent secondary scholarship or other classical works in translation. The primary aim of the course is for the student to begin to appreciate the sensibility of the text in the original language and to begin to heed the import of that exact meaning for its significance in its own particular discipline. The student may repeat the text seminar any number of times as the texts change.

Prerequisites & Notes

EDI Global only.

Credits: 3

LANG 3143 - GREEK TEXT

A text in Greek is chosen for each seminar with a view to its relevance to the disciplines of theology, philosophy, and literature rather than for its philological interest. In addition to reading the text each student will deliver a seminar presentation on pertinent secondary scholarship or other classical works in translation. The primary aim of the course is for the student to begin to appreciate the sensibility of the text in the original language and to begin to heed the import of that exact meaning for its significance in its own particular discipline. The student may repeat the text seminar any number of times as the texts change.

Prerequisites & Notes

EDI Global only.

Credits: 3

MUSC 2003 - MUSIC

Music will be structured as a series of topics, each illustrating a historical philosophic and aesthetic writings about music and recordings of music literature, building on philosophers and composers such as: Plato, Aristotle, Aristoxenus, St. Augustine, Vitry, St. Thomas Aquinas, Rousseau, Palestrina, Descartes, Vincenzo Galilei, Beethoven, Wagner, Feuerbach, Schopenhauer, Hegel, Stravinsky, and Adorno and others.

Prerequisites & Notes

EDI Global only.

Credits: 3

Spring Semester**THEO 3033 - AUGUSTINE**

This course presents selected texts fundamental to St. Augustine's thought and to the Augustinian tradition and investigates the importance of Augustinian themes in the intellectual history of the West.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 3013 - METAPHYSICS

Metaphysics, the highest branch of philosophy, is the systematic study of being qua being. Beginning with the study of finite being and concluding with natural theology, metaphysics seeks to identify the principles, structures, and properties pertaining to existents as existing. This course offers an introduction to this most fundamental of all philosophical investigations. Students will contemplate such basic metaphysical topics as finite and infinite being, substance and accident, essence and existence, the transcendentals of being, analogical predication of being, participation, first principles, and the existence and attributes of God.

Prerequisites & Notes

EDI Global only.

Credits: 3

LANG 3013 - LATIN TEXT

A text in Latin is chosen for each seminar with a view to its relevance to the disciplines of theology, philosophy, and literature rather than for its philological interest. In addition to reading the text each student will deliver a seminar presentation on pertinent secondary scholarship or other classical works in translation. The primary aim of the course is for the student to begin to appreciate the sensibility of the text in the original language and to begin to heed the import of that exact meaning for its significance in its own particular discipline. The student may repeat the text seminar any

number of times as the texts change.

Prerequisites & Notes

Credits: 3

NSCI 2013 - BASIC ASTRONOMY

The history of the heavens and man's study of their motion. Selections from Ptolemy, Copernicus, Galileo, and Kepler are read.

Prerequisites & Notes

EDI Global only.

Credits: 3

Year Four

Fall Semester

THEO 3043 - THOMAS AQUINAS

Selected questions from the Summa Theologica that define themes central to the thought of St. Thomas and to the medieval debate are studied. The influence of St. Thomas's thought on the nineteenth-century revival in the interest in Scholasticism is also studied. The text for this course is St. Thomas Aquinas, Summa Theologiae.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 3023 - POLITICS AND PHILOSOPHY

This course offers an introduction to the philosophical study of political activity. Students become acquainted with various manifestations of the political community in the West since the time of the ancient Greeks. Students examine

the distinctive characters of the Greek polis, the Roman res publica, the Medieval realm, and the modern state, while investigating the assigned authors' attempts to answer questions concerning the limits of political activity, the nature of law, and the character of the political community.

Prerequisites & Notes

EDI Global only.

Credits: 3

LANG 3013 - LATIN TEXT

A text in Latin is chosen for each seminar with a view to its relevance to the disciplines of theology, philosophy, and literature rather than for its philological interest. In addition to reading the text each student will deliver a seminar presentation on pertinent secondary scholarship or other classical works in translation. The primary aim of the course is for the student to begin to appreciate the sensibility of the text in the original language and to begin to heed the import of that exact meaning for its significance in its own particular discipline. The student may repeat the text seminar any number of times as the texts change.

Select One of the Following:

HIST 3673 - AMERICAN POLITICAL TRADITION

This course introduces students to the basic concepts, beliefs, and principles of the American political tradition – the special and valuable inheritance of all Americans – through a consideration of some of its key documents from the founding era. As a course in the indigenous American tradition, it is meant to complement and particularize the course in Political Philosophy, the scope of which is broader and more general, encompassing in its investigation most of the major thinkers in the Western political tradition that stretches back to Plato.

Prerequisites & Notes

EDI Global only.

Credits: 3

HIST 2103 - AMERICAN HISTORY I

A survey of American history from discovery to 1877. Topics include the colonial period, the revolutionary era, the Constitution, Jeffersonianism, economic and territorial expansion, sectional tensions, the Civil War, and Reconstruction.

Prerequisites & Notes

EDI Global only

Credits: 3

PHIL 2113 - IMAGINATIVE APOLOGETICS I

This course will introduce the discipline of imaginative apologetics: the practice of using literature and cinema to effectively convey deep truths about God and humankind. Using essays along with the imaginative works (books, films, etc.) as the case study, students will learn how imaginative works are used in the practice of apologetics. In addition, they will develop foundational skills in the philosophical and theological analysis of literature and cinema.

Prerequisites & Notes

EDI Global only

Credits: 3

Spring Semester

PHIL 3033 - AESTHETICS

The main goals of the course are to introduce the student to the history and logic of Western philosophy's ways of thinking about questions of beauty and aesthetics from classical Greece down to the present.

Prerequisites & Notes

EDI Global only.

Credits: 3

LANG 3143 - GREEK TEXT

Social Science Elective - Select One:

SSCI 2113 - SOCIOLOGY

A critical examination of modern social and behavioral theorists, with particular emphasis on their methodological approaches. This course focuses on the founders of modern sociological and psychological theory but also includes contemporary thinkers. Texts for this course address both intrapersonal and interpersonal dynamics, exploring the nature of the person in himself and in his relation to others.

Prerequisites & Notes

EDI Global only.

Credits: 3

HIST 2113 - AMERICAN HISTORY II

This course is a study of American history from 1877 to the present. Topics include the New South, the New West, foreign affairs, industrialization, the Progressive Era, the World War I, the Great Depression, World War II, the Cold War, and present issues.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 2123 - IMAGINATIVE APOLOGETICS II

This course will build upon the foundation developed in Imaginative Apologetics I. Using essays along with imaginative works from prominent authors and related film adaptations as a case study, students will hone their analytical skills and learn to put imaginative apologetics into practice through a mentored imaginative project.

Prerequisites & Notes

EDI Global only.

Credits: 3

Bachelor of Arts, Humanities: Great Books English

Bachelor of Arts, Humanities: Great Books English (4-Year Plan)

Required Core Humanities Classes

Theology (18 Required Hours)

THEO 1003 - WESTERN THEOLOGICAL TRADITION I

This course offers an introductory intellectual consideration of theological tradition regarding the nature, significance, duties, and destiny of man in his relation to God as that tradition was taught by such great witnesses and scholars as the Apostolic Fathers, St. Justin, St. Irenaeus, St. Augustine, St. John of Damascus, St. Anselm, and St. Thomas.

Prerequisites & Notes

EDI Global only

Credits: 3

THEO 1013 - WESTERN THEOLOGICAL TRADITION II

The development of theology from Occam and the sixteenth-century division of Christendom to the twentieth century, including texts and documents from Renaissance thinkers, the Deists, Enlightenment critics, and theologians of the Catholic Revival.

Prerequisites & Notes

EDI Global only.

Credits: 3

BIBL 1003 - SACRED SCRIPTURE (OLD TESTAMENT)

This course studies the images and themes of the Old Testament as revealed literature that has been the single most fruitful source for knowledge of things human and divine. On the basis of a careful reading and following a literary and theological methodology, the Bible is studied for its moral and theological significance.

Prerequisites & Notes

EDI Global only

Credits: 3

BIBL 1203 - SACRED SCRIPTURE: NEW TESTAMENT

This course studies the images and themes of the New Testament as revealed literature that has been the single most fruitful source for knowledge of things human and divine. On the basis of a careful reading and following a literary and theological methodology, the Bible is studied for its historical, moral, and theological significance.

Prerequisites & Notes

EDI Global only

Credits: 3

THEO 2013 - WESTERN SPIRITUAL TRADITION

Reviewing the Christian tradition of spiritual life, this course reviews core Christian literature on spirituality, with selections from Romans, I John, Acts, Galatians, and Matthew, Apostolic fathers, Early Church Fathers, and writers on spirituality such as the epistles of St. Clement of Rome and St. Ignatius of Antioch, Origen, St. Bernard of Clairvaux, Thomas à Kempis, St. Francis de Sales, John Tauler, St. Thomas More, Newman, Lewis, and others.

Prerequisites & Notes

EDI Global only.

Credits: 3

THEO 3003 - EARLY FATHERS

This course offers an opportunity to master selections from the theological literature of the early Church Fathers (especially from the Greek and Syriac East) in which important issues such as God, Christology, images, and the incorporation of philosophy in a larger Christian wisdom were treated. Readings include texts and selections taken from the theologians of the first millennium including St. Anselm, the Apostolic Fathers, St. Cyril of Alexandria, St.

Irenaeus, St. Cyril of Jerusalem, Dionysius of Alexandria, St. Basil, St. Melito, St. Athanasius, St. Gregory the Great, St. Leo, and Boethius.

Prerequisites & Notes

EDI Global only.

Credits: 3

THEO 3033 - AUGUSTINE

This course presents selected texts fundamental to St. Augustine's thought and to the Augustinian tradition and investigates the importance of Augustinian themes in the intellectual history of the West.

Prerequisites & Notes

EDI Global only.

Credits: 3

THEO 3043 - THOMAS AQUINAS

Selected questions from the Summa Theologica that define themes central to the thought of St. Thomas and to the medieval debate are studied. The influence of St. Thomas's thought on the nineteenth-century revival in the interest in Scholasticism is also studied. The text for this course is St. Thomas Aquinas, Summa Theologiae.

Prerequisites & Notes

EDI Global only.

Credits: 3

Required Confessional Class - Pick One:

THEO 3053 - CONFESSIONAL ELECTIVE NEWMAN & MODERNITY

This course has as its subject John Henry Newman, his biography and intellectual biography, his contribution to the Oxford Movement and to Catholic theology, and his role as a major and prophetic expositor of the theological themes of modernity.

Prerequisites & Notes

EDI Global only.

Credits: 3

THEO 3073 - CONFESSIONAL ELECTIVE 16TH CENTURY REFORMATION THOUGHT

This course evaluates the major historical and theological contributors to the Protestant Reformation, including Continental and English thought. Readings focus on primary figures of the early Reformation, including Luther, Melancthon, Calvin, Zwingli, Bullinger, Bucer, Cranmer, Collet, Erasmus, and Knox.

Prerequisites & Notes

EDI Global only.

Credits: 3

THEO 3083 - CONFESSIONAL ELECTIVE MODERN EVANGELICAL THOUGHT

This course has as its subject modern Evangelical thought, its historic roots and diverse branches, including its manifestations in America, Europe, and the Global South.

Prerequisites & Notes

EDI Global only.

Credits: 3

Philosophy (18 Required Hours)

PHIL 1003 - INTRO TO PHILOSOPHICAL THOUGHT

This course introduces students to the foundational concepts and issues in Western philosophy. Students will explore the development of philosophical thought, learn basic logic skills, and engage with the core questions that have shaped human understanding and inquiry. The course aims to provide a comprehensive overview of the major philosophers: Socrates, Plato and Aristotle. The student will gain an understanding of the questions, and the answers offered by these philosophers throughout history.

Prerequisites & Notes

EDI Global only

Credits: 3

PHIL 1013 - PHILOSOPHY OF NATURE

Philosophy of nature seeks to identify the primary causes and principles of the natural world and thereby to explain this world. Therefore, students will be led to contemplate the natural world as a whole, so as to discover the principles that constitute natural beings and, ultimately, the Principle that moves the natural world. Focusing on change as the primary phenomenon that natural things exhibit, philosophy of nature deals with such topics as matter, motion, nature, chance, the infinite, space, and time. Philosophy of nature also addresses, in preliminary fashion, the relationship of man to nature.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 2023 - PHILOSOPHY OF MAN

A philosophic investigation of the ontology of the human being, from a historic Judeo-Christian framework.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 2033 - ETHICS

This course offers an introduction to moral philosophy through an investigation of the tradition of ethical thought that has informed Western civilization. The course examines various accounts of the human desire for what is good; questions concerning moral choice and the nature of good and evil actions; distinctions between utility, right, and duty; and conceptions of human happiness. In so doing, this course examines the nature and role of the virtues and of the moral law.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 3003 - EPISTEMOLOGY

The philosophy of knowledge, or epistemology, investigates fundamental problems concerning how man is able to know. Of special concern are the relations among the sciences, the different types of knowledge, and different modes of knowing as studied in history, religion, first principles, poetry, and mathematics.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 3013 - METAPHYSICS

Metaphysics, the highest branch of philosophy, is the systematic study of being qua being. Beginning with the study of finite being and concluding with natural theology, metaphysics seeks to identify the principles, structures, and properties pertaining to existents as existing. This course offers an introduction to this most fundamental of all philosophical investigations. Students will contemplate such basic metaphysical topics as finite and infinite being, substance and accident, essence and existence, the transcendentals of being, analogical predication of being, participation, first principles, and the existence and attributes of God.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 3023 - POLITICS AND PHILOSOPHY

This course offers an introduction to the philosophical study of political activity. Students become acquainted with various manifestations of the political community in the West since the time of the ancient Greeks. Students examine the distinctive characters of the Greek polis, the Roman res publica, the Medieval realm, and the modern state, while investigating the assigned authors' attempts to answer questions concerning the limits of political activity, the nature of law, and the character of the political community.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 3033 - AESTHETICS

The main goals of the course are to introduce the student to the history and logic of Western philosophy's ways of thinking about questions of beauty and aesthetics from classical Greece down to the present.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 1023 - APOLOGETICS I

This course will introduce the discipline of Christian apologetics—its history, biblical grounding, methods, and application. Prominent theistic arguments, including cosmological, design, and moral arguments, will be explored. Students will be mentored in effective application in rhetorical writing as well as real world evangelistic situations.

Credits: 3

PHIL 1123 - APOLOGETICS II

This course will build upon the foundation developed in Christian Apologetics I. Arguments supporting the existence and divine identity of Jesus of Nazareth, the Resurrection, and miracles will be explored. In addition, the problem of evil and the problem of religious pluralism will be analyzed. Students will be mentored in effective application in rhetorical writing as well as real world evangelistic situations.

Prerequisites & Notes

EDI Global only.

Credits: 3

Trivium and Quadrivium (15 Required Hours)

PHIL 1223 - GRAMMAR LOGIC RHETORIC I

This course intends to provide students with the tools of learning. The term trivium denotes the three liberal arts of grammar, logic, and rhetoric concerned with methods of discourse, or linguistic operations. These arts are meant to prepare a student for the study of the higher disciplines of philosophy and theology by means of the study of language. The method of the course is an intensive study of grammar, logic, and rhetoric, and the student will acquire both theoretical and practical knowledge of these arts in this class.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 1233 - GRAMMAR LOGIC RHETORIC II

Second semester of TRIV 1371, focusing on Rhetoric. The method of the course is an intensive study of grammar, logic, and rhetoric, and the student will acquire both theoretical and practical knowledge of these arts in this class.

Prerequisites & Notes

EDI Global only.

Credits: 3

MATH 1003 - MATHEMATICS I

Mathematics studied as a liberal art through close reading and discussion of Euclid's Elements, books I-V. Directed not only toward developing the student's mathematical competence through demonstration of propositions, this course emphasizes reflection upon the meaning and nature of mathematics. Topics investigated include:

Book I: The geometry of triangles and parallelograms, through the Pythagorean Theorem.

Book II: Geometrical algebra

Book III: The geometry of circles.

Book IV: The geometry of circles, continued.

Book V: The general theory of ratio and proportion.

Book VI: Application of the theory of ratio, and proportion to plane figures.

Prerequisites & Notes

EDI Global only

Credits: 3

MATH 1203 - MATHEMATICS II

Euclid II will complete the introduction of students to the concepts and methods of Greek geometry through intensive study of the latter books of the Elements. Emphasis will be placed on understanding and achieving rigor in mathematical proofs. Classes will be conducted in a participatory manner, with students demonstrating propositions.

Prerequisites & Notes

Prerequisite: MATH 1003

EDI Global only.

Credits: 3

MUSC 2003 - MUSIC

Music will be structured as a series of topics, each illustrating a historical philosophic and aesthetic writings about music and recordings of music literature, building on philosophers and composers such as: Plato, Aristotle, Aristoxenus, St. Augustine, Vitry, St. Thomas Aquinas, Rousseau, Palestrina, Descartes, Vincenzo Galilei, Beethoven, Wagner, Feuerbach, Schopenhauer, Hegel, Stravinsky, and Adorno and others.

Prerequisites & Notes

EDI Global only.

Credits: 3

NSCI 2013 - BASIC ASTRONOMY

The history of the heavens and man's study of their motion. Selections from Ptolemy, Copernicus, Galileo, and Kepler are read.

Prerequisites & Notes

EDI Global only.

Credits: 3

Interdisciplinary Electives - 6 Hours

HIST 3673 - AMERICAN POLITICAL TRADITION

This course introduces students to the basic concepts, beliefs, and principles of the American political tradition – the special and valuable inheritance of all Americans – through a consideration of some of its key documents from the founding era. As a course in the indigenous American tradition, it is meant to complement and particularize the course in Political Philosophy, the scope of which is broader and more general, encompassing in its investigation most of the major thinkers in the Western political tradition that stretches back to Plato.

Prerequisites & Notes

EDI Global only.

Credits: 3

SSCI 2113 - SOCIOLOGY

A critical examination of modern social and behavioral theorists, with particular emphasis on their methodological approaches. This course focuses on the founders of modern sociological and psychological theory but also includes contemporary thinkers. Texts for this course address both intrapersonal and interpersonal dynamics, exploring the nature of the person in himself and in his relation to others.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 2113 - IMAGINATIVE APOLOGETICS I

This course will introduce the discipline of imaginative apologetics: the practice of using literature and cinema to effectively convey deep truths about God and humankind. Using essays along with the imaginative works (books, films, etc.) as the case study, students will learn how imaginative works are used in the practice of apologetics. In addition, they will develop foundational skills in the philosophical and theological analysis of literature and cinema.

Prerequisites & Notes

EDI Global only

Credits: 3

PHIL 2123 - IMAGINATIVE APOLOGETICS II

This course will build upon the foundation developed in Imaginative Apologetics I. Using essays along with imaginative works from prominent authors and related film adaptations as a case study, students will hone their analytical skills and learn to put imaginative apologetics into practice through a mentored imaginative project.

Prerequisites & Notes

EDI Global only.

Credits: 3

Great Books English (Major) 42 Required Hours

English Language Literature Courses

ENGL 1243 - GREAT BOOKS I (ANCIENT)

An introduction to the epic genre through a close reading of the first great epic texts of Western civilization: Homer's Iliad and Odyssey and Virgil's Aeneid. The themes considered in the study of ancient epic include the hero and his vocation, honor and the virtues, the relation of man to the gods, the meaning of time, Christian typology in pagan literature, and the importance and meaning of myth. This course also serves as an introduction to the study of literature and to the basic principles of literary criticism.

Prerequisites & Notes

EDI Global only

Credits: 3

ENGL 1253 - GREAT BOOKS II (MEDIEVAL)

An introduction to the literature of the Medieval era, focusing on close readings of authors such as Dante, Chaucer, Kempe, Monmouth, Aquinas, Duns, Bede, and others. This course serves as an introduction to the study of medieval literature and to the basic principles of philosophical and literary inquiry.

Prerequisites & Notes

EDI Global only

Credits: 3

ENGL 2243 - GREAT BOOKS III (REN-EARLY MODERN)

An introduction to the literature of the Renaissance to Early Modern era, focusing on close readings of authors such as Shakespeare, Machiavelli, Donne, Milton, and others. This course serves as an introduction to the study of Renaissance and Early Modern literature and to the basic principles of philosophical and literary inquiry.

Prerequisites & Notes

EDI Global only

Credits: 3

ENGL 2253 - GREAT BOOKS IV (MODERN)

An introduction to Modern literature, focusing on close readings of authors such as Hobbs, Bacon, Descartes, Spinoza, Locke, Voltaire, Hume, Rousseau, Kante, Goethe, Hegel, Mill, Marx, and others. This course serves as an introduction to the study of Modernism and to the basic principles of philosophical and literary inquiry.

Prerequisites & Notes

EDI Global only

Credits: 3

ENGL 3243 - AMERICAN MASTERS

Like all great writers, the authors studied in this course address the universal human condition—the "eternal verities" and "the human heart in conflict with itself," as Faulkner wrote. Additionally, however, twentieth century American writers reflect an insight into a vanishing culture which was the American culmination of Western European civilization, reaffirming the thesis that the ethos of a culture is best seen when that culture is in decline. Authors highlighted in this course include William Faulkner, examining the scope of his vision as it moved from tragic to comic; instructors may also select texts chosen from the work of Eudora Welty, Flannery O'Connor, Robert Penn Warren, Caroline Gordon, and the Fugitive poets/ critics.

Prerequisites & Notes

EDI Global only.

Credits: 3

ENGL 3253 - LYRIC POETRY

The lyric genre embodies themes of vision, knowledge, love, and wholeness, exploring man's memory and intuitions of an unfallen world. Thus, study of the lyric genre includes the themes of poetic intuition, love between man and woman, and love between the soul and God. This course considers the patterns of the lyric genre from its roots in Genesis, the Song of Solomon, and the Psalms and proceeds through English and American poetry to the twentieth century, with particular emphasis upon seventeenth- and early nineteenth-century British poetry. Additional texts—short stories, novels—that embody the pattern of the lyric genre may also be studied.

Prerequisites & Notes

EDI Global only.

Credits: 3

ENGL 3263 - LITERARY CRITICISM

This course focuses on literature and the other arts as modes of knowledge through examining the origin of works of art in creative intuition; the process of embodying creative intuition in the work; mimesis; the organic form and unity of works of art (particularly literary works of art); the analogical imagination and levels of analogy in the literary work of art; the eschatological nature of works of art; the telos of the work of art; the transmission of creative intuition through the work to the reader; and the proper critical approach to explicating literary works of art. Readings include literary criticism, poetry, a novel and short story, and essays on the creative process.

Prerequisites & Notes

EDI Global only.

Credits: 3

English Language History Courses**HIST 1053 - WESTERN CIVILIZATION I**

This course will provide a survey of Western history from Antiquity until the 1700s. The primary focus of instruction will be on providing the chronological framework for the Great Books of the Western tradition. Students will gain a historical sketch of people, places, and events that have shaped Western civilization, which will greatly enhance their understanding of the great texts produced in the successive historical periods. Selections from primary source material as well as contemporary histories will be used.

Prerequisites & Notes

EDI Global only

Credits: 3

HIST 1063 - WESTERN CIVILIZATION II

This course will provide a survey of Western history from the 1700s to the 20th century. The primary focus of instruction will be on providing the chronological framework for the Great Books of the Western tradition. Students will gain a historical sketch of people, places, and events that have shaped Western civilization since the 18th century, which will greatly enhance their understanding of the great texts produced in the successive historical periods. Selections from primary source material as well as contemporary histories will be used.

Prerequisites & Notes

EDI Global only.

Credits: 3

HIST 3003 - PHILOSOPHY OF HISTORY

This course encourages reflection on and philosophic criticism of history and its methods. Students are introduced to the character and limits of history, its methods, and some of the great texts which themselves define good historical writing. Readings are taken from Herodotus, Thucydides, Tacitus, Plutarch, Eusebius, St. Augustine, Bebe, Einhard and others.

Prerequisites & Notes

Prerequisite: None

Credits: 3

SSCI 2243 - POLITICAL ECONOMICS

This course introduces students to the basic concepts, beliefs, and principles of the Western political tradition through a consideration of some of its key documents. As a course primarily focused on the modern era, this course is meant to complement and particularize the course in Political Philosophy, the scope of which is broader and more general, encompassing in its investigation most of the major thinkers in the Western political tradition that stretches back to Plato.

Prerequisites & Notes

Prerequisite: Political Philosophy

EDI Global only.

Credits: 3

HIST 2103 - AMERICAN HISTORY I

A survey of American history from discovery to 1877. Topics include the colonial period, the revolutionary era, the Constitution, Jeffersonianism, economic and territorial expansion, sectional tensions, the Civil War, and Reconstruction.

Prerequisites & Notes

EDI Global only

Credits: 3

HIST 2113 - AMERICAN HISTORY II

This course is a study of American history from 1877 to the present. Topics include the New South, the New West, foreign affairs, industrialization, the Progressive Era, the World War I, the Great Depression, World War II, the Cold War, and present issues.

Prerequisites & Notes

EDI Global only.

Credits: 3

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

AND

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

OR

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

Area III, Natural Science and Mathematics - 11 Credit Hours

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value

equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Area IV, History, Social and Behavioral Sciences - 12 Credit Hours

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders,

and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Nevada

3 credit hours needed. The Socio-Historical requirement must be fulfilled by taking PPOL 2433 or by earning credit for one of the following combinations of classes from an accredited Nevada college: 1) HIST 100, 2) PCS 101, 3) HIST 101 and HIST 102, or 4) HIST 101 and 217.

Ohio

Ohio students need an additional two credit hours in one or more of the following areas: Oral and Written Communication, Mathematics, Statistics and Logic, Arts, Humanities, Culture and Diversity, Natural Sciences, Technology and Innovation.

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

* if not already taken or 2 more credits to get to 36 hours

Oklahoma

In addition to the courses listed below, Oklahoma students need an additional 7 credit hours in one or more of the following: History, Social Science, Behavioral Science, Humanities, Math, Natural Science, Language, or Fine Arts.

PPOL 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

Select One:

Choose one not already chosen for Foundational Core

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Site-Based (Partnership)

Bachelor of Arts, Humanities: Classical Studies - Four Year Plan

Year One

Fall Semester

THEO 1003 - WESTERN THEOLOGICAL TRADITION I

This course offers an introductory intellectual consideration of theological tradition regarding the nature, significance, duties, and destiny of man in his relation to God as that tradition was taught by such great witnesses and scholars as the Apostolic Fathers, St. Justin, St. Irenaeus, St. Augustine, St. John of Damascus, St. Anselm, and St. Thomas.

Prerequisites & Notes

EDI Global only

Credits: 3

PHIL 1003 - INTRO TO PHILOSOPHICAL THOUGHT

This course introduces students to the foundational concepts and issues in Western philosophy. Students will explore the development of philosophical thought, learn basic logic skills, and engage with the core questions that have shaped human understanding and inquiry. The course aims to provide a comprehensive overview of the major philosophers: Socrates, Plato and Aristotle. The student will gain an understanding of the questions, and the answers offered by these philosophers throughout history.

Prerequisites & Notes

EDI Global only

Credits: 3

Spring Semester

BIBL 1003 - SACRED SCRIPTURE (OLD TESTAMENT)

This course studies the images and themes of the Old Testament as revealed literature that has been the single most fruitful source for knowledge of things human and divine. On the basis of a careful reading and following a literary and theological methodology, the Bible is studied for its moral and theological significance.

Prerequisites & Notes

EDI Global only

Credits: 3

Year Two

Fall Semester

MATH 1003 - MATHEMATICS I

Mathematics studied as a liberal art through close reading and discussion of Euclid's Elements, books I-V. Directed not only toward developing the student's mathematical competence through demonstration of propositions, this course emphasizes reflection upon the meaning and nature of mathematics. Topics investigated include:

Book I: The geometry of triangles and parallelograms, through the Pythagorean Theorem.

Book II: Geometrical algebra

Book III: The geometry of circles.

Book IV: The geometry of circles, continued.

Book V: The general theory of ratio and proportion.

Book VI: Application of the theory of ratio, and proportion to plane figures.

PHIL 1003 - INTRO TO PHILOSOPHICAL THOUGHT

This course introduces students to the foundational concepts and issues in Western philosophy. Students will explore the development of philosophical thought, learn basic logic skills, and engage with the core questions that have shaped human understanding and inquiry. The course aims to provide a comprehensive overview of the major philosophers: Socrates, Plato and Aristotle. The student will gain an understanding of the questions, and the answers offered by these philosophers throughout history.

Prerequisites & Notes

EDI Global only

Credits: 3

HIST 3003 - PHILOSOPHY OF HISTORY

This course encourages reflection on and philosophic criticism of history and its methods. Students are introduced to the character and limits of history, its methods, and some of the great texts which themselves define good historical writing. Readings are taken from Herodotus, Thucydides, Tacitus, Plutarch, Eusebius, St. Augustine, Bebe, Einhard and others.

Prerequisites & Notes

Prerequisite: None

Credits: 3

PHIL 1223 - GRAMMAR LOGIC RHETORIC I

This course intends to provide students with the tools of learning. The term trivium denotes the three liberal arts of grammar, logic, and rhetoric concerned with methods of discourse, or linguistic operations. These arts are meant to prepare a student for the study of the higher disciplines of philosophy and theology by means of the study of language. The method of the course is an intensive study of grammar, logic, and rhetoric, and the student will acquire both theoretical and practical knowledge of these arts in this class.

PHIL 2023 - PHILOSOPHY OF MAN

A philosophic investigation of the ontology of the human being, from a historic Judeo-Christian framework.

Prerequisites & Notes

EDI Global only.

Credits: 3

SSCI 2243 - POLITICAL ECONOMICS

This course introduces students to the basic concepts, beliefs, and principles of the Western political tradition through a consideration of some of its key documents. As a course primarily focused on the modern era, this course is meant to complement and particularize the course in Political Philosophy, the scope of which is broader and more general, encompassing in its investigation most of the major thinkers in the Western political tradition that stretches back to Plato.

Prerequisites & Notes

Prerequisite: Political Philosophy

EDI Global only.

Credits: 3

PHIL 1233 - GRAMMAR LOGIC RHETORIC II

Second semester of TRIV 1371, focusing on Rhetoric. The method of the course is an intensive study of grammar, logic, and rhetoric, and the student will acquire both theoretical and practical knowledge of these arts in this class.

Prerequisites & Notes

EDI Global only.

Credits: 3

Year Two

Fall Semester

THEO 1013 - WESTERN THEOLOGICAL TRADITION II

The development of theology from Occam and the sixteenth-century division of Christendom to the twentieth century, including texts and documents from Renaissance thinkers, the Deists, Enlightenment critics, and theologians of the Catholic Revival.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 1013 - PHILOSOPHY OF NATURE

Philosophy of nature seeks to identify the primary causes and principles of the natural world and thereby to explain this world. Therefore, students will be led to contemplate the natural world as a whole, so as to discover the principles that constitute natural beings and, ultimately, the Principle that moves the natural world. Focusing on change as the primary phenomenon that natural things exhibit, philosophy of nature deals with such topics as matter, motion, nature, chance, the infinite, space, and time. Philosophy of nature also addresses, in preliminary fashion, the relationship of man to nature.

Prerequisites & Notes

EDI Global only.

Credits: 3

ENGL 1243 - GREAT BOOKS I (ANCIENT)

An introduction to the epic genre through a close reading of the first great epic texts of Western civilization: Homer's Iliad and Odyssey and Virgil's Aeneid. The themes considered in the study of ancient epic include the hero and his vocation, honor and the virtues, the relation of man to the gods, the meaning of time, Christian typology in pagan literature, and the importance and meaning of myth. This course also serves as an introduction to the study of literature and to the basic principles of literary criticism.

Prerequisites & Notes

EDI Global only

Credits: 3

HIST 1053 - WESTERN CIVILIZATION I

This course will provide a survey of Western history from Antiquity until the 1700s. The primary focus of instruction will be on providing the chronological framework for the Great Books of the Western tradition. Students will gain a historical sketch of people, places, and events that have shaped Western civilization, which will greatly enhance their understanding of the great texts produced in the successive historical periods. Selections from primary source material as well as contemporary histories will be used.

Prerequisites & Notes

EDI Global only

Credits: 3

MATH 1003 - MATHEMATICS I

Mathematics studied as a liberal art through close reading and discussion of Euclid's Elements, books I-V. Directed not only toward developing the student's mathematical competence through demonstration of propositions, this course emphasizes reflection upon the meaning and nature of mathematics. Topics investigated include:

Book I: The geometry of triangles and parallelograms, through the Pythagorean Theorem.

Book II: Geometrical algebra

Book III: The geometry of circles.

Book IV: The geometry of circles, continued.

Book V: The general theory of ratio and proportion.

Book VI: Application of the theory of ratio, and proportion to plane figures.

Credits: 3

Spring Semester

THEO 2013 - WESTERN SPIRITUAL TRADITION

Reviewing the Christian tradition of spiritual life, this course reviews core Christian literature on spirituality, with selections from Romans, I John, Acts, Galatians, and Matthew, Apostolic fathers, Early Church Fathers, and writers on spirituality such as the epistles of St. Clement of Rome and St. Ignatius of Antioch, Origen, St. Bernard of Clairvaux, Thomas à Kempis, St. Francis de Sales, John Tauler, St. Thomas More, Newman, Lewis, and others.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 2033 - ETHICS

This course offers an introduction to moral philosophy through an investigation of the tradition of ethical thought that has informed Western civilization. The course examines various accounts of the human desire for what is good; questions concerning moral choice and the nature of good and evil actions; distinctions between utility, right, and duty;

and conceptions of human happiness. In so doing, this course examines the nature and role of the virtues and of the moral law.

Prerequisites & Notes

EDI Global only.

Credits: 3

ENGL 1253 - GREAT BOOKS II (MEDIEVAL)

An introduction to the literature of the Medieval era, focusing on close readings of authors such as Dante, Chaucer, Kempe, Monmouth, Aquinas, Duns, Bede, and others. This course serves as an introduction to the study of medieval literature and to the basic principles of philosophical and literary inquiry.

Prerequisites & Notes

EDI Global only

Credits: 3

HIST 1063 - WESTERN CIVILIZATION II

This course will provide a survey of Western history from the 1700s to the 20th century. The primary focus of instruction will be on providing the chronological framework for the Great Books of the Western tradition. Students will gain a historical sketch of people, places, and events that have shaped Western civilization since the 18th century, which will greatly enhance their understanding of the great texts produced in the successive historical periods. Selections from primary source material as well as contemporary histories will be used.

Prerequisites & Notes

EDI Global only.

Credits: 3

MATH 1203 - MATHEMATICS II

Euclid II will complete the introduction of students to the concepts and methods of Greek geometry through intensive study of the latter books of the Elements. Emphasis will be placed on understanding and achieving rigor in mathematical proofs. Classes will be conducted in a participatory manner, with students demonstrating propositions.

Prerequisites & Notes

Prerequisite: MATH 1003

Year Three

Fall Semester

THEO 3003 - EARLY FATHERS

This course offers an opportunity to master selections from the theological literature of the early Church Fathers (especially from the Greek and Syriac East) in which important issues such as God, Christology, images, and the incorporation of philosophy in a larger Christian wisdom were treated. Readings include texts and selections taken from the theologians of the first millennium including St. Anselm, the Apostolic Fathers, St. Cyril of Alexandria, St. Irenaeus, St. Cyril of Jerusalem, Dionysius of Alexandria, St. Basil, St. Melito, St. Athanasius, St. Gregory the Great, St. Leo, and Boethius.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 3003 - EPISTEMOLOGY

The philosophy of knowledge, or epistemology, investigates fundamental problems concerning how man is able to know. Of special concern are the relations among the sciences, the different types of knowledge, and different modes of knowing as studied in history, religion, first principles, poetry, and mathematics.

Prerequisites & Notes

EDI Global only.

Credits: 3

ENGL 2243 - GREAT BOOKS III (REN-EARLY MODERN)

An introduction to the literature of the Renaissance to Early Modern era, focusing on close readings of authors such as Shakespeare, Machiavelli, Donne, Milton, and others. This course serves as an introduction to the study of Renaissance and Early Modern literature and to the basic principles of philosophical and literary inquiry.

Prerequisites & Notes

EDI Global only

Credits: 3

HIST 2103 - AMERICAN HISTORY I

A survey of American history from discovery to 1877. Topics include the colonial period, the revolutionary era, the Constitution, Jeffersonianism, economic and territorial expansion, sectional tensions, the Civil War, and Reconstruction.

Prerequisites & Notes

EDI Global only

Credits: 3

MUSC 2003 - MUSIC

Music will be structured as a series of topics, each illustrating a historical philosophic and aesthetic writings about music and recordings of music literature, building on philosophers and composers such as: Plato, Aristotle, Aristoxenus, St. Augustine, Vitry, St. Thomas Aquinas, Rousseau, Palestrina, Descartes, Vincenzo Galilei, Beethoven, Wagner, Feuerbach, Schopenhauer, Hegel, Stravinsky, and Adorno and others.

Prerequisites & Notes

EDI Global only.

Credits: 3

Spring Semester

THEO 3033 - AUGUSTINE

This course presents selected texts fundamental to St. Augustine's thought and to the Augustinian tradition and investigates the importance of Augustinian themes in the intellectual history of the West.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 3013 - METAPHYSICS

Metaphysics, the highest branch of philosophy, is the systematic study of being qua being. Beginning with the study of finite being and concluding with natural theology, metaphysics seeks to identify the principles, structures, and properties pertaining to existents as existing. This course offers an introduction to this most fundamental of all philosophical investigations. Students will contemplate such basic metaphysical topics as finite and infinite being, substance and accident, essence and existence, the transcendentals of being, analogical predication of being, participation, first principles, and the existence and attributes of God.

Prerequisites & Notes

EDI Global only.

Credits: 3

ENGL 2253 - GREAT BOOKS IV (MODERN)

An introduction to Modern literature, focusing on close readings of authors such as Hobbs, Bacon, Descartes, Spinoza, Locke, Voltaire, Hume, Rousseau, Kante, Goethe, Hegel, Mill, Marx, and others. This course serves as an introduction to the study of Modernism and to the basic principles of philosophical and literary inquiry.

Prerequisites & Notes

EDI Global only

Credits: 3

HIST 2113 - AMERICAN HISTORY II

This course is a study of American history from 1877 to the present. Topics include the New South, the New West, foreign affairs, industrialization, the Progressive Era, the World War I, the Great Depression, World War II, the Cold War, and present issues.

Prerequisites & Notes

EDI Global only.

Credits: 3

NSCI 2013 - BASIC ASTRONOMY

The history of the heavens and man's study of their motion. Selections from Ptolemy, Copernicus, Galileo, and Kepler are read.

Prerequisites & Notes

EDI Global only.

Credits: 3

Year Four

Fall Semester

THEO 3043 - THOMAS AQUINAS

Selected questions from the Summa Theologica that define themes central to the thought of St. Thomas and to the medieval debate are studied. The influence of St. Thomas's thought on the nineteenth-century revival in the interest in Scholasticism is also studied. The text for this course is St. Thomas Aquinas, Summa Theologiae.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 3023 - POLITICS AND PHILOSOPHY

This course offers an introduction to the philosophical study of political activity. Students become acquainted with various manifestations of the political community in the West since the time of the ancient Greeks. Students examine the distinctive characters of the Greek polis, the Roman res publica, the Medieval realm, and the modern state, while investigating the assigned authors' attempts to answer questions concerning the limits of political activity, the nature of law, and the character of the political community.

Prerequisites & Notes

EDI Global only.

Credits: 3

ENGL 3243 - AMERICAN MASTERS

Like all great writers, the authors studied in this course address the universal human condition—the "eternal verities" and "the human heart in conflict with itself," as Faulkner wrote. Additionally, however, twentieth century American writers reflect an insight into a vanishing culture which was the American culmination of Western European civilization, reaffirming the thesis that the ethos of a culture is best seen when that culture is in decline. Authors highlighted in this course include William Faulkner, examining the scope of his vision as it moved from tragic to comic; instructors may also select texts chosen from the work of Eudora Welty, Flannery O'Connor, Robert Penn Warren, Caroline Gordon, and the Fugitive poets/ critics.

Prerequisites & Notes

EDI Global only.

Credits: 3

Confessional Elective - Select One:

THEO 3053 - CONFESSIONAL ELECTIVE NEWMAN & MODERNITY

This course has as its subject John Henry Newman, his biography and intellectual biography, his contribution to the Oxford Movement and to Catholic theology, and his role as a major and prophetic expositor of the theological themes of modernity.

Prerequisites & Notes

EDI Global only.

Credits: 3

THEO 3073 - CONFESSIONAL ELECTIVE 16TH CENTURY REFORMATION THOUGHT

This course evaluates the major historical and theological contributors to the Protestant Reformation, including Continental and English thought. Readings focus on primary figures of the early Reformation, including Luther, Melancthon, Calvin, Zwingli, Bullinger, Bucer, Cranmer, Collet, Erasmus, and Knox.

Prerequisites & Notes

EDI Global only.

Credits: 3

THEO 3083 - CONFESSIONAL ELECTIVE MODERN EVANGELICAL THOUGHT

This course has as its subject modern Evangelical thought, its historic roots and diverse branches, including its manifestations in America, Europe, and the Global South.

Prerequisites & Notes

EDI Global only.

Credits: 3

Select One of the Following:

HIST 3673 - AMERICAN POLITICAL TRADITION

This course introduces students to the basic concepts, beliefs, and principles of the American political tradition – the special and valuable inheritance of all Americans – through a consideration of some of its key documents from the founding era. As a course in the indigenous American tradition, it is meant to complement and particularize the course in Political Philosophy, the scope of which is broader and more general, encompassing in its investigation most of the major thinkers in the Western political tradition that stretches back to Plato.

Prerequisites & Notes

EDI Global only.

Credits: 3

HIST 2103 - AMERICAN HISTORY I

A survey of American history from discovery to 1877. Topics include the colonial period, the revolutionary era, the Constitution, Jeffersonianism, economic and territorial expansion, sectional tensions, the Civil War, and Reconstruction.

Prerequisites & Notes

EDI Global only

Credits: 3

PHIL 2113 - IMAGINATIVE APOLOGETICS I

This course will introduce the discipline of imaginative apologetics: the practice of using literature and cinema to effectively convey deep truths about God and humankind. Using essays along with the imaginative works (books, films, etc.) as the case study, students will learn how imaginative works are used in the practice of apologetics. In addition, they will develop foundational skills in the philosophical and theological analysis of literature and cinema.

Prerequisites & Notes

EDI Global only

Credits: 3

Spring Semester**PHIL 3033 - AESTHETICS**

The main goals of the course are to introduce the student to the history and logic of Western philosophy's ways of thinking about questions of beauty and aesthetics from classical Greece down to the present.

Prerequisites & Notes

EDI Global only.

Credits: 3

ENGL 3253 - LYRIC POETRY

The lyric genre embodies themes of vision, knowledge, love, and wholeness, exploring man's memory and intuitions of an unfallen world. Thus, study of the lyric genre includes the themes of poetic intuition, love between man and woman, and love between the soul and God. This course considers the patterns of the lyric genre from its roots in Genesis, the Song of Solomon, and the Psalms and proceeds through English and American poetry to the twentieth century, with particular emphasis upon seventeenth- and early nineteenth-century British poetry. Additional texts—short stories, novels—that embody the pattern of the lyric genre may also be studied.

Prerequisites & Notes

EDI Global only.

Credits: 3

ENGL 3263 - LITERARY CRITICISM

This course focuses on literature and the other arts as modes of knowledge through examining the origin of works of art in creative intuition; the process of embodying creative intuition in the work; mimesis; the organic form and unity of works of art (particularly literary works of art); the analogical imagination and levels of analogy in the literary work of art; the eschatological nature of works of art; the telos of the work of art; the transmission of creative intuition through the work to the reader; and the proper critical approach to explicating literary works of art. Readings include literary criticism, poetry, a novel and short story, and essays on the creative process.

Prerequisites & Notes

EDI Global only.

Credits: 3

Select One of the Following:

SSCI 2113 - SOCIOLOGY

A critical examination of modern social and behavioral theorists, with particular emphasis on their methodological approaches. This course focuses on the founders of modern sociological and psychological theory but also includes contemporary thinkers. Texts for this course address both intrapersonal and interpersonal dynamics, exploring the nature of the person in himself and in his relation to others.

Prerequisites & Notes

EDI Global only.

Credits: 3

HIST 2113 - AMERICAN HISTORY II

This course is a study of American history from 1877 to the present. Topics include the New South, the New West, foreign affairs, industrialization, the Progressive Era, the World War I, the Great Depression, World War II, the Cold War, and present issues.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 2123 - IMAGINATIVE APOLOGETICS II

This course will build upon the foundation developed in Imaginative Apologetics I. Using essays along with imaginative works from prominent authors and related film adaptations as a case study, students will hone their analytical skills and learn to put imaginative apologetics into practice through a mentored imaginative project.

Prerequisites & Notes

EDI Global only.

Credits: 3

Confessional Elective - Select One:

THEO 3053 - CONFESSIONAL ELECTIVE NEWMAN & MODERNITY

This course has as its subject John Henry Newman, his biography and intellectual biography, his contribution to the Oxford Movement and to Catholic theology, and his role as a major and prophetic expositor of the theological themes of modernity.

Prerequisites & Notes

EDI Global only.

Credits: 3

THEO 3073 - CONFESSIONAL ELECTIVE 16TH CENTURY REFORMATION THOUGHT

This course evaluates the major historical and theological contributors to the Protestant Reformation, including Continental and English thought. Readings focus on primary figures of the early Reformation, including Luther, Melancthon, Calvin, Zwingli, Bullinger, Bucer, Cranmer, Collet, Erasmus, and Knox.

Prerequisites & Notes

EDI Global only.

Credits: 3

THEO 3083 - CONFESSIONAL ELECTIVE MODERN EVANGELICAL THOUGHT

This course has as its subject modern Evangelical thought, its historic roots and diverse branches, including its manifestations in America, Europe, and the Global South.

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

MUSC 1023 - FOUNDATIONS OF MUSIC THEORY

This course is an orientation to music designed to help students acquire foundational knowledge of the fundamentals of music.

Prerequisites & Notes

NULL

Credits: 3

ENGL 2303 - GREEK AND ROMAN LITERATURE

Examination of Hesiod's Theogony, Homer's Iliad, and other masterworks of Greek and Roman literature. Origins, genealogies, and mythologies of Greek gods are charted and examined in relation to literature and culture of the period. Students will focus on the foundations of Western civilization in relation to human virtue, leadership, and worldview.

Prerequisites & Notes

NULL

Credits: 3

HUMS 2203 - DRAMATIC INTERP OF ANCIENT LITERATU

Dramatic interpretation of Homer's Odyssey, Virgil's Aeneid, and Sophocles' Oedipus Rex. Students read and analyze ancient masterworks and then practice the rhetorical canons of memoria and delivery to present dramatic interpretations both individually and in groups. Creative presentations of themes from ancient literature provide additional opportunity to practice extemporaneous speaking and delivery of ancient texts in oral form.

Classica - 12 Credit Hours

LANG 1143 - CLASSICA LATIN I: GRAMMAR & TEXTS

Students will step into the world of classical antiquity with Classica Latin I, an introductory course designed to explore the foundations of classical Latin—the language of the Roman Empire. This course serves as a gateway to understanding ancient Rome's linguistic, literary, and historical legacy. Through a carefully structured curriculum, students will embark on a journey to acquire essential language skills, delve into Roman culture, and unlock the door to the vast literary treasures of Latin literature.

Prerequisites & Notes

NULL

Credits: 3

LANG 1243 - CLASSICA LATIN II: SYNTAX & TEXTS

Students will continue their journey into classical Latin with Classica Latin II: Syntax and Texts. Building upon the foundational knowledge acquired in Classica Latin I, this course takes a deeper dive into the intricacies of Latin syntax, expands students' vocabulary, and introduces them to more complex literary texts. Through rigorous grammar study, textual analysis, and engagement with authentic Latin writings, students will enhance their proficiency in reading, translating, and appreciating the nuances of classical Latin literature.

Prerequisites & Notes

Prerequisite: LANG 1143

Credits: 3

LANG 2253 - CLASSICA LATIN III

Building upon the foundational knowledge acquired in Classica Latin II, this advanced course invites students to embark on a compelling exploration of the linguistic and cultural significance of Roman orators, with a focus on the masterful works of Cicero and Quintilian. This course is designed to further refine students' Latin language skills while delving into the captivating world of Roman oratory and rhetoric. Through an in-depth study of key speeches, rhetorical techniques, and cultural context, students will deepen their appreciation for classical Latin's eloquence and persuasive power.

Prerequisites & Notes

Prerequisite: LANG 1033

Credits: 3

- OR -

LANG 1123 - CLASSICA GREEK I: GRAMMAR & TEXTS

Classica Greek I is an introductory course designed for students eager to explore the foundations of classical Attic Greek, the language of renowned philosophers, playwrights, and historians such as Plato, Sophocles, and Herodotus. Students will

acquire a solid understanding of the Greek alphabet, essential grammar rules, and a foundational vocabulary. Emphasis will be placed on developing reading and writing skills, focusing on authentic ancient Greek texts. By the end of the course, students will be equipped to read and translate simple passages from classical Greek literature.

Prerequisites & Notes

NULL

Credits: 3

- OR -

LANG 1043 - CLASSICA HEBREW I: GRAMMAR & TEXTS

Students will journey into the world of classical antiquity with Classica Hebrew I: Grammar and Tests, an introductory course meticulously designed to explore the foundations of classical Hebrew—the Hebrew Bible's language, grammar, and texts.

This course is a gateway to understanding the Old Testament's linguistic, literary, and historical richness. Through a carefully structured curriculum, students will embark on a comprehensive exploration of Hebrew, unlocking the key to accessing the sacred texts that have shaped the religious and cultural landscape of the Western world.

Prerequisites & Notes

NULL

Credits: 3

LANG 2353 - CLASSICA LATIN IV

Students will embark on an advanced exploration of Latin literature, focusing on the profound contributions of Roman philosophers and poets. Building upon the foundational knowledge acquired in Classica Latin III, this course aims to further refine their Latin language skills by delving into the captivating linguistic and cultural expressions found in the works of philosophical giants and poetic luminaries of ancient Rome. Through an intensive study of primary texts, linguistic analysis, and cultural context, students will deepen their understanding of the philosophical and poetic traditions that shaped the intellectual landscape of the Roman world.

Prerequisites & Notes

Prerequisite: LANG 2253

Credits: 3

- OR -

LANG 1223 - CLASSICAL GREEK II: SYNTAX & TEXTS

This course builds upon the foundation laid in Classica Greek I and delves deeper into the intricacies of classical Greek language and literature. Classica Greek II is designed for students who have completed the introductory course or possess equivalent proficiency, and it aims to further enhance linguistic skills, broaden vocabulary, and deepen comprehension of complex ancient Greek texts.

Prerequisites & Notes

Prerequisites: LANG 1123

Credits: 3

- OR -

LANG 1203 - CLASSICA HEBREW II: SYNTAX & TEXTS

Building upon the foundational knowledge acquired in Classica Hebre I: Grammar and Texts, this course is designed to take students on a deeper and more enriching exploration of the intricacies of Hebrew syntax, expand their vocabulary, and introduce them to more complex literary texts from the Hebrew Bible. This advanced course employs a comprehensive approach that combines rigorous grammar study, textual analysis, and engagement with authentic Hebrew writings. Through these methods, students will enhance their proficiency in reading, translating, and approaching the nuanced beauty of biblical Hebrew literature.

Prerequisites & Notes

Prerequisite: LANG 1043

Credits: 3

English - 6 Credit Hours

ENGL 1103 - RHETORICA

This course invites students to engage deeply with the art of classical rhetoric, providing them with the tools to analyze, practice, and appreciate the enduring principles of persuasive communication. Through discussions, practical exercises, and real-world applications, students will develop the confidence and skill set necessary to communicate persuasively in various personal, academic, and professional contexts.

Credits: 3

ENGL 2023 - LITERATURA

This course provides students with a unique opportunity to delve into the profound depths of a singular masterpiece, fostering a rich appreciation for the Western Canon and its enduring contributions to human thought and expression. Through scholarly inquiry, critical discussion, and creative engagement, participants will comprehensively understand the chosen work and its role within the broader context of the Western literary and intellectual tradition.

Prerequisites & Notes

NULL

Credits: 3

MatheMatica - 6 Credit Hours

MATH 1083 - ARITHMETICA THEORY

The focus of this course is understanding number theory. Students will learn how and why arithmetical properties and operations work, recognizing and applying the beautiful axiom systems upon which mathematics is built. Beyond addressing simple calculations, this course investigates how and why arithmetic works. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

NULL

Credits: 3

MATH 1093 - LOGICA

This course serves as an introduction to classical logic, a foundational branch of mathematics, within the framework of the Christian worldview. It explores the principles governing valid reasoning and argumentation. The primary focus is on propositional and first-order logic, providing students with a rigorous framework for analyzing and constructing logical arguments. Topics include propositional logic, first-order logic, proof theory, model theory, predicate calculus, and metalogic.

Prerequisites & Notes

NULL

Credits: 3

Major Core - 36 Credit Hours**MatheMatica - 12 Credit Hours****MATH 1123 - EUCLIDEAN GEOMETRIA I**

In this course, students will investigate plane geometry through several perspectives, including synthetic, metric, analytic, and locus geometry. Each is guided by logic within axiom systems. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

NULL

Credits: 3

MATH 1153 - EUCLIDEAN GEOMETRIA II

This course builds upon Geometry I through plane synthetic, metric, analytic, and locus geometries; 3-dimensional geometry; and brief introductions to neutral and non-Euclidean geometries. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 1123

Credits: 3

MATH 1163 - ALGEBRA I

This course considers real and complex numbers and operations, the Cartesian coordinate system, transformations of rigid figures, linear equations and inequalities, relations and functions, direct and indirect variation, polynomials, rational functions, and data analysis and probability. Learning experiences will include investigations, dialogues,

proofs, and applications.

Prerequisites & Notes

NULL

Credits: 3

MATH 1173 - ALGEBRA II

This course builds upon Algebra I and considers functions and their inverses, quadratic functions, sequences and series, systems of equations and inequalities, polynomials and operations, the Fundamental Theorem of Algebra, radical function, exponential and logarithmic functions, and transformations of functions. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 1163

Credits: 3

OrthoDoxia - 18 Credit Hours

THEO 1043 - THEOLOGICA I

This course invites students to engage deeply with primary texts, historical contexts, and theological debates, fostering a nuanced understanding of the diverse intellectual currents that shaped early Christian theology. Through critical analysis and thoughtful discussion, students will develop a profound appreciation for the enduring impact of these theological giants on the Christian tradition.

Prerequisites & Notes

NULL

Credits: 3

THEO 1053 - THEOLOGICA II

This course comprehensively explores the theological transformations that defined the 15th and 16th centuries, examining the diverse perspectives within the Protestant and Catholic traditions and their enduring impact on Christian thought and practice. Through critical analysis of primary texts and historical contexts, students will gain a nuanced understanding of the theological currents that shaped this transformative period.

Prerequisites & Notes

Prerequisite: THEO 1043

Credits: 3

THEO 1063 - SCRIPTURA I

This course provides students with a robust foundation in studying the Old Testament, encouraging critical engagement with the text, its transmission, and the languages in which it was written. Through discussions, hands-on exercises, and critical analyses, students will gain a deep appreciation for the complexities and richness of the Old Testament as a foundational document in the Judeo-Christian tradition.

Prerequisites & Notes

NULL

Credits: 3

THEO 1083 - SCRIPTURA II

This course provides students with a robust foundation in studying the New Testament, encouraging critical engagement with the text, its transmission, and the languages in which it was written. Through discussions, hands-on exercises, and critical analyses, students will gain a deep appreciation for the complexities and richness of the New Testament as a foundational document in the Judeo-Christian tradition.

Prerequisites & Notes

Prerequisite: THEO 1063

Credits: 3

THEO 2023 - PHILOSOPHAE I

This course invites students to critically engage with the intricate relationship between theology and philosophy, tracing the development of Christian thought from its early roots to its contemporary expressions. By examining the philosophical inquiries of these influential thinkers, students will deepen their understanding of the intellectual currents that have shaped the Christian tradition. Students will be encouraged to apply these philosophical insights to contemporary theological issues through discussions and analytical exercises.

Prerequisites & Notes

NULL

Credits: 3

THEO 2043 - PHILOSOPHAE II

This course encourages students to grapple with foundational questions of knowledge and belief from a Classical Christian perspective. Through careful analysis of primary texts, philosophical frameworks, and historical contexts, students will gain a nuanced understanding of how these influential thinkers have contributed to the ongoing conversation about the intersection of faith and reason in Christian epistemology.

Prerequisites & Notes

NULL

Credits: 3

Physics - 6 Credit Hours**PHYS 1004 - ASTRONOMIA**

This course considers the history of the heavens and man's study of their motion. Selections from Ptolemy, Copernicus, Galileo, and Kepler are read. Topics include geocentric and heliocentric models, planetary motion, the discovery of moons and other celestial objects, and the laws of planetary motion. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: MATH 1123

Credits: 4

PHYS 1013 - MUSICA

This course delves into the captivating intersection of physics and art with an introductory musicology course, where physics and music appreciation converge. This course is designed for students curious about the underlying physics principles that shape the sonic landscapes we experience.

Credits: 3

Associate of Arts, Humanities: Great Books English

Associate of Arts, Humanities: Great Books English- 2 Year Plan

Total Program Hours- 60 Credit Hours

Foundational Core - 30 Credit Hours

Theology - 6 Credit Hours

BIBL 1003 - SACRED SCRIPTURE (OLD TESTAMENT)

This course studies the images and themes of the Old Testament as revealed literature that has been the single most fruitful source for knowledge of things human and divine. On the basis of a careful reading and following a literary and theological methodology, the Bible is studied for its moral and theological significance.

Prerequisites & Notes

EDI Global only

Credits: 3

BIBL 1203 - SACRED SCRIPTURE: NEW TESTAMENT

This course studies the images and themes of the New Testament as revealed literature that has been the single most fruitful source for knowledge of things human and divine. On the basis of a careful reading and following a literary and theological methodology, the Bible is studied for its historical, moral, and theological significance.

Prerequisites & Notes

EDI Global only

Credits: 3

Philosophy - 6 Credit Hours

PHIL 1003 - INTRO TO PHILOSOPHICAL THOUGHT

This course introduces students to the foundational concepts and issues in Western philosophy. Students will explore the development of philosophical thought, learn basic logic skills, and engage with the core questions that have shaped human understanding and inquiry. The course aims to provide a comprehensive overview of the major philosophers: Socrates, Plato and Aristotle. The student will gain an understanding of the questions, and the answers offered by these philosophers throughout history.

Prerequisites & Notes

EDI Global only

Credits: 3

PHIL 2033 - ETHICS

This course offers an introduction to moral philosophy through an investigation of the tradition of ethical thought that has informed Western civilization. The course examines various accounts of the human desire for what is good; questions concerning moral choice and the nature of good and evil actions; distinctions between utility, right, and duty; and conceptions of human happiness. In so doing, this course examines the nature and role of the virtues and of the moral law.

Prerequisites & Notes

EDI Global only.

Credits: 3

Trivium and Quadrivium - 3 Credit Hours

MATH 1003 - MATHEMATICS I

Mathematics studied as a liberal art through close reading and discussion of Euclid's Elements, books I-V. Directed not only toward developing the student's mathematical competence through demonstration of propositions, this course emphasizes reflection upon the meaning and nature of mathematics. Topics investigated include:

Book I: The geometry of triangles and parallelograms, through the Pythagorean Theorem.

Book II: Geometrical algebra

Book III: The geometry of circles.

Book IV: The geometry of circles, continued.

Book V: The general theory of ratio and proportion.

Book VI: Application of the theory of ratio, and proportion to plane figures.

Prerequisites & Notes

EDI Global only

Credits: 3

Historical-Socio - 9 Credit Hours

HIST 1053 - WESTERN CIVILIZATION I

This course will provide a survey of Western history from Antiquity until the 1700s. The primary focus of instruction will be on providing the chronological framework for the Great Books of the Western tradition. Students will gain a historical sketch of people, places, and events that have shaped Western civilization, which will greatly enhance their understanding of the great texts produced in the successive historical periods. Selections from primary source material as well as contemporary histories will be used.

Prerequisites & Notes

EDI Global only

Credits: 3

HIST 2103 - AMERICAN HISTORY I

A survey of American history from discovery to 1877. Topics include the colonial period, the revolutionary era, the Constitution, Jeffersonianism, economic and territorial expansion, sectional tensions, the Civil War, and Reconstruction.

Prerequisites & Notes

EDI Global only

Credits: 3

SSCI 2113 - SOCIOLOGY

A critical examination of modern social and behavioral theorists, with particular emphasis on their methodological approaches. This course focuses on the founders of modern sociological and psychological theory but also includes contemporary thinkers. Texts for this course address both intrapersonal and interpersonal dynamics, exploring the nature of the person in himself and in his relation to others.

Prerequisites & Notes

EDI Global only.

Credits: 3

Literature - 6 Credit Hours

ENGL 1023 - ENGLISH COMPOSITION I

This course examines the history and philosophy of Great Books education using essays from prominent scholars as well as a curated anthology of primary source material from the Western Tradition. Students will develop skills in analytical reading while learning to craft descriptive, evaluative, and personal reflective essays. This course is equivalent to ENGL 1133.

Prerequisites & Notes

EDI only

Credits: 3

ENGL 1123 - ENGLISH COMPOSITION II

This course builds upon the foundation developed in English Composition 1. Students will further develop their ability to read deeply and ask probing questions of a text while learning to compose expository and persuasive essays. This course is equivalent to ENGL 1233.

Prerequisites & Notes

EDI only

Credits: 3

Divine Design - Pick Ten (10) of the Following: (30 Credit Hours)

THEO 1003 - WESTERN THEOLOGICAL TRADITION I

This course offers an introductory intellectual consideration of theological tradition regarding the nature, significance, duties, and destiny of man in his relation to God as that tradition was taught by such great witnesses and scholars as the Apostolic Fathers, St. Justin, St. Irenaeus, St. Augustine, St. John of Damascus, St. Anselm, and St. Thomas.

Prerequisites & Notes

EDI Global only

Credits: 3

THEO 1013 - WESTERN THEOLOGICAL TRADITION II

The development of theology from Occam and the sixteenth-century division of Christendom to the twentieth century, including texts and documents from Renaissance thinkers, the Deists, Enlightenment critics, and theologians of the Catholic Revival.

Prerequisites & Notes

EDI Global only.

Credits: 3

BIBL 1003 - SACRED SCRIPTURE (OLD TESTAMENT)

This course studies the images and themes of the Old Testament as revealed literature that has been the single most fruitful source for knowledge of things human and divine. On the basis of a careful reading and following a literary and theological methodology, the Bible is studied for its moral and theological significance.

Prerequisites & Notes

EDI Global only

Credits: 3

BIBL 1203 - SACRED SCRIPTURE: NEW TESTAMENT

This course studies the images and themes of the New Testament as revealed literature that has been the single most fruitful source for knowledge of things human and divine. On the basis of a careful reading and following a literary and theological methodology, the Bible is studied for its historical, moral, and theological significance.

Prerequisites & Notes

EDI Global only

Credits: 3

THEO 2013 - WESTERN SPIRITUAL TRADITION

Reviewing the Christian tradition of spiritual life, this course reviews core Christian literature on spirituality, with selections from Romans, I John, Acts, Galatians, and Matthew, Apostolic fathers, Early Church Fathers, and writers on spirituality such as the epistles of St. Clement of Rome and St. Ignatius of Antioch, Origen, St. Bernard of Clairvaux, Thomas à Kempis, St. Francis de Sales, John Tauler, St. Thomas More, Newman, Lewis, and others.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 1013 - PHILOSOPHY OF NATURE

Philosophy of nature seeks to identify the primary causes and principles of the natural world and thereby to explain this world. Therefore, students will be led to contemplate the natural world as a whole, so as to discover the principles that constitute natural beings and, ultimately, the Principle that moves the natural world. Focusing on change as the primary phenomenon that natural things exhibit, philosophy of nature deals with such topics as matter, motion, nature, chance, the infinite, space, and time. Philosophy of nature also addresses, in preliminary fashion, the relationship of man to nature.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 2023 - PHILOSOPHY OF MAN

A philosophic investigation of the ontology of the human being, from a historic Judeo-Christian framework.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 1223 - GRAMMAR LOGIC RHETORIC I

This course intends to provide students with the tools of learning. The term trivium denotes the three liberal arts of grammar, logic, and rhetoric concerned with methods of discourse, or linguistic operations. These arts are meant to prepare a student for the study of the higher disciplines of philosophy and theology by means of the study of language. The method of the course is an intensive study of grammar, logic, and rhetoric, and the student will acquire both theoretical and practical knowledge of these arts in this class.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 1233 - GRAMMAR LOGIC RHETORIC II

Second semester of TRIV 1371, focusing on Rhetoric. The method of the course is an intensive study of grammar, logic, and rhetoric, and the student will acquire both theoretical and practical knowledge of these arts in this class.

Prerequisites & Notes

EDI Global only.

Credits: 3

MATH 1003 - MATHEMATICS I

Mathematics studied as a liberal art through close reading and discussion of Euclid's Elements, books I-V. Directed not only toward developing the student's mathematical competence through demonstration of propositions, this course emphasizes reflection upon the meaning and nature of mathematics. Topics investigated include:

Book I: The geometry of triangles and parallelograms, through the Pythagorean Theorem.

Book II: Geometrical algebra

Book III: The geometry of circles.

Book IV: The geometry of circles, continued.

Book V: The general theory of ratio and proportion.

Book VI: Application of the theory of ratio, and proportion to plane figures.

Prerequisites & Notes

EDI Global only

Credits: 3

MATH 1203 - MATHEMATICS II

Euclid II will complete the introduction of students to the concepts and methods of Greek geometry through intensive study of the latter books of the Elements. Emphasis will be placed on understanding and achieving rigor in mathematical proofs. Classes will be conducted in a participatory manner, with students demonstrating propositions.

Prerequisites & Notes

Prerequisite: MATH 1003

EDI Global only.

Credits: 3

ENGL 1243 - GREAT BOOKS I (ANCIENT)

An introduction to the epic genre through a close reading of the first great epic texts of Western civilization: Homer's Iliad and Odyssey and Virgil's Aeneid. The themes considered in the study of ancient epic include the hero and his vocation, honor and the virtues, the relation of man to the gods, the meaning of time, Christian typology in pagan literature, and the importance and meaning of myth. This course also serves as an introduction to the study of literature and to the basic principles of literary criticism.

Prerequisites & Notes

EDI Global only

Credits: 3

ENGL 1253 - GREAT BOOKS II (MEDIEVAL)

An introduction to the literature of the Medieval era, focusing on close readings of authors such as Dante, Chaucer, Kempe, Monmouth, Aquinas, Duns, Bede, and others. This course serves as an introduction to the study of medieval literature and to the basic principles of philosophical and literary inquiry.

Prerequisites & Notes

EDI Global only

Credits: 3

ENGL 2243 - GREAT BOOKS III (REN-EARLY MODERN)

An introduction to the literature of the Renaissance to Early Modern era, focusing on close readings of authors such as Shakespeare, Machiavelli, Donne, Milton, and others. This course serves as an introduction to the study of Renaissance and Early Modern literature and to the basic principles of philosophical and literary inquiry.

Prerequisites & Notes

EDI Global only

Credits: 3

ENGL 2253 - GREAT BOOKS IV (MODERN)

An introduction to Modern literature, focusing on close readings of authors such as Hobbs, Bacon, Descartes, Spinoza, Locke, Voltaire, Hume, Rousseau, Kante, Goethe, Hegel, Mill, Marx, and others. This course serves as an introduction to the study of Modernism and to the basic principles of philosophical and literary inquiry.

Prerequisites & Notes

EDI Global only

Credits: 3

MUSC 2003 - MUSIC

Music will be structured as a series of topics, each illustrating a historical philosophic and aesthetic writings about music and recordings of music literature, building on philosophers and composers such as: Plato, Aristotle, Aristoxenus, St. Augustine, Vitry, St. Thomas Aquinas, Rousseau, Palestrina, Descartes, Vincenzo Galilei, Beethoven, Wagner, Feuerbach, Schopenhauer, Hegel, Stravinsky, and Adorno and others.

Prerequisites & Notes

EDI Global only.

Credits: 3

SSCI 2243 - POLITICAL ECONOMICS

This course introduces students to the basic concepts, beliefs, and principles of the Western political tradition through a consideration of some of its key documents. As a course primarily focused on the modern era, this course is meant to complement and particularize the course in Political Philosophy, the scope of which is broader and more general, encompassing in its investigation most of the major thinkers in the Western political tradition that stretches back to Plato.

Prerequisites & Notes

Prerequisite: Political Philosophy

EDI Global only.

Credits: 3

HIST 1063 - WESTERN CIVILIZATION II

This course will provide a survey of Western history from the 1700s to the 20th century. The primary focus of instruction will be on providing the chronological framework for the Great Books of the Western tradition. Students will gain a historical sketch of people, places, and events that have shaped Western civilization since the 18th century, which will greatly enhance their understanding of the great texts produced in the successive historical periods. Selections from primary source material as well as contemporary histories will be used.

Prerequisites & Notes

EDI Global only.

Credits: 3

HIST 2113 - AMERICAN HISTORY II

This course is a study of American history from 1877 to the present. Topics include the New South, the New West, foreign affairs, industrialization, the Progressive Era, the World War I, the Great Depression, World War II, the Cold War, and present issues.

Prerequisites & Notes

EDI Global only.

Credits: 3

NSCI 2013 - BASIC ASTRONOMY

The history of the heavens and man's study of their motion. Selections from Ptolemy, Copernicus, Galileo, and Kepler are read.

Prerequisites & Notes

EDI Global only.

Credits: 3

Credits: 3

MATH 1173 - ALGEBRA II

This course builds upon Algebra I and considers functions and their inverses, quadratic functions, sequences and series, systems of equations and inequalities, polynomials and operations, the Fundamental Theorem of Algebra, radical function, exponential and logarithmic functions, and transformations of functions. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 1163

Credits: 3

OrthoDoxia - 18 Credit Hours

THEO 1043 - THEOLOGICA I

This course invites students to engage deeply with primary texts, historical contexts, and theological debates, fostering a nuanced understanding of the diverse intellectual currents that shaped early Christian theology. Through critical analysis and thoughtful discussion, students will develop a profound appreciation for the enduring impact of these theological giants on the Christian tradition.

Prerequisites & Notes

NULL

Credits: 3

THEO 1053 - THEOLOGICA II

This course comprehensively explores the theological transformations that defined the 15th and 16th centuries, examining the diverse perspectives within the Protestant and Catholic traditions and their enduring impact on Christian thought and practice. Through critical analysis of primary texts and historical contexts, students will gain a nuanced understanding of the theological currents that shaped this transformative period.

Prerequisites & Notes

Prerequisite: THEO 1043

Credits: 3

THEO 1063 - SCRIPTURA I

This course provides students with a robust foundation in studying the Old Testament, encouraging critical engagement with the text, its transmission, and the languages in which it was written. Through discussions, hands-on exercises, and critical analyses, students will gain a deep appreciation for the complexities and richness of the Old Testament as a foundational document in the Judeo-Christian tradition.

Prerequisites & Notes

NULL

Credits: 3

THEO 1083 - SCRIPTURA II

This course provides students with a robust foundation in studying the New Testament, encouraging critical engagement with the text, its transmission, and the languages in which it was written. Through discussions, hands-on exercises, and critical analyses, students will gain a deep appreciation for the complexities and richness of the New Testament as a foundational document in the Judeo-Christian tradition.

Prerequisites & Notes

Prerequisite: THEO 1063

Credits: 3

THEO 2023 - PHILOSOPHAE I

This course invites students to critically engage with the intricate relationship between theology and philosophy, tracing the development of Christian thought from its early roots to its contemporary expressions. By examining the philosophical inquiries of these influential thinkers, students will deepen their understanding of the intellectual currents that have shaped the Christian tradition. Students will be encouraged to apply these philosophical insights to contemporary theological issues through discussions and analytical exercises.

Prerequisites & Notes

NULL

Credits: 3

THEO 2043 - PHILOSOPHAE II

This course encourages students to grapple with foundational questions of knowledge and belief from a Classical Christian perspective. Through careful analysis of primary texts, philosophical frameworks, and historical contexts, students will gain a nuanced understanding of how these influential thinkers have contributed to the ongoing conversation about the intersection of faith and reason in Christian epistemology.

Prerequisites & Notes

NULL

Credits: 3

Physics - 6 Credit Hours

PHYS 1004 - ASTRONOMIA

This course considers the history of the heavens and man's study of their motion. Selections from Ptolemy, Copernicus, Galileo, and Kepler are read. Topics include geocentric and heliocentric models, planetary motion, the discovery of moons and other celestial objects, and the laws of planetary motion. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: MATH 1123

Credits: 4

PHYS 1013 - MUSICA

This course delves into the captivating intersection of physics and art with an introductory musicology course, where physics and music appreciation converge. This course is designed for students curious about the underlying physics principles that shape the sonic landscapes we experience.

Credits: 3

Moral Philosophy - 6 Credit Hours

Humanities - 6 Credit Hours

THEO 3163 - APOLOGIA I

This course invites students to navigate the intellectual landscape of Presuppositional Apologetics, equipping them to engage thoughtfully with the foundational presuppositions that underlie Christian belief and apologetic defense. Through the examination of primary texts, theological reflections, and practical applications, students will gain a nuanced understanding of the diverse perspectives within this apologetic tradition and be prepared to critically evaluate its relevance in contemporary contexts.

Prerequisites & Notes

NULL

Credits: 3

THEO 3193 - APOLOGIA II

This course invites students to explore the rich tapestry of Classical Christian Apologetics, providing them with the tools to engage thoughtfully with the intellectual foundations that underlie the defense of Christian belief. Through examining primary texts, theological reflections, and practical applications, students will gain a nuanced understanding of the diverse perspectives within this apologetic tradition and be prepared to critically evaluate its enduring significance in contemporary contexts.

Prerequisites & Notes

Prerequisite: THEO 3163

Credits: 3

CogNatE - 55 Credit Hours

BioLogica - 12 Credit Hours

BIOL 3004 - CELLULAR BIOLOGICA

This course cultivates an understanding of the internal design and organization of eukaryotic cellular and subcellular structures. Attention is paid to the structure and function relationships that govern cellular processes at the molecular level. A survey of organelle and membrane function, cell-cell signaling, cell movement, cell adhesion, the extracellular matrix, Energy and Metabolism, Respiration, and Photosynthesis. This course integrates modeling and experimental dialectic

laboratory experiences.

Prerequisites & Notes

Prerequisite: BIOL 2104

Credits: 4

BIOL 3034 - GENOMICS BIOLOGICA

This course considers genes, genetic variation, and heredity in organisms. Special attention is paid to the genomics of DNA as the molecular basis of heredity. Concentration is placed on the processes of replication, transcription, and translation, forming proteins essential for life. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: CHEM 2104 BioLogica Chemistry II

Credits: 4

BIOL 3104 - SYSTEMS BIOLOGICA

This course explores the design and organization of representative organisms of prokaryotes and eukaryotes. Students will investigate the diversity of structure and physiology of organisms and their interactions within ecosystems and the biome. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: BIOL 3004

Credits: 4

Chemistry - 20 Credit Hours

CHEM 2004 - BIOLOGICA CHEMISTRY I

This course considers matter's composition, structure, and properties, including the electronic structure of atoms, periodic trends, ionic and molecular bonding, and intermolecular forces. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: MATH 2023

Credits: 4

CHEM 2104 - BIOLOGICA CHEMISTRY II

This course considers quantitative principles in chemistry including dimensional analysis, stoichiometry, chemical equations, redox reactions, oxidation numbers, balancing equations, limiting reactants, percent yield, and empirical formulas. Topics

studied include principles of thermochemistry including enthalpy, calorimetry, heat of formation, and Hess's law. Students will also explore gas laws, including Boyle's law, Charles's law, and Avogadro's law; solutions including concentrations, colligative properties, and solubility; equilibrium including Le Chatelier's principle, constants, and reaction rates; and nuclear chemistry including nuclear reactions, radioactive decay, and applications of nuclear energy. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: CHEM 2004

Credits: 4

CHEM 2124 - CRYSTALLOGRAPHICA

This course explores Euclid's Book XIII, delving into the construction of the five regular Platonic solids, and examining Euler's formula. It then shifts to the study of crystals—solids with a regularly repeating arrangement of atoms, ions, or molecules in three dimensions, and highlights the significance of crystal structures in describing organized layouts and enabling applications in X-ray, neutron, and electron diffraction. The course integrates modeling and experimental dialectic laboratory experiences for a comprehensive grasp of crystallography's theoretical and practical aspects.

Prerequisites & Notes

Prerequisite: CHEM 2004

Credits: 4

CHEM 3004 - BIOLOGICA MOLECULAR: ORGANIC

This course considers the organic chemistry study of CHNOPS and halogen compounds; structure, properties, and reactions in covalent bonding. Emphasis is on the chemical composition, formula, and functional group structures of oxygen, nitrogen, and sulfur. These demonstrate the physical and chemical properties and chemical reactivity for synthesizing natural products, drugs, polymers, and organic molecules. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: CHEM 2104

Credits: 4

CHEM 3104 - BIOLOGICA MOLECULAR: BIOCHEMISTRY

This course considers the structures and functions of organisms, tissues, and cells at the molecular level. The course emphasizes the study of biomolecules, such as nucleic acids, lipids, proteins, and carbohydrates, and their significance in cellular processes. Additionally, the course covers topics related to cell signaling, hormones, and the Krebs cycle. Students will explore the different levels of protein structure and learn about enzymes, their catalytic properties, and the factors that influence enzyme activity. The course examines various cellular processes, including cell signaling and the role of hormones in coordinating physiological responses. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: CHEM 3004

Credits: 4

Mathematics - 3 Credit Hours

MATH 2043 - PRECALCULUS

This course builds upon Algebra II and considers: functions (trigonometric, power, polynomial, rational, exponential, logarithmic, logistic, and polar) and transformations; trigonometry (unit circle; trigonometric functions, equations, and graphs; right triangle trigonometry; trigonometric functions and inverses; laws of sines and cosines; trigonometric identities; double and half-angle formulas); Fundamental Theorem of Algebra; conic sections; vectors; complex numbers in trigonometric form; polar equations of conic sections; 3-D coordinate system; The Binomial Theorem; matrix algebra; sequences and series; and limits. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 1173

Credits: 3

Physics - 8 Credit Hours

PHYS 2024 - PHYSICS WITH ALGEBRA I

This course considers Classical Physics built upon Algebra I, which covers the foundational principles of Newtonian mechanics, work, energy, power, mechanical waves, sound, friction, free-body diagrams, and gravitational forces. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: MATH 1163

Credits: 4

PHYS 2044 - PHYSICS WITH ALGEBRA II

This course considers Classical Physics built upon Algebra I, which covers the foundational principles of simple circuits, charge distribution, conduction, induction, electric forces, and electromagnetic forces are investigated. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: PHYS 2024

Credits: 4

Research - 12 Credit Hours

MATH 2003 - STATISTICS

This course is an introduction to statistical problem solving and methodology. Topics include representations of univariate and bivariate data; designed methods for data collection and the role of randomness in statistical studies; probability, statistical distributions, confidence intervals, and hypothesis testing; and statistical estimation and significance. Emphasis will be on conceptual understanding and interpretation of results rather than theoretical development. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 1173

Credits: 3

BIOL 4003 - BIOLOGICA PIDEIA I

This course considers how the practice of BioLogica topics and investigations are inextricably connected with God's intended paideia for His creation. Students will implement this paideia in our lives by connecting these BioLogica topics with Moral PhiloSophae and OrthoDoxia.

Prerequisites & Notes

Prerequisite: CHEM 2104 BioLogica Chemistry II

Credits: 3

BIOL 4123 - BIOLOGICA MODELING I

In this course, students investigate the generation of physical, conceptual, or BioLogica representations of natural phenomena that are difficult to observe directly. Models are used to explain and predict the behavior of real objects or systems and are used in Natural PhiloSophae disciplines.

Prerequisites & Notes

Prerequisite: CHEM 3004

Credits: 3

BIOL 4043 - BIOLOGICA RESEARCH/THESIS I

This course considers some historical and current BioLogica research findings and how they affect our world and lives. In this course, each student will select a BioLogica topic that meaningfully connects to the student's life or world, argue for its interconnected importance, and complete a research project on that topic with the instructor's guidance. Additionally, each student will collaborate with other classmates on a larger group research project.

Prerequisites & Notes

Prerequisite: CHEM 3104

Credits: 3

Bachelor of Arts, Natural PhiloSophae

Bachelor of Arts, Natural PhiloSophae: 4-Year Plan

Total Program Hours - 120 Credit Hours

Foundational Core - 60 Credit Hours

Classica - 12 Credit Hours

LANG 1143 - CLASSICA LATIN I: GRAMMAR & TEXTS

Students will step into the world of classical antiquity with Classica Latin I, an introductory course designed to explore the foundations of classical Latin—the language of the Roman Empire. This course serves as a gateway to understanding ancient Rome's linguistic, literary, and historical legacy. Through a carefully structured curriculum, students will embark on a journey to acquire essential language skills, delve into Roman culture, and unlock the door to the vast literary treasures of Latin literature.

Prerequisites & Notes

NULL

Credits: 3

LANG 1243 - CLASSICA LATIN II: SYNTAX & TEXTS

Students will continue their journey into classical Latin with Classica Latin II: Syntax and Texts. Building upon the foundational knowledge acquired in Classica Latin I, this course takes a deeper dive into the intricacies of Latin syntax, expands students' vocabulary, and introduces them to more complex literary texts. Through rigorous grammar study, textual analysis, and engagement with authentic Latin writings, students will enhance their proficiency in reading, translating, and appreciating the nuances of classical Latin literature.

Prerequisites & Notes

Prerequisite: LANG 1143

Credits: 3

LANG 2253 - CLASSICA LATIN III

Building upon the foundational knowledge acquired in Classica Latin II, this advanced course invites students to embark on a compelling exploration of the linguistic and cultural significance of Roman orators, with a focus on the masterful works of Cicero and Quintilian. This course is designed to further refine students' Latin language skills while delving into the captivating world of Roman oratory and rhetoric. Through an in-depth study of key speeches, rhetorical techniques, and cultural context, students will deepen their appreciation for classical Latin's eloquence and persuasive power.

Prerequisites & Notes

Prerequisite: LANG 1033

Credits: 3

- OR -

LANG 1123 - CLASSICA GREEK I: GRAMMAR & TEXTS

Classica Greek I is an introductory course designed for students eager to explore the foundations of classical Attic Greek, the language of renowned philosophers, playwrights, and historians such as Plato, Sophocles, and Herodotus.

Students will

acquire a solid understanding of the Greek alphabet, essential grammar rules, and a foundational vocabulary. Emphasis will be placed on developing reading and writing skills, focusing on authentic ancient Greek texts. By the end of the course, students will be equipped to read and translate simple passages from classical Greek literature.

Prerequisites & Notes

NULL

Credits: 3

- OR -

LANG 1043 - CLASSICA HEBREW I: GRAMMAR & TEXTS

Students will journey into the world of classical antiquity with Classica Hebrew I: Grammar and Tests, an introductory course meticulously designed to explore the foundations of classical Hebrew—the Hebrew Bible's language, grammar, and texts.

This course is a gateway to understanding the Old Testament's linguistic, literary, and historical richness. Through a carefully structured curriculum, students will embark on a comprehensive exploration of Hebrew, unlocking the key to accessing the sacred texts that have shaped the religious and cultural landscape of the Western world.

Prerequisites & Notes

NULL

Credits: 3

LANG 2353 - CLASSICA LATIN IV

Students will embark on an advanced exploration of Latin literature, focusing on the profound contributions of Roman philosophers and poets. Building upon the foundational knowledge acquired in Classica Latin III, this course aims to further refine their Latin language skills by delving into the captivating linguistic and cultural expressions found in the works of philosophical giants and poetic luminaries of ancient Rome. Through an intensive study of primary texts, linguistic analysis, and cultural context, students will deepen their understanding of the philosophical and poetic traditions that shaped the intellectual landscape of the Roman world.

Prerequisites & Notes

Prerequisite: LANG 2253

Credits: 3

- OR -

LANG 1223 - CLASSICAL GREEK II: SYNTAX & TEXTS

This course builds upon the foundation laid in Classica Greek I and delves deeper into the intricacies of classical Greek language and literature. Classica Greek II is designed for students who have completed the introductory course or possess equivalent proficiency, and it aims to further enhance linguistic skills, broaden vocabulary, and deepen comprehension of complex ancient Greek texts.

Prerequisites & Notes

Prerequisites: LANG 1123

Credits: 3

- OR -

LANG 1203 - CLASSICA HEBREW II: SYNTAX & TEXTS

Building upon the foundational knowledge acquired in Classica Hebre I: Grammar and Texts, this course is designed to take students on a deeper and more enriching exploration of the intricacies of Hebrew syntax, expand their vocabulary, and introduce them to more complex literary texts from the Hebrew Bible. This advanced course employs a comprehensive approach that combines rigorous grammar study, textual analysis, and engagement with authentic Hebrew writings. Through these methods, students will enhance their proficiency in reading, translating, and approaching the nuanced beauty of biblical Hebrew literature.

Prerequisites & Notes

Prerequisite: LANG 1043

Credits: 3

English - 6 Credit Hours

ENGL 1103 - RHETORICA

This course invites students to engage deeply with the art of classical rhetoric, providing them with the tools to analyze, practice, and appreciate the enduring principles of persuasive communication. Through discussions, practical exercises, and real-world applications, students will develop the confidence and skill set necessary to communicate persuasively in various personal, academic, and professional contexts.

Credits: 3

ENGL 2023 - LITERATURA

This course provides students with a unique opportunity to delve into the profound depths of a singular masterpiece, fostering a rich appreciation for the Western Canon and its enduring contributions to human thought and expression. Through scholarly inquiry, critical discussion, and creative engagement, participants will comprehensively understand the chosen work and its role within the broader context of the Western literary and intellectual tradition.

Prerequisites & Notes

NULL

Credits: 3

MatheMatica - 18 Credit Hours

MATH 1083 - ARITHMETICA THEORY

The focus of this course is understanding number theory. Students will learn how and why arithmetical properties and operations work, recognizing and applying the beautiful axiom systems upon which mathematics is built. Beyond addressing simple calculations, this course investigates how and why arithmetic works. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

NULL

Credits: 3

MATH 1093 - LOGICA

This course serves as an introduction to classical logic, a foundational branch of mathematics, within the framework of the Christian worldview. It explores the principles governing valid reasoning and argumentation. The primary focus is on propositional and first-order logic, providing students with a rigorous framework for analyzing and constructing logical arguments. Topics include propositional logic, first-order logic, proof theory, model theory, predicate calculus, and metalogic.

Prerequisites & Notes

NULL

Credits: 3

MATH 1123 - EUCLIDEAN GEOMETRIA I

In this course, students will investigate plane geometry through several perspectives, including synthetic, metric, analytic, and locus geometry. Each is guided by logic within axiom systems. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

NULL

Credits: 3

MATH 1153 - EUCLIDEAN GEOMETRIA II

This course builds upon Geometry I through plane synthetic, metric, analytic, and locus geometries; 3-dimensional geometry; and brief introductions to neutral and non-Euclidean geometries. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 1123

Credits: 3

MATH 1163 - ALGEBRA I

This course considers real and complex numbers and operations, the Cartesian coordinate system, transformations of rigid figures, linear equations and inequalities, relations and functions, direct and indirect variation, polynomials, rational functions, and data analysis and probability. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

NULL

Credits: 3

MATH 1173 - ALGEBRA II

This course builds upon Algebra I and considers functions and their inverses, quadratic functions, sequences and series, systems of equations and inequalities, polynomials and operations, the Fundamental Theorem of Algebra, radical

function, exponential and logarithmic functions, and transformations of functions. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 1163

Credits: 3

OrthoDoxia - 18 Credit Hours

THEO 1043 - THEOLOGICA I

This course invites students to engage deeply with primary texts, historical contexts, and theological debates, fostering a nuanced understanding of the diverse intellectual currents that shaped early Christian theology. Through critical analysis and thoughtful discussion, students will develop a profound appreciation for the enduring impact of these theological giants on the Christian tradition.

Prerequisites & Notes

NULL

Credits: 3

THEO 1053 - THEOLOGICA II

This course comprehensively explores the theological transformations that defined the 15th and 16th centuries, examining the diverse perspectives within the Protestant and Catholic traditions and their enduring impact on Christian thought and practice. Through critical analysis of primary texts and historical contexts, students will gain a nuanced understanding of the theological currents that shaped this transformative period.

Prerequisites & Notes

Prerequisite: THEO 1043

Credits: 3

THEO 1063 - SCRIPTURA I

This course provides students with a robust foundation in studying the Old Testament, encouraging critical engagement with the text, its transmission, and the languages in which it was written. Through discussions, hands-on exercises, and critical analyses, students will gain a deep appreciation for the complexities and richness of the Old Testament as a foundational document in the Judeo-Christian tradition.

Prerequisites & Notes

NULL

Credits: 3

THEO 1083 - SCRIPTURA II

This course provides students with a robust foundation in studying the New Testament, encouraging critical engagement with the text, its transmission, and the languages in which it was written. Through discussions, hands-on exercises, and critical analyses, students will gain a deep appreciation for the complexities and richness of the New

Testament as a foundational document in the Judeo-Christian tradition.

Prerequisites & Notes

Prerequisite: THEO 1063

Credits: 3

THEO 2023 - PHILOSOPHAE I

This course invites students to critically engage with the intricate relationship between theology and philosophy, tracing the development of Christian thought from its early roots to its contemporary expressions. By examining the philosophical inquiries of these influential thinkers, students will deepen their understanding of the intellectual currents that have shaped the Christian tradition. Students will be encouraged to apply these philosophical insights to contemporary theological issues through discussions and analytical exercises.

Prerequisites & Notes

NULL

Credits: 3

THEO 2043 - PHILOSOPHAE II

This course encourages students to grapple with foundational questions of knowledge and belief from a Classical Christian perspective. Through careful analysis of primary texts, philosophical frameworks, and historical contexts, students will gain a nuanced understanding of how these influential thinkers have contributed to the ongoing conversation about the intersection of faith and reason in Christian epistemology.

Prerequisites & Notes

NULL

Credits: 3

Physics - 6 Credit Hours

PHYS 1013 - MUSICA

This course delves into the captivating intersection of physics and art with an introductory musicology course, where physics and music appreciation converge. This course is designed for students curious about the underlying physics principles that shape the sonic landscapes we experience.

Credits: 3

PHYS 1004 - ASTRONOMIA

This course considers the history of the heavens and man's study of their motion. Selections from Ptolemy, Copernicus, Galileo, and Kepler are read. Topics include geocentric and heliocentric models, planetary motion, the discovery of moons and other celestial objects, and the laws of planetary motion. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: MATH 1123

Credits: 4

Moral Philosophy - 6 Credit Hours

Humanities - 6 Credit Hours

THEO 3163 - APOLOGIA I

This course invites students to navigate the intellectual landscape of Presuppositional Apologetics, equipping them to engage thoughtfully with the foundational presuppositions that underlie Christian belief and apologetic defense.

Through the

examination of primary texts, theological reflections, and practical applications, students will gain a nuanced understanding of the diverse perspectives within this apologetic tradition and be prepared to critically evaluate its relevance in contemporary contexts.

Prerequisites & Notes

NULL

Credits: 3

THEO 3193 - APOLOGIA II

This course invites students to explore the rich tapestry of Classical Christian Apologetics, providing them with the tools to engage thoughtfully with the intellectual foundations that underlie the defense of Christian belief. Through examining primary

texts, theological reflections, and practical applications, students will gain a nuanced understanding of the diverse perspectives within this apologetic tradition and be prepared to critically evaluate its enduring significance in contemporary contexts.

Prerequisites & Notes

Prerequisite: THEO 3163

Credits: 3

CogNatE - 54 Credit Hours

BioLogica - 8 Credit Hours

BIOL 2004 - GENERAL BIOLOGICA I

This course cultivates an understanding of the internal design and organization of eukaryotic cellular and subcellular structures. Attention is paid to the structure and function relationships that govern cellular processes at the molecular level. Topics

include organelle and membrane function, cell-cell signaling, cell movement, cell adhesion, the extracellular matrix, energy and metabolism, respiration, and photosynthesis. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisite: MATH 1063 Algebra I

Prerequisites & Notes

Prerequisite: MATH 1163

Credits: 4

BIOL 2104 - GENERAL BIOLOGICA II

This course explores the design and organization of representative organisms of prokaryotes and eukaryotes. Students will investigate the diversity of structure and physiology of organisms and their interactions within ecosystems and the biome. This

course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: BIOL 2004

Credits: 4

Chemistry - 12 Credit Hours

CHEM 2004 - BIOLOGICA CHEMISTRY I

This course considers matter's composition, structure, and properties, including the electronic structure of atoms, periodic trends, ionic and molecular bonding, and intermolecular forces. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: MATH 2023

Credits: 4

CHEM 2104 - BIOLOGICA CHEMISTRY II

This course considers quantitative principles in chemistry including dimensional analysis, stoichiometry, chemical equations, redox reactions, oxidation numbers, balancing equations, limiting reactants, percent yield, and empirical formulas. Topics

studied include principles of thermochemistry including enthalpy, calorimetry, heat of formation, and Hess's law.

Students will also explore gas laws, including Boyle's law, Charles's law, and Avogadro's law; solutions including concentrations, colligative

properties, and solubility; equilibrium including Le Chatelier's principle, constants, and reaction rates; and nuclear chemistry including nuclear reactions, radioactive decay, and applications of nuclear energy. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: CHEM 2004

Credits: 4

CHEM 2124 - CRYSTALLOGRAPHICA

This course explores Euclid's Book XIII, delving into the construction of the five regular Platonic solids, and examining Euler's formula. It then shifts to the study of crystals—solids with a regularly repeating arrangement of atoms, ions, or molecules in three dimensions, and highlights the significance of crystal structures in describing organized layouts and enabling applications in X-ray, neutron, and electron diffraction. The course integrates modeling and experimental laboratory experiences for a comprehensive grasp of crystallography's theoretical and practical aspects.

Prerequisites & Notes

MatheMatica - 3 Credit Hours

MATH 2043 - PRECALCULUS

This course builds upon Algebra II and considers: functions (trigonometric, power, polynomial, rational, exponential, logarithmic, logistic, and polar) and transformations; trigonometry (unit circle; trigonometric functions, equations, and graphs; right triangle trigonometry; trigonometric functions and inverses; laws of sines and cosines; trigonometric identities; double and half-angle formulas); Fundamental Theorem of Algebra; conic sections; vectors; complex numbers in trigonometric form; polar equations of conic sections; 3-D coordinate system; The Binomial Theorem; matrix algebra; sequences and series; and limits. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 1173

Credits: 3

Natural Philospphae

- NPHI ELECTIVE Credit: 3

NPHI 2044 - GEOGRAPHICA

This course is an introduction to the basic concepts of Physiography and Geomorphology or the study of landforms, to understand the forces shaping and altering the primary relief elements of the terrestrial surface, including tectonic activity, surficial earth movements, weathering, erosion, and deposition caused by wind, glacial ice, and streams. This course integrates modeling and experimental laboratory experiences.

Prerequisites & Notes

NULL

Credits: 4

Physics - 12 Credit Hours

PHYS 2024 - PHYSICS WITH ALGEBRA I

This course considers Classical Physics built upon Algebra I, which covers the foundational principles of Newtonian mechanics, work, energy, power, mechanical waves, sound, friction, free-body diagrams, and gravitational forces. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: MATH 1163

Credits: 4

PHYS 2044 - PHYSICS WITH ALGEBRA II

This course considers Classical Physics built upon Algebra I, which covers the foundational principles of simple circuits, charge distribution, conduction, induction, electric forces, and electromagnetic forces are investigated. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: PHYS 2024

Credits: 4

PHYS 3004 - ASTRONOMIA WITH RELATIVITY

This course considers the fascinating realms of astronomy, the revolutionary concepts of Einstein's theory of gravitation, and the principles of special and general relativity, including the nature of space-time, the concept of gravitational waves, and the impact of massive objects on the curvature of space. Special attention is given to the mathematical frameworks that underpin these theories, equipping students with the tools necessary to analyze and solve problems related to relativity. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: PHYS 1004

Credits: 4

Research - 12 Credit Hours

MATH 2003 - STATISTICS

This course is an introduction to statistical problem solving and methodology. Topics include representations of univariate and bivariate data; designed methods for data collection and the role of randomness in statistical studies; probability, statistical distributions, confidence intervals, and hypothesis testing; and statistical estimation and significance. Emphasis will be on conceptual understanding and interpretation of results rather than theoretical development. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 1173

Credits: 3

CHEM 4113 - CHEMISTRY PAIDEIA I

This course considers how the practice of chemistry topics and investigations are inextricably connected with God's intended paideia for His creation. Students will implement this paideia by connecting these chemistry topics with Moral PhiloSophae and OrthoDoxia.

Prerequisites & Notes

Prerequisite: CHEM 3004

Credits: 3

CHEM 4123 - CHEMISTRY MODELING I

In this course, students will investigate the generation of physical, conceptual, or chemistry representations of a natural phenomenon that are difficult to observe directly. Models are used to explain and predict the behavior of real objects or systems and are used in Natural PhiloSophae disciplines.

Prerequisites & Notes

Prerequisite: CHEM 3004

Credits: 3

CHEM 4143 - CHEMISTRY RESEARCH/THESIS I

This course considers historical and current chemistry research findings and how they affect our world and lives. In this course, each student will select a chemistry topic that meaningfully connects to the student's life or world, argue for its interconnected importance, and complete a research project on that topic with the instructor's guidance. Additionally, each student will collaborate with some classmates on a larger group research project.

Prerequisites & Notes

LANG 2253 - CLASSICA LATIN III

Building upon the foundational knowledge acquired in Classica Latin II, this advanced course invites students to embark on a compelling exploration of the linguistic and cultural significance of Roman orators, with a focus on the masterful works of Cicero and Quintilian. This course is designed to further refine students' Latin language skills while delving into the captivating world of Roman oratory and rhetoric. Through an in-depth study of key speeches, rhetorical techniques, and cultural context, students will deepen their appreciation for classical Latin's eloquence and persuasive power.

Prerequisites & Notes

Prerequisite: LANG 1033

Credits: 3

- OR -

LANG 1123 - CLASSICA GREEK I: GRAMMAR & TEXTS

Classica Greek I is an introductory course designed for students eager to explore the foundations of classical Attic Greek, the language of renowned philosophers, playwrights, and historians such as Plato, Sophocles, and Herodotus. Students will acquire a solid understanding of the Greek alphabet, essential grammar rules, and a foundational vocabulary. Emphasis will be placed on developing reading and writing skills, focusing on authentic ancient Greek texts. By the end of the course, students will be equipped to read and translate simple passages from classical Greek literature.

Prerequisites & Notes

NULL

Credits: 3

- OR -

LANG 1043 - CLASSICA HEBREW I: GRAMMAR & TEXTS

Students will journey into the world of classical antiquity with Classica Hebrew I: Grammar and Tests, an introductory course meticulously designed to explore the foundations of classical Hebrew—the Hebrew Bible's language, grammar, and texts.

This course is a gateway to understanding the Old Testament's linguistic, literary, and historical richness. Through a carefully structured curriculum, students will embark on a comprehensive exploration of Hebrew, unlocking the key to accessing the sacred texts that have shaped the religious and cultural landscape of the Western world.

Prerequisites & Notes

NULL

Credits: 3

LANG 2353 - CLASSICA LATIN IV

Students will embark on an advanced exploration of Latin literature, focusing on the profound contributions of Roman philosophers and poets. Building upon the foundational knowledge acquired in Classica Latin III, this course aims to further refine their Latin language skills by delving into the captivating linguistic and cultural expressions found in the works of philosophical giants and poetic luminaries of ancient Rome. Through an intensive study of primary texts, linguistic analysis, and cultural context, students will deepen their understanding of the philosophical and poetic traditions that shaped the intellectual landscape of the Roman world.

Prerequisites & Notes

Prerequisite: LANG 2253

Credits: 3

- OR -

LANG 1223 - CLASSICAL GREEK II: SYNTAX & TEXTS

This course builds upon the foundation laid in Classica Greek I and delves deeper into the intricacies of classical Greek language and literature. Classica Greek II is designed for students who have completed the introductory course or possess equivalent proficiency, and it aims to further enhance linguistic skills, broaden vocabulary, and deepen comprehension of complex ancient Greek texts.

Prerequisites & Notes

Prerequisites: LANG 1123

Credits: 3

- OR -

LANG 1203 - CLASSICA HEBREW II: SYNTAX & TEXTS

Building upon the foundational knowledge acquired in Classica Hebrew I: Grammar and Texts, this course is designed to take students on a deeper and more enriching exploration of the intricacies of Hebrew syntax, expand their vocabulary, and introduce them to more complex literary texts from the Hebrew Bible. This advanced course employs a comprehensive approach that combines rigorous grammar study, textual analysis, and engagement with authentic

Hebrew writings, Through these methods, students will enhance their proficiency in reading, translating, and approaching the nuanced beauty of biblical Hebrew literature.

Prerequisites & Notes

Prerequisite:LANG 1043

Credits: 3

English - 6 Credit Hours

ENGL 1103 - RHETORICA

This course invites students to engage deeply with the art of classical rhetoric, providing them with the tools to analyze, practice, and appreciate the enduring principles of persuasive communication. Through discussions, practical exercises, and real-world applications, students will develop the confidence and skill set necessary to communicate persuasively in various personal, academic, and professional contexts.

Credits: 3

ENGL 2023 - LITERATURA

This course provides students with a unique opportunity to delve into the profound depths of a singular masterpiece, fostering a rich appreciation for the Western Canon and its enduring contributions to human thought and expression. Through scholarly inquiry, critical discussion, and creative engagement, participants will comprehensively understand the chosen work and its role within the broader context of the Western literary and intellectual tradition.

Prerequisites & Notes

NULL

Credits: 3

MatheMatica - 18 Credit Hours

MATH 1083 - ARITHMETICA THEORY

The focus of this course is understanding number theory. Students will learn how and why arithmetical properties and operations work, recognizing and applying the beautiful axiom systems upon which mathematics is built. Beyond addressing simple calculations, this course investigates how and why arithmetic works. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

NULL

Credits: 3

MATH 1093 - LOGICA

This course serves as an introduction to classical logic, a foundational branch of mathematics, within the framework of the Christian worldview. It explores the principles governing valid reasoning and argumentation. The primary focus is on propositional and first-order logic, providing students with a rigorous framework for analyzing and constructing

logical arguments. Topics include propositional logic, first-order logic, proof theory, model theory, predicate calculus, and metalogic.

Prerequisites & Notes

NULL

Credits: 3

MATH 1123 - EUCLIDEAN GEOMETRIA I

In this course, students will investigate plane geometry through several perspectives, including synthetic, metric, analytic, and locus geometry. Each is guided by logic within axiom systems. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

NULL

Credits: 3

MATH 1153 - EUCLIDEAN GEOMETRIA II

This course builds upon Geometry I through plane synthetic, metric, analytic, and locus geometries; 3-dimensional geometry; and brief introductions to neutral and non-Euclidean geometries. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 1123

Credits: 3

MATH 1163 - ALGEBRA I

This course considers real and complex numbers and operations, the Cartesian coordinate system, transformations of rigid figures, linear equations and inequalities, relations and functions, direct and indirect variation, polynomials, rational functions, and data analysis and probability. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

NULL

Credits: 3

MATH 1173 - ALGEBRA II

This course builds upon Algebra I and considers functions and their inverses, quadratic functions, sequences and series, systems of equations and inequalities, polynomials and operations, the Fundamental Theorem of Algebra, radical function, exponential and logarithmic functions, and transformations of functions. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 1163

Credits: 3

OrthoDoxia - 18 Credit Hours

THEO 1043 - THEOLOGICA I

This course invites students to engage deeply with primary texts, historical contexts, and theological debates, fostering a nuanced understanding of the diverse intellectual currents that shaped early Christian theology. Through critical analysis and thoughtful discussion, students will develop a profound appreciation for the enduring impact of these theological giants on the Christian tradition.

Prerequisites & Notes

NULL

Credits: 3

THEO 1053 - THEOLOGICA II

This course comprehensively explores the theological transformations that defined the 15th and 16th centuries, examining the diverse perspectives within the Protestant and Catholic traditions and their enduring impact on Christian thought and practice. Through critical analysis of primary texts and historical contexts, students will gain a nuanced understanding of the theological currents that shaped this transformative period.

Prerequisites & Notes

Prerequisite: THEO 1043

Credits: 3

THEO 1063 - SCRIPTURA I

This course provides students with a robust foundation in studying the Old Testament, encouraging critical engagement with the text, its transmission, and the languages in which it was written. Through discussions, hands-on exercises, and critical analyses, students will gain a deep appreciation for the complexities and richness of the Old Testament as a foundational document in the Judeo-Christian tradition.

Prerequisites & Notes

NULL

Credits: 3

THEO 1083 - SCRIPTURA II

This course provides students with a robust foundation in studying the New Testament, encouraging critical engagement with the text, its transmission, and the languages in which it was written. Through discussions, hands-on exercises, and critical analyses, students will gain a deep appreciation for the complexities and richness of the New Testament as a foundational document in the Judeo-Christian tradition.

Prerequisites & Notes

Prerequisite: THEO 1063

Credits: 3

THEO 2023 - PHILOSOPHAE I

This course invites students to critically engage with the intricate relationship between theology and philosophy, tracing the development of Christian thought from its early roots to its contemporary expressions. By examining the philosophical inquiries of these influential thinkers, students will deepen their understanding of the intellectual currents that have shaped the Christian tradition. Students will be encouraged to apply these philosophical insights to contemporary theological issues through discussions and analytical exercises.

Prerequisites & Notes

NULL

Credits: 3

THEO 2043 - PHILOSOPHAE II

This course encourages students to grapple with foundational questions of knowledge and belief from a Classical Christian perspective. Through careful analysis of primary texts, philosophical frameworks, and historical contexts, students will gain a nuanced understanding of how these influential thinkers have contributed to the ongoing conversation about the intersection of faith and reason in Christian epistemology.

Prerequisites & Notes

NULL

Credits: 3

Physics - 6 Credit Hours

PHYS 1004 - ASTRONOMIA

This course considers the history of the heavens and man's study of their motion. Selections from Ptolemy, Copernicus, Galileo, and Kepler are read. Topics include geocentric and heliocentric models, planetary motion, the discovery of moons and other celestial objects, and the laws of planetary motion. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: MATH 1123

Credits: 4

PHYS 1013 - MUSICA

This course delves into the captivating intersection of physics and art with an introductory musicology course, where physics and music appreciation converge. This course is designed for students curious about the underlying physics principles that shape the sonic landscapes we experience.

Credits: 3

Moral Philosophy - 6 Credit Hours

Humanities - 6 Credit Hours

THEO 3163 - APOLOGIA I

This course invites students to navigate the intellectual landscape of Presuppositional Apologetics, equipping them to engage thoughtfully with the foundational presuppositions that underlie Christian belief and apologetic defense.

Through the

examination of primary texts, theological reflections, and practical applications, students will gain a nuanced understanding of the diverse perspectives within this apologetic tradition and be prepared to critically evaluate its relevance in contemporary contexts.

Prerequisites & Notes

NULL

Credits: 3

THEO 3193 - APOLOGIA II

This course invites students to explore the rich tapestry of Classical Christian Apologetics, providing them with the tools to engage thoughtfully with the intellectual foundations that underlie the defense of Christian belief. Through examining primary

texts, theological reflections, and practical applications, students will gain a nuanced understanding of the diverse perspectives within this apologetic tradition and be prepared to critically evaluate its enduring significance in contemporary contexts.

Prerequisites & Notes

Prerequisite: THEO 3163

Credits: 3

CogNatE - 54 Credit Hours

MatheMatica - 27 Credit Hours

- MATH ELECTIVE Credits: 3

MATH 2043 - PRECALCULUS

This course builds upon Algebra II and considers: functions (trigonometric, power, polynomial, rational, exponential, logarithmic, logistic, and polar) and transformations; trigonometry (unit circle; trigonometric functions, equations, and graphs; right triangle trigonometry; trigonometric functions and inverses; laws of sines and cosines; trigonometric identities; double and half-angle formulas); Fundamental Theorem of Algebra; conic sections; vectors; complex numbers in trigonometric form; polar equations of conic sections; 3-D coordinate system; The Binomial Theorem; matrix algebra; sequences and series; and limits. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 1173

Credits: 3

MATH 2053 - MATHEMATICA PROOF

This course investigates methods of mathematical proof. Formal proof topics include propositional calculus, predicate calculus, and several first-order theories. Informal proof topics are drawn from number theory, set theory, and other areas of mathematics. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 2043

Credits: 3

MATH 3003 - CALCULUS I

This course investigates limits, continuity, differentiation, applications of the derivative, the differential, the definite integral, the fundamental theorem, and applications of the definite integral. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 2043

Credits: 4

MATH 3023 - CALCULUS II

This course builds upon Calculus I and investigates logarithmic and exponential functions, circular functions and their inverses, techniques of integration, improper integrals, infinite series, Taylor polynomials, and power series. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 3003

Credits: 4

MATH 3043 - CALCULUS III

This course builds upon Calculus II and investigates parametric equations, vectors, vector-valued functions, functions of several variables, double and triple integrals, and vector analysis. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 3023

Credits: 4

MATH 4003 - REAL ANALYSIS

This course investigates the treatment of the calculus of functions of real variables, including sequences, limits of functions, continuity, and differentiation. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 3003

Credits: 3

- OR -

MATH 4023 - ALGEBRAIC STRUCTURES

This course considers equivalence relations, groups, subgroups, homomorphisms, isomorphisms, and a survey of other algebraic structures such as rings, integral domains, and fields. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 3023

Credits: 3

MATH 4043 - PROBABILITY

The course includes an introduction to discrete probabilities and related applications and problem solving from the fundamentals of probability. Problem topics include general probability, random variables for univariate and multivariate distributions, independence, conditional probability, continuous and discrete distributions, and various named distributions, including the normal distribution, moments from univariate and multivariate distributions, and probability and moment-generating functions. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 3003

Credits: 3

- OR -

MATH 4053 - NUMBER THEORY

This is an introduction to elementary number theory. Possible topics include primes, congruences, quadratic reciprocity, Diophantine equations, irrational numbers, continued fractions, partitions, the Euclidean Algorithm, Fibonacci numbers, the golden ratio, modular arithmetic, Fermat's Little Theorem, RSA public key cryptography, Gaussian integers, and others. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 3003

Credits: 3

Natural Philosophae - 3 Credit Hours

- NPHI Elective Credits: 3

Physics - 12 Credit Hours

PHYS 3004 - ASTRONOMIA WITH RELATIVITY

This course considers the fascinating realms of astronomy, the revolutionary concepts of Einstein's theory of gravitation, and the principles of special and general relativity, including the nature of space-time, the concept of gravitational waves, and the impact of massive objects on the curvature of space. Special attention is given to the mathematical frameworks that underpin these theories, equipping students with the tools necessary to analyze and solve problems related to relativity. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: PHYS 1004

Credits: 4

PHYS 3024 - PHYSICS WITH CALCULUS I

This course considers Classical Physics built upon Calculus that covers the foundational principles of Newtonian mechanics, work, energy, power, mechanical waves, sound, friction, free-body diagrams, and gravitational forces are investigated. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: MATH 3003

Credits: 4

PHYS 3044 - PHYSICS WITH CALCULUS II

This course considers Classical Physics built upon Calculus that covers the foundational principles of simple circuits, charge distribution, conduction, induction, electric forces, and electromagnetic forces are investigated. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: PHYS 3024

Credits: 4

Research - 12 Credit Hours

MATH 2003 - STATISTICS

This course is an introduction to statistical problem solving and methodology. Topics include representations of univariate and bivariate data; designed methods for data collection and the role of randomness in statistical studies; probability, statistical distributions, confidence intervals, and hypothesis testing; and statistical estimation and significance. Emphasis will be on conceptual understanding and interpretation of results rather than theoretical development. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 1173

Credits: 3

MATH 4103 - MATHEMATICA PAIDEIA I

This course considers how the practice of Mathematica topics and investigations are inextricably connected with God's intended paideia for His creation. Students will implement this paideia in their lives and connect these Mathematica topics with Moral Philosophy and Orthodoxy.

Prerequisites & Notes

Prerequisite: MATH 2043

Credits: 3

MATH 4013 - MATHEMATICA MODELING I

This course will investigate the generation of physical, conceptual, or Mathematica representations of natural phenomena that are difficult to observe directly. Models are used to explain and predict the behavior of natural objects or systems and are used in Mathematica disciplines.

Prerequisites & Notes

Prerequisite: MATH 3003

Credits: 3

MATH 4083 - MATHEMATICA RESEARCH/THESIS I

This course considers historical and current Mathematica research findings and how they affect our world and lives. In this course, each student will select a Mathematica topic that connects to the student's life or world, argue for its interconnected importance, and complete a research project on that topic with the instructor's guidance. Additionally, each student will collaborate with some classmates on a larger group research project.

Prerequisites & Notes

Prerequisite: MATH 3023

Credits: 3

Site-Based (Partnership)

Associate of Arts, General Studies (CC+ Site-based) 2-Year Plan

*Classical Conversation and Dual Enrollment Only

Year One

First Semester - 16 Credit Hours

ENGL 1133 - ENGLISH COMPOSITION I

Study and practice in the critical reading and effective writing of expository prose, with an emphasis on fluency and style.

Credits: 3

BIOT 1433 - THE OLD TESTAMENT INTERPRETATION

The course serves as an introduction to Old Testament interpretation. It provides an elemental framework for interpreting the Old Testament by exploring its ancient Near Eastern contexts; discussing literary, thematic, and theological constructs; and demonstrating how it informs Christian thought and practice.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Behavioral Science Elective (select one):

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

PSYC 1233 - PERSONAL AND SOCIAL ADJUSTMENT

This course is an introduction to human adjustments and the resulting forms of behavior. Emphasis is placed on the fundamental principles underlying normal behavior. This course helps students apply mental health principles to everyday living.

Prerequisites & Notes

NULL

Credits: 3

Second Semester - 15 Credit Hours

ENGL 1233 - ENGLISH COMPOSITION II

This course includes study and practice in the critical reading and effective writing of argumentative and expository prose, with an emphasis on the documented paper. A research paper is required.

Prerequisites & Notes

ENGL 1133

Credits: 3

BINT 1533 - THE NEW TESTAMENT INTERPRETATION

This course serves as an introduction to the New Testament in the context of its first century environments. The course examines the teachings and interpretations of the New Testament as well as the role of the Scriptures in the Church.

Prerequisites & Notes

NULL

Credits: 3

HUMS 2203 - DRAMATIC INTERP OF ANCIENT LITERATU

Dramatic interpretation of Homer's Odyssey, Virgil's Aeneid, and Sophocles' Oedipus Rex. Students read and analyze ancient masterworks and then practice the rhetorical canons of memoria and delivery to present dramatic interpretations both individually and in groups. Creative presentations of themes from ancient literature provide additional opportunity to practice extemporaneous speaking and delivery of ancient texts in oral form.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Math Elective (select one):

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1223 - QUANTITATIVE REASONING

This course emphasizes quantitative reasoning skills and is designed to prepare students to think critically about the world they live in. Applications in consumer education, civic engagement, and personal finance will be presented. Topics include logic, probability, statistics, exponential growth, and data analysis.

Prerequisites & Notes

NULL

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1323 - EXPLORATION IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. Possible topics for this course are set theory, elementary number theory, history of mathematics, numbers and number systems, financial mathematics, systems of equations, and matrices.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Year Two

First Semester - 16 Credit Hours

CHEM 1214 - INTRO TO CHEMISTRY (LECTURE & LAB)

This course is an introduction to basic concepts of general chemistry, introduction of periodic properties of elements and compounds, basic atomic-molecular structure, and properties of substances and reactions related to gas laws. This course includes study of course topics and laboratory experiments.

Prerequisites & Notes

NULL

Credits: 4

THEO 2123 - CHRISTIAN THOUGHT AND PRACTICE

This course surveys the history of Christian thought and practices. Doctrinal topics introduced in the course include the doctrines of God, Jesus Christ, the Holy Spirit, humanity, salvation, the church, scripture, and last things. The course explores the application of Christian practices and spiritual disciplines such as prayer, communion, baptism, and social responsibility to the students' community.

Prerequisites & Notes

NULL

Credits: 3

ENGL 2303 - GREEK AND ROMAN LITERATURE

Examination of Hesiod's Theogony, Homer's Iliad, and other masterworks of Greek and Roman literature. Origins, genealogies, and mythologies of Greek gods are charted and examined in relation to literature and culture of the period. Students will focus on the foundations of Western civilization in relation to human virtue, leadership, and worldview.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Second Semester - 15 Credit Hours

THEO 3123 - INTRODUCTION OF ETHICS

This course examines the philosophical and theological principles and issues related to ethics. It addresses meta-ethical questions about the relationship between moral language and concepts and various metaphysical and post-metaphysical views; normative ethical theories; theological structures and implications of ethics; and contemporary ethical issues.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Social Science Elective (select one):

SSCI 2033 - HUMANS IN SOCIETY

This course introduces the student to the multidisciplinary field of social science by exploring the social theories, phenomena, institutions, and forces that shape society. Emphasis is placed on exploring the existence and perpetuation of social problems as a means of introducing the social sciences and applying critical thinking skills to these diverse issues.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2233 - MARRIAGE AND FAMILY

This course is a study of the major issues related to courtship, marriage, and family formation. Special attention is given to the social conditions influencing courtship, marriage, divorce, and family life. Topics include dating rituals, gender differences, expectations, parenting, family dysfunction, family violence, and strategies for sound relating. The role of family counselors and therapists is also discussed.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

BBUS 2203 - MICROECONOMICS

This survey course develops the concepts of individual economic units, such as households, firms, and industries. In this study, topics will include economic behaviors relating to spending, saving, investment, labor economics, and prices.

Prerequisites & Notes

BBUS 2103

Credits: 3

History Elective (select one):

HIST 1013 - WESTERN CIVILIZATION TO THE 16TH CENTURY

A survey of the history of western civilization from pre-history to the early modern era. Topics include ancient Greece, Rome, Christian institutions of the Middle Ages, and the emergence of the national monarchies in western Europe.

Prerequisites & Notes

NULL

Credits: 3

HIST 1023 - WESTERN CIVILIZATION-17TH CENTURY TO PRESENT

A survey of the history of western civilization from the early modern era to the present. Topics include the Enlightenment, the French Revolution, the Industrial Revolution, World Wars I and II, the Cold War, and present issues.

Prerequisites & Notes

NULL

Credits: 3

HIST 2013 - AMERICAN HISTORY TO 1877

A survey of American history from discovery to 1877. Topics include the colonial period, the revolutionary era, the Constitution, Jeffersonianism, economic and territorial expansion, sectional tensions, the Civil War, and Reconstruction.

Prerequisites & Notes

NULL

Credits: 3

HIST 2023 - AMERICAN HISTORY 1877 TO THE PRESENT

A survey of American history from 1877 to the present. Topics include the New South, the New West, foreign affairs, industrialization, the Progressive Era, the World Wars, the Depression, the Cold War, and present issues.

Prerequisites & Notes

NULL

Credits: 3

PPOL 2433 - UNITED STATES & NEVADA CONSTITUT

This course is a study of the legal culture in the United States, including the British common law system, origins of the U.S. and State of Nevada Constitutions, amendments, and landmark cases. This course is required to be taken by Las Vegas, NV extension site students only.

Prerequisites & Notes

NULL

Credits: 3

*Required for Nevada students.

Total Program Hours - 62 Credit Hours

NOTE: It is the responsibility of the student to read, review, and fulfill the requirements and total hours of this degree audit for their applicable degree.

Other Programs

Associate of Arts, Humanities: Great Books English- 2 Year Plan

YEAR ONE

Spring Semester - 15 Credit Hours

BIBL 1203 - SACRED SCRIPTURE: NEW TESTAMENT

This course studies the images and themes of the New Testament as revealed literature that has been the single most fruitful source for knowledge of things human and divine. On the basis of a careful reading and following a literary and theological methodology, the Bible is studied for its historical, moral, and theological significance.

Prerequisites & Notes

EDI Global only

Credits: 3

ENGL 1123 - ENGLISH COMPOSITION II

This course builds upon the foundation developed in English Composition 1. Students will further develop their ability to read deeply and ask probing questions of a text while learning to compose expository and persuasive essays. This course is equivalent to ENGL 1233.

Prerequisites & Notes

EDI only

Credits: 3

SSCI 2113 - SOCIOLOGY

A critical examination of modern social and behavioral theorists, with particular emphasis on their methodological approaches. This course focuses on the founders of modern sociological and psychological theory but also includes contemporary thinkers. Texts for this course address both intrapersonal and interpersonal dynamics, exploring the nature of the person in himself and in his relation to others.

Prerequisites & Notes

EDI Global only.

Credits: 3

PHIL 1003 - INTRO TO PHILOSOPHICAL THOUGHT

This course introduces students to the foundational concepts and issues in Western philosophy. Students will explore the development of philosophical thought, learn basic logic skills, and engage with the core questions that have shaped human understanding and inquiry. The course aims to provide a comprehensive overview of the major philosophers: Socrates, Plato and Aristotle. The student will gain an understanding of the questions, and the answers offered by these philosophers throughout history.

Prerequisites & Notes

EDI Global only

Credits: 3

Divine Design - 3 Credit Hours

Fall Semester - 15 Credit Hours

BIBL 1003 - SACRED SCRIPTURE (OLD TESTAMENT)

This course studies the images and themes of the Old Testament as revealed literature that has been the single most fruitful source for knowledge of things human and divine. On the basis of a careful reading and following a literary and theological methodology, the Bible is studied for its moral and theological significance.

Prerequisites & Notes

EDI Global only

Credits: 3

ENGL 1023 - ENGLISH COMPOSITION I

This course examines the history and philosophy of Great Books education using essays from prominent scholars as well as a curated anthology of primary source material from the Western Tradition. Students will develop skills in analytical reading while learning to craft descriptive, evaluative, and personal reflective essays. This course is equivalent to ENGL 1133.

Prerequisites & Notes

EDI only

Credits: 3

MATH 1003 - MATHEMATICS I

Mathematics studied as a liberal art through close reading and discussion of Euclid's Elements, books I-V. Directed not only toward developing the student's mathematical competence through demonstration of propositions, this course emphasizes reflection upon the meaning and nature of mathematics. Topics investigated include:

Book I: The geometry of triangles and parallelograms, through the Pythagorean Theorem.

Book II: Geometrical algebra

Book III: The geometry of circles.

Book IV: The geometry of circles, continued.

Book V: The general theory of ratio and proportion.
Book VI: Application of the theory of ratio, and proportion to plane figures.

Prerequisites & Notes

EDI Global only

Credits: 3

HIST 2103 - AMERICAN HISTORY I

A survey of American history from discovery to 1877. Topics include the colonial period, the revolutionary era, the Constitution, Jeffersonianism, economic and territorial expansion, sectional tensions, the Civil War, and Reconstruction.

Prerequisites & Notes

EDI Global only

Credits: 3

Divine Design - 3 Credit Hours

YEAR TWO

Fall Semester - 15 Credit Hours

HIST 1053 - WESTERN CIVILIZATION I

This course will provide a survey of Western history from Antiquity until the 1700s. The primary focus of instruction will be on providing the chronological framework for the Great Books of the Western tradition. Students will gain a historical sketch of people, places, and events that have shaped Western civilization, which will greatly enhance their understanding of the great texts produced in the successive historical periods. Selections from primary source material as well as contemporary histories will be used.

Prerequisites & Notes

EDI Global only

Credits: 3

PHIL 2033 - ETHICS

This course offers an introduction to moral philosophy through an investigation of the tradition of ethical thought that has informed Western civilization. The course examines various accounts of the human desire for what is good; questions concerning moral choice and the nature of good and evil actions; distinctions between utility, right, and duty; and conceptions of human happiness. In so doing, this course examines the nature and role of the virtues and of the moral law.

Prerequisites & Notes

EDI Global only.

Fall Semester - 15 Credit Hours

LANG 1143 - CLASSICA LATIN I: GRAMMAR & TEXTS

Students will step into the world of classical antiquity with Classica Latin I, an introductory course designed to explore the foundations of classical Latin—the language of the Roman Empire. This course serves as a gateway to understanding ancient Rome's linguistic, literary, and historical legacy. Through a carefully structured curriculum, students will embark on a journey to acquire essential language skills, delve into Roman culture, and unlock the door to the vast literary treasures of Latin literature.

Prerequisites & Notes

NULL

Credits: 3

MATH 1093 - LOGICA

This course serves as an introduction to classical logic, a foundational branch of mathematics, within the framework of the Christian worldview. It explores the principles governing valid reasoning and argumentation. The primary focus is on propositional and first-order logic, providing students with a rigorous framework for analyzing and constructing logical arguments. Topics include propositional logic, first-order logic, proof theory, model theory, predicate calculus, and metalogic.

Prerequisites & Notes

NULL

Credits: 3

MATH 1123 - EUCLIDEAN GEOMETRIA I

In this course, students will investigate plane geometry through several perspectives, including synthetic, metric, analytic, and locus geometry. Each is guided by logic within axiom systems. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

NULL

Credits: 3

THEO 1043 - THEOLOGICA I

This course invites students to engage deeply with primary texts, historical contexts, and theological debates, fostering a nuanced understanding of the diverse intellectual currents that shaped early Christian theology. Through critical analysis and thoughtful discussion, students will develop a profound appreciation for the enduring impact of these theological giants on the Christian tradition.

Prerequisites & Notes

NULL

Credits: 3

THEO 2023 - PHILOSOPHAE I

This course invites students to critically engage with the intricate relationship between theology and philosophy, tracing the development of Christian thought from its early roots to its contemporary expressions. By examining the philosophical inquiries of these influential thinkers, students will deepen their understanding of the intellectual currents that have shaped the Christian tradition. Students will be encouraged to apply these philosophical insights to contemporary theological issues through discussions and analytical exercises.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester - 15 Credit Hours

LANG 1243 - CLASSICA LATIN II: SYNTAX & TEXTS

Students will continue their journey into classical Latin with Classica Latin II: Syntax and Texts. Building upon the foundational knowledge acquired in Classica Latin I, this course takes a deeper dive into the intricacies of Latin syntax, expands students' vocabulary, and introduces them to more complex literary texts. Through rigorous grammar study, textual analysis, and engagement with authentic Latin writings, students will enhance their proficiency in reading, translating, and appreciating the nuances of classical Latin literature.

Prerequisites & Notes

Prerequisite: LANG 1143

Credits: 3

MATH 1083 - ARITHMETICA THEORY

The focus of this course is understanding number theory. Students will learn how and why arithmetical properties and operations work, recognizing and applying the beautiful axiom systems upon which mathematics is built. Beyond addressing simple calculations, this course investigates how and why arithmetic works. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

NULL

Credits: 3

MATH 1153 - EUCLIDEAN GEOMETRIA II

This course builds upon Geometry I through plane synthetic, metric, analytic, and locus geometries; 3-dimensional geometry; and brief introductions to neutral and non-Euclidean geometries. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 1123

Credits: 3

THEO 1063 - SCRIPTURA I

This course provides students with a robust foundation in studying the Old Testament, encouraging critical engagement with the text, its transmission, and the languages in which it was written. Through discussions, hands-on exercises, and critical analyses, students will gain a deep appreciation for the complexities and richness of the Old Testament as a foundational document in the Judeo-Christian tradition.

Prerequisites & Notes

NULL

Credits: 3

THEO 2043 - PHILOSOPHAE II

This course encourages students to grapple with foundational questions of knowledge and belief from a Classical Christian perspective. Through careful analysis of primary texts, philosophical frameworks, and historical contexts, students will gain a nuanced understanding of how these influential thinkers have contributed to the ongoing conversation about the intersection of faith and reason in Christian epistemology.

Prerequisites & Notes

NULL

Credits: 3

YEAR TWO

Fall Semester - 15 Credit Hours

ENGL 2023 - LITERATURA

This course provides students with a unique opportunity to delve into the profound depths of a singular masterpiece, fostering a rich appreciation for the Western Canon and its enduring contributions to human thought and expression. Through scholarly inquiry, critical discussion, and creative engagement, participants will comprehensively understand the chosen work and its role within the broader context of the Western literary and intellectual tradition.

Prerequisites & Notes

NULL

Credits: 3

LANG 2253 - CLASSICA LATIN III

Building upon the foundational knowledge acquired in Classica Latin II, this advanced course invites students to embark on a compelling exploration of the linguistic and cultural significance of Roman orators, with a focus on the masterful works of Cicero and Quintilian. This course is designed to further refine students' Latin language skills while delving into the captivating world of Roman oratory and rhetoric. Through an in-depth study of key speeches, rhetorical techniques, and cultural context, students will deepen their appreciation for classical Latin's eloquence and persuasive power.

Prerequisites & Notes

Prerequisite: LANG 1033

Credits: 3

- OR -

LANG 1123 - CLASSICA GREEK I: GRAMMAR & TEXTS

Classica Greek I is an introductory course designed for students eager to explore the foundations of classical Attic Greek, the language of renowned philosophers, playwrights, and historians such as Plato, Sophocles, and Herodotus. Students will acquire a solid understanding of the Greek alphabet, essential grammar rules, and a foundational vocabulary. Emphasis will be placed on developing reading and writing skills, focusing on authentic ancient Greek texts. By the end of the course, students will be equipped to read and translate simple passages from classical Greek literature.

Prerequisites & Notes

NULL

Credits: 3

- OR -

LANG 1043 - CLASSICA HEBREW I: GRAMMAR & TEXTS

Students will journey into the world of classical antiquity with Classica Hebrew I: Grammar and Texts, an introductory course meticulously designed to explore the foundations of classical Hebrew—the Hebrew Bible's language, grammar, and texts.

This course is a gateway to understanding the Old Testament's linguistic, literary, and historical richness. Through a carefully structured curriculum, students will embark on a comprehensive exploration of Hebrew, unlocking the key to accessing the sacred texts that have shaped the religious and cultural landscape of the Western world.

Prerequisites & Notes

NULL

Credits: 3

MATH 1163 - ALGEBRA I

This course considers real and complex numbers and operations, the Cartesian coordinate system, transformations of rigid figures, linear equations and inequalities, relations and functions, direct and indirect variation, polynomials, rational functions, and data analysis and probability. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

NULL

Credits: 3

PHYS 1013 - MUSICA

This course delves into the captivating intersection of physics and art with an introductory musicology course, where physics and music appreciation converge. This course is designed for students curious about the underlying physics principles that shape the sonic landscapes we experience.

Credits: 3

THEO 1053 - THEOLOGICA II

This course comprehensively explores the theological transformations that defined the 15th and 16th centuries, examining the diverse perspectives within the Protestant and Catholic traditions and their enduring impact on Christian thought and practice. Through critical analysis of primary texts and historical contexts, students will gain a nuanced understanding of the theological currents that shaped this transformative period.

Prerequisites & Notes

Prerequisite: THEO 1043

Credits: 3

Spring Semester - 15 Credit Hours

ENGL 1103 - RHETORICA

This course invites students to engage deeply with the art of classical rhetoric, providing them with the tools to analyze, practice, and appreciate the enduring principles of persuasive communication. Through discussions, practical exercises, and real-world applications, students will develop the confidence and skill set necessary to communicate persuasively in various personal, academic, and professional contexts.

Credits: 3

LANG 2353 - CLASSICA LATIN IV

Students will embark on an advanced exploration of Latin literature, focusing on the profound contributions of Roman philosophers and poets. Building upon the foundational knowledge acquired in Classica Latin III, this course aims to

further refine their Latin language skills by delving into the captivating linguistic and cultural expressions found in the works of philosophical giants and poetic luminaries of ancient Rome. Through an intensive study of primary texts, linguistic analysis, and cultural context, students will deepen their understanding of the philosophical and poetic traditions that shaped the intellectual landscape of the Roman world.

Prerequisites & Notes

Prerequisite: LANG 2253

Credits: 3

- OR -

LANG 1223 - CLASSICAL GREEK II: SYNTAX & TEXTS

This course builds upon the foundation laid in Classica Greek I and delves deeper into the intricacies of classical Greek language and literature. Classica Greek II is designed for students who have completed the introductory course or possess equivalent proficiency, and it aims to further enhance linguistic skills, broaden vocabulary, and deepen comprehension of complex ancient Greek texts.

Prerequisites & Notes

Prerequisites: LANG 1123

Credits: 3

- OR -

LANG 1203 - CLASSICA HEBREW II: SYNTAX & TEXTS

Building upon the foundational knowledge acquired in Classica Hebre I: Grammar and Texts, this course is designed to take students on a deeper and more enriching exploration of the intricacies of Hebrew syntax, expand their vocabulary, and introduce them to more complex literary texts from the Hebrew Bible. This advanced course employs a comprehensive approach that combines rigorous grammar study, textual analysis, and engagement with authentic Hebrew writings. Through these methods, students will enhance their proficiency in reading, translating, and approaching the nuanced beauty of biblical Hebrew literature.

Prerequisites & Notes

Prerequisite: LANG 1043

Credits: 3

MATH 1173 - ALGEBRA II

This course builds upon Algebra I and considers functions and their inverses, quadratic functions, sequences and series, systems of equations and inequalities, polynomials and operations, the Fundamental Theorem of Algebra, radical function, exponential and logarithmic functions, and transformations of functions. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 1163

Credits: 3

PHYS 1004 - ASTRONOMIA

This course considers the history of the heavens and man's study of their motion. Selections from Ptolemy, Copernicus, Galileo, and Kepler are read. Topics include geocentric and heliocentric models, planetary motion, the discovery of moons and other celestial objects, and the laws of planetary motion. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: MATH 1123

Credits: 4

THEO 1083 - SCRIPTURA II

This course provides students with a robust foundation in studying the New Testament, encouraging critical engagement with the text, its transmission, and the languages in which it was written. Through discussions, hands-on exercises, and critical analyses, students will gain a deep appreciation for the complexities and richness of the New Testament as a foundational document in the Judeo-Christian tradition.

Prerequisites & Notes

Prerequisite: THEO 1063

Credits: 3

YEAR THREE

Fall Semester - 15 Credit Hours

CHEM 2004 - BIOLOGICAL CHEMISTRY I

This course considers matter's composition, structure, and properties, including the electronic structure of atoms, periodic trends, ionic and molecular bonding, and intermolecular forces. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: MATH 2023

Credits: 4

CHEM 2124 - CRYSTALLOGRAPHICA

This course explores Euclid's Book XIII, delving into the construction of the five regular Platonic solids, and examining Euler's formula. It then shifts to the study of crystals—solids with a regularly repeating arrangement of atoms, ions, or molecules in three dimensions, and highlights the significance of crystal structures in describing organized layouts and enabling applications in X-ray, neutron, and electron diffraction. The course integrates modeling and experimental dialectic laboratory experiences for a comprehensive grasp of crystallography's theoretical and practical aspects.

Prerequisites & Notes

Prerequisite: CHEM 2004

Credits: 4

MATH 2003 - STATISTICS

This course is an introduction to statistical problem solving and methodology. Topics include representations of univariate and bivariate data; designed methods for data collection and the role of randomness in statistical studies; probability, statistical distributions, confidence intervals, and hypothesis testing; and statistical estimation and significance. Emphasis will be on conceptual understanding and interpretation of results rather than theoretical development. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 1173

Credits: 3

PHYS 2024 - PHYSICS WITH ALGEBRA I

This course considers Classical Physics built upon Algebra I, which covers the foundational principles of Newtonian mechanics, work, energy, power, mechanical waves, sound, friction, free-body diagrams, and gravitational forces. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: MATH 1163

Credits: 4

Spring Semester - 14 Credit Hours

BIOL 4003 - BIOLOGICA PAIDEIA I

This course considers how the practice of BioLogica topics and investigations are inextricably connected with God's intended paideia for His creation. Students will implement this paideia in our lives by connecting these BioLogica topics with Moral PhiloSophae and OrthoDoxia.

Prerequisites & Notes

Prerequisite: CHEM 2104 BioLogica Chemistry II

Credits: 3

PHYS 2044 - PHYSICS WITH ALGEBRA II

This course considers Classical Physics built upon Algebra I, which covers the foundational principles of simple circuits, charge distribution, conduction, induction, electric forces, and electromagnetic forces are investigated. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: PHYS 2024

Credits: 4

THEO 3163 - APOLOGIA I

This course invites students to navigate the intellectual landscape of Presuppositional Apologetics, equipping them to engage thoughtfully with the foundational presuppositions that underlie Christian belief and apologetic defense.

Through the

examination of primary texts, theological reflections, and practical applications, students will gain a nuanced understanding of the diverse perspectives within this apologetic tradition and be prepared to critically evaluate its relevance in contemporary contexts.

Prerequisites & Notes

NULL

Credits: 3

BIOL 4003 - BIOLOGICA PAIDEIA I Credits: 4

YEAR FOUR

Fall Semester - 17 Credit Hours

BIOL 3004 - CELLULAR BIOLOGICA

This course cultivates an understanding of the internal design and organization of eukaryotic cellular and subcellular structures. Attention is paid to the structure and function relationships that govern cellular processes at the molecular level. A survey of

organelle and membrane function, cell-cell signaling, cell movement, cell adhesion, the extracellular matrix, Energy and Metabolism, Respiration, and Photosynthesis. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: BIOL 2104

Credits: 4

BIOL 4123 - BIOLOGICA MODELING I

In this course, students investigate the generation of physical, conceptual, or BioLogica representations of natural phenomena that are difficult to observe directly. Models are used to explain and predict the behavior of real objects or systems and are used in Natural PhiloSophae disciplines.

Prerequisites & Notes

Prerequisite: CHEM 3004

Credits: 3

CHEM 3004 - BIOLOGICA MOLECULAR: ORGANIC

This course considers the organic chemistry study of CHNOPS and halogen compounds; structure, properties, and reactions in covalent bonding. Emphasis is on the chemical composition, formula, and functional group structures of oxygen, nitrogen, and sulfur. These demonstrate the physical and chemical properties and chemical reactivity for synthesizing natural products, drugs, polymers, and organic molecules. This course integrates modeling and

experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: CHEM 2104

Credits: 4

MATH 2043 - PRECALCULUS

This course builds upon Algebra II and considers: functions (trigonometric, power, polynomial, rational, exponential, logarithmic, logistic, and polar) and transformations; trigonometry (unit circle; trigonometric functions, equations, and graphs; right triangle trigonometry; trigonometric functions and inverses; laws of sines and cosines; trigonometric identities; double and half-angle formulas); Fundamental Theorem of Algebra; conic sections; vectors; complex numbers in trigonometric form; polar equations of conic sections; 3-D coordinate system; The Binomial Theorem; matrix algebra; sequences and series; and limits. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 1173

Credits: 3

THEO 3193 - APOLOGIA II

This course invites students to explore the rich tapestry of Classical Christian Apologetics, providing them with the tools to engage thoughtfully with the intellectual foundations that underlie the defense of Christian belief. Through examining primary texts, theological reflections, and practical applications, students will gain a nuanced understanding of the diverse perspectives within this apologetic tradition and be prepared to critically evaluate its enduring significance in contemporary contexts.

Prerequisites & Notes

Prerequisite: THEO 3163

Credits: 3

Spring Semester - 15 Credit Hours

BIOL 3104 - SYSTEMS BIOLOGICA

This course explores the design and organization of representative organisms of prokaryotes and eukaryotes. Students will investigate the diversity of structure and physiology of organisms and their interactions within ecosystems and the biome. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: BIOL 3004

Credits: 4

BIOL 3034 - GENOMICS BIOLOGICA

This course considers genes, genetic variation, and heredity in organisms. Special attention is paid to the genomics of DNA as the molecular basis of heredity. Concentration is placed on the processes of replication, transcription, and translation, forming proteins essential for life. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: CHEM 2104 BioLogica Chemistry II

Credits: 4

BIOL 4043 - BIOLOGICA RESEARCH/THESIS I

This course considers some historical and current BioLogica research findings and how they affect our world and lives. In this course, each student will select a BioLogica topic that meaningfully connects to the student's life or world, argue for its interconnected importance, and complete a research project on that topic with the instructor's guidance. Additionally, each student will collaborate with other classmates on a larger group research project.

Prerequisites & Notes

Prerequisite: CHEM 3104

Credits: 3

CHEM 3104 - BIOLOGICA MOLECULAR: BIOCHEMISTRY

This course considers the structures and functions of organisms, tissues, and cells at the molecular level. The course emphasizes the study of biomolecules, such as nucleic acids, lipids, proteins, and carbohydrates, and their significance in cellular processes. Additionally, the course covers topics related to cell signaling, hormones, and the Krebs cycle. Students will explore the different levels of protein structure and learn about enzymes, their catalytic properties, and the factors that influence enzyme activity. The course examines various cellular processes, including cell signaling and the role of hormones in coordinating physiological responses. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: CHEM 3004

Credits: 4

Bachelor of Arts, Natural PhiloSophae: 4-Year Plan

Total Program Hours - 120 Credit Hours

YEAR ONE

Fall Semester - 15 Credit Hours

LANG 1143 - CLASSICA LATIN I: GRAMMAR & TEXTS

Students will step into the world of classical antiquity with Classica Latin I, an introductory course designed to explore the foundations of classical Latin—the language of the Roman Empire. This course serves as a gateway to understanding ancient Rome's linguistic, literary, and historical legacy. Through a carefully structured curriculum, students will embark on a journey to acquire essential language skills, delve into Roman culture, and unlock the door to the vast literary treasures of Latin literature.

Prerequisites & Notes

NULL

Credits: 3

MATH 1093 - LOGICA

This course serves as an introduction to classical logic, a foundational branch of mathematics, within the framework of the Christian worldview. It explores the principles governing valid reasoning and argumentation. The primary focus is on propositional and first-order logic, providing students with a rigorous framework for analyzing and constructing logical arguments. Topics include propositional logic, first-order logic, proof theory, model theory, predicate calculus, and metalogic.

Prerequisites & Notes

NULL

Credits: 3

MATH 1123 - EUCLIDEAN GEOMETRIA I

In this course, students will investigate plane geometry through several perspectives, including synthetic, metric, analytic, and locus geometry. Each is guided by logic within axiom systems. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

NULL

Credits: 3

THEO 1043 - THEOLOGICA I

This course invites students to engage deeply with primary texts, historical contexts, and theological debates, fostering a nuanced understanding of the diverse intellectual currents that shaped early Christian theology. Through critical analysis and thoughtful discussion, students will develop a profound appreciation for the enduring impact of these theological giants on the Christian tradition.

Prerequisites & Notes

NULL

Credits: 3

THEO 2023 - PHILOSOPHAE I

This course invites students to critically engage with the intricate relationship between theology and philosophy, tracing the development of Christian thought from its early roots to its contemporary expressions. By examining the philosophical inquiries of these influential thinkers, students will deepen their understanding of the intellectual

currents that have shaped the Christian tradition. Students will be encouraged to apply these philosophical insights to contemporary theological issues through discussions and analytical exercises.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester - 15 Credit Hours

LANG 1243 - CLASSICA LATIN II: SYNTAX & TEXTS

Students will continue their journey into classical Latin with Classica Latin II: Syntax and Texts. Building upon the foundational knowledge acquired in Classica Latin I, this course takes a deeper dive into the intricacies of Latin syntax, expands students'

vocabulary, and introduces them to more complex literary texts. Through rigorous grammar study, textual analysis, and engagement with authentic Latin writings, students will enhance their proficiency in reading, translating, and appreciating the nuances of classical Latin literature.

Prerequisites & Notes

Prerequisite: LANG 1143

Credits: 3

MATH 1083 - ARITHMETICA THEORY

The focus of this course is understanding number theory. Students will learn how and why arithmetical properties and operations work, recognizing and applying the beautiful axiom systems upon which mathematics is built. Beyond addressing simple

calculations, this course investigates how and why arithmetic works. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

NULL

Credits: 3

MATH 1153 - EUCLIDEAN GEOMETRIA II

This course builds upon Geometry I through plane synthetic, metric, analytic, and locus geometries; 3-dimensional geometry; and brief introductions to neutral and non-Euclidean geometries. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 1123

Credits: 3

THEO 1063 - SCRIPTURA I

This course provides students with a robust foundation in studying the Old Testament, encouraging critical engagement with the text, its transmission, and the languages in which it was written. Through discussions, hands-on exercises, and critical analyses, students will gain a deep appreciation for the complexities and richness of the Old Testament as a foundational document in the Judeo-Christian tradition.

Prerequisites & Notes

NULL

Credits: 3

THEO 2043 - PHILOSOPHAE II

This course encourages students to grapple with foundational questions of knowledge and belief from a Classical Christian perspective. Through careful analysis of primary texts, philosophical frameworks, and historical contexts, students will gain a nuanced understanding of how these influential thinkers have contributed to the ongoing conversation about the intersection of faith and reason in Christian epistemology.

Spring Semester - 15 Credit Hours

BIOL 2104 - GENERAL BIOLOGICA II

This course explores the design and organization of representative organisms of prokaryotes and eukaryotes. Students will investigate the diversity of structure and physiology of organisms and their interactions within ecosystems and the biome. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: BIOL 2004

Credits: 4

CHEM 2104 - BIOLOGICA CHEMISTRY II

This course considers quantitative principles in chemistry including dimensional analysis, stoichiometry, chemical equations, redox reactions, oxidation numbers, balancing equations, limiting reactants, percent yield, and empirical formulas. Topics studied include principles of thermochemistry including enthalpy, calorimetry, heat of formation, and Hess's law. Students will also explore gas laws, including Boyle's law, Charles's law, and Avogadro's law; solutions including concentrations, colligative properties, and solubility; equilibrium including Le Chatelier's principle, constants, and reaction rates; and nuclear chemistry including nuclear reactions, radioactive decay, and applications of nuclear energy. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: CHEM 2004

Credits: 4

CHEM 4113 - CHEMISTRY PAIDEIA I

This course considers how the practice of chemistry topics and investigations are inextricably connected with God's intended paideia for His creation. Students will implement this paideia by connecting these chemistry topics with Moral PhiloSophae and OrthoDoxia.

Credits: 3

PHYS 2044 - PHYSICS WITH ALGEBRA II

This course considers Classical Physics built upon Algebra I, which covers the foundational principles of simple circuits, charge distribution, conduction, induction, electric forces, and electromagnetic forces are investigated. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: PHYS 2024

Credits: 4

YEAR FOUR

Fall Semester -13 Credit Hours

CHEM 2124 - CRYSTALLOGRAPHICA

This course explores Euclid's Book XIII, delving into the construction of the five regular Platonic solids, and examining Euler's formula. It then shifts to the study of crystals—solids with a regularly repeating arrangement of atoms, ions, or molecules in three dimensions, and highlights the significance of crystal structures in describing organized layouts and enabling applications in X-ray, neutron, and electron diffraction. The course integrates modeling and experimental dialectic laboratory experiences for a comprehensive grasp of crystallography's theoretical and practical aspects.

Prerequisites & Notes

Prerequisite: CHEM 2004

Credits: 4

MATH 2043 - PRECALCULUS

This course builds upon Algebra II and considers: functions (trigonometric, power, polynomial, rational, exponential, logarithmic, logistic, and polar) and transformations; trigonometry (unit circle; trigonometric functions, equations, and graphs; right triangle trigonometry; trigonometric functions and inverses; laws of sines and cosines; trigonometric identities; double and half-angle formulas); Fundamental Theorem of Algebra; conic sections; vectors; complex numbers in trigonometric form; polar equations of conic sections; 3-D coordinate system; The Binomial Theorem; matrix algebra; sequences and series; and limits. Learning experiences will include investigations, dialogues, proofs, and applications.

Prerequisites & Notes

Prerequisite: MATH 1173

Credits: 3

CHEM 4123 - CHEMISTRY MODELING I

In this course, students will investigate the generation of physical, conceptual, or chemistry representations of a natural phenomenon that are difficult to observe directly. Models are used to explain and predict the behavior of real objects or systems and are used in Natural PhiloSophae disciplines.

Prerequisites & Notes

Prerequisite: CHEM 3004

Credits: 3

THEO 3163 - APOLOGIA I

This course invites students to navigate the intellectual landscape of Presuppositional Apologetics, equipping them to engage thoughtfully with the foundational presuppositions that underlie Christian belief and apologetic defense.

Through the

examination of primary texts, theological reflections, and practical applications, students will gain a nuanced understanding of the diverse perspectives within this apologetic tradition and be prepared to critically evaluate its relevance in contemporary contexts.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester - 17 Credit Hours

- NPHI - ELECTIVE Credits: 3

NPHI 2044 - GEOGRAPHICA

This course is an introduction to the basic concepts of Physiography and Geomorphology or the study of landforms, to understand the forces shaping and

altering the primary relief elements of the terrestrial surface, including tectonic activity, surficial earth movements, weathering, erosion, and deposition caused by wind, glacial ice, and streams. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

NULL

Credits: 4

CHEM 4143 - CHEMISTRY RESEARC/THESIS I

This course considers historical and current chemistry research findings and how they affect our world and lives. In this course, each student will select a chemistry topic that meaningfully connects to the student's life or world, argue for its interconnected importance, and complete a research project on that topic with the instructor's guidance. Additionally, each student will collaborate with some classmates on a larger group research project.

Prerequisites & Notes

Prerequisite: CHEM 3104

Credits: 3

PHYS 3004 - ASTRONOMIA WITH RELATIVITY

This course considers the fascinating realms of astronomy, the revolutionary concepts of Einstein's theory of gravitation, and the principles of special and general relativity, including the nature of space-time, the concept of gravitational waves, and the impact of massive objects on the curvature of space. Special attention is given to the

mathematical frameworks that underpin these theories, equipping students with the tools necessary to analyze and solve problems related to relativity. This course integrates modeling and experimental dialectic laboratory experiences.

Prerequisites & Notes

Prerequisite: PHYS 1004

Credits: 4

THEO 3193 - APOLOGIA II

This course invites students to explore the rich tapestry of Classical Christian Apologetics, providing them with the tools to engage thoughtfully with the intellectual foundations that underlie the defense of Christian belief. Through examining primary texts, theological reflections, and practical applications, students will gain a nuanced understanding of the diverse perspectives within this apologetic tradition and be prepared to critically evaluate its enduring significance in contemporary contexts.

Prerequisites & Notes

Prerequisite: THEO 3163

Credits: 3

School of Honors

Mission

The School of Honors at Southeastern University is devoted to cultivating within its scholars a passion for developing their personal faith and higher learning so that they may pursue truth and lead lives full of good work, serving as vibrant leaders in their professions, in Christian communities, and throughout the world in the spirit of Christ.

Chairs, Coordinators, & Faculty

Kaitlyn Brett, Associate Professor, Director of Honors & Global Education

The School of Honors consists of courses of advanced study developed specifically for incoming Honors students who have a demonstrated record of academic success prior to the start of their undergraduate studies. Courses have been developed that either fulfill specific Foundational Core requirements or enhance each student's declared major area of study.

Starting with Introduction to Honors, students take two to three Honors courses each year. Honors study at Southeastern culminates in the design, development, and completion of a major thesis project during the students' senior year.

Other School of Honors Benefits

As a participant in the School of Honors, students may receive up to an annual \$3,000 scholarship, renewable each year students are in the program.

Beyond the scholarship, participation in the School of Honors also will equip students for graduate level research and readiness in the workplace.

In the Southeastern School of Honors, students can expect:

- A well-rounded education informed by a Biblical worldview, with attention to spiritual formation and appreciation for God's revealed truth as reflected in His creation and Word
- Nurturing to become critical thinkers with highly developed problem-solving capacities and written and oral communication skills for the successful exchange of ideas
- A learning environment where they can develop an understanding of how to analyze and synthesize a broad range of material in a scholarly manner
- A learning environment where they can develop appreciation for artistic expressions and the pursuit of knowledge through personal investigation with a focus on understanding God's design for their life and the lives of others
- Mentorship for the development of effective servant-leadership skills and commitment to service within the campus community as a means to life-long service in the church, society, and to other nations

Applying to the School of Honors:

School of Honors participants must be full-time students (taking a minimum of 12 credits per semester) and maintain a GPA of 3.6.

If upon acceptance to Southeastern University, the student has a minimum 3.8 high school GPA (on a four-point scale) and has scored either a 1380 on the SAT or 30 on the ACT, the student is eligible to be invited to participate in the School of Honors.

If, upon acceptance to Southeastern University, students have a minimum 3.8 high school GPA (on a four-point scale) and have scored between 1290 and 1379 on the SAT or 27-29 on the ACT, they can apply to participate in the School of Honors. Admission is only open as long as space is available.

For more information about the Southeastern University School of Honors, please contact the School of Honors at honors@seu.edu.

School of Honors

* In order to maintain the School of Honors scholarship, Honors students must take a designated Honors course each semester (the exception includes specific majors that require a completion of a full-semester internship in the last semester).

*CHOICE/SEMINAR/CONTRACT ... If the student is unable to complete an Honors course in a designated semester, the Honors student has the option to take an Honors Seminar course or complete an Honors contract in a course within their major or in one of their religion courses. Students have to achieve a minimum B+ in the class and a minimum B+ on the contract requirement.

INTRO. TO HONORS ... First year Honors students should plan to take Introduction to Honors in the Fall semester.

Mandatory School of Honors Courses

- HONR 1332 - INTRODUCTION TO HONORS Credits: 2
- HONR 3002 - INTRODUCTION TO THE HONORS THESIS Credits: 2

- HONR 4012 - HONORS THESIS WRITING I Credits: 2
- HONR 4112 - HONORS THESIS WRITING II Credits: 2
- HONR 4212 - HONORS THESIS WRITING I/II Credits: 2

Choice Course Options

- HONR 1433 - HONORS FUNDAMENTALS OF SPEECH Credits: 3
- HONR 1133 - HONORS OLD TESTAMENT SURVEY Credits: 3
- HONR 1233 - HONORS NEW TESTAMENT SURVEY Credits: 3
- HONR 2011, 2021, 2031, 2041, 2051, 2061 (Course code rotates each semester) - HONORS SEMINAR Credits: 1
- CORE 3003 - THRIVING COMMUNITIES Credits: 3

Main Campus (Lakeland, FL)

SEU Trades

Glenn Barnard, Executive Director

Main Campus (Lakeland, FL)

Associate of Science, Project Management

Associate of Science, Project Management Two Year Plan

Total Program Hours - 60 Credit Hours

Foundational Core - 25 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will

focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - Select One (1) of the Following with lab (4 Credit Hours):

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

- OR -

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

- OR -

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

- OR -

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry - Select One (1) of the Following (3 Credit Hours):

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select Two (2) of the Following (6 Credit Hours):

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 24 Credit Hours

PRJM 2013 - APPLIED PROJECT MANAGMENT

This course will enable students to effectively use industry-recognized project management software. Students will learn to effectively manage a project by breaking it down into manageable parts and creating a schedule outline with task dependencies. They will apply these skills in real-world scenarios, utilizing resources and calendars to track schedules and costs, employing Earned Value Management and the Critical Path Method to ensure timely completion. Students will communicate progress through engaging status reports and correctly close the project for future reference.

Prerequisites & Notes

Prerequisite: None

Corequisite: PRJM 2103

Credits: 3

- OR -

CNST 4013 - CONSTRUCTION PROJECT MANAGEMENT

In this course, students will learn the phases of the construction process, design development, and pre-construction stages of a project. Students will learn the project life cycle; the roles of the owner, architect, engineer, and contractor; organizing the project and selecting a team; concept and scope review; establishing objectives; identifying potential

issues; reviewing general conditions.

Credits: 3

PRJM 2023 - BUSINESS PROCESS ANALYSIS

This course will enable students to work effectively with stakeholders to define their business requirements, shape the output of projects and drive successful business outcomes. It also prepares students for the internationally recognized Professional in Business Analysis (PMI-PBA) certification exam by Project Management Institute based on experience.

Credits: 3

PRJM 2033 - QUALITY MANAGEMENT

This course enables students to examine the strategic role of quality within an organization, as well as strategic issues involved in managing quality. Topics include assessing customer requirements, developing customer focus, measuring quality performance and applying principles of quality management throughout the Project Life Cycle.

Credits: 3

PRJM 2043 - PROJECT RISK MANAGEMENT

This course will enable students to demonstrate knowledge and expertise in the specialized area of assessing and identifying project risks along with plans to mitigate threats and capitalize on opportunities. It also prepares students for the internationally recognized Risk Management Professional (PMI-RMP) certification exam by Project Management Institute based on experience.

Credits: 3

PRJM 2053 - AGILE PROJECT MANAGEMENT

This course will enable students to apply agile principles and practices on projects. It also prepares students for the internationally recognized Agile Certified Practitioner (PMI-ACP) certification exam by Project Management Institute based on experience.

Credits: 3

PRJM 2103 - SELECTED TOPICS IN MANAGEMENT

Current topics, issues, and trends pertinent to supervisors and managers are discussed. Topical selections rotate each term; view course search information for details on topics offered each term. PR: Senior level status or permission of the chair is required. This course is repeatable for credit two (2) times.

Credits: 3

PRJM 2133 - PROJECT MANAGEMENT CAPSTONE

This course focuses on the integration of knowledge, skills and abilities learned in the program through a capstone project. To be taken during the last semester of the program.

Credits: 3

PRJM 2123 - PLANNING AND SCHEDULING

In this course, students will learn high-level planning for relevant processes, and procedures to achieve project goals. Project planning, scheduling and monitoring of construction projects including development of critical path networks (CPM & PERT), Gantt bar charts and construction cost control and reporting practices. Prepares students for the internationally recognized Scheduling Professional (PMI-SP) certification exam by Project Management Institute based on experience.

Credits: 3

CNST 3123 - PLANNING AND SCHEDULING

In this course, students will learn high-level planning for relevant processes, and procedures to achieve project goals. Project planning, scheduling and monitoring of construction projects including development of critical path networks (CPM & PERT), Gantt bar charts and construction cost control and reporting practices. Prepares students for the internationally recognized Scheduling Professional (PMI-SP) certification exam by Project Management Institute based on experience.

Credits: 3

Divine Design (Minor, Electives, Experiential Learning) - 11 Credit Hours

General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken. With this credit block students may declare minors, enroll in elective credit, enjoy experiential learning like study abroad or internships, or enroll in up to 11 credits of practicum.

PRAC 1001 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 1-credit practicum course equates to roughly 40 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 4 times for a total of 4 credit hours

Credits: 1

PRAC 1002 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection

space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 2-credit practicum course equates to roughly 80 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 2 times for a total of 4 credit hours

Credits: 2

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

PRAC 1004 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 4-credit practicum course equates to roughly 160 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Course can be repeated 2 times for a total of 8 credit hours

Credits: 4

Associate of Applied Science, Electrical Technician Services

Associate of Applied Science, Electrical Technician Services Two Year Plan

Total Program Hours - 60 Credit Hours

Foundational Core - 25 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry - Select One (1) of the Following (3 Credit Hours):

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select Two (2) of the Following (6 Credit Hours):

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 21 Credit Hours

ELPT 2013 - ELECTRICAL THEORY & NEC

In this course, the student will learn how Kirchhoff's Law and Ohm's Law apply to a series of circuits including developing a broad understanding of the most recent version of the NFPA70 National Electrical Codes.

Credits: 3

ELPT 2023 - SAFETY & ELECTRICAL CONCEPTS

In this course, the student will gain an understanding of the dangers of working in the electrical field as well as Personal Protective Equipment requirements. The student will learn the purposes and techniques of lockout/tagout.

Credits: 3

ELPT 2103 - TECHNICIAN FUNDAMENTALS I

In this course, the student will learn how to apply math skills in the field of electrical work as well as explain the use of a voltmeter. The student will begin developing the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

ELPT 2113 - TECHNICIAN FUNDAMENTALS II

In this course, the student will gain an understanding of electrical related service calls, learn the intricacies of the American Wire Gauge system as well as learn how transformers function. The student will continue developing the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

ELPT 3203 - APPLIED COMPETENCIES I

In this course, the student will learn how to diagnose problems with electrical equipment and how to mitigate the dangers of an older panel and/or electrical system, demonstrating competency in concepts and skills for field work.

Credits: 3

ELPT 3213 - APPLIED COMPETENCIES II

In this course, the student will learn how to diagnose problems with electrical equipment and how to mitigate the dangers of an older panel and/or electrical system, demonstrating competency in concepts and skills for field work.

Credits: 3

TRDS 2003 - CUSTOMER SERVICE

In this course the student will learn the importance of customer service, improve upon their interpersonal skills, and learn how to navigate difficult situations that may arise while out in the field to ensure customer satisfaction and a quality service is provided.

Prerequisites & Notes

NULL

Credits: 3

Divine Design - 11 Credit Hours

PRAC 1001 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 1-credit practicum course equates to roughly 40 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 4 times for a total of 4 credit hours

Credits: 1

PRAC 1002 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 2-credit practicum course equates to roughly 80 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 2 times for a total of 4 credit hours

Credits: 2

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection

space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

PRAC 1004 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 4-credit practicum course equates to roughly 160 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Course can be repeated 2 times for a total of 8 credit hours

Credits: 4

Divine Design (Minor, Electives, Experiential Learning) - 3 Credit Hours

General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken. With this credit block students may declare minors, enroll in elective credit, enjoy experiential learning like study abroad or internships.

Associate of Applied Science, Plumbing Technician Services

Associate of Applied Science, Plumbing Technician Service Two Year Plan

Total Program Hours - 60 Credit Hours

Foundational Core - 25 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - Select One (1) of the Following with lab (4 Credit Hours):

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

- OR -

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

- OR -

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

- OR -

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry - Select One (1) of the Following (3 Credit Hours):

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select Two (2) of the Following (6 Credit Hours):

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 21 Credit Hours**TRDS 2003 - CUSTOMER SERVICE**

In this course the student will learn the importance of customer service, improve upon their interpersonal skills, and learn how to navigate difficult situations that may arise while out in the field to ensure customer satisfaction and a

quality service is provided.

Prerequisites & Notes

NULL

Credits: 3

PLMB 2103 - TECHNICIAN FUNDAMENTALS I

In this course, the student will learn how to compare and contrast supply and DWV piping and how they are affected by pressure and gravity. The learner will also gain an understanding of the installation tools required for various plumbing fixtures.

Credits: 3

PLMB 2313 - SAFETY AND CONCEPTS II

In this course, the student will be able to describe materials for residential gas piping including pipe type and sizing, tubing, pipe support, and protection for gas systems. The student will also gain an understanding of PVC, flex, and metal pipe leak detection and repair techniques.

Credits: 3

PLMB 2303 - SAFETY AND CONCEPTS I

In this course, the student will learn how to identify various types of pipe, fittings, and valves as well as their function in the piping system. The student will also be able to describe the anatomy of a gas and electric water heater and the controls for each.

Prerequisites & Notes

NULL

Credits: 3

Divine Design - 11 Credit Hours

PRAC 1001 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 1-credit practicum course equates to roughly 40 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 4 times for a total of 4 credit hours

Credits: 1

PRAC 1002 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 2-credit practicum course equates to roughly 80 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 2 times for a total of 4 credit hours

Credits: 2

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

PRAC 1004 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 4-credit practicum course equates to roughly 160 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Course can be repeated 2 times for a total of 8 credit hours

Credits: 4

Divine Design (Minor, Electives, Experiential Learning) - 3 Credit Hours

General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken. Within this credit block students may declare minors, enroll in elective credit, enjoy experiential learning like study abroad or internships.

Associate of Applied Science, HVAC Technician Services

Associate of Applied Science, HVAC Technician Services Two Year Plan

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 21 Credit Hours

HVAC 2103 - TECHNICIAN FUNDAMENTALS I

In this course, the student will learn to diagnose common component faults and usage of the voltmeter, ohmmeters, ammeter and multimeter among other system tools. The student will develop the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

HVAC 2113 - TECHNICIAN FUNDAMENTALS II

In this course, the student will learn how to work with refrigerants and apply techniques to ensure safety, detect leaks and interpret charts connected to the EPA 608 Exam. The student will develop the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

HVAC 2303 - SAFETY AND CONCEPTS I

In this course, the student will learn how to identify three mechanisms of heat transfer, how temperature affects molecular motion as well as the basic use of evaporators and compressors.

Credits: 3

HVAC 2333 - SAFETY AND CONCEPTS II

In this course, the student will gain an understanding of the Clean Air Act as well as the usage of refrigerants and safety protocols for usage of refrigerants and basic electrical concepts.

Credits: 3

HVAC 3203 - APPLIED COMPETENCIES I

In this course, the student will learn the proper application of skills and concepts in the field such as diagnosing common mechanical and wiring faults by way of fault codes and trouble.

Credits: 3

HVAC 3213 - APPLIED COMPETENCIES II

In this course, the student will learn how to diagnose problems with electrical equipment and how to mitigate the dangers of an older panel and/or electrical system. The student will demonstrate proper application of skills and concepts in the field.

Credits: 3

TRDS 2003 - CUSTOMER SERVICE

In this course the student will learn the importance of customer service, improve upon their interpersonal skills, and learn how to navigate difficult situations that may arise while out in the field to ensure customer satisfaction and a quality service is provided.

Prerequisites & Notes

NULL

Credits: 3

Divine Design - 11 Credit Hours

PRAC 1001 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 1-credit practicum course equates to roughly 40 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 4 times for a total of 4 credit hours

Credits: 1

PRAC 1002 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts,

and receive evaluation that can be used for future growth. The 2-credit practicum course equates to roughly 80 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 2 times for a total of 4 credit hours

Credits: 2

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

PRAC 1004 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 4-credit practicum course equates to roughly 160 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Course can be repeated 2 times for a total of 8 credit hours

Credits: 4

Divine Design (Minor, Electives, Experiential Learning) - 3 Credit Hours

General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken. With this credit block students may declare minors, enroll in elective credit, enjoy experiential learning like study abroad or internships.

Bachelor of Science, Construction Technology

Bachelor of Science, Construction Technology Four Year Plan

Total Program Hours - 120 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours; Select One with Lab:

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

OR

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

Quantitative Inquiry - 3 Credit Hours; Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry- 6 Credit Hours; Select Two:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - 3 Credit Hours; Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 36 Credit Hours

BBUS 2103 - MACROECONOMICS

This course will cover basic concepts of supply and demand, production possibilities, the circular flow concept and related topics of GDP, inflation, and employment/unemployment, fiscal and monetary policy, and the workings of the monetary system.

*Do not register for this course if you have taken BUSI 2103

Prerequisites & Notes

None

Credits: 3

CNST 2013 - PLAN READING, SPECS, AND BLDG CODES

This course is designed to introduce the student to the primary design of construction design drawings, provide an understanding of reading construction design plans, (primarily architectural and structural), discover the origins and importance of building codes and their impact on the built environment and safety. This course will cover the 16 divisions within construction specification

Credits: 3

CNST 2023 - BUILDING MATERIALS AND METHODS

This course introduces students to the basic building materials and systems used in constructing buildings, bridges, and infrastructure projects. It offers the basic understanding of the use of common systems such as foundations, structural framing, building envelope systems, and finishes. Students will learn proper terminology and usage of wood, steel, and concrete materials.

Prerequisites & Notes

NULL

Credits: 3

CNST 2033 - AUTO CAD/INTRODUCTION TO BIM

This course is designed to provide the student with an introductory level understanding of the operation and function of Auto Cad program in developing architectural drawings. In addition, this course will provide the student with an entry level understanding of how Auto Cad designs can also provide three dimensional views, section cuts, etc of designed construction drawings.

Credits: 3

CNST 2113 - HVAC AND ELECTRICAL

This course is designed to cover the basic electrical safety and electrical theory such as Ohms Law, circuit schematics and circuit characteristics/symbols as it applies to DC and AC circuits in the HVACR industry. Basic control circuits, sequence of operation for basic HVACR applications and electric motor theory, as well as specific information on HVACR electrical component devices will also be covered.

Credits: 3

CNST 2123 - FUNDAMENTALS OF PLUMBING

This course introduces basic plumbing tools, materials, and fixtures. Topics include standard tools, materials, and fixtures used in basic plumbing systems and other related topics. Upon completion, students should be able to demonstrate an understanding of a basic plumbing system.

Credits: 3

CNST 2903 - CONTRACT AND CONSTRUCTION LAW

This course will provide the student with an introductory knowledge of contracts, the components therein, as well as responsibilities of those contracting parties. Specifically for construction, the student will learn various project delivery methods including lump sum contracting, construction management, design-build, cost-plus-fixed-fee, guaranteed

maximum (GMP).

Credits: 3

CNST 3013 - PROJECT ESTIMATING

This course is an introduction to cost estimating of a construction project. Topics include generating preliminary cost estimates from early phase design drawings and specifications, and estimating techniques used to prepare a final bid for a project, including quantity take offs, material pricing, labor costs, and general conditions.

Credits: 3

CNST 3113 - PROPOSAL WRITING AND TENDER

This course provides a foundation in the skills and knowledge required to effectively create proposals for various project scenarios and requests for proposal (RFP).. This course emphasizes best practices in management, presentations, managing proposal efforts, and client relationships.

Credits: 3

CNST 3123 - PLANNING AND SCHEDULING

In this course, students will learn high-level planning for relevant processes, and procedures to achieve project goals. Project planning, scheduling and monitoring of construction projects including development of critical path networks (CPM & PERT), Gantt bar charts and construction cost control and reporting practices. Prepares students for the internationally recognized Scheduling Professional (PMI-SP) certification exam by Project Management Institute based on experience.

Credits: 3

CNST 4013 - CONSTRUCTION PROJECT MANAGEMENT

In this course, students will learn the phases of the construction process, design development, and pre-construction stages of a project. Students will learn the project life cycle; the roles of the owner, architect, engineer, and contractor; organizing the project and selecting a team; concept and scope review; establishing objectives; identifying potential issues; reviewing general conditions.

Credits: 3

CNST 4023 - COMMUNICATION AND LEADERSHIP

In this course, the student will be exposed to and develop active listening skills to better enable students to communicate. Topics include the functions, foundations, models, and modes of communication.

Credits: 3

Divine Design (Minor, Electives, Experiential Learning) - 50 Credit Hours

General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken. Within this credit block students may declare minors, enroll in elective credit, enjoy experiential learning like study abroad or internships, or enroll in up to 24 credits of practicum.

Associate of Science, Construction Technology

Associate of Science, Construction Technology Two Year Plan

Total Program Hours - 60 Credit Hours

Foundational Core - 25 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Divine Design (Minor, Electives, Experiential Learning) -17 Credit Hours

General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken. Within this credit block students may declare minors, enroll in elective credit, enjoy experiential learning like study abroad or internships, or enroll in up to 17 credits of practicum.

PRAC 1001 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 1-credit practicum course equates to roughly 40 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 4 times for a total of 4 credit hours

Credits: 1

PRAC 1002 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts,

and receive evaluation that can be used for future growth. The 2-credit practicum course equates to roughly 80 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 2 times for a total of 4 credit hours

Credits: 2

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

PRAC 1004 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 4-credit practicum course equates to roughly 160 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Course can be repeated 2 times for a total of 8 credit hours

Credits: 4

Minor, Project Management

Minor Core - 18 Credit Hours

PRJM 2103 - SELECTED TOPICS IN MANAGEMENT

Current topics, issues, and trends pertinent to supervisors and managers are discussed. Topical selections rotate each term; view course search information for details on topics offered each term. PR: Senior level status or permission of the chair is required. This course is repeatable for credit two (2) times.

Credits: 3

PRJM 2013 - APPLIED PROJECT MANAGEMENT

This course will enable students to effectively use industry-recognized project management software. Students will learn to effectively manage a project by breaking it down into manageable parts and creating a schedule outline with task dependencies. They will apply these skills in real-world scenarios, utilizing resources and calendars to track schedules and costs, employing Earned Value Management and the Critical Path Method to ensure timely completion. Students will communicate progress through engaging status reports and correctly close the project for future reference.

Prerequisites & Notes

Prerequisite: None

Corequisite: PRJM 2103

Credits: 3

PRJM 2023 - BUSINESS PROCESS ANALYSIS

This course will enable students to work effectively with stakeholders to define their business requirements, shape the output of projects and drive successful business outcomes. It also prepares students for the internationally recognized Professional in Business Analysis (PMI-PBA) certification exam by Project Management Institute based on experience.

Credits: 3

PRJM 2033 - QUALITY MANAGEMENT

This course enables students to examine the strategic role of quality within an organization, as well as strategic issues involved in managing quality. Topics include assessing customer requirements, developing customer focus, measuring quality performance and applying principles of quality management throughout the Project Life Cycle.

Credits: 3

PRJM 2043 - PROJECT RISK MANAGEMENT

This course will enable students to demonstrate knowledge and expertise in the specialized area of assessing and identifying project risks along with plans to mitigate threats and capitalize on opportunities. It also prepares students for the internationally recognized Risk Management Professional (PMI-RMP) certification exam by Project Management Institute based on experience.

Credits: 3

PRJM 2053 - AGILE PROJECT MANAGEMENT

This course will enable students to apply agile principles and practices on projects. It also prepares students for the internationally recognized Agile Certified Practitioner (PMI-ACP) certification exam by Project Management Institute based on experience.

Credits: 3

Total Program Hours - 18 Credit Hours

Minor, Construction Technology

Total Program Hours - 18 Credit Hours

Minor Core - 18 Credit Hours

CNST 2013 - PLAN READING, SPECS, AND BLDG CODES

This course is designed to introduce the student to the primary design of construction design drawings, provide an understanding of reading construction design plans, (primarily architectural and structural), discover the origins and importance of building codes and their impact on the built environment and safety. This course will cover the 16 divisions within construction specification

Credits: 3

CNST 2023 - BUILDING MATERIALS AND METHODS

This course introduces students to the basic building materials and systems used in constructing buildings, bridges, and infrastructure projects. It offers the basic understanding of the use of common systems such as foundations, structural framing, building envelope systems, and finishes. Students will learn proper terminology and usage of wood, steel, and concrete materials.

Prerequisites & Notes

NULL

Credits: 3

CNST 2033 - AUTO CAD/INTRODUCTION TO BIM

This course is designed to provide the student with an introductory level understanding of the operation and function of Auto Cad program in developing architectural drawings. In addition, this course will provide the student with an entry level understanding of how Auto Cad designs can also provide three dimensional views, section cuts, etc of designed construction drawings.

Credits: 3

CNST 2113 - HVAC AND ELECTRICAL

This course is designed to cover the basic electrical safety and electrical theory such as Ohms Law, circuit schematics and circuit characteristics/symbols as it applies to DC and AC circuits in the HVACR industry. Basic control circuits, sequence of operation for basic HVACR applications and electric motor theory, as well as specific information on HVACR electrical component devices will also be covered.

Credits: 3

CNST 2123 - FUNDAMENTALS OF PLUMBING

This course introduces basic plumbing tools, materials, and fixtures. Topics include standard tools, materials, and fixtures used in basic plumbing systems and other related topics. Upon completion, students should be able to demonstrate an understanding of a basic plumbing system.

Credits: 3

CNST 2903 - CONTRACT AND CONSTRUCTION LAW

This course will provide the student with an introductory knowledge of contracts, the components therein, as well as responsibilities of those contracting parties. Specifically for construction, the student will learn various project delivery methods including lump sum contracting, construction management, design-build, cost-plus-fixed-fee, guaranteed maximum (GMP).

Credits: 3

Minor, Electrical Technician Services

Total Program Hours - 18 Credit Hours

Minor Core - 18 Credit Hours

ELPT 2013 - ELECTRICAL THEORY & NEC

In this course, the student will learn how Kirchhoff's Law and Ohm's Law apply to a series of circuits including developing a broad understanding of the most recent version of the NFPA70 National Electrical Codes.

Credits: 3

ELPT 2023 - SAFETY & ELECTRICAL CONCEPTS

In this course, the student will gain an understanding of the dangers of working in the electrical field as well as Personal Protective Equipment requirements. The student will learn the purposes and techniques of lockout/tagout.

Credits: 3

ELPT 2103 - TECHNICIAN FUNDAMENTALS I

In this course, the student will learn how to apply math skills in the field of electrical work as well as explain the use of a voltmeter. The student will begin developing the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

ELPT 2113 - TECHNICIAN FUNDAMENTALS II

In this course, the student will gain an understanding of electrical related service calls, learn the intricacies of the American Wire Gauge system as well as learn how transformers function. The student will continue developing the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

ELPT 3203 - APPLIED COMPETENCIES I

In this course, the student will learn how to diagnose problems with electrical equipment and how to mitigate the dangers of an older panel and/or electrical system, demonstrating competency in concepts and skills for field work.

Credits: 3

ELPT 3213 - APPLIED COMPETENCIES II

In this course, the student will learn how to diagnose problems with electrical equipment and how to mitigate the dangers of an older panel and/or electrical system, demonstrating competency in concepts and skills for field work.

Credits: 3

Minor, HVAC Technician Services

Total Program Hours - 18 Credit Hours

Minor Core - 18 Credit Hours

HVAC 2303 - SAFETY AND CONCEPTS I

In this course, the student will learn how to identify three mechanisms of heat transfer, how temperature affects molecular motion as well as the basic use of evaporators and compressors.

Credits: 3

HVAC 2333 - SAFETY AND CONCEPTS II

In this course, the student will gain an understanding of the Clean Air Act as well as the usage of refrigerants and safety protocols for usage of refrigerants and basic electrical concepts.

Credits: 3

HVAC 2103 - TECHNICIAN FUNDAMENTALS I

In this course, the student will learn to diagnose common component faults and usage of the voltmeter, ohmmeters, ammeter and multimeter among other system tools. The student will develop the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

HVAC 2113 - TECHNICIAN FUNDAMENTALS II

In this course, the student will learn how to work with refrigerants and apply techniques to ensure safety, detect leaks and interpret charts connected to the EPA 608 Exam. The student will develop the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

HVAC 3203 - APPLIED COMPETENCIES I

In this course, the student will learn the proper application of skills and concepts in the field such as diagnosing common mechanical and wiring faults by way of fault codes and trouble.

Credits: 3

HVAC 3213 - APPLIED COMPETENCIES II

In this course, the student will learn how to diagnose problems with electrical equipment and how to mitigate the dangers of an older panel and/or electrical system. The student will demonstrate proper application of skills and concepts in the field.

Credits: 3

Minor, Plumbing Technician Services

Total Program Hours - 18 Credit Hours

Minor Core - 18 Credit Hours

PLMB 2103 - TECHNICIAN FUNDAMENTALS I

In this course, the student will learn how to compare and contrast supply and DWV piping and how they are affected by pressure and gravity. The learner will also gain an understanding of the installation tools required for various plumbing fixtures.

Credits: 3

PLMB 2113 - TECHNICIAN FUNDAMENTALS II

In this course, the student will gain an understanding of various fixture drains, analyze and apply water test data to determine treatment solutions as well as be able to describe the function and application of water softeners, filters, etc.

Prerequisites & Notes

NULL

Credits: 3

PLMB 2303 - SAFETY AND CONCEPTS I

In this course, the student will learn how to identify various types of pipe, fittings, and valves as well as their function in the piping system. The student will also be able to describe the anatomy of a gas and electric water heater and the controls for each.

Prerequisites & Notes

NULL

Credits: 3

PLMB 2313 - SAFETY AND CONCEPTS II

In this course, the student will be able to describe materials for residential gas piping including pipe type and sizing, tubing, pipe support, and protection for gas systems. The student will also gain an understanding of PVC, flex, and metal pipe leak detection and repair techniques.

Credits: 3

PLMB 3203 - APPLIED COMPETENCIES I

In this course, the student will learn how to analyze drain clogs and explain repair procedures; analyze and repair manual and automatic flushometers as well as replace damaged cast iron fittings and pipe.

Prerequisites & Notes

NULL

Credits: 3

PLMB 3213 - APPLIED COMPETENCIES II

In this course, the student will learn to troubleshoot and repair common symptoms of a faulty gas heater. The student will gain a full understanding of how to install tankless water heaters.

Prerequisites & Notes

NULL

Credits: 3

Online

Bachelor of Science, Construction Technology (Online)

Bachelor of Science, Construction Technology Four Year Plan

Total Program Hours - 120 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours**Discursive Inquiry - 6 Credit Hours****ENGL 1113 - COLLEGE COMPOSITION**

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours; Select One with Lab:**BIOL 1333 - ESSENTIALS OF HUMAN A & P**

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

OR

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

Quantitative Inquiry - 3 Credit Hours; Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry- 6 Credit Hours; Select Two:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - 3 Credit Hours; Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 36 Credit Hours**BBUS 2103 - MACROECONOMICS**

This course will cover basic concepts of supply and demand, production possibilities, the circular flow concept and related topics of GDP, inflation, and employment/unemployment, fiscal and monetary policy, and the workings of the monetary system.

*Do not register for this course if you have taken BUSI 2103

Prerequisites & Notes

None

Credits: 3

CNST 2013 - PLAN READING, SPECS, AND BLDG CODES

This course is designed to introduce the student to the primary design of construction design drawings, provide an understanding of reading construction design plans, (primarily architectural and structural), discover the origins and importance of building codes and their impact on the built environment and safety. This course will cover the 16 divisions within construction specification

Credits: 3

CNST 2023 - BUILDING MATERIALS AND METHODS

This course introduces students to the basic building materials and systems used in constructing buildings, bridges, and infrastructure projects. It offers the basic understanding of the use of common systems such as foundations, structural framing, building envelope systems, and finishes. Students will learn proper terminology and usage of wood, steel, and concrete materials.

Prerequisites & Notes

NULL

Credits: 3

CNST 2033 - AUTO CAD/INTRODUCTION TO BIM

This course is designed to provide the student with an introductory level understanding of the operation and function of Auto Cad program in developing architectural drawings. In addition, this course will provide the student with an entry level understanding of how Auto Cad designs can also provide three dimensional views, section cuts, etc of designed construction drawings.

Credits: 3

CNST 2113 - HVAC AND ELECTRICAL

This course is designed to cover the basic electrical safety and electrical theory such as Ohms Law, circuit schematics and circuit characteristics/symbols as it applies to DC and AC circuits in the HVACR industry. Basic control circuits, sequence of operation for basic HVACR applications and electric motor theory, as well as specific information on HVACR electrical component devices will also be covered.

Credits: 3

CNST 2123 - FUNDAMENTALS OF PLUMBING

This course introduces basic plumbing tools, materials, and fixtures. Topics include standard tools, materials, and fixtures used in basic plumbing systems and other related topics. Upon completion, students should be able to demonstrate an understanding of a basic plumbing system.

Credits: 3

CNST 2903 - CONTRACT AND CONSTRUCTION LAW

This course will provide the student with an introductory knowledge of contracts, the components therein, as well as responsibilities of those contracting parties. Specifically for construction, the student will learn various project delivery methods including lump sum contracting, construction management, design-build, cost-plus-fixed-fee, guaranteed maximum (GMP).

Credits: 3

CNST 3013 - PROJECT ESTIMATING

This course is an introduction to cost estimating of a construction project. Topics include generating preliminary cost estimates from early phase design drawings and specifications, and estimating techniques used to prepare a final bid for a project, including quantity take offs, material pricing, labor costs, and general conditions.

Credits: 3

CNST 3113 - PROPOSAL WRITING AND TENDER

This course provides a foundation in the skills and knowledge required to effectively create proposals for various project scenarios and requests for proposal (RFP).. This course emphasizes best practices in management, presentations, managing proposal efforts, and client relationships.

Credits: 3

CNST 3123 - PLANNING AND SCHEDULING

In this course, students will learn high-level planning for relevant processes, and procedures to achieve project goals. Project planning, scheduling and monitoring of construction projects including development of critical path networks (CPM & PERT), Gantt bar charts and construction cost control and reporting practices. Prepares students for the internationally recognized Scheduling Professional (PMI-SP) certification exam by Project Management Institute based on experience.

Credits: 3

CNST 4013 - CONSTRUCTION PROJECT MANAGEMENT

In this course, students will learn the phases of the construction process, design development, and pre-construction stages of a project. Students will learn the project life cycle; the roles of the owner, architect, engineer, and contractor; organizing the project and selecting a team; concept and scope review; establishing objectives; identifying potential issues; reviewing general conditions.

Credits: 3

CNST 4023 - COMMUNICATION AND LEADERSHIP

In this course, the student will be exposed to and develop active listening skills to better enable students to communicate. Topics include the functions, foundations, models, and modes of communication.

Credits: 3

Divine Design (Minor, Electives, Experiential Learning) - 50 Credit Hours

General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken. Within this credit block students may declare minors, enroll in elective credit, enjoy experiential learning like study abroad or internships, or enroll in up to 24 credits of practicum.

Associate of Science, Project Management (Online)

Associate of Science, Project Management Two Year Plan

Total Program Hours - 60 Credit Hours

Foundational Core - 25 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - Select One (1) of the Following with lab (4 Credit Hours):

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

- OR -

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 24 Credit Hours

PRJM 2013 - APPLIED PROJECT MANAGEMENT

This course will enable students to effectively use industry-recognized project management software. Students will learn to effectively manage a project by breaking it down into manageable parts and creating a schedule outline with task dependencies. They will apply these skills in real-world scenarios, utilizing resources and calendars to track schedules and costs, employing Earned Value Management and the Critical Path Method to ensure timely completion. Students will communicate progress through engaging status reports and correctly close the project for future reference.

Prerequisites & Notes

Prerequisite: None

Corequisite: PRJM 2103

Credits: 3

PRJM 2023 - BUSINESS PROCESS ANALYSIS

This course will enable students to work effectively with stakeholders to define their business requirements, shape the output of projects and drive successful business outcomes. It also prepares students for the internationally recognized Professional in Business Analysis (PMI-PBA) certification exam by Project Management Institute based on experience.

Credits: 3

PRJM 2033 - QUALITY MANAGEMENT

This course enables students to examine the strategic role of quality within an organization, as well as strategic issues involved in managing quality. Topics include assessing customer requirements, developing customer focus, measuring quality performance and applying principles of quality management throughout the Project Life Cycle.

Credits: 3

PRJM 2043 - PROJECT RISK MANAGEMENT

This course will enable students to demonstrate knowledge and expertise in the specialized area of assessing and identifying project risks along with plans to mitigate threats and capitalize on opportunities. It also prepares students for the internationally recognized Risk Management Professional (PMI-RMP) certification exam by Project Management Institute based on experience.

Credits: 3

PRJM 2053 - AGILE PROJECT MANAGEMENT

This course will enable students to apply agile principles and practices on projects. It also prepares students for the internationally recognized Agile Certified Practitioner (PMI-ACP) certification exam by Project Management Institute based on experience.

Credits: 3

PRJM 2103 - SELECTED TOPICS IN MANAGEMENT

Current topics, issues, and trends pertinent to supervisors and managers are discussed. Topical selections rotate each term; view course search information for details on topics offered each term. PR: Senior level status or permission of the chair is required. This course is repeatable for credit two (2) times.

Credits: 3

PRJM 2133 - PROJECT MANAGEMENT CAPSTONE

This course focuses on the integration of knowledge, skills and abilities learned in the program through a capstone project. To be taken during the last semester of the program.

Credits: 3

PRJM 2123 - PLANNING AND SCHEDULING

In this course, students will learn high-level planning for relevant processes, and procedures to achieve project goals. Project planning, scheduling and monitoring of construction projects including development of critical path networks (CPM & PERT), Gantt bar charts and construction cost control and reporting practices. Prepares students for the internationally recognized Scheduling Professional (PMI-SP) certification exam by Project Management Institute based on experience.

Credits: 3

CNST 3123 - PLANNING AND SCHEDULING

In this course, students will learn high-level planning for relevant processes, and procedures to achieve project goals. Project planning, scheduling and monitoring of construction projects including development of critical path networks (CPM & PERT), Gantt bar charts and construction cost control and reporting practices. Prepares students for the internationally recognized Scheduling Professional (PMI-SP) certification exam by Project Management Institute based on experience.

Credits: 3

Divine Design (Minor, Electives, Experiential Learning) - 11 Credit Hours

General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken. With this credit block students may declare minors, enroll in elective credit, enjoy experiential learning like study abroad or internships, or enroll in up to 11 credits of practicum.

PRAC 1001 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative

education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 1-credit practicum course equates to roughly 40 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 4 times for a total of 4 credit hours

Credits: 1

PRAC 1002 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 2-credit practicum course equates to roughly 80 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 2 times for a total of 4 credit hours

Credits: 2

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

PRAC 1004 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection

space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 4-credit practicum course equates to roughly 160 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Course can be repeated 2 times for a total of 8 credit hours

Credits: 4

Associate of Applied Science, Electrical Technician Services (Online)

Associate of Applied Science, Electrical Technician Services Two Year Plan

Total Program Hours - 60 Credit Hours

Foundational Core - 25 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - Select One (1) of the Following with lab (4 Credit Hours):

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

- OR -

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

- OR -

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

- OR -

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry - Select One (1) of the Following (3 Credit Hours):

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select Two (2) of the Following (6 Credit Hours):

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 21 Credit Hours

ELPT 2013 - ELECTRICAL THEORY & NEC

In this course, the student will learn how Kirchhoff's Law and Ohm's Law apply to a series of circuits including developing a broad understanding of the most recent version of the NFPA70 National Electrical Codes.

Credits: 3

ELPT 2023 - SAFETY & ELECTRICAL CONCEPTS

In this course, the student will gain an understanding of the dangers of working in the electrical field as well as Personal Protective Equipment requirements. The student will learn the purposes and techniques of lockout/tagout.

Credits: 3

ELPT 2103 - TECHNICIAN FUNDAMENTALS I

In this course, the student will learn how to apply math skills in the field of electrical work as well as explain the use of a voltmeter. The student will begin developing the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

ELPT 2113 - TECHNICIAN FUNDAMENTALS II

In this course, the student will gain an understanding of electrical related service calls, learn the intricacies of the American Wire Gauge system as well as learn how transformers function. The student will continue developing the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

ELPT 3203 - APPLIED COMPETENCIES I

In this course, the student will learn how to diagnose problems with electrical equipment and how to mitigate the dangers of an older panel and/or electrical system, demonstrating competency in concepts and skills for field work.

Credits: 3

ELPT 3213 - APPLIED COMPETENCIES II

In this course, the student will learn how to diagnose problems with electrical equipment and how to mitigate the dangers of an older panel and/or electrical system, demonstrating competency in concepts and skills for field work.

Credits: 3

TRDS 2003 - CUSTOMER SERVICE

In this course the student will learn the importance of customer service, improve upon their interpersonal skills, and learn how to navigate difficult situations that may arise while out in the field to ensure customer satisfaction and a quality service is provided.

Prerequisites & Notes

NULL

Credits: 3

Divine Design - 11 Credit Hours

PRAC 1001 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 1-credit practicum course equates to roughly 40 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 4 times for a total of 4 credit hours

Credits: 1

PRAC 1002 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 2-credit practicum course equates to roughly 80 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 2 times for a total of 4 credit hours

Credits: 2

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

PRAC 1004 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 4-credit practicum course equates to roughly 160 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Course can be repeated 2 times for a total of 8 credit hours

Credits: 4

Divine Design (Minor, Electives, Experiential Learning) - 3 Credit Hours

General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken. With this credit block students may declare minors, enroll in elective credit, enjoy experiential learning like study abroad or internships.

Associate of Applied Science, HVAC Technician Services (Online)

Associate of Applied Science, HVAC Technician Services Two Year Plan

Total Program Hours - 60 Credit Hours

Foundational Core - 25 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 21 Credit Hours

HVAC 2103 - TECHNICIAN FUNDAMENTALS I

In this course, the student will learn to diagnose common component faults and usage of the voltmeter, ohmmeters, ammeter and multimeter among other system tools. The student will develop the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

HVAC 2113 - TECHNICIAN FUNDAMENTALS II

In this course, the student will learn how to work with refrigerants and apply techniques to ensure safety, detect leaks and interpret charts connected to the EPA 608 Exam. The student will develop the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

HVAC 2303 - SAFETY AND CONCEPTS I

In this course, the student will learn how to identify three mechanisms of heat transfer, how temperature affects molecular motion as well as the basic use of evaporators and compressors.

Credits: 3

HVAC 2333 - SAFETY AND CONCEPTS II

In this course, the student will gain an understanding of the Clean Air Act as well as the usage of refrigerants and safety protocols for usage of refrigerants and basic electrical concepts.

Credits: 3

HVAC 3203 - APPLIED COMPETENCIES I

In this course, the student will learn the proper application of skills and concepts in the field such as diagnosing common mechanical and wiring faults by way of fault codes and trouble.

Credits: 3

HVAC 3213 - APPLIED COMPETENCIES II

In this course, the student will learn how to diagnose problems with electrical equipment and how to mitigate the dangers of an older panel and/or electrical system. The student will demonstrate proper application of skills and concepts in the field.

Credits: 3

TRDS 2003 - CUSTOMER SERVICE

In this course the student will learn the importance of customer service, improve upon their interpersonal skills, and learn how to navigate difficult situations that may arise while out in the field to ensure customer satisfaction and a quality service is provided.

Prerequisites & Notes

NULL

Credits: 3

Divine Design - 11 Credit Hours

PRAC 1001 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 1-credit practicum course equates to roughly 40 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 4 times for a total of 4 credit hours

Credits: 1

PRAC 1002 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts,

and receive evaluation that can be used for future growth. The 2-credit practicum course equates to roughly 80 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 2 times for a total of 4 credit hours

Credits: 2

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

PRAC 1004 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 4-credit practicum course equates to roughly 160 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Course can be repeated 2 times for a total of 8 credit hours

Credits: 4

Divine Design (Minor, Electives, Experiential Learning) - 3 Credit Hours

General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken. With this credit block students may declare minors, enroll in elective credit, enjoy experiential learning like study abroad or internships.

Associate of Applied Science, Plumbing Technician Services (Online)

Associate of Applied Science, Plumbing Technician Service Two Year Plan

Total Program Hours - 60 Credit Hours

Foundational Core - 25 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - Select One (1) of the Following with lab (4 Credit Hours):

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

- OR -

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

- OR -

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles,

energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

- OR -

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry - Select One (1) of the Following (3 Credit Hours):

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select Two (2) of the Following (6 Credit Hours):

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 21 Credit Hours

TRDS 2003 - CUSTOMER SERVICE

In this course the student will learn the importance of customer service, improve upon their interpersonal skills, and learn how to navigate difficult situations that may arise while out in the field to ensure customer satisfaction and a quality service is provided.

Prerequisites & Notes

NULL

Credits: 3

PLMB 2103 - TECHNICIAN FUNDAMENTALS I

In this course, the student will learn how to compare and contrast supply and DWV piping and how they are affected by pressure and gravity. The learner will also gain an understanding of the installation tools required for various plumbing fixtures.

Credits: 3

PLMB 2313 - SAFETY AND CONCEPTS II

In this course, the student will be able to describe materials for residential gas piping including pipe type and sizing, tubing, pipe support, and protection for gas systems. The student will also gain an understanding of PVC, flex, and metal pipe leak detection and repair techniques.

Credits: 3

PLMB 2303 - SAFETY AND CONCEPTS I

In this course, the student will learn how to identify various types of pipe, fittings, and valves as well as their function in the piping system. The student will also be able to describe the anatomy of a gas and electric water heater and the controls for each.

Prerequisites & Notes

NULL

Credits: 3

Divine Design - 11 Credit Hours

PRAC 1001 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 1-credit practicum course equates to roughly 40 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 4 times for a total of 4 credit hours

Credits: 1

PRAC 1002 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 2-credit practicum course equates to roughly 80 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 2 times for a total of 4 credit hours

Credits: 2

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

PRAC 1004 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 4-credit practicum course equates to roughly 160 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Course can be repeated 2 times for a total of 8 credit hours

Credits: 4

Divine Design (Minor, Electives, Experiential Learning) - 3 Credit Hours

General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken. With this credit block students may declare minors, enroll in elective credits, enjoy experiential learning like study abroad or internships.

Associate of Science, Construction Technology (Online)

Associate of Science, Construction Technology Two Year Plan

Total Program Hours - 60 Credit Hours

Foundational Core - 25 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - Select One (1) of the Following with lab (4 Credit Hours):

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

- OR -

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

- OR -

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

- OR -

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry - Select One (1) of the Following (3 Credit Hours):

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select Two (2) of the Following (6 Credit Hours):

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 18 Credit Hours

CNST 2013 - PLAN READING, SPECS, AND BLDG CODES

This course is designed to introduce the student to the primary design of construction design drawings, provide an understanding of reading construction design plans, (primarily architectural and structural), discover the origins and importance of building codes and their impact on the built environment and safety. This course will cover the 16 divisions within construction specification

Credits: 3

CNST 2023 - BUILDING MATERIALS AND METHODS

This course introduces students to the basic building materials and systems used in constructing buildings, bridges, and infrastructure projects. It offers the basic understanding of the use of common systems such as foundations, structural framing, building envelope systems, and finishes. Students will learn proper terminology and usage of wood, steel, and concrete materials.

Prerequisites & Notes

NULL

Credits: 3

CNST 2033 - AUTO CAD/INTRODUCTION TO BIM

This course is designed to provide the student with an introductory level understanding of the operation and function of Auto Cad program in developing architectural drawings. In addition, this course will provide the student with an entry level understanding of how Auto Cad designs can also provide three dimensional views, section cuts, etc of designed construction drawings.

Credits: 3

CNST 2113 - HVAC AND ELECTRICAL

This course is designed to cover the basic electrical safety and electrical theory such as Ohms Law, circuit schematics and circuit characteristics/symbols as it applies to DC and AC circuits in the HVACR industry. Basic control circuits, sequence of operation for basic HVACR applications and electric motor theory, as well as specific information on HVACR electrical component devices will also be covered.

Credits: 3

CNST 2123 - FUNDAMENTALS OF PLUMBING

This course introduces basic plumbing tools, materials, and fixtures. Topics include standard tools, materials, and fixtures used in basic plumbing systems and other related topics. Upon completion, students should be able to demonstrate an understanding of a basic plumbing system.

Credits: 3

CNST 2903 - CONTRACT AND CONSTRUCTION LAW

This course will provide the student with an introductory knowledge of contracts, the components therein, as well as responsibilities of those contracting parties. Specifically for construction, the student will learn various project delivery methods including lump sum contracting, construction management, design-build, cost-plus-fixed-fee, guaranteed maximum (GMP).

Credits: 3

Divine Design (Minor, Electives, Experiential Learning) - 17 Credit Hours

General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken. Within this credit block students may declare minors, enroll in elective credit, enjoy experiential learning like study abroad or internships, or enroll in up to 17 credits of practicum.

PRAC 1001 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 1-credit practicum course equates to roughly 40 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 4 times for a total of 4 credit hours

Credits: 1

PRAC 1002 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 2-credit practicum course equates to roughly 80 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 2 times for a total of 4 credit hours

Credits: 2

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

PRAC 1004 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 4-credit practicum course equates to roughly 160 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Course can be repeated 2 times for a total of 8 credit hours

Credits: 4

Minor, Project Management (Online)

Minor Core - 18 Credit Hours

PRJM 2103 - SELECTED TOPICS IN MANAGEMENT

Current topics, issues, and trends pertinent to supervisors and managers are discussed. Topical selections rotate each term; view course search information for details on topics offered each term. PR: Senior level status or permission of the chair is required. This course is repeatable for credit two (2) times.

Credits: 3

PRJM 2013 - APPLIED PROJECT MANAGEMENT

This course will enable students to effectively use industry-recognized project management software. Students will learn to effectively manage a project by breaking it down into manageable parts and creating a schedule outline with task dependencies. They will apply these skills in real-world scenarios, utilizing resources and calendars to track schedules and costs, employing Earned Value Management and the Critical Path Method to ensure timely completion. Students will communicate progress through engaging status reports and correctly close the project for future reference.

Prerequisites & Notes

Prerequisite: None

Corequisite: PRJM 2103

Credits: 3

PRJM 2023 - BUSINESS PROCESS ANALYSIS

This course will enable students to work effectively with stakeholders to define their business requirements, shape the output of projects and drive successful business outcomes. It also prepares students for the internationally recognized

Professional in Business Analysis (PMI-PBA) certification exam by Project Management Institute based on experience.

Credits: 3

PRJM 2033 - QUALITY MANAGEMENT

This course enables students to examine the strategic role of quality within an organization, as well as strategic issues involved in managing quality. Topics include assessing customer requirements, developing customer focus, measuring quality performance and applying principles of quality management throughout the Project Life Cycle.

Credits: 3

PRJM 2043 - PROJECT RISK MANAGEMENT

This course will enable students to demonstrate knowledge and expertise in the specialized area of assessing and identifying project risks along with plans to mitigate threats and capitalize on opportunities. It also prepares students for the internationally recognized Risk Management Professional (PMI-RMP) certification exam by Project Management Institute based on experience.

Credits: 3

PRJM 2053 - AGILE PROJECT MANAGEMENT

This course will enable students to apply agile principles and practices on projects. It also prepares students for the internationally recognized Agile Certified Practitioner (PMI-ACP) certification exam by Project Management Institute based on experience.

Credits: 3

Total Program Hours - 18 Credit Hours

Minor, Electrical Technician Services (Online)

Total Program Hours - 18 Credit Hours

Minor Core - 18 Credit Hours

ELPT 2013 - ELECTRICAL THEORY & NEC

In this course, the student will learn how Kirchhoff's Law and Ohm's Law apply to a series of circuits including developing a broad understanding of the most recent version of the NFPA70 National Electrical Codes.

Credits: 3

ELPT 2023 - SAFETY & ELECTRICAL CONCEPTS

In this course, the student will gain an understanding of the dangers of working in the electrical field as well as Personal Protective Equipment requirements. The student will learn the purposes and techniques of lockout/tagout.

Credits: 3

ELPT 2103 - TECHNICIAN FUNDAMENTALS I

In this course, the student will learn how to apply math skills in the field of electrical work as well as explain the use of a voltmeter. The student will begin developing the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

ELPT 2113 - TECHNICIAN FUNDAMENTALS II

In this course, the student will gain an understanding of electrical related service calls, learn the intricacies of the American Wire Gauge system as well as learn how transformers function. The student will continue developing the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

ELPT 3203 - APPLIED COMPETENCIES I

In this course, the student will learn how to diagnose problems with electrical equipment and how to mitigate the dangers of an older panel and/or electrical system, demonstrating competency in concepts and skills for field work.

Credits: 3

ELPT 3213 - APPLIED COMPETENCIES II

In this course, the student will learn how to diagnose problems with electrical equipment and how to mitigate the dangers of an older panel and/or electrical system, demonstrating competency in concepts and skills for field work.

Credits: 3

Minor, Plumbing Technician Services (Online)

Total Program Hours - 18 Credit Hours

Minor Core - 18 Credit Hours

PLMB 2103 - TECHNICIAN FUNDAMENTALS I

In this course, the student will learn how to compare and contrast supply and DWV piping and how they are affected by pressure and gravity. The learner will also gain an understanding of the installation tools required for various plumbing fixtures.

Credits: 3

PLMB 2113 - TECHNICIAN FUNDAMENTALS II

In this course, the student will gain an understanding of various fixture drains, analyze and apply water test data to determine treatment solutions as well as be able to describe the function and application of water softeners, filters, etc.

Prerequisites & Notes

NULL

Credits: 3

PLMB 2303 - SAFETY AND CONCEPTS I

In this course, the student will learn how to identify various types of pipe, fittings, and valves as well as their function in the piping system. The student will also be able to describe the anatomy of a gas and electric water heater and the controls for each.

Prerequisites & Notes

NULL

Credits: 3

PLMB 2313 - SAFETY AND CONCEPTS II

In this course, the student will be able to describe materials for residential gas piping including pipe type and sizing, tubing, pipe support, and protection for gas systems. The student will also gain an understanding of PVC, flex, and metal pipe leak detection and repair techniques.

Credits: 3

PLMB 3203 - APPLIED COMPETENCIES I

In this course, the student will learn how to analyze drain clogs and explain repair procedures; analyze and repair manual and automatic flushometers as well as replace damaged cast iron fittings and pipe.

Prerequisites & Notes

NULL

Credits: 3

PLMB 3213 - APPLIED COMPETENCIES II

In this course, the student will learn to troubleshoot and repair common symptoms of a faulty gas heater. The student will gain a full understanding of how to install tankless water heaters.

Prerequisites & Notes

NULL

Credits: 3

Minor, Construction Technology (Online)

Total Program Hours - 18 Credit Hours

Minor Core - 18 Credit Hours

CNST 2013 - PLAN READING, SPECS, AND BLDG CODES

This course is designed to introduce the student to the primary design of construction design drawings, provide an understanding of reading construction design plans, (primarily architectural and structural), discover the origins and importance of building codes and their impact on the built environment and safety. This course will cover the 16 divisions within construction specification

Credits: 3

CNST 2023 - BUILDING MATERIALS AND METHODS

This course introduces students to the basic building materials and systems used in constructing buildings, bridges, and infrastructure projects. It offers the basic understanding of the use of common systems such as foundations, structural framing, building envelope systems, and finishes. Students will learn proper terminology and usage of wood, steel, and concrete materials.

Prerequisites & Notes

NULL

Credits: 3

CNST 2033 - AUTO CAD/INTRODUCTION TO BIM

This course is designed to provide the student with an introductory level understanding of the operation and function of Auto Cad program in developing architectural drawings. In addition, this course will provide the student with an entry level understanding of how Auto Cad designs can also provide three dimensional views, section cuts, etc of designed construction drawings.

Credits: 3

CNST 2113 - HVAC AND ELECTRICAL

This course is designed to cover the basic electrical safety and electrical theory such as Ohms Law, circuit schematics and circuit characteristics/symbols as it applies to DC and AC circuits in the HVACR industry. Basic control circuits, sequence of operation for basic HVACR applications and electric motor theory, as well as specific information on HVACR electrical component devices will also be covered.

Credits: 3

CNST 2123 - FUNDAMENTALS OF PLUMBING

This course introduces basic plumbing tools, materials, and fixtures. Topics include standard tools, materials, and fixtures used in basic plumbing systems and other related topics. Upon completion, students should be able to demonstrate an understanding of a basic plumbing system.

Credits: 3

CNST 2903 - CONTRACT AND CONSTRUCTION LAW

This course will provide the student with an introductory knowledge of contracts, the components therein, as well as responsibilities of those contracting parties. Specifically for construction, the student will learn various project delivery methods including lump sum contracting, construction management, design-build, cost-plus-fixed-fee, guaranteed maximum (GMP).

Credits: 3

Minor, HVAC Technician Services (Online)

Total Program Hours - 18 Credit Hours

Minor Core - 18 Credit Hours

HVAC 2303 - SAFETY AND CONCEPTS I

In this course, the student will learn how to identify three mechanisms of heat transfer, how temperature affects molecular motion as well as the basic use of evaporators and compressors.

Credits: 3

HVAC 2333 - SAFETY AND CONCEPTS II

In this course, the student will gain an understanding of the Clean Air Act as well as the usage of refrigerants and safety protocols for usage of refrigerants and basic electrical concepts.

Credits: 3

HVAC 2103 - TECHNICIAN FUNDAMENTALS I

In this course, the student will learn to diagnose common component faults and usage of the voltmeter, ohmmeters, ammeter and multimeter among other system tools. The student will develop the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

HVAC 2113 - TECHNICIAN FUNDAMENTALS II

In this course, the student will learn how to work with refrigerants and apply techniques to ensure safety, detect leaks and interpret charts connected to the EPA 608 Exam. The student will develop the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

HVAC 3203 - APPLIED COMPETENCIES I

In this course, the student will learn the proper application of skills and concepts in the field such as diagnosing common mechanical and wiring faults by way of fault codes and trouble.

Credits: 3

HVAC 3213 - APPLIED COMPETENCIES II

In this course, the student will learn how to diagnose problems with electrical equipment and how to mitigate the dangers of an older panel and/or electrical system. The student will demonstrate proper application of skills and concepts in the field.

Credits: 3

Site-Based (Partnership)

Bachelor of Science, Construction Technology (Site-Based Partnership)

Bachelor of Science, Construction Technology Four Year Plan

Total Program Hours - 120 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours; Select One with Lab:

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

OR

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

Quantitative Inquiry - 3 Credit Hours; Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry- 6 Credit Hours; Select Two:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - 3 Credit Hours; Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 36 Credit Hours

BBUS 2103 - MACROECONOMICS

This course will cover basic concepts of supply and demand, production possibilities, the circular flow concept and related topics of GDP, inflation, and employment/unemployment, fiscal and monetary policy, and the workings of the monetary system.

*Do not register for this course if you have taken BUSI 2103

Prerequisites & Notes

None

Credits: 3

CNST 2013 - PLAN READING, SPECS, AND BLDG CODES

This course is designed to introduce the student to the primary design of construction design drawings, provide an understanding of reading construction design plans, (primarily architectural and structural), discover the origins and importance of building codes and their impact on the built environment and safety. This course will cover the 16 divisions within construction specification

Credits: 3

CNST 2023 - BUILDING MATERIALS AND METHODS

This course introduces students to the basic building materials and systems used in constructing buildings, bridges, and infrastructure projects. It offers the basic understanding of the use of common systems such as foundations, structural framing, building envelope systems, and finishes. Students will learn proper terminology and usage of wood, steel, and concrete materials.

Prerequisites & Notes

NULL

Credits: 3

CNST 2033 - AUTO CAD/INTRODUCTION TO BIM

This course is designed to provide the student with an introductory level understanding of the operation and function of Auto Cad program in developing architectural drawings. In addition, this course will provide the student with an entry level understanding of how Auto Cad designs can also provide three dimensional views, section cuts, etc of designed construction drawings.

Credits: 3

CNST 2113 - HVAC AND ELECTRICAL

This course is designed to cover the basic electrical safety and electrical theory such as Ohms Law, circuit schematics and circuit characteristics/symbols as it applies to DC and AC circuits in the HVACR industry. Basic control circuits, sequence of operation for basic HVACR applications and electric motor theory, as well as specific information on HVACR electrical component devices will also be covered.

Credits: 3

CNST 2123 - FUNDAMENTALS OF PLUMBING

This course introduces basic plumbing tools, materials, and fixtures. Topics include standard tools, materials, and fixtures used in basic plumbing systems and other related topics. Upon completion, students should be able to demonstrate an understanding of a basic plumbing system.

Credits: 3

CNST 2903 - CONTRACT AND CONSTRUCTION LAW

This course will provide the student with an introductory knowledge of contracts, the components therein, as well as responsibilities of those contracting parties. Specifically for construction, the student will learn various project delivery methods including lump sum contracting, construction management, design-build, cost-plus-fixed-fee, guaranteed maximum (GMP).

Credits: 3

CNST 3013 - PROJECT ESTIMATING

This course is an introduction to cost estimating of a construction project. Topics include generating preliminary cost estimates from early phase design drawings and specifications, and estimating techniques used to prepare a final bid for a project, including quantity take offs, material pricing, labor costs, and general conditions.

Credits: 3

CNST 3113 - PROPOSAL WRITING AND TENDER

This course provides a foundation in the skills and knowledge required to effectively create proposals for various project scenarios and requests for proposal (RFP).. This course emphasizes best practices in management, presentations, managing proposal efforts, and client relationships.

Credits: 3

CNST 3123 - PLANNING AND SCHEDULING

In this course, students will learn high-level planning for relevant processes, and procedures to achieve project goals. Project planning, scheduling and monitoring of construction projects including development of critical path networks (CPM & PERT), Gantt bar charts and construction cost control and reporting practices. Prepares students for the internationally recognized Scheduling Professional (PMI-SP) certification exam by Project Management Institute based on experience.

Credits: 3

CNST 4013 - CONSTRUCTION PROJECT MANAGEMENT

In this course, students will learn the phases of the construction process, design development, and pre-construction stages of a project. Students will learn the project life cycle; the roles of the owner, architect, engineer, and contractor; organizing the project and selecting a team; concept and scope review; establishing objectives; identifying potential issues; reviewing general conditions.

Credits: 3

CNST 4023 - COMMUNICATION AND LEADERSHIP

In this course, the student will be exposed to and develop active listening skills to better enable students to communicate. Topics include the functions, foundations, models, and modes of communication.

Credits: 3

Divine Design (Minor, Electives, Experiential Learning) - 50 Credit Hours

General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken. Within this credit block students may declare minors, enroll in elective credit, enjoy experiential learning like study abroad or internships, or enroll in up to 24 credits of practicum.

PMIN 2303 - STUDENT MINISTRY PRACTICUM

The course is designed to stress involvement in the practical ministry of the local church through supervised ministry activities. The main emphases of this course are ministry leadership, observation, experience, and reflection. This course requires careful study of and reflection upon the appropriate biblical texts.

Prerequisites & Notes

NULL

Credits: 3

PRAC 1001 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 1-credit practicum course equates to roughly 40 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 4 times for a total of 4 credit hours

Credits: 1

PRAC 1002 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 2-credit practicum course equates to roughly 80 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 2 times for a total of 4 credit hours

Credits: 2

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

PRAC 1004 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 4-credit practicum course equates to roughly 160 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Course can be repeated 2 times for a total of 8 credit hours

Credits: 4

Associate of Science, Project Management (Site-Based Partnership)

Associate of Science, Project Management Two Year Plan

Total Program Hours - 60 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours; Select One with Lab:

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

OR

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

Quantitative Inquiry - 3 Credit Hours; Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry- 6 Credit Hours; Select Two:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - 3 Credit Hours; Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 24 Credit Hours

PRJM 2013 - APPLIED PROJECT MANAGMENT

This course will enable students to effectively use industry-recognized project management software. Students will learn to effectively manage a project by breaking it down into manageable parts and creating a schedule outline with task dependencies. They will apply these skills in real-world scenarios, utilizing resources and calendars to track schedules and costs, employing Earned Value Management and the Critical Path Method to ensure timely completion. Students will communicate progress through engaging status reports and correctly close the project for future reference.

Prerequisites & Notes

Prerequisite: None

Corequisite: PRJM 2103

Credits: 3

PRJM 2023 - BUSINESS PROCESS ANALYSIS

This course will enable students to work effectively with stakeholders to define their business requirements, shape the output of projects and drive successful business outcomes. It also prepares students for the internationally recognized Professional in Business Analysis (PMI-PBA) certification exam by Project Management Institute based on experience.

Credits: 3

PRJM 2033 - QUALITY MANAGEMENT

This course enables students to examine the strategic role of quality within an organization, as well as strategic issues involved in managing quality. Topics include assessing customer requirements, developing customer focus, measuring quality performance and applying principles of quality management throughout the Project Life Cycle.

Credits: 3

PRJM 2043 - PROJECT RISK MANAGEMENT

This course will enable students to demonstrate knowledge and expertise in the specialized area of assessing and identifying project risks along with plans to mitigate threats and capitalize on opportunities. It also prepares students for the internationally recognized Risk Management Professional (PMI-RMP) certification exam by Project Management Institute based on experience.

Credits: 3

PRJM 2053 - AGILE PROJECT MANAGEMENT

This course will enable students to apply agile principles and practices on projects. It also prepares students for the internationally recognized Agile Certified Practitioner (PMI-ACP) certification exam by Project Management Institute based on experience.

Credits: 3

PRJM 2103 - SELECTED TOPICS IN MANAGEMENT

Current topics, issues, and trends pertinent to supervisors and managers are discussed. Topical selections rotate each term; view course search information for details on topics offered each term. PR: Senior level status or permission of the chair is required. This course is repeatable for credit two (2) times.

Credits: 3

PRJM 2133 - PROJECT MANAGEMENT CAPSTONE

This course focuses on the integration of knowledge, skills and abilities learned in the program through a capstone project. To be taken during the last semester of the program.

Credits: 3

PRJM 2123 - PLANNING AND SCHEDULING

In this course, students will learn high-level planning for relevant processes, and procedures to achieve project goals. Project planning, scheduling and monitoring of construction projects including development of critical path networks (CPM & PERT), Gantt bar charts and construction cost control and reporting practices. Prepares students for the internationally recognized Scheduling Professional (PMI-SP) certification exam by Project Management Institute based on experience.

Credits: 3

CNST 3123 - PLANNING AND SCHEDULING

In this course, students will learn high-level planning for relevant processes, and procedures to achieve project goals. Project planning, scheduling and monitoring of construction projects including development of critical path networks (CPM & PERT), Gantt bar charts and construction cost control and reporting practices. Prepares students for the internationally recognized Scheduling Professional (PMI-SP) certification exam by Project Management Institute based on experience.

Credits: 3

Divine Design (Minor, Electives, Experiential Learning) - 11 Credit Hours

General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken. With this credit block students may declare minors, enroll in elective credit, enjoy experiential learning like study abroad or internships, or enroll in up to 11 credits of practicum.

PRAC 1001 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 1-credit practicum course equates to roughly 40 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 4 times for a total of 4 credit hours

Credits: 1

PRAC 1002 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 2-credit practicum course equates to roughly 80 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 2 times for a total of 4 credit hours

Credits: 2

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

PRAC 1004 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 4-credit practicum course equates to roughly 160 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Course can be repeated 2 times for a total of 8 credit hours

Credits: 4

PMIN 2303 - STUDENT MINISTRY PRACTICUM

The course is designed to stress involvement in the practical ministry of the local church through supervised ministry activities. The main emphases of this course are ministry leadership, observation, experience, and reflection. This course requires careful study of and reflection upon the appropriate biblical texts.

Prerequisites & Notes

NULL

Credits: 3

Associate of Applied Science, Electrical Technician Services (Site-Based Partnership)

Associate of Applied Science, Electrical Technician Services Two Year Plan

Total Program Hours - 60 Credit Hours

Foundational Core - 25 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - Select One (1) of the Following with lab (4 Credit Hours):

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

- OR -

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

- OR -

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles,

energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

- OR -

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry - Select One (1) of the Following (3 Credit Hours):

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select Two (2) of the Following (6 Credit Hours):

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 21 Credit Hours

ELPT 2013 - ELECTRICAL THEORY & NEC

In this course, the student will learn how Kirchhoff's Law and Ohm's Law apply to a series of circuits including developing a broad understanding of the most recent version of the NFPA70 National Electrical Codes.

Credits: 3

ELPT 2023 - SAFETY & ELECTRICAL CONCEPTS

In this course, the student will gain an understanding of the dangers of working in the electrical field as well as Personal Protective Equipment requirements. The student will learn the purposes and techniques of lockout/tagout.

Credits: 3

ELPT 2103 - TECHNICIAN FUNDAMENTALS I

In this course, the student will learn how to apply math skills in the field of electrical work as well as explain the use of a voltmeter. The student will begin developing the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

ELPT 2113 - TECHNICIAN FUNDAMENTALS II

In this course, the student will gain an understanding of electrical related service calls, learn the intricacies of the American Wire Gauge system as well as learn how transformers function. The student will continue developing the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

ELPT 3203 - APPLIED COMPETENCIES I

In this course, the student will learn how to diagnose problems with electrical equipment and how to mitigate the dangers of an older panel and/or electrical system, demonstrating competency in concepts and skills for field work.

Credits: 3

ELPT 3213 - APPLIED COMPETENCIES II

In this course, the student will learn how to diagnose problems with electrical equipment and how to mitigate the dangers of an older panel and/or electrical system, demonstrating competency in concepts and skills for field work.

Credits: 3

TRDS 2003 - CUSTOMER SERVICE

In this course the student will learn the importance of customer service, improve upon their interpersonal skills, and learn how to navigate difficult situations that may arise while out in the field to ensure customer satisfaction and a quality service is provided.

Prerequisites & Notes

NULL

Credits: 3

Divine Design - 11 Credit Hours

PRAC 1001 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 1-credit practicum course equates to roughly 40 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 4 times for a total of 4 credit hours

Credits: 1

PRAC 1002 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 2-credit practicum course equates to roughly 80 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 2 times for a total of 4 credit hours

Credits: 2

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

PRAC 1004 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 4-credit practicum course equates to roughly 160 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Course can be repeated 2 times for a total of 8 credit hours

Credits: 4

Divine Design (Minor, Electives, Experiential Learning) - 3 Credit Hours

General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken. With this credit block students may declare minors, enroll in elective credit, enjoy experiential learning like study abroad or internships.

Associate of Applied Science, HVAC Technician Services (Site-Based Partnership)

Associate of Applied Science, HVAC Technician Services Two Year Plan

Total Program Hours - 60 Credit Hours

Foundational Core - 25 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - Select One (1) of the Following with lab (4 Credit Hours):

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

- OR -

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

- OR -

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 21 Credit Hours

HVAC 2103 - TECHNICIAN FUNDAMENTALS I

In this course, the student will learn to diagnose common component faults and usage of the voltmeter, ohmmeters, ammeter and multimeter among other system tools. The student will develop the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

HVAC 2113 - TECHNICIAN FUNDAMENTALS II

In this course, the student will learn how to work with refrigerants and apply techniques to ensure safety, detect leaks and interpret charts connected to the EPA 608 Exam. The student will develop the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

HVAC 2303 - SAFETY AND CONCEPTS I

In this course, the student will learn how to identify three mechanisms of heat transfer, how temperature affects molecular motion as well as the basic use of evaporators and compressors.

Credits: 3

HVAC 2333 - SAFETY AND CONCEPTS II

In this course, the student will gain an understanding of the Clean Air Act as well as the usage of refrigerants and safety protocols for usage of refrigerants and basic electrical concepts.

Credits: 3

HVAC 3203 - APPLIED COMPETENCIES I

In this course, the student will learn the proper application of skills and concepts in the field such as diagnosing common mechanical and wiring faults by way of fault codes and trouble.

Credits: 3

HVAC 3213 - APPLIED COMPETENCIES II

In this course, the student will learn how to diagnose problems with electrical equipment and how to mitigate the dangers of an older panel and/or electrical system. The student will demonstrate proper application of skills and concepts in the field.

Credits: 3

Divine Design - 11 Credit Hours

PRAC 1001 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 1-credit practicum course equates to roughly 40 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 4 times for a total of 4 credit hours

Credits: 1

PRAC 1002 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 2-credit practicum course equates to roughly 80 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 2 times for a total of 4 credit hours

Credits: 2

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

PRAC 1004 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 4-credit practicum course equates to roughly 160 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Course can be repeated 2 times for a total of 8 credit hours

Credits: 4

Divine Design (Minor, Electives, Experiential Learning) - 3 Credit Hours

General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken. With this credit block students may declare minors, enroll in elective credit, enjoy experiential learning like study abroad or internships.

Associate of Applied Science, Plumbing Technician Services (Site-Based Partnership)

Associate of Applied Science, Plumbing Technician Service Two Year Plan

Total Program Hours - 60 Credit Hours

Foundational Core - 25 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:
CORE 1111

Credits: 2

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - Select One (1) of the Following with lab (4 Credit Hours):

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

- OR -

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

- OR -

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

- OR -

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry - Select One (1) of the Following (3 Credit Hours):

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select Two (2) of the Following (6 Credit Hours):

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 21 Credit Hours

TRDS 2003 - CUSTOMER SERVICE

In this course the student will learn the importance of customer service, improve upon their interpersonal skills, and learn how to navigate difficult situations that may arise while out in the field to ensure customer satisfaction and a quality service is provided.

Prerequisites & Notes

NULL

Credits: 3

PLMB 2103 - TECHNICIAN FUNDAMENTALS I

In this course, the student will learn how to compare and contrast supply and DWV piping and how they are affected by pressure and gravity. The learner will also gain an understanding of the installation tools required for various plumbing fixtures.

Credits: 3

PLMB 2313 - SAFETY AND CONCEPTS II

In this course, the student will be able to describe materials for residential gas piping including pipe type and sizing, tubing, pipe support, and protection for gas systems. The student will also gain an understanding of PVC, flex, and metal pipe leak detection and repair techniques.

Credits: 3

PLMB 2303 - SAFETY AND CONCEPTS I

In this course, the student will learn how to identify various types of pipe, fittings, and valves as well as their function in the piping system. The student will also be able to describe the anatomy of a gas and electric water heater and the controls for each.

Prerequisites & Notes

NULL

Credits: 3

Divine Design - 11 Credit Hours

PRAC 1001 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 1-credit practicum course equates to roughly 40 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 4 times for a total of 4 credit hours

Credits: 1

PRAC 1002 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts,

and receive evaluation that can be used for future growth. The 2-credit practicum course equates to roughly 80 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 2 times for a total of 4 credit hours

Credits: 2

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

PRAC 1004 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 4-credit practicum course equates to roughly 160 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Course can be repeated 2 times for a total of 8 credit hours

Credits: 4

Divine Design (Minor, Electives, Experiential Learning) - 3 Credit Hours

General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken. With this credit block students may declare minors, enroll in elective credits, enjoy experiential learning like study abroad or internships.

Associate of Science, Construction Technology (Site-Based Partnership)

Associate of Science, Construction Technology Two Year Plan

Total Program Hours - 60 Credit Hours

Foundational Core - 25 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - Select One (1) of the Following with lab (4 Credit Hours):

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

- OR -

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

- OR -

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles,

energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

- OR -

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One (1) of the Following (3 Credit Hours):

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 18 Credit Hours

CNST 2013 - PLAN READING, SPECS, AND BLDG CODES

This course is designed to introduce the student to the primary design of construction design drawings, provide an understanding of reading construction design plans, (primarily architectural and structural), discover the origins and importance of building codes and their impact on the built environment and safety. This course will cover the 16 divisions within construction specification

Credits: 3

CNST 2023 - BUILDING MATERIALS AND METHODS

This course introduces students to the basic building materials and systems used in constructing buildings, bridges, and infrastructure projects. It offers the basic understanding of the use of common systems such as foundations, structural framing, building envelope systems, and finishes. Students will learn proper terminology and usage of wood, steel, and concrete materials.

Prerequisites & Notes

NULL

Credits: 3

CNST 2033 - AUTO CAD/INTRODUCTION TO BIM

This course is designed to provide the student with an introductory level understanding of the operation and function of Auto Cad program in developing architectural drawings. In addition, this course will provide the student with an entry level understanding of how Auto Cad designs can also provide three dimensional views, section cuts, etc of designed construction drawings.

Credits: 3

CNST 2113 - HVAC AND ELECTRICAL

This course is designed to cover the basic electrical safety and electrical theory such as Ohms Law, circuit schematics and circuit characteristics/symbols as it applies to DC and AC circuits in the HVACR industry. Basic control circuits, sequence of operation for basic HVACR applications and electric motor theory, as well as specific information on HVACR electrical component devices will also be covered.

Credits: 3

CNST 2123 - FUNDAMENTALS OF PLUMBING

This course introduces basic plumbing tools, materials, and fixtures. Topics include standard tools, materials, and fixtures used in basic plumbing systems and other related topics. Upon completion, students should be able to demonstrate an understanding of a basic plumbing system.

Credits: 3

CNST 2903 - CONTRACT AND CONSTRUCTION LAW

This course will provide the student with an introductory knowledge of contracts, the components therein, as well as responsibilities of those contracting parties. Specifically for construction, the student will learn various project delivery methods including lump sum contracting, construction management, design-build, cost-plus-fixed-fee, guaranteed maximum (GMP).

Credits: 3

Divine Design (Minor, Electives, Experiential Learning) - 17 Credit Hours

To meet the Divine Design requirement, student may earn credit hours in general elective courses, declare minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 hr), PRAC 1002 (2 hrs), PRAC 1003 (3 hrs), PRAC 1004 (4 hrs), and PMIN 2303 (3 hrs) up to a total of 24 credit hours. General Electives are any college-level courses that do not satisfy the above program requirements. Student must complete the above program requirements, with remaining credit hours earned in Divine Design to meet the total program hours.

Minor, Project Management (Site-Based Partnership)

Minor, Construction Technology (Site-Based Partnership)

Total Program Hours - 18 Credit Hours

Minor Core - 18 Credit Hours

CNST 2013 - PLAN READING, SPECS, AND BLDG CODES

This course is designed to introduce the student to the primary design of construction design drawings, provide an understanding of reading construction design plans, (primarily architectural and structural), discover the origins and importance of building codes and their impact on the built environment and safety. This course will cover the 16 divisions within construction specification

Credits: 3

CNST 2023 - BUILDING MATERIALS AND METHODS

This course introduces students to the basic building materials and systems used in constructing buildings, bridges, and infrastructure projects. It offers the basic understanding of the use of common systems such as foundations, structural framing, building envelope systems, and finishes. Students will learn proper terminology and usage of wood, steel, and concrete materials.

Prerequisites & Notes

NULL

Credits: 3

CNST 2033 - AUTO CAD/INTRODUCTION TO BIM

This course is designed to provide the student with an introductory level understanding of the operation and function of Auto Cad program in developing architectural drawings. In addition, this course will provide the student with an entry level understanding of how Auto Cad designs can also provide three dimensional views, section cuts, etc of designed construction drawings.

Credits: 3

CNST 2113 - HVAC AND ELECTRICAL

This course is designed to cover the basic electrical safety and electrical theory such as Ohms Law, circuit schematics and circuit characteristics/symbols as it applies to DC and AC circuits in the HVACR industry. Basic control circuits, sequence of operation for basic HVACR applications and electric motor theory, as well as specific information on HVACR electrical component devices will also be covered.

Credits: 3

CNST 2123 - FUNDAMENTALS OF PLUMBING

This course introduces basic plumbing tools, materials, and fixtures. Topics include standard tools, materials, and fixtures used in basic plumbing systems and other related topics. Upon completion, students should be able to demonstrate an understanding of a basic plumbing system.

Credits: 3

CNST 2903 - CONTRACT AND CONSTRUCTION LAW

This course will provide the student with an introductory knowledge of contracts, the components therein, as well as responsibilities of those contracting parties. Specifically for construction, the student will learn various project delivery methods including lump sum contracting, construction management, design-build, cost-plus-fixed-fee, guaranteed maximum (GMP).

Credits: 3

Minor, Plumbing Technician Services (Site-Based Partnership)

Total Program: 18 Credit Hours

Minor Core - 18 Credit Hours

PLMB 2303 - SAFETY AND CONCEPTS I

In this course, the student will learn how to identify various types of pipe, fittings, and valves as well as their function in the piping system. The student will also be able to describe the anatomy of a gas and electric water heater and the controls for each.

Prerequisites & Notes

NULL

Credits: 3

PLMB 2313 - SAFETY AND CONCEPTS II

In this course, the student will be able to describe materials for residential gas piping including pipe type and sizing, tubing, pipe support, and protection for gas systems. The student will also gain an understanding of PVC, flex, and metal pipe leak detection and repair techniques.

Credits: 3

PLMB 2103 - TECHNICIAN FUNDAMENTALS I

In this course, the student will learn how to compare and contrast supply and DWV piping and how they are affected by pressure and gravity. The learner will also gain an understanding of the installation tools required for various plumbing fixtures.

Credits: 3

PLMB 2113 - TECHNICIAN FUNDAMENTALS II

In this course, the student will gain an understanding of various fixture drains, analyze and apply water test data to determine treatment solutions as well as be able to describe the function and application of water softeners, filters, etc.

Prerequisites & Notes

NULL

Credits: 3

PLMB 3203 - APPLIED COMPETENCIES I

In this course, the student will learn how to analyze drain clogs and explain repair procedures; analyze and repair manual and automatic flushometers as well as replace damaged cast iron fittings and pipe.

Prerequisites & Notes

NULL

Credits: 3

PLMB 3213 - APPLIED COMPETENCIES II

In this course, the student will learn to troubleshoot and repair common symptoms of a faulty gas heater. The student will gain a full understanding of how to install tankless water heaters.

Prerequisites & Notes

NULL

Credits: 3

Minor, Electrical Technician Services (Site-Based Partnership)

Minor, HVAC Technician Services (Site-Based Partnership)

Total Program Hours - 18 Credit Hours

Minor Core - 18 Credit Hours

HVAC 2303 - SAFETY AND CONCEPTS I

In this course, the student will learn how to identify three mechanisms of heat transfer, how temperature affects molecular motion as well as the basic use of evaporators and compressors.

Credits: 3

HVAC 2333 - SAFETY AND CONCEPTS II

In this course, the student will gain an understanding of the Clean Air Act as well as the usage of refrigerants and safety protocols for usage of refrigerants and basic electrical concepts.

Credits: 3

HVAC 2103 - TECHNICIAN FUNDAMENTALS I

In this course, the student will learn to diagnose common component faults and usage of the voltmeter, ohmmeters, ammeter and multimeter among other system tools. The student will develop the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

HVAC 2113 - TECHNICIAN FUNDAMENTALS II

In this course, the student will learn how to work with refrigerants and apply techniques to ensure safety, detect leaks and interpret charts connected to the EPA 608 Exam. The student will develop the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

HVAC 3203 - APPLIED COMPETENCIES I

In this course, the student will learn the proper application of skills and concepts in the field such as diagnosing common mechanical and wiring faults by way of fault codes and trouble.

Credits: 3

HVAC 3213 - APPLIED COMPETENCIES II

In this course, the student will learn how to diagnose problems with electrical equipment and how to mitigate the dangers of an older panel and/or electrical system. The student will demonstrate proper application of skills and concepts in the field.

Credits: 3

Other Programs

Associate of Applied Science, Plumbing Technician Service Two Year Plan

Year One

FALL SEMESTER - 16

PRAC 1002 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 2-credit practicum course equates to roughly 80 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 2 times for a total of 4 credit hours

Credits: 2

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

PLMB 2103 - TECHNICIAN FUNDAMENTALS I

In this course, the student will learn how to compare and contrast supply and DWV piping and how they are affected by pressure and gravity. The learner will also gain an understanding of the installation tools required for various plumbing fixtures.

Credits: 3

PLMB 2303 - SAFETY AND CONCEPTS I

In this course, the student will learn how to identify various types of pipe, fittings, and valves as well as their function in the piping system. The student will also be able to describe the anatomy of a gas and electric water heater and the controls for each.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (3 Credit Hours)

SPRING SEMESTER - 14 Credit Hours

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

PLMB 2313 - SAFETY AND CONCEPTS II

In this course, the student will be able to describe materials for residential gas piping including pipe type and sizing, tubing, pipe support, and protection for gas systems. The student will also gain an understanding of PVC, flex, and metal pipe leak detection and repair techniques.

Credits: 3

Year Two

FALL SEMESTER- 15 Credit Hours

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

TRDS 2003 - CUSTOMER SERVICE

In this course the student will learn the importance of customer service, improve upon their interpersonal skills, and learn how to navigate difficult situations that may arise while out in the field to ensure customer satisfaction and a quality service is provided.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2113 - AMERICAN HISTORY II

This course is a study of American history from 1877 to the present. Topics include the New South, the New West, foreign affairs, industrialization, the Progressive Era, the World War I, the Great Depression, World War II, the Cold War, and present issues.

Prerequisites & Notes

EDI Global only.

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

SPRING SEMESTER - 15 Credit Hours

PRAC 1002 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 2-credit practicum course equates to roughly 80 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 2 times for a total of 4 credit hours

Credits: 2

Natural-Scientific Inquiry - Select One with Lab:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

Quantitative Inquiry - Select One:

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Associate of Science, Construction Technology Two Year Plan

Year One

FALL SEMESTER - 16 Credit Hours

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded

arguments, and prepare students for future academic success.

Credits: 3

CNST 2113 - HVAC AND ELECTRICAL

This course is designed to cover the basic electrical safety and electrical theory such as Ohms Law, circuit schematics and circuit characteristics/symbols as it applies to DC and AC circuits in the HVACR industry. Basic control circuits, sequence of operation for basic HVACR applications and electric motor theory, as well as specific information on HVACR electrical component devices will also be covered.

Credits: 3

CNST 2023 - BUILDING MATERIALS AND METHODS

This course introduces students to the basic building materials and systems used in constructing buildings, bridges, and infrastructure projects. It offers the basic understanding of the use of common systems such as foundations, structural framing, building envelope systems, and finishes. Students will learn proper terminology and usage of wood, steel, and concrete materials.

Prerequisites & Notes

NULL

Credits: 3

SPRING SEMESTER - 14 Credit Hours

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

CNST 2013 - PLAN READING, SPECS, AND BLDG CODES

This course is designed to introduce the student to the primary design of construction design drawings, provide an understanding of reading construction design plans, (primarily architectural and structural), discover the origins and importance of building codes and their impact on the built environment and safety. This course will cover the 16 divisions within construction specification

Credits: 3

CNST 2033 - AUTO CAD/INTRODUCTION TO BIM

This course is designed to provide the student with an introductory level understanding of the operation and function of Auto Cad program in developing architectural drawings. In addition, this course will provide the student with an entry level understanding of how Auto Cad designs can also provide three dimensional views, section cuts, etc of designed construction drawings.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Year Two**FALL SEMESTER - 15 Credit Hours****PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM**

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

CNST 2123 - FUNDAMENTALS OF PLUMBING

This course introduces basic plumbing tools, materials, and fixtures. Topics include standard tools, materials, and fixtures used in basic plumbing systems and other related topics. Upon completion, students should be able to demonstrate an understanding of a basic plumbing system.

Credits: 3

CNST 2903 - CONTRACT AND CONSTRUCTION LAW

This course will provide the student with an introductory knowledge of contracts, the components therein, as well as responsibilities of those contracting parties. Specifically for construction, the student will learn various project delivery methods including lump sum contracting, construction management, design-build, cost-plus-fixed-fee, guaranteed maximum (GMP).

Credits: 3

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Divine Design (5 Credit Hours)

Associate of Science, Project Management Two Year Plan

Year One

FALL SEMESTER - 16 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

PRJM 2023 - BUSINESS PROCESS ANALYSIS

This course will enable students to work effectively with stakeholders to define their business requirements, shape the output of projects and drive successful business outcomes. It also prepares students for the internationally recognized Professional in Business Analysis (PMI-PBA) certification exam by Project Management Institute based on experience.

Credits: 3

PRJM 2033 - QUALITY MANAGEMENT

This course enables students to examine the strategic role of quality within an organization, as well as strategic issues involved in managing quality. Topics include assessing customer requirements, developing customer focus, measuring quality performance and applying principles of quality management throughout the Project Life Cycle.

Credits: 3

Divine Design (6 Credit Hours)

SPRING SEMESTER - 15 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

PRJM 2043 - PROJECT RISK MANAGEMENT

This course will enable students to demonstrate knowledge and expertise in the specialized area of assessing and identifying project risks along with plans to mitigate threats and capitalize on opportunities. It also prepares students for the internationally recognized Risk Management Professional (PMI-RMP) certification exam by Project Management Institute based on experience.

Credits: 3

PRJM 2053 - AGILE PROJECT MANAGEMENT

This course will enable students to apply agile principles and practices on projects. It also prepares students for the internationally recognized Agile Certified Practitioner (PMI-ACP) certification exam by Project Management Institute based on experience.

Credits: 3

Natural-Scientific Inquiry - Select One with Lab:

Credits: 1

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

Year Two

FALL SEMESTER - 15 Credit Hours

PRJM 2103 - SELECTED TOPICS IN MANAGEMENT

Current topics, issues, and trends pertinent to supervisors and managers are discussed. Topical selections rotate each term; view course search information for details on topics offered each term. PR: Senior level status or permission of the chair is required. This course is repeatable for credit two (2) times.

Credits: 3

CNST 3123 - PLANNING AND SCHEDULING

In this course, students will learn high-level planning for relevant processes, and procedures to achieve project goals. Project planning, scheduling and monitoring of construction projects including development of critical path networks (CPM & PERT), Gantt bar charts and construction cost control and reporting practices. Prepares students for the internationally recognized Scheduling Professional (PMI-SP) certification exam by Project Management Institute based on experience.

Credits: 3

- OR -

PRJM 2123 - PLANNING AND SCHEDULING

In this course, students will learn high-level planning for relevant processes, and procedures to achieve project goals. Project planning, scheduling and monitoring of construction projects including development of critical path networks (CPM & PERT), Gantt bar charts and construction cost control and reporting practices. Prepares students for the internationally recognized Scheduling Professional (PMI-SP) certification exam by Project Management Institute based on experience.

Credits: 3

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

Divine Design (3 Credit Hours)

SPRING SEMESTER - 14 Credit Hours

PRJM 2133 - PROJECT MANAGEMENT CAPSTONE

This course focuses on the integration of knowledge, skills and abilities learned in the program through a capstone project. To be taken during the last semester of the program.

Credits: 3

PRJM 2013 - APPLIED PROJECT MANAGEMENT

This course will enable students to effectively use industry-recognized project management software. Students will learn to effectively manage a project by breaking it down into manageable parts and creating a schedule outline with task dependencies. They will apply these skills in real-world scenarios, utilizing resources and calendars to track schedules and costs, employing Earned Value Management and the Critical Path Method to ensure timely completion. Students will communicate progress through engaging status reports and correctly close the project for future reference.

Prerequisites & Notes

Prerequisite: None

Corequisite: PRJM 2103

Credits: 3

- OR -

CNST 4013 - CONSTRUCTION PROJECT MANAGEMENT

In this course, students will learn the phases of the construction process, design development, and pre-construction stages of a project. Students will learn the project life cycle; the roles of the owner, architect, engineer, and contractor; organizing the project and selecting a team; concept and scope review; establishing objectives; identifying potential issues; reviewing general conditions.

Credits: 3

Quantitative Inquiry - Select One:

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (2 Credit Hours)

Associate of Applied Science, HVAC Technician Services Two Year Plan**Year One****FALL SEMESTER - 15 Credit Hours****PRAC 1002 - EXPERIENTIAL LEARNING PRACTICUM**

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts,

and receive evaluation that can be used for future growth. The 2-credit practicum course equates to roughly 80 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 2 times for a total of 4 credit hours

Credits: 2

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

HVAC 2103 - TECHNICIAN FUNDAMENTALS I

In this course, the student will learn to diagnose common component faults and usage of the voltmeter, ohmmeters, ammeter and multimeter among other system tools. The student will develop the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

HVAC 2303 - SAFETY AND CONCEPTS I

In this course, the student will learn how to identify three mechanisms of heat transfer, how temperature affects molecular motion as well as the basic use of evaporators and compressors.

Credits: 3

Divine Design (3 Credit Hours)

SPRING SEMESTER - 16 Credit Hours

PRAC 1002 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 2-credit practicum course equates to roughly 80 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 2 times for a total of 4 credit hours

Credits: 2

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

HVAC 2113 - TECHNICIAN FUNDAMENTALS II

In this course, the student will learn how to work with refrigerants and apply techniques to ensure safety, detect leaks and interpret charts connected to the EPA 608 Exam. The student will develop the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

HVAC 2333 - SAFETY AND CONCEPTS II

In this course, the student will gain an understanding of the Clean Air Act as well as the usage of refrigerants and safety protocols for usage of refrigerants and basic electrical concepts.

Credits: 3

Divine Design (3 Credit Hours)

Year Two

FALL SEMESTER - 14 Credit Hours

HVAC 3203 - APPLIED COMPETENCIES I

In this course, the student will learn the proper application of skills and concepts in the field such as diagnosing common mechanical and wiring faults by way of fault codes and trouble.

Credits: 3

PRAC 1002 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 2-credit practicum course equates to roughly 80 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 2 times for a total of 4 credit hours

Credits: 2

TRDS 2003 - CUSTOMER SERVICE

In this course the student will learn the importance of customer service, improve upon their interpersonal skills, and learn how to navigate difficult situations that may arise while out in the field to ensure customer satisfaction and a quality service is provided.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

SPRING SEMESTER - 15 Credit Hours

PRAC 1002 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 2-credit practicum course equates to roughly 80 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 2 times for a total of 4 credit hours

Credits: 2

HVAC 3213 - APPLIED COMPETENCIES II

In this course, the student will learn how to diagnose problems with electrical equipment and how to mitigate the dangers of an older panel and/or electrical system. The student will demonstrate proper application of skills and concepts in the field.

Credits: 3

Quantitative Inquiry - Select One:

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Natural-Scientific Inquiry - Select One with Lab:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

- OR -

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

- OR -

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

Associate of Applied Science, Electrical Technician Services Two Year Plan

Year One

FALL SEMESTER - 15 Credit Hours

PRAC 1002 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. Repeatable: Course can be repeated 2 times for a total of 4 credit hours

Credits: 2

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ELPT 2013 - ELECTRICAL THEORY & NEC

In this course, the student will learn how Kirchhoff's Law and Ohm's Law apply to a series of circuits including developing a broad understanding of the most recent version of the NFPA70 National Electrical Codes.

Credits: 3

ELPT 2103 - TECHNICIAN FUNDAMENTALS I

In this course, the student will learn how to apply math skills in the field of electrical work as well as explain the use of a voltmeter. The student will begin developing the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

Divine Design (3 Credit Hours)

SPRING SEMESTER - 14 Credit Hours

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ELPT 2023 - SAFETY & ELECTRICAL CONCEPTS

In this course, the student will gain an understanding of the dangers of working in the electrical field as well as Personal Protective Equipment requirements. The student will learn the purposes and techniques of lockout/tagout.

Credits: 3

ELPT 2113 - TECHNICIAN FUNDAMENTALS II

In this course, the student will gain an understanding of electrical related service calls, learn the intricacies of the American Wire Gauge system as well as learn how transformers function. The student will continue developing the concepts learned previously into practical skills needed to work in the field as a technician.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Year Two

FALL SEMESTER - 15 Credit Hours

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

- OR -

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

Quantitative Inquiry - Select One:

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Bachelor of Science, Construction Technology Four Year Plan

Year One

FALL SEMESTER - 16 Credit Hours

BBUS 2103 - MACROECONOMICS

This course will cover basic concepts of supply and demand, production possibilities, the circular flow concept and related topics of GDP, inflation, and employment/unemployment, fiscal and monetary policy, and the workings of the monetary system.

*Do not register for this course if you have taken BUSI 2103

Prerequisites & Notes

None

Credits: 3

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

SPRING SEMESTER - 15 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - Select One:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

- OR -

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

- OR -

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

Quantitative Inquiry - Select One:

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

Divine Design (3 Credit Hours)

Year Two

FALL SEMESTER - 15 Credit Hours

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CNST 2013 - PLAN READING, SPECS, AND BLDG CODES

This course is designed to introduce the student to the primary design of construction design drawings, provide an understanding of reading construction design plans, (primarily architectural and structural), discover the origins and importance of building codes and their impact on the built environment and safety. This course will cover the 16 divisions within construction specification

Credits: 3

CNST 2023 - BUILDING MATERIALS AND METHODS

This course introduces students to the basic building materials and systems used in constructing buildings, bridges, and infrastructure projects. It offers the basic understanding of the use of common systems such as foundations, structural framing, building envelope systems, and finishes. Students will learn proper terminology and usage of wood, steel, and concrete materials.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

SPRING SEMESTER - 15 Credit Hours

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

CNST 2033 - AUTO CAD/INTRODUCTION TO BIM

This course is designed to provide the student with an introductory level understanding of the operation and function of Auto Cad program in developing architectural drawings. In addition, this course will provide the student with an entry level understanding of how Auto Cad designs can also provide three dimensional views, section cuts, etc of designed construction drawings.

Credits: 3

CNST 2113 - HVAC AND ELECTRICAL

This course is designed to cover the basic electrical safety and electrical theory such as Ohms Law, circuit schematics and circuit characteristics/symbols as it applies to DC and AC circuits in the HVACR industry. Basic control circuits, sequence of operation for basic HVACR applications and electric motor theory, as well as specific information on HVACR electrical component devices will also be covered.

Credits: 3

CNST 3013 - PROJECT ESTIMATING

This course is an introduction to cost estimating of a construction project. Topics include generating preliminary cost estimates from early phase design drawings and specifications, and estimating techniques used to prepare a final bid for a project, including quantity take offs, material pricing, labor costs, and general conditions.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Year Three

FALL SEMESTER - 15 Credit Hours

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

CNST 2123 - FUNDAMENTALS OF PLUMBING

This course introduces basic plumbing tools, materials, and fixtures. Topics include standard tools, materials, and fixtures used in basic plumbing systems and other related topics. Upon completion, students should be able to demonstrate an understanding of a basic plumbing system.

Credits: 3

CNST 2903 - CONTRACT AND CONSTRUCTION LAW

This course will provide the student with an introductory knowledge of contracts, the components therein, as well as responsibilities of those contracting parties. Specifically for construction, the student will learn various project delivery methods including lump sum contracting, construction management, design-build, cost-plus-fixed-fee, guaranteed maximum (GMP).

Credits: 3

Divine Design (6 Credit Hours)

SPRING SEMESTER - 15 Credit Hours

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

CNST 3123 - PLANNING AND SCHEDULING

In this course, students will learn high-level planning for relevant processes, and procedures to achieve project goals. Project planning, scheduling and monitoring of construction projects including development of critical path networks (CPM & PERT), Gantt bar charts and construction cost control and reporting practices. Prepares students for the internationally recognized Scheduling Professional (PMI-SP) certification exam by Project Management Institute based on experience.

Credits: 3

CNST 3113 - PROPOSAL WRITING AND TENDER

This course provides a foundation in the skills and knowledge required to effectively create proposals for various project scenarios and requests for proposal (RFP). This course emphasizes best practices in management, presentations, managing proposal efforts, and client relationships.

Credits: 3

Divine Design (6 Credit Hours)

Year Four

FALL SEMESTER - 15 Credit Hours

PRAC 1003 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts, and receive evaluation that can be used for future growth. The 3-credit practicum course equates to roughly 120 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 8 times for a total of 24 credit hours

Credits: 3

CNST 4013 - CONSTRUCTION PROJECT MANAGEMENT

In this course, students will learn the phases of the construction process, design development, and pre-construction stages of a project. Students will learn the project life cycle; the roles of the owner, architect, engineer, and contractor; organizing the project and selecting a team; concept and scope review; establishing objectives; identifying potential issues; reviewing general conditions.

Credits: 3

CNST 4023 - COMMUNICATION AND LEADERSHIP

In this course, the student will be exposed to and develop active listening skills to better enable students to communicate. Topics include the functions, foundations, models, and modes of communication.

Credits: 3

Divine Design (6 Credit Hours)

SPRING SEMESTER - 14 Credit Hours

PRAC 1002 - EXPERIENTIAL LEARNING PRACTICUM

The experiential learning practicum is designed to stress application of learning and reflection in the community, ministry, and workplace environments. Students will be supervised by a practicum supervisor on-site as they serve in community organizations, student leadership, ministry roles, campus employment, internships, or cooperative education experiences. The purpose of the experiential learning practicum course is to provide a critical reflection space for students to document their ministry experience, reflect on their learning and engagement with relevant texts,

and receive evaluation that can be used for future growth. The 2-credit practicum course equates to roughly 80 contact hours of applied learning.

Students may take up to a combined total of 24 credit hours of PRAC-1001, 1002, 1003, and 1004 practicum credits.

Prerequisites & Notes

Prerequisite: None

Repeatable: Course can be repeated 2 times for a total of 4 credit hours

Credits: 2

Divine Design (12 Credit Hours)

Course Descriptions

ACAD 1000 - CONTINUATION OF ACADEMY

ACCT 3703 - ADVANCED ACCOUNTING APPLICATIONS IN EXCEL

Admission Policies

Admission policies for Southeastern University's programs are outlined in the below Admission Policy Manual. The policy manual outlines the admission process, application and fees, transcript, test score and documentation requirements for each student population. Unique admission policies for online, regional and extension, and certificate programs are provided.

Scholarship Awarding

Immediately following the acceptance of a student, the Enrollment Counselor will also review the student's GPA and test scores (if applicable) for academic scholarship eligibility.

New freshman and transfer students qualify for the scholarships listed on our website annually. Re-applicants and Status Change students will be viewed as a transfer student while going through the admission/financial aid process.

Other scholarship and grant funding will be determined either by the FAFSA application, and/or additional scholarship application required for those who qualify. A list of other institutional scholarships can be found on the SEU website.

Federal Financial Aid Programs

Southeastern University participates in the following Federal financial aid programs: Federal Pell Grant, Federal TEACH Grant, Federal Supplemental Opportunity Grant (FSEOG), Federal Direct student loans (Subsidized and Unsubsidized), Federal Parent PLUS loans, Federal Graduate PLUS loans, and Federal Work Study. You may review the federal funding details on our website at <https://seu.edu/admission/financial/scholarships/>

Eligibility for federal financial aid programs is determined by submission of an annual Free Application for Federal Student Aid (FAFSA) on the www.studentaid.gov website.

Amounts may vary based on financial need and federal funding authorizations annually.

Contact the Office of Student Financial Services for more information at sfs@seu.edu.

Florida Resident Financial Aid Programs

Southeastern University participates in several state scholarship and grant programs. Students must meet all residency and academic or need-based requirements to qualify annually.

Florida Bright Futures Scholarships: Awarded to Florida high school graduates who demonstrate high academic achievement. The State of Florida Office of Student Financial Assistance determines eligibility for students finishing their high school degree. Contact your high school guidance counselor for more information. Award amounts are determined annually and awarded per credit hour as established by the state.

Florida EASE Grant (Formerly Florida Resident Access Grant or FRAG): Offered to full time, undergraduate students enrolled full time in an eligible degree seeking program. An EASE Grant application and proof of residency is required. Award amounts vary annually based on state appropriations.

Florida Student Assistance Grant: A need-based state funded grant for full-time, undergraduate Florida residents. Must submit the Free Application for Federal Student Aid (FAFSA) and meet the SAI (formerly called the EFC) requirements as well as residency requirements to qualify. Funding is limited and determined annually by the state.

Florida Prepaid: A student who is eligible for the Florida Prepaid program should receive a letter from Florida Prepaid, which will direct the student to complete a transfer form. The form must be submitted to Florida Prepaid in order to authorize Southeastern University to receive payments. – Amounts vary based on the program selected.

Contact SEU's Office of Student Financial Services for more information at sfs@seu.edu

Other Aid

Third-Party Scholarships:

The following sites are just a few of the possible places to begin finding outside scholarship opportunities for which you might choose to apply:

- [Chegg](#)
- [College Board's Scholarship Search](#)
- [Fastweb](#)
- [Federal Student Aid](#)
- [Hispanic Association of Colleges and Universities](#)
- [Scholarships.com](#)
- [Scholarship Experts](#)
- [StudentScholarships.org](#)

Third-Party Loans:

Alternative private loans are available from a variety of lenders and are designed to help cover costs not covered by federal and institutional financial aid. You should apply for federal financial aid (FAFSA) before considering an alternative private loan. FastChoice provides a list of the university's preferred private lenders and allows current students and prospective students to apply for a private alternative loan. We encourage all students to investigate federal loan options first before making a decision. To review more information, please visit <https://seu.edu/admission/financial/loan-information/>

Other Admission Processes

Dual Enrollment

Program Overview

- Southeastern University offers dual enrollment credit through on campus, online, extension site, and home schooling course options.
- Prospective dual enrolled students must be at least 16 years old and have a high school GPA of 3.0 or higher in order to enroll in dual enrollment courses.

· In applicable states, prospective dual enrollment student must qualify as an "Ability-to-Benefit" student (e.g.: CA).

- Any freshman- or sophomore-level courses (that do not require prerequisites) can be taken.
- Students can complete up to 14 credit hours per year.

Admission Requirements

1. Submit the dual enrollment application.
2. Submit a dual enrollment agreement form.
3. Submit Ability-to-Benefit test scores.

Southeastern University is a Christ-centered institution of higher learning. The educational programs of Southeastern University are designed to foster successful academic achievement in order to equip students to discover and develop their divine design, to serve Christ and the world through Spirit-empowered life, learning, and leadership. We are committed to equipping the next generation of leaders so that they can go into the world as influential servants in their careers and their communities.

This catalog gives general information on the academic regulations and degree requirements. In upgrading all areas of the university, Southeastern University reserves the right to change the rules regulating admission, instruction, graduation and any other activity affecting the student body, including prospective students and currently enrolled students.

New Students

New students must complete the Admission process before they may register for classes. New students must submit:

A high school transcript with the graduation date listed by the beginning of the semester. Transfer students with at least 60 earned credits on a college or university transcript that are eligible for transfer will not need to submit the high school transcript.

Students eligible for an English Composition I course exemption due to ACT/SAT test scores must make up the waived credit in general elective. An exemption or waiver does not grant academic credit. An ACT score of 26 or higher in the English section or an SAT score of 700 or higher in the EBRW section is required for exemption.

Students who have completed the admission process will receive an instructional email from the Registrar's office that includes information for new student registration. Students needing assistance may call or email the Registrar's office (phone: 863-667-5015; email: registrar@seu.edu) or the student's assigned Academic Advisor.

Orientation

Upon acceptance, new students should access the new student virtual orientation located on the SEU website. Students will learn to navigate financial aid processes, how to access student support services, and how to register for the appropriate courses. The virtual orientation also directs students to our online bookstore, where they can purchase all required textbooks and course materials they need. This portal walks each student through all the necessary steps for a successful start.

The Academic Year

Main Campus Programs

Southeastern University operates its main campus-based programs on a fall and spring semester system with an optional summer semester.

The fall and spring semesters are normally 16 weeks in length. Class sessions during the regular semesters are scheduled so that they equate to 15 fifty-minute sessions per credit hour, although they may vary depending on the nature of the instruction and schedule. Hybrid classes, mixing online and individual study with face-to-face sessions, are also held, as well as some online delivery courses, structured for campus-based students.

The summer semester typically consists of study abroad and internship opportunities over a 16 week semester, and two eight week online course sessions.

Traditional main campus students are permitted to take up to two courses via online delivery in each fall and spring semester and up to four courses in the online delivery each summer semester. Courses will be billed according to the traditional student tuition rate in the fall and spring, but the reduced online per credit hour rate will be billed in the summer term.

SEU Network Programs

Southeastern University operates its online and partner site programs on a fall and spring semester system with an optional summer semester.

The fall, spring, and summer semesters are 16 weeks in length, comprised of two 8 week back to back sessions in each semester.

Class Attendance Policy

Students are both expected and encouraged to attend classes regularly. The lack of attendance may affect a student's grade.

In online courses, attendance is collected in the first week when the student completes the SEU Student Acknowledgement. Failure to complete the acknowledgment will result in the student being dropped from the course. Ongoing participation in the online course is expected through class discussions, assignment submissions, synchronous sessions, and other integrated assessments. Please review the online course syllabus for details.

Students in face to face courses must complete the Student Acknowledgement in MyFire during week 1 of the course. Failure to complete the acknowledgment will result in the student being removed from the course. A student may miss a class without penalty equal to the number of times a class meets per week as follows:

- If the class meets once a week, a student may miss one class.
- If the class meets two times a week, a student may miss two classes.
- If the class meets three times a week, a student may miss three classes.

If a student's absences exceed the number of times a class meets per week, a professor may:

- Subject the student to a penalty of not more than one letter grade based on attendance alone.
- Recommend to the Registrar that a student with excessive absences be withdrawn from the course.

Working within the framework of the above guidelines, faculty will clearly articulate their attendance policy in the course syllabus.

Prolonged and/or unusual absences not covered by the policy may be appealed to the Office of the Registrar by either the professor or the student. Appeals must be submitted in writing.

Syllabi

Please refer to our Academic Policies: Syllabi page.

Classification of Students

A student is classified as a degree seeking or non-degree seeking student.

Undergraduate degree seeking students are classified by the number of earned semester hours of credit.

The qualifications for each class level are:

- Freshman 0 to 29 hours*
- Sophomore 30 to 59 hours*
- Junior 60 to 89 hours
- Senior 90+ hours

*The associate's degree typically comprises the freshman and sophomore years and may transfer on a course-by-course basis toward a bachelor's degree. Students who earn an associate's degree typically begin a bachelor's degree as a junior.

Degree Seeking

Undergraduate degree seeking students apply through Admission as degree seeking and take classes that apply to an associate's or bachelor's degree with the intent of completing the degree program. A minimum of 25% of an undergraduate degree must be earned at Southeastern University in accordance with SACSCOC standards.

Non-Degree Seeking

A student who is not pursuing a degree program is considered non-degree seeking. An admission application for non-degree seeking enrollment is required for admission.

- Certificate-Seeking - The student is taking courses that comprise a certificate, separate from or independent of an associate's or bachelor's degree program.
- Audit status - The student is enrolled in a course for which he or she will not earn credit. A grade and credit type of AU is posted to the transcript and is not transferable for credit to another institution. Auditing a course does not result in or impact GPA.
- In-service Teacher status - The Polk County teacher-employee taking courses to meet requirements for certain state certifications.
- Special status - An individual taking any course for personal or professional reasons without the intent of acquiring a degree.
- Academy Program - Students taking annual courses to obtain certification, licensing, or ordination with the Assemblies of God.
- Transient status - The student is classified as a degree candidate from another institution who enrolls at SEU for the purpose of transferring credits back to the host school. A transient student must present an official statement attesting to good standing at his/her institution and approval of courses to be taken at Southeastern University, generally in the form of a transient letter.
- Dual-Enrollment status - The high school student taking courses to gain high school and college concurrent credit. Courses taken must be approved by the student's high school guidance counselor.

Internships and Practicum

Experiential learning courses are designed primarily for degree-seeking students who work in partnership with advisors and faculty mentors on preparation and placement over multiple terms. As representatives of SEU to employers, community partners, and affiliates, placements in practicum and internships are prioritized for current degree-seeking students. On a limited basis and with the approval of the Director of Experiential Learning or applicable department chair, non-degree-seeking students may be considered on a case-by-case basis for practicum and experiential learning courses.

Students Seeking a Certificate

Certificates are offered at the undergraduate division as standalone credentials, or, when available, integrated into a bachelor's degree program. Students seeking a standalone certificate should apply through SEU Admission as a non-degree certificate-seeking student. Financial aid is not available for standalone undergraduate certificate programs.

Certificates Integrated into Degree Program

Courses required for a certificate may double count toward a full degree program within the following parameters: if the certificate courses are embedded into the full degree course requirements, or, if the courses required for the certificate meet the required divine design elective credit hours toward the full degree program. Students enrolled in a full degree program may not simultaneously complete a certificate that does not meet these parameters. Students enrolled in both a certificate and full degree program will have both conferred at the same time even if the coursework for the certificate is completed prior to the full degree. A graduation application* must be submitted by the deadline for timely conferral of the certificate and degree.

Standalone Certificates

Courses earned in a standalone certificate may, upon completion of the certificate, apply on a course-by-course basis toward a full degree program should the student choose to advance into a full degree program in the same division as the certificate. Courses earned in a standalone certificate may also apply on a course-by-course basis toward another certificate, should course requirements overlap. A graduation application* must be submitted by the deadline for the timely conferral of the certificate. Currently, SEU does not offer financial aid, including Title IV funding, toward a standalone certificate program. Any cost incurred as a result of taking courses for a standalone certificate must be paid in full or may be paid via an approved SEU payment plan.

*A graduation application fee is generated at the time of processing and payment is required prior to the release of the certificate, diploma, and official transcript.

Students Seeking a Second Bachelor's Degree

Graduates holding a baccalaureate degree from an accredited U.S. institution that meets SEU's transfer eligibility requirements can apply for admission to pursue a second bachelor's degree at SEU. They must meet the regular admission requirements of the major, as applicable. These students, as well as students who earned the first bachelor's degree from Southeastern University, are considered to have completed SEU's Foundational Core requirements.

Students with degrees from institutions that do not meet SEU's transfer eligibility requirements or from foreign institutions may need to fulfill all or part of SEU's Foundational Core requirements as detailed in the SEU Undergraduate Catalog.

The university's minimum requirements for a second degree are 150 total credit hours (including the first bachelor's degree), including at least 30 credit hours (or 25% of the total degree program) in residence at SEU. This 25% must be earned through standard instruction and cannot be obtained through prior learning or test credit.

Departments and colleges may have additional requirements. Students transferring a first bachelor's degree are evaluated on a course-by-course basis according to SEU's credit transfer policies. Students must complete any remaining degree program requirements not met by transfer or other acceptable credit-granting methods.

Students seeking a second bachelor's degree are generally admitted at the senior level if their transferred credit was earned from a U.S. regionally accredited institution. All students should consult with Student Financial Services to learn about financial aid options for earning a second degree.

Course Schedules

The class schedule is developed with the degree-seeking student in mind. Certain courses are offered every semester, others during alternate semesters, or as needed. The university reserves the right to regulate the number of students in a class and to cancel any class with insufficient enrollment to justify its continuance.

Students may use the add/drop period to adjust their schedules due to canceled classes without incurring fees. Students are responsible for checking their course schedules during the add/drop period for class cancellations and additions, room relocations, class enrollment fluctuations, and assigned faculty changes.

Students are expected to note prerequisites or other special requirements when registering for specific courses. Students are not permitted to register for courses without completing prerequisites unless special permission is obtained from the chair of the department or the Dean of the college which offers the course.

The four digit numbering of courses represents the level of enrollment: freshman-1000; sophomore - 2000; junior - 3000; senior - 4000. The credit value of a course is listed with the description of the course in this catalog and appears in the Student Information System under the course offerings each term.

Appeals concerning enrollment and registration may be submitted to the Registrar.

Registration

Degree seeking students who have completed all admission requirements register for classes in MyPortal (JICS) according to advisor recommendations and the degree program 2 or 4 Year plan. Registration instructions and assistance are available through the Office of Academic Advising or the Office of the Registrar. Technical issues with MyPortal should be reported to helpdesk@seu.edu.

Registration for returning or continuing students:

- Is preceded by the open advising period. Students are encouraged to discuss their academic plans with advisors. Although advisors are available to guide students in course selection and degree fulfillment, the student is ultimately responsible for his or her own educational choices, by following the two or four year plans and degree program schedules.
- Is scheduled based on class level for Lakeland campus undergraduate students. Seniors, athletes, ADA, ROTC, and honors students will have first registration preference. Registration is then opened to juniors, sophomores, freshmen and all others.
- Is not based on class level for online or site based undergraduate students. All returning students who are cleared for registration can register as early as the first-day registration opens.

Registration for Incoming Students

- Incoming Lakeland campus undergraduate students can register for classes after all returning student registration has opened.
- Incoming online or site based undergraduate students can register for classes as early as the first day that registration opens for the semester, as long as all admission requirements have been met.
- Students requiring testing for placement, vocal or instrumental auditions, faculty advising or department chair /advisor approval will be assisted with registration during an Orientation when faculty members are on campus.

All students are expected to complete registration prior to the first day of class. However, schedule adjustments are permitted during the add/drop period without penalty. Each term's add/drop deadline is posted in the Academic Calendar. Late registration after that deadline is permitted only by the permission of the Registrar and requires a written appeal.

Add/Drop Policy

The add/drop period is designated as the first week of each term. Add/drop deadlines for all courses are one week after the start of the term, as designated in the Academic Calendar. Students may add, drop, or change their class schedule during this period. Students should see an academic advisor prior to making a scheduling change; however, the student is ultimately responsible for his or her educational choices and following the course plan for his or her degree.

Students are required to complete the SEU Student Acknowledgement in MyFire for every course enrolled by the add/drop deadline. Students who do not complete the SEU Student Acknowledgement may be removed from the course. This does not absolve the student of the responsibility to drop from the class. The student will be charged for every class on their schedule after the add/drop deadline closes.

The web registration permissions will be inactivated at 11:59 p.m. EST on the last day of the add/drop period. Failure to attend class or drop the course via your online account access is not proper procedure and may result in the recording of "F" grades. Technical difficulties on the final day of the drop/add period do not absolve the student from responsibility. Contact the Office of the Registrar for assistance.

Dropped course(s) will not appear on any permanent academic record, and no tuition or fees are charged for dropped courses.

Financial Aid is based on the total number of hours a student is enrolled in on the last day of the add/drop period. Schedule adjustments are not permitted after the add/drop deadline for this reason. Registration errors may be appealed by contacting the Office of the Registrar during that same semester.

Course Registration Appeals

Course drops after a semester add/drop deadline are not allowed without a written appeal from the student to the Registrar. The appeal must contain reasons that justify such an exception to the deadline. The outcome of a student appeal request will be based on the student's financial aid awarded, the point in time during the semester, and other contributing factors. A class that has been attempted cannot be dropped without an approved written appeal.

Course Load

The normal academic load is 15 hours per semester. This enables the student to complete associate degree requirements in approximately two years and bachelor's degree requirements in approximately four years. The minimum course load

for full-time classification is 12 hours per semester. A student may register for up to 17 hours per semester. Students may register for more than 17 credit hours in a semester within the following parameters:

Incoming freshmen with 0 credits earned may take up to 17 credits maximum

Returning students with a cumulative GPA of less than 2.5 are permitted to take 17 credits maximum (May not submit overload request)

Returning students with a cumulative GPA between 2.5 and 3.0 may be permitted to take up to 19 credit hours, but must sign the Petition for Overload Contract.

Returning students with a cumulative GPA between 3.0 and 3.49 are permitted to take up to 19 credit hours without signing the Petition for Overload Contract. Students must sign Petition for Overload Contract to take 20-21 hours.

Returning students with a cumulative GPA of 3.5 or higher may take up to 21 hours without signing the Petition for Overload Contract.

Main Campus Undergraduate Tuition

Main (Lakeland) campus students are billed for hours fewer than 12 and more than 17 at the regular (traditional student) credit hour tuition rate during the fall and spring semesters. Traditional students can take up to two online courses in a normal semester as part of their total 12 – 17 hours.

All courses will be billed according to the traditional student tuition rate or tuition package pricing for main campus traditional students in the fall and spring semesters. Traditional students are billed according to the reduced online tuition rate in the summer semester.

Online and Partner Site Undergraduate Tuition

The student will be billed at the regular (online or partner site) credit hour tuition rate. Partner Site students will be billed a site fee per semester in addition to tuition.

Certain majors may have different tuition rates. The SEU website offers information on current tuition rates.

Any additional student fees applied can be viewed on the student's bill in the MyPortal JICS Student Information System.

Semester Continuance Policy

Semester Continuance: Medical

A student may occasionally have an issue or life event that prohibits him/her from finishing a semester successfully within the 15 week or 8 week term. This Semester Continuance Policy is designed to assist a student in completing a semester of courses successfully by extending the deadline for a specified time in order to complete required coursework. Reasons can be varied and unexpected. Various triggers for continuation may be identified as medical, such as an accident resulting in an injury or hospitalization due to an unexpected illness, or emotional and psychological issues due to a personal trauma or criminal attack. A requested semester continuation for any of the above listed reasons will be coordinated by the Director of Academic and Auxiliary Services.

To be granted a semester continuance, a student must have successfully completed 60% of the course or courses, which is 9 weeks of a 15 week term or 5 weeks of an 8 week term, with satisfactory progress in each course under consideration for an extension of the coursework deadline.

Requests for a semester continuance are submitted to the Director of Academic and Auxiliary Services. Submission of medical or other appropriate documentation will be required. If the student has not yet completed 60% of the course and course work, it will be recommended that the student withdraw from the course. Depending on the situation and the amount of time that has been spent in the course or courses, a written appeal to drop the course or courses and financial charges or reparations of charges will be considered. The written appeal must be from the student rather than the parent if the student is able to write an appeal. The appeal will be reviewed by the Registrar. Southeastern University is not obligated to drop charges for any course that has been attempted past the drop/add deadline.

Professors of each course under consideration for an extension of the deadline will be consulted. The extension will be determined and documented in writing with a definite list of expectations and the new deadline for all assignments to be submitted. Failure to finish the coursework by the new deadline will result in the grade earned by the student. Again, if satisfactory progress has not been made in a course at the point of the need for continuance, the professor and the Director of Academic and Auxiliary Services will recommend the student withdraw from the course. A grade of W will be posted, which does not impact the GPA. The student may appeal to have a late withdrawal granted after the 60% mark has passed. Arrangements and notifications to Housing, Financial Aid, and other pertinent departments of the university must be made by the student.

Communication with parents or family members may take place as needed while guarding specific student academic records based on the FERPA authorization that the student has made or has not made. Protected information may include the courses in which the student is enrolled

Semester Continuance: Non-Medical

The coursework to be completed by the student will be determined by each professor based on the number of weeks that have passed and the progress made so far in each course. In order to be granted a semester continuance, a student must have successfully completed 60% of the course or courses, which is 9 weeks of a 15 week term or 5 weeks of an 8 week term, with satisfactory progress in each course under consideration for an extension of the coursework deadline. Every consideration should be given in order to assist the student to finish the course successfully within the guidelines described in the policy. The requirements for completion of the course will not be reduced or waived.

Once the Dean of Student Success has determined a course of action based on the feedback from professors or the Registrar, Semester Continuance forms will be signed by the student. Professors will be notified that the semester has been extended for the student with a definitive deadline for all work to be submitted.

The following points should be understood and communicated to the student:

- A shorter extension will result in better outcomes. Financial aid for future semesters is impacted by having Incompletes in courses when a new semester begins. If the work can be completed within 30 days, agree to that time frame; however, the student may be given up to one full semester to complete all course work.
- The student must be advised that if the deadline is not met for all course work, the grade earned will be issued. The grade for non-completion will be F.
- Professors may not be accessible in the summer, since it is not a recognized semester. Agreement should be made in advance as to when the professor will be available.

The Dean of Student Success will set a reminder to follow-up on the student's progress in courses by contacting the student and the professors, as needed. Follow-up attempts and outcomes will be documented in the student's record.

Bereavement and Grief

In communication with your professor, there is grace provided for one week of class absence to allow for funeral attendance in the event of a death in the immediate family. "Immediate family" includes a student's spouse, parents, children, grandchildren, step-children, sister, sister-in-law, half-sister, step-sister, brother, brother-in-law, half-brother, step-brother, mother-in-law, father-in-law, grandparents of the student or spouse, uncles of student or spouse, aunts of student or spouse, or any other close relative who was currently residing within the student's household to include both biological, foster and adoptive members.

If further support is needed beyond a week of grace, such as additional time away, grief support, or counseling referrals, students are encouraged to reach out or be referred to Student Outreach and Support for case management services.

Directed Study

Directed Study is a regular course taken by special arrangement under the supervision of an instructor. A student enrolled as a degree-seeking candidate may apply for Directed Study. Directed Study (DR) Forms are available from the Office of the Registrar. Prior to registration, the Academic Advisor, supervising instructor, Department Chair, Academic Dean, and Provost must approve the directed study.

The following apply to Directed Study registration:

1. Registration for Directed Study must be completed during the regular registration period as stated in the academic calendar.
2. Directed Study courses must be completed within the term of enrollment. Extensions must be requested and approved in the same manner established for standard courses (see university policy on incompletes).
3. The regular grading scale applies to courses completed by Directed Study.
4. The following additional conditions must be met for Directed Study request:
 1. The course is required to complete the degree program, and no course substitution is available.
 2. The student has an unavoidable scheduling conflict with another course.
 3. The course cannot be taken in a later semester.
5. Directed Study is restricted by faculty availability.
6. Directed Study may be utilized to pursue an area of study that can be individually designed by the professor in collaboration with the student.
7. The professor and the student should not proceed with the course of study until the registration is approved, entered, and reflected on the student's official course schedule.

Grades and Quality Points

The following scale of letter grades is used in recording a student's academic progress:

Explanation Grade		Explanation	Points Range	Quality Points
Outstanding (90-100)	A	Superior performance in all aspects of the course with work exemplifying the highest quality-Unquestionably prepared for subsequent courses in field.	94-100%	4.0
	A-	Superior performance in most aspects of the course; high quality work in the remainder-Unquestionably prepared for subsequent courses in field.	90-93%	3.67
Above Average (80-89)	B+	High quality performance in all or most aspects of the course-Very good chance of success in subsequent courses in field.	87-89%	3.33
	B	High quality performance in some of the course; satisfactory performance in the remainder-Good chance of success in subsequent courses in field.	84-86%	3.0
	B-	Satisfactory performance in the course-Evidence of sufficient learning to succeed in subsequent courses in field.	80-83%	2.67
	C+	Satisfactory performance in most of the course, with the remainder being somewhat substandard-Evidence of sufficient learning to succeed in subsequent courses in field with effort.	77-79%	2.33
Average (70-79)	C	Evidence of some learning but generally marginal performance-Marginal chance of success in subsequent courses in field.	74-76%	2.0
	C-	Minimal learning and substandard performance throughout the course-Doubtful chance of success in subsequent courses.	70-73%	1.67
	D+	Minimal learning and low quality performance throughout the course-Doubtful chance of success in subsequent courses.	67-69%	1.33
Below Average (60-69)	D	Very minimal learning and very low quality performance in all aspects of the course-Highly doubtful chance of success in subsequent courses in field.	64-66%	1.0
	D-	Little evidence of learning-Poor performance in all aspects of the course-Almost totally unprepared for subsequent courses in field.	60-63%	.67
No Credit	F	Failure to meet requirements of the course-Unprepared for subsequent courses in field.	0-59%	0.0

(0-59)

No Credit	W	Course Withdrawal	N/A
No Credit	WF	Administrative Withdrawal	N/A
No Credit	WD	College Withdrawal	N/A
No Credit	I	Incomplete	N/A
Credit	P	Pass	N/A
No Credit	S	Satisfactory	N/A
Credit	CR	Credit	N/A
No Credit	NC	No Credit	N/A
No Credit	IP	In Progress	N/A

GPA Calculation

Quality points are the numerical equivalent of the letter grades and are assigned for each credit hour earned as indicated by the above scale. For example, a three credit hour course with an earned A grade equals 12 quality points.

In determining a grade point average (GPA):

Total number of quality points earned divided by total number of semester hours attempted for which quality point values are assigned = GPA.

Grades for all attempted courses will remain on the student's permanent record. If a course is repeated, the highest of the grades will be computed in the student's grade point average (GPA) with the lower grade forgiven from the GPA, but all attempts will remain documented on the student's transcript. Students who wish to appeal a grade must do so within the immediate succeeding semester. Otherwise, the recorded grade is permanent and can be changed only by repeating the course. No grades, GPA, or test scores may be changed or added after the degree and diploma are awarded.

Incomplete Grades

An "I" grade indicates incomplete course work and may be recorded when a student is passing but cannot complete the course due to illness or a serious personal emergency. In order to be granted an incomplete grade, a student must have successfully completed 60% of the course, which is 9 weeks of a 15 week term or 5 weeks of an 8 week term, with satisfactory progress. The student is required to initiate consultation with the professor and the Department Chair or Dean of the college by filing a written request for an "I" grade. Supporting documentation must accompany the written request which must be submitted to both the Professor and the Department Chair or Dean of the college. An "I" may be recorded for a maximum of one semester and is not computed in the student's GPA. If an "I" is not changed by the end of the immediately succeeding semester, the grade automatically converts to an "F" and is recorded on the student's

permanent record. An "F" grade is computed in the GPA. Once an incomplete grade is awarded, course withdrawal is no longer an option. Students with an incomplete in a previous semester may not register for more than 17 hours including the current semester and the previous incomplete hours. Students should be aware that an incomplete course may hinder the award of financial aid in a subsequent semester.

Grade Forgiveness Policy

In order to improve their knowledge of a subject and cumulative grade point average, students may elect to repeat a course in which they have earned a less than satisfactory grade, especially a "D" or an "F." The higher grade will be the grade that contributes toward the cumulative grade point average, however all attempts will be posted on the student transcript. Students may only attempt a failed course up to three (3) times total. Should the student not pass the course with three attempts, the student must complete the course via transient, or petition the Chair or Dean for a course substitution. In situations where the course needed to be repeated is no longer available or offered, a similar course may be substituted with the approval of the Dean of the college and the Registrar. A major core course in which a grade of "F" was earned at Southeastern can be repeated only at Southeastern, unless dean or department chair approval has been granted to take it elsewhere as transient. The failed course will remain on the student's transcript, even after the course has been repeated.

Generative Assistance AI Use Policy

Using Generative AI in Coursework

Generative AI Assistance (GAIA) Policy

Intent

Students should learn how to use AI text generators and other AI-based assistive resources (collectively, AI tools) to enhance rather than damage their developing abilities as writers, coders, communicators, and thinkers. Instructors should ensure fair grading for both those who do and do not use AI tools. The GAIA policy stresses transparency, fairness, and honoring relevant stakeholders. In accordance with Turnitin, we recognize that the "AI writing detection model may not always be accurate (it may misidentify both human and AI-generated text) so it should not be used as the sole basis for adverse actions against a student," <https://help.turnitin.com/ai-writing-detection.htm>. To that end, the GAIA policy adopts a few commonsense limitations on an otherwise embracing approach to AI tools.

Students shall

1. Confirm with their professor that using ChatGPT or other content produced by generative artificial intelligence (AI) is acceptable before citing it. <https://libguides.slcc.edu/ChatGPT/Citations>
2. Give credit to AI tools whenever used, even if only to generate ideas rather than usable text or illustrations.
3. When using AI tools on assignments use the AI Support Report template to report the following:
 - a. Save a transcript of your chat. Make it available to or retrievable by your reader, possibly by including it as an appendix to your work or as an online supplement.
 - b. Describe the prompt that generated the specific ChatGPT response.
 - c. Include the date when the response was generated or the date of access. This is important as these tools will be updated regularly.
 - d. Acknowledge how you used the tool. You can do this even if you only use ChatGPT to plan your paper or generate ideas and don't include any of its generated content. <https://libguides.slcc.edu/ChatGPT/Citations>
4. Not use AI tools during in-class examinations, or assignments, unless explicitly permitted and instructed.
5. Use AI tools wisely and intelligently, aiming to deepen understanding of the subject matter and support learning.

Instructors shall

1. Seek to understand how AI tools work, including their strengths and weaknesses, to optimize their value for student learning.
2. Understand AI detection tools as a basis for discussion with the student rather than a definitive finding.
3. Impose a significant penalty for low-energy or unreflective reuse of material generated by AI tools and assign zero points for merely reproducing the output from AI tools.
4. Submit an Academic Integrity Alert after instructors have communicated with the student and determined that AI tools were not used properly.

This policy recognizes that.

1. This policy depends on goodwill, a sense of fairness, and honorable character.
2. There may be some courses or assignments where AI tools must be strictly prohibited, either at the direction of disciplinary accreditors or in preparation for certain certification exams. In those instances, professors may restrict the use of AI and communicate such restrictions clearly on the course syllabus.
3. This policy takes account of the existence of subscription versions of AI tools, which are not affordable for some students; the policy may need to be revised as the differences between subscription and free versions become better understood.
4. This policy may be revised in light of other policies and novel technological developments in AI tools.

How to Cite AI Tools (Examples)

1. MLA Citations: <https://style.mla.org/citing-generative-ai/>
2. APA Citations: <https://apastyle.apa.org/blog/how-to-cite-chatgpt>

Generative AI Example

AI Support Report

Academic Integrity

Southeastern University seeks to foster a spirit of honesty and integrity in students. The University expects students at SEU to embody the same spirit of commitment to high ethical standards and academic integrity in all aspects of their participation in the program.

Therefore, any work submitted by a student must represent original work produced by that student. Any source used by a student must be documented using appropriate scholarly references and citations. The university commonly uses MLA, APA, AMA, and Turabian citation and writing styles. Students may find additional information about these general styles by clicking on the following link: Steelman Library Citation Education and Resources

"Academic dishonesty" (regardless of intention) refers to plagiarism, cheating, and fabrication (see definitions below). Should a professor suspect academic dishonesty of any kind, the professor will follow the guidelines below and will refer the student to the Academic Center for Enrichment (ACE) by submitting an Early Alert (the Early Alert link is available through JICS). The intervention will be noted in the student's file. University personnel will follow up assuring that all consequences dictated by the professor and university policy have been completed. To effectively counter academic dishonesty, professors must follow these guidelines in all instances of plagiarism and cheating. The processes stated in the Student Appeal and Complaint Policy are to be utilized should a student seek an appeal of any decision rendered under the Academic Integrity policy.

University Expectations

The university maintains a high expectation of student character and ethical conduct. The university expects students to apply critical thinking to ethical standards and to appropriately use summarizing, paraphrasing, quoting, and citation of all sources according to the writing style required by the professor.

The university commonly uses MLA, APA, AMA, and Turabian citation and writing styles. Students may find additional information about these general styles by clicking on the following link: [Steelman Library Citation Education and Resources](#)

This policy applies to all coursework, assessments, and comprehensive exams.

Early Alert Program Appeal Process

When there is an instance of academic dishonesty, students will be referred to the Academic Center for Enrichment for plagiarism avoidance counseling, and the student will be required to complete the Academic Integrity course in My Fire (if the plagiarism was a level 2 or higher). In the event a student desires to be removed from the course, or to appeal the outcome of the course, the following must be completed:

1. The student must write a letter of appeal to the Academic Intervention Committee stating reasons as to why they want to be removed from the Academic Integrity course and/or not incur a Z grade on their transcript. Students will deliver or e-mail the letter of appeal to the program coordinator.
2. The appeal will be reviewed by the Academic Intervention Committee.
3. The student will be notified with the committee's decision. All decisions of the committee are final.

Undergraduate - Academic Dishonesty Reporting & Procedure

In each instance of academic dishonesty, the professor will (a) contact the Academic Center for Enrichment to determine the level of the offense and the appropriate consequences according to the guidelines listed below; (b) communicate with the student to discuss the nature of his or her academic dishonesty, the academic integrity policy, and the consequences to be assigned; and (c) submit an academic dishonesty report to the Academic Center for Enrichment and, as appropriate, to the department chair or program director.

The academic dishonesty report should include:

- Name and ID number of the student
- Professor, course, and term
- Description of the academic dishonesty (plagiarism or cheating), indicating the level of offense (See Academic Levels and Outcomes Chart)
- Documentation of each step of the academic integrity procedure that has been followed
- Copy of the TurnItIn plagiarism report, if applicable
- A copy of the plagiarized work, if applicable
- Any other supporting documentation
- An indication of the consequences already assigned (See Academic Levels and Outcomes Chart for outcomes that may be determined by the professor).

Outcomes

When an allegation of academic dishonesty has been made, the university and students will follow the process listed below to resolve the case:

1. Professors (mandatory case reporters) will submit the case to the academic integrity program facilitated by the Academic Center for Enrichment and, as applicable, to the department chair or program director.
2. The Academic Success Coordinator will contact the student to schedule a hearing to research the case. If the hearing aligns with the professor's report, the case will progress according to the outcomes assigned to the level of the case.
3. Students may appeal the findings or outcomes of a case by submitting an appeal to the Academic Integrity Committee. All decisions of the Academic Integrity Committee are final.

o The processes stated in the Student Appeal and Complaint Policy are to be utilized should a student seek an appeal of any decision rendered under the Academic Integrity policy.

If an allegation of Academic Dishonesty has been confirmed by the university, students must comply with the following policies:

- Complete an assigned Academic Integrity course (if not taken previously).
 - The student must successfully complete the course prior to registering for additional courses or continuing the dissertation/capstone process.
 - The Z grade annotation may be placed on the student's transcript if the Academic Integrity Course is not completed successfully.
- Students may not withdraw from a course in order to avoid consequences for academic dishonesty.
- Complete any plagiarism and ethics education/tutoring assigned by the university.
- Complete all requirements prescribed by the university according to level assigned to the individual case.
 - A case may be escalated to a Level 3 at any time if the student becomes defensive or belligerent when any level of academic dishonesty is addressed.

Please refer to the Academic Levels and Outcomes Chart for additional details.

Undergraduate - LEVEL 1

Level I is only used for undergraduate students. Academic Dishonesty for undergraduate students will be considered a Level 1 offense when it is the first instance of plagiarism in a student's career at Southeastern

Outcomes for a Level 1 plagiarism offense must include one or more of the following:

- Completing an Academic Integrity (AI) course that includes strategies for avoiding plagiarism and cheating.
 - Failure to complete the course with a minimum of 70%, may result in a "Z" annotation on the student's transcript.
 - The course must be completed prior to registration for additional courses.
- Complete any plagiarism education or tutoring assigned by the university.

Additional outcomes may include one or more of the following

- Correcting the plagiarism in the assignment for a grade.
- Receiving a grade penalty up to the total grade value of the assignment.

Undergraduate - LEVEL 2

Academic Dishonesty will be considered a Level 2 offense when it is:

- The second instance of plagiarism in an undergraduate student's career at Southeastern; OR
- The first instance of cheating.

Consequences for the student for a Level 2 offense must include:

- Completing an Academic Integrity (AI) course that includes strategies for avoiding plagiarism and cheating (required if not already taken); AND
- Receiving a grade penalty in the course; AND
- Receiving a Z grade annotation (may only be removed by successful completion of the AI course with a minimum of 70%).

Additionally, the consequences may include any or all of the following:

- Correcting the plagiarism in the assignment for a grade
- Failing the course
- In the first instance of cheating, at the discretion of the professor of the course in which cheating occurred, the student may be required to retake the academic course the next time it is offered to replace the course grade.
- Students may lose eligibility to take online courses for the remainder of their careers at Southeastern.

Undergraduate - LEVEL 3

Academic Dishonesty will be considered a Level 3 offense when it is:

- The third (or higher) instance of plagiarism in an undergraduate student's career at Southeastern
- Is the second instance of cheating.

Consequences for Level 3 offenses must include the following:

- Receiving a grade penalty in the course; AND
- Completing an AI course that includes strategies for avoiding plagiarism and cheating (required if not taken previously); AND
- Receiving a Z grade annotation (required, see below);

Additionally, consequences may include any or all of the following:

- Failing the course; AND OR
- Losing eligibility to take online courses for the remainder of their careers at Southeastern; AND OR
- Expulsion from the University at the discretion of the Provost.

Definitions

For the purpose of this policy,

- "professor" is defined as any person providing academic support or assessment of a student's work. These persons include course instructors, mentors, writing support professors, and members of the dissertation/capstone committee (chair, methodologist, content specialist, and third reader), and
- "submission" is defined as all coursework, comprehensive exams, as well as drafts and final versions of the dissertation/capstone projects and/or sections of the dissertation/capstone project submitted to professors and to graduate writing support.

Plagiarism

Plagiarism occurs when a writer (regardless of intent) uses someone else's language, ideas, or other original material without acknowledging its source.

Plagiarism includes unattributed use of any source, in any medium, published or unpublished. Work already submitted for a grade in another course may not be resubmitted unless the professor specifically states otherwise.

Some examples of plagiarism include but not limited to:

- Quoting or paraphrasing material without attributing it to its source
- Copying segments from the work of others without giving proper credit
- Submitting as original work written entirely by someone else

The policy also applies to incidents of self-plagiarism, resubmission, or multiple submissions (the use of a single project in two or more academic settings either at Southeastern University or another academic institution). Work submitted in another course may not be resubmitted unless both professors specifically state otherwise.

Some examples of plagiarism include, but are not limited to:

- Quoting or paraphrasing material without attributing it to its source
- Copying segments from the work of others without giving proper credit
- Submitting work written by someone else
- Allowing another student to submit their work to use as his or her own when that individual had not done the work

Widely known facts do not require citation and do not count as plagiarism as long as they are communicated in the writer's own words. Ideas and observations original to the writer also do not require citation.

Avoiding Plagiarism

Professors at Southeastern University work diligently to help students understand and avoid plagiarism. However, the responsibility ultimately rests on students to make sure their work does not contain plagiarism. Students can avoid plagiarism by properly citing and quoting, paraphrasing, and summarizing all material they use from sources.

Common forms of citation include parenthetical citations, footnotes/endnotes, and attributive statements such as "According to Smith and Rodriguez..."

Quotations include entire sentence(s), key phrase(s), or specific term(s) that match a source word for word. All quotations must be cited using the appropriate quotation format.

Paraphrases and summaries include material (usually information or ideas) taken from a source and put into a writer's own words. All paraphrased and summarized materials must completely rephrase the original source and be properly cited.

The bottom line in avoiding plagiarism is that students must clearly indicate the material in their writing is original to them and the material taken from sources.

Cheating

Cheating is attempting to present (regardless of intent), as one's own, work that one has not performed, or using improper means to pass an examination. Examples include, but are not limited to:

- The sharing of unauthorized information regarding specific content of assignment/examinations or using books, notes or other material without the instructor's permission.
- The discussion of any aspect of the assignment/examination before all students have completed it.
- Speaking or otherwise communicating with one another in English or any other language or manner during an examination.
- Submitting work the student has not personally completed.
- Submitting of the same paper or assignment, or material portions thereof, for more than one course (except by both instructors' approval and in accordance with criteria established by each of them).
- Falsifying of research data.
- Preventing student or faculty access to course material. This includes mutilating or stealing materials provided by the university for the examination, and/or disabling and interfering with required equipment (i.g. computer equipment or databases).
- Using electronic devices such as cell phones or calculators to store/share information or materials that are not authorized by the instructor.

Fabrication

Fabrication is (regardless of intent) falsification or creation of false data or information. If fabrication is discovered, the case level may be escalated at any time.

Other violations may include:

- Failing to follow any other explicit regulation or expectation announced by the instructor, and/or circulated to each student. This includes failure to use surveillance equipment or software as required by the professor. It is the responsibility of the student to confer with an instructor when procedures are unclear.
- Falsifying a signature on any official university document.

- Altering any official university document.
- Intentionally helping or attempting to help another student to violate any provision of this policy.

Undergraduate Z Grade Annotation

When a professor, Academic Integrity Committee, or Academic Deans conclude that academic dishonesty has occurred (plagiarism or some other form of cheating), the following will occur:

- A report will be submitted to the Academic Integrity office for processing.
- The student will be informed of the report and the university policies that apply to the report.
- The student may submit an appeal to the Academic Integrity Committee (See Student Appeal and Complaint Policy for the complete process)
- When submitting final grades, the intervention coordinator will inform the Registrar's Office, which will affix a "Z" in front of the grade.
- The intervention coordinator will also inform the faculty and appropriate college personal involved in this process.
- The student's course grade will be preceded by the letter Z (ZB, ZC, ZD, ZF, with +/- designations as appropriate).
- The transcript key will indicate that the Z grade annotation is assigned in cases of cheating.
- If the student has withdrawn from the class in which the cheating occurred, he or she should be added back to the roster and assigned a Z grade annotation.

After the first cheating offense in the student's SEU career:

- The student may complete a required AI course, normally prior to the start of the next eight-week term.
- At the discretion of the professor of the course in which cheating occurred, the student may be required to retake the academic course the next time it is offered to replace the course grade.
- Upon receiving documentation of successful completion, with a minimum score of 70%, on the AI course and, if required, the retaken academic course, the intervention coordinator will instruct the Registrar to remove the Z from the student's transcript. After a second or subsequent cheating offenses, the Z grade annotation cannot be removed. This penalty may be requested at the professor, coordinator, chair, Academic Dean, or Academic Integrity Committee level. All requests will be processed by the Academic Integrity Office according to university policies. The processes stated in the Student Appeal and Complaint Policy are to be utilized should a student seek an appeal of any decision rendered under the Academic Integrity policy.

Summary of Civil and Criminal Penalties for Violation of Federal Copyright Laws

Copyright infringement is the act of exercising, without permission or legal authority, one or more of the exclusive rights granted to the copyright owner under section 106 of the Copyright Act (Title 17 of the United States Code).

These rights include the right to reproduce or distribute a copyrighted work. In the file-sharing context, downloading or uploading substantial parts of a copyrighted work without authority constitutes an infringement.

Penalties for copyright infringement include civil and criminal penalties. In general, anyone found liable for civil copyright infringement may be ordered to pay either actual damages or "statutory" damages affixed at not less than \$750 and not more than \$30,000 per work infringed. For "willful" infringement, a court may award up to \$150,000 per work infringed. A court can, in its discretion, also assess costs and attorneys' fees. For details, see Title 17, United States Code, Sections 504 and 505.

Willful copyright infringement can also result in criminal penalties, including imprisonment of up to five years and fines of up to \$250,000 per offense.

Violation of Federal Copyright Laws

"102. Subject matter of copyright: In general

(a) Copyright protection subsists, in accordance with this title, in original works of authorship fixed in any tangible medium of expression, now known or later developed, from which they can be perceived, reproduced, or otherwise communicated, either directly or with the aid of a machine or device."

(<https://www.copyright.gov/title17/92chap1.html>).

"506. Criminal offenses

(a) Criminal Infringement.—

(1) In general.—Any person who willfully infringes a copyright shall be punished as provided under section 2319 of title 18..." (<https://www.copyright.gov/title17/92chap5.html>).

For detailed information, please see the website of the U.S. Copyright Office at www.copyright.gov.

Transcripts

The official academic record for each student is maintained in the Office of the Registrar. Authorization from the student must be received before an official transcript can be released as is required by law. Students should request a transcript through the SEU website, which leads to the transcript ordering service through Parchment. Transcripts are normally processed within the same day upon receipt of the request as long as all requested information is provided. The cost is \$12 per copy.

To order a transcript from Southeastern University's site:

- Go to www.seu.edu
- Click the "Transcripts/Verifications" link under "Resources" at the bottom of the homepage
- The Office of the Registrar page will open
- Click on "Transcripts & Replacement Diploma Request"
- Follow the instructions to place your order
 - Create an account by providing the following:
 - First & Last name
 - Date of birth

- Years of attendance
- Student ID number or SSN
- Be sure to keep your order number for reference.
- Check your email for updates on your transcript or diploma request.
- Select the best option for when the transcript should be sent
 - Send Now
 - Hold Until Final Grades Are Posted
 - Hold for Degree (if waiting on degree conferral to be posted to the transcript)

Withdrawals

Withdrawal from a Course

Students may withdraw from a course without academic penalty through the withdrawal deadline, which is notated on the academic calendar and occurs at the 60% point of the course. The official course withdrawal date will be the date the Course Withdrawal form is filed with the Office of the Registrar. A grade of "W" will be recorded on the student's record. Complete withdrawal from the university is not part of this policy. Forms for course withdrawal are available in the Office of the Registrar and on the Southeastern University website. There is no refund for a course withdrawal. Too many "W" grades will hinder academic progress and financial aid coverage. Withdrawn courses are not covered by Veteran's benefits.

Administrative Withdrawal from a Course

Professors may request an administrative withdrawal in which a "WF" grade will be recorded for students who are not actively participating or attending courses. The WF grade may be requested after the add/drop deadline and prior to the course withdrawal deadline, and does not impact the student's GPA. Students who attend and participate after the course withdrawal deadline are not eligible for an administrative withdrawal. Too many "W" type grades will hinder academic progress and financial aid coverage. Withdrawn courses are not covered by Veteran's benefits.

Withdrawal from the University

A University Withdrawal occurs when a student officially communicates with the Office of Student Success and Retention that he/she wishes to withdraw from all courses and exit the institution. University Withdrawals happen after the add/drop period through the withdrawal period (60% mark of the term/semester). Upon completion of the University Withdrawal process, a grade of "WD" will be recorded for each current course as a final grade. The "WD" has no impact on a student's cumulative or term GPA.

Withdrawing from the University may impact financial aid and could result in a balance owed, as students will remain financially responsible for all tuition and fees incurred. Any refunds for which the student is eligible will be processed in accordance with the refund policy described in the Financial Information section of the catalog.

The Office of Student Success and Retention will guide students throughout the process to ensure informed decision-making. Students who wish to pursue a University Withdrawal will initiate the process by contacting the Office of Student Success and Retention by emailing retention@seu.edu for assistance. Communication will be directed to the

student's official @seu.edu email account. It will be the student's responsibility to check this account for information and/or documentation regarding the University Withdrawal process.

Students seeking to exit the University between semesters/terms will initiate the process by contacting the Office of Student Success and Retention by emailing retention@seu.edu for assistance.

Military Leave of Absence Policy

Southeastern University recognizes that students who serve in the U.S. armed forces may encounter situations in which military obligations require them to withdraw from a course of study, often with little notice. This policy applies to all branches of military service and is intended to recognize and make appropriate allowances for students who find themselves in such situations. Specific inquiries regarding the Military Leave of Absence process should be directed to the Office of Retention and students should reach out to Student Financial Services for questions about the impact to their student account.

Military Leave and Refund Procedures

A. Definition

For purposes of this policy, a "military service leave" is a university-approved withdrawal from all in-progress University classes that is necessitated by a call to service, whether voluntary or involuntary, in the United States Armed Forces. This includes service by a member of the National Guard or Reserve, active duty, active duty for training, or full-time National Guard duty under Federal authority, for a period of more than 30 consecutive days under a call or order to active duty of more than 30 consecutive days.

B. Student Responsibilities

A student who is called to active duty or active service in a branch of the United States Armed Forces (Army, Navy, Air Force, Marines, Coast Guard, Space Force, National Guard, or Reserve) and wishes to take a military service leave must: Provide the University with advanced notice of such service and the intention to take a leave of absence. As soon as possible, after receiving military orders that require withdrawal from a program or course of study, a student must contact the Retention Office to request a formal leave of absence and attach a copy of the military orders or other appropriate documentation to the request. This notice can be made by the student or may be made by an appropriate officer of the U.S. Armed Forces or an official of the U.S. Department of Defense to the University Registrar. It is optional to include a statement of an intention to return to the University. If military necessity renders it impossible to provide advance notice to the advisor, the student may initiate a military service leave by providing notice at the first reasonable opportunity, in writing, personally signed, and with a copy of the military orders attached.

C. University Procedures

Upon receiving notice of a student's request to withdraw from the University or a program or drop all enrolled courses because of military obligations, the Retention office shall work with the student, providing them with a military leave of absence checklist and university withdrawal form. Once complete, this office will notify the appropriate offices such as Student Financial Services, Accounts Receivable as well as the School Certifying Official. The office of Student Financial Services will review the student's eligibility for financial aid funds received before the time of withdrawal and inform the student about the status of his or her financial aid and actions required to defer loan repayments based on military obligations. Students granted a military service leave will receive a 100% refund of tuition and fees charged for the semester or academic term in which they withdraw. If living on campus, the student will be refunded for any housing and meals payments made to the student account. The student will be assigned "W" grades which will not affect their overall GPA. If the University determines that it is appropriate to award academic credit for work completed in the semester or academic term in which a student takes military service leave, the student shall not receive a refund for the portion of the course of study for which academic credit is awarded. No refund will be provided until the University receives a copy of the military orders necessitating the withdrawal. If a student decides to finish the courses currently enrolled the student will be given an (I) incomplete grade and allowed additional time to finish the course. This should be communicated to professors to work with the student to complete the course. No refunds will be issued if a student remains enrolled in courses. Students who are granted a military service leave may be on leave for up to five academic years, after which an extension may be granted with the Registrar's approval. To apply for an

extension, students must contact the office of the Registrar. Students who do not request an extension will be withdrawn from the University and at a later date may choose to seek readmission. To seek readmission at a later date, students must contact the Office of Enrollment.

Military Re-Enrollment Procedure

A. Definition

For purposes of this policy, a "military re-enrollment" is a university-approved re-enrollment after a military service leave.

B. Student Responsibilities

A student who has taken military service leave from the University or has had studies interrupted because of active duty or active service in a branch of the United States Armed Forces and wishes to re-enroll must follow these steps: A student must notify the Registrar's Office of the intent to return to resume a course of study upon conclusion of duty or service and present appropriate documentation prior to the semester in which the student is requesting re-enrollment. To qualify for military re-enrollment, a student must notify the University of the intention to re-enroll within two years of the time he or she is discharged from military service or is placed on inactive duty. Notices should be provided in writing to the Registrar's Office and include an official certificate of release or discharge, a copy of duty orders, or other appropriate documentation to confirm (verify), that the student's withdrawal was related to service in the armed services and that the student is able to resume studies.

1. Military re-enrollment guarantees a student who meets these requirements access to the same course of study he/she was in at the time of withdrawal without incurring a reapplication fee unless a student receives a dishonorable or bad conduct discharge or has been sentenced in a court-martial.
2. Any student who, because of military necessity, did not give written or oral notice of service to the office of Retention prior to withdrawal, may, at the time the student seeks readmission, submit documentation that the student served in a branch of the U.S. Armed Services that necessitated the student's absence from the University.

C. University Procedures

A student who meets the notice requirements set forth herein will be granted military re-enrollment in the semester following the notice of intent to return, or, if the student chooses, at the beginning of the next full academic year. Upon returning to the University, the student will resume his or her course of study without repeating completed coursework and will have the same enrollment status and academic standing as before the military leave. For the first academic year after military leave, the student will be charged the same tuition and fee charges as when the servicemember left, unless military benefits will pay the increase, but never more than the institution is charging other students; and for subsequent academic years or for a different program, by assessing tuition and fee charges that are no more than the institution is charging other students.

If, in the judgment of the University, a student is not academically prepared to resume a course of study in which he or she was previously enrolled, or is unprepared to complete a program, the University will determine whether reasonable means are available to help the student become prepared. The University may deny the student re-enrollment if it determines that reasonable efforts are not available, or that such efforts have failed to prepare the student to resume the course of study or complete the program.

A student who has been away from the University on military service for more than five years (including all previous absences for military service obligations after initial enrollment but including the only time the student spends actually performing service in the uniformed services) will not be guaranteed military re-enrollment, but may petition for consideration of military re-enrollment. A student who chooses at the conclusion of military service to enroll in a different course of study than the one the student was in at the time of military withdrawal must complete the regular admission and enrollment process for that course of study.

Notes

1. The University shall determine the adequacy of documentation with reference to 34. C.F.R. Sec. 668.18(g).
 2. The appropriate point in a course or program for a student to resume studies, the timing of re-enrollment, and the determination of the "same course of study" will be determined by the University, taking into account the unique characteristics and requirements of that course or program and the modes in which it is offered (e.g., non-degree vs. degree, evening vs. day program, special program vs. standard program). If the program in which the student was enrolled has been discontinued or is no longer offered, the University will enroll the student in the program that it determines to be most similar to that program or in a different program for which the student is qualified. If the student is admitted to a different program, and for subsequent academic years for a student admitted to the same program, the University shall assess tuition and fee charges that are no greater than other students in the program are assessed for that academic year.
 3. The appropriate tuition and fee amounts will be reflected on the bill that the student receives.
 4. As defined in section 480(c) of the HEA.
5. This cumulative leave of absence restriction shall be interpreted and applied with reference to 34C.F.R. Sec. 668.18(c) and (e), which set forth rules for calculating cumulative absence due to military service.
Reference: <https://www2.ed.gov/policy/highered/guid/readmission.html>

Military Leave of Absence Checklist

As you prepare to leave or return from a military leave of absence, use this checklist to ensure you complete all the necessary steps at SEU.

Preparing for Military Leave

- Review the SEU military leave of absence policy located in the university catalog.
- Notify the Retention office regarding your intent for military leave of absence and include a copy of your military orders or signed letter from your command pertaining to the service obligations. Please black out any sensitive information.
- The Retention office will provide you with the university withdrawal form. This is a required step in the SEU withdrawal process. Upon completion your withdrawal or leave of absence will be communicated to all necessary departments.
- Monitor your student account for any financial aid changes and return of Title IV federal funds. The Student Financial Services office will review your account and contact you if any aid changes as a result of withdrawing from the university. Set up a phone appointment with a Student Financial Services counselor at <https://calendly.com/seusfs>
- If using VA benefits or military tuition assistance, contact the School Certifying Official to notify them of your intent to take a military leave of absence so they may report it to the Department of Veteran Affairs and Department of Defense. Contact information for the School Certifying Officials can be found here: <https://seu.edu/admission/financial/veterans/>

Re-Enrollment from Military Leave

Notify the Office of the Registrar regarding your intent to return to SEU. The contact information is registrar@seu.edu

Register for classes for the term or semester you intend to return.

Notify the School Certifying Official of your intent to re-enroll. If you plan to use VA benefits, complete the VA Request for Certification form. Contact information for the certifying official can be found here: <https://seu.edu/admission/financial/veterans/>

If you are planning to receive financial aid, complete the Free Application for Federal Student Aid (FAFSA) for the academic year you are returning via studentaid.gov and contact the Student Financial Services office to complete the necessary steps to apply

and receive aid. Contact for Student Financial Services is <https://studentaid.gov/> or via appointment at <https://calendly.com/seusfs>

Transient Policy

Transient enrollment means a degree seeking student is enrolled at a second school with the intention of transferring credits to Southeastern. A request for a transient letter from Southeastern University to the second school is required for credits to be considered for transfer. Transient letters are issued by the Office of the Registrar. Students who have earned an associate degree or 64 semester hours may not enroll at the junior college level unless they are deficient in specific general education courses. Students are responsible for the applicability of courses taken elsewhere to their Southeastern program. Students are strongly encouraged to obtain written advisor, department chair, or Academic Dean for approval for major core course transiency.

Transfer credit on the college level is accepted according to the following guidelines, from regionally accredited schools:

Up to 62 general education credits are accepted with a State of Florida AA degree in order to cover our general education core. AS and AAS degrees are evaluated on a course-by-course basis for acceptance into the general education core.

Up to 90 transfer hours can be accepted when a student comes to SEU, but there will be no other transient credits approved during the student's tenure at SEU.

Transient status is permitted for current students, with specific limitations, including the following:

1. Transient courses must be taken at a regionally accredited institution, an ABHE accredited institution, or an institution that SEU has an active articulation agreement with.
2. The Transient Status form, available on the JICS website, must be submitted and approved by the Office of the Registrar in order to consider any course for transfer while you are a student at SEU.
3. Major core requirements must be completed at SEU. Any exception made must be approved by the Department Chair or Academic Dean.
4. 25% of all degree programs must be completed through SEU. Once a student is accepted at SEU, a bachelor degree candidate may not take transient courses if they have transferred in and/or earned test credit for a combined 90 hours or more and an associate degree candidate may not take transient courses if they have transferred in and/or earned test credit for a combined 45 hours or more.
5. Students are responsible for the applicability of courses taken elsewhere to their Southeastern program. A transient course must receive a grade of "C" (2.0 on a 4.0 scale) or above to be considered for transfer to SEU.
6. Students must obtain written department chair or Academic Dean approval for financial aid coverage of the transient registration.

A student's enrollment in an SEU-approved program of study at a different college or university may be considered for the purpose of applying for financial aid assistance through SEU. Please contact the Office of the Registrar (863-667-5015) for more information, or you may contact the Student Financial Services department (863-667-5018)

Academic Advising

The Office of Academic Advising provides comprehensive services to help students achieve academic success. Academic advising is an interactive process in which the advisor helps the student set and achieve academic goals and

make responsible decisions consistent with degree requirements. Advising is personalized to consider the needs of each student, which may include appropriate referral services. Academic advisors serve as a guide to students along their academic journey, but it is the student's responsibility to know and meet the program requirements of their declared major.

Academic Advisor Assignment

All enrolled students are assigned an academic within the Office of Academic Advising. The assigned academic advisor is based on which extension site or regional campus the student is enrolled in. Students can view their assigned academic advisors on the university's student information system (JICS).

Academic advisors will help students plan an educational program consistent with their interests and abilities, assist students by monitoring their academic progress using the JICS degree audit, advise students on course selection which moves students toward graduation, refer students to university services as needed, and help students understand university policies and procedures.

Degree Audit (JICS)

All enrolled students are provided an electronic degree audit within the university's student information system (JICS). The degree audit is used as an internal document to communicate the student's degree requirements to the student, Office of Academic Advising, and Office of the Registrar.

The degree audit is a personalized document listing the student's major/minor requirements based on their declared catalog year. The audit provides up-to-date course information listing in progress, met, and unmet requirements. On a regular basis, students should utilize the JICS degree audit, as an advising tool, to assist in registration planning, track course requirements, and monitor progress toward graduation.

Declaration of Major

Every student who is accepted for enrollment as a degree-seeking student should declare their major as soon as possible, for the best advisement and degree plan. Your initial indication of a major or interest in a major based upon your admission application will be honored. A student may change his/her program of study by filing a new Declaration of Major form at any time during his/her period of enrollment. Change of major may place a student under different catalog requirements, and may impact federal financial aid eligibility. Counsel from academic advisors and student financial services counselors is encouraged.

If a student chooses to declare more than one major, course credits earned may be used to meet the same requirements of both declared majors. This multiple-use policy has only one limitation and that is the student must meet the appropriate number of credit hours for his or her primary major, or major requiring the highest number of credit hours. If a student chooses to declare a major and a minor within the same discipline, a maximum of six credit hours may be applied toward both the major and the minor; twelve or more unique credit hours must be earned in the minor separate from the major. Students must earn 25% of their minor, equivalent to six credit hours, at Southeastern University. The dean or department chair over the minor may grant exceptions to this policy, on a case-by-case basis.

Practicum Academic Integrity

Any dishonesty from a student in regards to the number of practicum hours completed and/or falsification of signatures on course documents within the Divine Design practicum courses will result in failure of the course. It is possible that further consequences from the university will be imposed if deemed necessary. If a student commits a subsequent

violation of this policy, the student will be ineligible to register for additional Divine Design practicum for the remainder of their academic career at SEU.

Academic Standing

Academic Standing is evaluated by the Office of the Registrar at the end of the Fall and Spring semesters. Students with a 2.0 or higher semester and cumulative GPA are considered to be in good academic standing. Students with a semester or cumulative GPA below a 2.0 are placed on academic condition status, as noted in the chart below.

Academic Conditional Process

At the end of each fall and spring academic semester, the Office of the Registrar reviews student academic progress. Students that earn below a 2.0 semester GPA but retain above a 2.0 cumulative GPA will be placed on Academic Notice (AN). Students that earn below a 2.0 semester GPA and cumulative GPA will be placed on Academic Probation (P1) and will be eligible to register at a limited load of 13 credits for the upcoming semester (fall or spring). A second consecutive semester of Academic Probation (P2) is granted if the student earns a 2.0 or better semester GPA but the cumulative GPA is below a 2.0. Students on P2 will be eligible to register at a limited load of 13 credits for the upcoming semester (fall or spring). If at the end of Academic Probation (P1 or P2) a student's cumulative and semester GPA is below a 2.0, the student will be recommended for Academic Suspension (SU) for one regular semester (fall or spring). If a student is placed on academic suspension at the end of the spring semester, the student will not be eligible to register in both the summer and fall semester. Students on Academic Suspension have the option to appeal their suspension standing. If approved, the student will be permitted to return at the P2 level.

Academic Expulsion

Permanent separation, or expulsion, from the University are to be decided by the Academic Condition Committee. Expulsions disallow future participation in University-wide academic programming. The Committee will review each case and make a decision. The student will be notified of the Committee's decision through email. Documentation of the expulsion will become part of the student's permanent academic record at the University. Expulsions will be considered based on factors that could include:

- repeated offense(s) of the University's Academic Integrity policy
- severe offense(s) of the University's Academic Integrity policy
- offense(s) with malicious intent or blatant disregard for the University's Academic Integrity policy
- lack of compliance/follow through with suspension sanctions

Students have the right to appeal the expulsion decision within 3 days. Appeals are submitted to the Committee then forwarded to the Provost for final decision. The student will be notified of the appeal decision through email. Documentation of the appeal decision and expulsion will become part of the student's permanent academic record at the University.

Non-Academic Expulsions

Permanent separation, or expulsion, from the University for non-academic reasons is to be decided by the Student Development Assessment Committee. Expulsions disallow future participation in University-wide programming. The Committee will review each case and make a decision. The student will be notified of the Committee's decision either face to face, when possible or through email if necessary.

Documentation of the expulsion will become part of the student's permanent transcript record at the University.

Expulsions will be considered based on factors that could include, but are not limited to:

- repeated offense(s) of the University's Conduct/Title IX policies
- severe offense(s) of the University's Conduct/Title IX policies
- offense(s) with malicious intent or blatant disregard for the University's Conduct/Title IX policies
- lack of compliance/follow through with previous sanctions assigned.

Students have the right to appeal the expulsion decision within 3 business days. Appeals are submitted to the Committee then forwarded to the Executive Director of Student Development for final decision. The student will be notified of the appeal decision via email. Documentation of the appeal decision and expulsion will become part of the student's permanent transcript record at the University.

Academic Recovery

Level 1 - Academic Notice (AN Hold - does not prevent self-registration)	Level 2 - Academic Probation (P1 Hold - does prevent self-registration)	Level 3 - Academic Probation II (P2 Hold - does prevent self-registration)	Level 4 - Academic Suspension (SU Hold - the student must reapply through Admission to return)
When semester GPA is less than 2.0 and the cumulative GPA is at or above a 2.0. Academic Notice may be repeated each semester that the cumulative GPA remains at or above 2.0 but the semester GPA is below a 2.0.	The first semester that the semester GPA and cumulative GPA are both below a 2.0. If a student placed on P1 does not earn a semester GPA of 2.0 or higher at the end of the P1 semester, they will not move on to level P2, but will be recommended for academic suspension. Students previously on probation (P1 or P2) that earned good standing will be placed on P1 again should the cumulative	The P1 semester cumulative GPA is below 2.0 but the semester GPA is 2.0 or higher. To avoid academic suspension, the student must earn a semester GPA at or above a 2.0 at the end of the P2 semester to show academic progress. Students with a cumulative GPA below 2.0 who are making progress with a consecutive semester GPA at or above 2.0 will not be recommended for academic suspension. In this case, the student will remain on P2 until the cumulative GPA is at or	If the semester and cumulative GPA is below a 2.0 by the end of Level 3 (P2), or the semester and cumulative GPA is below a 2.0 at the end of Level 2 (P1), the Office of the Registrar will recommend the student for academic suspension. Students on academic suspension will be assigned specific academic criteria they must meet in order to be eligible to reapply in a future semester to SEU.

	GPA fall below 2.0.	above 2.0.	

*Federal regulations require students to maintain satisfactory academic progress in order to remain eligible to receive financial aid. **Your academic probation/suspension may indicate you are also at risk for losing all or a portion of your federal, state, or institutional financial aid.** To determine if you are at risk, please contact **Student Financial Services** (sfs@seu.edu) to ensure you have all the information you need for your next steps.*

Academic Intervention Initiative

Academic Center for Enrichment (ACE), administers a process in which students in jeopardy of failing courses or having an unsatisfactory attendance record are identified and referred. This intervention initiative occurs during the midterm of each semester. Students who are identified in the initiative will be required to participate in online tutoring for subjects that directly relate to their status and are required to contact their academic advisor.

Willingness to participate in the Academic Intervention Initiative on the part of the student will be considered in the probation/suspension process.

Credit and Transfer of Credit

Definition of Credit Hour

One semester credit hour will be awarded for a minimum of 750 minutes (50 minute class x 15 weeks) of formalized instruction that typically requires students to work at out-of-class assignments an average of twice the amount of time as the amount of formalized instruction (1,500 minutes). It is acknowledged that formalized instruction may take place in a variety of modes.

While awarding of semester credit hours typically occurs for instruction delivered in accordance with an institution's standard semester calendar, it may also occur for instruction that may not follow the typical pattern, as long as the criteria for awarding such credit is met. The expectation of contact time inside the classroom and student effort outside the classroom is the same in all formats of a course whether it be fully online, a hybrid or face-to-face contact with some content delivered by electronic means, or one delivered in lecture or seminar format. Courses that have less structured classroom schedules, such as research seminars, independent studies, internships, practicums, or any other academic work leading to the award of credit hours should state clearly learning objectives, expected outcomes and workload expectations that meet the standards set forth above.

This credit hour policy applies to all courses at all levels (graduate, professional, and undergraduate) that award academic credit (i.e. any course that appears on an official transcript issued by the University) regardless of the mode of delivery including, but not limited to, self-paced, online, hybrid, lecture, seminar, and laboratory. Academic units are responsible for ensuring that credit hours are awarded only for work that meets the requirements outlined in this policy.

General Test Credit Parameters

A maximum of 90 semester hours of credit toward a Bachelor's degree and 45 semester hours of credit toward an Associate's degree may be earned through any combination of the following: AP, CLEP, IB, Military, Credit by Assessment, Credit by Examination or Specialized Training/Certification that the Registrar approves. Students must earn 25% of their degree through Southeastern University courses, per SACSCOC regulations. The 90/45 hour maximum of prior learning/test credit may be reduced for transfer students in order to meet their 25% coursework requirement. Please see credit hour limits for specific tests in the sections to follow. Students who earn an Associate's at SEU, who move on to seek their Bachelor's degree may request additional transfer credit be added to their record.

Advanced Placement (AP)

Southeastern University awards college credit to students who participated in the Advanced Placement program in high school. Students receive college credit based on credit recommendations of the Florida Articulation Coordinating Committee. Most courses with a score of three, four or five earn three college credits. No grade or quality points are assigned for awarded credit. Applicants must submit official AP scores directly from The College Board to Southeastern University for evaluation. Transcripts received from the student will not be considered official. A maximum of 90 semester hours of credit toward a Bachelor's degree and 45 semester hours of credit toward an Associate's degree may be earned through any combination of the following: AP, CLEP, IB, Military, Credit by Assessment, Credit by Examination or Specialized Training/Certification that the Registrar approves.

College Level Examination Program (CLEP)

The College Level Examination Program provides an opportunity for a student to earn college credit by examination.

Southeastern University accepts all CLEP exams listed on www.collegeboard.com, with these exceptions:

- Intro to Educational Psychology (general elective credit only)
- College Composition Modular

For a detailed list of CLEP exams approved for credit through SEU, visit this [link](#).

SEU Approved CLEP Tests

CLEP exams are offered through the SEU Testing Center. You do not have to be a Southeastern University student to utilize our Testing Center. Contact the SEU Testing Center (testing@seu.edu) to schedule an appointment to take a CLEP exam. All SEU students must complete an eligibility form before an appointment can be scheduled. The form will be reviewed to determine if the student meets SEU guidelines for awarding CLEP credit. These guidelines are listed below. One form per CLEP exam must be completed.

SEU Guidelines for Awarding CLEP Credit

- Official CLEP scores must be submitted to the Office of the Admission for evaluation.
- To receive credit, a minimum scaled score at or above an established national percentile must be earned on each area tested. Details are available at www.collegeboard.com.
- To receive credit for a qualified CLEP test, a degree-seeking (Associate's or Bachelor's) SEU student must not be currently enrolled in, have completed, earned a "W" grade, or have attempted an equivalent or more advanced college-level equivalent course.
- A minimum of twenty-five percent of a college degree must be earned through Southeastern University course credit.
- Southeastern University recommends that degree-seeking students interested in CLEP credit complete the CLEP by the end of their sophomore year.
- Credit cannot be duplicated.
- For non-SEU students, please contact your host institution regarding CLEP eligibility.

Testing Conditions

To receive credit a CLEP test must be taken before a student earns credit in a comparable college/university course or subject area. Credit cannot be duplicated. To receive credit, a minimum scaled score at or above an established national percentile must be earned on each area tested. Details are available at www.collegeboard.com. No grade or quality points are assigned for awarded credit. A maximum of 90 semester hours of credit toward a Bachelor's degree and 45 semester hours of credit toward an Associate's degree may be earned through any combination of the following: AP, CLEP, IB, Military, Credit by Assessment, Credit by Examination or Specialized Training/Certification that the Registrar approves.

International Baccalaureate (IB) Diploma

Students who have received the International Baccalaureate Diploma and have earned a score of four or better in the higher level and standard level examinations may qualify for credit for subjects taken. Without the earned diploma, a score of five is required and credit is only given for higher level examinations. No grade or quality points are assigned for awarded credit. Applicants may submit official IB scores to the Office of the Registrar for evaluation. Request transcripts from www.IBO.org. A maximum of 90 semester hours of credit toward a Bachelor's degree and 45 semester hours of credit toward an Associate's degree may be earned through any combination of the following: AP, CLEP, IB, Military, Credit by Assessment, Credit by Examination or Specialized Training/Certification that the Registrar approves.

Credit for Military Education

Veterans who have successfully completed courses in the military service training program may submit a record of the courses to Southeastern University for review. The amount of credit granted will not exceed that recommended by the American Council on Education in the "Guide to the Evaluation of Educational Experiences in the Armed Forces." No credit is awarded for technical or vocational training. No grade or quality points are assigned for awarded credit. A grade of "CR" is recorded. Students must request an official transcript available from the military. A maximum of 90 semester hours of credit toward a Bachelor's degree and 45 semester hours of credit toward an Associate's degree may be earned through any combination of the following: AP, CLEP, IB, Military, Credit by Assessment, Credit by Examination or Specialized Training/Certification that the Registrar approves.

- Request your **Army, Navy, Marines, or Coast Guard** transcript from the Joint Services Transcript (JST) website.
- Request your **Air Force** or **Space Force** transcript through the Community College of the Air Force website.
- This information is also available on the Veterans Administration (VA) website.

Credit by Assessment

Credit by Assessment is a means to gain credit for courses offered at Southeastern University by demonstrating knowledge of the course content. Students enrolled at Southeastern University who wish to attempt credit by examination or other appropriate assessments, or to challenge a course in which they are enrolled, may petition the Department Chair or Dean of the college for the opportunity to demonstrate competency in the usual material covered in the course. The petition must be approved by the Department Chair or Dean of the college. The Department Chair and/or Dean of the college will determine if a standardized test is appropriate. The testing instrument will become part of the student's academic record.

For the successful petition, the examination or assessment will be scheduled at the convenience of the Office of Testing and Proctoring Services. At the equivalent minimum grade of "C" earned on the examination or assessment, a grade of

"CR" will be recorded on the student's academic record for the subject tested. Credit by Assessment fees must be paid prior to test administration/assessment evaluation. Credit by Assessment forms are available in the Office of the Registrar. A maximum of 90 semester hours of credit toward a Bachelor's degree and 45 semester hours of credit toward an Associate's degree may be earned through any combination of the following: AP, CLEP, IB, Military, Credit by Assessment, Credit by Examination or Specialized Training/Certification that the Registrar approves.

Prior Learning Assessment

Students with significant experience in a subject area that could possibly be aligned with a course at a college or university may be able to gain credit through the prior learning assessment process. For guidance through the process, read the document, Prior Learning Assessment Instructions and the Prior Learning Assessment Handbook, located in the SEU catalog.

At the equivalent minimum grade of "C" earned on the assessment, a grade of "CR" will be recorded on the student's academic record for the subject. Prior Learning Assessment fees must be paid prior to the credit posting to the student's transcript record. A maximum of 90 semester hours of credit toward a Bachelor's degree and 45 semester hours of credit toward an Associate's degree may be earned through any combination of the following: AP, CLEP, IB, Military, Credit by Assessment, Credit by Examination or Specialized Training/Certification that the Registrar approves.

General Conditions for All Credit Transfer

- New transfer students must submit an official transcript from each of the previously attended institutions by the end of the student's first semester to have credit transferred in.
- An official transcript must be submitted in a sealed envelope or electronically delivered from the originating college or university. SEU will not accept an opened transcript as an official to award credit for transferred courses.
- Undergraduate credits accepted in transfer must be graded with a "C" (2.0 on a 4.0 scale) or higher.
- Courses accepted in transfer are calculated into the student's SEU career GPA.
- 25% of the credit for any undergraduate program must be earned at Southeastern University through credit-bearing course completion.
- To take credits through another institution while enrolled in a degree program at Southeastern University, a student must obtain transient approval to have credits accepted toward the SEU degree.

Transfer Practices

The Transfer Credit Practices of Designated Educational Institutions published by the American Association of Collegiate Registrars and Admission Officers is referenced.

- The university reserves the right to deny credit for specific courses from any college or university, regardless of accreditation.
- College-level credits are eligible for transfer with the exception of developmental, vocational, technical, or occupational courses.*
- Transfer evaluation is conducted for SEU degree-seeking students only. Non-degree seeking students are ineligible to transfer credit to SEU.

- Southeastern University will accept transfer credits earned at an institution accredited by any accrediting body listed in the acceptable accrediting bodies below or with an active articulation agreement with Southeastern University.
- International credits must come from a college or university recognized by the country's education department or ministry. Credits will only be reviewed after an official transcript has been submitted to the Office of the Registrar, and an approved independent evaluation service has performed an evaluation. Contact the Office of the Registrar for a list of approved service providers. The student is responsible for the cost of this service.
- Credits eligible for transfer will not be removed at a student's request.
- Southeastern University does not generally accept credit from one institution for another institution's transferred credits. Individual final, official transcripts must be submitted from each and every institution attended.

*In conjunction with the Southeastern University School of Trades Program Chair and the American Council on Education (ACE), the Office of the Registrar will evaluate and determine transfer eligibility for vocational, technical, and career course and industry certifications. Courses and certifications approved for transfer must meet the standard qualifications for an equivalent SEU Trades course. Transfer courses earned as clock hours will be transferred using the clock-to-credit hour equivalence formula.

Acceptable Accrediting Bodies

Southeastern University accepts courses in transfer from institutions accredited by an accrediting organization recognized by both the U.S. Department of Education (ED) and the Council for Higher Education Accreditation (CHEA). Programmatic Accrediting Organizations acceptance is determined at the program level. Acceptable accrediting bodies include the following accrediting organizations:

- Association for Biblical Higher Education (ABHE)
- Association of Advanced Rabbinical and Talmudic Schools (AARTS)
- Commission on Accrediting of the Association of Theological Schools (ATS)
- Distance Education Accreditation Commission (DEAC)
- Higher Learning Commission (HLC)
- Middle States Commission on Higher Education (MSCHE)*
- New England Commission of Higher Education (NECHE)
- Northwest Commission on Colleges and Universities (NWCCU)
- Southern Association of Colleges and Schools Commission on Colleges (SACSCOC)
- Transnational Association of Christian Colleges and Schools (TRACS)
- Western Association of Schools and Colleges – Accrediting Commission for Community and Junior Colleges (WASC - ACCJC)
- Commission on Accrediting of the Association of Theological Schools

- Western Association of Schools and Colleges Senior College and University Commission (WASC - SCUC)

*MSCHE credit is accepted although it is no longer recognized by CHEA.

Transfer Credit Appeals

Transfer students have the right to appeal transfer credit decisions made by the Office of the Registrar. The student must write a letter of appeal accompanied by any additional documentation requested by the Office of the Registrar. The appeal will be reviewed by the appropriate academic department chair/college dean with additional documentation and the student will be notified of the decision rendered.

Transfer of Credit to Other Institutions

The transferability of credits earned at Southeastern University is at the discretion of the receiving college, university, or other educational institution. Students considering transferring to any institution should not assume that credits earned in any program of study at Southeastern University will be accepted by the receiving institution. Similarly, the ability of a degree, certificate, diploma, or other academic credential earned at Southeastern University to satisfy an admission requirement of another institution is at the discretion of the receiving institution.

Accreditation does not guarantee credentials or credits earned at Southeastern University will be accepted by or transferred to another institution. To minimize the risk of having to repeat coursework, students should contact the receiving institution in advance for evaluation and determination of transferability of credits and/or acceptability of degrees, diplomas, or certificates earned.

Degree Requirements

A candidate for the associate's or bachelor's degree must complete the required number of hours for his/her chosen degree program with an overall average grade of 2.0 in order to graduate. Various colleges and departments within the university may require a higher GPA to qualify for graduation; refer to the program of study section of the catalog for details. Each candidate for a degree must complete the required foundational education core and major requirements in the selected program of study. Students seeking teacher certification must complete requirements in appropriate professional education and teaching specialization courses.

Degree requirements are based on the requirements in effect at the time the student first declares a major. Students may elect to complete the requirements in effect at the time the student first declares the major or they may elect to complete the requirements of the current catalog. The degree requirements of the current catalog must be applied for all students who are readmitted to degree seeking status and have not attended Southeastern University for two or more semesters. Students may not elect to adopt prior year catalog requirements.

Candidates for the associate's and bachelor's degree must complete 25 percent of their program of study at Southeastern University.

Dual Major vs. Dual Degree

A dual major is a program of study that meets the requirements of two distinct majors in a single Bachelor's degree. The program of study consists of courses required to meet the degree requirements for each of the two majors, together with the foundational core courses needed to meet the general education requirements for the degree. The minimum number of credit hours required for a dual major equals the total number of credit hours required for the major comprising the larger number of credit hours for the degree; however, the student may be required to complete

additional credit hours to fulfill the second major core when the major core exceeds the general elective core of the primary major. Students must complete both majors prior to degree conferral.

Dual major programs lead to a single Bachelor's degree when both majors are the same degree type (ie. Bachelor of Science and Bachelor of Science). Students who complete the requirements for a double major in the same degree type receive a single diploma that acknowledges both majors.

Dual major programs that lead to two Bachelor's degrees upon completion (ie. Bachelor of Science and Bachelor of Arts) will receive two separate diplomas acknowledging each major upon degree conferral. Courses that double count toward both majors may not exceed 75% of either degree program; a minimum of 30 unique credit hours must be earned for each individual degree.

Students enrolled in a dual major or dual degree program should consult with Student Financial Services to learn more about financial aid options that are available for earning a second major or second degree.

Confidentiality of Student Records

Family Educational Rights and Privacy Act (FERPA)

The Family Educational Rights and Privacy Act (FERPA) (20 U.S.C. § 1232g; 34 CFR Part 99) is a Federal law that protects the privacy of student education records. The law applies to all schools that receive funds under an applicable program of the U.S. Department of Education.

FERPA gives parents certain rights with respect to their children's education records. These rights transfer to the student when he or she reaches the age of 18 or attends a school beyond the high school level, except in certain specified circumstances. One of these exceptions permits the nonconsensual disclosure of information derived from education records to that student's parent if the student is a dependent for tax purposes. Neither the age of the student, nor the parent's status as custodial parent, is relevant to determining whether disclosure of information from the education records of eligible students to a parent without written consent is permissible under FERPA. If a student is claimed as a dependent by either parent for tax purposes, then either parent may have access under this provision, absent a court order specifically prohibiting it. Students to whom the rights have transferred are "eligible students."

- Eligible students have the right to inspect and review their education records maintained by Southeastern University. SEU is not required to provide copies of records unless, for reasons such as great distance, it is impossible for parents or eligible students to review the records.
- Eligible students have the right to request that SEU correct records which they believe to be inaccurate or misleading.
- Generally, SEU must have written permission from the student in order to release any information from a student's education record. However, FERPA allows schools to disclose those records, without consent, to the following parties or under the following conditions (34 CFR § 99.31):
 - School officials with legitimate educational interest;
 - Other schools to which a student is transferring;
 - Specified officials for audit or evaluation purposes;
 - Appropriate parties in connection with financial aid to a student;
 - Organizations conducting certain studies for or on behalf of the school;
 - Accrediting organizations;
 - To comply with a judicial order or lawfully issued subpoena;
 - Appropriate officials in cases of health and safety emergencies; and
 - State and local authorities, within a juvenile justice system, pursuant to specific State law.

Schools may disclose, without consent, "directory" information such as a student's name, address, telephone number, date and place of birth, honors and awards, and dates of attendance. SEU notifies students annually of their rights under FERPA.

Disclosure of Information in Health and Safety Emergency

Based on 34 FERPA CRF 99.36, an educational agency or institution may disclose personally identifiable information from an education record to appropriate parties, including parents of an eligible student, in connection with an emergency if knowledge of the information is necessary to protect the health or safety of the student or other individuals.

SEU may include in the education records of a student appropriate information concerning disciplinary action taken against the student for conduct that posed a significant risk to the safety or well-being of that student, other students, or other members of the school community;

SEU officials may disclose appropriate information to teachers and school officials within the institution who it has been determined have legitimate educational interests in the behavior of the student; or

SEU officials may disclose appropriate information to teachers and school officials in other schools who have been determined to have legitimate educational interests in the behavior of the student.

SEU officials may take into account the totality of the circumstances pertaining to a threat to the health or safety of a student or other individuals, in making this decision. If the institution determines that there is an articulable and significant threat to the health or safety of a student or other individuals, it may disclose information from education records to any person whose knowledge of the information is necessary to protect the health or safety of the student or other individuals.

Graduation

Application

In order to graduate, a student must fulfill the following responsibilities by the deadlines provided by the Office of the Registrar. Students gain a thorough understanding of these requirements in published graduation documents on the SEU website and in the JICS Graduation Tab.

- Submit a graduation application
- Provide transcripts of all approved transfer courses 6 weeks before graduation
- Clear all holds
- Meet all academic, non-academic, and program-specific requirements

Students on academic probation or otherwise academically deficient will not be eligible to apply for graduation or participate in commencement until the condition of probation or deficiency is resolved.

Senior Degree Audit Policy

Students who are within one year of graduation must file an Application for Graduation in JICS. The office of Academic Advising reviews each applicant's degree audit to determine if the student is eligible to graduate.

The degree audit, found in JICS, is an outline of degree requirements based on the catalog year that the student declared their major. The degree audit enables the student and academic advisor to assess academic progress and remaining coursework needed to fulfill specific degree requirements. The degree audit is a valuable tool to guide students with

academic planning, course selection, and degree completion, and is used as the final graduation audit to ensure completion of degree requirements.

How to complete an Application for Graduation:

1. Fill out the Graduation Application in JICS under the "Graduation" tab by the deadline established by the Office of the Registrar (April 15 for upcoming fall graduates, November 15 for upcoming spring graduates).
2. After the add/drop period and prior to the start of the B subterm of the semester the student applies to graduate, graduation applicants' individual degree audits are reviewed by the Office of Academic Advising. Applicants receive an email from advising@seu.edu confirming graduation eligibility status. If the student is in good academic standing with a 2.0 or better GPA and has 6 or fewer hours outstanding after the semester in which the student applied to graduate, the student will be eligible to participate in the commencement ceremony. If it is determined that the student is not eligible to graduate, the student will be notified by the Office of the Registrar, the graduation application is canceled, and the student should reapply for a later graduation date. All academic requirements specified on the degree audit must be completed and the student must earn a 2.0 or better cumulative GPA for degree conferral.
3. A student is not classified as a candidate for graduation until the application has been received and an official degree audit review is completed. Students who intend to graduate but miss the deadline to apply must still submit an application. In this case, the student will be ineligible to participate in the commencement ceremony.

Honors

Honors recognition is made at commencement based on the cumulative grade point average at the end of the penultimate semester. If the grades of the final semester change a student's honors status, the correct status is noted on the official transcript.

The credit hours and quality points accumulated at previous schools accepted as transfer will be averaged with the Southeastern GPA to determine honors recognition.

A candidate for the associate's and bachelor's degree will graduate with honors as follows:

- Cum laude (honors) -cumulative grade point average of 3.50-3.74
- Magna cum laude (high honors) -cumulative grade point average of 3.75-3.89
- Summa cum laude (highest honors) -cumulative grade point average of 3.90-4.00

Grade point averages are never rounded up to the nearest whole number.

Adornment

Cords, medallions and stoles are the only graduation adornments that graduates will be allowed to wear at official commencement ceremonies of Southeastern University without written approval. Requests for other forms of adornment must be submitted to the Office of the Provost no later than 21 days prior to commencement.

Honor cords should represent high academic achievement by graduates as recognized through their respective departments and colleges. Non-academic cords that have been awarded by University representatives may also be worn.

- Undergraduate-level students are allowed to wear a maximum of three adornments (cords, medallions, or stoles) for all commencement ceremonies

- Graduate-level students are allowed to wear SEU awarded cords and medallions at commencement ceremonies. However, stoles are not permitted.

Non-academic adornment: Graduates seeking approval to wear non-academic adornment, such as cultural representations, must submit a written request and photo of themselves wearing the adornment to the Office of the Provost no later than 21 days prior to commencement in order for the request to be processed. This privilege is for graduates only. Careful consideration will be given to all requests; however, approval is not guaranteed. Guidelines for consideration include the following.

Adornment:

- Must lay flat around the neck
- Must be no more than 5" in width
- Must be of a length that is appropriate for commencement attire
- Must be consistent with SEU's message & mission
- Headdresses and/or attachments to graduation cap or gown will not be allowed
- Representation of political affiliation or controversial subject matter will not be allowed

Recognition of Academic Excellence

Alpha Chi

Alpha Chi is a national honor scholarship society which promotes academic achievement, ethical character, and professional advancement. Members of this society must have a GPA of 3.5 or higher, comprise no more than 10% of junior and senior classes, and be elected to the society by the faculty. Alpha Chi sponsors forums, seminars, scholarships for students, and regional and national conventions for the exchange of scholarly papers and for professional networking.

Alpha Phi Sigma

Alpha Phi Sigma recognizes academic excellence of Undergraduate and Graduate students of Criminal Justice, as well as Juris Doctorate students.

The four goals of Alpha Phi Sigma are to honor and promote academic excellence, community service, educational leadership, and unity.

Alpha Phi Sigma is the only Criminal Justice Honor Society which is a certified member of the Association of College Honor Societies and affiliated with the Academy of Criminal Justice Sciences.

Southeastern University's assigned chapter name is Pi Beta Kappa. This chapter has been organized to promote the highest standards of criminal justice practice and to recognize and promote the four goals of Alpha Phi Sigma.

Student members must have declared a major in Criminal Justice and must have a cumulative grade point average of 3.5.

Chi Sigma Iota

Chi Sigma Iota is an international honor society that values academic and professional excellence in counseling. Chi Sigma Iota promotes a strong professional identity through members (professional counselors, counselor educators, and students) who contribute to the realization of a healthy society by fostering wellness and human dignity. A student's invitation to join the chapter at Southeastern University – Sigma Epsilon Upsilon, distinguishes them as an individual whose accomplishments are consistent with the mission of the international organization and of the Sigma Epsilon Upsilon Chapter. Eligibility for membership is extended only to those students who "have a cumulative GPA of 3.5 or better on a scale of 4.0, are deemed promising for endorsement as a professional counselor whose ethical judgment and behavior will be exemplary" (csi-net.org/bylaws, Article 4.1), and "who strive to serve Christ and the world through Spirit-empowered life, learning, and leadership" (Southeastern University Mission).

Dean's Honor

Southeastern students who excel academically may qualify for the Dean's Honor List. To qualify, a student must be enrolled for 12 hours or more and attain or surpass a scholastic grade point average of 3.5 from the previous semester of enrollment. Letters of Achievement are emailed to students who meet the criteria for Dean's honor after final grades are posted at the end of each fall and spring semester.

Delta Mu Delta

Delta Mu Delta is a business honor society that recognizes and encourages academic excellence of students at qualifying colleges and universities to create a DMD community that fosters the well-being of its individual members and the business community through lifetime membership.

Kappa Delta Pi

Kappa Delta Pi, an International Honor Society in Education was founded in 1911 at the University of Illinois. Organized to recognize excellence in education, membership is elected based on ideals of scholarship, high personal standards, and promise in teaching and allied professions. High academic achievement required.

Kappa Mu Epsilon

Kappa Mu Epsilon is a specialized honor society in Mathematics. KME was founded in 1931 to promote the interest of mathematics among undergraduate students. Its chapters are located in colleges and universities of recognized standing which offer a strong mathematics major. The chapters' members are selected from students of mathematics and other closely related fields who have maintained standards of scholarship, have professional merit, and have attained academic distinction.

Military Honor Cord

A red/white/blue cord designates faculty or graduating students who are honorably discharged U.S. veterans, are currently serving in the U.S. military (active duty, National Guard, or Reserves), or will be commissioned upon graduation.

Phi Alpha

The purpose of Phi Alpha Honor Society is to provide a closer bond among students of social work and promote humanitarian goals and ideals. Phi Alpha fosters high standards of education for social workers and invites into membership those who have attained excellence in scholarship and achievement in social work.

PHSO

The Pre-Health Service Organization is for those preparing for careers in the health profession. The primary objective of the organization is to take social action on campus and in the community, exhibit excellence in scholarship, provide practical field experience, and establish relationship between students committed to becoming outstanding health care professionals.

Psi Chi

Psi Chi, the national honor society in psychology, promotes excellence in scholarship and advancement in the science of psychology. Qualification for membership requires the completion of three semesters, or the equivalent, of college or university courses, completion of nine semester hours or the equivalent toward a declared major or minor in psychology, a 3.0 GPA in psychology courses, a cumulative 3.0 GPA, and rank in the upper 35% of their class in general scholarship.

Sigma Chi Pi

Sigma Chi Pi, the honor society for the Alliance for Assemblies of God Christian Higher Education, accepts into membership qualified graduates from Southeastern University. Nominations for membership are restricted to no more than seven percent of the graduating class and are made by the Registrar. Qualifications for membership require a scholastic average of not less than 3.5 on a four point system, or the equivalent, approved Christian character, and diligent servant leadership.

Sigma Tau Delta

Sigma Tau Delta is a recognized honor society in English. The organization was established in 1924 to confer distinction for high achievement in English language, literature, and writing. Its chapters are located in colleges and universities and is dedicated to fostering literacy and all aspects of the discipline of English.

University Honors Scholar

Graduating seniors who have fulfilled extensive program requirements for the Southeastern University Honors Program, including the successful completion of an in-depth Honors Thesis, receive the designation of University Honors Scholar. They are noted by the Honors Program medallion worn at commencement.

Graduation Requirements

A candidate for the associate's or bachelor's degree must complete the required number of hours for his/her chosen degree program with an overall average grade of 2.0 or better in order to graduate. Various colleges and departments within the university may require a higher GPA to qualify for graduation. Refer to the program of study section of the catalog for details. Each candidate for a degree must complete a minimum of 30 credit hours toward the required foundational education core and must complete all major requirements in the selected program of study. Students

seeking teacher certification must complete requirements in appropriate professional education and teaching specialization courses.

Degree requirements are based on the requirements in effect at the time the student declares a major. Students may elect to complete the requirements in effect at the time the student first declares the major or they may elect to adopt the requirements of the current catalog. The degree requirements of the current catalog must be applied for all students who are readmitted to degree-seeking status and have not attended Southeastern University for two or more semesters.

Candidates for the associate's and bachelor's degrees must complete 25 percent of their program of study at Southeastern University to be eligible to graduate.

Career Services

Our Career Services team at Southeastern University strives to nurture the student's divine design and empower them to successfully create a pathway between academic growth and career readiness.

While enrollment in the university or completion of a program does not guarantee employment, the Career Services team assists students and alumni in making informed career decisions, discover and leverage their employable skills, obtain career-related experiences, and prepare for a successful job placement. We provide career assessments, career coaching, resume preparation, internship and job search help, professional networking and career workshops, career expos and recruiting events.

Our goal, in collaboration with our SEU community, is to prepare our students for meaningful post-graduation academic and professional success.

Legal Name Changes

Students and alumni may submit documentation of a legal name change, resulting in all educational records being updated to the new legal name, by completing the name change request in JICS. A color copy of the Social Security Card, Driver's License, or passport indicating the new name is required.

Constitution Day

Pursuant to federal regulations, (Division J of Pub. L. 108-447, the Consolidated Appropriations Act, 2005," Dec. 8, 2004; 118 Stat. 2809, 3344-45 Section 111), Southeastern University sponsors a Constitution Day annually, open to students and members of the community, with political and government representatives as featured speakers. Students, faculty and staff are encouraged to attend.

Title IX Statement

Southeastern University is committed to creating an environment for every student to thrive academically, spiritually, and socially. An aspect of creating this culture is providing avenues for students to discuss and report any activity that may compromise this commitment.

Under a federal law known as Title IX, "no person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving federal financial assistance" (Title IX of the Education Amendments of 1972).

While students should feel comfortable approaching faculty with issues they may be struggling with or concerns they may be having, students should know that all faculty and staff are required to report certain information about Sexual Misconduct and certain crimes to the University's administration, in order to help keep the University community safe and to connect students to all of the resources and reporting options that are available.

For example, if you inform faculty or staff (in private or during class discussions) of an incident of Sexual Misconduct, that individual will keep the information as private as possible but is required to bring it to the attention of the institution's Title IX Office. If a student would like to talk to the Title IX office directly, they can do so by e-mail at smpowell@seu.edu, by phone at 863-667-5236, or in person at Pansler U210. For more information about Title IX reporting options at Southeastern, please go to <https://seu.edu/about/title-ix/>.

If you are struggling with an issue that is traumatic, unusually stressful, or results in disruptive behavior, faculty and staff will likely inform the office of Student Outreach & Support. If students would like to reach out directly to the office of Student Outreach & Support for assistance, they can do so by going to www.seu.edu/sos. Student Outreach & Support is located in Addison 110 and can be contacted by phone at 863-667-5218 or by e-mail at sos@seu.edu.

Registration and Payment Options

Payment Responsibilities and Requirements

Students who register for classes at Southeastern University assume responsibility for tuition and fees generated from that registration, including any room, meals, and miscellaneous charges, as applicable. Failure to make satisfactory financial arrangements can result in the delay of graduation, denial of registration privileges, removal from classes, withholding of transcripts, and/or referral to a collection agency. Any unauthorized balance not covered by financial aid is due and payable in full 30 days prior to the first day of class.

If a student decides not to attend the course(s) for which you are registered, it is the student's responsibility to drop the course(s) by the published add/drop date (date varies by semester) to avoid any financial liability.

Students are also responsible for past due balances on their accounts. The account balance must be paid in full before registering for a future semester.

Students may not owe a refund on any federal grant or federal loan, nor be in default on any loan or have made satisfactory arrangements to repay any defaulted loan. Students must not have borrowed in excess of the Title IV loan limits at any institution. Students agree that they will use any money received under a Title IV loan, grant, or work-study program only for expenses related to their education. Students must understand that the amount of any repayment is based on regulations published by the U.S. Department of Education.

Students whose accounts are referred to a collection agency will be liable for all reasonable collection costs, including attorney fees and other charges necessary for collection of this debt. By registering for classes, students acknowledge receipt of this information and their acceptance of the associated responsibilities.

Payment Plans

Payment Plans

In a continuing effort to assist the families of our students, Southeastern University has partnered with Nelnet's Campus Commerce to administer the Southeastern University payment plan as an alternative to standard payment arrangements. Families have the option to pay university-billed expenses in regular monthly payments. Parents and/or students determine how much of the expenses they wish to pay in equal monthly payments. Nelnet's payment plan system can also aid in budget planning.

The Southeastern University payment plan provides the benefits of a monthly payment plan without finance charges. The only cost is the enrollment fee to cover administrative expenses. Plans are available on a per semester basis.

Several Payment Plans for Your Convenience

Five-Month Plan—Fall Term

This plan is budgeted in five (5) equal monthly payments for the fall semester. The first monthly payment, plus the enrollment fee, is due by June 29th. Payments are due on the first day of each month thereafter.

Four-Month Plan—Fall Term

This plan is budgeted in four (4) equal monthly payments for the fall semester. The first monthly payment, plus the enrollment fee, is due by July 28th. Payments are due on the first day of each month thereafter.

Five-Month Plan—Spring Term

This plan is budgeted in five (5) equal monthly payments for the spring semester. The first monthly payment, plus the enrollment fee, is due by November 29th. Payments are due on the first day of each month thereafter.

Four-Month Plan—Spring Term

This plan is budgeted in four (4) equal monthly payments for the spring semester. The first monthly payment, plus the enrollment fee, is due by December 28th. Payments are due on the first day of each month thereafter.

Summer Term

Payment plans are not available during the Summer term.

How to Enroll

Southeastern's affordable, no interest monthly payment plans are available to all students and families, regardless of need or financial standing. There is no approval process, and the only cost required is a nominal enrollment fee. Payments must be made in U.S. dollars.

To enroll in a plan each semester, visit <https://mycollegepaymentplan.com/southeastern> or through MyPortal under the Payment Plan link. Questions concerning the Southeastern University Payment Plan should be directed Student Financial Services at sfs@seu.edu or to our 3rd-party payment plan provider, Nelnet, at 1-800-609-8056.

Direct Payments

Direct one-time payments can be made through Nelnet Campus Commerce. Students can access their payment portal through MyPortal (formerly JICS) by clicking on the tab for "Student Finances" and navigating to the link, Nelnet Student Financial Information.

Billing

Students may access their account information online. Parents may access the student's account information online with permission from the student granted via the parent portal. Students are responsible for reviewing the account online on a regular basis (monthly review is encouraged).

How to Review Account Balances

1. Go to Southeastern website: www.seu.edu
2. At the top of the homepage, choose Login.
3. You will be prompted to log in. Enter your username and password to log in.
4. Choose the MyPortal (formerly JICS) - Student Info Portal
5. A new tab will open. Click on the Student Finances tab.
6. Click on Nelnet Student Financial Information.
 - Nelnet Campus Commerce is a 3rd-party system SEU has partnered with to deliver real-time account integration, direct payment, and payment plans all in one place.
 - The Campus Commerce home page has the Total Balance as well as options for reviewing transaction details, making payments, or setting up payment plans.

Finance Charges

A 1.25% finance charge is added monthly (15% annually) to any unpaid balance more than 30 days old unless the student is enrolled in an approved university payment plan.

Payment Requirements for Special Programs

Students enrolled in Directed Study courses or special study programs, not a part of the regular semester, are required to make payment in full by the first day of classes. Internships are charged an internship fee and hourly tuition.

Summer School

Summer school students are required to pay for summer school charges by the first day of classes.

Food Services

Students living on campus are required to choose a meal plan. If no choice is made, the 10-meal plan will be selected for you. Meal plans are not transferable, usable beyond limits indicated, or refundable for meals not used.

Southeastern University's Flight and Ground Training Fees

Courses under AVIP or AVIM have additional course fees and the cost breakdown can be found on the Aviation webpage at <https://www.seu.edu/aviation/>. University students shall be charged fees for flight and ground training delivered by the contracted vendor when enrolled in a corresponding University course.

1. Fees reflect the estimated training required for the average student to complete each course. For students that exceed the estimated cost additional flight hours and/or ground instruction will be billed at prevailing hourly rates. Fees do not include the costs of repeat FAA check-rides or knowledge exams.
2. University reserves the right to impose a fuel surcharge should fuel prices rise dramatically.
3. Students will be refunded unused flight training fees at the prevailing hourly rates if they withdraw prior to completing a course, or complete the course with fewer hours, or using less-expensive aircraft.
4. Students will be charged a \$100 fee for a no-show on a scheduled flight lesson.

Refund Policy

Southeastern University is committed to providing excellent teaching and learning experiences, through face-to-face, hybrid and remote instruction. As the university has invested in instructional design of courses, their delivery and associated materials, in the event that any of the following occurrences causes or requires Southeastern University to suspend classes, move to online or remote education, close down the University campus, close on or off campus housing, or otherwise not operate the University in its normal and customary manner, the University shall not be required to provide students any refunds or credits for tuition and fees, meal plans, housing, insurance, or any other fees and costs paid to or owed to the University.

Any refunds or credits, if any, paid by or determined to be paid by the University to students, shall be deemed voluntary and not mandatory, and students shall not have any right to, claim to, or legal cause of action for any refunds or credits:

1. Federal, State of Florida, Polk County, or City of Lakeland governmental orders, ordinances or decrees;
2. Hurricanes, tornados, earthquakes, floods, fires, explosions, or other Acts of God or natural disasters of any kind;
3. Interruption of utility service or services not temporary in nature;
4. Pandemics, epidemics, or other significant outbreaks of disease;
5. Riots or insurrections;

6. Acts of terrorism;
7. Protests; or
8. Any other situation or unforeseen event, not specifically enumerated, which requires the University to take the actions set forth above.

In compliance with Nevada State Legislation (NRS 394.449), any refunds for students at the Las Vegas, Nevada Extension Site will be paid to the person or entity who paid the tuition or fees within 15 calendar days after the (a) date of cancellation by a student of his or her enrollment; (b) date of termination by the institution of the enrollment of a student; (c) last day of an authorized leave of absence if a student fails to return after the period of authorized absence; (d) last day of attendance of a student; or (e) whichever is applicable.

Please refer to the section on Tuition, Fees and Financial Aid for more information, or address specific questions to Student Financial Services.

Refunds of Room, Meal Plans, and Fees

Room: Rooms are reserved for each student for an entire semester. After add/drop, no refund of room charges is made except in cases of withdrawal from the university, severe illness, or incapacity.

Meal Plans: Following the add/drop period, cancellation of a meal plan can only be made if a meal plan exemption has been approved for dietary restrictions, or if a student withdraws from the university. The meal plan will be refunded on a prorated weekly basis.

Fees: Course material, general, technology, and student fees are not refundable after the add/drop period for classes lasting sixteen weeks or more. For courses lasting eight weeks or less, course material, general, technology, and student fees are not refundable after calendar day 3 of the course (applicable to Session A courses. See Session B information for limitations on Session B drops).

Internship fees are not refundable after the first week of the internship.

Fees are non-refundable after the first week of classes. In some cases, state refund requirements may supersede institutional policy.

University Withdrawals and Refunds of Tuition

When a student submits a written notice of withdrawal to the Admission Office or the Office of the Registrar prior to the first day of classes, a full refund (100%) of institutional charges is made. If a student withdraws from the university on or before the add/drop deadline, as defined in the academic calendar annually, tuition will be refunded according to the schedule below:

Sixteen Week Classes

A course dropped the week the class begins in a 16-week semester will receive a 100% refund. During each consecutive week, the refund is reduced by 25% each week. After the third full week of classes, no refund is granted. Example:

- Until the expiration of the add/drop period (the add/drop period typically occurs within the first week of a semester): 100% of tuition and fees
- After add/drop period, the student refund is reduced by 25% of tuition for each week thereafter.

- After the add/drop through the 2nd full week of class - 75% of tuition
- After the 2nd full week of class up to the third full week of class - 50% of tuition
- After 3rd full week of class and up to the fourth full week of class - 25% of tuition
- After the 4th full week of class: No refund

Classes lasting 8 weeks or less

Session A courses:

A course dropped up to or on the first day and for the succeeding two (2) calendar days thereafter will receive a 100% refund. After the third calendar day, the refund is reduced by 25% based on the schedule below:

- Upon commencement of the class (Day 1) and for the succeeding two (2) calendar days thereafter, the student will qualify for a 100% refund of tuition and fees.
- Calendar days 4-6: 75% of tuition
- Calendar days 7-9: 50% of tuition
- Calendar days 10-13: 25% of tuition
- After Calendar Day 13 of classes: No refund

Session B courses:

Students who begin the semester with Session B courses (who were not enrolled in Session A) may have their courses dropped up to or on the first day and for the succeeding two (2) calendar days thereafter to receive a 100% refund. After the third calendar day, no refund is given.

Credit Balances and Refunds

Disbursement of financial aid occurs according to federal regulations. If a credit balance results once federal financial aid is applied to a student's account, the surplus will be refunded to the student within 14 days of the aid posting date reflected on the student account. The student may elect to have refund disbursements automatically deposited into a checking/savings account. Students who do not enroll in automatic deposit will have their refund mailed to them in the form of a check to the legal home permanent address on file or their university mailbox.

If the credit balance is caused by a Parent PLUS Loan, the refund will be issued either to the parent or the student according to the parent's preference as selected on the PLUS application.

Collections Policy

Unresolved balances after the last day of attendance are considered delinquent and will be sent to the SEU Collections Office. The Collections Office will reach out to students in an attempt to assist with resolving unpaid balances. Students have the option to make one-time payments or set up payment plans in order to resolve the issue. If rectification has not been reached, the account may be reported to one or more of the national credit bureaus.

Return of Federal (Title IV) Funds

The law (34 CFR 668.22) specifies how Southeastern must determine the amount of Federal Student Aid (FSA) that a student has earned when withdrawing from school. The FSA programs covered by this law are: Federal Pell Grants, Federal Direct Subsidized and Unsubsidized Loans, Federal PLUS Loans, Federal Supplemental Educational Opportunity Grants (FSEOG), and, in some cases, certain student state grant aid.

In order for aid to be included in a Return of Title IV funds calculation a student must be fully eligible to receive these federal funds prior to their withdrawal. Funds considered as aid that could have been disbursed and, consequently, included in the Return to Title IV calculation must meet the following eligibility criteria:

- The Institutional Student Information Record (or ISIR) must have been processed with an official SAI (Student Aid Indicator) by the date of withdrawal,
- The student must have been making Satisfactory Academic Progress,
- For any Direct Subsidized, Unsubsidized, or PLUS Loan, the loan must have been originated by the date of withdrawal.

A student is considered to have withdrawn from a payment period or period of enrollment if the student does not complete all the days in the payment period or period of enrollment that the student was scheduled to complete.

Withdrawal from the University refers to a student's failure to complete the period of enrollment for which he or she was enrolled. There are two types of withdrawals:

- Official Withdrawal

An official withdrawal occurs when the student notifies the Retention Specialist of the intent to withdraw and completes the withdrawal process/form through the appropriate departments on campus. If known, the student's last date of attendance (LDA) is recorded on their withdrawal form and a Return of Title IV funds calculation is completed by the SFS office.

- Unofficial Withdrawal

An unofficial withdrawal occurs when the university discovers that the student has ceased to be enrolled (i.e., is no longer attending classes) and the student did not initiate/complete the withdrawal process.

There are 2 types of unofficial withdrawals:

1. A student has not notified the school of their withdrawal and has ceased attending all of their courses.
2. A student has not earned at least one passing grade in their classes for a period of enrollment (has received either all Fs, all Ws, or a combination of Fs and Ws.)

For unofficial withdrawals, the withdrawal date for the Return to Title IV calculation will be the midpoint of the payment period or period of enrollment OR the last date of documented academic-related activity, if known.

Since SEU may not know that a student has unofficially withdrawn until the end of the semester, funds are returned within 30 days after the end of the earlier of the end of the payment period or period of enrollment or the date that SEU has determined the student has withdrawn.

The amount of financial assistance that a withdrawing student earns is calculated using a Return to Title IV formula.

In the event of a withdrawal (official or unofficial), SEU must calculate the number of days attended and total number of days that a student was scheduled to complete within the term, including weekends but excluding any scheduled breaks of five days in length or greater. Days attended are divided by the days in the term the student was scheduled to complete, providing a percentage of the payment period the student has completed. The percentage is multiplied by total aid for which the student is eligible to determine the amount of aid that has been earned.

Days attended / Days in the term scheduled to complete (minus scheduled breaks of 5 days or more) = percentage completed.

Percentage completed x total aid eligible = earned aid

SEU must return the amount of unearned aid, up to the maximum amount received, to each of the Title IV programs in the following order:

- Federal Unsubsidized Direct Loan
- Federal Subsidized Direct Loan
- Federal Direct PLUS Loan
- Federal Pell Grant
- Federal Supplemental Education Opportunity Grant (FSEOG)

Once the student has completed more than 60% of the payment period, all federal financial assistance is considered to be earned.

SEU calculates the amount for which the student is responsible by subtracting the amount returned by SEU from the total amount which is unearned. The remaining amount is the student's share and is allocated in the same order as above.

Total amount unearned

-amount returned by school

= \$ amount the student is required to return to Title IV.

If the student did not receive all of the funds that s/he earned, the student may be due a post-withdrawal disbursement. If the post-withdrawal disbursement includes loan funds, Southeastern University must obtain the student's permission within 30 days of the date of determination of withdrawal in order for the funds to be disbursed. A student may choose to decline some or all of the loan funds so that they do not incur additional debt. Southeastern University may automatically use all or a portion of a student's post-withdrawal disbursement of Title IV funds for tuition, and housing and meal plan charges (as contracted with the University). The University needs the student's permission to use the post-withdrawal Title IV disbursement for all other school charges. If the student does not give permission, the funds will be offered directly to the student; however, it may be in the student's best interest to allow the school to keep the funds to reduce debt at the school.

A post-withdrawal disbursement to the student's account for charges incurred must be disbursed as soon as possible but no later than 45 days after the date the school determines the student's withdrawal date. A post-withdrawal disbursement made directly to the student must be disbursed as soon as possible, but no later than 45 days for grants and 45 days for loan funds.

Students who are expelled or who take unapproved leaves of absences are considered to have withdrawn from the University. Furthermore, SEU reserves the right to request a student's withdrawal.

Exemptions:

New regulations in 2020 established withdrawal exemption criteria which, if met, allow a student who has withdrawn or otherwise ceased attendance to NOT be considered withdrawn for Title IV purposes. This means that no Return to Title IV (R2T4) calculation is required for a particular student who meets one of the following exemptions: .

Withdrawal exemption for graduates/completers

1. A student who completes all requirements for graduation from their program before completing the days in the period that he/she was scheduled to complete is not considered to have withdrawn.
2. This exemption applies to all types of programs, whether with or without sessions/modules.
2. Withdrawal exemption for programs offered in modules
 1. If a student successfully completes one module that includes 49% or more of the total number of days in the payment period (excluding scheduled breaks of five or more consecutive days and all days between modules), the student is not considered to have withdrawn.
 2. If a student successfully completes a combination of modules that, when combined, contain 49% or more of the number of days in the payment period (excluding scheduled breaks of five or more consecutive days and all days between modules), the student is not considered to have withdrawn.
 3. If a student successfully completes coursework equal to or greater than the coursework required for the institution's definition of a half-time student, the student is not considered to have withdrawn.

The withdrawal exemptions apply to both undergraduate and graduate students as long as the student and program meet the underlying exemption criteria. A student only needs to meet one of the withdrawal exemptions to be exempt from (R2T4).

Financial Aid

Student financial assistance at Southeastern University is provided to eligible students in the form of grants, scholarships, loans and student employment. To apply for financial aid, students must submit an application for admission to Southeastern University and complete the Free Application for Federal Student Aid (FAFSA) at fafsa.ed.gov. Detailed procedures are available online at seu.ed/financial or can be obtained by contacting the University's Student Financial Services Office.

The location of the university in central Florida provides students with many opportunities for part-time employment. The returns from such work, together with savings from summer employment and financial aid, enable many Southeastern students to work their way through college.

Southeastern University recommends that a prospective student contact his/her high school guidance counselor for information about ways to finance an education. Information regarding scholarships for Florida residents may be found at: www.FloridaStudentFinancialAid.org.

Statement of Educational Purpose/Certification Statement of Refunds and Default

Students may not owe a refund on any federal grant or federal loan, nor be in default on any loan or have made satisfactory arrangements to repay any defaulted loan. Students must not have borrowed in excess of the Title IV loan limits at any institution. Students agree that they will use any money they receive under a Title IV loan, grant, or work-study program only for expenses related to their study at Southeastern University. Students are responsible for repaying any funds they receive which cannot reasonably be attributed to meeting education expenses related to Southeastern University. Students must understand that the amount of any repayment is based on regulations published by the U.S. Department of Education.

Federal Financial Aid Programs

Federal Pell Grant

Federal Pell Grants usually are awarded only to undergraduate students enrolled in a degree-seeking program who display exceptional financial need (as determined by the FAFSA) and have not earned a bachelor's, graduate, or professional degree. (In some cases, however, a student enrolled in a post baccalaureate teacher certification program might receive a Federal Pell Grant.) A Federal Pell Grant, unlike a loan, does not have to be repaid, except under certain circumstances.

All students applying for a Federal Pell Grant (and all other federal financial aid) must complete the Free Application for Federal Student Aid (FAFSA). Students may apply for FAFSA on the Web (StudentAid.gov). Students will receive a FAFSA Submission Summary (FSS) in the mail about two weeks after submitting the online FAFSA (students providing an email address will receive an email with a link to their FAFSA Submission Summary (FSS) - in no more than five days.)

Based on the information in the FSS and a complete financial aid file, the Office of Student Financial Services will determine the amount of Pell Grant (and other financial aid) to be awarded to the student. This information is communicated by Student Financial Services to the student via the emailed Aid Offer.

Federal Supplemental Educational Opportunity Grant

A Federal Supplemental Educational Opportunity Grant (FSEOG) is a federally funded grant provided to undergraduate students with exceptional financial need. Priority is given to Federal Pell Grant recipients and allocated to the lowest SAI students first. The amount of the grant depends on the amount of verified need (as determined by the FAFSA) and on the availability of federal funds provided to the institution annually.

Federal Work-Study Program

Federal Work-Study (FWS) is need-based financial aid that allows students to work on campus or with an approved off-campus employer and earn money to help to pay for educational expenses while they are enrolled. Compensation is minimum wage or higher, and the amount of FWS a student can earn depends on financial need (as determined by the FAFSA), on the amount of other aid received, and on the availability of federal funds provided to the University. Some examples of FWS jobs at Southeastern University included: library assistant, game operations, teacher's assistant, academic tutor, and customer service representative.

FWS is not a grant, because a student must work to earn it, and it is not a loan because it does not require repayment.

Federal Direct Student Loans

Federal Direct Subsidized and Unsubsidized Loans

- Criteria: Must file FAFSA and complete additional loan requirements. (entrance counseling and Master Promissory Note)
- Repayment: Loan repayment can be deferred until six months after student graduates or drops below half-time enrollment.
- Origination fees are deducted by the loan servicer from each loan prior to disbursement.

Federal Direct SUBSIDIZED Loans – For undergraduate students with financial need. The U.S. Department of Education generally pays the interest while a student is in school at least half time and during certain other periods.

Interest rate varies from year to year but is fixed for the life of the loan. Interest does not begin accruing until a student graduates or drops below half-time attendance.

Federal Direct UNSUBSIDIZED Loans – For undergraduate and graduate or professional students; non-need based. Interest begins accruing as soon as the loan is disbursed, and the borrower is responsible for all interest. Interest rate varies from year to year but is fixed for the life of the loan.

Maximum Total Award Amounts per Year (Based on Eligibility)

Annual Limits for Undergraduate, Dependent Students:

- Freshman (1-29 credit hours): up to \$5,500 (maximum \$3,500 in subsidized loans)
- Sophomore (30-59 credit hours): up to \$6,500 (maximum \$4,500 in subsidized loans)
- Junior/Senior (60+ credit hours): up to \$7,500 (maximum \$5,500 in subsidized loans)

Annual Limits for Undergraduate, Independent Students:

- Freshmen (1-29 credit hours): up to \$9,500 (maximum \$3,500 in subsidized loans)
- Sophomore (30-59 credit hours): up to \$10,500 (maximum \$4,500 in subsidized loans)
- Junior/Senior (60+ credit hours): up to \$12,500 (maximum \$5,500 in subsidized loans)

Annual Limit for Graduate/Professional Students: \$20,500 (unsubsidized only)

Subsidized and Unsubsidized Aggregate (lifetime) Loan Limits

- Undergraduate, Dependent Students: \$31,000 (maximum \$23,000 may be in subsidized loans)
- Undergraduate, Independent Students: \$57,500 (maximum \$23,000 may be in subsidized loans)
- Graduate/Professional Students: \$138,500 (maximum \$65,500 may be in subsidized loans). The graduate/professional aggregate limit includes all federal loans received for undergraduate study.

Federal Direct Parent Loan for Undergraduate Student (PLUS)

Federal PLUS loans are for parents who want to borrow to help pay for their dependent student's educational expenses. These loans enable parents with good credit histories to borrow for each dependent child who is enrolled at least half-time. An origination fee is deducted by the lender from each loan prior to disbursement.

Interest rates are fixed for the life of the loan and are determined annually for new loans. Repayment begins immediately after disbursement of funds but can be deferred while the student is enrolled at least half-time. Parents have 10-25 years to repay depending on the repayment plan chosen.

Students must complete a FAFSA in order to determine the amount of the parent's eligibility for a Federal PLUS loan. The FAFSA can be completed at <https://studentaid.gov/>. To apply for a Parent PLUS loan, parents should visit <https://studentaid.gov/plus-app/>.

Financial Aid Programs for Florida Residents

Florida Bright Futures Scholarship Program

Florida Bright Futures Scholarship Program provides scholarship awards to high-achieving students. Each recipient must be a Florida resident, enrolled for at least six (6) hours in an eligible Florida public or independent postsecondary educational institution, and meet all requirements of the scholarship program. Initial eligibility is determined by the Florida Office of Student Financial Assistance. Visit <http://www.floridastudentfinancialaid.org/> for additional information.

Florida Student Assistance Grant

The Florida Student Assistance Grant (FSAG) provides aid to students who demonstrate financial need as evidenced by the federal system of needs analysis. In addition to demonstrating need, a student must be a U.S. citizen or permanent resident; a Florida resident for reasons other than education for no less than one year preceding the beginning of the academic year for which application is made; and, enrolled or accepted for enrollment, as a full-time undergraduate student. A FAFSA must be processed by the U.S. Department of Education by April 15th of the current award year.

Contact the Office of Student Financial Services or a high school guidance counselor for information.

Florida Effective Access to Student Education (EASE) Grant

The Florida Effective Access to Student Education Grant (EASE) provides tuition assistance at eligible independent non-profit Florida colleges and universities for Florida residents. The maximum award amount is specified in the General Appropriations Act. Actual award amounts depend on the level of funding and number of eligible students. Applicants must be Florida residents, enrolled full-time in a first bachelor's degree program and meeting state requirements in order to receive EASE. For information or application, contact the Office of Student Financial Services.

Southeastern Academic Scholarship Programs

Institutional scholarships, such as academic or departmental scholarships, are awarded to full time, traditional, undergraduate, main campus students. Please contact the Admission Office for information regarding Academic Scholarships offered annually. Academic scholarships are awarded based on the GPA and/or test scores upon admission to the university and are renewable up to 8 consecutive, full time semesters with an overall GPA of a 2.0. For more information, visit the <https://seu.edu/admission/financial/scholarships/> website.

Other Resources

National Assemblies of God Scholarships

These scholarships are awarded by the General Council of the Assemblies of God.

Third-Party Scholarships

Some third-party scholarship information is available on the Student Financial Services webpage (<https://seu.edu/admission/financial/scholarships/>). Students are encouraged to seek out additional outside scholarship options on their own.

Alternative Loan Options

Southeastern has partnered with FastChoice to provide a comprehensive listing of reputable Private Loan Lending companies. FastChoice makes it easy by providing students with information about private loans in an easy-to-understand format, to help a student determine which private student loan best meets their needs. We encourage all student to consider federal student loan options before making a decision. More information on third-party loan options can be found on the Student Financial Services webpage.

Veterans Education Benefits

Southeastern University is approved by the State Approving Agency of the State of Florida for the education and training of veterans and eligible dependents under public laws in effect. Students who are eligible for educational benefits under any Veterans Administration program should first apply for a Certificate of Eligibility on evabenefits.va.gov and provide a copy of the form to the Student Financial Services Office.

All information, instructions, and procedures are provided on the website: <https://seu.edu/admission/financial/veterans/>

Students using tuition assistance should first check with their Education Service Officer (ESO) within their military unit for approval.

Students must complete a VA Request for Certification form each year for Southeastern University to provide enrollment certification to the Veterans Administration. Educational Benefits are paid based on the enrollment dates of each session or semester. For example: Eight Week courses are paid at the start of each term. These semester hours do vary and differ for our non-traditional student population. A student cannot receive educational benefits for audit courses. VA regulations require that students take courses that are applicable to their degree program, make satisfactory progress toward their degree, and maintain satisfactory attendance for the degree program as stated in the Standard of Progress. Students using VA educational benefits are required to submit all transcripts from prior higher ed institutions for evaluation of course credit.

Veterans' benefits will be terminated for students who fail to make satisfactory progress, or who receive dismissal for academic or disciplinary reasons.

Enrollment certification is completed after the drop/add period of each term or semester, whichever is applicable to a student's delivery. The student is responsible for notifying the certifying official at Southeastern University of any enrollment changes such as withdrawal and/or dropped courses or termination of enrollment. The VA student is responsible for any overpayment of benefits resulting from a change in enrollment. The VA toll-free number is 1-888-GIBILL1 (888-442-4551).

Southeastern University is a participant in the Yellow Ribbon Program and will match the charges covered through Yellow Ribbon up to \$1200.

How does a student's financial aid interact with the Post 9/11 GI Bill®?

In general, only Title IV Federal Aid (Pell, SEOG, Direct loans, and PLUS loans) will not be affected by VA benefits in any way. In most cases, the student will be refunded Pell grant and/or student loans, or they will be applied toward other expenses like room and board, if applicable.

Other financial aid designated will be applied to a student's total cost of attendance. The student should not expect any refund of SEU scholarships/grants or any other financial aid source, with the exception of Title IV Federal Aid.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at <http://www.benefits.va.gov/gibill>.

Southeastern University VA Representative(s):

- Natalie Wolfe, VA Certifying Official/Associate Director of SFS (nlwolfe@seu.edu)
- Joshua Breed, VA Certifying Official/Associate Director of SFS (jabreed@seu.edu)

Satisfactory Academic Progress (SAP) Policy

Requirements & Eligibility for Financial Aid (Undergraduate)

Students receiving federal financial aid (including Direct Student Loans, Parent PLUS loans, and Federal Work-Study) must maintain good academic standing with the University in order to continue eligibility for financial aid awards. To be eligible for financial aid, students must meet certain academic progress requirements as evaluated at the end of each academic year (ending the spring semester). Those requirements include: (1) credit completion ratio, (2) grade point average, and (3) maximum time frame. This policy applies to all undergraduate students enrolled in all programs. The periods included in the review include all terms in which the student was/is enrolled, even those during which the student did not receive federal student aid.

1. Credit completion

Students must successfully complete (earn) at least 67 percent (67%) of the credits they attempt in order to maintain satisfactory academic progress. (Regular rounding rules apply. For example, 66.5% completion calculation would round to 67%).

At the end of the academic year, academic progress will be determined by comparing the number of credits attempted (including any course in which a student was enrolled past the drop/add period) to those actually earned. Note: Transfer credits accepted from another institution are included in both attempted and earned credits.

2. Grade point average (GPA)

Undergraduate students must maintain a minimum overall cumulative 2.0 grade point average (GPA). Your cumulative grade point average (GPA) will be reviewed by the Student Financial Services office at the end of the academic year (the end of the spring semester).

Treatment of Grades:

Grade	Quantitative (completion) Treatment	Qualitative (GPA) Treatment
A, B, C, D	Attempted & earned	Calculated
F	Attempted & unearned	Calculated
*I (Incomplete)	Attempted & unearned	Not calculated
W, WF, WD	Attempted & unearned	Not calculated
Repeat coursework – A, B, C, D	Attempted & earned	Highest grade calculated

Repeat coursework – F	Attempted & unearned	Calculated
CR, P	Attempted and earned	Not calculated
NC, IP, S	Not attempted or earned	Not calculated
Pass/Fail	Pass – Attempted and earned	Not calculated
	Fail – Attempted and unearned	

Grades included in grade forgiveness are not excluded from the Satisfactory Academic Progress calculations.

*Incomplete (I) grades will be considered in the qualitative (GPA) analysis when completed according to the provisions in the University catalog. When an incomplete grade changes to another grade notation, that change will be picked up in the next SAP review.

3. Maximum timeframe

Students are eligible to receive federal financial aid for a maximum of 150 percent (150%) of the published degree credits required to complete their program. For example, if an undergraduate degree program requires 120 degree credits, a student is eligible for aid up to 180 attempted credits. Students will not be eligible to receive federal student aid once they have exceeded the maximum timeframe (total attempted credits) of 150 percent of the published degree credits required to complete their program.

Loss of Financial Aid Eligibility

A student will lose financial aid eligibility if he or she does not attain any one or more of the required components at the time of review at the end of the spring semester (annually):

- Minimum 2.0 cumulative grade point average (GPA)
- Minimum 67% overall credit completion ratio
- Maximum timeframe of 150% or less of the published degree credits required to complete your program.

Financial aid includes all Federal and State scholarships and grants, VA Benefits, Federal Work Study, and Federal Student loans, including Graduate PLUS or Parent PLUS loans. Failure to meet any/all SAP requirements will deem the student ineligible for these programs.

Private loan programs and outside financial assistance that do not require a stipulation of meeting satisfactory academic progress are exceptions, and students may maintain eligibility for these types of programs dependent upon the lender's criteria.

A student may attend the university, at his or her own expense, until the student is meeting all of the required components of satisfactory academic progress and again regains federal student aid eligibility.

Regaining Financial Aid Eligibility

To regain financial aid eligibility the student's transcript/record must reflect satisfactory academic progress requirements have been met. A student may regain eligibility in one of the following ways:

- Meet satisfactory academic progress requirements: Attend the university or transfer in credits from another institution at his/her own expense until the student is meeting all of the required components of this policy.
- Approved appeal: If a student failed to meet these standards due to unusual circumstances, he/she may submit an appeal by contacting the Office of Student Financial Services as outlined in the e-mail notification the

student will receive providing an alert to the loss of eligibility due to not meeting satisfactory academic progress requirements. See section titled "Right to Financial Aid Appeal."

- Grade change appeal: SAP is reviewed annually at the end of the spring semester. The SAP determination is based on the final grades provided at that time. If there is a grade change that occurs after that review date, an appeal must be submitted in order for the SAP review to be recalculated. Upon recalculation, if the student is then found to be in good standing as a result of that grade change/update, the student will be eligible for aid to be reinstated so long as it is done prior to the appeal deadline outlined in their notification from SFS.

Notification of Satisfactory Academic Progress Deficiency

Undergraduate students who are not meeting quantitative (completion ratio) OR qualitative (GPA) satisfactory academic progress are notified by Student Financial Services via email to their assigned SEU student email at the end of the spring semester. Loss of financial aid eligibility is effective immediately.

When a student receives notification of loss of financial aid eligibility at the end of the spring semester and is enrolled in a summer term, he or she will lose financial aid eligibility for summer term courses unless a financial aid appeal has been submitted and approved.

Right to Financial Aid Appeal

A student who has not met SAP (satisfactory academic progress) requirements may appeal the loss of financial aid eligibility if the student has suffered undue hardship such as:

- Severe illness, medical condition or injury
- Death of a family member
- Traumatic life-altering event such as fire, hurricane, etc.
- Other circumstances deemed acceptable by Southeastern University

A student who wishes to appeal satisfactory academic progress status due to extenuating circumstances must submit their request to the Student Financial Services office for review. All appeals must have supporting documentation attached at the time they are submitted. Acceptable documentation is outlined on the Satisfactory Academic Progress Appeal for Continued Aid form. To submit an appeal, students must:

- Complete and submit a signed electronic Satisfactory Academic Progress Appeal for Continued Aid form, including supporting documentation (including dates) as outlined on the form. The form is designed to address the following:
 1. what the problem was;
 2. when the problem occurred;
 3. how long the problem lasted;
 4. how this affected ability to complete coursework, and
 5. what the student is doing to prevent this from happening again.

Appeals and all documentation must be received by the end of the add/drop period in which the student is appealing for aid eligibility. It is to the student's benefit to submit the appeal immediately upon receiving notification of ineligibility.

Appeals are subject to committee review and are not automatically approved.

Approved Appeals

When an appeal request is approved, the student will be placed on financial aid probation and may receive financial aid on a probationary status for one semester as described in the Satisfactory Academic Progress agreement provided with the appeal response. Any appeal conditions will be outlined in the academic progress agreement and may include an ongoing academic plan and timeframe for which a student must meet certain requirements in order to continue to receive financial aid. If a student fails to meet the terms of the agreement or maintain satisfactory academic progress during the period of financial aid probation as assigned, the student will be notified by Student Financial Services of his or her loss of financial aid eligibility, and the loss cannot be appealed again without there being new and extenuating circumstances for consideration.

Annual limits and requirements for awards still impact a student's ability to receive funding and an approved appeal does not automatically enable a student to receive aid in a probationary semester if all funding has already been exhausted for that academic year.

A student is limited to two (2) appeals for his/her degree program. For example, if a student exhausts his/her two appeals as an undergraduate student, he/she still has two appeals as a graduate student.

Denied Appeals

If the appeal is denied, any already offered federal student aid funds for any upcoming or current semesters or terms will be removed making the student financially responsible and liable for tuition and fees for the term if enrolled. Due to the timing of summer courses and the completion of the SAP review there may be instances where aid was awarded and disbursed for summer prior to being aware of the failure to meet SAP requirements. If this occurs, funding will need to be returned without an approved appeal and the student will be liable for all fees.

(NOTE: State programs have separate Academic Progress Requirements.)

Complaint & Appeal Policies

Southeastern University has instituted the following procedures for student complaints and adheres to these procedures. All students are free to submit written complaints and appeals. Appeals and complaints are dealt with fairly and judiciously on a case-by-case basis. Students have the right of complaint and appeal in the following instances:

ADA Appeals

Office of Academic & Auxiliary Services

Appeal Procedure

The Office of Academic and Auxiliary Services has adopted the following appeal and grievance procedures for prompt and equitable resolution of disputes relating to disability accommodations or the accessibility of academic programs.

Student Appeals of Accommodation Decisions

If a student disagrees with the decision of the Office of Academic & Auxiliary Services regarding a request for an accommodation, the student may submit a request for reconsideration within thirty (30) days of the decision. A request for reconsideration must be directed in writing to the Director of the Office of Academic & Auxiliary Services. Requests for reconsideration should identify the specific accommodation requested and denied, a statement regarding why the accommodation is reasonable and necessary, relevant supporting documentation from a licensed medical or mental health professional, or a 504 Plan or IEP from High School dated within 10 years.

Upon receipt of the request for reconsideration, the Director of the Office of Academic & Auxiliary Services will undertake a thorough review of the student's documentation and request for accommodations. A follow-up meeting may be scheduled with the student to discuss the request in more detail. The Director of the Office of Academic & Auxiliary Services may consult with other university officials as a part of the decision-making process and may share information about the student's disability with these officials or committees on a limited, need-to-know basis. The Director of the Office of Academic & Auxiliary Services will notify the student in writing of the decision within five (5) working days of receipt of the request for reconsideration.

If a student is dissatisfied with the outcome of the request for reconsideration, the student may submit a formal appeal to the Associate Provost, Anthony Roberts, at aroberts@seu.edu. Appeals must be submitted within seven (7) working days of the reconsideration decision by the Director of the Office of Academic & Auxiliary Services. The Associate Provost may request a follow-up meeting with the student as a part of the decision-making process. The Associate Provost may consult with other university officials or committees as a part of the decision-making process and may share information about the student's disability with these officials or committees only on a limited, need-to-know basis. The Associate Provost will issue a written decision on the appeal within ten (10) working days.

If a student is dissatisfied with the outcome of the appeal to the Associate Provost, the student may submit a formal second-level appeal to the Provost. Appeals to the Provost must be submitted by email to Dr. Meghan Griffin at mlgriffin@seu.edu within seven (7) business days of receiving the decision from the Associate Provost. The Provost or the Provost's designee may request a follow-up meeting with the student as a part of the decision-making process. The Provost or the Provost's designee may consult with other university officials or committees as a part of the decision-making process and may share information about the student's disability with these officials or committees only on a limited, need-to-know basis. The Provost or the Provost's designee will issue a written decision on the appeal within ten (10) working days.

These appeal procedures do not prohibit students from requesting new or modified accommodations based on a change in circumstances, such as new courses or activities, new medical conditions or

disabilities, or changes to existing medical conditions or disabilities. Requests for new or modified accommodations should be submitted to the Office of Academic & Auxiliary services at adaservices@seu.edu.

Grievance Procedure

Students with questions, concerns, or grievances relating to the implementation of an accommodation or the accessibility of academic programs should contact the Office of Academic & Auxiliary Services at adaservices@seu.edu. A staff member in the Office of Academic & Auxiliary Services will promptly contact the student to discuss the concern. The Office of Academic & Auxiliary Services will work collaboratively with the student and the academic program to informally resolve the concern.

If a student is still dissatisfied with the outcome of the informal resolution, the student may submit a formal grievance to the Associate Provost, Anthony Roberts, at arroberts@seu.edu. The Associate Provost will also coordinate with the appropriate Department Head and/or Dean's Office to review the grievance. The Associate Provost will issue a written decision on the grievance within ten (10) working days.

If a student is dissatisfied with the outcome of the grievance resolution by the Associate Provost, the student may submit a formal second-level grievance to the Provost. Grievances to the Provost must be submitted by email to Dr. Meghan Griffin at mlgriffin@seu.edu. The Provost or the Provost's designee may request a follow-up meeting with the student as a part of the decision-making process. The Provost or the Provost's designee may consult with other university officials or committees as a part of the decision-making process and may share information about the student's disability with these officials or committees only on a limited, need-to-know basis. The Provost or the Provost's designee will issue a written decision on the grievance within ten (10) working days.

Adapted from Carnegie Mellon University Policy – lcb June/October 2021

Transfer Credit Appeals

Transfer students have the right to appeal transfer credit decisions made by the Office of the Registrar. The student must write a letter of appeal accompanied by any additional documentation requested by the Office of the Registrar. The appeal will be reviewed by the appropriate academic department chair/college dean with additional documentation and the student will be notified of the decision rendered.

Course Appeals

A student who has an unresolved issue in a course after communicating with the instructor is encouraged to appeal to the Chair or Dean of the discipline of the course. If the student is unable to meet with the Chair or Dean, he/she may meet with the Registrar to receive assistance in bringing a resolution.

Advising/Registration/Degree Completion Appeals

A student who has an unresolved issue and has not received satisfactory answers from their assigned Faculty Academic Advisor and/or the Dean of their college related to degree completion, transfer of credit, advising questions, or non-response, may appeal to the Director of Academic Advising. A meeting appointment or email response will follow to consider the student's unresolved issues, with the goal of successful degree completion. If the issue is still unresolved following the meeting with the Director of Academic Advising, the student may appeal to the Provost for a resolution.

Academic Suspension Appeals

A student may appeal an academic suspension if there are valid extenuating circumstances that contributed to poor academic performance. The student must submit a complete academic suspension appeal with supporting documentation addressed to the Academic Condition Committee by the deadline provided in the notice of suspension. If the appeal is granted, the student will be permitted to continue enrollment without a period of suspension, thereby continuing enrollment on academic probation. The student must agree to a set of conditions that must be met until the student has successfully raised the cumulative G.P.A. to the minimum of 2.0. If the student fails to meet one or more of the conditions, an academic suspension dismissal notice will be issued.

Course Registration Appeals

Course drops after a semester drop/add deadline are not permitted without a written appeal from the student to the Office of the Registrar. The appeal must contain reasons that justify such an exception to the deadline. Students may submit a course drop appeal in JICS. The outcome of a student appeal request will be based on the student's financial aid awarded, the point in time during the semester, and other contributing factors. A class that has been attempted cannot be dropped without an approved written appeal after the add/drop deadline.

Late Registration Appeals

Late registration after the add/drop deadline is permitted only by the permission of the Registrar and requires a written appeal. Students may submit a late registration appeal in JICS.

Grades and Quality Point Appeals

Students who wish to appeal a grade must do so within the immediate succeeding semester. Otherwise, the recorded grade is permanent. Appeals begin with the instructor, then the Department Chair over the course, then the Dean over the course, if necessary.

Financial Complaints & Appeals

Financial problems, questions and issues regarding student accounts should be addressed to the Office of Student Financial Services. Student complaints and appeals will be addressed promptly. Requests for problem resolution must be submitted in writing.

Non-Academic Student Complaint/Appeal Process

Students with a complaint or problem concerning student life that is non-academic in nature should go to the Community Coordinator, Campus Life or the Office of Student Development. Financial problems, questions and issues regarding student accounts should be addressed in Student Financial Services. Residential concerns should be directed to Campus Life. Student complaints and appeals will be addressed promptly. Requests for problem resolution may be submitted in writing. Students are welcome to visit the Retention Coordinator to get help with solving issues, including financial, residential, or academic when the student is unsure of where to go for a resolution.

Southeastern has a responsibility to respond quickly, equitably, and effectively when the university becomes aware of sexual misconduct and any other conduct that is motivated by sex, gender, or gender-expression that creates a hostile educational environment for Southeastern students. Southeastern is committed to prevention of all forms of sexual misconduct as well as the protection and rehabilitation of victims of such acts. Investigations of reported conduct must be impartial and reliable. Responses to reported conduct must adequately stop the behavior, prevent its recurrence, and address its effects. Southeastern University is committed to upholding Title IX of the Education Amendments of 1972 (20 U.S.C. § 1681). The Statute is an all-encompassing federal law that prohibits discrimination on the basis of sex of students and employees of educational institutions that receive federal financial assistance.

Title IX reads:

"No person in the United States, shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance..." Title IX of the Education Amendments of 1972, and its implementing regulation at 34 C.F.R. Part 106 (Title IX).

For Southeastern's full Sexual Misconduct Policy, please see www.seu.edu/titleix

Bias Incident Reporting

Southeastern has a responsibility to respond quickly, equitably, and effectively when the university becomes aware of a bias incident and/or other conduct that creates a hostile educational environment for Southeastern students. Southeastern is committed to the prevention of all forms of misconduct as well as the protection and rehabilitation of victims of such acts. Investigations of reported conduct must be impartial and reliable. Responses to reported conduct must adequately stop the behavior, prevent its recurrence, and address its effects. The Bias Incident Response Team provides oversight of any Bias Incident policy and procedures.

The Bias Incident Response Team's purpose is to help assess whether a behavior, event or action may be bias-related, to assist in ensuring that appropriate policies, procedures and protocols are applied, to help the University take a timely and comprehensive approach to addressing incidents, and to aid in communication with the University community about incident-related concerns.

This team consist of the following individuals as needed:

- Chief Diversity Officer
- Title IX Director
- Director of Community & Student Responsibility
- Vice President of Student Development

These procedures are for non-emergency incidents only.

For emergencies, including safety concerns for members of our community:

- Dial 911, then contact the Department of Campus Safety at (863-667-5190) or security@seu.edu, or call local police.

For health concerns:

- Contact the Student Health Center at (863.667.5180).

For gender discrimination, sexual harassment, or sexual assault:

- Contact the Title IX office at (863.667.5236) or smpowell@seu.edu.

Student Disciplinary Appeal Process

Students have a right to appeal their disciplinary decisions:

The terms under which a student can appeal a student conduct decision is under the following circumstances:

1. New information forthcoming, that could alter the decision that was made.
2. Gross violation of the Student Conduct Process
3. Punishment is inconsistent with the university policy.

A sanction decision that is made by their respective Resident Director will be reviewed by the Director of Student Conduct in conjunction with the Director of Residence Life.

Any sanction decision(s) that are made by the Community & Student Responsibility Office will be reviewed by the Executive Director for Student Development.

The student must fill out an online form found on MySeu in order for their appeal to be processed correctly. This form must be submitted within (24) twenty-four hours of receiving notification of the final decision letter. After the twenty-four hour window has passed, the decision will become final and is not subject to further review within the institution.

General Complaint Policy for Extension Site and Out of State Students

Any general complaints and appeals, not outlined explicitly in the University's Complaint & Appeal Policy should be directed to the Dean of Academic & Extension Operations, including concerns related to academic coursework and faculty, technology, and other aspects of the student experience. Please direct all such concerns to SiteSupport@seu.edu.

Out-of-state (i.e., non-Florida) distance education students who are not satisfied with the institution's response should follow the steps outlined in the State-Specific Complaint Policies. Students enrolled in face-to-face courses at locations other than the main campus should refer to the state-specific complaint policies below. Out-of-state (i.e., non-Florida) distance education students must first follow the institution's complaint procedure as outlined above. If the student is not satisfied with the response, the student may file a complaint with the Office of Articulation within the Florida Department of Education at 325 West Gaines Street, Room 701, Tallahassee, Florida 32399-0400, Phone: 850-245-0427, Fax: 850-245-9010. The complaint should include the following:

1. Name of Student (or Complainant)
2. Complainant Address
3. Phone Number
4. Name of Institution

5. Location of the Institution (City)
6. Dates of Attendance
7. A full description of the problem and any other documentation that will support your claim such as enrollment agreements, correspondence, etc.

Students who have completed the internal institutional grievance process and the applicable state grievance process may appeal non-instructional complaints to the FL-SARA PRDEC Council. For additional information on the complaint process, please visit the <https://www.fldoe.org/sara/student-concerns.shtml> page.

State-Specific Complaint Policies

Listed below are additional complaint policies for the SEU Network programs categorized by states.

Arizona

In accordance with state law, the Arizona State Board for Private Postsecondary Education is responsible for investigating student complaints against Educational institutions licensed by this Board. Pursuant to Arizona Administrative Code Rule R4-39-403, the complaint procedure is stated as follows: If the student complaint cannot be resolved after exhausting the Institution's grievance procedure, the student may file a complaint with the Arizona State Board for Private Post-Secondary Education. The student must contact the State Board for further details. The State Board address is: 1740 West Adams, Suite 3008, Phoenix, AZ 85007. Phone: 602/542-5709. Website: ppse.az.gov/complaint

California

A student or any member of the public may file a complaint about this institution at any time with the Bureau for Private Postsecondary Education by calling 1 (888) 370-7589 or by completing a complaint form, which can be obtained on the bureau's internet Web site, www.bppe.ca.gov. For more information go to the Bureau website.

Hawaii

Students can file complaints with the Hawaii Post-secondary Education Authorization Program, after all other resources have been exhausted. For more information on how to file a complaint go to the state website.

Illinois

Students who wish to file a complaint with the Illinois Board of Higher Education may go to the state website or Institutional Complaint Hotline: (217) 557-7359

Illinois Board of Higher Education
1 N. Old State Capitol Plaza, Suite 333
Springfield, Illinois 62701-1377
Phone: (217) 782-2551
Fax: (217) 782-8548
TTY: (888) 261-2881

Louisiana

The Louisiana Board of Regents will refer student complaints to the appropriate entity. Louisiana Board of Regents telephone (225) 342-4253. If the complaint pertains to potential violations of consumer protection, Board of Regents

staff will direct the complainant to: Consumer Protection Division, (800) 351-4889. If the complaint discerns discrimination, the Board of Regents will refer the complainant to: Office for Civil Rights, Dallas office, U.S. DOE, (214)661-9600 or **via email to:** OCR.Dallas@ed.gov

Maryland

Students who wish to file a complaint with the Maryland Higher Education Commission may go to the state website.

Minnesota

Students should first file their complaints at the institution where they are enrolled. If after following proper policy and procedures for appeals, the complaint has not been resolved, then contact the Minnesota Office of Higher Education, 1450 Energy Park Drive, Suite 350, St. Paul, MN 55108, telephone: 651-259-3975 or 1-800-657-3866 or secure fax 651-797-1664, email: betsy.talbot@state.mn.us. Website: <https://www.ohe.state.mn.us>

Mississippi

For more information on how to file complaints with the Mississippi Institutions of Higher Learning go to the state website.

Nevada

More information, including complaint forms, is available at the state website. Or contact: Commission on Postsecondary Education, 2800 E. St. Louis Avenue, Las Vegas, NV 89104, (PH) 702-486-7330.

North Carolina

If students are unable to resolve a complaint through the institution's grievance procedures, they can review the Student Complaint Policy (PDF) and submit their complaint using the online complaint form at <https://studentcomplaints.northcarolina.edu/form> or to the following mailing address:

North Carolina Post-Secondary Education Complaints
223 S. West Street, Suite 1800
Raleigh, NC 27603
(919) 962-4550

If you have questions about this process, you may email Studentcomplaints.northcarolina.edu.

To file a complaint with the Consumer Protection Division of the North Carolina Department of Justice, please visit the State Attorney General's web page. North Carolina residents may call (877) 566-7226. If you live outside of North Carolina, please call (919) 716-6000.

If you choose to mail a complaint, please use the following address:

Consumer Protection
Attorney General's Office
Mail Service Center 9001
Raleigh, NC 27699-9001

Oklahoma

For information on how to file a complaint with the Oklahoma State Regents for Higher Education, go to the state website.

South Carolina

If a student is currently living in South Carolina and is enrolled in the online learning program, please be informed of the following complaint policies in addition to the Extension Site Complaint Policy: The South Carolina Commission on Higher Education responds to formal complaints against public, independent non-profit and proprietary institutions of higher education in South Carolina. The Commission cannot review complaints related to course grades, academic sanctions, or discipline/conduct mats unless the student can prove that the institution did not comply with its policies and procedures for appeal. For further information on how to submit a complaint to the Commission go to the state website.

Mail form to:

Student Complaint, Academic Affairs
SC Commission on Higher Education
1122 Lady Street, Suite 400
Columbia, SC 29201

or email to: submitcomplaint@che.sc.gov.

Tennessee

Students should first file their complaints at the institution where they are enrolled. If the complaint has not been resolved by the institution, any person claiming damage or loss as a result of any act or practice by this institution that may be a violation of the Title 49, Chapter 7, Part 20 or Rule Chapter 1520-01-02 may file a complaint with the Tennessee Higher Education Commission (THEC), Division of Postsecondary State Authorization (DPSA). 312 Rosa L. Parks Ave., 9th Floor, Nashville, TN 37234-1102; telephone: 615-253-8857 or email: Julie.Woodruff@tn.gov

Texas

To file a complaint, follow the complaint procedures in the school's catalog. If the issue is not resolved, contact either the Texas Workforce Commission's Career School or the school's accrediting agency. Unresolved grievances can be directed to Texas Workforce Commission Career Schools and Colleges, Room 226T, 101 East 15th Street, Austin, TX 78778, (512) 936-3100, <http://www.twc.state.tx.us/partners/career-schools-colleges-resources>. If the school is not accredited by a recognized accreditor but has degree-granting authority, send a written complaint to the Coordinating Board at Texas Higher Education Coordinating Board, Academic Affairs and Research, P.O. Box 12788, Austin, TX 78711. For more information go to the state website.

Virginia

If a student is currently living in Virginia and is enrolled in the extension site program, please be informed of the following complaint policies in addition to the Extension Site Complaint Policy: As a last resort, students may submit their complaint to the State Council of Higher Education for Virginia. Students will not be subject to unfair action or treatment by any school official as a result of filing a complaint. Please contact SCHEV at (804) 371-2285 if you have any questions about the student complaint procedure.

Washington

The Washington Student Achievement Council (WSAC) has the authority to investigate student complaints against specific schools. WSAC may not be able to investigate every student complaint.

Visit <https://www.wsac.wa.gov/student-complaints> for information regarding the WSAC complaint process.

Academic Advising

Academic Advising assists students in their personal and academic development as they prepare professionally to creatively serve their world. Academic Advisors meet students where they are and support them in their collegiate journey through advising, mentoring, and modeling the integration of faith and learning. The staff recognizes that there is a critical relationship existing between academic advising and retention and is committed to placing an emphasis on promoting academic engagement, degree program completion, community involvement, leadership and success through effective student learning outcomes. This comprehensive plan focuses on the development, support, retention and graduation of students while assisting them towards the achievement of spiritual, life, academic, professional/vocational or ministry-oriented goals. The Office of Academic Advising provides various levels of support services to all degree-seeking extension site, main campus, regional campus, and online students.

Academic Center for Enrichment (ACE)

The Academic Center for Enrichment (ACE) is a staff-directed learning center that serves administrators, faculty, staff, and students of Southeastern University (i.e. traditional, extension site, evening/weekend, online, and graduate). ACE offers peer-facilitators who tutor students in subject areas across the curriculum. In addition, for students that are not local to the Lakeland campus, ACE offers online tutoring, multiple forms of distance support (e.g. email, phone, screen sharing, and etc.), and posts center resources online. Students that are local to the Lakeland campus may also use the center's facilities which offers printing, a computer lab, study space, and additional tutoring services. The goal of the Academic Center for Enrichment is to provide an encouraging environment and services that are conducive to student learning. This goal includes establishing relationships with faculty to share best practices for encouraging student

learning; creating opportunities to provide learning enriched experiences for students through individual and collaborative sessions; training facilitators to meet the various learning needs of our students; and providing continuing education as well as monitoring and maintaining CRLA certification for facilitators to meet university needs and demands.

Office of Academic and Auxiliary Services and the Center for Testing and Proctoring

Southeastern University is committed to ensuring equal access for people with disabilities as defined in Section 504 of the Rehabilitation Act of 1973 and with the Americans with Disabilities Act (ADA) of 1990. Equal access is provided in the most integrated setting appropriate to the needs of the individual and to the maximum extent feasible. Southeastern University prohibits disability discrimination and ensures equal access to all educational activities, academic programs, services, and facilities.

The Office of Academic and Auxiliary Services coordinates accommodations for students with documented physical, learning, and/or psychological disabilities. For detailed information about services provided for students with disabilities at Southeastern University click [here](#). To begin the process to request accommodations, please call 863-667-5283 or email adaservices@seu.edu.

Students with testing accommodations who need to schedule an exam or if you have questions regarding the CLEP assessment, please call 863-667-5116 or email testing@seu.edu.

Admission

Southeastern University encourages students to develop to their fullest potential by integrating personal faith and higher learning. In keeping with this philosophy, the Admission Committee gives consideration to Christian character, academic achievement, ability, and purpose when reviewing applicants for admission. Consideration is given to all credentials required and/or submitted. Acceptance or rejection is made after evaluation of the applicant's complete qualifications.

Career Services

Our Career Services team at Southeastern University strives to nurture the student's divine design and empower them to successfully create a pathway between academic growth and career readiness.

While enrollment in the university or completion of a program does not guarantee employment, the Career Services team assists students and alumni in making informed career decisions, discover and leverage their employable skills, obtain career-related experiences, and prepare for a successful job placement. We provide career assessments, career coaching, resume preparation, internship and job search help, professional networking and career workshops, career expos and recruiting events.

Our goal, in collaboration with our SEU community, is to prepare our students for meaningful post-graduation academic and professional success.

Information Technology

The Information Technology Department provides Christ-centered, high quality, reliable, service-oriented technology services to students, faculty, staff, alumni and University guests. Information Technology partners with all campus departments to implement technological solutions to meet the needs of our campus community. Necessary services are accomplished through effective communication with the university community and thorough research to ensure the best possible technology solutions. Information Technology provides a simple work request process that allows users to submit their needs, which are logged and tracked to ensure resolution. The Information Technology department supports distance education and off-campus instructional site students through password resets, the technological infrastructure, and first-level support.

Registrar's Office

The Office of the Registrar administers the following services to blended evening, extension site, online, and graduate students: student orientations, transfer of credit, transcripts of permanent records, enrollment verifications, student CRM account access,, registration of classes, course withdrawal process, graduation application and degree audits, commencement coordination, awarding of degrees and diplomas, student academic complaints and appeals process, and academic probation and suspension processes. Services are primarily rendered through electronic communication.

Student Financial Services

The SEU Office of Student Financial Services, in order to foster student success, assists students (on campus, extension site, online, and graduate) in discovering resources to cover the cost of education through a variety of federal, state, private, and institutional grants, scholarships, federal work-study programs, and loans. The service is provided on the telephone, via standard non-electronic correspondence, and electronically using the internet and/or e-mail. Student Financial Services supports distance education and off-campus instructional site students in the same manner as other student populations, primarily through electronic communication.

- Washington

The goal at Southeastern University is to offer a high-quality university experience to students all across the U.S.

To this end, Southeastern University has been approved to participate in the National Council for State Authorization Reciprocity Agreements. NC-SARA plays an important role in helping assure the quality of the programs offered as well as ensuring consumer protections for students who take advantage of interstate distance education programs.

Still, each state legislates its own set of standards as to how out-of-state educational institutions can operate within that state's borders. This includes offering classes in an actual physical location as well as online.

As we continue to expand our distance education programs, Southeastern University pursues authorization to open extension sites, offer degree programs, and maintains compliance with applicable state regulations.

Listed below are our state compliance statements.

Arizona

Under A.R.S. §32-3022 (E), Southeastern University is exempt from regulation by the Arizona State Board for Private Postsecondary Education and would not be regulated pursuant to A.R.S. § 32-3001 et.seq. to offer religious degrees.

*** These courses may be included in your current Foundational Core. See Advising Worksheet and advisor for assistance.**

American Institutions - 3 Credit Hours

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY Credits: 3

Literature - 3 Credit Hours

ENGL 2133 - INTRODUCTION TO LITERATURE Credits: 3

California

Southeastern University is determined to be in compliance with the requirements of Title 5, California Code of Regulations (CCR) section 71390. Therefore, Southeastern University: Nor Cal Campus is granted approval to operate under the terms of California Education Code (CEC) section 94890(a)(1) until December 5, 2022 per CEC section 94890(b). This approval is coterminous with the institution's term of accreditation granted by Southern Association of Colleges and Schools Commission on Colleges (SACSCOC). For additional policies pertaining to the university's operations in California, please see the California Notices in this catalog.

Florida

Southeastern University has received Florida licensure exemption from the Florida Department of Education.

Georgia

Southeastern University is exempt from regulation by the Nonpublic Postsecondary Education Commission based on the O.C.G.A. 20-3-250.3(a)(12).

Hawaii

Southeastern University is authorized to operate in the state of Hawaii pursuant to Hawaii Revised Statutes (HRS) §305J-12(a). Authorization by the Department of Commerce and Consumer Affairs in Hawaii shall be conditioned on the maintenance of accreditation by SEU and continuing compliance with HRS §305J-14.

Illinois

As defined under 23 Illinois Administrative Code Section 1030.10, Southeastern University meets the description of an Institution with Limited Physical Presence in Illinois and has been granted continuous approval by the Illinois Board of Higher Education (IBHE) until such time that any one of the conditions mentioned in the code change.

Louisiana

Southeastern University is currently licensed by the Board of Regents of the State of Louisiana. Licenses are renewed by the State Board of Regents every two years. Licensed institutions have met minimal operational standards set forth by the state, but licensure does not constitute accreditation, guarantee the transferability of credit, nor signify that programs are certifiable by any professional agency or organization.

Maryland

Maryland Higher Education Commission has determined Southeastern University to be in compliance with the requirements of the Education Article, Title 11, Subtitle 2, Annotated Code of Maryland and CCOMAR 13B.05.01 to enroll Maryland students in the fully online distance education programs, with the exemption of the bachelor's degrees in human services and nursing and the master's degrees in education and human services. The Commission's registration of the University's fully online programs is not an authorization of the institution to operate in Maryland or an approval or endorsement of the University's programs. Southeastern University has been authorized to offer the Associate of Ministerial Leadership on site at Church of the Redeemer, Gaithersburg.

Minnesota

Southeastern University is registered with the Minnesota Office of Higher Education pursuant to sections 136A.61 to 136A.71. Registration is not an endorsement of the institution. Credits earned at the institution may not transfer to all other institutions.

In compliance with Minnesota regulations and degrees standards, Southeastern University (SEU) will ensure that Minnesota residents, graduating from its programs, will meet the required degrees standards before receiving their diplomas. The Associate of Arts degrees must have a minimum of 40 general education hours, including at least five credits in communication studies and a minimum of eight credits in each of the following categories: humanities, social sciences, and natural sciences/mathematics. The SEU Associate of Arts program requires less hours in these categories, but Minnesota students are required to comply with their state standards, so they must include the additional credits as part of their 12 general electives. Records are maintained by the university to track the courses completed by Minnesota students. Students should consult the JICS website or their academic advisor for details.

The Minnesota Office of Higher Education is located at 1450 Energy Park Drive, Suite 350, St. Paul, MN 55108. Additional information may be found at www.Ohe.state.mn.us or by calling 651.642.0567.

Mississippi

Southeastern University has reviewed the MCCS Federal Online/Distance Education requirements and has determined that it does not meet the criteria to establish physical presence in the state, therefore, does not need authorization for online programs from the Mississippi Commission on College Accreditation.

Nevada

Southeastern University is licensed by the Nevada Commission on Postsecondary Education. For policies pertaining to the university's operations in Nevada, please see the Nevada Notices in this catalog.

North Carolina

Degree programs of study offered by Southeastern University have been declared exempt from the requirements for licensure, under provisions of North Carolina General Statutes Section (G.S.) 116-15 (d) for exemption from licensure with respect to religious education. Exemption from licensure is not based upon assessment program quality under established licensing standards.

Oklahoma

From the Oklahoma State Regents for Higher Education: Southeastern University complies with Title 70 O.S. §4103 and may operate educational programs beyond secondary education in Oklahoma.

South Carolina

SEU Seacoast Campus, 750 Long Point Rd, Mt. Pleasant, SC 29467 is licensed by the South Carolina Commission on Higher Education, 1122 Lady Street, Suite 400, Columbia, SC 29201; 803.737.2260. Licensure indicates only that minimum standards have been met. Licensure is not an endorsement or guarantee of quality and is not equal to or synonymous with accreditation by an accrediting agency recognized by the U.S. Department of Education.

For additional policies pertaining to the university's operations in South Carolina, please see the South Carolina Notices page in this catalog.

Tennessee

Southeastern University's Lakeland, FL campus is exempt from Title 49, Chapter 7, Part 20 of the Tennessee Code and the regulations contained in Rule Chapter 1540-01-02 by the Division of Postsecondary School Authorization of the Tennessee Higher Education Commission and may offer, advertise and recruit for online programs offered within the State of Tennessee. This exemption must be renewed annually.

SEU at The Belonging Co., an extension site of Southeastern University, is authorized by the Tennessee Higher Education Commission. This authorization must be renewed each year and is based on an evaluation of minimum standards concerning quality education, ethical business practices, and fiscal responsibility.

Texas

Southeastern University is approved and regulated by the Texas Workforce Commission on Career Schools and Colleges (Austin, TX).

Student complaints which cannot be resolved by direct negotiation with the school in accordance to its written grievance policy, may be filed with the Texas Workforce Commission (TWC), 101 East 15th Street, Rm 226&, Austin, TX 78778-0001. Students should go to TWC website to download the student complaint form. Students can also send a written complaint to the Coordinating Board at Texas Higher Education Coordinating Board, Academic Affairs and Research, P.O. Box 12788, Austin, TX 78711.

For additional policies pertaining to the university's operations in Texas, please see the Texas Notices in this catalog.

Virginia

SEU at Crosswalk Community Church is certified to operate by the State Council of Higher Education for Virginia. Main campus address: SEU at Crosswalk Community Church, 7575 Richmond Rd, Williamsburg, VA 23188. The Williamsburg extension is approved to offer three programs: the Bachelor of Science in Ministerial Leadership, the Master of Arts in Ministerial Leadership, and the Associate of Arts.

SEU at Lifepoint Church is certified to operate by the State Council of Higher Education for Virginia. Branch campus address: SEU at Lifepoint Church, 1400 Central Park Blvd., Fredericksburg, VA 22401. The Fredericksburg extension is approved to offer the Bachelor of Science of Ministerial Leadership and the Associate of Arts.

For policies pertaining to the university's operations in Virginia, please see the Virginia Notices in this catalog.

Washington

Southeastern University is authorized by the Washington Student Achievement Council and meets the requirements and minimum educational standards established for degree-granting institutions under the Degree-Granting Institutions Act. This authorization is subject to periodic review and authorizes Southeastern University to specific degree programs. The Council may be contacted for a list of currently authorized programs. Authorization by the Council does not carry with it an endorsement by the Council of the institution or its programs. Any person desiring information about the requirements of the act or the applicability of those requirements to the institution may contact the Council at P.O. Box 43430, Olympia, WA 98504-3430 or by email at degreeauthorization@wsac.wa.gov.

For additional policies pertaining to the university's operations in Washington, please see the Washington Notices in this catalog.

Location

Classes are held at the following locations:

- SEU at Nor Cal Campus, 1601 Coffee Rd, Modesto, CA 95355
- SEU at The Fellowship Church, 4873 Lone Tree Way, Antioch, CA 94531
- SEU at Faith Community Church, 1211 E. Badillo St., West Covina, CA 91790
- SEU at Zoe Church, 487 S. Fairfax Ave., Los Angeles, CA 90036

Approval to Operate

Southeastern University is a private university affiliated with the Assemblies of God churches.

Southeastern University is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award associate, baccalaureate, masters, and doctorate degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097 or call 404-679-4500 for questions about the accreditation of Southeastern University.

Southeastern University is approved by the California Bureau for Private Postsecondary Education to operate in California in accordance to the standards as set forth in the CEC 94885 and Code of Regulations, Title 5, Chapter 3.

Description of Facilities

SEU NorCal facilities are owned by The House, an Assembly of God Church. The regional campus is primarily located on the first floor of an educational wing, which includes 2400 square feet of administrative offices; three 1200-square-foot classrooms, each equipped with an 80-inch smart TV and a white board; and a 1200-square foot library housing seven computer workstations. Adjacent to the campus is a 2000-square-foot student union and student success center, housing SEU NorCal's largest computer lab that contains ten workstations. The students also have access to a very modern fitness facility that includes a coffee shop. As needed, additional space is available for chapels and other student events. Students have WIFI access in all of these locations. The facilities and equipment are more than adequate to ensure a positive learning environment.

The facilities at the Modesto campus are highly accessible for students with disabilities. Parking is more than adequate

for students, faculty, and staff. The campus appears to be well-light with security measures in place. A security guard is also on duty at night. Adequate provision has been made for the protection of physical resources, and most importantly, the health and safety of students and employees.

Valid building permits for all mentioned areas are available upon request.

Financial Status

Southeastern University does not have a pending petition in bankruptcy, is not operating as a debtor in possession, has not filed a petition within the preceding five years, or has not had a petition in bankruptcy filed against it within the preceding five years that resulted in reorganization under Chapter 11 of the United States Bankruptcy Code.

Review of Catalog and School Performance Fact Sheet

As a prospective student, you are encouraged to review this catalog prior to signing an enrollment agreement. You are also encouraged to review the School Performance Fact Sheet, which must be provided to you prior to signing an enrollment agreement.

Mission & Objectives

The mission statement for Southeastern University is provided in this catalog. Visit the General Information link on the right sidebar.

All the programs offered under Southeastern University's School of Unrestricted Education fully support SEU's primary mission of serving Christ and the world through Spirit-empowered life, learning, and leadership. Students formulate a biblical worldview alongside rigorous training in leadership principles, biblical and theological studies, practical ministries training, while receiving a robust foundation in theology, the Bible, spiritual development, church ministry, ecclesiastical operations, as well as a foundation in general education, which will position the student for utmost effectiveness as leaders in the local church and marketplace.

Notice Concerning Transferability of Credits and Credentials Earned at Our Institution

The transferability of credits you earn at Southeastern University: Nor Cal Campus is at the complete discretion of an institution to which you may seek to transfer. Acceptance of the degree, you earn in the educational program is also at the complete discretion of the institution to which you may seek to transfer. If the credits or degree that you earn at this institution are not accepted at the institution to which you seek to transfer, you may be required to repeat some or all of your coursework at that institution. For this reason you should make certain that your attendance at this institution will meet your educational goals. This may include contacting an institution to which you may seek to transfer after attending Southeastern University: Nor Cal Campus to determine if your credits or degree will transfer. For more details on the credit transfer policy, visit the University's annual academic catalog.

Admission Policies & Articulation Agreements

The admission policies for Southeastern University are provided in the university's catalog.

Southeastern University has not entered into an articulation or transfer agreement with any other college or university. Southeastern University does not accept application from Ability-to-Benefit students. ATB students are defined as those who do not possess a high school diploma, GED, or recognized equivalent and are beyond the California State age of compulsory school attendance.

Program Costs

California Licensed Undergraduate Degree Programs

2 Year /4 semester Programs	Total Program Hours
Associate of Arts in General Education	62
Associate in Ministerial Leadership	62
Associate in Worship Ministry	61
Associate of Arts in Education	62

4 Year / 8 Semester Programs	Total Program Hours
Bachelor of Science in Ministerial Leadership	120
Bachelor of Science in Worship Ministry	120-124
Bachelor of Business Administration	122
Bachelor of Science in Business and Professional Leadership	122
Bachelor of Science in Communication and Mass Media	120
Bachelor of Science in Organizational Leadership	120
Bachelor of Science in Psychology	121

Based on the schedules above, the program costs are estimated as follows:

Tuition and Fees	2022-23	2023-24	2024-25	2025-26
Tuition	\$7,560	\$7,560	\$7,560	\$7,560
Site Fee (NorCal Campus)*	\$3,600	\$3,600	\$3,600	\$3,600
Technology Fee	\$300	\$300	\$300	\$300
Student Tuition Recovery Fund (non-refundable)	\$6.00	\$6.00	\$6.00	\$6.00

Totals \$11,466 \$11,466 \$11,466 \$11,466

*Site Fees for branch campuses in California:

SEU at Cornerstone Church: \$3,000 SEU at Cottonwood Church: \$2,500

SEU at Missions.Me: \$7,300 SEU at Fellowship Church: \$1,416.

SEU Thrive Campus: \$2,520 SEU at Zoe Church: \$4,000

1. The 2022-23 costs are actual amounts based on set tuition and fees. The University reserves the right to increase tuition and fees following each academic year, therefore the costs for years two through four are estimates and should not be considered final. Any changes will be communicated in advance of the next academic year.
2. Students should expect basic textbook and related educational costs as part of their enrollment.
3. Estimated total over two years is \$21,000 and over four years is \$42,000, which is subject to change based on tuition and fee modifications.
4. Effective January 1, 2015, the Student Tuition Recovery Fund (STRF) assessment rate was set at (\$0.50) per \$1,000

Rights & Responsibilities: Student Tuition Recovery Fund

The State of California established the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic loss suffered by a student in an educational program at a qualifying institution, who is or was a California resident while enrolled, or was enrolled in a residency program, if the student enrolled in the institution, prepaid tuition, and suffered an economic loss. Unless relieved of the obligation to do so, you must pay the state-imposed assessment for the STRF, or it must be paid on your behalf, if you are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition.

You are not eligible for protection from the STRF and you are not required to pay the STRF assessment, if you are not a California resident, or are not enrolled in a residency program.

It is important that you keep copies of your enrollment agreement, financial aid documents, receipts, or any other information that documents the amount paid to the school. Questions regarding the STRF may be directed to the Bureau for Private Postsecondary Education, 1747 N. Market Blvd., Ste 225, Sacramento, CA 95834, (916) 431-6959 or (888) 370-7589.

To be eligible for STRF, you must be a California resident or are enrolled in a residency program, prepaid tuition, paid or deemed to have paid the STRF assessment, and suffered an economic loss as a result of any of the following:

1. The institution, a location of the institution, or an educational program offered by the institution was closed or discontinued, and you did not choose to participate in a teach-out plan approved by the Bureau or did not complete a chosen teach-out plan approved by the Bureau.

2. You were enrolled at an institution or a location of the institution within the 120 day period before the closure of the institution or location of the institution, or were enrolled in an educational program within the 120 day period before the program was discontinued.
3. You were enrolled at an institution or a location of the institution more than 120 days before the closure of the institution or location of the institution, in an educational program offered by the institution as to which the Bureau determined there was a significant decline in the quality or value of the program more than 120 days before closure.
4. The institution has been ordered to pay a refund by the Bureau but has failed to do so.
5. The institution has failed to pay or reimburse loan proceeds under a federal student loan program as required by law, or has failed to pay or reimburse proceeds received by the institution in excess of tuition and other costs.
6. You have been awarded restitution, a refund, or other monetary award by an arbitrator or court, based on a violation of this chapter by an institution or representative of an institution, but have been unable to collect the award from the institution.
7. You sought legal counsel that resulted in the cancellation of one or more of your student loans and have an invoice for services rendered and evidence of the cancellation of the student loan or loans.

To qualify for STRF reimbursement, the application must be received within four (4) years from the date of the action or event that made the student eligible for recovery from STRF.

A student whose loan is revived by a loan holder or debt collector after a period of non-collection may, at any time, file a written application for recovery from STRF for the debt that would have otherwise been eligible for recovery. If it has been more than four (4) years since the action or event that made the student eligible, the student must have filed a written application for recovery within the original four (4) year period, unless the period has been extended by another act of law.

However, no claim can be paid to any student without a social security number or a taxpayer identification number.

Student's Right to Cancel

Students have the right to cancel an agreement for a program of instruction, without any penalty or obligations, through attendance at the first class session or the seventh calendar day after enrollment, whichever is later. After the end of the cancellation period, they also have the right to stop school at any time; and they have the right to receive a pro rata refund if they have completed 60 percent or less of the scheduled days in the current payment period in their program through the last day of attendance.

The refund policy for Southeastern University is as follows:

- A student choosing to withdraw after the commencement of classes is to provide a written notice to the Site Director with the expected last date of attendance. The student is also required to complete a withdrawal form from the Retention Office and complete a short exit interview with the Retention Coordinator to officially withdraw from the university. (Please refer to the University Catalog for additional withdrawal policy details.) A student will be determined to be withdrawn from the institution if the student misses 14 consecutive calendar days.
- If special circumstance arise, a student may submit a leave of absence written request, which should include the date the student anticipates the leave beginning and ending. The leave of absence cannot exceed 180 days in a 12 month period. If a student fails to return on or before the end of an approved leave of absence, they will be considered withdrawn as of the date the LOA was approved for refund purposes.
- When official withdrawal forms are filed in the Retention Office after classes have begun, refunds of tuition and room and board are made within 45 days after receipt of a written request or the date the student last attended class, whichever is sooner. Expenses and financial aid will be prorated based on Federal Title IV Funds Guidelines. The amount of federal financial assistance that a withdrawing student earns is calculated on a pro-rata basis. Please refer to the attached table. The table list the percentage of the tuition the student is responsible to pay based on the withdrawal date.

- Once the student has completed more than 60% of the payment period, all federal financial assistance is considered to be earned and the student will be responsible for 100% of charges.
- Fees are nonrefundable after the first week of classes.
- If the student has received federal student financial aid funds, the student is entitled to a refund of moneys not paid from federal student financial aid program funds.

Additionally, please review the Return of Title IV Funds as stipulated in the University's academic catalog, Financial Information section.

Participation in Federal & State Aid Program

Southeastern University participates in federal financial aid programs for its NorCal Campus students. Federal financial aid programs include the Pell Grant, Direct Subsidized loans, Direct Unsubsidized Loans, Direct Parent PLUS loans, and Direct Graduate PLUS loans. To be considered for any federal aid programs, students must first complete the Free Application for Federal Student Aid (FAFSA) which determines their eligibility for all federal student aid programs. The FAFSA is a free application that determines eligibility for federal aid. To qualify, students must meet basic eligibility criteria and, for most programs, demonstrate financial need. The Pell Grant is awarded to students based on their EFC (expected family contribution) as determined by filing the FAFSA. Students who are U.S. citizens or eligible non-citizens (permanent residents) have the option of borrowing from the Federal Direct Loan (subsidized and unsubsidized) program. Students must complete the FAFSA as well as other loan requirements. Parents of dependent students who are U.S. citizens or eligible non-citizens (permanent residents) have the option of borrowing from the Federal Direct Parent PLUS Loan program. Students must complete the FAFSA as well as other loan requirements. The Direct Parent PLUS Loan is a credit-based loan and requires an application. Students must sign a Master Promissory Note (MPN) for each loan program before any loan disbursements are made. Federal aid is reevaluated each year based on the results of the FAFSA, which must be completed every year. In addition, students must make satisfactory academic progress. Consumer information is intended to provide current students, prospective students and their families with important information regarding the university. To view this important information, please visit the consumer information page.

If a student obtains a loan to pay for an educational program, the student will have the responsibility to repay the full amount of the loan plus interest, less the amount of any refund, and that, if the student has received federal student financial aid funds, the student is entitled to a refund of the moneys not paid from federal student financial aid program funds.

For additional details pertaining to the university's participation in federal aid programs, see the university's catalog, financial information page.

Veterans Benefits

Southeastern University is approved by the State Approving Agency of the State of Florida for the education and training of veterans and eligible dependents under public laws in effect. Students who are eligible for educational benefits under any Veterans Administration program will find additional details on the university's catalog, financial information page.

Housing Options

Southeastern University: Nor Cal Campus does not have dormitory facilities under its control and does not provide assistance to the student in finding housing. The availability of housing near the institution is favorable with the average cost of a home in the area at around \$325,000 and rent for a 1 bedroom apartment is approximately \$1,100.

Distance Education Policies

Professors are expected to answer student emails within 24 hours. An automated response receipt is sent immediately upon submission of assignments through the MyFire portal. Professors are expected to post grades and feedback within a timeframe appropriate to the subject matter and no later than 7 days from assignment due date. Final grades for courses are also submitted within 7 days of the deadline.

Faculty Qualifications

Southeastern University employs full-time or part-time faculty within California. All faculty who teach at Southeastern University meet all of the academic, scholarly, and teaching qualification set forth by our regional accreditor, The Southern Association of Colleges and Schools Commission on Colleges (SACS COC) .

Any faculty member, hired to teach courses in the Bachelor of Science in Ministerial Leadership degree must possess the following minimal qualifications.

- A master's degree in the course discipline with at least 18 graduate hours from a regionally accredited university
- Depending on the subject matter (more practical disciplines), expectations may be set for professional experience. This is established by each academic college and department.

In all cases, the university prefers to hire faculty with terminal degrees in the discipline as SEU must continually monitor the percentage of courses taught by terminally qualified faculty. Once hired, the university provides a comprehensive set of faculty training tools, including the following: (1) an initial onboarding seminar, which is offered face-to-face and via streaming service (on-demand); (2) access to best practices courses in online instruction and course development; (3) a mentor to support to provide one-on-one assistance; and (4) various handbooks and internet training systems. All faculty are required to receive adequate training, regardless of their delivery.

Due to SACS accreditation policies, we will not employ faculty who fail to meet these minimum qualifications.

Library Services

The SEU library is well equipped to serve the needs of the programs offered at these extension sites. As of the end of the 2020-21 academic year, the library's collections included 79,902 print books, 266,721 eBooks, 4,973 videos (DVD), 2,011 online videos, and 16,655 online recordings. In addition, the library subscribes through individual subscriptions and e-journal packages to 7,034 journals. Of these journals, 97% are e-journals. In terms of databases, both EBSCO and ProQuest are platforms on which multiple disciplines are covered. In addition, the library provides more than 100 databases, many with full text availability (over 27,303 e-journal titles).

Holdings and resources specific to programs to be offered at The Belonging Co for the Associate of Arts in General Education, the Associate and Bachelor of Science in Ministerial Leadership and the Bachelor of Science in Business and Professional Leadership include the following:

	General	Ministerial	Business / Professional
Format	Education	Leadership	Leadership
eBooks	111,965	20,910	31,395
Print Books	53,522	27,122	6,114
Subscriptions	1,262	154	583

Academic Search Complete is a multidisciplinary database capable of supporting disciplinary courses in general education (Foundational Core). Other discipline specific databases for behavior and social sciences include SocIndex, PsyArticles, ScienceDirect's Social Sciences and Psychology; databases for English and literature include MLA International Bibliography Full Text and Literature Resource Center; databases for music include Classical Music Library; and history includes U.S. History Collection. The Associate and Bachelor of Science include Atla, and the Business and Professional Leadership includes Business Source Complete, ABI/Inform, and ScienceDirect's Business, Economics, and Decision Sciences.

Twelve dedicated and professional staff members (dean, five faculty librarians, four fulltime staff, and two parttime staff) provide the library's services. The five faculty librarians are reference librarians who are available to assist the students and faculty at a distance through telephone, email, video chat, video workshops, and/or consultations. Though all reference librarians are available to help distance students, one librarian (the Reference and Outreach Librarian) is specifically trained to work with distance students as a part of that position's job description.

Faculty and students may access the resources at the library and/or through online searching of the catalog and the library's databases. EZProxy makes this possible for faculty and students away from the campus. The library uses the OCLC's WorldShare Management Services (WMS) with WorldCat local serving as the library's catalog (library.seu.edu/), and databases are easily searchable at this website. WMS also facilitates ILL where users can easily search the larger OCLC bibliographic database to locate additional sources. Users may request books from the Steelman Library's collection which are supplied by mail with postage paid return envelopes, and the library will scan and email periodical articles as requested in compliance with copyright guidelines.

Students receive guidance in the use of the library services and resources through the following means. At the request of the sites and through funding by the Extension Site Office, librarians have visited and are willing to make visits to sites to provide training. Students have electronic access to LibGuides which bring together information about resources for various programs, some courses, and other more specialized topics. A LibGuide (library.seu.edu/distance) is available especially for distance learners to introduce library services and to give them online library instruction (including instructional videos). There is a LibGuide that identifies the library's databases and includes a tutorial on how to use these databases (library.seu.edu/databases/general). The university's LMS (MyFire) has a link to the library's webpage on MyFire's Welcome Page and in each course. The library webpage (library.seu.edu/) provides links to the catalog, databases, and other LibGuides on a variety of topics including Citation Styles (library.seu.edu/citations) and Research StepbyStep (library.seu.edu/research).

The library makes every effort to supply extension students with the same high quality service that oncampus users receive. The library is open from 7 am – 12 am Monday through Thursday, 8:30 am – 8:30 pm on Friday, 12 pm – 8:30 pm on Saturday, and 1pm – 11 pm on Sunday. Online students can generally reach a reference librarian during the day Monday through Friday, and an evening librarian is available until 11 pm Sunday through Thursday. Weekend staff can usually help users but can forward requests to a reference librarian. The Library Dean or another librarian frequently answer research questions on weekends. A Research Request Form is available under the Services tab on the library webpage. This is a 24/7 form that sends an email to a reference librarian who will respond no later than the next open library day. Because of the university's membership in the Tampa Bay Library Consortium (TBLC), chat reference is provided through Florida's cooperative Ask a Librarian service. Even students outside of Florida may use this service as long as they are coming from one of the library's LibGuides or the library home page.

The library is not reliant upon any other library for resources relevant to the programs offered at these extension sites, and electronic databases provided by the library are not accessed through consortial or statewide groups

The library is not reliant upon any other library for resources relevant to the programs offered at these extension sites, and electronic databases provided by the library are not accessed through consortial or statewide groups.

Student Records

Student data will be stored permanently by the university, including the following: the degree or certificate awarded and the date on which that degree or certificate was awarded, the courses on which the certificate or degree was based, and the grades earned by the student in each of those courses.

Unresolved Question Pertaining to Catalog

Any questions a student may have regarding this catalog that have not been satisfactorily answered by the institution may be directed to the Bureau for Private Postsecondary Education at 1747 North Market Blvd., Suite 225, Sacramento, CA 95834, at www.bppe.ca.gov, and at (888) 370-7589, (916) 574-8900, or by fax at (916) 263-1897.

The Office of Student Assistance and Relief is available to support prospective students, current students, or past students of private postsecondary educational institutions in making informed decisions, understanding their rights, and navigating available services and relief options. The office may be reached by calling (888) 370-7589 or by visiting www.bppe.ca.gov.

Retention of Student Records

Student transcripts and degrees or certificates are maintained indefinitely and all other records are maintained for 5 years.

Texas Notices

Texas Notices

Location and Facilities Description

SEU at Anchor Church, 114 1/2 East Louisiana Avenue, McKinney, TX 75069.

SEU at Celebration, 601 Westinghouse Road, Georgetown, TX 78626.

SEU at Covenant Church, 5466 East Trinity Mills Road, Carrollton, TX 75006.

SEU at Shoreline City Church, 10715 Garland Rd, Dallas, TX 75218

SEU at The Potter's House North Dallas, 10501 E. Main St., Frisco, TX 75034

The main campus facilities description is provided in this catalog. Visit the General Information Link on the right sidebar.

Approval to Operate

Approved and Regulated by the Texas Workforce Commission, Career Schools and Colleges, Austin, Texas.

Mission, History and Accreditation

The mission statement, history and accreditation for Southeastern University is provided in this catalog. Visit the General Information Link on the right sidebar.

Programs and Costs

As part of its commitment to ministerial preparation, SEU offers the church-based extension site program at a reduced tuition rate. During the 2022-23 academic year, undergraduate tuition is charged at a rate of \$339 per credit hour. Therefore, a full-time student would be charged \$4,068 per semester for 12 hours (or \$8,136 annually for 24 credit hours). Site fees, which average \$1,260 per semester (or \$2,520 annually) will be charged to the student, but this is subject to vary per site. As collected and on a predetermined schedule, this site fee is reimbursed to the site to cover various expenses. A \$175 technology fee will also be charged each semester. Beyond the tuition and fees collected annually by the university, the extension site may charge additional fees for mission trips or other approved activities; however, these additional fees must be collected by the site. Other fees for textbooks, computers, travel and educational supplies are to be assumed by the student.

Assuming a two-year plan, the total cost for the associate degree would be approximately \$22,012. Assuming a four-year plan, the total cost for bachelor degrees is approximately \$44,024

Tuition for students enrolled in graduate programs is charged at \$495 per credit hour (MBA tuition rate is \$525/credit hour). Hours required to complete programs range between 36 and 72 credit hours. Graduate students are charged a \$175 technology fee each semester.

Student's Right to Cancel

Under the Texas Education Code, Section 132.061(f) a student who is obligated for the full tuition may request a grade of "incomplete" if the student withdraws for an appropriate reason unrelated to the student's academic status. A student receiving a grade of incomplete is allowed to re-enroll in the program during the 12-month period following the date the student withdraws and complete those incomplete subjects without payment of additional tuition.

Library Holdings and Resources

The SEU library is well equipped to serve the needs of the programs offered at these extension sites. As of the end of the 2020-21 academic year, the library's collections included 79,902 print books, 266,721 eBooks, 4,973 videos (DVD), 2,011 online videos, and 16,655 online recordings. The library is not reliant upon any other library for resources relevant to the programs offered at these extension sites, and electronic databases provided by the library are not accessed through consortial or statewide groups.

Faculty and Staff Qualifications

- SEU at Anchor Church: Jeff Jenkins, Site Director
- SEU at Celebration: Krista Clark, Site Director
- SEU at Covenant Church: Ashley Selby-Karney, Masters Education, Site Director
 - April Packer, MS Communication, Adjunct Faculty
 - Heather Graham, MA Counseling and Psychology, Adjunct Faculty
- SEU at Cross Mountain Church: Noah Wimberly, Site Director
- SEU at Hope Fellowship: Melanie Schultz, MA Writing Popular Fiction, Site Director
 - Brock Jahnke, Master of Divinity, Adjunct Faculty
- SEU at One Church: Jimmy Tsai, Site Director
- SEU at Oaks Church: Jared Parks, Site Director
- SEU at Shoreline City Church: Ben Stokes, Site Director
- SEU at The Potter's House North Dallas: Travis Simons, Site Director

Currently, Southeastern University has not selected nor hired instructors to teach at the proposed Texas locations.

Faculty Qualifications

Faculty hired at all extension sites must hold, at minimum, a master's degree or preferably, a terminal degree from a regionally accredited institution, with at least 18 graduate credit hours in the teaching discipline. (The primary exception relates to faculty candidates, who hold an earned master's or terminal degree from an institution, accredited by the Association for Theological Schools [ATS].) This standard is in keeping with the policies set forth by the university's regional accreditor, the Southern Association of Colleges and Schools Commission on Colleges (SACS COC), and applicable programmatic accreditors, if any. Depending on the subject matter, academic colleges and departments may set forth professional experience expectations. This is not determined by the regional or programmatic accreditors.

On-site instructors may be hired to teach practical ministry, Bible, and theology courses in the Bachelor of Science in Ministerial Leadership program.

- Examples of qualified graduate degrees for the ministerial leadership core include, but are not limited to, the following: Masters of Divinity (M.Div.), M.A. in Ministerial Leadership, Doctorate of Ministry (D.Min.), or a Doctorate of Philosophy (Ph.D.) in the field.
- Examples of qualified graduate degrees for the biblical and theological studies core include, but are not limited to, the following: Masters of Divinity (M.Div.), M.A. in Theological/Religious/Biblical Studies, Doctorate of Theology (D.Th.), or a Doctorate of Philosophy (Ph.D.) in the field.

The general education courses (e.g. mathematics, English, humanity, sciences, etc.) are taught online by a professor who is located at the Lakeland, FL campus. There may be some exceptions. In all cases, the instruction must possess a master's or terminal degree from a regionally accredited institution, with at least 18 graduate credit hours in the teaching discipline. Example qualified degrees include, but are not limited to, the following: M.A. in English for all English composition courses, M.A./M.S. in Mathematics for liberal arts mathematics courses, and M.A. in Biology for the natural sciences courses. Faculty qualifications will vary between discipline; however, the minimum requirements remain intact.

In keeping with best practices and to maintain compliance with accreditation policies, SEU will not employ faculty who fail to meet these minimum qualifications.

School Calendar

START AND END DATES FOR SEMESTERS

Semester/Session	Start Date	End Date
Fall, Session A	8/24/2022	10/18/2022
Fall, Session B	10/19/2022	12/15/2022

Spring, Session B	3/08/2023	5/02/2023

Educational Delivery Systems

Southeastern University's Instructional Design & Technology (ID&T) team provides services related to curriculum development and management, infrastructure development and management, faculty and student training, 24/7 technical support, and online best practices consulting. The university is an active participant in ensuring the effectiveness and quality of the programs and courses that are supported by ID&T. Management of this team is the responsibility of the division of Institutional Research and Effectiveness within the university. The Director of Instructional Design & Technology directly manages the services provided by ID&T with an emphasis given to policy creation/maintenance, policy compliance, and general oversight. The Director manages ID&T on a daily basis. Online delivery through the use of a master course philosophy allows Southeastern to maintain complete control of the curriculum and assessments for the courses.

School Holidays & Vacation Periods

The following holidays will be observed by all extension sites. Specifically, students are not required to attend face-to-face courses and/or practicum on the observed holidays. On the other hand, the online program continues through the holidays observed below unless they lie between semesters or session starts. Vacation periods are the time between each semester start.

- New Year's Day
- Martin Luther King Day
- President's Day
- Good Friday
- Memorial Day
- Independence Day
- Labor Day
- Thanksgiving Day
- Christmas Break

Hours of Operation

Each extension site determines its own hours of operation for face to face contact with the students; contact information for each site is provided at the top of this page. Most of the classes are taken online and the hours are determined by each student as they work at their own pace within the determined parameters of the due dates for assignments and assessments. Hours of operation at Southeastern University School of Unrestricted Education are 8:30 am – 5:00 pm.

True and Correct Statement

The information contained in this catalog is true and correct to the best of my knowledge.

Shawn Stewart, Ph.D., Dean of Academic and Extension Operations

The following SEU Extension Sites are licensed by the Nevada Commission on Postsecondary Education:

Facilities Description

SEU at Central Church

Central Church is located at 1001 New Beginnings Dr, Henderson NV 89011. The building has 1,172 parking spots, this includes accessible parking spots at every entrance. The facility has a total of 6 bathrooms. The First floor has 42 Women's and 32 Men's fixtures. The Second floor has 15 Women's and 11 Men's fixtures. Both floors include the appropriate amount of accessible fixtures. Three main spaces will be used for Southeastern University at Central. The first space is 4,691 square feet and with the dimension of 111' long by 43' wide with an occupancy load of 235 people. The second space is 3,708 square feet with the dimension of 84' long by 47' wide with an occupancy load of 185 people. The third space 2,370 square feet with the dimension of 55' long by 44' wide with an occupancy load of 119.

The above spaces have the ability to airplay and connect computers to the TV displays, a complete PA system, a stage, and theater lighting. All of the spaces in the building have been designed to comply with the ADA requirements.

SEU at The Church at South Las Vegas

The Church at South Las Vegas: is located at 3051 W Horizon Ridge Parkway, Henderson, NV 89052. The building has 220 parking spots, this includes accessible parking spots at every entrance. The facility has a total of 5 bathrooms. There are 9 Women's and 9 Men's fixtures. Two main spaces will be used for the Southeastern University program. The first space is 5,733 square feet and with the dimension of 91' long by 63' wide with an occupancy load of 600 people. The second space is 726 square feet with the dimension of 33' long by 22' wide with an occupancy load of 45 people. The above spaces have the ability to airplay and connect computers to the TV displays, a complete PA system, a stage, and theater lighting. All of the spaces in the building have been designed to comply with the ADA requirements.

Hours of Operation

Each extension site determines its own hours of operation for face-to-face contact with the students; contact information for each site is provided at the top of this page. Most of the classes are taken online and the hours are determined by each student as they work at their own pace within the determined parameters of the due dates for assignments and assessments. Hours of operation at Southeastern University School of Unrestricted Education are 8:30 am – 5:00 pm EST, Monday through Friday.

Indemnification

In accordance with NRS 394.441 Southeastern University is making students aware of the Account for Student Indemnification created in the Nevada State General Fund. Under NRS 394.553 if a student suffers damage due to any of the following reasons, the Account may be used to indemnify them: a) The discontinuation of operation of a postsecondary education institution licensed in the State of Nevada; or b) The violation by a postsecondary educational institution of any provision of NRS 394.383 to 394.560, inclusive, or the regulations adopted pursuant thereto.

Programs and Costs

As part of its commitment to ministerial preparation, SEU offers the church-based extension site program at a reduced tuition rate. During the 2022-2023 academic year, tuition is charged at a rate of \$339 per credit hour. Therefore, a full-time student would be charged \$4,068 per semester for 12 hours (or \$8,136 annually for 24 credit hours). Site fees vary by site and are collected and on a predetermined schedule, this site fee is reimbursed to the site to cover various expenses. Site fees at Central Christian Church are \$750 per semester (or \$1,500 annually), while Site fees at The Church at South Las Vegas are \$1,050 per semester (or \$2,100 annually). A \$175 Technology fee will also be charged each semester.

Beyond the tuition and fees collected annually by the university, the extension site may charge additional fees for mission trips or other approved activities; however, these additional fees must be collected by the site. Other fees for textbooks, computers, travel and educational supplies are to be assumed by the student.

Total Degree Cost for: 2 Yr Associate 4 Yr Bachelor

SEU at Central Christian Church \$19,972 \$39,944

SEU at The Church at South Las Vegas \$21,172 \$42,344

NOTE: The university may increase these rates on an annual basis and will communicate any changes in advance.

Refund Policy

The refund policy for Southeastern University is as follows:

If Southeastern University has substantially failed to furnish the training program agreed upon in the enrollment agreement, the institution shall refund to the student all the money the student has paid.

When a student submits written notice of cancellation to the Admission Office or the Office of the Registrar prior to the first day of classes, a full refund (100%) of institutional charges is made.

If a student withdraws from the university on or before the add/drop deadline after classes have begun, a full refund (100%) of tuition are made.

When official withdrawal forms are filed in the Office of the Registrar after classes have begun, refunds of tuition are made during the first nine weeks. Expenses and financial aid will be prorated based on Federal Title IV Funds Guidelines. The amount of federal financial assistance that a withdrawing student earns is calculated on a pro-rata basis. If a student withdraws or is expelled by the institution after the start of the training program and before the completion of more than 60 percent of the program, the institution shall refund to the student a pro rata amount of the tuition agreed upon in the enrollment agreement, minus 10 percent of the tuition agreed upon in the enrollment agreement or \$150, whichever is less, and that if the institution is accredited by a regional accrediting agency recognized by the United States Department of Education, the institution may also retain any amount paid as a nonrefundable deposit to secure a position in the program upon acceptance so long as the institution clearly disclosed to the applicant that the deposit was nonrefundable before the deposit was paid. Once the student has completed more than 60% of the payment period, all federal financial assistance is considered to be earned and the student will be responsible for 100% of charges.

Fees are nonrefundable after the first week of classes.

Any refunds will be paid to the to the person or entity who paid the tuition within 15 calendar days after the (a) date of cancellation by a student of his or her enrollment; (b) date of termination by the institution of the enrollment of a student; (c) last day of an authorized leave of absence if a student fails to return after the period of authorized absence; (d) or last day of attendance of a student; or (e) or whichever is applicable.

Additionally, please review the Return of Title IV Funds as stipulated in the University's academic catalog, Financial Information section.

Standards of Academic Progress

In accordance with NAC 394.381 (6)(e)(2), all Nevada students are subject to Financial Aid Standards of Academic Progress regardless of funding source.

Financial Policies

Tuition and Fees

All degree programs offered at SEU at New Hope Christian College are expected to be completed over two years or four semesters and four years or eight semesters, respectively (including fall and spring). Based on this schedule, the program costs are estimated as follows:

2022-23	
Tuition	\$7,560
Site Fee	\$7,420
Technology Fee	\$300
Total/Year	\$14,800

1 The 2022-23 costs are actual amounts based on set tuition and other fees. The University reserves the right to increase the tuition and fees following each academic year; therefore, the costs for years 2-4 are estimates and should not be considered final. Any changes will be communicated in advance of the next academic year

2 Students should expect basic textbook and related educational costs as a part of their enrollment.

3 Estimated total over two years is \$29,600, and over four years is \$59,200, which is subject to change based on tuition or fee modifications.

Refund Schedule

After classes have begun for a term, a student who submits written notice to the Admission Office or the Office of the Registrar to withdraw from a course is eligible for a partial refund through the middle week of the term. Refunds shall be based on unused instructional time and shall be prorated on a weekly basis using a semester calendar.

Oregon Extension Sites

Mission Statement

Equipping students to discover and develop their divine design to serve Christ and the world through Spirit-empowered life, learning, and leadership.

Vision Statement

Southeastern University is anchored by Spirit-empowered education in a Christ-centered, student-focused learning community. Southeastern's global impact is marked by a deep commitment to transforming minds and engaging culture through the integration of faith, learning and service. Each student's divine design is nurtured and unleashed through the investment of faculty and staff, relationships within the community, the rigor of scholarship, diverse learning experiences and the discipline of spiritual formation, which propels students into a lifetime of serving the world in the Spirit of Christ.

In addition to our mission and vision statement, we hold fundamental truths about the Christian faith that include the following:

The Scriptures are inspired by God and declare His design and plan for mankind. There is only one true God who is revealed in three persons: Father, Son and Holy Spirit (commonly known as the Trinity). Jesus Christ, as God's son, was both fully human and divine.

We are proud of our affiliation with the Assemblies of God and our Pentecostal tradition. We are also proud to be a welcoming community for students from all Christian backgrounds and denominations. Our campus includes many Baptists, Presbyterians, Methodists, etc., as well as nondenominational students. Everyone shares a strong commitment to knowing Christ and making Him known, and we celebrate our theological similarities while appreciating our differences. Refer to Human Sexuality for additional details related to What We Believe.

Title IX Statement

Southeastern University is committed to creating an environment for every student to thrive academically spiritually and socially. An aspect of creating this culture is providing avenues for students to discuss and report any activity that may compromise this commitment.

Under a federal law known as Title IX, "no person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving federal financial assistance" (Title IX of the Education Amendments of 1972).

While students should feel comfortable approaching faculty with issues they may be struggling with or concerns they may be having, students should know that all faculty and staff are required to report certain information about Sexual Misconduct and certain crimes to University administration, in order to help keep the University community safe, and to connect students to all of the resources and reporting options that are available.

For example, if you inform faculty or staff (in private or during class discussions) of an incident of Sexual Misconduct, that individual will keep the information as private as possible, but is required to bring it to the attention of the institution's Title IX Office. If a student would like to talk to the Title IX office directly, they can do so by e-mail at smpowell@seu.edu, by phone at 863-667-5236, or in person at Pansler U210. For more information about Title IX reporting options at Southeastern, please go to: <https://www.seu.edu/about-southeastern-university/title-ix/>.

If you are struggling with an issue that is traumatic, unusually stressful, or results in disruptive behavior, faculty and staff will likely inform the Care Team. If students would like to reach out directly to the Care Team for assistance, they can do so at the Campus Counseling Center (<https://my.seu.edu/services/counseling-health->

wellness-services/campus-counseling-services/) located in Esperanza 303, by phone at 863-667-5205, or by e-mail at care@seu.edu.

Student Services

Student Conduct

The office of Student Conduct believes that every student has a journey. That journey is either taken alone or with others. When you enter the disciplinary process, we assess your individual situation and connect you with resources through our campus and outside community so that they too, may journey alongside of you.

P: (863)667-5486 E: studentconduct@seu.edu

Safety & Security

Campus security officers are available at the office 24 hours a day, seven days a week. You can obtain a parking permit, report suspicious behavior or request an escort across campus after dark. Questions about parking violations should be directed to this office.

P: (863)667-5190 E: security@seu.edu

Retention

The Office of Student Success and Retention is committed to guiding and supporting students who may be navigating a variety of life transitions impacting their ability to continue their studies at Southeastern University.

P: (863)667-5668 E: retention@seu.edu

ADA

Academic and Auxiliary Services (ADA) offers a variety of support services to increase students' academic success

P: (863)667-5286 E: adaservices@seu.edu

ACE

The goal of ACE is to help you succeed academically and to enrich your learning experience. ACE personally invites you to come receive encouragement and acquire the tools you need to maximize your ability as a student at Southeastern.

P: (863)667-5137 E: ace@seu.edu

Class Participation

Students are required to login regularly to the course. The instructor will monitor student activity and participation through MyFIRE. Students are also required to participate in all class activities such as discussion board posts and responses, chat, or conference sessions and group projects.

Official Email

You are expected to check your SEU webmail account daily during the course term. All written correspondence between instructor and student must be handled through the SEU email system.

MyFIRE Use

Please, make it a habit to always check your MyFIRE account as messages; assignments, grades, and other important related materials may be posted. It is the student's responsibility to check grades and notify your instructor

if you have questions.

Technical Difficulties

Southeastern University is committed to providing a reliable online course system to all users. However, in the event of any unexpected server outage or any unusual technical difficulty that prevents students from completing a time-sensitive activity or assessment, students should report any problems to the instructor and also contact SEU's 24x7 Support Center via the various links provided on every homepage (available options: chat, email, phone). Be sure your computer system complies with all SEU Technical Requirements. These requirements are listed within MyFIRE and a Browser Checker is provided under the Need Help? drop-down to ensure the browser you are using is compatible with MyFIRE.

Technical Support

If you have questions or need assistance, you can reach out to our 24/7 Support Center at 1-888-889-6599 or click here to submit a support ticket via email.

Note: Email response is within 24 hours.

If immediate assistance is required, please contact support via phone/chat. To chat LIVE! with a Support Representative, click here.

Disability Statement

Southeastern University is committed to the provision of reasonable accommodations for all students with learning and/or physical disabilities, as defined in Section 504 of the Rehabilitation Act of 1973 and with the American with Disabilities Act (ADA) of 1990. This legislation guarantees educational rights for the physically and learning disabled.

Students with medical diagnoses that qualify them for accommodations must contact ADA services at (863) 667-5283, or e-mail ADAservices@seu.edu. Once medical documentation is provided and a confidential consultation is completed, the student will then be responsible to provide the director of academic and auxiliary services with a list of his or her current professors and their e-mails.

Contact with the Office of Academic and Auxiliary Services is mandatory for each new semester. For more information, visit the SEU students with disabilities page on our website.

Academic Honesty

Plagiarism is considered a serious academic offense at Southeastern. It undermines the educational process and, when done intentionally, violates the integrity of the community.

Plagiarism occurs when a writer uses someone else's language, ideas, or other original material without acknowledging its source.*

Plagiarism includes unattributed use of any source, in any medium, published or unpublished.

Examples of plagiarism include:

- Quoting or paraphrasing material without attributing it to its source
- Copying segments from the work of others without giving proper credit
- Submitting as original work written entirely by someone else

Widely known facts do not require citation and do not count as plagiarism so long as they are communicated in the writer's own words. Ideas and observations original to the writer also do not require citation.

Work already submitted for a grade in another course may not be resubmitted unless the professor specifically states otherwise.

For more information, visit the SEU Plagiarism page on our website.

Course Evaluation

In order to help us to assess the effectiveness of our courses and instructors, please complete the course evaluation. If you receive a course evaluation for this course, you are required to complete it.

Official Withdrawal

To officially withdraw from this course please contact the registrar's office.

Netiquette

General Rules of Netiquette:

- Make your messages easier to read by making your paragraphs short and to the point.
- DO NOT SHOUT BY TYPING IN ALL CAPS.
- Utilize humor in appropriate forms. Avoid hostile, abusive, libelous, or rude comments. No vulgar, sexist, racist, biased, or other objectionable language will be tolerated.
- Reinforce others in the course (e.g., "Good presentation!" or "Thanks for the feedback."). Valid criticism is acceptably expressed in the form of thoughtful alternatives. Do not insult or "flame" others.
- Think twice and send once. The old carpenter adage to measure twice and cut once holds great value here. Once you send something not well-thought out you will find it difficult and time-consuming to recover. Think about what you want the group and the professor to think about you.
- Use spell-check and grammar-check. The little errors commonly accepted in email or text-messaging with friends and family are distracting and inappropriate in a college discussion forum.
- In an online discussion forum, debate is welcome, but be tactful in responding to others. Remember that there's a person (or a whole class) at the receiving end of your post.
- If you quote a previous post (by using the reply function for example), quote only enough to make your own point
- If you want to get in touch with only one person in the class, send a message to that individual's e-mail address, not to the entire discussion list.

Student Records

Student data will be stored permanently by the university, including the following: the degree or certificate awarded and the date on which that degree or certificate was awarded, the courses on which the certificate or degree was based, and the grades earned by the student in each of those courses.

Cancellation and Refund Policy

Southeastern University has been approved by the U.S. Department of Education for eligibility in the Title IV Student Financial Aid program and must comply with the federal regulations governing institutional funds. The following applies to refunds for South Carolina residents who do not receive Title IV funds:

A full refund of monies paid by a student if a student withdraws from the university within seventy-two hours of enrollment/ until the expiration of the add/drop period (typically occurs within the first week of a semester), whichever is later.

A pro-rata refund will be made for a student that submits a written notice of withdrawal to the Admission Office or the Office of the Registrar after the add/drop deadlines as follows:

Refunds for a student attending the University for the first time will be made equal to the portion of the period of enrollment for which the student has been changed that remain on the last day of attendance.

Sixteen Week Classes

A course dropped the week the class begins in a 16-week semester will receive a 100% refund. During each consecutive week, the refund is reduced by 10% each week, with the exception that once the student has attended 60% of classes, no refund is granted. Example:

- Until the expiration of the add/drop period (the add/drop period typically occurs within the first week of a semester): 100% of tuition and fees
- After add/drop period, the student refund is reduced by 10% of tuition for each week thereafter.
- After the add/drop through the 2nd full week of class - 90% of tuition
- After the 2nd full week of class up to the third full week of class - 80% of tuition
- After 3rd full week of class and up to the fourth full week of class - 70% of tuition
- After the 4th full week of class and up to the fifth full week of class: 60% of tuition
- After the 5th full week of class and up to the sixth full week of class: No Refund

For 8-week courses (session A or B):

A course dropped up to or on the first day and for the succeeding two (2) calendar days thereafter will receive a 100% refund. After the third calendar day, the refund is reduced by 10% based on the schedule below:

Upon commencement of the class (Day 1) and for the succeeding two (2) calendar days thereafter, the student will qualify for a 100% refund of tuition and fees.

- Calendar days 1-3: 100% of tuition
- Calendar days 4-6: 10% of tuition
- Calendar days 7-9: 20% of tuition

- Calendar days 10-12: 30% of tuition
- Calendar days 13-15: 40% of tuition
- Calendar days 16-18: 50% of tuition
- Calendar days 18-21: 60% of tuition
- After Calendar Day 21 of classes: No refund

After the student's first period of enrollment, a refund of monies paid by the student, except for room and board, will be made for students who withdraw in subsequent periods of enrollment due to mitigating circumstances. Mitigating circumstances are those that directly prohibit pursuit of a program and which are beyond the students' control such as: serious illness, death within the immediate family, or active-duty military service (including active duty for training).

Facilities and Classroom Equipment

Seacoast Church has two classrooms that are 462 and 2014 square feet in total, each dedicated to the program. The first classroom (21 x 22) has seating for 18-20 students utilizing tables and chairs, and a 40" flat screen projection monitor. The second classroom (53 x 38) has seating for 90 students utilizing tables and chairs, two 50" flat screen projection monitors, an AM soundboard, and the ability to run in-ear monitors. There are also six (6) individual study rooms for students that are approximately seventy to ninety square feet each. The church has ADA required parking spaces and the building, restrooms, and classrooms are ADA accessible, housed on one level. No additional educational facilities are provided at the Seacoast facility.
