None

Credits: 3

AVIP 1013 - PRIVATE PILOT GROUND SCHOOL

This course provides instruction in preparation for initial flight training and the Federal Aviation Administration's (FAA) Private Pilot Airplane Knowledge Test. Topics include the basic aerodynamics, airplane systems and instruments, weight and balance, aircraft performance, meteorology, flight physiology, basic navigation techniques, radio navigation and communication, the Air Traffic Control and airspace system, and FAA Regulations. Credit may be granted for passing the FAA Private Pilot Airplane Knowledge Test with a mandatory minimum passing score of 70%. The course should be taken concurrently with flight lessons or AVIP 1023.

Additional fees are associated with this course.

Prerequisites & Notes

None

Credits: 3

AVIP 1011 - PRIVATE PILOT FLIGHT TRAINING I

This course introduces students to airplane ground and flight operations, take-off and landing, basic flight maneuvers, cross-country methods, night flying, and emergency procedures. The course also includes flight instruction in single-engine aircraft and simulators. This course prepares students for the required FAA Private Pilot Airplane Practical Test. Credit may be granted for students presenting a valid FAA Private Pilot Certificate. Students must possess an FAA Class 3 or above Medical Certificate and be at least 17 years old. The course should be taken concurrently with AVIP 1013. Some students may require additional hours of flight instruction beyond the course minimum to pass the course.

Additional fees are associated with this course.

Credits: 1

AVIP 1022 - PRIVATE PILOT FLIGHT TRAINING II

This course is a continuation of AVIP 1011. It introduces students to airplane ground and flight operations, take-off and landing, basic flight maneuvers, cross-country methods, night flying, and emergency procedures. The course also includes flight instruction in single-engine aircraft and simulators. This course prepares students for the required FAA Private Pilot Airplane Practical Test. Credit may be granted for students presenting a valid FAA Private Pilot Certificate. Students must possess an FAA Class 3 or above Medical Certificate and be at least 17 years old. The course should be taken concurrently with AVIP 1013. Some students may require additional hours of flight instruction beyond the course minimum to pass the course.

Additional fees are associated with this course.

Any AVIP or AVIM 2xxx or above

Bachelor of Science, Tourism and Hospitality Management (Partner)

Bachelor of Science, Tourism & Hospitality Management (Four-Year Plan)

The Bachelor's degree program in Tourism and Hospitality Management integrates a Christ-centered approach into its innovative and comprehensive curriculum, preparing students for successful careers while emphasizing ethical and compassionate service. Through core courses such as Principles of Tourism & Hospitality Management, Hotel & Resort Operations Management, Restaurant Management, Event Management, Tourism & Hospitality Marketing, and a pioneering Religious Tourism course, students not only gain a deep understanding of the industry but also learn to apply Christian values in their professional lives.

The program includes a variety of elective courses and a distinctive 150-hour internship at a tourism and hospitality organization, blending theoretical knowledge with practical experience in real-world settings. This unique combination

ensures that graduates are equipped not only with the necessary skills and knowledge to excel in one of the most vibrant industries but also with a strong ethical foundation rooted in Christian principles, making them adept at creating memorable experiences for guests from a perspective of service and care. This degree is tailored for those passionate about delivering exceptional experiences to guests worldwide, equipping them with the necessary skills and knowledge to excel in one of the most vibrant and rapidly evolving industries.

Total Program: 120 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

BBUS 4113 - BUSINESS ETHICS

This course considers legal, societal and Judeo-Christian principles as applied to ethical business decisions. Discussion of topical areas within all spheres of organizational culture, responsibilities and applied biblical moral thinking.

Prerequisites & Notes

BBUS 2123

Credits: 3

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BBUS 2123 - BUSINESS COMMUNICATION

This course will study effective communication in a professional environment. The course prepares students to create effective letters, reports, electronic and other forms of business writing and presentations.

Prerequisites & Notes

ENGL 1113

Credits: 3

Natural-Scientific Inquiry - Select One with Lab:

NSCI 1044 - NUTRITION SCIENCE

This online course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 4

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

Quantitative Inquiry - Select one:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry- Select Two:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

Major Core - 36 Credit Hours

Business & Organizational Leadership Core - 18 Credit Hours

BBUS 2103 - MACROECONOMICS

This course will cover basic concepts of supply and demand, production possibilities, the circular flow concept and related topics of GDP, inflation, and employment/unemployment, fiscal and monetary policy, and the workings of the monetary system.

*Do not register for this course if you have taken BUSI 2103

Prerequisites & Notes

None

Credits: 3

BBUS 3203 - ESSENTIALS OF MANAGEMENT

This survey course introduces the theories of management and emphasizes the basic management functions of planning, organizing, leading, and controlling organizations. The course emphasizes the functions of management with appropriate quantitative and behavioral concepts and encourages students to develop a set of professional ethics from a Christian world-view.

Prerequisites & Notes

BBUS 2103

Credits: 3

BBUS 1003 - INTRODUCTION TO BUSINESS

This course is an introduction to the key functions of business in the global economy. The course includes an overview of economics, accounting and finance, management, operations, marketing, and business planning. Students will also

develop professional networking skills using social media.

Prerequisites & Notes

None

Credits: 3

BBUS 3143 - PROJECT MANAGEMENT

This course is an introduction to project management and provides an overview of the contents of the Project Management Institute (PMI®) Project Management Body of Knowledge (PMBOK®). The course provides focus on business analysis functions as they relate to the development of information technology solutions that meet specific business needs.

Prerequisites & Notes

BBUS 3203

Credits: 3

BBUS 3153 - INTERNATIONAL BUSINESS

This course presents an analysis of geographic, political, social, economic, legal, and technological influences on international businesses. During the course, students will examine how businesses operate in an international environment composed of different political and cultural traditions and different governmental institutions. They will also study the opportunities and constraints presented by adjusting and accommodating varying national requirements.

Prerequisites & Notes

BBUS 2103

Credits: 3

Leadership Elective - Select One:

LDRS 2123 - LEADERSHIP PRINCIPLES

This course focuses upon the development and challenges of effective leadership by reviewing historical leaders and the development of various leadership theories. This includes leader traits, skills, and behaviors; models; and other approaches to leadership.

Prerequisites & Notes

None

Credits: 3

LDRS 2223 - LEADERSHIP THEORY

This course focuses upon the development and challenges of effective leadership by reviewing influential writings and speeches, along with various leadership theories and philosophies. This includes adaptive, authentic, authoritarian, cross-cultural, democratic, ethical, Great Man Theory, servant, and transformational leadership, along with women in leadership and followership.

Prerequisites & Notes

None

Credits: 3

LDRS 3003 - CROSS-CULTURAL LEADERSHIP

This course introduces students to the challenges and impact of leadership within a cross-cultural framework. It examines cultural values, practices, and patterns of communication that exist within various cultures with an emphasis on cultural intelligence.

Prerequisites & Notes

None

Credits: 3

LDRS 3143 - LEADERSHIP, FOLLOWERSHIP, TEAMWORK

This course investigates effective leadership. It explores the concept of followership. A psychodynamic approach is used to further consider effective teamwork and the leader-follower dynamic.

Prerequisites & Notes

None

Credits: 3

Tourism and Hospitality Management Core - 18 Credit Hours**THMT 3113 - PRINCIPLES OF TOURISM & HOSPITALITY**

This course provides an overview of the global tourism and hospitality industry. An introduction to the history, attributes, and culture of the industry will be examined. Tourism and hospitality career opportunities will be explored.

Prerequisites & Notes

None

Credits: 3

THMT 3003 - RELIGIOUS TOURISM

This course explores the religious tourism segment of the tourism and hospitality industry. Global religious sites, events, festivals, and pilgrimage trips are examined. This course incorporates world religion and history aspects related to religious tourism. Special emphasis is given to the Christianity facet of religious tourism.

Prerequisites & Notes

None

Credits: 3

THMT 3013 - RESTAURANT MANAGEMENT

This course teaches how to plan, develop, budget, and promote restaurant and food service establishments. The functions and responsibilities of food service roles will be analyzed. A restaurant menu, recipes, food costs, and selling prices will be created. Technology in food service will be explored.

Prerequisites & Notes

None

Credits: 3

THMT 3103 - TOURISM & HOSPITALITY MARKETING

This course provides the application of marketing concepts to the tourism and hospitality industry. Special emphasis is placed on marketing planning and strategic marketing. Marketing terminology and practices will be applied to class projects.

Prerequisites & Notes

None

Credits: 3

THMT 3313 - LODGING OPERATIONS MANAGEMENT

This course provides a comprehensive analysis of applied theories, principles, and techniques in the management of hotels and resort properties. Hotel management and hourly roles will be studied. Hotel revenue formulas will be reviewed. Special emphasis provided to hotel terminology.

Prerequisites & Notes

None

Credits: 3

THMT 3323 - EVENT MANAGEMENT

This course teaches how to plan, develop, budget, promote, deliver, and evaluate meetings or special events in the hospitality industry.

Prerequisites & Notes

None

Credits: 3

Divine Design (Major Specific Experiential Learning) - 3 Credit Hours

THMT 4903 - TOURISM & HOSPITALITY INTERNSHIP

This course is a supervised, structured work experience designed to augment and develop practical experience in conjunction with regular coursework. Participants are strongly encouraged to utilize this option to explore potential career paths. Students will work a minimum of 150 hours.

Prerequisites & Notes

Approval from Program Coordinator of the Tourism and Hospitality Management Program. Typically, Junior standing

and at least a 2.5 cumulative GPA.

Credits: 3

Divine Design - 47 Credit Hours

To meet the Divine Design requirement, student may earn credit hours in general elective courses, declare minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hour), PRAC 1003 (3 credit hour), PRAC 1004 (4 credit hour), and PMIN 2303 (3 credit hour) up to a total of 24 credit hours. General Electives are any college-level courses that do not satisfy the above program requirements. Student must complete the above program requirements, with remaining credit hours earned in Divine Design to meet the total program hours.

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

AND

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

AVIP 1013 - PRIVATE PILOT GROUND SCHOOL

This course provides instruction in preparation for initial flight training and the Federal Aviation Administration's (FAA) Private Pilot Airplane Knowledge Test. Topics include the basic aerodynamics, airplane systems and instruments, weight and balance, aircraft performance, meteorology, flight physiology, basic navigation techniques, radio navigation and communication, the Air Traffic Control and airspace system, and FAA Regulations. Credit may be granted for passing the FAA Private Pilot Airplane Knowledge Test with a mandatory minimum passing score of 70%. The course should be taken concurrently with flight lessons or AVIP 1023. Additional fees are associated with this course.

Prerequisites & Notes

None

Credits: 3

AVIP 1011 - PRIVATE PILOT FLIGHT TRAINING I

This course introduces students to airplane ground and flight operations, take-off and landing, basic flight maneuvers, cross-country methods, night flying, and emergency procedures. The course also includes flight instruction in single-engine aircraft and simulators. This course prepares students for the required FAA Private Pilot Airplane Practical Test. Credit may be granted for students presenting a valid FAA Private Pilot Certificate. Students must possess an FAA Class 3 or above Medical Certificate and be at least 17 years old. The course should be taken concurrently with AVIP 1013. Some students may require additional hours of flight instruction beyond the course minimum to pass the course.

Additional fees are associated with this course.

Credits: 1

AVIM 1003 - INTRODUCTION TO AVIATION TRANSPORTATION

This course introduces students to the aviation industry, its history, available career paths, major challenges, key private and governmental agencies, and the introductory skills and knowledge necessary to succeed within the industry.

Prerequisites & Notes

None

Credits: 3

SPRING SEMESTER - 16 CREDIT HOURS

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

BUSI 2113 - BUSINESS COMMUNICATIONS I

This course will study effective communication in a business environment. The course includes the preparation of letters, reports, and other forms of business writing on the computer.

Prerequisites & Notes

ENGL 1233

Credits: 3

OR

BBUS 2123 - BUSINESS COMMUNICATION

This course will study effective communication in a professional environment. The course prepares students to create effective letters, reports, electronic and other forms of business writing and presentations.

Prerequisites & Notes

ENGL 1113

Credits: 3

AVIP 1022 - PRIVATE PILOT FLIGHT TRAINING II

This course is a continuation of AVIP 1011. It introduces students to airplane ground and flight operations, take-off and landing, basic flight maneuvers, cross-country methods, night flying, and emergency procedures. The course also includes flight instruction in single-engine aircraft and simulators. This course prepares students for the required FAA Private Pilot Airplane Practical Test. Credit may be granted for students presenting a valid FAA Private Pilot Certificate. Students must possess an FAA Class 3 or above Medical Certificate and be at least 17 years old. The course should be taken concurrently with AVIP 1013. Some students may require additional hours of flight instruction beyond the course minimum to pass the course.

Additional fees are associated with this course.

Credits: 2

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Quantitative Inquiry - Select one:

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Year Two

FALL SEMESTER - 15 CREDIT HOURS

AVIP 2013 - INSTRUMENT RATING GROUND SCHOOL

This course provides instruction in preparation instrument flight training and the Federal Aviation Administration's (FAA) Instrument Rating Airplane Knowledge Test. Topics include aircraft flight instruments, flight physiology, Instrument Flight Rules (IFR) aircraft operations and procedures, aircraft performance, weather, IFR planning and regulations. Advanced instruction in aviation weather, radio navigation and charts including procedures for departures en route, arrival and approaches. The course should be taken concurrently with instrument flight lessons or AVIP 2023. Credit may be granted for passing the FAA Instrument Rating Knowledge Test.

Additional fees are associated with this course.

Prerequisites & Notes

Private Pilot's License or AVIP 1013

Credits: 3

AVIP 2023 - INSTRUMENT FLIGHT TRAINING

This course introduces students to airplane ground, flight operations and maneuvers associated with flying by instrument flight rules. This includes departure, en route, arrival, approaches, and landing in actual or simulated instrument meteorological conditions. Includes flight instruction in single-engine aircraft and simulators with emphasis on safety, operations, navigation systems and charts, various weather conditions, flight planning procedures, decision making, and cockpit resource management. Prepares students for the required FAA Instrument-Airplane Rating Practical Test. Credit may be granted for presenting a valid FAA Instrument-Airplane Rating. The course should be taken concurrently with AVIP 2013. Some students may require additional hours of flight instruction beyond the course minimum to pass the course.

Additional fees are associated with this course.

Prerequisites & Notes

Private Pilot Certificate or AVIP 1023

Credits: 3

Socio-Historical Inquiry - Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Natural-Scientific Inquiry - Select One with Lab:

AVIM 1014 - AVIATION WEATHER ENVIRONMENT W/LAB

This course explores the physical properties of the atmosphere and how they affect the weather, with an emphasis on the factors affecting aviation. The course includes lab components including collecting and interpreting weather and climate data that impact the aviation and human environment.

Prerequisites & Notes

None

Credits: 4

Divine Design Elective (2 Credits)

SPRING SEMESTER - 15 CREDIT HOURS**BBUS 4113 - BUSINESS ETHICS**

This course considers legal, societal and Judeo-Christian principles as applied to ethical business decisions. Discussion of topical areas within all spheres of organizational culture, responsibilities and applied biblical moral thinking.

Prerequisites & Notes

BBUS 2123

Credits: 3

AVIP 3013 - COMMERCIAL PILOT GROUND SCHOOL

This course provides instruction in preparation for initial flight training and the Federal Aviation Administration's (FAA) Commercial Pilot Airplane Knowledge Test. Topics include the advanced aerodynamics, complex airplane systems, and instruments, weight and balance for heavier aircraft, complex aircraft performance. Includes advanced meteorology, flight physiology for high altitude flight, advanced navigation techniques, radio navigation and communication, airspace systems, and FAA Regulations for commercial flight. Credit may be granted for passing the FAA Commercial Pilot Airplane Knowledge Test with a mandatory minimum passing score of 70%. The course should be taken concurrently with flight lessons or AVIP 3023.

Additional fees are associated with this course.

Prerequisites & Notes

NULL

Credits: 3

AVIP 3023 - COMMERCIAL PILOT FLIGHT I FLIGHT TRAINING

This course introduces students to airplane ground and flight operations, take-off and landing, advanced flight maneuvers, cross-country methods, night flying, and emergency procedures appropriate for a commercial pilot. Includes flight instruction in single-engine basic and complex aircraft and simulators. Prepares students for the required FAA Commercial Pilot Airplane Practical Test. Credit may be granted for presenting a valid FAA Commercial Pilot Certificate. Students must possess an FAA Class 2 or above Medical Certificate and be at least 17 years old. The course should be taken concurrently with AVIP 3013. Some students may require additional hours of flight instruction beyond the course minimum to pass the course.

Additional fees are associated with this course.

Prerequisites & Notes

Private Pilot Certificate or AVIP 1023

Credits: 3

Socio-Historical Inquiry - Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

AVIP Elective - Select One:

AVIP 1001 - INTRODUCTION TO FLIGHT

The course introduces students to flight operations and is appropriate for students interesting in a career in aviation and is recommended prior to enrolling in AVIP 1023. Topics include basic aerodynamics, flight controls, pre-flight inspection, and basic maneuvers. Students log time in a flight simulator and up to 3 hours of dual instruction in a single-engine aircraft. These hours may be applied toward a Private Pilot Certificate under FAA Part 61 rules.

Additional fees are associated with this course.

Prerequisites & Notes

NULL

Credits: 1

AVIM 1101 - INTRODUCTION TO UAS OPERATIONS,POLICY, AND REGULATIONS

This course will introduce basic small Unmanned Aircraft Systems (UAS) operations and policy governing UAS operations found in Title 14 of the Code of Federal Regulations (14 CFR) Part 107, Small Unmanned Aircraft Systems. Federal regulations will be discussed including the proper requirements needed to legally and safely operate UASs in the National Airspace System. The purpose of the course is for students to master the knowledge to pass the UAS Part 107 knowledge exam.

Prerequisites & Notes

None

Credits: 1

AVIP 4011 - ADVANCED GROUND INSTRUCTOR

The course prepares students to take the FAA Advanced Ground Instructor Knowledge Exam. Topics include aerodynamics, aircraft performance, aircraft instruments and systems, Airspace, ATC procedures, weather, navigation, regulations and aeronautical decision making.

Additional fees are associated with this course.

Prerequisites & Notes

NULL

Credits: 1

AVIP 4021 - INSTRUMENT GROUND INSTRUCTOR

The course prepares students to take the FAA Instrument Ground Instructor Knowledge Exam. Topics include aircraft performance, aircraft instruments and systems, airspace, ATC communication, instrument procedures, weather, IFR navigation, regulations, and aeronautical decision making.

Additional fees are associated with this course.

Prerequisites & Notes

NULL

Credits: 1

AVIP 4031 - CERTIFIED FLIGHT INSTRUCTOR-INSTRUMENT FLIGHT TRAINING

This course provides instruction in the basic and advanced aeronautical knowledge and piloting skills appropriate for a Certified Flight Instructor-Instructor Rating for the category and class of aircraft for which the student seeks. The course also provides provide flight instruction experiences. Credit may be granted for presenting a valid FAA Certified Flight Instructor Instrument Certificate. Students must possess an FAA Class 2 or above Medical Certificate and be at least 18 years old. Some students may require additional hours of instruction beyond the course minimum to pass the course.

Additional fees are associated with this course.

Prerequisites & Notes

CFI Certificate or AVIP 4022 and permission

Credits: 1

AVIP 4041 - MULTI-ENGINE RATING FLIGHT TRAINING

This course provides instruction in the basic and advanced aeronautical knowledge and piloting skills appropriate for a Certified Flight Instructor-Multi-Engine Certificate for the category and class of aircraft for which the student seeks. The course also provides provide flight instruction experiences. Credit may be granted for presenting a valid FAA Certified Flight Instructor Multi-Engine Certificate. Students must possess an FAA Class 2 or above Medical Certificate and be at least 18 years old. Some students may require additional hours of instruction beyond the course minimum to pass the course.

Additional fees are associated with this course.

Prerequisites & Notes

Commercial Pilot Certificate or permission

Credits: 1

Year Three

FALL SEMESTER - 15 CREDIT HOURS

AVIP 3033 - COMMERCIAL PILOT FLIGHT II FLIGHT TRAINING

This course continues student training and experience in airplane ground and flight operations, take-off and landing, advanced flight maneuvers, cross-country methods, night flying, and emergency procedures appropriate for a commercial pilot. Includes flight instruction in single-engine basic and complex aircraft and simulators in final preparation for the required FAA Commercial Pilot Airplane Practical Test. Credit may be granted for presenting a valid FAA Commercial Pilot Certificate. Students must possess an FAA Class 2 or above Medical Certificate and be at

least 17 years old. Some students may require additional hours of flight instruction beyond the course minimum to pass the course.

Additional fees are associated with this course.

Prerequisites & Notes

AVIP 3023

Credits: 3

AVIM 2003 - HUMAN FACTORS AND RESOURCE MANAGEMENT

This course explores concepts of Crew Resource Management (CRM). Covers crew coordination, communication, and resource management in professional aviation. Subjects include the history of CRM, skills, psychological, and behavior markers associated with CRM, human error in aviation, and automation. Provides a general knowledge of team critical skills within the aviation industry.

Prerequisites & Notes

None

Credits: 3

AVIM 2013 - AERODYNAMICS & AIRCRAFTS SYSTEMS

This course explores aerodynamics and aircraft systems that enable safe flight in a variety of configurations and environments. Emphases are on the forces that impact flight including lift, weight, thrust, and drag and the aircraft controls, propulsion and systems associated with flight.

Prerequisites & Notes

None

Credits: 3

AVIM 3003 - US & GLOBAL AVIATION OPERATIONS

This course explores aviation and airline operations in the United States and globally. Attention is given to the Air Traffic Control (ATC) and airspace system for general and corporate aviation, commercial air carriers, and ground and air traffic operations. Other topics include business models and economic factors, aircraft acquisition, supply chain logistics, and operations.

Prerequisites & Notes

None

Credits: 3

Divine Design Electives (3 Credits)

SPRING SEMESTER - 15 CREDIT HOURS

AVIP 4013 - CERTIFIED FLIGHT INSTRUCTOR GROUND SCHOOL

This course provides instruction in preparation for initial flight training and the Fundamentals of Instructing (FOI) Federal Aviation Administration's (FAA) and Flight Instructor Knowledge Tests. Topics include the fundamentals of flight instruction and learning, lesson planning, resource management, communication, regulations, and professionalism. Credit may be granted for passing the FAA FOI Knowledge Test, or equivalent, and Flight Instructor Knowledge Test with a mandatory minimum passing score of 70%.

Additional fees are associated with this course.

Prerequisites & Notes

Commercial Pilot Certificate or AVIP 3023

Credits: 3

AVIP 4022 - CERT FLIGHT INSTRUCTOR FLIGHT TRAIN

This course provides instruction in the basic and advanced aeronautical knowledge and piloting skills appropriate for a Certified Flight Instructor for the category and class of aircraft for which the student seeks. Students explain, demonstrate, and analyze flight maneuvers and resource management skills involved with Private Pilot, Commercial Pilot, and Flight Instructor Certificates. For fixed-wing aircraft includes spins and spin recovery. Credit may be granted for presenting a valid FAA Certified Flight Instructor Certificate. Students must possess an FAA Class 2 or above Medical Certificate and be at least 18 years old. The course should be taken concurrently with AVIS 4013. Some students may require additional hours of instruction beyond the course minimum to pass the course.

Additional fees are associated with this course.

Prerequisites & Notes

By permission only

Credits: 2

AVIM 3203 - AVIATION SAFETY & MANAGEMENT

This course examines general management principles with an emphasis on leadership, safety and accident prevention. Topics include aviation security, Safety Management Systems (SMS), aircraft accidents and investigations, and emergency services.

Prerequisites & Notes

None

Credits: 3

AVIM 3403 - AVIATION REGULATIONS & LAW

This course provides an overview of constitutional law, administrative law, international law, and enforcement actions affecting aviation. While the courses emphasized the regulations impacting private and commercial air operations, consideration is given to aviation business law, the analysis of the aviation regulatory environments and processes, rulemaking, and legislation.

Prerequisites & Notes

None

Credits: 3

AVIM 4141 - AVIATION MANAGEMENT CAPSTONE

This course is the capstone course for the major requirements and provides students the opportunity to synthesize and apply their learning in a simulated or real workplace context. Students develop a written reflection and portfolio of evidence of their readiness to enter the workforce in the aviation industry.

Additional fees are associated with this course.

Prerequisites & Notes

None

Credits: 1

Divine Design Electives (3 Credits)

Year Four

FALL SEMESTER - 15 CREDIT HOURS

Experiential Elective - Select One:

AVIM 4013 - AVIATION PRACTICUM I

This course is an integrative learning experience, where the university partners with an organization to create experiential training in the aviation field. Practicum I provides students service learning opportunities which can include building flight hours or aviation management and operations. Special attention is given to the development of the student's vocational interests and divine design. Completion of this course is equivalent to 120 hours of service-learning engagement in addition to the completion of reflection assignments.

Prerequisites & Notes

None

Credits: 3

AVIM 4003 - REGIONAL AIRLINE TRANSITION

This course replicates the initial training one can expect after being hired as a pilot for a regional air carrier. The course covers company indoctrination, policies, procedures for flight crews, airline regulations and aircraft systems. Emphasis is on mastering crew resource management, air carrier manual systems, safety management systems, general and emergency operating procedures, and aircraft systems prior to training in a full motion simulator. Students must apply for this course and be approved by the sponsoring regional airline.

Prerequisites & Notes

By Permission

Credits: 3

AVIP/AVIM Elective - Select One:

AVIP 1001 - INTRODUCTION TO FLIGHT

The course introduces students to flight operations and is appropriate for students interesting in a career in aviation and is recommended prior to enrolling in AVIP 1023. Topics include basic aerodynamics, flight controls, pre-flight inspection, and basic maneuvers. Students log time in a flight simulator and up to 3 hours of dual instruction in a single-engine aircraft. These hours may be applied toward a Private Pilot Certificate under FAA Part 61 rules.

Additional fees are associated with this course.

Prerequisites & Notes

NULL

Credits: 1

AVIM 1101 - INTRODUCTION TO UAS OPERATIONS,POLICY, AND REGULATIONS

This course will introduce basic small Unmanned Aircraft Systems (UAS) operations and policy governing UAS operations found in Title 14 of the Code of Federal Regulations (14 CFR) Part 107, Small Unmanned Aircraft Systems. Federal regulations will be discussed including the proper requirements needed to legally and safely operate UASs in the National Airspace System. The purpose of the course is for students to master the knowledge to pass the UAS Part 107 knowledge exam.

Prerequisites & Notes

None

Credits: 1

AVIP 4011 - ADVANCED GROUND INSTRUCTOR

The course prepares students to take the FAA Advanced Ground Instructor Knowledge Exam. Topics include aerodynamics, aircraft performance, aircraft instruments and systems, Airspace, ATC procedures, weather, navigation, regulations and aeronautical decision making.

Additional fees are associated with this course.

Prerequisites & Notes

NULL

Credits: 1

AVIP 4021 - INSTRUMENT GROUND INSTRUCTOR

The course prepares students to take the FAA Instrument Ground Instructor Knowledge Exam. Topics include aircraft performance, aircraft instruments and systems, airspace, ATC communication, instrument procedures, weather, IFR navigation, regulations, and aeronautical decision making.

Additional fees are associated with this course.

Prerequisites & Notes

NULL

Credits: 1

AVIP 4031 - CERTIFIED FLIGHT INSTRUCTOR-INSTRUMENT FLIGHT TRAINING

This course provides instruction in the basic and advanced aeronautical knowledge and piloting skills appropriate for a Certified Flight Instructor-Instructor Rating for the category and class of aircraft for which the student seeks. The course also provides flight instruction experiences. Credit may be granted for presenting a valid FAA Certified Flight Instructor Instrument Certificate. Students must possess an FAA Class 2 or above Medical Certificate and be at least 18 years old. Some students may require additional hours of instruction beyond the course minimum to pass the course.

Additional fees are associated with this course.

Prerequisites & Notes

CFI Certificate or AVIP 4022 and permission

Credits: 1

AVIP 4041 - MULTI-ENGINE RATING FLIGHT TRAINING

This course provides instruction in the basic and advanced aeronautical knowledge and piloting skills appropriate for a Certified Flight Instructor-Multi-Engine Certificate for the category and class of aircraft for which the student seeks. The course also provides flight instruction experiences. Credit may be granted for presenting a valid FAA Certified Flight Instructor Multi-Engine Certificate. Students must possess an FAA Class 2 or above Medical Certificate and be at least 18 years old. Some students may require additional hours of instruction beyond the course minimum to pass the course.

Additional fees are associated with this course.

Divine Design Electives (15 Credits)

College of Social Sciences and Humanities

Mission Statement

The mission of the Psychology faculty at Southeastern University is to provide students with information regarding psychological processes, theories, skills, and research methods that equips them to process and understand human behavior and to share that understanding in the professional arenas in which they may serve. We are committed to establishing and maintaining an educational environment and learning experiences that integrate both faith and knowledge with the intended outcome that enables students to think critically, act compassionately, and serve consistently as they fulfill the call of God in both their personal and professional lives.

Minor, Psychology

Program Description:

The Minor in Psychology provides students with a foundation in psychological concepts and skills related to human functioning.

Total Credits - 18 Credit Hours

Required Courses - 12 Credit Hours

PSYC 2133 - THEORIES OF PERSONALITY

This course is an introduction to the study of personality formation. Major personality themes are critically examined. Students are introduced to the application of these theories in counseling and the treatment of mental illness.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

PSYC 2233 - MARRIAGE AND FAMILY

This course is a study of the major issues related to courtship, marriage, and family formation. Special attention is given to the social conditions influencing courtship, marriage, divorce, and family life. Topics include dating rituals, gender differences, expectations, parenting, family dysfunction, family violence, and strategies for sound relating. The role of family counselors and therapists is also discussed.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

PSYC 3003 - ABNORMAL PSYCHOLOGY

This course is a study of the nature, causes, and treatment of abnormal behavior, including personality disorders, neuroses, psychoses, stress reactions, and other dysfunctions. Elements contributing to mental health and well-integrated personality are also considered.

Prerequisites & Notes

PSYC 1133 or PSYC 1233 , PSYC 2133

Credits: 3

Psychology Electives (select two) - 6 Credit Hours

Select two PSYC 2xxx level or higher courses not already taken.

Bachelor of Science, Psychology & Criminal Justice

Bachelor of Science, Psychology and Criminal Justice 4-Year Plan

Program Description:

The Bachelor of Science in Psychology and Criminal Justice covers the main content areas and skills recommended by the American Psychological Association for undergraduate programs, as well as the curriculum and practical experiences needed for the administration of justice in a diverse and global society. Students who achieve the program objectives will be able to apply their knowledge of human cognitive, emotional, and behavioral processes to a variety of careers that involve working with people. They will possess a thorough understanding of criminal justice systems and theories, and the various agencies, personnel roles, and career opportunities available in the criminal justice field. This program also provides the required competencies for students who wish to pursue graduate studies in psychology, counseling, criminal justice, and related fields.

Program Objectives:

1. Students will demonstrate competency in scientific reasoning and psychological research methods.
2. Students will demonstrate a working knowledge of psychology's key concepts and content domains.
3. Students will describe how they integrate their Christian faith and ethics with their general understanding of psychology.
4. Students will demonstrate qualities of professionalism and preparedness for a career.
5. Students will apply multicultural and cross-cultural knowledge and values to personal and professional development.
6. Criminal Justice majors will discuss the history and development of the criminal justice system and gain exposure to system professionals.
7. Criminal Justice majors will identify the relationship and interaction between the various criminal justice system components.
8. Criminal Justice majors will compare and contrast criminological theories, which attempt to explain the causes of crime.
9. Criminal Justice majors will conduct criminological research, interpret the results, and present the final information.
10. Criminal Justice majors will exhibit professional characteristics, attitudes, and competencies throughout the duration of the major.

Total Program Hours- 120 Credit Hours

Foundational Core- 34 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation- 9 credits

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credits

Discursive Inquiry- 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry- 4 Credit Hours

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

Quantitative Inquiry- 3 Credit Hours

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

Socio-Historical Inquiry-6 Credit Hours

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

Select One of the Following:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry- 3 Credit Hours

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 66 Credit Hours

Psychology- 30 Credit Hours

PSYC 2003 - COMMUNICATION AND CAREERS IN PSYCHOLOGY

This course is an introduction to communication in the field of psychology. Students will develop skills in information literacy, comprehension of peer-reviewed literature, synthesis of information, and use of proper APA standards. Students will also develop their verbal presentation skills. Additionally, students will be introduced to the different career opportunities at both baccalaureate and graduate-degree levels as well as requirements and skills required for admissions into graduate school.

Prerequisites & Notes

PSYC 1133

Credits: 3

PSYC 2023 - STATISTICAL METHODS

This course studies the application of statistical methods to existing data. Topics include organizing and presenting data, descriptive and inferential measures, and interpreting statistical information. Emphasis will be on sampling, probability, hypothesis testing, and appropriate application of statistical tests.

Prerequisites & Notes

Prerequisite: MATH 1213

Corequisite: PSYC 2013

Credits: 3

PSYC 2133 - THEORIES OF PERSONALITY

This course is an introduction to the study of personality formation. Major personality themes are critically examined. Students are introduced to the application of these theories in counseling and the treatment of mental illness.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

PSYC 3003 - ABNORMAL PSYCHOLOGY

This course is a study of the nature, causes, and treatment of abnormal behavior, including personality disorders, neuroses, psychoses, stress reactions, and other dysfunctions. Elements contributing to mental health and well-integrated personality are also considered.

Prerequisites & Notes

PSYC 1133 or PSYC 1233 , PSYC 2133

Credits: 3

PSYC 3023 - CULTURAL PSYCHOLOGY

This course provides students with an introduction to multicultural and cross-cultural psychology including its theories, research, and exploration of intercultural knowledge. The course examines the dynamics of cultural relevance related to psychological processes, abnormality, and treatment. The course implements exercises of self-awareness and engagement within other cultures.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 3733 - SOCIAL PSYCHOLOGY

This course is a survey of theories of interpersonal behavior and group dynamics emphasizing the influence of groups and group membership upon individual behavior. Topics include aggression, attitudes, attribution, conformity, altruism, communication, propaganda, morale, and other aspects of interpersonal relationships.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 4033 - PHYSIOLOGICAL PSYCHOLOGY

This course is a study of the physiological components of behavior. Topics include structure and function of the nervous system; theory of brain functions; and current problems, theories, and techniques in physiological psychology.

Prerequisites & Notes

PSYC 1133 or PSYC 1233; PSYC 2133; BIOL 1333, BIOL 133L

Credits: 3

PSYC 4083 - LEARNING AND COGNITION

This course is an introduction to the psychological study of learning and cognition. Topics examined will include classical conditioning, operant conditioning, observational learning, perception, attention, and memory. Traditional views as well as current trends will be discussed.

Prerequisites & Notes

PSYC 2133

Credits: 3

Criminal Justice- 30 Credit Hours**CRIM 2203 - CRIMINAL JUSTICE SYSTEM**

This course covers the origin, evolution, and daily operation of the criminal justice system in the United States. Relationships between law enforcement, the court system, and corrections are studied.

Prerequisites & Notes

NULL

Credits: 3

CRIM 2523 - VICTIMOLOGY

This course introduces the field of victimology and examines the relationships between the victim and the offender, the victim and society, and the victim within the criminal justice system. Theoretical explanations for victimization, along with the evolution of the victims' rights movement are studied. Policies and procedures that have resulted from increased attention towards victims of crime will be reviewed and discussed as they pertain to practical application.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3203 - SOCIOLOGY OF POLICING

This course will cover the history, evolution and structure of policing in the United States. Popular innovations in policing and law enforcement will be emphasized. Special attention to conflicts and imperatives which define police officers' roles and the character of police work will be discussed along with careers and hiring practices by law enforcement agencies.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3303 - JUVENILE DELINQUENCY

This course covers the types of delinquency as well as supporting theories. Particular attention will be given to the role of family, school, and the peer group in promoting delinquency. The effects of social institutions on delinquency, prevention, and control are also studied. The juvenile justice system is compared to the adult system and the social consequences of delinquency are studied. This course will provide students with the tools to analyze and evaluate juvenile justice policies and programs.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3403 - AMERICAN CRIMINAL COURTS

This course examines the court system in the United States and provides an introduction to the many elements of the judicial process. Major topics include: the role of the courts, trial procedures, role of decision makers in the court system, the distinctions between civil and criminal systems, the alternatives available to the accused prior to trial proceedings, and public policy as it relates to the court system.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3503 - ETHICS IN CRIMINAL JUSTICE

This course is an examination of the historical and philosophical background of the field of ethics, specifically professional ethics in the criminal justice system. The curriculum includes an examination of ethical theories and the relationship and ethical dilemmas faced by professionals within the criminal justice system.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3603 - CORRECTIONS AND PUNISHMENT

This course is an introduction to the corrections system in the United States and will provide an overview of the history, current institutional practices, policies, and legal issues. There is an emphasis on contemporary conditions and alternatives to traditional responses to crime and an exploration of the principles and practices of correctional options

afforded to offenders in various types of settings. Topics covered include incarceration, deterrence, rehabilitation, retribution, and system reform.

Prerequisites & Notes

CRIM 2203

Credits: 3

CRIM 4203 - THEORY AND CRIMINAL JUSTICE

This course provides an analysis of how crime affects society. Prevention and control of criminal behavior are based on theoretical models. Several of these models are examined as they relate to the day-to-day functions of the police, courts, and corrections.

Prerequisites & Notes

CRIM 2203

Credits: 3

CRIM 4303 - CRIMINAL JUSTICE SENIOR SEMINAR

This course is designed as the capstone learning experience for all Criminal Justice majors. The course will integrate activities into a comprehensive understanding of the integrative nature of the criminal justice system. Emphasis is on policy evaluation, career options, and member training for a criminal justice agency.

Prerequisites & Notes

Prerequisite: CRIM 3603

Credits: 3

CRIM 4403 - CRIMINAL LAW

This course examines the core philosophies of criminal law, including both substantive and procedural elements. There is an emphasis on the theoretical foundations and principles of criminal law, state and federal criminal statutes, and court decisions. Discussions will also focus on the various criminal defenses.

Prerequisites & Notes

Prerequisite: None

Credits: 3

Psychology & Criminal Justice Electives- 6 Credits

Select 1 of the following:

PSYC 2013 - RESEARCH METHODS IN PSYCHOLOGY

This course addresses the application of various research methods of inquiry in application to theory and practice for the purpose of knowledge building and the development of best practice. Emphasis is on developing general research skills that can be applied within any area of psychology. The content of this course includes research design,

quantitative and qualitative research methodologies, systematic evaluation of practice, and evaluation of theory. The focus is on the development of research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

Prerequisite: PSYC 2003

Corequisite: PSYC 2023

Credits: 3

CRIM 3223 - RESEARCH IN CRIMINAL JUSTICE

This course is an examination of the fundamental research methods in the field of criminal justice. This includes: the development of research questions and research design, methods of data collection, data analysis, and reporting results.

Prerequisites & Notes

Prerequisite: None

Credits: 3

Select 1 of the following:

POLS 2403 - UNITED STATES CONSTITUTION

A study of the legal culture in the United States, including the British common law system, the origin of the U.S. Constitution, the amendments, and the landmark cases.

Prerequisites & Notes

NULL

Credits: 3

POLS 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

Divine Design - 20 Credits

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Bachelor of Science, Criminal Justice

Bachelor of Science, Criminal Justice (Four-Year Plan)

Program Description:

The Bachelor of Science Degree in Criminal Justice provides curriculum and practical experiences designed to help develop students and practitioners with critical and analytical skills to promote the administration of justice in a diverse and global society. This program equips students with a thorough understanding of criminal justice systems and theories, and the historical foundation of criminal justice. The undergraduate curriculum is designed to allow students to explore the various agencies, personnel roles, and career opportunities available in the criminal justice field. The program seeks to educate students as well as promote workforce development by targeting practitioners currently working in the criminal justice field. Students who major in criminal justice have many opportunities to further their personal and professional development.

Program Objectives:

1. Criminal Justice majors will discuss the history and development of the criminal justice system and gain exposure to system professionals.
2. Criminal Justice majors will identify the relationship and interaction between the various criminal justice system components.
3. Criminal Justice majors will compare and contrast criminological theories, which attempt to explain the causes of crime.
4. Criminal Justice majors will conduct criminological research, interpret the results, and present the final information.
5. Criminal Justice majors will exhibit professional characteristics, attitudes, and competencies throughout the duration of the major.

Total Program Hours- 120 Credit Hours

Foundational Core- 34 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation- 9 credits

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credits

Discursive Inquiry (6 credits)

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry (6 credits) Select Two:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders,

and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 39 Credits

CRIM 2203 - CRIMINAL JUSTICE SYSTEM

This course covers the origin, evolution, and daily operation of the criminal justice system in the United States. Relationships between law enforcement, the court system, and corrections are studied.

Prerequisites & Notes

NULL

Credits: 3

CRIM 2523 - VICTIMOLOGY

This course introduces the field of victimology and examines the relationships between the victim and the offender, the victim and society, and the victim within the criminal justice system. Theoretical explanations for victimization, along with the evolution of the victims' rights movement are studied. Policies and procedures that have resulted from increased attention towards victims of crime will be reviewed and discussed as they pertain to practical application.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3203 - SOCIOLOGY OF POLICING

This course will cover the history, evolution and structure of policing in the United States. Popular innovations in policing and law enforcement will be emphasized. Special attention to conflicts and imperatives which define police officers' roles and the character of police work will be discussed along with careers and hiring practices by law enforcement agencies.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3223 - RESEARCH IN CRIMINAL JUSTICE

This course is an examination of the fundamental research methods in the field of criminal justice. This includes: the development of research questions and research design, methods of data collection, data analysis, and reporting results.

Prerequisites & Notes

Prerequisite: None

Credits: 3

CRIM 3303 - JUVENILE DELINQUENCY

This course covers the types of delinquency as well as supporting theories. Particular attention will be given to the role of family, school, and the peer group in promoting delinquency. The effects of social institutions on delinquency, prevention, and control are also studied. The juvenile justice system is compared to the adult system and the social consequences of delinquency are studied. This course will provide students with the tools to analyze and evaluate juvenile justice policies and programs.

Prerequisites & Notes

Prerequisite: CRIM 2203

This course examines the court system in the United States and provides an introduction to the many elements of the judicial process. Major topics include: the role of the courts, trial procedures, role of decision makers in the court system, the distinctions between civil and criminal systems, the alternatives available to the accused prior to trial proceedings, and public policy as it relates to the court system.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3503 - ETHICS IN CRIMINAL JUSTICE

This course is an examination of the historical and philosophical background of the field of ethics, specifically professional ethics in the criminal justice system. The curriculum includes an examination of ethical theories and the relationship and ethical dilemmas faced by professionals within the criminal justice system.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3603 - CORRECTIONS AND PUNISHMENT

This course is an introduction to the corrections system in the United States and will provide an overview of the history, current institutional practices, policies, and legal issues. There is an emphasis on contemporary conditions and alternatives to traditional responses to crime and an exploration of the principles and practices of correctional options afforded to offenders in various types of settings. Topics covered include incarceration, deterrence, rehabilitation, retribution, and system reform.

Prerequisites & Notes

CRIM 2203

Credits: 3

CRIM 4203 - THEORY AND CRIMINAL JUSTICE

This course provides an analysis of how crime affects society. Prevention and control of criminal behavior are based on theoretical models. Several of these models are examined as they relate to the day-to-day functions of the police, courts, and corrections.

Prerequisites & Notes

CRIM 2203

Credits: 3

CRIM 4303 - CRIMINAL JUSTICE SENIOR SEMINAR

This course is designed as the capstone learning experience for all Criminal Justice majors. The course will integrate activities into a comprehensive understanding of the integrative nature of the criminal justice system. Emphasis is on policy evaluation, career options, and member training for a criminal justice agency.

Prerequisites & Notes

Prerequisite: CRIM 3603

Credits: 3

CRIM 4403 - CRIMINAL LAW

This course examines the core philosophies of criminal law, including both substantive and procedural elements. There is an emphasis on the theoretical foundations and principles of criminal law, state and federal criminal statutes, and court decisions. Discussions will also focus on the various criminal defenses.

Prerequisites & Notes

Prerequisite: None

Credits: 3

Select one of the following:

POLS 2403 - UNITED STATES CONSTITUTION

A study of the legal culture in the United States, including the British common law system, the origin of the U.S. Constitution, the amendments, and the landmark cases.

Prerequisites & Notes

NULL

Credits: 3

POLS 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

Criminal Justice Elective- Select one of the following:

CRIM 2003 - CRIMINAL JUSTICE AND THE CHRISTIAN

This course will cover topics that pertain to both the fields of Criminal Justice and Christian Theology, requiring students to examine crime and punishment through the eyes of Jesus Christ. Topics will be predicated on current events, new developments, and the interests of criminal justice majors and professionals.

Prerequisites & Notes

NULL

Credits: 3

CRIM 2223 - INTRO TO CRIME SCENE INVESTIGATION

This course provides an overview of crime scene response. Students will have the opportunity to perform hands-on exercises utilizing techniques performed by crime scene investigators to include sketching and photographing crime scenes, writing reports, collecting and packaging evidence, processing scenes and evidence for latent prints, and courtroom testimony. Advanced crime scene processing techniques will also be demonstrated.

Prerequisites & Notes

NULL

Credits: 3

CRIM 2503 - HOMICIDE INVESTIGATION

This course will cover investigating a homicide, the major law enforcement officers involved in the investigation, and the basics of preparing the case for trial.

Prerequisites & Notes

NULL

Credits: 3

CRIM 2703 - INTRODUCTION TO FORENSIC SCIENCE

This course is an overview of the application of forensic science and how it applies to the criminal justice system. This course is designed to provide students with an understanding of the techniques and abilities of forensic science with regard to investigative and criminalistic activities. When taken with its accompanying lab, this course meets the science (with lab) general education requirement. This course also meets the specialized needs of the Criminal Justice program.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3343 - CRIMINAL JUSTICE ADMINISTRATION

This course provides students with an overview of public administration within the criminal justice field. The organization, financing, and management functions within the local, state, and federal criminal justice systems are examined. Criminal justice policies and administrative practices are evaluated and compared to the academic theories of public administration.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3803 - CRITICAL ISSUES IN CRIMINAL JUSTICE

This course is a study of current issues and debates that affect the criminal justice system. The curriculum includes an examination and discussion on all aspects and viewpoints of the critical issues faced by professionals within the criminal justice system. Topics for discussion include but are not limited to: public policy implications, media's involvement in the criminal justice system, diversity, workforce generations, criminal justice training, terrorism, shift in types of crime and prevention, and public perceptions of criminal justice professionals.

Prerequisites & Notes

CRIM 2203

Credits: 3

CRIM 4903 - CRIMINAL JUSTICE INTERNSHIP

This elective course requires work experience in an organization providing on-the-job training in criminal justice including state approved police academies. The intern will be supervised by a faculty coordinator and a supervisor in the organization and will report work experience through written and oral reports to the faculty coordinator.

Prerequisites & Notes

Prerequisite: CRIM 3603

Credits: 3

Divine Design - 47 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Minor, Criminal Justice

Criminal Justice - 18 Credit Hours

CRIM 2203 - CRIMINAL JUSTICE SYSTEM

This course covers the origin, evolution, and daily operation of the criminal justice system in the United States. Relationships between law enforcement, the court system, and corrections are studied.

Prerequisites & Notes

NULL

Credits: 3

Bachelor of Science, Psychology (Main)

Bachelor of Science, Psychology: 4-Year Plan

The Bachelor of Science in Psychology degree provides students with fundamentals in psychological and integration principles. Topics of study include personality, development, abnormal psychology, research methods, and more. Students will learn to incorporate their Christian faith into their work and prepare for paraprofessional fields that require psychology or behavioral science degree. In addition, they will participate in supervised field experience and conduct and report empirical research in the field. This degree is also ideal for a student considering pursuing a master's degree in a helping profession such as counseling. This online program is a total of 123 credit hours: 56 credit hours for Foundational Core courses, 41 credit hours for psychology major core courses, 9 credit hours for psychology electives, and 17 credit hours for general electives.

The Bachelor of Science in Psychology covers the main content areas and skills recommended by the American Psychological Association for undergraduate programs. Students who achieve the program objectives will be able to apply their knowledge of human cognitive, emotional, and behavioral processes to a variety of careers that involve working with people. This program also provides the required competencies for students who wish to pursue graduate studies in psychology, counseling, and related fields.

Program Objectives:

1. Students will demonstrate competency in scientific reasoning and psychological research methods.
2. Students will demonstrate a working knowledge of psychology's key concepts and content domains.
3. Students will describe how they integrate their Christian faith and ethics with their general understanding of psychology.
4. Students will demonstrate qualities of professionalism and preparedness for a career.
5. Students will apply multicultural and cross-cultural knowledge and values to personal and professional development.

Foundational Core- 34 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation- 9 credits

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credits

Discursive Inquiry- 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry- 4 Credit Hours

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

Quantitative Inquiry- 3 Credit Hours

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

Socio-Historical Inquiry-6 Credit Hours

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

Select One of the Following:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry- 3 Credit Hours

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 45 Credit Hours

PSYC 2003 - COMMUNICATION AND CAREERS IN PSYCHOLOGY

This course is an introduction to communication in the field of psychology. Students will develop skills in information literacy, comprehension of peer-reviewed literature, synthesis of information, and use of proper APA standards. Students will also develop their verbal presentation skills. Additionally, students will be introduced to the different career opportunities at both baccalaureate and graduate-degree levels as well as requirements and skills required for admissions into graduate school.

Prerequisites & Notes

PSYC 1133

Credits: 3

PSYC 2013 - RESEARCH METHODS IN PSYCHOLOGY

This course addresses the application of various research methods of inquiry in application to theory and practice for the purpose of knowledge building and the development of best practice. Emphasis is on developing general research skills that can be applied within any area of psychology. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice, and evaluation of theory. The focus is on the development of research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

Prerequisite: PSYC 2003

Corequisite: PSYC 2023

Credits: 3

PSYC 2023 - STATISTICAL METHODS

This course studies the application of statistical methods to existing data. Topics include organizing and presenting data, descriptive and inferential measures, and interpreting statistical information. Emphasis will be on sampling, probability, hypothesis testing, and appropriate application of statistical tests.

Prerequisites & Notes

Prerequisite: MATH 1213

Corequisite: PSYC 2013

Credits: 3

PSYC 2133 - THEORIES OF PERSONALITY

This course is an introduction to the study of personality formation. Major personality themes are critically examined. Students are introduced to the application of these theories in counseling and the treatment of mental illness.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

PSYC 3003 - ABNORMAL PSYCHOLOGY

This course is a study of the nature, causes, and treatment of abnormal behavior, including personality disorders, neuroses, psychoses, stress reactions, and other dysfunctions. Elements contributing to mental health and well-integrated personality are also considered.

Prerequisites & Notes

PSYC 1133 or PSYC 1233 , PSYC 2133

Credits: 3

PSYC 3023 - CULTURAL PSYCHOLOGY

This course provides students with an introduction to multicultural and cross-cultural psychology including its theories, research, and exploration of intercultural knowledge. The course examines the dynamics of cultural relevance related to psychological processes, abnormality, and treatment. The course implements exercises of self-awareness and engagement within other cultures.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 3433 - INTEGRATION SEMINAR PSYCH AND THEOL

This course is a study of the contemporary evangelical efforts to integrate psychology and theology, focusing on the value of an integrative approach to both disciplines. Topics include behavior, cognition, emotion, and motivation. Junior or senior level standing required.

Prerequisites & Notes

Prerequisites: PSYC 1133 or PSYC 1233 ; PSYC 2133

Credits: 3

PSYC 3733 - SOCIAL PSYCHOLOGY

This course is a survey of theories of interpersonal behavior and group dynamics emphasizing the influence of groups and group membership upon individual behavior. Topics include aggression, attitudes, attribution, conformity, altruism, communication, propaganda, morale, and other aspects of interpersonal relationships.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 4033 - PHYSIOLOGICAL PSYCHOLOGY

This course is a study of the physiological components of behavior. Topics include structure and function of the nervous system; theory of brain functions; and current problems, theories, and techniques in physiological psychology.

Prerequisites & Notes

PSYC 1133 or PSYC 1233; PSYC 2133; BIOL 1333, BIOL 133L

Credits: 3

PSYC 4083 - LEARNING AND COGNITION

This course is an introduction to the psychological study of learning and cognition. Topics examined will include classical conditioning, operant conditioning, observational learning, perception, attention, and memory. Traditional views as well as current trends will be discussed.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 4093 - PSYCHOLOGY CAPSTONE SENIOR SEMINAR

This capstone course will provide students the opportunity to critically reflect on and apply the theories and skills learned throughout their Psychology degree program. Students will articulate and include a capstone project related to their proposed career goals. Through this course students will demonstrate their understanding as well as faith integration through the production of a major paper/project and presentation.

Prerequisites & Notes

Prerequisite: Final semester senior, PSYC 4033 , PSYC 4083

Credits: 3

Psychology Electives, Select 3 Courses:

Note: Some courses are only available online and others are only available in person. Please consult the schedule for details.

PSYC 2033 - INDUSTRIAL & ORGANIZATIONAL PSYC

This course includes an application of psychological principles to industry, business, and other organizations. Topics include organization of work, selection, training, motivation, job satisfaction, supervision, and decision-making.

Prerequisites & Notes

NULL

Credits: 3

PSYC 2233 - MARRIAGE AND FAMILY

This course is a study of the major issues related to courtship, marriage, and family formation. Special attention is given to the social conditions influencing courtship, marriage, divorce, and family life. Topics include dating rituals, gender differences, expectations, parenting, family dysfunction, family violence, and strategies for sound relating. The role of family counselors and therapists is also discussed.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

PSYC 3052 - FIELD EXPERIENCE IN PSYCHOLOGY

This course provides students with practical experience in a mental health, social service, educational psychology, or related setting under the supervision of a qualified in-service supervisor and a college supervisor. Placement must be approved by the course instructor.

Prerequisites & Notes

PSYC 2133

Credits: 2

PSYC 3063 - Attitudes and Motivation in the Wor

This course explores concepts and theories related to job attitudes and motivation in the workplace. Topics include motivational strategies, models of performance, and the impact of job satisfaction, work values, workplace environment, management style, and organizational commitment on employee attitudes and motivation.

Prerequisites & Notes

PSYC 2033

Credits: 3

PSYC 3073 - Group Dynamics in the Workplace

This course explores concepts and theories related to group dynamics and small group processes as they related to organizations. Topics include leadership, decision-making, stages of group development, group structure, group communication, team building, conflict resolution, and the intra-and inter-personal dynamics within small group

Prerequisites & Notes

PSYC 2033

Credits: 3

PSYC 3103 - MARITAL AND FAMILY THERAPY

This course is an overview of counseling approaches to family problems, including the family systems approach. Issue areas explored include communication, role expectations, and sexual dysfunction. Various counseling techniques related to marital maladjustment are explored. Principal approaches to marital therapy and family therapy are emphasized.

Prerequisites & Notes

PSYC 2133 , PSYC 2233

Credits: 3

PSYC 3131 - FIELD EXPERIENCE II

This course provides students with practical experience in a mental health, social service, educational psychology, or related setting under the supervision of a qualified in-service supervisor and a college supervisor. Placement must be approved by the course instructor.

Prerequisites & Notes

Prerequisites: PSYC 2133; PSYC 3052

Credits: 1

PSYC 3203 - HUMAN SEXUALITY

This course provides a comprehensive overview of the field of human sexuality, exploring the biological, psychological, sociological, and theological approaches to the study of human sexuality. Specifically, the course will address anatomy, physiology, and genetics in the development of gender identity and sexual function, the emotional factors affecting sexual experience, the nature and causes of sexual diseases and dysfunctions, the role of sexuality in relationships to others and to the self, and the moral and ethical themes related to the expression of sexuality.

Prerequisites & Notes

PSYC 2133 ; PSYC 2233

Credits: 3

PSYC 3333 - PSYCHOLOGY OF RELIGION

This course is a critical examination of the psychological research on the effects of religious experience on individual development and mental health. Historical developments, current trends, and major contemporary contributions to this area of study will be explored. There will be an emphasis on how the church can function to facilitate mental health.

Prerequisites & Notes

PSYC 2133 and BIBL 1113

Credits: 3

PSYC 3533 - INTRODUCTION TO COUNSELING

This course is a study of various theoretical approaches to the practice of counseling and psychotherapy with normal and disturbed clients. Focus is on the psychoanalytic, cognitive, behavioral, and phenomenological approaches.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 3553 - INTRO TO COUNSELING CHILDREN & YOUTH

In this course, students will explore issues, theories, and applications related to understand and helping children and adolescents with social or emotional problems. Students will learn to assess behavior and incorporate ethically and legally appropriate strategies to meet the needs of counseling children and adolescents.

Prerequisites & Notes

PSYC 3533

Credits: 3

PSYC 3633 - PROFESSIONAL, ETHICAL, LEGAL ISSUES

This course is an exploration of the development of professional self with emphasis on the changing ethical and legal context for practice. Approaches to counseling are explored with an emphasis on students' development of professional style. Students explore issues of professional and personal values and ethics, personality, values, and interests.

Prerequisites & Notes

NULL

Credits: 3

PSYC 3833 - SUBSTANCE ABUSE AND RECOVERY

This course is a study of the nature and causes of substance abuse and addiction. The psychological and social dynamics of addiction are explored with an emphasis on models of treatment and patterns of recovery and recidivism.

Prerequisites & Notes

NULL

Credits: 3

PSYC 4003 - SELECTED TOPICS

A seminar for investigation of specialized topics in psychology not addressed by other courses. Content is determined by the department to address special needs or interest. May be repeated for a maximum of six hours. The same topic may not be repeated.

Prerequisites & Notes

NULL

Credits: 3

PSYC 4013 - PSYCHOLOGY OF LEADERSHIP

The course will develop the student's communication and servant leadership skills through the joining of traditional theories and Christian based views of what it means to be an effective communicator and leader. Through the course the student will analyze leadership behaviors and communication styles from multiple perspectives and synthesize them into a personal philosophy of servant leadership applicable to both their personal and professional lives.

Prerequisites & Notes

NULL

Credits: 3

PSYC 4043 - DIAGNOSIS, ASSESSMENT & CASE MGMT

This course is an introduction to the skills needed for client diagnosis, assessment, and case management that are currently used in the helping professions. The course will focus on identifying pertinent information for preliminary assessment of a presenting problem, goal setting and contracting, monitoring for progress, and documenting sensitive client data. Topics will include individual psycho-social assessments, and family assessments.

Prerequisites & Notes

PSYC 2133; PSYC 3003

Credits: 3

PSYC 4063 - PERSONNEL PSYCHOLOGY

This course explores concepts and theories related to personnel psychology, which encompasses all aspects of personnel management from the time the employee is recruited through the end of their work with the organization. Topics included are workforce planning, recruitment, selection, placement, training, promotion, evaluation, retention, and counseling of employees.

Prerequisites & Notes

PSYC 2033

Credits: 3

PSYC 4073 - PSYCHOLOGY PRACTICUM

This course is a one-semester practical experience of 150 hours in a mental health, social service, educational psychology, or related setting under the supervision of a qualified in-service supervisor and a college supervisor. The course may be repeated once.

Prerequisites & Notes

PSYC 2133; Course Instructor approval required

Credits: 3

PSYC 4123 - CRISIS PSYCHOLOGICAL MANAGEMENT

The first few days through which individuals experience crisis are critical to their physical and psychological survivability. Support personnel must understand the foundational aspects of acute distress in both those experiencing crisis and those providing relief and support. Students are trained to identify stress symptoms and emotional suffering in order to assist as much as appropriate and then to direct individuals to qualified support specialists. This course is not intended for professional or trained counselors, but for those who are on site immediately following natural or human caused disasters. This course is cross-referenced with PMIN 4083.

Prerequisites & Notes

NULL

Credits: 3

PSYC 4153 - CHILDREN AND YOUTH CRISIS

Children and youth are especially susceptible to the traumatic effects of crises. Because of their higher level of innocence, minimal experience, and the vulnerable place they have in many societies, relief endeavors must identify actions and strategies as quickly as possible. Students identify stress symptoms and emotional suffering in order to help to the extent appropriate and then direct individuals to qualified support specialists. This course is not intended for professional or trained counselors, but for those who are on site immediately following crises.

Prerequisites & Notes

NULL

Credits: 3

PSYC 4833 - TESTING AND MEASUREMENTS

This course is a study of the basic measurement theory and its practical application to problems of choosing, administering, and evaluating the results of tests. The more common aptitude, achievement, interest, intelligence, and personality tests will be considered.

Prerequisites & Notes

PSYC 2023 or MATH 2023

Credits: 3

PSYC 4903 - CRISIS INTERVENTION

This course studies crisis intervention theories and strategies of intervention applied to various crises, such as posttraumatic stress disorder (PTSD), lethality, sexual assault, addiction, partner violence, and loss. Emphasis is on a six-step model of crisis intervention that informs and empowers the layperson or the helping professional.

Prerequisites & Notes

Prerequisite: PSYC 3052, PSYC 3443

Credits: 3

PSYC 4906 - PSYCHOLOGY INTERNSHIP

This course is a one-semester practical experience of 300 hours in a mental health, social service, educational psychology, or related setting under the supervision of a qualified in-service supervisor and a college supervisor.

Prerequisites & Notes

PSYC 2133 ; Course Instructor approval required

Credits: 6

PSYC 4913 - PSYCHOLOGICAL RESEARCH EXPERIENCE

This course is a practical experience in psychological research for one full semester, approved by the department chair and supervised by a principal investigator who provides continuous evaluation of the student's research.

Prerequisites & Notes

PSYC 2013, PSYC 2023, and Department Chair approval

Credits: 3

EDUC 2233 - EDUCATIONAL PSYCHOLOGY

This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.

Prerequisites & Notes

None

Credits: 3

SRMT 3203 - MENTAL HEALTH AND SPORT PSYCHOLOGY

This course is an introduction to the many facets of applied sport psychology, the mental aspects of sports, and the contemporary performance enhancement techniques utilized in sport psychology throughout the world. It includes the theory and practice of sport psychology with areas of the theoretical basis of mental aspects of training processes and competition, mental training techniques for psychomotor performance, and basic issues of performance psychology.

Prerequisites & Notes

SRMT 2103

Credits: 3

Divine Design - 41 Credits

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Bachelor of Science, Criminal Justice & Legal Studies

Bachelor of Science, Criminal Justice & Legal Studies Four Year Plan

Program Description:

The Bachelor of Science Degree in Criminal Justice provides curriculum and practical experiences designed to help develop students and practitioners with critical and analytical skills to promote the administration of justice in a diverse and global society. This program equips students with a thorough understanding of criminal justice systems and theories, and the historical foundation of criminal justice. The undergraduate curriculum is designed to allow students to explore the various agencies, personnel roles, and career opportunities available in the criminal justice field. The

program seeks to educate students as well as promote workforce development by targeting practitioners currently working in the criminal justice field. Students who major in criminal justice have many opportunities to further their personal and professional development.

Program Objectives:

1. Criminal Justice majors will discuss the history and development of the criminal justice system and gain exposure to system professionals.
2. Criminal Justice majors will identify the relationship and interaction between the various criminal justice system components.
3. Criminal Justice majors will compare and contrast criminological theories, which attempt to explain the causes of crime.
4. Criminal Justice majors will conduct criminological research, interpret the results, and present the final information.
5. Criminal Justice majors will exhibit professional characteristics, attitudes, and competencies throughout the duration of the major.

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry (6 credits) Select Two:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 69 Credits

Criminal Justice (33 Credit Hours)

CRIM 2203 - CRIMINAL JUSTICE SYSTEM

This course covers the origin, evolution, and daily operation of the criminal justice system in the United States. Relationships between law enforcement, the court system, and corrections are studied.

Prerequisites & Notes

NULL

Credits: 3

CRIM 2523 - VICTIMOLOGY

This course introduces the field of victimology and examines the relationships between the victim and the offender, the victim and society, and the victim within the criminal justice system. Theoretical explanations for victimization, along with the evolution of the victims' rights movement are studied. Policies and procedures that have resulted from increased attention towards victims of crime will be reviewed and discussed as they pertain to practical application.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3203 - SOCIOLOGY OF POLICING

This course will cover the history, evolution and structure of policing in the United States. Popular innovations in policing and law enforcement will be emphasized. Special attention to conflicts and imperatives which define police officers' roles and the character of police work will be discussed along with careers and hiring practices by law enforcement agencies.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3223 - RESEARCH IN CRIMINAL JUSTICE

This course is an examination of the fundamental research methods in the field of criminal justice. This includes: the development of research questions and research design, methods of data collection, data analysis, and reporting results.

Prerequisites & Notes

Prerequisite: None

Credits: 3

CRIM 3303 - JUVENILE DELINQUENCY

This course covers the types of delinquency as well as supporting theories. Particular attention will be given to the role of family, school, and the peer group in promoting delinquency. The effects of social institutions on delinquency, prevention, and control are also studied. The juvenile justice system is compared to the adult system and the social consequences of delinquency are studied. This course will provide students with the tools to analyze and evaluate juvenile justice policies and programs.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3403 - AMERICAN CRIMINAL COURTS

This course examines the court system in the United States and provides an introduction to the many elements of the judicial process. Major topics include: the role of the courts, trial procedures, role of decision makers in the court system, the distinctions between civil and criminal systems, the alternatives available to the accused prior to trial proceedings, and public policy as it relates to the court system.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3603 - CORRECTIONS AND PUNISHMENT

This course is an introduction to the corrections system in the United States and will provide an overview of the history, current institutional practices, policies, and legal issues. There is an emphasis on contemporary conditions and alternatives to traditional responses to crime and an exploration of the principles and practices of correctional options afforded to offenders in various types of settings. Topics covered include incarceration, deterrence, rehabilitation, retribution, and system reform.

Prerequisites & Notes

CRIM 2203

Credits: 3

CRIM 4203 - THEORY AND CRIMINAL JUSTICE

This course provides an analysis of how crime affects society. Prevention and control of criminal behavior are based on theoretical models. Several of these models are examined as they relate to the day-to-day functions of the police, courts, and corrections.

Prerequisites & Notes

CRIM 2203

Credits: 3

CRIM 4303 - CRIMINAL JUSTICE SENIOR SEMINAR

This course is designed as the capstone learning experience for all Criminal Justice majors. The course will integrate activities into a comprehensive understanding of the integrative nature of the criminal justice system. Emphasis is on policy evaluation, career options, and member training for a criminal justice agency.

Prerequisites & Notes

Prerequisite: CRIM 3603

Credits: 3

CRIM 4403 - CRIMINAL LAW

This course examines the core philosophies of criminal law, including both substantive and procedural elements. There is an emphasis on the theoretical foundations and principles of criminal law, state and federal criminal statutes, and court decisions. Discussions will also focus on the various criminal defenses.

Prerequisites & Notes

Prerequisite: None

Credits: 3

Criminal Justice Elective- Select one of the following:

CRIM 2003 - CRIMINAL JUSTICE AND THE CHRISTIAN

This course will cover topics that pertain to both the fields of Criminal Justice and Christian Theology, requiring students to examine crime and punishment through the eyes of Jesus Christ. Topics will be predicated on current events, new developments, and the interests of criminal justice majors and professionals.

Prerequisites & Notes

NULL

Credits: 3

CRIM 2223 - INTRO TO CRIME SCENE INVESTIGATION

This course provides an overview of crime scene response. Students will have the opportunity to perform hands-on exercises utilizing techniques performed by crime scene investigators to include sketching and photographing crime scenes, writing reports, collecting and packaging evidence, processing scenes and evidence for latent prints, and courtroom testimony. Advanced crime scene processing techniques will also be demonstrated.

Prerequisites & Notes

NULL

Credits: 3

CRIM 2503 - HOMICIDE INVESTIGATION

This course will cover investigating a homicide, the major law enforcement officers involved in the investigation, and the basics of preparing the case for trial.

Prerequisites & Notes

NULL

Credits: 3

CRIM 2703 - INTRODUCTION TO FORENSIC SCIENCE

This course is an overview of the application of forensic science and how it applies to the criminal justice system. This course is designed to provide students with an understanding of the techniques and abilities of forensic science with regard to investigative and criminalistic activities. When taken with its accompanying lab, this course meets the science (with lab) general education requirement. This course also meets the specialized needs of the Criminal Justice program.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3343 - CRIMINAL JUSTICE ADMINISTRATION

This course provides students with an overview of public administration within the criminal justice field. The organization, financing, and management functions within the local, state, and federal criminal justice systems are examined. Criminal justice policies and administrative practices are evaluated and compared to the academic theories of public administration.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3803 - CRITICAL ISSUES IN CRIMINAL JUSTICE

This course is a study of current issues and debates that affect the criminal justice system. The curriculum includes an examination and discussion on all aspects and viewpoints of the critical issues faced by professionals within the criminal justice system. Topics for discussion include but are not limited to: public policy implications, media's involvement in the criminal justice system, diversity, workforce generations, criminal justice training, terrorism, shift in types of crime and prevention, and public perceptions of criminal justice professionals.

Prerequisites & Notes

CRIM 2203

Credits: 3

CRIM 4903 - CRIMINAL JUSTICE INTERNSHIP

This elective course requires work experience in an organization providing on-the-job training in criminal justice including state approved police academies. The intern will be supervised by a faculty coordinator and a supervisor in the organization and will report work experience through written and oral reports to the faculty coordinator.

Prerequisites & Notes

Prerequisite: CRIM 3603

Credits: 3

Legal Studies (33 Credit Hours)

BUSI 3403 - BUSINESS LAW I

This course discusses legal principles which apply to normal business transactions, contracts, agency, property, insurance, wills and trusts, and torts.

Prerequisites & Notes

None

Credits: 3

BUSI 3413 - BUSINESS LAW II

This course is a continuation of Business Law I, with additional emphasis on contracts, sales, commercial paper, secured transactions, bankruptcy, debtor-creditor relationships, agency, partnerships and joint ventures, corporations, federal securities acts, professional responsibilities, regulation of employment and environment, property, insurance and trusts and estates.

Prerequisites & Notes

BUSI 3403

Credits: 3

PLAW 3003 - LEGAL TERMINOLOGY & THE LITIGATION PROCESS

This legal course introduces the student to legal terms in the legal profession. Students will use knowledge from this course foundationally as they progress through the Legal Studies major. It will provide a better understanding of the legal process and the profession.

Prerequisites & Notes

None

Credits: 3

PLAW 3013 - INTRODUCTION TO LEGAL THEORY

This course introduces students to the profession of law with emphasis on the distinction and relationship of theory and practice. Advice is offered to students on preparing for and choosing a law school. The course also provides practical advice on how to succeed in law school. Students will also be exposed to basic legal research and writing techniques.

Prerequisites & Notes

None

Credits: 3

PLAW 3333 - LAW SCHOOL PREPARATORY COURSE

This course is designed to assist students in developing a proper skillset in preparation for the Law School Assessment Test (LSAT). Students will also be trained in the proper style for law school applications and personal statements.

Prerequisites & Notes

None

Credits: 3

PLAW 3433 - LEGAL RESEARCH & WRITING

This course is designed to teach students how to identify and analyze legal problems. Students will engage in legal research using primary and secondary sources. Upon completion of the legal analysis of a problem, students will prepare a written form that adheres to the conventions of the legal profession.

Prerequisites & Notes

None

Credits: 3

PLAW 4143 - LEGAL DRAFTING

This course is an introduction to purposes and uses of various legal document drafting formats. The primary focus is on creation of basic legal documents that meet appropriate professional standards.

Prerequisites & Notes

None

Credits: 3

PLAW 4243 - MOOT COURT

This course will prepare students to work in a team setting. Students will be assigned to a team and will prepare appellate arguments based on hypothetical cases. Students will develop, prepare, and practice their arguments in class. The teams will participate in regional and national competitions that are judged by law school students, professors, and sitting jurists.

Prerequisites & Notes

None

Credits: 3

PLAW 4443 - ADVANCED LEGAL RESEARCH & THEORY

This course emphasizes the use of advanced electronic legal research techniques and critical analysis of legal issues. Using a variety of hypothetical and factual situations, students will prepare effective written persuasive presentations in an acceptable legal format.

Prerequisites & Notes

None

Credits: 3

PLAW 4903 - PRE-LAW INTERNSHIP

This course is designed to give students a practical introduction to the legal profession by spending time observing and working with a practicing local attorney or judge. This course is a supervised, structured work experience designed to augment and develop practical experience in conjunction with regular coursework. Students are strongly encouraged to utilize this option to explore potential career paths.

Prerequisites & Notes

PLAW 3013

Credits: 3

POLS 2403 - UNITED STATES CONSTITUTION

A study of the legal culture in the United States, including the British common law system, the origin of the U.S. Constitution, the amendments, and the landmark cases.

Prerequisites & Notes

NULL

Credits: 3

Criminal Justice or Legal Studies Elective- Select one of the following:

CRIM 3503 - ETHICS IN CRIMINAL JUSTICE

This course is an examination of the historical and philosophical background of the field of ethics, specifically professional ethics in the criminal justice system. The curriculum includes an examination of ethical theories and the relationship and ethical dilemmas faced by professionals within the criminal justice system.

Prerequisites & Notes

NULL

Credits: 3

PLAW 4413 - ETHICS IN THE LEGAL PROFESSION

This course introduces students to the types of ethical situations and dilemmas they may encounter in the legal workforce. Students will learn applicable disciplinary rules for both the lawyer and the paralegal, in order to understand how to function responsibly as a legal professional.

Prerequisites & Notes

Junior standing

Credits: 3

Divine Design - 17 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit

hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Bachelor of Science, Psychology and Criminal Justice 4-Year Plan

Year One

Fall Semester - 16 Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

CRIM 2203 - CRIMINAL JUSTICE SYSTEM

This course covers the origin, evolution, and daily operation of the criminal justice system in the United States. Relationships between law enforcement, the court system, and corrections are studied.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Spring Semester - 15 Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

PSYC 2133 - THEORIES OF PERSONALITY

This course is an introduction to the study of personality formation. Major personality themes are critically examined. Students are introduced to the application of these theories in counseling and the treatment of mental illness.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

Year Two

Fall Semester - 15 Hours

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CRIM 2523 - VICTIMOLOGY

This course introduces the field of victimology and examines the relationships between the victim and the offender, the victim and society, and the victim within the criminal justice system. Theoretical explanations for victimization, along

with the evolution of the victims' rights movement are studied. Policies and procedures that have resulted from increased attention towards victims of crime will be reviewed and discussed as they pertain to practical application.

Prerequisites & Notes

NULL

Credits: 3

PSYC 2003 - COMMUNICATION AND CAREERS IN PSYCHOLOGY

This course is an introduction to communication in the field of psychology. Students will develop skills in information literacy, comprehension of peer-reviewed literature, synthesis of information, and use of proper APA standards. Students will also develop their verbal presentation skills. Additionally, students will be introduced to the different career opportunities at both baccalaureate and graduate-degree levels as well as requirements and skills required for admissions into graduate school.

Prerequisites & Notes

PSYC 1133

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

Socio-Historical Inquiry (3 credits) Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester - 15 Hours

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

CRIM 3303 - JUVENILE DELINQUENCY

This course covers the types of delinquency as well as supporting theories. Particular attention will be given to the role of family, school, and the peer group in promoting delinquency. The effects of social institutions on delinquency, prevention, and control are also studied. The juvenile justice system is compared to the adult system and the social consequences of delinquency are studied. This course will provide students with the tools to analyze and evaluate juvenile justice policies and programs.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

PSYC 2023 - STATISTICAL METHODS

This course studies the application of statistical methods to existing data. Topics include organizing and presenting data, descriptive and inferential measures, and interpreting statistical information. Emphasis will be on sampling, probability, hypothesis testing, and appropriate application of statistical tests.

Prerequisites & Notes

Prerequisite: MATH 1213

Corequisite: PSYC 2013

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

POLS 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

PLAW 3013 - INTRODUCTION TO LEGAL THEORY

This course introduces students to the profession of law with emphasis on the distinction and relationship of theory and practice. Advice is offered to students on preparing for and choosing a law school. The course also provides practical

advice on how to succeed in law school. Students will also be exposed to basic legal research and writing techniques.

Prerequisites & Notes

None

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Socio-Historical Inquiry (3 credits) Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:
CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

PLAW 3433 - LEGAL RESEARCH & WRITING

This course is designed to teach students how to identify and analyze legal problems. Students will engage in legal research using primary and secondary sources. Upon completion of the legal analysis of a problem, students will prepare a written form that adheres to the conventions of the legal profession.

Prerequisites & Notes

None

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education

requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Year Two

Fall Semester

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

BUSI 3403 - BUSINESS LAW I

This course discusses legal principles which apply to normal business transactions, contracts, agency, property, insurance, wills and trusts, and torts.

Prerequisites & Notes

None

Credits: 3

CRIM 2203 - CRIMINAL JUSTICE SYSTEM

This course covers the origin, evolution, and daily operation of the criminal justice system in the United States. Relationships between law enforcement, the court system, and corrections are studied.

Prerequisites & Notes

NULL

Credits: 3

PLAW 3003 - LEGAL TERMINOLOGY & THE LITIGATION PROCESS

This legal course introduces the student to legal terms in the legal profession. Students will use knowledge from this course foundationally as they progress through the Legal Studies major. It will provide a better understanding of the legal process and the profession.

Prerequisites & Notes

None

Credits: 3

Socio-Historical Inquiry (3 credits) Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

BUSI 3413 - BUSINESS LAW II

This course is a continuation of Business Law I, with additional emphasis on contracts, sales, commercial paper, secured transactions, bankruptcy, debtor-creditor relationships, agency, partnerships and joint ventures, corporations, federal securities acts, professional responsibilities, regulation of employment and environment, property, insurance and trusts and estates.

Prerequisites & Notes

BUSI 3403

Credits: 3

CRIM 3303 - JUVENILE DELINQUENCY

This course covers the types of delinquency as well as supporting theories. Particular attention will be given to the role of family, school, and the peer group in promoting delinquency. The effects of social institutions on delinquency, prevention, and control are also studied. The juvenile justice system is compared to the adult system and the social consequences of delinquency are studied. This course will provide students with the tools to analyze and evaluate juvenile justice policies and programs.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3203 - SOCIOLOGY OF POLICING

This course will cover the history, evolution and structure of policing in the United States. Popular innovations in policing and law enforcement will be emphasized. Special attention to conflicts and imperatives which define police officers' roles and the character of police work will be discussed along with careers and hiring practices by law enforcement agencies.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

POLS 2403 - UNITED STATES CONSTITUTION

A study of the legal culture in the United States, including the British common law system, the origin of the U.S. Constitution, the amendments, and the landmark cases.

Prerequisites & Notes

NULL

Credits: 3

Year Three

Fall Semester

CRIM 2523 - VICTIMOLOGY

This course introduces the field of victimology and examines the relationships between the victim and the offender, the victim and society, and the victim within the criminal justice system. Theoretical explanations for victimization, along with the evolution of the victims' rights movement are studied. Policies and procedures that have resulted from increased attention towards victims of crime will be reviewed and discussed as they pertain to practical application.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3403 - AMERICAN CRIMINAL COURTS

This course examines the court system in the United States and provides an introduction to the many elements of the judicial process. Major topics include: the role of the courts, trial procedures, role of decision makers in the court system, the distinctions between civil and criminal systems, the alternatives available to the accused prior to trial proceedings, and public policy as it relates to the court system.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3503 - ETHICS IN CRIMINAL JUSTICE

This course is an examination of the historical and philosophical background of the field of ethics, specifically professional ethics in the criminal justice system. The curriculum includes an examination of ethical theories and the relationship and ethical dilemmas faced by professionals within the criminal justice system.

Prerequisites & Notes

NULL

Credits: 3

CRIM Elective- 3 Credit Hours

CRIM Elective- 3 Credit Hours

Spring Semester

CRIM 4203 - THEORY AND CRIMINAL JUSTICE

This course provides an analysis of how crime affects society. Prevention and control of criminal behavior are based on theoretical models. Several of these models are examined as they relate to the day-to-day functions of the police, courts, and corrections.

Prerequisites & Notes

CRIM 2203

Credits: 3

PLAW 4413 - ETHICS IN THE LEGAL PROFESSION

This course introduces students to the types of ethical situations and dilemmas they may encounter in the legal workforce. Students will learn applicable disciplinary rules for both the lawyer and the paralegal, in order to understand how to function responsibly as a legal professional.

Prerequisites & Notes

Junior standing

Credits: 3

CRIM 3223 - RESEARCH IN CRIMINAL JUSTICE

This course is an examination of the fundamental research methods in the field of criminal justice. This includes: the development of research questions and research design, methods of data collection, data analysis, and reporting results.

Prerequisites & Notes

Prerequisite: None

Credits: 3

CRIM Elective- 3 Credit Hours

CRIM Elective- 3 Credit Hours

Year Four

Fall Semester

PLAW 3333 - LAW SCHOOL PREPARATORY COURSE

This course is designed to assist students in developing a proper skillset in preparation for the Law School Assessment Test (LSAT). Students will also be trained in the proper style for law school applications and personal statements.

Prerequisites & Notes

None

Credits: 3

CRIM 4403 - CRIMINAL LAW

This course examines the core philosophies of criminal law, including both substantive and procedural elements. There is an emphasis on the theoretical foundations and principles of criminal law, state and federal criminal statutes, and court decisions. Discussions will also focus on the various criminal defenses.

Prerequisites & Notes

Prerequisite: None

Credits: 3

PLAW 4143 - LEGAL DRAFTING

This course is an introduction to purposes and uses of various legal document drafting formats. The primary focus is on creation of basic legal documents that meet appropriate professional standards.

Prerequisites & Notes

None

Credits: 3

PLAW 4443 - ADVANCED LEGAL RESEARCH & THEORY

This course emphasizes the use of advanced electronic legal research techniques and critical analysis of legal issues. Using a variety of hypothetical and factual situations, students will prepare effective written persuasive presentations in an acceptable legal format.

Prerequisites & Notes

None

Credits: 3

CRIM 3603 - CORRECTIONS AND PUNISHMENT

This course is an introduction to the corrections system in the United States and will provide an overview of the history, current institutional practices, policies, and legal issues. There is an emphasis on contemporary conditions and alternatives to traditional responses to crime and an exploration of the principles and practices of correctional options afforded to offenders in various types of settings. Topics covered include incarceration, deterrence, rehabilitation, retribution, and system reform.

Prerequisites & Notes

CRIM 2203

Credits: 3

Spring Semester**CRIM 4303 - CRIMINAL JUSTICE SENIOR SEMINAR**

This course is designed as the capstone learning experience for all Criminal Justice majors. The course will integrate activities into a comprehensive understanding of the integrative nature of the criminal justice system. Emphasis is on policy evaluation, career options, and member training for a criminal justice agency.

Prerequisites & Notes

Prerequisite: CRIM 3603

Credits: 3

PLAW 4243 - MOOT COURT

This course will prepare students to work in a team setting. Students will be assigned to a team and will prepare appellate arguments based on hypothetical cases. Students will develop, prepare, and practice their arguments in class. The teams will participate in regional and national competitions that are judged by law school students, professors, and sitting jurists.

Prerequisites & Notes

None

Credits: 3

PLAW 4903 - PRE-LAW INTERNSHIP

This course is designed to give students a practical introduction to the legal profession by spending time observing and working with a practicing local attorney or judge. This course is a supervised, structured work experience designed to augment and develop practical experience in conjunction with regular coursework. Students are strongly encouraged to utilize this option to explore potential career paths.

Prerequisites & Notes

PLAW 3013

Credits: 3

GENERAL ELECTIVE - 2 HR ELECTIVE

Select a 2 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 2

CRIM Elective- 3 Credit Hours

Bachelor of Science, Psychology: 4-Year Plan

Year One

FALL SEMESTER- 16 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

SPRING SEMESTER- 14 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Bachelor of Science, Criminal Justice & Organizational Leadership

Bachelor of Science, Criminal Justice & Organizational Leadership (Four-Year Plan)

The major of Organizational Leadership and Criminal Justice provides students with a foundation for those who are interested in pursuing leadership roles during their career in the criminal justice system. Students will learn the principles of leadership and how to apply those principles in an organization. In addition, students will learn the basic components as well as various facets of the criminal justice system from those who have worked in the field.

Total Program Hours- 120 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours; Select One with Lab:

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

OR

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

Quantitative Inquiry - 3 Credit Hours; Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry- 6 Credit Hours; Select Two:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - 3 Credit Hours; Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 69 Credit Hours

Criminal Justice- 30 Credit Hours

CRIM 2203 - CRIMINAL JUSTICE SYSTEM

This course covers the origin, evolution, and daily operation of the criminal justice system in the United States. Relationships between law enforcement, the court system, and corrections are studied.

Prerequisites & Notes

NULL

Credits: 3

CRIM 2523 - VICTIMOLOGY

This course introduces the field of victimology and examines the relationships between the victim and the offender, the victim and society, and the victim within the criminal justice system. Theoretical explanations for victimization, along with the evolution of the victims' rights movement are studied. Policies and procedures that have resulted from increased attention towards victims of crime will be reviewed and discussed as they pertain to practical application.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3203 - SOCIOLOGY OF POLICING

This course will cover the history, evolution and structure of policing in the United States. Popular innovations in policing and law enforcement will be emphasized. Special attention to conflicts and imperatives which define police officers' roles and the character of police work will be discussed along with careers and hiring practices by law enforcement agencies.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3223 - RESEARCH IN CRIMINAL JUSTICE

This course is an examination of the fundamental research methods in the field of criminal justice. This includes: the development of research questions and research design, methods of data collection, data analysis, and reporting results.

Prerequisites & Notes

Prerequisite: None

Credits: 3

CRIM 3303 - JUVENILE DELINQUENCY

This course covers the types of delinquency as well as supporting theories. Particular attention will be given to the role of family, school, and the peer group in promoting delinquency. The effects of social institutions on delinquency, prevention, and control are also studied. The juvenile justice system is compared to the adult system and the social consequences of delinquency are studied. This course will provide students with the tools to analyze and evaluate juvenile justice policies and programs.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3403 - AMERICAN CRIMINAL COURTS

This course examines the court system in the United States and provides an introduction to the many elements of the judicial process. Major topics include: the role of the courts, trial procedures, role of decision makers in the court system, the distinctions between civil and criminal systems, the alternatives available to the accused prior to trial proceedings, and public policy as it relates to the court system.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3603 - CORRECTIONS AND PUNISHMENT

This course is an introduction to the corrections system in the United States and will provide an overview of the history, current institutional practices, policies, and legal issues. There is an emphasis on contemporary conditions and alternatives to traditional responses to crime and an exploration of the principles and practices of correctional options afforded to offenders in various types of settings. Topics covered include incarceration, deterrence, rehabilitation, retribution, and system reform.

Prerequisites & Notes

CRIM 2203

Credits: 3

CRIM 4203 - THEORY AND CRIMINAL JUSTICE

This course provides an analysis of how crime affects society. Prevention and control of criminal behavior are based on theoretical models. Several of these models are examined as they relate to the day-to-day functions of the police, courts, and corrections.

Prerequisites & Notes

CRIM 2203

Credits: 3

CRIM 4303 - CRIMINAL JUSTICE SENIOR SEMINAR

This course is designed as the capstone learning experience for all Criminal Justice majors. The course will integrate activities into a comprehensive understanding of the integrative nature of the criminal justice system. Emphasis is on policy evaluation, career options, and member training for a criminal justice agency.

Prerequisites & Notes

Prerequisite: CRIM 3603

Credits: 3

CRIM 4403 - CRIMINAL LAW

This course examines the core philosophies of criminal law, including both substantive and procedural elements. There is an emphasis on the theoretical foundations and principles of criminal law, state and federal criminal statutes, and court decisions. Discussions will also focus on the various criminal defenses.

Prerequisites & Notes

Prerequisite: None

Credits: 3

Leadership- 27 Credit Hours**LDRS 3003 - CROSS-CULTURAL LEADERSHIP**

This course introduces students to the challenges and impact of leadership within a cross-cultural framework. It examines cultural values, practices, and patterns of communication that exist within various cultures with an emphasis on cultural intelligence.

Prerequisites & Notes

None

Credits: 3

LDRS 3033 - LEADERSHIP & HUMAN DIVERSITY

This course examines the complex nature of leadership, culture and personal identity, explores populations at-risk, and encourages students to understand and appreciate diversity. Specific knowledge of leadership as it relates to individual cultures, awareness of the patterns of oppression experienced by those cultures, and skills relevant to developing a culturally competent approach to working with diverse people groups are addressed.

Prerequisites & Notes

None

Credits: 3

LDRS 3143 - LEADERSHIP, FOLLOWERSHIP, TEAMWORK

This course investigates effective leadership. It explores the concept of followership. A psychodynamic approach is used to further consider effective teamwork and the leader-follower dynamic.

Prerequisites & Notes

None

Credits: 3

LDRS 3183 - ORGANIZATIONAL THEORY & BEHAVIOR

This course is a study of behavioral science theory and practice exploring management, leadership, motivation, group dynamics, relations and organizational systems. Topics will concentrate on applying organizational resources for optimal efficiency.

Prerequisites & Notes

None

Credits: 3

LDRS 2123 - LEADERSHIP PRINCIPLES

This course focuses upon the development and challenges of effective leadership by reviewing historical leaders and the development of various leadership theories. This includes leader traits, skills, and behaviors; models; and other approaches to leadership.

Prerequisites & Notes

None

Credits: 3

LDRS 2223 - LEADERSHIP THEORY

This course focuses upon the development and challenges of effective leadership by reviewing influential writings and speeches, along with various leadership theories and philosophies. This includes adaptive, authentic, authoritarian, cross-cultural, democratic, ethical, Great Man Theory, servant, and transformational leadership, along with women in leadership and followership.

Prerequisites & Notes

None

Credits: 3

LDRS 4103 - LEADING ORGANIZATIONAL CHANGE

This course prepares learners to better comprehend the hyper-turbulent environment of the 21st century by introducing behavioral science techniques and methodologies to systematically bring about high-performing organizations.

Prerequisites & Notes

None

Credits: 3

LDRS 4113 - SERVANT LEADERSHIP PHILOSOPHY

This course provides a broad overview of servant leadership principles, models, and philosophies. Students review theories and definitions of leadership connecting theory to practice. This course emphasizes the importance of self-

discipline, humility, the art of being contemplative, and helping others grow.

Prerequisites & Notes

LDRS 2123 and LDRS 2223

Credits: 3

LDRS 4123 - MIRROR OF PRINCES

This course takes the Mirror of Princes approach to study leadership. It explores a leader's character and effectiveness, utilizing ancient texts. It examines the historical impact of some of the world's greatest leaders from various backgrounds including business, community organizations, government, humanities, military, and religion.

Prerequisites & Notes

LDRS 2123 and LDRS 2223

Credits: 3

CJ & Leadership Electives- 12 Credit Hours

Choose one of the following:

BUSI 4113 - BUSINESS ETHICS

This course considers legal, societal and Judeo-Christian principles as applied to ethical business decisions. Discussion of topical areas within all spheres of organizational culture, responsibilities and applied biblical moral thinking. This course is cross-referenced with THEO 4113.

Prerequisites & Notes

PHIL 2003 & Junior Standing

Credits: 3

CRIM 3503 - ETHICS IN CRIMINAL JUSTICE

This course is an examination of the historical and philosophical background of the field of ethics, specifically professional ethics in the criminal justice system. The curriculum includes an examination of ethical theories and the relationship and ethical dilemmas faced by professionals within the criminal justice system.

Prerequisites & Notes

NULL

Credits: 3

Choose three of the following:

CRIM 2003 - CRIMINAL JUSTICE AND THE CHRISTIAN

This course will cover topics that pertain to both the fields of Criminal Justice and Christian Theology, requiring students to examine crime and punishment through the eyes of Jesus Christ. Topics will be predicated on current

events, new developments, and the interests of criminal justice majors and professionals.

Prerequisites & Notes

NULL

Credits: 3

CRIM 2223 - INTRO TO CRIME SCENE INVESTIGATION

This course provides an overview of crime scene response. Students will have the opportunity to perform hands-on exercises utilizing techniques performed by crime scene investigators to include sketching and photographing crime scenes, writing reports, collecting and packaging evidence, processing scenes and evidence for latent prints, and courtroom testimony. Advanced crime scene processing techniques will also be demonstrated.

Prerequisites & Notes

NULL

Credits: 3

CRIM 2503 - HOMICIDE INVESTIGATION

This course will cover investigating a homicide, the major law enforcement officers involved in the investigation, and the basics of preparing the case for trial.

Prerequisites & Notes

NULL

Credits: 3

CRIM 2703 - INTRODUCTION TO FORENSIC SCIENCE

This course is an overview of the application of forensic science and how it applies to the criminal justice system. This course is designed to provide students with an understanding of the techniques and abilities of forensic science with regard to investigative and criminalistic activities. When taken with its accompanying lab, this course meets the science (with lab) general education requirement. This course also meets the specialized needs of the Criminal Justice program.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3343 - CRIMINAL JUSTICE ADMINISTRATION

This course provides students with an overview of public administration within the criminal justice field. The organization, financing, and management functions within the local, state, and federal criminal justice systems are examined. Criminal justice policies and administrative practices are evaluated and compared to the academic theories of public administration.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3803 - CRITICAL ISSUES IN CRIMINAL JUSTICE

This course is a study of current issues and debates that affect the criminal justice system. The curriculum includes an examination and discussion on all aspects and viewpoints of the critical issues faced by professionals within the criminal justice system. Topics for discussion include but are not limited to: public policy implications, media's involvement in the criminal justice system, diversity, workforce generations, criminal justice training, terrorism, shift in types of crime and prevention, and public perceptions of criminal justice professionals.

Prerequisites & Notes

CRIM 2203

Credits: 3

CRIM 4903 - CRIMINAL JUSTICE INTERNSHIP

This elective course requires work experience in an organization providing on-the-job training in criminal justice including state approved police academies. The intern will be supervised by a faculty coordinator and a supervisor in the organization and will report work experience through written and oral reports to the faculty coordinator.

Prerequisites & Notes

Prerequisite: CRIM 3603

Credits: 3

LDRS 2143 - CREATIVITY & CRITICAL THINKING

This course is designed to help students develop creativity, critical thinking, and problem-solving skills. It explores psychological and other factors that affect creativity, and debunks creativity myths. The course examines brainstorming, problem solving, and plan implementation. It covers divergent and convergent thinking, cognitive biases, logical fallacies, elements of persuasion, and viable solutions.

Prerequisites & Notes

None

Credits: 3

LDRS 4033 - HUMANITARIAN COMPASSION PRACTICUM

The Humanitarian Compassion Practicum allows students to apply the theory and course-based learning to real-life situations through actual operation organizations and agencies. Students are responsible for procuring their practicum site, with the assistance of their academic advisor. Hope Education Network partners are available along with the university's own practicum partners.

Prerequisites & Notes

None

Credits: 3

LDRS 4013 - LEADERSHIP FORUM

The course acquaints students to contemporary authors, speakers, managers and professionals recognized as successful leaders across various disciplines. Students will synthesize their writings and critically reflect on their own leadership skills, traits and behaviors as they apply to their ability to manage in a global economy.

Prerequisites & Notes

NULL

Credits: 3

LDRS 4903 - LEADERSHIP INTERNSHIP

This course is a supervised, structured work experience designed to augment and develop practical skills in conjunction with regular coursework. Participants are strongly encouraged to utilize this option to explore potential career paths. This course can be taken for a variable number of credit hours from one (1) to six (6). The default is two (2). Students will work a minimum of 50 hours per credit hour for an approved organization.

Prerequisites & Notes

LDRS 2123 and LDRS 2223

Credits: 2

Divine Design - 17 Credits

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Certificate, Racial Reconciliation Studies (Main)

Program Description:

The Human Services Certificate in Racial Reconciliation will better equip the individuals with the tools to help them navigate through the many barriers (communication, inclusion, etc.) of race, racism, and reconciliation.

Total Program Hours - 9 Hours

NOTE: It is the responsibility of the student to read, review, and fulfill the requirements and total hours of this degree audit for their applicable program.

Required Courses - 9 Hours

PMIN 3073 - NEIGHBORLINESS ACROSS DIVIDING LINE

A study of the biblical call to neighborliness that encourages development of relationships across the historically divided lines of race and economics. Theological and cultural topics will be analyzed to understand how the Greatest

Commandment – loving God and neighbors – can be practically pursued and expressed.

Prerequisites & Notes

NULL

Credits: 3

HUSV 4023 - INTERRACIAL COMMUNICATION

This course explores the theoretical and practical issues related to race/ethnicity, and communication that often frame and impact the dynamics between various racial groups within the United States. The course will cover underpinnings of interracial/interethnic communication including topics such as identity, language, history, cultural influences, and theories. The course is designed to improve each student's understanding and ability to communicate across and within diverse racial groups in the United States.

Prerequisites & Notes

NULL

Credits: 3

Online

Bachelor of Science, Criminal Justice (Online)

Bachelor of Science, Criminal Justice (Online) Four-Year Course Plan

Program Description

The Bachelor of Science Degree in Criminal Justice provides curriculum and practical experiences designed to help develop students and practitioners with critical and analytical skills to promote the administration of justice in a diverse and global society. This program equips students with a thorough understanding of criminal justice systems and theories, and the historical foundation of criminal justice. The undergraduate curriculum is designed to allow students to explore the various agencies, personnel roles, and career opportunities available in the criminal justice field. The Program seeks to educate students as well as promote workforce development by targeting practitioners currently working in the criminal justice field. Students who major in criminal justice have many opportunities to further their personal and professional development.

*Note: Students taking courses online outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. State-specific requirements are specified in the SEU Catalog. Your Academic Advisor is available to help integrate these additional courses into your plan.

Total Program Hours- 120 Credit Hours

Foundational Core- 34 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisite: CRIM 2203

Credits: 3

CRIM 4403 - CRIMINAL LAW

This course examines the core philosophies of criminal law, including both substantive and procedural elements. There is an emphasis on the theoretical foundations and principles of criminal law, state and federal criminal statutes, and court decisions. Discussions will also focus on the various criminal defenses.

Prerequisites & Notes

Prerequisite: None

Credits: 3

CRIM 3223 - RESEARCH IN CRIMINAL JUSTICE

This course is an examination of the fundamental research methods in the field of criminal justice. This includes: the development of research questions and research design, methods of data collection, data analysis, and reporting results.

Prerequisites & Notes

Prerequisite: None

Credits: 3

CRIM 3303 - JUVENILE DELINQUENCY

This course covers the types of delinquency as well as supporting theories. Particular attention will be given to the role of family, school, and the peer group in promoting delinquency. The effects of social institutions on delinquency, prevention, and control are also studied. The juvenile justice system is compared to the adult system and the social consequences of delinquency are studied. This course will provide students with the tools to analyze and evaluate juvenile justice policies and programs.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3403 - AMERICAN CRIMINAL COURTS

This course examines the court system in the United States and provides an introduction to the many elements of the judicial process. Major topics include: the role of the courts, trial procedures, role of decision makers in the court system, the distinctions between civil and criminal systems, the alternatives available to the accused prior to trial proceedings, and public policy as it relates to the court system.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3603 - CORRECTIONS AND PUNISHMENT

This course is an introduction to the corrections system in the United States and will provide an overview of the history, current institutional practices, policies, and legal issues. There is an emphasis on contemporary conditions and alternatives to traditional responses to crime and an exploration of the principles and practices of correctional options afforded to offenders in various types of settings. Topics covered include incarceration, deterrence, rehabilitation, retribution, and system reform.

Prerequisites & Notes

CRIM 2203

Credits: 3

CRIM 4203 - THEORY AND CRIMINAL JUSTICE

This course provides an analysis of how crime affects society. Prevention and control of criminal behavior are based on theoretical models. Several of these models are examined as they relate to the day-to-day functions of the police, courts, and corrections.

Prerequisites & Notes

CRIM 2203

Credits: 3

HUSV 3333 - UNDERSTANDING HUMAN DIVERSITY

This course examines the complex nature of culture and personal identity, explores populations at-risk, and encourages students to understand and appreciate diversity. Specific knowledge of individual cultures, awareness of the patterns of oppression experienced by those cultures, and skills relevant to developing a culturally competent approach to working with diverse people groups are addressed.

Prerequisites & Notes

NULL

Credits: 3

PPOL 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

CRIM 4303 - CRIMINAL JUSTICE SENIOR SEMINAR

This course is designed as the capstone learning experience for all Criminal Justice majors. The course will integrate activities into a comprehensive understanding of the integrative nature of the criminal justice system. Emphasis is on policy evaluation, career options, and member training for a criminal justice agency.

Prerequisites & Notes

Prerequisite: CRIM 3603

Credits: 3

Divine Design (Minor, Electives, Experiential Learning) 47 Credits

General Electives are any college-level courses that do not satisfy specific program requirements. To meet the Divine Design core requirements, students may declare minors, enroll in elective credit, and enjoy experiential learning like study abroad, internships, or practicum. Practicum course options include PRAC 1001 (1 hr), PRAC 1002 (2 hrs), PRAC 1003 (3 hrs), PRAC 1004 (4 hrs). Students may earn up to 24 credit hours toward their degree program through experiential learning practicum.

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

AND

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

OR

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

Area III, Natural Science and Mathematics - 11 Credit Hours

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Area IV, History, Social and Behavioral Sciences - 12 Credit Hours

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Arkansas

Science

Select one course not taken in Foundational Core

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Social Sciences

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Bachelor of Science, Psychology (Online)

Bachelor of Science, Psychology: 4-Year Plan

The Bachelor of Science in Psychology degree provides students with fundamentals in psychological and integration principles. Topics of study include personality, development, abnormal psychology, research methods, and more. Students will learn to incorporate their Christian faith into their work and prepare for paraprofessional fields that require a psychology or behavioral science degree. In addition, they will participate in supervised field experience and conduct and report empirical research in the field. This degree is also ideal for a student considering pursuing a master's degree in a helping profession such as counseling. This online program is a total of 123 credit hours: 56 credit hours for Foundational Core courses, and 41 credit hours of psychology major core courses, 9 credit hours of psychology electives, and 17 credit hours of general electives.

The Bachelor of Science in Psychology covers the main content areas and skills recommended by the American Psychological Association for undergraduate programs. Students who achieve the program objectives will be able to apply their knowledge of human cognitive, emotional, and behavioral processes to a variety of careers that involve working with people. This program also provides the required competencies for students who wish to pursue graduate studies in psychology, counseling, and related fields.

Program Objectives:

1. Students will demonstrate competency in scientific reasoning and psychological research methods.
2. Students will demonstrate a working knowledge of psychology's key concepts and content domains.
3. Students will describe how they integrate their Christian faith and ethics with their general understanding of psychology.
4. Students will demonstrate qualities of professionalism and preparedness for a career.
5. Students will apply multicultural and cross-cultural knowledge and values to personal and professional development.

Additional Requirements:

Potential Career Options:

- Advertising Agent
- Career Counselor
- Case Manager
- Child Care Worker
- Laboratory Assistant
- Market Researcher
- Psychiatric Technician
- Probation and Parole Officer

- Rehabilitation Specialist
- Sales Representative
- Social Service Specialist
- Teacher

Total Program Hours- 120 Credit Hours

Foundational Core- 34 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation- 9 credits

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credits

Discursive Inquiry- 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry- 4 Credit Hours

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

Quantitative Inquiry- 3 Credit Hours

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

Socio-Historical Inquiry-6 Credit Hours

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

Select One of the Following:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 45 Credit Hours

PSYC 2003 - COMMUNICATION AND CAREERS IN PSYCHOLOGY

This course is an introduction to communication in the field of psychology. Students will develop skills in information literacy, comprehension of peer-reviewed literature, synthesis of information, and use of proper APA standards. Students will also develop their verbal presentation skills. Additionally, students will be introduced to the different career opportunities at both baccalaureate and graduate-degree levels as well as requirements and skills required for admissions into graduate school.

Prerequisites & Notes

PSYC 1133

Credits: 3

PSYC 2013 - RESEARCH METHODS IN PSYCHOLOGY

This course addresses the application of various research methods of inquiry in application to theory and practice for the purpose of knowledge building and the development of best practice. Emphasis is on developing general research skills that can be applied within any area of psychology. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice, and evaluation of theory. The focus is on the development of research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

Prerequisite: PSYC 2003

Corequisite: PSYC 2023

Credits: 3

PSYC 2023 - STATISTICAL METHODS

This course studies the application of statistical methods to existing data. Topics include organizing and presenting data, descriptive and inferential measures, and interpreting statistical information. Emphasis will be on sampling, probability, hypothesis testing, and appropriate application of statistical tests.

Prerequisites & Notes

Prerequisite: MATH 1213

Corequisite: PSYC 2013

Credits: 3

PSYC 2133 - THEORIES OF PERSONALITY

This course is an introduction to the study of personality formation. Major personality themes are critically examined. Students are introduced to the application of these theories in counseling and the treatment of mental illness.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

PSYC 3003 - ABNORMAL PSYCHOLOGY

This course is a study of the nature, causes, and treatment of abnormal behavior, including personality disorders, neuroses, psychoses, stress reactions, and other dysfunctions. Elements contributing to mental health and well-integrated personality are also considered.

Prerequisites & Notes

PSYC 1133 or PSYC 1233 , PSYC 2133

Credits: 3

PSYC 3023 - CULTURAL PSYCHOLOGY

This course provides students with an introduction to multicultural and cross-cultural psychology including its theories, research, and exploration of intercultural knowledge. The course examines the dynamics of cultural relevance related to psychological processes, abnormality, and treatment. The course implements exercises of self-awareness and engagement within other cultures.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 3433 - INTEGRATION SEMINAR PSYCH AND THEOL

This course is a study of the contemporary evangelical efforts to integrate psychology and theology, focusing on the value of an integrative approach to both disciplines. Topics include behavior, cognition, emotion, and motivation. Junior or senior level standing required.

Prerequisites & Notes

Prerequisites: PSYC 1133 or PSYC 1233 ; PSYC 2133

Credits: 3

PSYC 3733 - SOCIAL PSYCHOLOGY

This course is a survey of theories of interpersonal behavior and group dynamics emphasizing the influence of groups and group membership upon individual behavior. Topics include aggression, attitudes, attribution, conformity, altruism, communication, propaganda, morale, and other aspects of interpersonal relationships.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 4033 - PHYSIOLOGICAL PSYCHOLOGY

This course is a study of the physiological components of behavior. Topics include structure and function of the nervous system; theory of brain functions; and current problems, theories, and techniques in physiological psychology.

Prerequisites & Notes

PSYC 1133 or PSYC 1233; PSYC 2133; BIOL 1333, BIOL 133L

Credits: 3

PSYC 4083 - LEARNING AND COGNITION

This course is an introduction to the psychological study of learning and cognition. Topics examined will include classical conditioning, operant conditioning, observational learning, perception, attention, and memory. Traditional views as well as current trends will be discussed.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 4093 - PSYCHOLOGY CAPSTONE SENIOR SEMINAR

This capstone course will provide students the opportunity to critically reflect on and apply the theories and skills learned throughout their Psychology degree program. Students will articulate and include a capstone project related to their proposed career goals. Through this course students will demonstrate their understanding as well as faith integration through the production of a major paper/project and presentation.

Prerequisites & Notes

Prerequisite: Final semester senior, PSYC 4033 , PSYC 4083

Credits: 3

Psychology Electives: (Select 3 Courses)- 9 Credit Hours

PSYC 2033 - INDUSTRIAL & ORGANIZATIONAL PSYC

This course includes an application of psychological principles to industry, business, and other organizations. Topics include organization of work, selection, training, motivation, job satisfaction, supervision, and decision-making.

Prerequisites & Notes

NULL

Credits: 3

PSYC 2233 - MARRIAGE AND FAMILY

This course is a study of the major issues related to courtship, marriage, and family formation. Special attention is given to the social conditions influencing courtship, marriage, divorce, and family life. Topics include dating rituals, gender differences, expectations, parenting, family dysfunction, family violence, and strategies for sound relating. The role of family counselors and therapists is also discussed.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

PSYC 3052 - FIELD EXPERIENCE IN PSYCHOLOGY

This course provides students with practical experience in a mental health, social service, educational psychology, or related setting under the supervision of a qualified in-service supervisor and a college supervisor. Placement must be approved by the course instructor.

Prerequisites & Notes

PSYC 2133

Credits: 2

PSYC 3063 - Attitudes and Motivation in the Wor

This course explores concepts and theories related to job attitudes and motivation in the workplace. Topics include motivational strategies, models of performance, and the impact of job satisfaction, work values, workplace environment, management style, and organizational commitment on employee attitudes and motivation.

Prerequisites & Notes

PSYC 2033

Credits: 3

PSYC 3073 - Group Dynamics in the Workplace

This course explores concepts and theories related to group dynamics and small group processes as they related to organizations. Topics include leadership, decision-making, stages of group development, group structure, group communication, team building, conflict resolution, and the intra-and inter-personal dynamics within small group

Prerequisites & Notes

PSYC 2033

Credits: 3

PSYC 3103 - MARITAL AND FAMILY THERAPY

This course is an overview of counseling approaches to family problems, including the family systems approach. Issue areas explored include communication, role expectations, and sexual dysfunction. Various counseling techniques related to marital maladjustment are explored. Principal approaches to marital therapy and family therapy are emphasized.

Prerequisites & Notes

PSYC 2133 , PSYC 2233

Credits: 3

PSYC 3131 - FIELD EXPERIENCE II

This course provides students with practical experience in a mental health, social service, educational psychology, or related setting under the supervision of a qualified in-service supervisor and a college supervisor. Placement must be approved by the course instructor.

Prerequisites & Notes

Prerequisites: PSYC 2133; PSYC 3052

Credits: 1

PSYC 3203 - HUMAN SEXUALITY

This course provides a comprehensive overview of the field of human sexuality, exploring the biological, psychological, sociological, and theological approaches to the study of human sexuality. Specifically, the course will address anatomy, physiology, and genetics in the development of gender identity and sexual function, the emotional factors affecting sexual experience, the nature and causes of sexual diseases and dysfunctions, the role of sexuality in relationships to others and to the self, and the moral and ethical themes related to the expression of sexuality.

Prerequisites & Notes

PSYC 2133 ; PSYC 2233

Credits: 3

PSYC 3333 - PSYCHOLOGY OF RELIGION

This course is a critical examination of the psychological research on the effects of religious experience on individual development and mental health. Historical developments, current trends, and major contemporary contributions to this area of study will be explored. There will be an emphasis on how the church can function to facilitate mental health.

Prerequisites & Notes

PSYC 2133 and BIBL 1113

Credits: 3

PSYC 3533 - INTRODUCTION TO COUNSELING

This course is a study of various theoretical approaches to the practice of counseling and psychotherapy with normal and disturbed clients. Focus is on the psychoanalytic, cognitive, behavioral, and phenomenological approaches.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 3553 - INTRO TO COUNSELING CHILDREN & YOUTH

In this course, students will explore issues, theories, and applications related to understand and helping children and adolescents with social or emotional problems. Students will learn to assess behavior and incorporate ethically and legally appropriate strategies to meet the needs of counseling children and adolescents.

Prerequisites & Notes

PSYC 3533

Credits: 3

PSYC 3633 - PROFESSIONAL, ETHICAL, LEGAL ISSUES

This course is an exploration of the development of professional self with emphasis on the changing ethical and legal context for practice. Approaches to counseling are explored with an emphasis on students' development of professional style. Students explore issues of professional and personal values and ethics, personality, values, and interests.

Prerequisites & Notes

NULL

Credits: 3

PSYC 3833 - SUBSTANCE ABUSE AND RECOVERY

This course is a study of the nature and causes of substance abuse and addiction. The psychological and social dynamics of addiction are explored with an emphasis on models of treatment and patterns of recovery and recidivism.

Prerequisites & Notes

NULL

Credits: 3

PSYC 4003 - SELECTED TOPICS

A seminar for investigation of specialized topics in psychology not addressed by other courses. Content is determined by the department to address special needs or interest. May be repeated for a maximum of six hours. The same topic may not be repeated.

Prerequisites & Notes

NULL

Credits: 3

PSYC 4013 - PSYCHOLOGY OF LEADERSHIP

The course will develop the student's communication and servant leadership skills through the joining of traditional theories and Christian based views of what it means to be an effective communicator and leader. Through the course the student will analyze leadership behaviors and communication styles from multiple perspectives and synthesize them into a personal philosophy of servant leadership applicable to both their personal and professional lives.

Prerequisites & Notes

NULL

Credits: 3

PSYC 4043 - DIAGNOSIS, ASSESSMENT & CASE MGMT

This course is an introduction to the skills needed for client diagnosis, assessment, and case management that are currently used in the helping professions. The course will focus on identifying pertinent information for preliminary assessment of a presenting problem, goal setting and contracting, monitoring for progress, and documenting sensitive client data. Topics will include individual psycho-social assessments, and family assessments.

Prerequisites & Notes

PSYC 2133; PSYC 3003

Credits: 3

PSYC 4063 - PERSONNEL PSYCHOLOGY

This course explores concepts and theories related to personnel psychology, which encompasses all aspects of personnel management from the time the employee is recruited through the end of their work with the organization. Topics included are workforce planning, recruitment, selection, placement, training, promotion, evaluation, retention, and counseling of employees.

Prerequisites & Notes

PSYC 2033

Credits: 3

PSYC 4073 - PSYCHOLOGY PRACTICUM

This course is a one-semester practical experience of 150 hours in a mental health, social service, educational psychology, or related setting under the supervision of a qualified in-service supervisor and a college supervisor. The course may be repeated once.

Prerequisites & Notes

PSYC 2133; Course Instructor approval required

Credits: 3

PSYC 4123 - CRISIS PSYCHOLOGICAL MANAGEMENT

The first few days through which individuals experience crisis are critical to their physical and psychological survivability. Support personnel must understand the foundational aspects of acute distress in both those experiencing crisis and those providing relief and support. Students are trained to identify stress symptoms and emotional suffering in order to assist as much as appropriate and then to direct individuals to qualified support specialists. This course is not intended for professional or trained counselors, but for those who are on site immediately following natural or human caused disasters. This course is cross-referenced with PMIN 4083.

Prerequisites & Notes

NULL

Credits: 3

PSYC 4153 - CHILDREN AND YOUTH CRISIS

Children and youth are especially susceptible to the traumatic effects of crises. Because of their higher level of innocence, minimal experience, and the vulnerable place they have in many societies, relief endeavors must identify actions and strategies as quickly as possible. Students identify stress symptoms and emotional suffering in order to help to the extent appropriate and then direct individuals to qualified support specialists. This course is not intended for professional or trained counselors, but for those who are on site immediately following crises.

Prerequisites & Notes

NULL

Credits: 3

PSYC 4833 - TESTING AND MEASUREMENTS

This course is a study of the basic measurement theory and its practical application to problems of choosing, administering, and evaluating the results of tests. The more common aptitude, achievement, interest, intelligence, and personality tests will be considered.

Prerequisites & Notes

PSYC 2023 or MATH 2023

Credits: 3

PSYC 4903 - CRISIS INTERVENTION

This course studies crisis intervention theories and strategies of intervention applied to various crises, such as posttraumatic stress disorder (PTSD), lethality, sexual assault, addiction, partner violence, and loss. Emphasis is on a six-step model of crisis intervention that informs and empowers the layperson or the helping professional.

Prerequisites & Notes

Prerequisite: PSYC 3052, PSYC 3443

Credits: 3

PSYC 4906 - PSYCHOLOGY INTERNSHIP

This course is a one-semester practical experience of 300 hours in a mental health, social service, educational psychology, or related setting under the supervision of a qualified in-service supervisor and a college supervisor.

Prerequisites & Notes

PSYC 2133 ; Course Instructor approval required

Credits: 6

PSYC 4913 - PSYCHOLOGICAL RESEARCH EXPERIENCE

This course is a practical experience in psychological research for one full semester, approved by the department chair and supervised by a principal investigator who provides continuous evaluation of the student's research.

Prerequisites & Notes

PSYC 2013, PSYC 2023, and Department Chair approval

Credits: 3

EDUC 2233 - EDUCATIONAL PSYCHOLOGY

This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.

Prerequisites & Notes

None

Credits: 3

SRMT 3203 - MENTAL HEALTH AND SPORT PSYCHOLOGY

This course is an introduction to the many facets of applied sport psychology, the mental aspects of sports, and the contemporary performance enhancement techniques utilized in sport psychology throughout the world. It includes the theory and practice of sport psychology with areas of the theoretical basis of mental aspects of training processes and competition, mental training techniques for psychomotor performance, and basic issues of performance psychology.

Prerequisites & Notes

SRMT 2103

Credits: 3

Divine Design - 41 Credits

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama**Area I, Written Composition - 6 Credit Hours****ENGL 2113 - PROFESSIONAL COMMUNICATION**

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

AND

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

OR

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

Area III, Natural Science and Mathematics - 11 Credit Hours

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Area IV, History, Social and Behavioral Sciences - 12 Credit Hours

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Spring Semester

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

CRIM 2203 - CRIMINAL JUSTICE SYSTEM

This course covers the origin, evolution, and daily operation of the criminal justice system in the United States. Relationships between law enforcement, the court system, and corrections are studied.

Prerequisites & Notes

NULL

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Year Two

Fall Semester

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CRIM 3203 - SOCIOLOGY OF POLICING

This course will cover the history, evolution and structure of policing in the United States. Popular innovations in policing and law enforcement will be emphasized. Special attention to conflicts and imperatives which define police officers' roles and the character of police work will be discussed along with careers and hiring practices by law enforcement agencies.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3303 - JUVENILE DELINQUENCY

This course covers the types of delinquency as well as supporting theories. Particular attention will be given to the role of family, school, and the peer group in promoting delinquency. The effects of social institutions on delinquency, prevention, and control are also studied. The juvenile justice system is compared to the adult system and the social consequences of delinquency are studied. This course will provide students with the tools to analyze and evaluate juvenile justice policies and programs.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

Socio-Historical Inquiry (3 credits) Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester

PPOL 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

CRIMINAL JUSTICE ELECTIVE - 3 Credit Hours

ELECTIVE

Credits: 3

CRIM 2223 - INTRO TO CRIME SCENE INVESTIGATION

This course provides an overview of crime scene response. Students will have the opportunity to perform hands-on exercises utilizing techniques performed by crime scene investigators to include sketching and photographing crime scenes, writing reports, collecting and packaging evidence, processing scenes and evidence for latent prints, and

courtroom testimony. Advanced crime scene processing techniques will also be demonstrated.

Prerequisites & Notes

NULL

Credits: 3

Summer Semester

CRIM 2003 - CRIMINAL JUSTICE AND THE CHRISTIAN

This course will cover topics that pertain to both the fields of Criminal Justice and Christian Theology, requiring students to examine crime and punishment through the eyes of Jesus Christ. Topics will be predicated on current events, new developments, and the interests of criminal justice majors and professionals.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3223 - RESEARCH IN CRIMINAL JUSTICE

This course is an examination of the fundamental research methods in the field of criminal justice. This includes: the development of research questions and research design, methods of data collection, data analysis, and reporting results.

Prerequisites & Notes

Prerequisite: None

ELECTIVE

Credits: 3

CRIMINAL JUSTICE ELECTIVE - 3 Credit Hours

ELECTIVE

Credits: 3

CRIM 4203 - THEORY AND CRIMINAL JUSTICE

This course provides an analysis of how crime affects society. Prevention and control of criminal behavior are based on theoretical models. Several of these models are examined as they relate to the day-to-day functions of the police, courts, and corrections.

Prerequisites & Notes

CRIM 2203

Credits: 3

LDRS 3033 - LEADERSHIP & HUMAN DIVERSITY

This course examines the complex nature of leadership, culture and personal identity, explores populations at-risk, and encourages students to understand and appreciate diversity. Specific knowledge of leadership as it relates to individual cultures, awareness of the patterns of oppression experienced by those cultures, and skills relevant to developing a culturally competent approach to working with diverse people groups are addressed.

Prerequisites & Notes

None

Credits: 3

Spring Semester

CRIM 3403 - AMERICAN CRIMINAL COURTS

This course examines the court system in the United States and provides an introduction to the many elements of the judicial process. Major topics include: the role of the courts, trial procedures, role of decision makers in the court system, the distinctions between civil and criminal systems, the alternatives available to the accused prior to trial proceedings, and public policy as it relates to the court system.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

GENERAL ELECTIVE - 2 HR ELECTIVE

Select a 2 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

NULL

Credits: 4

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Total Program Hours - 120 Credit Hours

NOTE: It is the responsibility of the student to read, review, and fulfill the requirements and total hours of this degree audit for their applicable degree.

Bachelor of Science, Human Services (3/1) (Online)

Bachelor of Science, Human Services (3/1) (Four Year Plan)

This path sets students up to complete their bachelor's degree in 3 years by going to school year-round. And then upon admission into the Masters in Human Services, they will be able to complete that degree in one year with full-time attendance.

*Note: Students taking courses online outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. State-specific requirements are specified in the SEU Catalog. Your Academic Advisor is available to help integrate these additional courses into your plan.

Total Program Hours- 120 Credit Hours

Foundational Core-34 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation- 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credit Hours

Discursive Inquiry- 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry (6 credits) Select Two:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

Select 1 of the following:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 39 Credit Hours

HUSV 2013 - INTRODUCTION TO HUMAN SERVICES

An examination of the fundamental knowledge, skill and attitudinal base of the human services profession. Included are philosophy, value base, ethical standards, early history, professional roles and functions, client systems, purposes served, fields of practice, professional organizations, and the current status of Human Services. An introductory exposure to generalist human service practice is provided.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2043 - CASE MANAGEMENT AND INTERVENTION

This course gives students a foundation in case management competencies and intervention strategies.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2053 - HUMAN SERVICES DELIVERY

This course explores the different delivery systems and models used in human services. This course will examine how changes in public policy, administrative directives, and legal rulings impact service delivery. This course will also examine the impact that past political, social, and cultural changes have on the way services are delivered.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2433 - HUMN SRVCES & DVLPMT ACRS LIFE-SPAN

This course will examine human development across the life-span from a human services perspective. The focus of the course will center around the various services available as they relate to the individual's life-span development from conception to death.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3033 - GROUP DYNAMICS

This course is a study of group dynamics, with particular attention to therapeutic group- process. The role of the leader, issue-specific or problem-specific group facilitation, and strategies for dealing with particular group-process issues will be emphasized. Participation in group-process is required of every student.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3063 - PROGRAM PLANNING AND EVALUATION

This course will examine the theory, process, and procedures of program planning and evaluation. This course will also provide students with the basic set of skills necessary to design, develop, and evaluate various human service programs.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3073 - HUMAN SERVICES PRACTICUM AND FIELD EXPERIENCE I

This course allows students the opportunity to put theory, skills, and professional behavior into practice by working with an agency within the human services profession. Students will gain key knowledge, skills, and abilities by working within a field setting.

Prerequisites & Notes

Prerequisites: HUSV 2013 , HUSV 2053 , HUSV 2043 , HUSV 3333 , HUSV 3063 , HUSV 3033 , HUSV 4053 , HUSV 2433

Credits: 3

HUSV 3083 - HUMAN SERVICES PRACTICUM AND FIELD EXPERIENCE II

This course is a continuation of HUSV 3073. It provides students the opportunity to put theory, skills, and professional behavior into practice by working with an agency within the human services profession. Students will gain key knowledge, skills, and abilities by working within a field setting.

Prerequisites & Notes

Prerequisite: HUSV 3073

Credits: 3

HUSV 3333 - UNDERSTANDING HUMAN DIVERSITY

This course examines the complex nature of culture and personal identity, explores populations at-risk, and encourages students to understand and appreciate diversity. Specific knowledge of individual cultures, awareness of the patterns of oppression experienced by those cultures, and skills relevant to developing a culturally competent approach to working with diverse people groups are addressed.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3533 - CONFLICT RESOLUTION IN HUMAN SRVCS

This course focuses on human interaction, conflict, and conflict resolution theories in the helping professions. This course also explores methods of conflict resolution associated with positive outcomes related to settling disputes and personal development

Prerequisites & Notes

NULL

Credits: 3

HUSV 3833 - MANAGEMENT IN HUMAN SERVICES

This course provides an introduction to management practices of human service programs, agencies, and organizations with an emphasis on program development.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3433 - HUMAN SERVICES AND FAITH INTEGRATION

The purpose of this course is to provide students with an opportunity to explore human services from a Christian world view that involves intentionally integrating faith and human services with an emphasis on spiritual and professional growth.

Prerequisites & Notes

NULL

Credits: 3

HUSV 4053 - RESEARCH METHODS

The application of the scientific method of inquiry to theory and practice for the purpose of knowledge building and the development of best practice. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice and evaluation of theory. The focus is on the development of social research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

NULL

Credits: 3

Please see the degree audit for MA in Human Services

Divine Design - 47 Credits

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

Communication

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Natural Science

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Social Science

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Montana

Montana requires 6 credit hours of natural science with a laboratory experience. Students may choose to take BIOL 1334 to complete the requirement or any other science course to meet the credit hour requirement.

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

Nevada

3 credit hours needed. The Socio-Historical requirement must be fulfilled by taking PPOL 2433 or by earning credit for one of the following combinations of classes from an accredited Nevada college: 1) HIST 100, 2) PCS 101, 3) HIST 101 and HIST 102, or 4) or HIST 101 and 217.

Ohio

Ohio students need an additional two credit hours in one or more of the following areas: Oral and Written Communication, Mathematics, Statistics and Logic, Arts, Humanities, Culture and Diversity, Natural Sciences, Technology and Innovation.

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

* if not already taken or 2 more credits to get to 36 hours

Oklahoma

In addition to the courses listed below, Oklahoma students need an additional 7 credit hours in one ore more of the following: History, Social Science, Behavioral Science, Humanities, Math, Natural Science, Language, or Fine Arts.

PPOL 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

Select One:

Choose one not already chosen for Foundational Core

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Minor, Criminal Justice (Online)

Required Courses - 18 Credit Hours

CRIM 2203 - CRIMINAL JUSTICE SYSTEM

This course covers the origin, evolution, and daily operation of the criminal justice system in the United States. Relationships between law enforcement, the court system, and corrections are studied.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3203 - SOCIOLOGY OF POLICING

This course will cover the history, evolution and structure of policing in the United States. Popular innovations in policing and law enforcement will be emphasized. Special attention to conflicts and imperatives which define police officers' roles and the character of police work will be discussed along with careers and hiring practices by law enforcement agencies.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3303 - JUVENILE DELINQUENCY

This course covers the types of delinquency as well as supporting theories. Particular attention will be given to the role of family, school, and the peer group in promoting delinquency. The effects of social institutions on delinquency, prevention, and control are also studied. The juvenile justice system is compared to the adult system and the social consequences of delinquency are studied. This course will provide students with the tools to analyze and evaluate juvenile justice policies and programs.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3403 - AMERICAN CRIMINAL COURTS

This course examines the court system in the United States and provides an introduction to the many elements of the judicial process. Major topics include: the role of the courts, trial procedures, role of decision makers in the court system, the distinctions between civil and criminal systems, the alternatives available to the accused prior to trial proceedings, and public policy as it relates to the court system.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3603 - CORRECTIONS AND PUNISHMENT

This course is an introduction to the corrections system in the United States and will provide an overview of the history, current institutional practices, policies, and legal issues. There is an emphasis on contemporary conditions and alternatives to traditional responses to crime and an exploration of the principles and practices of correctional options afforded to offenders in various types of settings. Topics covered include incarceration, deterrence, rehabilitation, retribution, and system reform.

Prerequisites & Notes

CRIM 2203

Credits: 3

CRIM 2003 - CRIMINAL JUSTICE AND THE CHRISTIAN

This course will cover topics that pertain to both the fields of Criminal Justice and Christian Theology, requiring students to examine crime and punishment through the eyes of Jesus Christ. Topics will be predicated on current events, new developments, and the interests of criminal justice majors and professionals.

Prerequisites & Notes

NULL

Credits: 3

Total - 18 Credit Hours

Bachelor of Science, Human Services (Online)

Bachelor of Science, Human Services Four-Year Course Plan

Program Description

The Bachelor of Science in Human Services is designed for students who seek an interdisciplinary education to assist them in careers that provide integrated services to individuals and families in need of assistance, or to prepare students in pursuing graduate studies in the area of human services or related fields.

The goal of this program is to prepare or enhance students' abilities in positions that seek to improve the quality of life for those who are served, remediation of problems, meeting basic human needs, and advocating change in the systems that affect the lives of those needing assistance.

*Note: Students taking courses online outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. State-specific requirements are specified in the SEU Catalog. Your Academic Advisor is available to help integrate these additional courses into your plan.

Total Program Hours- 120 Credit Hours

Foundational Core- 34 Credit Hours

SEU Foundations

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation- 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work

together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credit Hours

Discursive Inquiry- 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

NSCI 1044 - NUTRITION SCIENCE

This online course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 4

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry (6 credits) Select Two:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

Select One of the Following:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 33 Credit Hours**HUSV 2013 - INTRODUCTION TO HUMAN SERVICES**

An examination of the fundamental knowledge, skill and attitudinal base of the human services profession. Included are philosophy, value base, ethical standards, early history, professional roles and functions, client systems, purposes served, fields of practice, professional organizations, and the current status of Human Services. An introductory exposure to generalist human service practice is provided.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2043 - CASE MANAGEMENT AND INTERVENTION

This course gives students a foundation in case management competencies and intervention strategies.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2053 - HUMAN SERVICES DELIVERY

This course explores the different delivery systems and models used in human services. This course will examine how changes in public policy, administrative directives, and legal rulings impact service delivery. This course will also

examine the impact that past political, social, and cultural changes have on the way services are delivered.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2433 - HUMN SRVCES & DVLPMT ACRS LIFE-SPAN

This course will examine human development across the life-span from a human services perspective. The focus of the course will center around the various services available as they relate to the individual's life-span development from conception to death.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3033 - GROUP DYNAMICS

This course is a study of group dynamics, with particular attention to therapeutic group- process. The role of the leader, issue-specific or problem-specific group facilitation, and strategies for dealing with particular group-process issues will be emphasized. Participation in group-process is required of every student.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3063 - PROGRAM PLANNING AND EVALUATION

This course will examine the theory, process, and procedures of program planning and evaluation. This course will also provide students with the basic set of skills necessary to design, develop, and evaluate various human service programs.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3333 - UNDERSTANDING HUMAN DIVERSITY

This course examines the complex nature of culture and personal identity, explores populations at-risk, and encourages students to understand and appreciate diversity. Specific knowledge of individual cultures, awareness of the patterns of oppression experienced by those cultures, and skills relevant to developing a culturally competent approach to working with diverse people groups are addressed.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3533 - CONFLICT RESOLUTION IN HUMAN SRVCS

This course focuses on human interaction, conflict, and conflict resolution theories in the helping professions. This course also explores methods of conflict resolution associated with positive outcomes related to settling disputes and personal development

Prerequisites & Notes

NULL

Credits: 3

HUSV 3433 - HUMAN SERVICES AND FAITH INTEGRATION

The purpose of this course is to provide students with an opportunity to explore human services from a Christian world view that involves intentionally integrating faith and human services with an emphasis on spiritual and professional growth.

Prerequisites & Notes

NULL

Credits: 3

HUSV 4053 - RESEARCH METHODS

The application of the scientific method of inquiry to theory and practice for the purpose of knowledge building and the development of best practice. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice and evaluation of theory. The focus is on the development of social research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (Major Specific Experiential Learning)- 6 Credit Hours

HUSV 3073 - HUMAN SERVICES PRACTICUM AND FIELD EXPERIENCE I

This course allows students the opportunity to put theory, skills, and professional behavior into practice by working with an agency within the human services profession. Students will gain key knowledge, skills, and abilities by working within a field setting.

Prerequisites & Notes

Prerequisites: HUSV 2013 , HUSV 2053 , HUSV 2043 , HUSV 3333 , HUSV 3063 , HUSV 3033 , HUSV 4053 , HUSV 2433

Credits: 3

HUSV 3083 - HUMAN SERVICES PRACTICUM AND FIELD EXPERIENCE II

This course is a continuation of HUSV 3073. It provides students the opportunity to put theory, skills, and professional behavior into practice by working with an agency within the human services profession. Students will gain key knowledge, skills, and abilities by working within a field setting.

Prerequisites & Notes

Prerequisite: HUSV 3073

Credits: 3

Divine Design - 47 Credits

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

3 credit hours needed. The Socio-Historical requirement must be fulfilled by taking PPOL 2433 or by earning credit for one of the following combinations of classes from an accredited Nevada college: 1) HIST 100, 2) PCS 101, 3) HIST 101 and HIST 102, or 4) or HIST 101 and 217.

Ohio

Ohio students need an additional two credit hours in one or more of the following areas: Oral and Written Communication, Mathematics, Statistics and Logic, Arts, Humanities, Culture and Diversity, Natural Sciences, Technology and Innovation.

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

* if not already taken or 2 more credits to get to 36 hours

Oklahoma

In addition to the courses listed below, Oklahoma students need an additional 7 credit hours in one ore more of the following: History, Social Science, Behavioral Science, Humanities, Math, Natural Science, Language, or Fine Arts.

PPOL 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

Select One:

Choose one not already chosen for Foundational Core

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Bachelor of Science, Psychology - (Online) Four-Year Course Plan

Year One

First Semester - 16 Credit Hours

CORE 1001 - COLLEGE AND CHRISTIAN CALLING

This course serves as an introduction to the mission of Southeastern University and the academic tradition of liberal arts education. The course prepares students for academic and social success by focusing on the areas of success factors for higher education, Christian higher education as calling, and personal and spiritual formation.

Prerequisites & Notes

NULL

Credits: 1

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

ENGL 1133 - ENGLISH COMPOSITION I

Study and practice in the critical reading and effective writing of expository prose, with an emphasis on fluency and style.

Credits: 3

BIOT 1433 - THE OLD TESTAMENT INTERPRETATION

The course serves as an introduction to Old Testament interpretation. It provides an elemental framework for interpreting the Old Testament by exploring its ancient Near Eastern contexts; discussing literary, thematic, and theological constructs; and demonstrating how it informs Christian thought and practice.

Prerequisites & Notes

NULL

Credits: 3

Second Semester - 16 Credit Hours

ENGL 1233 - ENGLISH COMPOSITION II

This course includes study and practice in the critical reading and effective writing of argumentative and expository prose, with an emphasis on the documented paper. A research paper is required.

Prerequisites & Notes

ENGL 1133

Credits: 3

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

PSYC 2003 - COMMUNICATION AND CAREERS IN PSYCHOLOGY

This course is an introduction to communication in the field of psychology. Students will develop skills in information literacy, comprehension of peer-reviewed literature, synthesis of information, and use of proper APA standards. Students will also develop their verbal presentation skills. Additionally, students will be introduced to the different career opportunities at both baccalaureate and graduate-degree levels as well as requirements and skills required for admissions into graduate school.

Prerequisites & Notes

PSYC 1133

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Year Two

First Semester - 15 Credit Hours

PSYC 2133 - THEORIES OF PERSONALITY

This course is an introduction to the study of personality formation. Major personality themes are critically examined. Students are introduced to the application of these theories in counseling and the treatment of mental illness.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

PSYC 2233 - MARRIAGE AND FAMILY

This course is a study of the major issues related to courtship, marriage, and family formation. Special attention is given to the social conditions influencing courtship, marriage, divorce, and family life. Topics include dating rituals, gender differences, expectations, parenting, family dysfunction, family violence, and strategies for sound relating. The role of family counselors and therapists is also discussed.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

BINT 1533 - THE NEW TESTAMENT INTERPRETATION

This course serves as an introduction to the New Testament in the context of its first century environments. The course examines the teachings and interpretations of the New Testament as well as the role of the Scriptures in the Church.

Prerequisites & Notes

NULL

Credits: 3

History Elective (select one):

HIST 1033 - WORLD CIVILIZATION TO 1600

A survey of world history from the beginning of civilization to 1600. Introduction to the origins and early development of individual civilizations. Stresses interdependency and interrelations among cultures, and compares social, political, and religious movements.

Prerequisites & Notes

NULL

Credits: 3

HIST 1043 - WORLD CIVILIZATION SINCE 1600

A survey of world history from 1600 to the present. Emphasis is placed on various nationalistic movements including the English, American, and French Revolutions; the rise of new nations; scientific expansion; changes in religious sects; world conflicts; and status of the world at the present.

Prerequisites & Notes

NULL

Credits: 3

HIST 2013 - AMERICAN HISTORY TO 1877

A survey of American history from discovery to 1877. Topics include the colonial period, the revolutionary era, the Constitution, Jeffersonianism, economic and territorial expansion, sectional tensions, the Civil War, and Reconstruction.

Prerequisites & Notes

NULL

Credits: 3

HIST 2023 - AMERICAN HISTORY 1877 TO THE PRESENT

A survey of American history from 1877 to the present. Topics include the New South, the New West, foreign affairs, industrialization, the Progressive Era, the World Wars, the Depression, the Cold War, and present issues.

Prerequisites & Notes

NULL

Credits: 3

PPOL 2433 - UNITED STATES & NEVADA CONSTITUT

This course is a study of the legal culture in the United States, including the British common law system, origins of the U.S. and State of Nevada Constitutions, amendments, and landmark cases. This course is required to be taken by Las Vegas, NV extension site students only.

Prerequisites & Notes

NULL

Credits: 3

*Required for Nevada students.

Second Semester - 15 Credit Hours

PSYC 2013 - RESEARCH METHODS IN PSYCHOLOGY

This course addresses the application of various research methods of inquiry in application to theory and practice for the purpose of knowledge building and the development of best practice. Emphasis is on developing general research skills that can be applied within any area of psychology. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice, and evaluation of theory. The focus is on the development of research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

Prerequisite: PSYC 2003

Corequisite: PSYC 2023

Credits: 3

PSYC 2023 - STATISTICAL METHODS

This course studies the application of statistical methods to existing data. Topics include organizing and presenting data, descriptive and inferential measures, and interpreting statistical information. Emphasis will be on sampling, probability, hypothesis testing, and appropriate application of statistical tests.

Prerequisites & Notes

Prerequisite: MATH 1213

Corequisite: PSYC 2013

Credits: 3

THEO 2123 - CHRISTIAN THOUGHT AND PRACTICE

This course surveys the history of Christian thought and practices. Doctrinal topics introduced in the course include the doctrines of God, Jesus Christ, the Holy Spirit, humanity, salvation, the church, scripture, and last things. The course explores the application of Christian practices and spiritual disciplines such as prayer, communion, baptism, and social responsibility to the students' community.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Math Elective (select one):

MATH 1223 - QUANTITATIVE REASONING

This course emphasizes quantitative reasoning skills and is designed to prepare students to think critically about the world they live in. Applications in consumer education, civic engagement, and personal finance will be presented. Topics include logic, probability, statistics, exponential growth, and data analysis.

Prerequisites & Notes

NULL

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1323 - EXPLORATION IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. Possible topics for this course are set theory, elementary number theory, history of mathematics, numbers and number systems, financial mathematics, systems of equations, and matrices.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Year Three

First Semester - 15 Credit Hours

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

PSYC 3023 - CULTURAL PSYCHOLOGY

This course provides students with an introduction to multicultural and cross-cultural psychology including its theories, research, and exploration of intercultural knowledge. The course examines the dynamics of cultural relevance related to psychological processes, abnormality, and treatment. The course implements exercises of self-awareness and engagement within other cultures.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 3003 - ABNORMAL PSYCHOLOGY

This course is a study of the nature, causes, and treatment of abnormal behavior, including personality disorders, neuroses, psychoses, stress reactions, and other dysfunctions. Elements contributing to mental health and well-integrated personality are also considered.

Prerequisites & Notes

PSYC 1133 or PSYC 1233 , PSYC 2133

Credits: 3

THEO 3123 - INTRODUCTION OF ETHICS

This course examines the philosophical and theological principles and issues related to ethics. It addresses meta-ethical questions about the relationship between moral language and concepts and various metaphysical and post-metaphysical views; normative ethical theories; theological structures and implications of ethics; and contemporary ethical issues.

Prerequisites & Notes

NULL

Credits: 3

Second Semester - 15 Credit Hours

PSYC 3433 - INTEGRATION SEMINAR PSYCH AND THEOL

This course is a study of the contemporary evangelical efforts to integrate psychology and theology, focusing on the value of an integrative approach to both disciplines. Topics include behavior, cognition, emotion, and motivation. Junior or senior level standing required.

Prerequisites & Notes

Prerequisites: PSYC 1133 or PSYC 1233 ; PSYC 2133

Credits: 3

PSYC 3633 - PROFESSIONAL, ETHICAL, LEGAL ISSUES

This course is an exploration of the development of professional self with emphasis on the changing ethical and legal context for practice. Approaches to counseling are explored with an emphasis on students' development of professional style. Students explore issues of professional and personal values and ethics, personality, values, and interests.

Prerequisites & Notes

NULL

Credits: 3

PSYC 3533 - INTRODUCTION TO COUNSELING

This course is a study of various theoretical approaches to the practice of counseling and psychotherapy with normal and disturbed clients. Focus is on the psychoanalytic, cognitive, behavioral, and phenomenological approaches.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 3733 - SOCIAL PSYCHOLOGY

This course is a survey of theories of interpersonal behavior and group dynamics emphasizing the influence of groups and group membership upon individual behavior. Topics include aggression, attitudes, attribution, conformity, altruism, communication, propaganda, morale, and other aspects of interpersonal relationships.

Prerequisites & Notes

PSYC 2133

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Year Four

First Semester - 15 Credit Hours

PSYC 4033 - PHYSIOLOGICAL PSYCHOLOGY

This course is a study of the physiological components of behavior. Topics include structure and function of the nervous system; theory of brain functions; and current problems, theories, and techniques in physiological psychology.

Prerequisites & Notes

PSYC 1133 or PSYC 1233; PSYC 2133; BIOL 1333, BIOL 133L

Credits: 3

PSYC 4083 - LEARNING AND COGNITION

This course is an introduction to the psychological study of learning and cognition. Topics examined will include classical conditioning, operant conditioning, observational learning, perception, attention, and memory. Traditional views as well as current trends will be discussed.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 3053 - PSYCHOLOGY PRACTICUM

This course provides students with practical service-learning experience in order to apply psychological principles learned throughout their program of study through volunteer experiences in a mental health, social service, educational psychology, or related setting under the supervision of a qualified in-service supervisor and a college supervisor. Placement must be approved by the course instructor.

Prerequisites & Notes

PSYC 2133

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Concentration elective (select one):

PSYC 3103 - MARITAL AND FAMILY THERAPY

This course is an overview of counseling approaches to family problems, including the family systems approach. Issue areas explored include communication, role expectations, and sexual dysfunction. Various counseling techniques related to marital maladjustment are explored. Principal approaches to marital therapy and family therapy are emphasized.

Prerequisites & Notes

PSYC 2133 , PSYC 2233

Credits: 3

PSYC 3553 - INTRO TO COUNSELING CHILDREN & YOUTH

In this course, students will explore issues, theories, and applications related to understanding and helping children and adolescents with social or emotional problems. Students will learn to assess behavior and incorporate ethically and legally appropriate strategies to meet the needs of counseling children and adolescents.

Prerequisites & Notes

PSYC 3533

Credits: 3

Second Semester - 14 Credit Hours

PSYC 4043 - DIAGNOSIS, ASSESSMENT & CASE MGMT

This course is an introduction to the skills needed for client diagnosis, assessment, and case management that are currently used in the helping professions. The course will focus on identifying pertinent information for preliminary assessment of a presenting problem, goal setting and contracting, monitoring for progress, and documenting sensitive client data. Topics will include individual psycho-social assessments, and family assessments.

Prerequisites & Notes

PSYC 2133; PSYC 3003

Credits: 3

PSYC 4093 - PSYCHOLOGY CAPSTONE SENIOR SEMINAR

This capstone course will provide students the opportunity to critically reflect on and apply the theories and skills learned throughout their Psychology degree program. Students will articulate and include a capstone project related to their proposed career goals. Through this course students will demonstrate their understanding as well as faith integration through the production of a major paper/project and presentation.

Prerequisites & Notes

Prerequisite: Final semester senior, PSYC 4033 , PSYC 4083

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

GENERAL ELECTIVE - 1 HR ELECTIVE

Select a 1 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 1

Humanities Elective (select one):

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

Total Program Hours - 120 Credit Hours

NOTE: It is the responsibility of the student to read, review, and fulfill the requirements and total hours of this degree audit for their applicable degree.

Bachelor of Science, Human Services Four-Year Course Plan

Year One

Fall Semester

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

HUSV 2013 - INTRODUCTION TO HUMAN SERVICES

An examination of the fundamental knowledge, skill and attitudinal base of the human services profession. Included are philosophy, value base, ethical standards, early history, professional roles and functions, client systems, purposes served, fields of practice, professional organizations, and the current status of Human Services. An introductory exposure to generalist human service practice is provided.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Spring Semester

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2053 - HUMAN SERVICES DELIVERY

This course explores the different delivery systems and models used in human services. This course will examine how changes in public policy, administrative directives, and legal rulings impact service delivery. This course will also examine the impact that past political, social, and cultural changes have on the way services are delivered.

Prerequisites & Notes

NULL

Credits: 3

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

HUSV 3063 - PROGRAM PLANNING AND EVALUATION

This course will examine the theory, process, and procedures of program planning and evaluation. This course will also provide students with the basic set of skills necessary to design, develop, and evaluate various human service programs.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3333 - UNDERSTANDING HUMAN DIVERSITY

This course examines the complex nature of culture and personal identity, explores populations at-risk, and encourages students to understand and appreciate diversity. Specific knowledge of individual cultures, awareness of the patterns of oppression experienced by those cultures, and skills relevant to developing a culturally competent approach to working with diverse people groups are addressed.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Socio-Historical Inquiry (3 credits) Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Summer Semester

HUSV 2433 - HUMN SRVCES & DVLPMT ACRS LIFE-SPAN

This course will examine human development across the life-span from a human services perspective. The focus of the course will center around the various services available as they relate to the individual's life-span development from conception to death.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

**Bachelor of Science, Human Services: Crisis Assistance
(Online)**

Bachelor of Science, Human Services: Crisis Assistance 4 Year Plan

The Crisis Assistance specialization will prepare human services practitioners to provide social services expertise and assistance to those seeking help in crisis/disasters both locally and globally.

*Note: Students taking courses online outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. State-specific requirements are specified in the SEU Catalog. Your Academic Advisor is available to help integrate these additional courses into your plan.

Total Program Hours- 120 Credit Hours

Foundational Core- 34 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation- 9 credits

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work

together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credits

Discursive Inquiry (6 credits)

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry (6 credits) Select Two:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 39 Credit Hours

HUSV 2053 - HUMAN SERVICES DELIVERY

This course explores the different delivery systems and models used in human services. This course will examine how changes in public policy, administrative directives, and legal rulings impact service delivery. This course will also examine the impact that past political, social, and cultural changes have on the way services are delivered.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2043 - CASE MANAGEMENT AND INTERVENTION

This course gives students a foundation in case management competencies and intervention strategies.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2013 - INTRODUCTION TO HUMAN SERVICES

An examination of the fundamental knowledge, skill and attitudinal base of the human services profession. Included are philosophy, value base, ethical standards, early history, professional roles and functions, client systems, purposes served, fields of practice, professional organizations, and the current status of Human Services. An introductory exposure to generalist human service practice is provided.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3033 - GROUP DYNAMICS

This course is a study of group dynamics, with particular attention to therapeutic group- process. The role of the leader, issue-specific or problem-specific group facilitation, and strategies for dealing with particular group-process issues will be emphasized. Participation in group-process is required of every student.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3063 - PROGRAM PLANNING AND EVALUATION

This course will examine the theory, process, and procedures of program planning and evaluation. This course will also provide students with the basic set of skills necessary to design, develop, and evaluate various human service programs.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3073 - HUMAN SERVICES PRACTICUM AND FIELD EXPERIENCE I

This course allows students the opportunity to put theory, skills, and professional behavior into practice by working with an agency within the human services profession. Students will gain key knowledge, skills, and abilities by working within a field setting.

Prerequisites & Notes

Prerequisites: HUSV 2013 , HUSV 2053 , HUSV 2043 , HUSV 3333 , HUSV 3063 , HUSV 3033 , HUSV 4053 , HUSV 2433

Credits: 3

HUSV 3433 - HUMAN SERVICES AND FAITH INTEGRATION

The purpose of this course is to provide students with an opportunity to explore human services from a Christian world view that involves intentionally integrating faith and human services with an emphasis on spiritual and professional growth.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3533 - CONFLICT RESOLUTION IN HUMAN SRVCS

This course focuses on human interaction, conflict, and conflict resolution theories in the helping professions. This course also explores methods of conflict resolution associated with positive outcomes related to settling disputes and personal development

Prerequisites & Notes

NULL

Credits: 3

HUSV 3023 - HEALTH MANAGEMENT IN GLOBAL SETTINGS

Providing support through humanitarian outreaches can become physically, spiritually, mentally, and psychologically demanding on the caregivers. Preventative healthcare and self-care practices are critical, especially in the demanding environments often associated with humanitarian care. Students learn to monitor themselves and fellow relief participants to ensure sustained activities in a variety of settings.

Prerequisites & Notes

None

Credits: 3

HUSV 3043 - THE POOR AND SUFFERING

Student review the existence of and consideration for those whose who are poor and suffering in both domestic and international settings. Multiple views are presented, including political, social, geographical, climatic, biblical and religious. Various solutions are examined, including historical and contemporary, with an emphasis on programs' motivation and effectiveness. Approaching strategies from community-based approach is a special focus of this course. This course is cross-referenced with PMIN-3043.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3053 - DOMESTIC DISASTER SERVICE

Domestic Disaster Services presents the foundational principles and skills necessary to plan and conduct services for the four phases of disasters: Mitigation, Preparation, Response, and Recovery. Emphasis is upon coordination of services between governmental, non-governmental, and faith-based organizations. This course is cross-referenced with PMIN 3053.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3093 - INTERNATIONAL DISASTER SERVICES

International Disaster Services presents the foundational principles and skills necessary to plan and conduct services for the four phases of disaster: Mitigation, Preparation, Response, and Recovery. Emphasis is upon coordination of services between international governmental, non-governmental, and religious-based organizations.

Prerequisites & Notes

NULL

Credits: 3

HUSV 4073 - REFUGEE & MIGRANT POPULATIONS

Populations of refugees and migrating groups undergo deep physiological, psychological, and economic challenges. Whether man-made or natural causes behind the disaster, those who experience these traumas are affected to varying degrees based on geography, language, age, gender, support structures, and socioeconomic dynamics. Students review the forces at work, current research, and individual and community-based approaches to serve these groups with compassion and effectiveness. This course is cross-referenced with PMIN 4073.

Prerequisites & Notes

NULL

Credits: 3

Divine Design - 47 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

HUSV 2013 - INTRODUCTION TO HUMAN SERVICES

An examination of the fundamental knowledge, skill and attitudinal base of the human services profession. Included are philosophy, value base, ethical standards, early history, professional roles and functions, client systems, purposes

served, fields of practice, professional organizations, and the current status of Human Services. An introductory exposure to generalist human service practice is provided.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Spring Semester

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2053 - HUMAN SERVICES DELIVERY

This course explores the different delivery systems and models used in human services. This course will examine how changes in public policy, administrative directives, and legal rulings impact service delivery. This course will also examine the impact that past political, social, and cultural changes have on the way services are delivered.

Prerequisites & Notes

NULL

Credits: 3

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Summer Semester

HUSV 2043 - CASE MANAGEMENT AND INTERVENTION

This course gives students a foundation in case management competencies and intervention strategies.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work

together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

HUSV 3063 - PROGRAM PLANNING AND EVALUATION

This course will examine the theory, process, and procedures of program planning and evaluation. This course will also provide students with the basic set of skills necessary to design, develop, and evaluate various human service programs.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3023 - HEALTH MANAGEMENT IN GLOBAL SETTINGS

Providing support through humanitarian outreaches can become physically, spiritually, mentally, and psychologically demanding on the caregivers. Preventative healthcare and self-care practices are critical, especially in the demanding environments often associated with humanitarian care. Students learn to monitor themselves and fellow relief participants to ensure sustained activities in a variety of settings.

Prerequisites & Notes

None

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Socio-Historical Inquiry (3 credits) Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing

historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Summer Semester

HUSV 3043 - THE POOR AND SUFFERING

Students review the existence of and consideration for those who are poor and suffering in both domestic and international settings. Multiple views are presented, including political, social, geographical, climatic, biblical and religious. Various solutions are examined, including historical and contemporary, with an emphasis on programs' motivation and effectiveness. Approaching strategies from community-based approach is a special focus of this course. This course is cross-referenced with PMIN-3043.

Prerequisites & Notes

NULL

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

GENERAL ELECTIVE - 2 HR ELECTIVE

Select a 2 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 2

Summer Semester**HUSV 3073 - HUMAN SERVICES PRACTICUM AND FIELD EXPERIENCE I**

This course allows students the opportunity to put theory, skills, and professional behavior into practice by working with an agency within the human services profession. Students will gain key knowledge, skills, and abilities by working within a field setting.

Prerequisites & Notes

Prerequisites: HUSV 2013 , HUSV 2053 , HUSV 2043 , HUSV 3333 , HUSV 3063 , HUSV 3033 , HUSV 4053 , HUSV 2433

Credits: 3

HUSV 4073 - REFUGEE & MIGRANT POPULATIONS

Populations of refugees and migrating groups undergo deep physiological, psychological, and economic challenges. Whether man-made or natural causes behind the disaster, those who experience these traumas are affected to varying degrees based on geography, language, age, gender, support structures, and socioeconomic dynamics. Students review the forces at work, current research, and individual and community-based approaches to serve these groups with compassion and effectiveness. This course is cross-referenced with PMIN 4073.

Credits: 3

Bachelor of Science, Interdisciplinary Studies: Human Services/Psychology (Online)

Bachelor of Science, Interdisciplinary Studies: Human Services/Psychology 4- Year Plan

The Interdisciplinary Studies: Human Services and Psychology degree program combines the fields of Human Services and Psychology. Through the study of psychology students will develop a solid understanding of the human mind and behavior. And through the study of human services students will learn how to meet human needs through direct prevention and resolution of problems. Together students will gain the knowledge and skills they need to effectively understand and serve the needs of hurting people within their communities.

*Note: Students taking courses online outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. State-specific requirements are specified in the SEU Catalog. Your Academic Advisor is available to help integrate these additional courses into your plan.

Total Program Hours- 120 Credit Hours

Foundational Core- 34 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation- 9 credits

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

HUSV 2043 - CASE MANAGEMENT AND INTERVENTION

This course gives students a foundation in case management competencies and intervention strategies.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2053 - HUMAN SERVICES DELIVERY

This course explores the different delivery systems and models used in human services. This course will examine how changes in public policy, administrative directives, and legal rulings impact service delivery. This course will also examine the impact that past political, social, and cultural changes have on the way services are delivered.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3063 - PROGRAM PLANNING AND EVALUATION

This course will examine the theory, process, and procedures of program planning and evaluation. This course will also provide students with the basic set of skills necessary to design, develop, and evaluate various human service programs.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3333 - UNDERSTANDING HUMAN DIVERSITY

This course examines the complex nature of culture and personal identity, explores populations at-risk, and encourages students to understand and appreciate diversity. Specific knowledge of individual cultures, awareness of the patterns of oppression experienced by those cultures, and skills relevant to developing a culturally competent approach to working with diverse people groups are addressed.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3433 - HUMAN SERVICES AND FAITH INTEGRATION

The purpose of this course is to provide students with an opportunity to explore human services from a Christian world view that involves intentionally integrating faith and human services with an emphasis on spiritual and professional growth.

Prerequisites & Notes

NULL

Credits: 3

OR

PSYC 3433 - INTEGRATION SEMINAR PSYCH AND THEOL

This course is a study of the contemporary evangelical efforts to integrate psychology and theology, focusing on the value of an integrative approach to both disciplines. Topics include behavior, cognition, emotion, and motivation. Junior or senior level standing required.

Prerequisites & Notes

Prerequisites: PSYC 1133 or PSYC 1233 ; PSYC 2133

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

OR

HUSV 2433 - HUMN SRVCES & DVLPMT ACRS LIFE-SPAN

This course will examine human development across the life-span from a human services perspective. The focus of the course will center around the various services available as they relate to the individual's life-span development from conception to death.

Prerequisites & Notes

NULL

Credits: 3

PSYC 2013 - RESEARCH METHODS IN PSYCHOLOGY

This course addresses the application of various research methods of inquiry in application to theory and practice for the purpose of knowledge building and the development of best practice. Emphasis is on developing general research skills that can be applied within any area of psychology. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice, and evaluation of theory. The focus is on the development of research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

Prerequisite: PSYC 2003

Corequisite: PSYC 2023

Credits: 3

OR

HUSV 4053 - RESEARCH METHODS

The application of the scientific method of inquiry to theory and practice for the purpose of knowledge building and the development of best practice. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice and evaluation of theory. The focus is on the development of social research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

NULL

Credits: 3

PSYC 2133 - THEORIES OF PERSONALITY

This course is an introduction to the study of personality formation. Major personality themes are critically examined. Students are introduced to the application of these theories in counseling and the treatment of mental illness.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

PSYC 3003 - ABNORMAL PSYCHOLOGY

This course is a study of the nature, causes, and treatment of abnormal behavior, including personality disorders, neuroses, psychoses, stress reactions, and other dysfunctions. Elements contributing to mental health and well-integrated personality are also considered.

Prerequisites & Notes

PSYC 1133 or PSYC 1233 , PSYC 2133

Credits: 3

PSYC 3733 - SOCIAL PSYCHOLOGY

This course is a survey of theories of interpersonal behavior and group dynamics emphasizing the influence of groups and group membership upon individual behavior. Topics include aggression, attitudes, attribution, conformity, altruism, communication, propaganda, morale, and other aspects of interpersonal relationships.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 4083 - LEARNING AND COGNITION

This course is an introduction to the psychological study of learning and cognition. Topics examined will include classical conditioning, operant conditioning, observational learning, perception, attention, and memory. Traditional views as well as current trends will be discussed.

Prerequisites & Notes

PSYC 2133

Credits: 3

Human Services/Psychology Elective, Select three courses

Any Human Services or Psychology course that is not required above

Divine Design - 41 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

AND

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

OR

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

Area III, Natural Science and Mathematics - 11 Credit Hours

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Area IV, History, Social and Behavioral Sciences - 12 Credit Hours

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

Year Two**Fall Semester****THEO 1213 - LIVED THEOLOGY**

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

HUSV 2043 - CASE MANAGEMENT AND INTERVENTION

This course gives students a foundation in case management competencies and intervention strategies.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

or

HUSV 2433 - HUMN SRVCES & DVLPMNT ACRS LIFE-SPAN

This course will examine human development across the life-span from a human services perspective. The focus of the course will center around the various services available as they relate to the individual's life-span development from conception to death.

Prerequisites & Notes

NULL

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

HUSV 2053 - HUMAN SERVICES DELIVERY

This course explores the different delivery systems and models used in human services. This course will examine how changes in public policy, administrative directives, and legal rulings impact service delivery. This course will also examine the impact that past political, social, and cultural changes have on the way services are delivered.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

PSYC 2013 - RESEARCH METHODS IN PSYCHOLOGY

This course addresses the application of various research methods of inquiry in application to theory and practice for the purpose of knowledge building and the development of best practice. Emphasis is on developing general research skills that can be applied within any area of psychology. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice, and evaluation of theory. The focus is on the development of research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

Prerequisite: PSYC 2003

Corequisite: PSYC 2023

Credits: 3

or

HUSV 4053 - RESEARCH METHODS

The application of the scientific method of inquiry to theory and practice for the purpose of knowledge building and the development of best practice. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice and evaluation of theory. The focus is on the development of social research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry (3 credits) Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Bachelor of Science, Psychology: Industrial & Organizational (Online)

Bachelor of Science, Psychology: Industrial/Organizational Concentration Four Year Plan

The Industrial/Organizational concentration is designed both for students who would like to move directly into the workforce with a bachelor's degree as well as for those students who would like to pursue a graduate degree in Industrial/Organizational Psychology. The courses in this concentration focus on the application of psychology to the workplace and will pull from several different areas of psychology including cognitive, social, and behavioral. By completing this concentration students will also develop the critical reasoning skills that will be necessary to be successful in this field.

Potential Career Options:

- Human Resources Manager
- Staffing and Recruiting Manager
- Workforce Analyst
- Team Development Trainer or Manager
- Executive Coach
- Project Manager

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credits

Discursive Inquiry- 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry- 4 Credit Hours

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

Quantitative Inquiry- 3 Credit Hours

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

Socio-Historical Inquiry-6 Credit Hours

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

Select One of the Following:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry- 3 Credit Hours**MUSC 1003 - MUSIC APPRECIATION**

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 51 Credit Hours**PSYC 2003 - COMMUNICATION AND CAREERS IN PSYCHOLOGY**

This course is an introduction to communication in the field of psychology. Students will develop skills in information literacy, comprehension of peer-reviewed literature, synthesis of information, and use of proper APA standards. Students will also develop their verbal presentation skills. Additionally, students will be introduced to the different career opportunities at both baccalaureate and graduate-degree levels as well as requirements and skills required for admissions into graduate school.

Prerequisites & Notes

PSYC 1133

Credits: 3

PSYC 2013 - RESEARCH METHODS IN PSYCHOLOGY

This course addresses the application of various research methods of inquiry in application to theory and practice for the purpose of knowledge building and the development of best practice. Emphasis is on developing general research skills that can be applied within any area of psychology. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice, and evaluation of theory. The focus is on the development of research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

Prerequisite: PSYC 2003

Corequisite: PSYC 2023

Credits: 3

PSYC 2023 - STATISTICAL METHODS

This course studies the application of statistical methods to existing data. Topics include organizing and presenting data, descriptive and inferential measures, and interpreting statistical information. Emphasis will be on sampling, probability, hypothesis testing, and appropriate application of statistical tests.

Prerequisites & Notes

Prerequisite: MATH 1213

Corequisite: PSYC 2013

Credits: 3

PSYC 2133 - THEORIES OF PERSONALITY

This course is an introduction to the study of personality formation. Major personality themes are critically examined. Students are introduced to the application of these theories in counseling and the treatment of mental illness.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

PSYC 3003 - ABNORMAL PSYCHOLOGY

This course is a study of the nature, causes, and treatment of abnormal behavior, including personality disorders, neuroses, psychoses, stress reactions, and other dysfunctions. Elements contributing to mental health and well-integrated personality are also considered.

Prerequisites & Notes

PSYC 1133 or PSYC 1233 , PSYC 2133

Credits: 3

PSYC 3023 - CULTURAL PSYCHOLOGY

This course provides students with an introduction to multicultural and cross-cultural psychology including its theories, research, and exploration of intercultural knowledge. The course examines the dynamics of cultural relevance related to psychological processes, abnormality, and treatment. The course implements exercises of self-awareness and engagement within other cultures.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 3433 - INTEGRATION SEMINAR PSYCH AND THEOL

This course is a study of the contemporary evangelical efforts to integrate psychology and theology, focusing on the value of an integrative approach to both disciplines. Topics include behavior, cognition, emotion, and motivation. Junior or senior level standing required.

Prerequisites & Notes

Prerequisites: PSYC 1133 or PSYC 1233 ; PSYC 2133

Credits: 3

PSYC 3733 - SOCIAL PSYCHOLOGY

This course is a survey of theories of interpersonal behavior and group dynamics emphasizing the influence of groups and group membership upon individual behavior. Topics include aggression, attitudes, attribution, conformity, altruism, communication, propaganda, morale, and other aspects of interpersonal relationships.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 4033 - PHYSIOLOGICAL PSYCHOLOGY

This course is a study of the physiological components of behavior. Topics include structure and function of the nervous system; theory of brain functions; and current problems, theories, and techniques in physiological psychology.

Prerequisites & Notes

PSYC 1133 or PSYC 1233; PSYC 2133; BIOL 1333, BIOL 133L

Credits: 3

PSYC 4083 - LEARNING AND COGNITION

This course is an introduction to the psychological study of learning and cognition. Topics examined will include classical conditioning, operant conditioning, observational learning, perception, attention, and memory. Traditional views as well as current trends will be discussed.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 4093 - PSYCHOLOGY CAPSTONE SENIOR SEMINAR

This capstone course will provide students the opportunity to critically reflect on and apply the theories and skills learned throughout their Psychology degree program. Students will articulate and include a capstone project related to their proposed career goals. Through this course students will demonstrate their understanding as well as faith integration through the production of a major paper/project and presentation.

Prerequisites & Notes

Prerequisite: Final semester senior, PSYC 4033 , PSYC 4083

Credits: 3

Industrial/Organizational Psychology Concentration

PSYC 2033 - INDUSTRIAL & ORGANIZATIONAL PSYC

This course includes an application of psychological principles to industry, business, and other organizations. Topics include organization of work, selection, training, motivation, job satisfaction, supervision, and decision-making.

Prerequisites & Notes

NULL

Credits: 3

PSYC 3063 - Attitudes and Motivation in the Wor

This course explores concepts and theories related to job attitudes and motivation in the workplace. Topics include motivational strategies, models of performance, and the impact of job satisfaction, work values, workplace environment, management style, and organizational commitment on employee attitudes and motivation.

Prerequisites & Notes

PSYC 2033

Credits: 3

PSYC 3073 - Group Dynamics in the Workplace

This course explores concepts and theories related to group dynamics and small group processes as they related to organizations. Topics include leadership, decision-making, stages of group development, group structure, group communication, team building, conflict resolution, and the intra-and inter-personal dynamics within small group

Prerequisites & Notes

PSYC 2033

Credits: 3

PSYC 4833 - TESTING AND MEASUREMENTS

This course is a study of the basic measurement theory and its practical application to problems of choosing, administering, and evaluating the results of tests. The more common aptitude, achievement, interest, intelligence, and personality tests will be considered.

Prerequisites & Notes

PSYC 2023 or MATH 2023

Credits: 3

Divine Design - 35 Credits

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

AND

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

PSYC 2003 - COMMUNICATION AND CAREERS IN PSYCHOLOGY

This course is an introduction to communication in the field of psychology. Students will develop skills in information literacy, comprehension of peer-reviewed literature, synthesis of information, and use of proper APA standards. Students will also develop their verbal presentation skills. Additionally, students will be introduced to the different career opportunities at both baccalaureate and graduate-degree levels as well as requirements and skills required for admissions into graduate school.

Prerequisites & Notes

PSYC 1133

Credits: 3

PSYC 2033 - INDUSTRIAL & ORGANIZATIONAL PSYC

This course includes an application of psychological principles to industry, business, and other organizations. Topics include organization of work, selection, training, motivation, job satisfaction, supervision, and decision-making.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Spring Semester - 15 Credit Hours

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

PSYC 2013 - RESEARCH METHODS IN PSYCHOLOGY

This course addresses the application of various research methods of inquiry in application to theory and practice for the purpose of knowledge building and the development of best practice. Emphasis is on developing general research skills that can be applied within any area of psychology. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice, and evaluation of theory. The focus is on the development of research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

Prerequisite: PSYC 2003

Corequisite: PSYC 2023

Credits: 3

PSYC 2023 - STATISTICAL METHODS

This course studies the application of statistical methods to existing data. Topics include organizing and presenting data, descriptive and inferential measures, and interpreting statistical information. Emphasis will be on sampling, probability, hypothesis testing, and appropriate application of statistical tests.

Prerequisites & Notes

Prerequisite:MATH 1213

Corequisite: PSYC 2013

Credits: 3

PSYC 3063 - Attitudes and Motivation in the Wor

This course explores concepts and theories related to job attitudes and motivation in the workplace. Topics include motivational strategies, models of performance, and the impact of job satisfaction, work values, workplace environment, management style, and organizational commitment on employee attitudes and motivation.

Prerequisites & Notes

PSYC 2033

Credits: 3

Socio-Historical Inquiry (3 credits) Select One:**HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY**

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Year Three**Fall Semester - 15 Credit Hours****PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY**

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

PSYC 3433 - INTEGRATION SEMINAR PSYCH AND THEOL

This course is a study of the contemporary evangelical efforts to integrate psychology and theology, focusing on the value of an integrative approach to both disciplines. Topics include behavior, cognition, emotion, and motivation. Junior or senior level standing required.

Prerequisites & Notes

Prerequisites: PSYC 1133 or PSYC 1233 ; PSYC 2133

Credits: 3

PSYC 3073 - Group Dynamics in the Workplace

This course explores concepts and theories related to group dynamics and small group processes as they related to organizations. Topics include leadership, decision-making, stages of group development, group structure, group communication, team building, conflict resolution, and the intra-and inter-personal dynamics within small group

Prerequisites & Notes

PSYC 2033

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Year Four

Fall Semester - 15 Credit Hours

PSYC 4033 - PHYSIOLOGICAL PSYCHOLOGY

This course is a study of the physiological components of behavior. Topics include structure and function of the nervous system; theory of brain functions; and current problems, theories, and techniques in physiological psychology.

Prerequisites & Notes

PSYC 1133 or PSYC 1233; PSYC 2133; BIOL 1333, BIOL 133L

Credits: 3

PSYC 4083 - LEARNING AND COGNITION

This course is an introduction to the psychological study of learning and cognition. Topics examined will include classical conditioning, operant conditioning, observational learning, perception, attention, and memory. Traditional views as well as current trends will be discussed.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 3733 - SOCIAL PSYCHOLOGY

This course is a survey of theories of interpersonal behavior and group dynamics emphasizing the influence of groups and group membership upon individual behavior. Topics include aggression, attitudes, attribution, conformity, altruism, communication, propaganda, morale, and other aspects of interpersonal relationships.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 4833 - TESTING AND MEASUREMENTS

This course is a study of the basic measurement theory and its practical application to problems of choosing, administering, and evaluating the results of tests. The more common aptitude, achievement, interest, intelligence, and personality tests will be considered.

Prerequisites & Notes

PSYC 2023 or MATH 2023

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Spring Semester - 14 Credit Hours

PSYC 4093 - PSYCHOLOGY CAPSTONE SENIOR SEMINAR

This capstone course will provide students the opportunity to critically reflect on and apply the theories and skills learned throughout their Psychology degree program. Students will articulate and include a capstone project related to their proposed career goals. Through this course students will demonstrate their understanding as well as faith integration through the production of a major paper/project and presentation.

Prerequisites & Notes

Prerequisite: Final semester senior, PSYC 4033 , PSYC 4083

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

GENERAL ELECTIVE - 2 HR ELECTIVE

Select a 2 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 2

Bachelor of Science, Psychology: Pre-Counseling (Online)

Bachelor of Science, Psychology: Pre-Counseling Concentration (Online) Four-Year Plan

The pre-counseling concentration is designed for students who are planning to attend graduate school in order to pursue a career in counseling, marriage and family therapy, or guidance counseling. The courses in this concentration will provide additional education in the areas of counseling and research. Additionally, students will complete a Psychology Practicum course to provide in-person observation and exposure to the counseling environment.

Foundational Core- 34 Credit Hours**SEU Foundations- 3 Credit Hours**

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation- 9 credits

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credits**Discursive Inquiry- 6 Credit Hours****ENGL 1113 - COLLEGE COMPOSITION**

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry- 4 Credit Hours**BIOL 1334 - ESSENTIALS OF HUMAN A&P**

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

Quantitative Inquiry- 3 Credit Hours

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

Socio-Historical Inquiry-6 Credit Hours

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

Select One of the Following:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry- 3 Credit Hours

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 45 Credit Hours

PSYC 2003 - COMMUNICATION AND CAREERS IN PSYCHOLOGY

This course is an introduction to communication in the field of psychology. Students will develop skills in information literacy, comprehension of peer-reviewed literature, synthesis of information, and use of proper APA standards. Students will also develop their verbal presentation skills. Additionally, students will be introduced to the different career opportunities at both baccalaureate and graduate-degree levels as well as requirements and skills required for admissions into graduate school.

Prerequisites & Notes

PSYC 1133

Credits: 3

PSYC 2013 - RESEARCH METHODS IN PSYCHOLOGY

This course addresses the application of various research methods of inquiry in application to theory and practice for the purpose of knowledge building and the development of best practice. Emphasis is on developing general research skills that can be applied within any area of psychology. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice, and evaluation of theory. The focus is on the development of research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

Prerequisite: PSYC 2003

Corequisite: PSYC 2023

Credits: 3

PSYC 2023 - STATISTICAL METHODS

This course studies the application of statistical methods to existing data. Topics include organizing and presenting data, descriptive and inferential measures, and interpreting statistical information. Emphasis will be on sampling, probability, hypothesis testing, and appropriate application of statistical tests.

Prerequisites & Notes

Prerequisite: MATH 1213

Corequisite: PSYC 2013

Credits: 3

PSYC 2133 - THEORIES OF PERSONALITY

This course is an introduction to the study of personality formation. Major personality themes are critically examined. Students are introduced to the application of these theories in counseling and the treatment of mental illness.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

PSYC 3003 - ABNORMAL PSYCHOLOGY

This course is a study of the nature, causes, and treatment of abnormal behavior, including personality disorders, neuroses, psychoses, stress reactions, and other dysfunctions. Elements contributing to mental health and well-integrated personality are also considered.

Prerequisites & Notes

PSYC 1133 or PSYC 1233 , PSYC 2133

Credits: 3

PSYC 3023 - CULTURAL PSYCHOLOGY

This course provides students with an introduction to multicultural and cross-cultural psychology including its theories, research, and exploration of intercultural knowledge. The course examines the dynamics of cultural relevance related to psychological processes, abnormality, and treatment. The course implements exercises of self-awareness and engagement within other cultures.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 3433 - INTEGRATION SEMINAR PSYCH AND THEOL

This course is a study of the contemporary evangelical efforts to integrate psychology and theology, focusing on the value of an integrative approach to both disciplines. Topics include behavior, cognition, emotion, and motivation. Junior or senior level standing required.

Prerequisites & Notes

Prerequisites: PSYC 1133 or PSYC 1233 ; PSYC 2133

Credits: 3

PSYC 3733 - SOCIAL PSYCHOLOGY

This course is a survey of theories of interpersonal behavior and group dynamics emphasizing the influence of groups and group membership upon individual behavior. Topics include aggression, attitudes, attribution, conformity, altruism, communication, propaganda, morale, and other aspects of interpersonal relationships.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 4033 - PHYSIOLOGICAL PSYCHOLOGY

This course is a study of the physiological components of behavior. Topics include structure and function of the nervous system; theory of brain functions; and current problems, theories, and techniques in physiological psychology.

Prerequisites & Notes

PSYC 1133 or PSYC 1233; PSYC 2133; BIOL 1333, BIOL 133L

Credits: 3

PSYC 4083 - LEARNING AND COGNITION

This course is an introduction to the psychological study of learning and cognition. Topics examined will include classical conditioning, operant conditioning, observational learning, perception, attention, and memory. Traditional views as well as current trends will be discussed.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 4093 - PSYCHOLOGY CAPSTONE SENIOR SEMINAR

This capstone course will provide students the opportunity to critically reflect on and apply the theories and skills learned throughout their Psychology degree program. Students will articulate and include a capstone project related to their proposed career goals. Through this course students will demonstrate their understanding as well as faith integration through the production of a major paper/project and presentation.

Prerequisites & Notes

Prerequisite: Final semester senior, PSYC 4033 , PSYC 4083

Credits: 3

Pre-Counseling Concentration: 9 Credit Hours

PSYC 3533 - INTRODUCTION TO COUNSELING

This course is a study of various theoretical approaches to the practice of counseling and psychotherapy with normal and disturbed clients. Focus is on the psychoanalytic, cognitive, behavioral, and phenomenological approaches.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 3103 - MARITAL AND FAMILY THERAPY

This course is an overview of counseling approaches to family problems, including the family systems approach. Issue areas explored include communication, role expectations, and sexual dysfunction. Various counseling techniques related to marital maladjustment are explored. Principal approaches to marital therapy and family therapy are emphasized.

Prerequisites & Notes

PSYC 2133 , PSYC 2233

Credits: 3

PSYC 3553 - INTRO TO COUNSELING CHILDREN & YOUTH

In this course, students will explore issues, theories, and applications related to understand and helping children and adolescents with social or emotional problems. Students will learn to assess behavior and incorporate ethically and legally appropriate strategies to meet the needs of counseling children and adolescents.

Prerequisites & Notes

PSYC 3533

Credits: 3

OR

PSYC 4043 - DIAGNOSIS, ASSESSMENT & CASE MGMT

This course is an introduction to the skills needed for client diagnosis, assessment, and case management that are currently used in the helping professions. The course will focus on identifying pertinent information for preliminary assessment of a presenting problem, goal setting and contracting, monitoring for progress, and documenting sensitive client data. Topics will include individual psycho-social assessments, and family assessments.

Prerequisites & Notes

PSYC 2133; PSYC 3003

Credits: 3

Divine Design (Major Specific Experiential Learning) 3 Credit Hours

PSYC 3053 - PSYCHOLOGY PRACTICUM

This course provides students with practical service-learning experience in order to apply psychological principles learned throughout their program of study through volunteer experiences in a mental health, social service, educational psychology, or related setting under the supervision of a qualified in-service supervisor and a college supervisor. Placement must be approved by the course instructor.

Prerequisites & Notes

PSYC 2133

Credits: 3

Divine Design (Minor, Electives, Experiential Learning) 38 Credits

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Total Program Hours- 120 Credit Hours

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

AND

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

PMIN 2123 - CHRISTIAN SPIRITUALITY

This course empowers the student to evaluate spiritual growth and cultivate their personal relationship with God. The course provides an opportunity for students to practice classical Christian spiritual disciplines that nurture intimacy with God. Students will also become acquainted with various perspectives on spiritual life from the area of historical theology.

Prerequisites & Notes

NULL

Credits: 3

Maryland

Maryland students need an additional six credit hours in one or more of the following five areas: (i) Arts and humanities; (ii) English composition; (iii) Social and behavioral sciences; (iv) Mathematics; and (v) Biological and physical sciences.

Minnesota

Communication

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Natural Science

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Social Science

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Montana

Montana requires 6 credit hours of natural science with a laboratory experience. Students may choose to take BIOL 1334 to complete the requirement or any other science course to meet the credit hour requirement.

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

Nevada

3 credit hours needed. The Socio-Historical requirement must be fulfilled by taking PPOL 2433 or by earning credit for one of the following combinations of classes from an accredited Nevada college: 1) HIST 100, 2) PCS 101, 3) HIST 101 and HIST 102, or 4) or HIST 101 and 217.

Ohio

Ohio students need an additional two credit hours in one or more of the following areas: Oral and Written Communication, Mathematics, Statistics and Logic, Arts, Humanities, Culture and Diversity, Natural Sciences, Technology and Innovation.

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

* if not already taken or 2 more credits to get to 36 hours

Oklahoma

In addition to the courses listed below, Oklahoma students need an additional 7 credit hours in one or more of the following: History, Social Science, Behavioral Science, Humanities, Math, Natural Science, Language, or Fine Arts.

PPOL 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

Select One:

Choose one not already chosen for Foundational Core

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Certificate, Global Perspectives of Relief (Online)

The certificate in Global Perspectives of Relief was developed in partnership with Convoy of Hope to provide practical knowledge and skills for students called to volunteer in the area of international relief. This specific certificate focuses on international disaster relief including an understanding of the refugee population preparing students to go wherever God calls them.

Certificate Core- 9 Credit Hours

HRDV 3013 - REFUGEE & MIGRANT POPULATIONS

Examines the history, dynamics and impact of human migration with special attention given to effective strategies for aiding refugee and migrant populations. Topics include challenges these populations face and effective relief and development strategies.

Prerequisites & Notes

None

Credits: 3

HRDV 3033 - DISASTER SERVICES

This course presents the foundational principles and skills necessary to plan and conduct services for the four phases of disasters: Preparation, Mitigation, Response, and Recovery, in both domestic and international settings. Emphasis includes the coordination of services among governmental, non-governmental, field partners, and religious organizations.

Prerequisites & Notes

None

Credits: 3

HRDV 4043 - CARE & WELLNESS IN HUMANITARIAN CONTEXT

This course will provide students with the knowledge and skills to function from a state of integrated health in a humanitarian context. Emphasis will include ownership of personal wellness, collaboration for community wellness, and application for the wellness of those served. Topics include psychological first aid, evaluation, and interventions for physiological health, biblical frameworks for self-care and wellness, compassion fatigue, and interventions for personal and community health.

Prerequisites & Notes

Select a 2 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 2

Certificate, Political Leadership (Online)

Total Program Hours - 9 Credit Hours

NOTE: It is the responsibility of the student to read, review, and fulfill the requirements and total hours of this degree audit for their applicable degree.

Required Courses - 9 Hours

PLDR 1011 - CIVICS 101

This course provides students with a basic understanding of core competencies and frameworks essential for civic engagement. As a fundamental principle to sustain a successful government, students will examine community relationships, power structures and the concept of privilege.

Prerequisites & Notes

None

Credits: 1

PLDR 1021 - THE BUREAUCRACY

This course examines the United States Congress, focusing on the historical development of the House and the Senate. The development of public policy and national politics will be closely assessed along with the constitutional underpinnings and the historical progress that led to the modern Congress, the rules and procedures that influence legislative processes and relationships amongst the branches.

Prerequisites & Notes

None

Credits: 1

PLDR 1031 - THE AMERICAN CONGRESS

This course examines the United States Congress, focusing on the historical development of the House and the Senate. The development of public policy and national politics will be closely assessed along with the constitutional underpinnings and the historical progress that led to the modern Congress, the rules and procedures that influence legislative processes and relationships amongst the branches.

Prerequisites & Notes

None

Credits: 1

PLDR 1041 - CIVIL DISCOURSE

Civil Discourse is central to our nation. Engaging in informed deliberation is affected by our understanding of life, our beliefs, culture, education, etc.

Prerequisites & Notes

None

Credits: 1

PLDR 1051 - CONSTITUTIONAL LAW

This course develops practical understanding relative to the Constitutional foundation of America. This course examines the structures of government that emerge from the United States Constitution. Major themes include: federalism, separation of powers, the role of the courts, the Bill of Rights, and Reconstruction.

Prerequisites & Notes

None

Credits: 1

PLDR 1061 - ADVOCACY AND LOBBYING

This course is designed to provide students with the historical and legal background of advocacy and lobbying at all levels of government. Students will gain the skills needed to succeed in the field of advocacy and lobbying.

Prerequisites & Notes

None

Credits: 1

PLDR 1071 - POLITICAL CAMPAIGNING

This course will give students an understanding of how campaigns are organized, and how they are won or lost. Students will examine a variety of academic sources that highlight the different methodologies for success at the ballot box.

Prerequisites & Notes

None

Credits: 1

PLDR 1081 - PRESS AND MEDIA

This course introduces students studying media, culture, and communications to the themes, issues, and theoretical debates central to the modern study of mediated forms of communication. Students will examine various factors that influence the press and media.

Prerequisites & Notes

None

Credits: 1

PLDR 1091 - PRESIDENCY

This course studies the origin and evolution of the American presidency. Students will examine different perspectives of presidential leadership, considering questions regarding the Constitution, the balance of power, electability. Additionally, students will deliberate on foreign and domestic policy, and the political future.

Prerequisites & Notes

None

Credits: 1

Certificate, Biblical Disaster Response (Online)

The certificate in Biblical Disaster Response was developed in partnership with Convoy of Hope to provide practical knowledge and skills for students called to volunteer in the area of disaster relief. This specific certificate focuses on both domestic and international disaster relief preparing students to go wherever God calls them.

Required Courses - 9 Credit Hours**THEO 3013 - THEOLOGY OF COMPASSION**

Compassion for others, especially for those in need, is a fundamental tenet of biblical theology. Compassion for humankind was the motivation for Christ's mission to earth, as He mentions at the inauguration of his ministry in Luke 4: "The Spirit of the Lord is on me, because he has anointed me to proclaim good news to the poor. He has sent me to proclaim freedom for the prisoners and recovery of sight for the blind, to set the oppressed free, to proclaim the year of the Lord's favor." This course reviews the biblical foundation for compassion and traces the Church's theological interpretation and practical application of compassion throughout history.

Prerequisites & Notes

NULL

Credits: 3

HRDV 3033 - DISASTER SERVICES

This course presents the foundational principles and skills necessary to plan and conduct services for the four phases of disasters: Preparation, Mitigation, Response, and Recovery, in both domestic and international settings. Emphasis includes the coordination of services among governmental, non-governmental, field partners, and religious organizations.

Prerequisites & Notes

None

Credits: 3

HRDV 4003 - CHILDREN & YOUTH IN CRISIS

Children and youth are especially susceptible to the traumatic effects of natural and human-made disasters. Because of their higher level of innocence, minimal experience, and the vulnerable place they have in many societies, relief actions and strategies must identify actions and strategies as quickly as possible. In this course, students will identify stress symptoms and emotional suffering to help as much as is appropriate and then to direct them to qualified support specialists. This course is not intended for professional or trained counselors but for those on site immediately following natural or human caused disasters or who conduct outreaches where children and youth may be in crisis.

Prerequisites & Notes

None

Credits: 3

Total Program Hours - 9 Credit Hours

Minor, Human Services (online)

The minor in human services provides students with a broad view of the helping profession and necessary skills, talents and duties that are required to become a generalist in the field of helping.

Total Program Hours - 18 Credit Hours

Required Courses - 12 Credit Hours

HUSV 2013 - INTRODUCTION TO HUMAN SERVICES

An examination of the fundamental knowledge, skill and attitudinal base of the human services profession. Included are philosophy, value base, ethical standards, early history, professional roles and functions, client systems, purposes served, fields of practice, professional organizations, and the current status of Human Services. An introductory exposure to generalist human service practice is provided.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2043 - CASE MANAGEMENT AND INTERVENTION

This course gives students a foundation in case management competencies and intervention strategies.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2053 - HUMAN SERVICES DELIVERY

This course explores the different delivery systems and models used in human services. This course will examine how changes in public policy, administrative directives, and legal rulings impact service delivery. This course will also examine the impact that past political, social, and cultural changes have on the way services are delivered.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3063 - PROGRAM PLANNING AND EVALUATION

This course will examine the theory, process, and procedures of program planning and evaluation. This course will also provide students with the basic set of skills necessary to design, develop, and evaluate various human service programs.

Prerequisites & Notes

NULL

Credits: 3

Human Services Electives - 6 Credit Hours

Select any two 3 credit HUSV courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Certificate, Advocacy in Global Context (Online)

The certificate in Advocacy in Global Contexts was developed in partnership with Convoy of Hope to provide practical knowledge and skills for students called to volunteer in the area of global advocacy for migrant, refugee, and other disenfranchised groups.

Certificate Core- 9 Credit Hours

HRDV 3013 - REFUGEE & MIGRANT POPULATIONS

Examines the history, dynamics and impact of human migration with special attention given to effective strategies for aiding refugee and migrant populations. Topics include challenges these populations face and effective relief and development strategies.

Prerequisites & Notes

None

Credits: 3

HRDV 3023 - CONTEXTUALIZED COMMUNICATION

The need to communicate across multiple cultures is an increasingly critical requirement in today's multicultural environment, where national boundaries provide minimal isolation and face-to-face communication is replaced by technological connections. Students' own philosophies and worldviews provide a foundation upon which techniques and approaches for communications are explored.

Prerequisites & Notes

None

Credits: 3

HRDV 4013 - AFFECTING CHANGE THROUGH ADVOCACY

Affecting Change through Advocacy offers students a biblical foundation and holistic approaches to assess and apply methods of advocacy, aligned with both the beneficiary and the intended outcome. Topics include responsible advocacy, spheres of influence, stages of effective action, all within a kingdom-centered framework of ethics.

Prerequisites & Notes

None

Credits: 3

Total Program - 9 Credit Hours

Minor, Humanitarian Compassion (Online)

Program Description:

The Humanitarian Compassion minor will educate and equip students to deliver and lead compassion-based care that elevates and empowers the lives of the impoverished, hungry, and hurting. This minor prepares students to deliver humanitarian care based on a foundation of God's compassion and apply Biblical theology to the practice of humanitarian care. Students learn principles to be effective in a variety of domestic and international mission settings. Curriculum emphasizes best practices and real-world experience while establishing a strong academic knowledge base.

Total Program Hours - 18 Credit Hours

Required Courses - 18 Credit Hours

THEO 3013 - THEOLOGY OF COMPASSION

Compassion for others, especially for those in need, is a fundamental tenet of biblical theology. Compassion for humankind was the motivation for Christ's mission to earth, as He mentions at the inauguration of his ministry in Luke 4: "The Spirit of the Lord is on me, because he has anointed me to proclaim good news to the poor. He has sent me to proclaim freedom for the prisoners and recovery of sight for the blind, to set the oppressed free, to proclaim the year of the Lord's favor." This course reviews the biblical foundation for compassion and traces the Church's theological interpretation and practical application of compassion throughout history.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3043 - THE POOR AND SUFFERING

Student review the existence of and consideration for those who are poor and suffering in both domestic and international settings. Multiple views are presented, including political, social, geographical, climatic, biblical and religious. Various solutions are examined, including historical and contemporary, with an emphasis on programs' motivation and effectiveness. Approaching strategies from community-based approach is a special focus of this course. This course is cross-referenced with PMIN-3043.

Prerequisites & Notes

NULL

Credits: 3

PMIN 3043 - THE POOR AND SUFFERING

HUSV 3053 - DOMESTIC DISASTER SERVICE

Domestic Disaster Services presents the foundational principles and skills necessary to plan and conduct services for the four phases of disasters: Mitigation, Preparation, Response, and Recovery. Emphasis is upon coordination of services between governmental, non-governmental, and faith-based organizations. This course is cross-referenced with PMIN 3053.

Prerequisites & Notes

NULL

Credits: 3

PMIN 3053 - DOMESTIC DISASTER SERVICES

HUSV 4073 - REFUGEE & MIGRANT POPULATIONS

Populations of refugees and migrating groups undergo deep physiological, psychological, and economic challenges. Whether man-made or natural causes behind the disaster, those who experience these traumas are affected to varying degrees based on geography, language, age, gender, support structures, and socioeconomic dynamics. Students review the forces at work, current research, and individual and community-based approaches to serve these groups with compassion and effectiveness. This course is cross-referenced with PMIN 4073.

Prerequisites & Notes

NULL

Credits: 3

PMIN 4073 - REFUGEE & MIGRANT POPULATIONS

HUSV 3093 - INTERNATIONAL DISASTER SERVICES

International Disaster Services presents the foundational principles and skills necessary to plan and conduct services for the four phases of disaster: Mitigation, Preparation, Response, and Recovery. Emphasis is upon coordination of services between international governmental, non-governmental, and religious-based organizations.

Prerequisites & Notes

NULL

Credits: 3

PSYC 4153 - CHILDREN AND YOUTH CRISIS

Children and youth are especially susceptible to the traumatic effects of crises. Because of their higher level of innocence, minimal experience, and the vulnerable place they have in many societies, relief endeavors must identify actions and strategies as quickly as possible. Students identify stress symptoms and emotional suffering in order to help to the extent appropriate and then direct individuals to qualified support specialists. This course is not intended for professional or trained counselors, but for those who are on site immediately following crises.

Prerequisites & Notes

NULL

Credits: 3

PMIN 4083 - CRISIS PSYCHOLOGICAL MANAGEMENT

Certificate, Racial Reconciliation Studies (Online)

Required - 9 Credit Hours

PMIN 3073 - NEIGHBORLINESS ACROSS DIVIDING LINE

A study of the biblical call to neighborliness that encourages development of relationships across the historically divided lines of race and economics. Theological and cultural topics will be analyzed to understand how the Greatest Commandment – loving God and neighbors – can be practically pursued and expressed.

Prerequisites & Notes

NULL

Credits: 3

HUSV 4023 - INTERRACIAL COMMUNICATION

This course explores the theoretical and practical issues related to race/ethnicity, and communication that often frame and impact the dynamics between various racial groups within the United States. The course will cover underpinnings of interracial/interethnic communication including topics such as identity, language, history, cultural influences, and theories. The course is designed to improve each student's understanding and ability to communicate across and within diverse racial groups in the United States.

Bachelor of Arts, Humanitarian Relief & Development (Online)

Bachelor of Arts, Humanitarian Relief & Development (4-year plan)

Foundational Core- 34 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation- 9 credits

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credits

Discursive Inquiry (6 credits)

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry (6 credits) Select Two:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 45 Credit Hours

THEO 3013 - THEOLOGY OF COMPASSION

Compassion for others, especially for those in need, is a fundamental tenet of biblical theology. Compassion for humankind was the motivation for Christ's mission to earth, as He mentions at the inauguration of his ministry in Luke 4: "The Spirit of the Lord is on me, because he has anointed me to proclaim good news to the poor. He has sent me to proclaim freedom for the prisoners and recovery of sight for the blind, to set the oppressed free, to proclaim the year of the Lord's favor." This course reviews the biblical foundation for compassion and traces the Church's theological interpretation and practical application of compassion throughout history.

Prerequisites & Notes

NULL

Credits: 3

PMIN 3073 - NEIGHBORLINESS ACROSS DIVIDING LINE

A study of the biblical call to neighborliness that encourages development of relationships across the historically divided lines of race and economics. Theological and cultural topics will be analyzed to understand how the Greatest Commandment – loving God and neighbors – can be practically pursued and expressed.

Prerequisites & Notes

NULL

Credits: 3

HRDV 3003 - MANAGEMENT OF RELIEF & DEVELOPMENT

Providing disaster and humanitarian relief is a complex process involving individuals from diverse backgrounds, locations, languages, preparation, involvement, and commitment. Leadership in these settings requires both skills in leading multifaceted projects, delegating responsibilities, inspiring volunteers, and managing funds. This course prepares students for leadership within the field of community relief and development.

Prerequisites & Notes

None

Credits: 3

HRDV 3013 - REFUGEE & MIGRANT POPULATIONS

Examines the history, dynamics and impact of human migration with special attention given to effective strategies for aiding refugee and migrant populations. Topics include challenges these populations face and effective relief and development strategies.

Prerequisites & Notes

None

Credits: 3

HRDV 3023 - CONTEXTUALIZED COMMUNICATION

The need to communicate across multiple cultures is an increasingly critical requirement in today's multicultural environment, where national boundaries provide minimal isolation and face-to-face communication is replaced by technological connections. Students' own philosophies and worldviews provide a foundation upon which techniques and approaches for communications are explored.

Prerequisites & Notes

None

Credits: 3

HRDV 3033 - DISASTER SERVICES

This course presents the foundational principles and skills necessary to plan and conduct services for the four phases of disasters: Preparation, Mitigation, Response, and Recovery, in both domestic and international settings. Emphasis includes the coordination of services among governmental, non-governmental, field partners, and religious organizations.

Prerequisites & Notes

None

Credits: 3

HRDV 3043 - HOLISTIC DEVELOPMENT

This course equips students with models that foster dignity rather than dependency and empowerment rather than entitlement. Students will learn how to partner with local churches and other stakeholders, assess community assets and needs, and formulate responsible approaches to community development. This introductory course on holistic development carefully builds a biblical view of poverty and a theology of responsible aid in the context of various real-world development topics. Students will also expand and deepen their understanding through service learning opportunities.

Prerequisites & Notes

None

Credits: 3

HRDV 3053 - APPLIED SUSTAINABILITY

Applied Sustainability prepares students to meet the destitute challenges of this world through compassion, cutting edge technology, sustainable processes, and financially viable methods. Students investigate approaches to the provision of clean water and adequate food resources to both the Least Developed Countries (LDC) and to people most impacted by physical and economic disasters.

Prerequisites & Notes

None

Credits: 3

HRDV 3063 - CONFLICT MANAGEMENT AND NEGOTIATION

Leadership of humanitarian programs requires the ability to successfully manage conflict in a variety of settings. This course investigates biblical conflict and reconciliation, the principles of mediation and negotiation, the role of power and culture, and characteristics of conflict competent leaders. In addition to the Bible, this course incorporates writings and videos from experts in the field to provide a well-rounded experience for students. Upon completion of this course, students will have the knowledge, skills, and abilities needed to address conflict with confidence - whether it be as a mediator or participant.

Prerequisites & Notes

None

Credits: 3

HRDV 4003 - CHILDREN & YOUTH IN CRISIS

Children and youth are especially susceptible to the traumatic effects of natural and human-made disasters. Because of their higher level of innocence, minimal experience, and the vulnerable place they have in many societies, relief actions and strategies must identify actions and strategies as quickly as possible. In this course, students will identify stress symptoms and emotional suffering to help as much as is appropriate and then to direct them to qualified support specialists. This course is not intended for professional or trained counselors but for those on site immediately following natural or human caused disasters or who conduct outreaches where children and youth may be in crisis.

Prerequisites & Notes

None

Credits: 3

HRDV 4013 - AFFECTING CHANGE THROUGH ADVOCACY

Affecting Change through Advocacy offers students a biblical foundation and holistic approaches to assess and apply methods of advocacy, aligned with both the beneficiary and the intended outcome. Topics include responsible advocacy, spheres of influence, stages of effective action, all within a kingdom-centered framework of ethics.

Prerequisites & Notes

None

Credits: 3

HRDV 4033 - HUM RELIEF & DEV PRACTICUM

The Humanitarian Compassion Practicum allows students to apply the theory and course-based learning to real-life situations through actual operation organizations and agencies. Students are responsible for procuring their practicum site, with the assistance of their academic advisor. Hope Education Network partners are available along with the university's own practicum partners.

Prerequisites & Notes

None

Credits: 3

HRDV 4043 - CARE & WELLNESS IN HUMANITARIAN CONTEXT

This course will provide students with the knowledge and skills to function from a state of integrated health in a humanitarian context. Emphasis will include ownership of personal wellness, collaboration for community wellness, and application for the wellness of those served. Topics include psychological first aid, evaluation, and interventions for physiological health, biblical frameworks for self-care and wellness, compassion fatigue, and interventions for personal and community health.

Prerequisites & Notes

None

Credits: 3

Divine Design (Minor, Electives, Experiential Learning) 41 Credits

General Electives are any college-level courses that do not satisfy specific program requirements. To meet the Divine Design core requirements, students may declare minors, enroll in elective credit, and enjoy experiential learning like study abroad, internships, or practicum. Practicum course options include PRAC 1001 (1 hr), PRAC 1002 (2 hrs), PRAC 1003 (3 hrs), PRAC 1004 (4 hrs). Students may earn up to 24 credit hours toward their degree program through experiential learning practicum.

Total Program Hours- 120 Credit Hours

Minor, Psychology

The Minor in Psychology provides students with a foundation in psychological concepts and skills related to human functioning.

Total Program Hours- 18 Credit Hours

Required - 12 Credit Hours

PSYC 2133 - THEORIES OF PERSONALITY

This course is an introduction to the study of personality formation. Major personality themes are critically examined. Students are introduced to the application of these theories in counseling and the treatment of mental illness.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

PSYC 2233 - MARRIAGE AND FAMILY

This course is a study of the major issues related to courtship, marriage, and family formation. Special attention is given to the social conditions influencing courtship, marriage, divorce, and family life. Topics include dating rituals, gender differences, expectations, parenting, family dysfunction, family violence, and strategies for sound relating. The role of family counselors and therapists is also discussed.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

PSYC 3003 - ABNORMAL PSYCHOLOGY

This course is a study of the nature, causes, and treatment of abnormal behavior, including personality disorders, neuroses, psychoses, stress reactions, and other dysfunctions. Elements contributing to mental health and well-integrated personality are also considered.

Prerequisites & Notes

PSYC 1133 or PSYC 1233 , PSYC 2133

Credits: 3

Psychology Electives- 6 Credit Hours

Select two PSYC 2xxx level or higher courses not already taken.

Site-Based (Partnership)**Bachelor of Science, Criminal Justice (Site-based)**

Bachelor of Science, Criminal Justice (Online) Four-Year Course Plan

Program Description

The Bachelor of Science Degree in Criminal Justice provides curriculum and practical experiences designed to help develop students and practitioners with critical and analytical skills to promote the administration of justice in a diverse and global society. This program equips students with a thorough understanding of criminal justice systems and theories, and the historical foundation of criminal justice. The undergraduate curriculum is designed to allow students to explore the various agencies, personnel roles, and career opportunities available in the criminal justice field. The Program seeks to educate students as well as promote workforce development by targeting practitioners currently working in the criminal justice field. Students who major in criminal justice have many opportunities to further their personal and professional development.

*Note: Students taking courses online outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. State-specific requirements are specified in the SEU Catalog. Your Academic Advisor is available to help integrate these additional courses into your plan.

Foundational Core- 34 Credit Hours**SEU Foundations- 3 Credit Hours****CORE 1111 - COMMUNITY AND COLLEGE SUCCESS**

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Major Core- 39 Credit Hours

CRIM 2003 - CRIMINAL JUSTICE AND THE CHRISTIAN

This course will cover topics that pertain to both the fields of Criminal Justice and Christian Theology, requiring students to examine crime and punishment through the eyes of Jesus Christ. Topics will be predicated on current events, new developments, and the interests of criminal justice majors and professionals.

Prerequisites & Notes

NULL

Credits: 3

CRIM 2223 - INTRO TO CRIME SCENE INVESTIGATION

This course provides an overview of crime scene response. Students will have the opportunity to perform hands-on exercises utilizing techniques performed by crime scene investigators to include sketching and photographing crime scenes, writing reports, collecting and packaging evidence, processing scenes and evidence for latent prints, and courtroom testimony. Advanced crime scene processing techniques will also be demonstrated.

Prerequisites & Notes

NULL

Credits: 3

CRIM 2203 - CRIMINAL JUSTICE SYSTEM

This course covers the origin, evolution, and daily operation of the criminal justice system in the United States. Relationships between law enforcement, the court system, and corrections are studied.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3203 - SOCIOLOGY OF POLICING

This course will cover the history, evolution and structure of policing in the United States. Popular innovations in policing and law enforcement will be emphasized. Special attention to conflicts and imperatives which define police officers' roles and the character of police work will be discussed along with careers and hiring practices by law enforcement agencies.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 4403 - CRIMINAL LAW

This course examines the core philosophies of criminal law, including both substantive and procedural elements. There is an emphasis on the theoretical foundations and principles of criminal law, state and federal criminal statutes, and court decisions. Discussions will also focus on the various criminal defenses.

Prerequisites & Notes

Prerequisite: None

Credits: 3

CRIM 3223 - RESEARCH IN CRIMINAL JUSTICE

This course is an examination of the fundamental research methods in the field of criminal justice. This includes: the development of research questions and research design, methods of data collection, data analysis, and reporting results.

Prerequisites & Notes

Prerequisite: None

Credits: 3

CRIM 3303 - JUVENILE DELINQUENCY

This course covers the types of delinquency as well as supporting theories. Particular attention will be given to the role of family, school, and the peer group in promoting delinquency. The effects of social institutions on delinquency, prevention, and control are also studied. The juvenile justice system is compared to the adult system and the social consequences of delinquency are studied. This course will provide students with the tools to analyze and evaluate juvenile justice policies and programs.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3403 - AMERICAN CRIMINAL COURTS

This course examines the court system in the United States and provides an introduction to the many elements of the judicial process. Major topics include: the role of the courts, trial procedures, role of decision makers in the court system, the distinctions between civil and criminal systems, the alternatives available to the accused prior to trial proceedings, and public policy as it relates to the court system.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3603 - CORRECTIONS AND PUNISHMENT

This course is an introduction to the corrections system in the United States and will provide an overview of the history, current institutional practices, policies, and legal issues. There is an emphasis on contemporary conditions and alternatives to traditional responses to crime and an exploration of the principles and practices of correctional options afforded to offenders in various types of settings. Topics covered include incarceration, deterrence, rehabilitation, retribution, and system reform.

Prerequisites & Notes

CRIM 2203

Credits: 3

CRIM 4203 - THEORY AND CRIMINAL JUSTICE

This course provides an analysis of how crime affects society. Prevention and control of criminal behavior are based on theoretical models. Several of these models are examined as they relate to the day-to-day functions of the police, courts, and corrections.

Prerequisites & Notes

CRIM 2203

Credits: 3

HUSV 3333 - UNDERSTANDING HUMAN DIVERSITY

This course examines the complex nature of culture and personal identity, explores populations at-risk, and encourages students to understand and appreciate diversity. Specific knowledge of individual cultures, awareness of the patterns of oppression experienced by those cultures, and skills relevant to developing a culturally competent approach to working with diverse people groups are addressed.

Prerequisites & Notes

NULL

Credits: 3

PPOL 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

CRIM 4303 - CRIMINAL JUSTICE SENIOR SEMINAR

This course is designed as the capstone learning experience for all Criminal Justice majors. The course will integrate activities into a comprehensive understanding of the integrative nature of the criminal justice system. Emphasis is on policy evaluation, career options, and member training for a criminal justice agency.

Prerequisites & Notes

Prerequisite: CRIM 3603

Credits: 3

Divine Design (Minor, Electives, Experiential Learning)- 47 Credit Hours

To meet the Divine Design requirement, student may earn credit hours in general elective courses, declare minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 hr), PRAC 1002 (2 hrs), PRAC 1003 (3 hrs), PRAC 1004 (4 hrs), and PMIN 2303 (3 hrs) up to a total of 24 credit hours. General Electives are any college-level courses that do not satisfy the above program requirements. Student must complete the above program requirements, with remaining credit hours earned in Divine Design to meet the total program hours.

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

AND

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

OR

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

Area III, Natural Science and Mathematics - 11 Credit Hours

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Area IV, History, Social and Behavioral Sciences - 12 Credit Hours**HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY**

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Arkansas**Science**

Select one course not taken in Foundational Core

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Social Sciences**HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY**

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

Kentucky

Social/Behavioral Sciences

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Total Program Hours- 120 Credit Hours

Bachelor of Science, Human Services (3/1) (Site-based)

Bachelor of Science, Human Services (3/1) (Four Year Plan)

This path sets students up to complete their bachelor's degree in 3 years by going to school year-round. And then upon admission into the Masters in Human Services, they will be able to complete that degree in one year with full-time attendance.

*Note: Students taking courses online outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. State-specific requirements are specified in the SEU Catalog. Your Academic Advisor is available to help integrate these additional courses into your plan.

Total Program Hours- 120 Credit Hours

Foundational Core- 34 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation- 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credit Hours

Discursive Inquiry- 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry (6 credits) Select Two:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

Select 1 of the following:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 39 Credit Hours

HUSV 2013 - INTRODUCTION TO HUMAN SERVICES

An examination of the fundamental knowledge, skill and attitudinal base of the human services profession. Included are philosophy, value base, ethical standards, early history, professional roles and functions, client systems, purposes served, fields of practice, professional organizations, and the current status of Human Services. An introductory exposure to generalist human service practice is provided.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2043 - CASE MANAGEMENT AND INTERVENTION

This course gives students a foundation in case management competencies and intervention strategies.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2053 - HUMAN SERVICES DELIVERY

This course explores the different delivery systems and models used in human services. This course will examine how changes in public policy, administrative directives, and legal rulings impact service delivery. This course will also examine the impact that past political, social, and cultural changes have on the way services are delivered.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2433 - HUMN SRVCES & DVLPMT ACRS LIFE-SPAN

This course will examine human development across the life-span from a human services perspective. The focus of the course will center around the various services available as they relate to the individual's life-span development from conception to death.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3033 - GROUP DYNAMICS

This course is a study of group dynamics, with particular attention to therapeutic group- process. The role of the leader, issue-specific or problem-specific group facilitation, and strategies for dealing with particular group-process issues will be emphasized. Participation in group-process is required of every student.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3073 - HUMAN SERVICES PRACTICUM AND FIELD EXPERIENCE I

This course allows students the opportunity to put theory, skills, and professional behavior into practice by working with an agency within the human services profession. Students will gain key knowledge, skills, and abilities by working within a field setting.

Prerequisites & Notes

Prerequisites: HUSV 1013 , HUSV 2053 , HUSV 2433 , HUSV 3333 , HUSV 3063 , HUSV 3033 , HUSV 4053 , HUSV 2433

Credits: 3

HUSV 3083 - HUMAN SERVICES PRACTICUM AND FIELD EXPERIENCE II

This course is a continuation of HUSV 3073. It provides students the opportunity to put theory, skills, and professional behavior into practice by working with an agency within the human services profession. Students will gain key knowledge, skills, and abilities by working within a field setting.

Prerequisites & Notes

Prerequisite: HUSV 3073

Credits: 3

HUSV 3333 - UNDERSTANDING HUMAN DIVERSITY

This course examines the complex nature of culture and personal identity, explores populations at-risk, and encourages students to understand and appreciate diversity. Specific knowledge of individual cultures, awareness of the patterns of oppression experienced by those cultures, and skills relevant to developing a culturally competent approach to working with diverse people groups are addressed.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3533 - CONFLICT RESOLUTION IN HUMAN SRVCS

This course focuses on human interaction, conflict, and conflict resolution theories in the helping professions. This course also explores methods of conflict resolution associated with positive outcomes related to settling disputes and personal development

Prerequisites & Notes

NULL

Credits: 3

HUSV 3833 - MANAGEMENT IN HUMAN SERVICES

This course provides an introduction to management practices of human service programs, agencies, and organizations with an emphasis on program development.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3433 - HUMAN SERVICES AND FAITH INTEGRATION

The purpose of this course is to provide students with an opportunity to explore human services from a Christian world view that involves intentionally integrating faith and human services with an emphasis on spiritual and professional growth.

Prerequisites & Notes

NULL

Credits: 3

HUSV 4053 - RESEARCH METHODS

The application of the scientific method of inquiry to theory and practice for the purpose of knowledge building and the development of best practice. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice and evaluation of theory. The focus is on the development of social research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

NULL

Credits: 3

Please see the degree audit for MA in Human Services

Divine Design - 47 Credits

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), and PMIN 2303 (3 credit hours) up to a total of 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

Area III, Natural Science and Mathematics - 11 Credit Hours

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Area IV, History, Social and Behavioral Sciences - 12 Credit Hours

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing

historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

Prerequisites & Notes

NULL

Credits: 3

Montana

Montana requires 6 credit hours of natural science with a laboratory experience. Students may choose to take BIOL 1334 to complete the requirement or any other science course to meet the credit hour requirement.

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

Nevada

3 credit hours needed. The Socio-Historical requirement must be fulfilled by taking PPOL 2433 or by earning credit for one of the following combinations of classes from an accredited Nevada college: 1) HIST 100, 2) PCS 101, 3) HIST 101 and HIST 102, or 4) or HIST 101 and 217.

Ohio

Ohio students need an additional two credit hours in one or more of the following areas: Oral and Written Communication, Mathematics, Statistics and Logic, Arts, Humanities, Culture and Diversity, Natural Sciences, Technology and Innovation.

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

* if not already taken or 2 more credits to get to 36 hours

Oklahoma

In addition to the courses listed below, Oklahoma students need an additional 7 credit hours in one or more of the following: History, Social Science, Behavioral Science, Humanities, Math, Natural Science, Language, or Fine Arts.

PPOL 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Bachelor of Science, Interdisciplinary Studies: Human Services/Psychology (Site-based)

Bachelor of Science, Interdisciplinary Studies: Human Services/Psychology 4- Year Plan

The Interdisciplinary Studies: Human Services and Psychology degree program combines the fields of Human Services and Psychology. Through the study of psychology students will develop a solid understanding of the human mind and behavior. And through the study of human services students will learn how to meet human needs through direct prevention and resolution of problems. Together students will gain the knowledge and skills they need to effectively understand and serve the needs of hurting people within their communities.

*Note: Students taking courses online outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. State-specific requirements are specified in the SEU Catalog. Your Academic Advisor is available to help integrate these additional courses into your plan.

Total Program Hours- 120 Credit Hours

Foundational Core- 34 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:
CORE 1111

Credits: 2

Worldview Formation- 9 credits**BIBL 1113 - THE STORY OF SCRIPTURE**

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:
CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credits**Discursive Inquiry (6 credits)****ENGL 1113 - COLLEGE COMPOSITION**

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry (6 credits) Select Two:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 45 Credit Hours

HUSV 2013 - INTRODUCTION TO HUMAN SERVICES

An examination of the fundamental knowledge, skill and attitudinal base of the human services profession. Included are philosophy, value base, ethical standards, early history, professional roles and functions, client systems, purposes served, fields of practice, professional organizations, and the current status of Human Services. An introductory exposure to generalist human service practice is provided.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2043 - CASE MANAGEMENT AND INTERVENTION

This course gives students a foundation in case management competencies and intervention strategies.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2053 - HUMAN SERVICES DELIVERY

This course explores the different delivery systems and models used in human services. This course will examine how changes in public policy, administrative directives, and legal rulings impact service delivery. This course will also examine the impact that past political, social, and cultural changes have on the way services are delivered.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3063 - PROGRAM PLANNING AND EVALUATION

This course will examine the theory, process, and procedures of program planning and evaluation. This course will also provide students with the basic set of skills necessary to design, develop, and evaluate various human service programs.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3333 - UNDERSTANDING HUMAN DIVERSITY

This course examines the complex nature of culture and personal identity, explores populations at-risk, and encourages students to understand and appreciate diversity. Specific knowledge of individual cultures, awareness of the patterns of oppression experienced by those cultures, and skills relevant to developing a culturally competent approach to working with diverse people groups are addressed.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3433 - HUMAN SERVICES AND FAITH INTEGRATION

The purpose of this course is to provide students with an opportunity to explore human services from a Christian world view that involves intentionally integrating faith and human services with an emphasis on spiritual and professional growth.

Prerequisites & Notes

NULL

Credits: 3

OR

PSYC 3433 - INTEGRATION SEMINAR PSYCH AND THEOL

This course is a study of the contemporary evangelical efforts to integrate psychology and theology, focusing on the value of an integrative approach to both disciplines. Topics include behavior, cognition, emotion, and motivation. Junior or senior level standing required.

Prerequisites & Notes

Prerequisites: PSYC 1133 or PSYC 1233 ; PSYC 2133

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

OR

HUSV 2433 - HUMN SRVCES & DVLPMT ACRS LIFE-SPAN

This course will examine human development across the life-span from a human services perspective. The focus of the course will center around the various services available as they relate to the individual's life-span development from conception to death.

Prerequisites & Notes

NULL

Credits: 3

PSYC 2013 - RESEARCH METHODS IN PSYCHOLOGY

This course addresses the application of various research methods of inquiry in application to theory and practice for the purpose of knowledge building and the development of best practice. Emphasis is on developing general research skills that can be applied within any area of psychology. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice, and evaluation of theory. The focus is on the development of research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

Prerequisite: PSYC 2003

Corequisite: PSYC 2023

Credits: 3

OR

HUSV 4053 - RESEARCH METHODS

The application of the scientific method of inquiry to theory and practice for the purpose of knowledge building and the development of best practice. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice and evaluation of theory. The focus is on the development of social research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

NULL

Credits: 3

PSYC 2133 - THEORIES OF PERSONALITY

This course is an introduction to the study of personality formation. Major personality themes are critically examined. Students are introduced to the application of these theories in counseling and the treatment of mental illness.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

PSYC 3003 - ABNORMAL PSYCHOLOGY

This course is a study of the nature, causes, and treatment of abnormal behavior, including personality disorders, neuroses, psychoses, stress reactions, and other dysfunctions. Elements contributing to mental health and well-integrated personality are also considered.

Prerequisites & Notes

PSYC 1133 or PSYC 1233 , PSYC 2133

Credits: 3

PSYC 3733 - SOCIAL PSYCHOLOGY

This course is a survey of theories of interpersonal behavior and group dynamics emphasizing the influence of groups and group membership upon individual behavior. Topics include aggression, attitudes, attribution, conformity, altruism, communication, propaganda, morale, and other aspects of interpersonal relationships.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 4083 - LEARNING AND COGNITION

This course is an introduction to the psychological study of learning and cognition. Topics examined will include classical conditioning, operant conditioning, observational learning, perception, attention, and memory. Traditional views as well as current trends will be discussed.

Prerequisites & Notes

PSYC 2133

Credits: 3

Human Services/Psychology Electives, Select three courses

Any Human Services or Psychology course that is not required above

Divine Design - 41 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), and PMIN 2303 (3 credit hours) up to a total of 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count

towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

AND

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Credits: 3

Bachelor of Science, Psychological Sciences (Site-based)

Bachelor of Science, Psychological Sciences (Site-based) Four-Year-Plan

The Bachelor of Science in Psychological Sciences covers the main content areas and skills recommended by the American Psychological Association for undergraduate programs. Students who achieve the program objectives will be able to apply their knowledge of human cognitive, emotional, and behavioral processes to a variety of careers that involve working with people. This program also provides the required competencies for students who wish to pursue graduate studies in psychology, counseling, and related fields.

Total Program Hours - 121 Credit Hours

NOTE: It is the responsibility of the student to read, review, and fulfill the requirements and total hours of this degree audit for their applicable degree.

Foundational Core - 58 Credit Hours

Intellectual and Practical Skills - 15 Hours

ENGL 1133 - ENGLISH COMPOSITION I

Study and practice in the critical reading and effective writing of expository prose, with an emphasis on fluency and style.

Credits: 3

ENGL 1233 - ENGLISH COMPOSITION II

This course includes study and practice in the critical reading and effective writing of argumentative and expository prose, with an emphasis on the documented paper. A research paper is required.

Prerequisites & Notes

ENGL 1133

Credits: 3

Mathematics - 6 Hours

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

Math Elective (select one):

MATH 1223 - QUANTITATIVE REASONING

This course emphasizes quantitative reasoning skills and is designed to prepare students to think critically about the world they live in. Applications in consumer education, civic engagement, and personal finance will be presented. Topics include logic, probability, statistics, exponential growth, and data analysis.

Prerequisites & Notes

NULL

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1323 - EXPLORATION IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. Possible topics for this course are set theory, elementary number theory, history of mathematics, numbers and number systems, financial

mathematics, systems of equations, and matrices.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Engaging Human Culture and the Natural World - 21 Hours

Natural Science - 6 Hours

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

Behavioral Science Elective:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

Social Science Elective:

PSYC 2233 - MARRIAGE AND FAMILY

This course is a study of the major issues related to courtship, marriage, and family formation. Special attention is given to the social conditions influencing courtship, marriage, divorce, and family life. Topics include dating rituals, gender differences, expectations, parenting, family dysfunction, family violence, and strategies for sound relating. The role of family counselors and therapists is also discussed.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

History Elective (select one):

HIST 1033 - WORLD CIVILIZATION TO 1600

A survey of world history from the beginning of civilization to 1600. Introduction to the origins and early development of individual civilizations. Stresses interdependency and interrelations among cultures, and compares social, political, and religious movements.

Prerequisites & Notes

NULL

Credits: 3

HIST 1043 - WORLD CIVILIZATION SINCE 1600

A survey of world history from 1600 to the present. Emphasis is placed on various nationalistic movements including the English, American, and French Revolutions; the rise of new nations; scientific expansion; changes in religious sects; world conflicts; and status of the world at the present.

Prerequisites & Notes

NULL

Credits: 3

HIST 2013 - AMERICAN HISTORY TO 1877

A survey of American history from discovery to 1877. Topics include the colonial period, the revolutionary era, the Constitution, Jeffersonianism, economic and territorial expansion, sectional tensions, the Civil War, and Reconstruction.

Prerequisites & Notes

NULL

Credits: 3

HIST 2023 - AMERICAN HISTORY 1877 TO THE PRESENT

A survey of American history from 1877 to the present. Topics include the New South, the New West, foreign affairs, industrialization, the Progressive Era, the World Wars, the Depression, the Cold War, and present issues.

Prerequisites & Notes

NULL

Credits: 3

PPOL 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

PPOL 2433 - UNITED STATES & NEVADA CONSTITUT

This course is a study of the legal culture in the United States, including the British common law system, origins of the U.S. and State of Nevada Constitutions, amendments, and landmark cases. This course is required to be taken by Las Vegas, NV extension site students only.

Prerequisites & Notes

NULL

Credits: 3

*Required for Nevada students.

Humanities Elective (select one):

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

Literature Elective:

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Spiritual Formation - 13 Hours

CORE 1001 - COLLEGE AND CHRISTIAN CALLING

This course serves as an introduction to the mission of Southeastern University and the academic tradition of liberal arts education. The course prepares students for academic and social success by focusing on the areas of success factors for higher education, Christian higher education as calling, and personal and spiritual formation.

Prerequisites & Notes

NULL

Credits: 1

BINT 1533 - THE NEW TESTAMENT INTERPRETATION

This course serves as an introduction to the New Testament in the context of its first century environments. The course examines the teachings and interpretations of the New Testament as well as the role of the Scriptures in the Church.

Prerequisites & Notes

NULL

Credits: 3

BIOT 1433 - THE OLD TESTAMENT INTERPRETATION

The course serves as an introduction to Old Testament interpretation. It provides an elemental framework for interpreting the Old Testament by exploring its ancient Near Eastern contexts; discussing literary, thematic, and theological constructs; and demonstrating how it informs Christian thought and practice.

Prerequisites & Notes

NULL

Credits: 3

THEO 2123 - CHRISTIAN THOUGHT AND PRACTICE

This course surveys the history of Christian thought and practices. Doctrinal topics introduced in the course include the doctrines of God, Jesus Christ, the Holy Spirit, humanity, salvation, the church, scripture, and last things. The course explores the application of Christian practices and spiritual disciplines such as prayer, communion, baptism, and social responsibility to the students' community.

Prerequisites & Notes

NULL

Credits: 3

PSYC 3433 - INTEGRATION SEMINAR PSYCH AND THEOL

This course is a study of the contemporary evangelical efforts to integrate psychology and theology, focusing on the value of an integrative approach to both disciplines. Topics include behavior, cognition, emotion, and motivation. Junior or senior level standing required.

Prerequisites & Notes

Prerequisites: PSYC 1133 or PSYC 1233 ; PSYC 2133

Credits: 3

Christian Responsibility - 9 Hours

THEO 3123 - INTRODUCTION OF ETHICS

This course examines the philosophical and theological principles and issues related to ethics. It addresses meta-ethical questions about the relationship between moral language and concepts and various metaphysical and post-metaphysical views; normative ethical theories; theological structures and implications of ethics; and contemporary ethical issues.

Prerequisites & Notes

NULL

Credits: 3

Psychology - Major Core - 45 Credit Hours

PSYC 2003 - COMMUNICATION AND CAREERS IN PSYCHOLOGY

This course is an introduction to communication in the field of psychology. Students will develop skills in information literacy, comprehension of peer-reviewed literature, synthesis of information, and use of proper APA standards. Students will also develop their verbal presentation skills. Additionally, students will be introduced to the different career opportunities at both baccalaureate and graduate-degree levels as well as requirements and skills required for admissions into graduate school.

Prerequisites & Notes

PSYC 1133

Credits: 3

PSYC 2013 - RESEARCH METHODS IN PSYCHOLOGY

This course addresses the application of various research methods of inquiry in application to theory and practice for the purpose of knowledge building and the development of best practice. Emphasis is on developing general research skills that can be applied within any area of psychology. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice, and evaluation of theory. The focus is on the development of research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

Prerequisite: PSYC 2003

Corequisite: PSYC 2023

Credits: 3

PSYC 2023 - STATISTICAL METHODS

This course studies the application of statistical methods to existing data. Topics include organizing and presenting data, descriptive and inferential measures, and interpreting statistical information. Emphasis will be on sampling, probability, hypothesis testing, and appropriate application of statistical tests.

Prerequisites & Notes

Prerequisite: MATH 1213

Corequisite: PSYC 2013

Credits: 3

PSYC 2133 - THEORIES OF PERSONALITY

This course is an introduction to the study of personality formation. Major personality themes are critically examined. Students are introduced to the application of these theories in counseling and the treatment of mental illness.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

PSYC 3003 - ABNORMAL PSYCHOLOGY

This course is a study of the nature, causes, and treatment of abnormal behavior, including personality disorders, neuroses, psychoses, stress reactions, and other dysfunctions. Elements contributing to mental health and well-integrated personality are also considered.

Prerequisites & Notes

PSYC 1133 or PSYC 1233 , PSYC 2133

Credits: 3

PSYC 3023 - CULTURAL PSYCHOLOGY

This course provides students with an introduction to multicultural and cross-cultural psychology including its theories, research, and exploration of intercultural knowledge. The course examines the dynamics of cultural relevance related to psychological processes, abnormality, and treatment. The course implements exercises of self-awareness and engagement within other cultures.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 3633 - PROFESSIONAL, ETHICAL, LEGAL ISSUES

This course is an exploration of the development of professional self with emphasis on the changing ethical and legal context for practice. Approaches to counseling are explored with an emphasis on students' development of professional style. Students explore issues of professional and personal values and ethics, personality, values, and interests.

Prerequisites & Notes

NULL

Credits: 3

PSYC 3733 - SOCIAL PSYCHOLOGY

This course is a survey of theories of interpersonal behavior and group dynamics emphasizing the influence of groups and group membership upon individual behavior. Topics include aggression, attitudes, attribution, conformity, altruism, communication, propaganda, morale, and other aspects of interpersonal relationships.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 4033 - PHYSIOLOGICAL PSYCHOLOGY

This course is a study of the physiological components of behavior. Topics include structure and function of the nervous system; theory of brain functions; and current problems, theories, and techniques in physiological psychology.

Prerequisites & Notes

PSYC 1133 or PSYC 1233; PSYC 2133; BIOL 1333, BIOL 133L

Credits: 3

PSYC 4083 - LEARNING AND COGNITION

This course is an introduction to the psychological study of learning and cognition. Topics examined will include classical conditioning, operant conditioning, observational learning, perception, attention, and memory. Traditional views as well as current trends will be discussed.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 4093 - PSYCHOLOGY CAPSTONE SENIOR SEMINAR

This capstone course will provide students the opportunity to critically reflect on and apply the theories and skills learned throughout their Psychology degree program. Students will articulate and include a capstone project related to their proposed career goals. Through this course students will demonstrate their understanding as well as faith integration through the production of a major paper/project and presentation.

Prerequisites & Notes

Prerequisite: Final semester senior, PSYC 4033 , PSYC 4083

Credits: 3

Psychology Electives (select three) - 9 Credit Hours

PSYC 3053 - PSYCHOLOGY PRACTICUM

This course provides students with practical service-learning experience in order to apply psychological principles learned throughout their program of study through volunteer experiences in a mental health, social service, educational psychology, or related setting under the supervision of a qualified in-service supervisor and a college supervisor. Placement must be approved by the course instructor.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 3103 - MARITAL AND FAMILY THERAPY

This course is an overview of counseling approaches to family problems, including the family systems approach. Issue areas explored include communication, role expectations, and sexual dysfunction. Various counseling techniques related to marital maladjustment are explored. Principal approaches to marital therapy and family therapy are emphasized.

Prerequisites & Notes

PSYC 2133 , PSYC 2233

Credits: 3

PSYC 3533 - INTRODUCTION TO COUNSELING

This course is a study of various theoretical approaches to the practice of counseling and psychotherapy with normal and disturbed clients. Focus is on the psychoanalytic, cognitive, behavioral, and phenomenological approaches.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 3553 - INTRO TO COUNSELING CHILDREN & YOUTH

In this course, students will explore issues, theories, and applications related to understand and helping children and adolescents with social or emotional problems. Students will learn to assess behavior and incorporate ethically and legally appropriate strategies to meet the needs of counseling children and adolescents.

Prerequisites & Notes

PSYC 3533

Credits: 3

PSYC 4013 - PSYCHOLOGY OF LEADERSHIP

The course will develop the student's communication and servant leadership skills through the joining of traditional theories and Christian based views of what it means to be an effective communicator and leader. Through the course the student will analyze leadership behaviors and communication styles from multiple perspectives and synthesize them into a personal philosophy of servant leadership applicable to both their personal and professional lives.

Prerequisites & Notes

NULL

Credits: 3

PSYC 4043 - DIAGNOSIS, ASSESSMENT & CASE MGMT

This course is an introduction to the skills needed for client diagnosis, assessment, and case management that are currently used in the helping professions. The course will focus on identifying pertinent information for preliminary assessment of a presenting problem, goal setting and contracting, monitoring for progress, and documenting sensitive client data. Topics will include individual psycho-social assessments, and family assessments.

Prerequisites & Notes

PSYC 2133; PSYC 3003

Credits: 3

General Electives - 18 Credit Hours

General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

*6 credit hours of general electives must be in upper level (3000 or 4000 level) courses.

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama**Area I, Written Composition - 6 Credit Hours**

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

AND

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Humanities

PMIN 2123 - CHRISTIAN SPIRITUALITY

This course empowers the student to evaluate spiritual growth and cultivate their personal relationship with God. The course provides an opportunity for students to practice classical Christian spiritual disciplines that nurture intimacy with God. Students will also become acquainted with various perspectives on spiritual life from the area of historical theology.

Prerequisites & Notes

NULL

Credits: 3

Maryland

Maryland students need an additional six credit hours in one or more of the following five areas: (i) Arts and humanities; (ii) English composition; (iii) Social and behavioral sciences; (iv) Mathematics; and (v) Biological and physical sciences.

Minnesota

Communication

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Natural Science

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Social Science

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Montana

Montana requires 6 credit hours of natural science with a laboratory experience. Students may choose to take BIOL 1334 to complete the requirement or any other science course to meet the credit hour requirement.

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

Nevada

3 credit hours needed. The Socio-Historical requirement must be fulfilled by taking PPOL 2433 or by earning credit for one of the following combinations of classes from an accredited Nevada college: 1) HIST 100, 2) PCS 101, 3) HIST 101 and HIST 102, or 4) or HIST 101 and 217.

Ohio

Ohio students need an additional two credit hours in one or more of the following areas: Oral and Written Communication, Mathematics, Statistics and Logic, Arts, Humanities, Culture and Diversity, Natural Sciences, Technology and Innovation.

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

* if not already taken or 2 more credits to get to 36 hours

Oklahoma

In addition to the courses listed below, Oklahoma students need an additional 7 credit hours in one ore more of the following: History, Social Science, Behavioral Science, Humanities, Math, Natural Science, Language, or Fine Arts.

PPOL 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

Select One:

Choose one not already chosen for Foundational Core

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

PSYC 2003 - COMMUNICATION AND CAREERS IN PSYCHOLOGY

This course is an introduction to communication in the field of psychology. Students will develop skills in information literacy, comprehension of peer-reviewed literature, synthesis of information, and use of proper APA standards. Students will also develop their verbal presentation skills. Additionally, students will be introduced to the different career opportunities at both baccalaureate and graduate-degree levels as well as requirements and skills required for admissions into graduate school.

Prerequisites & Notes

PSYC 1133

Credits: 3

Year Two

First Semester - 15 Credit Hours

PSYC 2133 - THEORIES OF PERSONALITY

This course is an introduction to the study of personality formation. Major personality themes are critically examined. Students are introduced to the application of these theories in counseling and the treatment of mental illness.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

PSYC 2233 - MARRIAGE AND FAMILY

This course is a study of the major issues related to courtship, marriage, and family formation. Special attention is given to the social conditions influencing courtship, marriage, divorce, and family life. Topics include dating rituals, gender differences, expectations, parenting, family dysfunction, family violence, and strategies for sound relating. The role of family counselors and therapists is also discussed.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

BINT 1533 - THE NEW TESTAMENT INTERPRETATION

This course serves as an introduction to the New Testament in the context of its first century environments. The course examines the teachings and interpretations of the New Testament as well as the role of the Scriptures in the Church.

Prerequisites & Notes

NULL

Credits: 3

History Elective (select one):

HIST 1033 - WORLD CIVILIZATION TO 1600

A survey of world history from the beginning of civilization to 1600. Introduction to the origins and early development of individual civilizations. Stresses interdependency and interrelations among cultures, and compares social, political, and religious movements.

Prerequisites & Notes

NULL

Credits: 3

HIST 1043 - WORLD CIVILIZATION SINCE 1600

A survey of world history from 1600 to the present. Emphasis is placed on various nationalistic movements including the English, American, and French Revolutions; the rise of new nations; scientific expansion; changes in religious sects; world conflicts; and status of the world at the present.

Prerequisites & Notes

NULL

Credits: 3

HIST 2013 - AMERICAN HISTORY TO 1877

A survey of American history from discovery to 1877. Topics include the colonial period, the revolutionary era, the Constitution, Jeffersonianism, economic and territorial expansion, sectional tensions, the Civil War, and Reconstruction.

Prerequisites & Notes

NULL

Credits: 3

HIST 2023 - AMERICAN HISTORY 1877 TO THE PRESENT

A survey of American history from 1877 to the present. Topics include the New South, the New West, foreign affairs, industrialization, the Progressive Era, the World Wars, the Depression, the Cold War, and present issues.

Prerequisites & Notes

NULL

Credits: 3

PPOL 2433 - UNITED STATES & NEVADA CONSTITUT

This course is a study of the legal culture in the United States, including the British common law system, origins of the U.S. and State of Nevada Constitutions, amendments, and landmark cases. This course is required to be taken by Las Vegas, NV extension site students only.

Prerequisites & Notes

NULL

Credits: 3

*Required for Nevada students.

Second Semester - 15 Credit Hours

PSYC 2013 - RESEARCH METHODS IN PSYCHOLOGY

This course addresses the application of various research methods of inquiry in application to theory and practice for the purpose of knowledge building and the development of best practice. Emphasis is on developing general research skills that can be applied within any area of psychology. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice, and evaluation of theory. The focus is on the development of research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

Prerequisite: PSYC 2003

Corequisite: PSYC 2023

Credits: 3

PSYC 2023 - STATISTICAL METHODS

This course studies the application of statistical methods to existing data. Topics include organizing and presenting data, descriptive and inferential measures, and interpreting statistical information. Emphasis will be on sampling, probability, hypothesis testing, and appropriate application of statistical tests.

Prerequisites & Notes

Prerequisite: MATH 1213

Corequisite: PSYC 2013

Credits: 3

THEO 2123 - CHRISTIAN THOUGHT AND PRACTICE

This course surveys the history of Christian thought and practices. Doctrinal topics introduced in the course include the doctrines of God, Jesus Christ, the Holy Spirit, humanity, salvation, the church, scripture, and last things. The course explores the application of Christian practices and spiritual disciplines such as prayer, communion, baptism, and social responsibility to the students' community.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Math Elective (select one):

MATH 1223 - QUANTITATIVE REASONING

This course emphasizes quantitative reasoning skills and is designed to prepare students to think critically about the world they live in. Applications in consumer education, civic engagement, and personal finance will be presented. Topics include logic, probability, statistics, exponential growth, and data analysis.

Prerequisites & Notes

NULL

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1323 - EXPLORATION IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. Possible topics for this course are set theory, elementary number theory, history of mathematics, numbers and number systems, financial mathematics, systems of equations, and matrices.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Year Three

First Semester - 15 Credit Hours

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

PSYC 3023 - CULTURAL PSYCHOLOGY

This course provides students with an introduction to multicultural and cross-cultural psychology including its theories, research, and exploration of intercultural knowledge. The course examines the dynamics of cultural relevance related to psychological processes, abnormality, and treatment. The course implements exercises of self-awareness and engagement within other cultures.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 3003 - ABNORMAL PSYCHOLOGY

This course is a study of the nature, causes, and treatment of abnormal behavior, including personality disorders, neuroses, psychoses, stress reactions, and other dysfunctions. Elements contributing to mental health and well-integrated personality are also considered.

Prerequisites & Notes

PSYC 1133 or PSYC 1233 , PSYC 2133

Credits: 3

THEO 3123 - INTRODUCTION OF ETHICS

This course examines the philosophical and theological principles and issues related to ethics. It addresses meta-ethical questions about the relationship between moral language and concepts and various metaphysical and post-metaphysical views; normative ethical theories; theological structures and implications of ethics; and contemporary ethical issues.

Prerequisites & Notes

NULL

Credits: 3

Second Semester - 15 Credit Hours

PSYC 3433 - INTEGRATION SEMINAR PSYCH AND THEOL

This course is a study of the contemporary evangelical efforts to integrate psychology and theology, focusing on the value of an integrative approach to both disciplines. Topics include behavior, cognition, emotion, and motivation. Junior or senior level standing required.

Prerequisites & Notes

Prerequisites: PSYC 1133 or PSYC 1233 ; PSYC 2133

Credits: 3

PSYC 3633 - PROFESSIONAL, ETHICAL, LEGAL ISSUES

This course is an exploration of the development of professional self with emphasis on the changing ethical and legal context for practice. Approaches to counseling are explored with an emphasis on students' development of professional style. Students explore issues of professional and personal values and ethics, personality, values, and interests.

Prerequisites & Notes

NULL

Credits: 3

PSYC 3733 - SOCIAL PSYCHOLOGY

This course is a survey of theories of interpersonal behavior and group dynamics emphasizing the influence of groups and group membership upon individual behavior. Topics include aggression, attitudes, attribution, conformity, altruism, communication, propaganda, morale, and other aspects of interpersonal relationships.

Prerequisites & Notes

PSYC 2133

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Year Four

First Semester - 15 Credit Hours

PSYC 4033 - PHYSIOLOGICAL PSYCHOLOGY

This course is a study of the physiological components of behavior. Topics include structure and function of the nervous system; theory of brain functions; and current problems, theories, and techniques in physiological psychology.

Prerequisites & Notes

PSYC 1133 or PSYC 1233; PSYC 2133; BIOL 1333, BIOL 133L

Credits: 3

PSYC 4083 - LEARNING AND COGNITION

This course is an introduction to the psychological study of learning and cognition. Topics examined will include classical conditioning, operant conditioning, observational learning, perception, attention, and memory. Traditional views as well as current trends will be discussed.

Prerequisites & Notes

PSYC 2133

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Psychology Elective: 6 credits

Second Semester - 14 Credit Hours

PSYC 4093 - PSYCHOLOGY CAPSTONE SENIOR SEMINAR

This capstone course will provide students the opportunity to critically reflect on and apply the theories and skills learned throughout their Psychology degree program. Students will articulate and include a capstone project related to their proposed career goals. Through this course students will demonstrate their understanding as well as faith integration through the production of a major paper/project and presentation.

Prerequisites & Notes

Prerequisite: Final semester senior, PSYC 4033 , PSYC 4083

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

*This general elective must be an upper level (3000 or 4000 level) course.

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

*This general elective must be an upper level (3000 or 4000 level) course.

Humanities Elective (select one):

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

Psychology Elective: 6 credits

Total Program Hours - 121 Credit Hours

NOTE: It is the responsibility of the student to read, review, and fulfill the requirements and total hours of this degree audit for their applicable degree.

Bachelor of Science, Psychology (Site-based) Four-Year Plan

The Bachelor of Science in Psychology is designed for students who plan to enter more directly into the career world. The objectives of this program are expressed as follows:

1. To give students a basic foundation in psychological and integrational principles.
2. To assist students in the integration of sound psychology and their Christian faith.
3. To prepare students to serve where counseling and human relations are essential functions.
4. To prepare students for a number of paraprofessional fields requiring a psychology or behavioral science degree.
5. To prepare students for graduate programs necessary to enter their professions.

A minimum of a master's degree is required at the entry level into the field of professional psychology and counseling. The Bachelor of Science degree will prepare one for a number of paraprofessional areas.

Year One

First Semester - 16 Credit Hours

CORE 1001 - COLLEGE AND CHRISTIAN CALLING

This course serves as an introduction to the mission of Southeastern University and the academic tradition of liberal arts education. The course prepares students for academic and social success by focusing on the areas of success factors for higher education, Christian higher education as calling, and personal and spiritual formation.

Prerequisites & Notes

NULL

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Year Four

First Semester - 15 Credit Hours

PSYC 4033 - PHYSIOLOGICAL PSYCHOLOGY

This course is a study of the physiological components of behavior. Topics include structure and function of the nervous system; theory of brain functions; and current problems, theories, and techniques in physiological psychology.

Prerequisites & Notes

PSYC 1133 or PSYC 1233; PSYC 2133; BIOL 1333, BIOL 133L

Credits: 3

PSYC 4083 - LEARNING AND COGNITION

This course is an introduction to the psychological study of learning and cognition. Topics examined will include classical conditioning, operant conditioning, observational learning, perception, attention, and memory. Traditional views as well as current trends will be discussed.

Prerequisites & Notes

PSYC 2133

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Psychology Elective (select one):

PSYC 1233 - PERSONAL AND SOCIAL ADJUSTMENT

This course is an introduction to human adjustments and the resulting forms of behavior. Emphasis is placed on the fundamental principles underlying normal behavior. This course helps students apply mental health principles to everyday living.

Prerequisites & Notes

NULL

Credits: 3

PSYC 3053 - PSYCHOLOGY PRACTICUM

This course provides students with practical service-learning experience in order to apply psychological principles learned throughout their program of study through volunteer experiences in a mental health, social service, educational psychology, or related setting under the supervision of a qualified in-service supervisor and a college supervisor. Placement must be approved by the course instructor.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 3103 - MARITAL AND FAMILY THERAPY

This course is an overview of counseling approaches to family problems, including the family systems approach. Issue areas explored include communication, role expectations, and sexual dysfunction. Various counseling techniques related to marital maladjustment are explored. Principal approaches to marital therapy and family therapy are emphasized.

Prerequisites & Notes

PSYC 2133 , PSYC 2233

Credits: 3

PSYC 3533 - INTRODUCTION TO COUNSELING

This course is a study of various theoretical approaches to the practice of counseling and psychotherapy with normal and disturbed clients. Focus is on the psychoanalytic, cognitive, behavioral, and phenomenological approaches.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 3553 - INTRO TO COUNSELING CHILDREN & YOUTH

In this course, students will explore issues, theories, and applications related to understand and helping children and adolescents with social or emotional problems. Students will learn to assess behavior and incorporate ethically and legally appropriate strategies to meet the needs of counseling children and adolescents.

Prerequisites & Notes

PSYC 3533

Credits: 3

PSYC 4013 - PSYCHOLOGY OF LEADERSHIP

The course will develop the student's communication and servant leadership skills through the joining of traditional theories and Christian based views of what it means to be an effective communicator and leader. Through the course the student will analyze leadership behaviors and communication styles from multiple perspectives and synthesize them into a personal philosophy of servant leadership applicable to both their personal and professional lives.

Prerequisites & Notes

NULL

Credits: 3

PSYC 4043 - DIAGNOSIS, ASSESSMENT & CASE MGMT

This course is an introduction to the skills needed for client diagnosis, assessment, and case management that are currently used in the helping professions. The course will focus on identifying pertinent information for preliminary assessment of a presenting problem, goal setting and contracting, monitoring for progress, and documenting sensitive client data. Topics will include individual psycho-social assessments, and family assessments.

Prerequisites & Notes

PSYC 2133; PSYC 3003

Total Program Hours - 121 Credit Hours

NOTE: It is the responsibility of the student to read, review, and fulfill the requirements and total hours of this degree audit for their applicable degree.

Certificate, Global Perspectives of Relief (Site Based)

The certificate in Global Perspectives of Relief was developed in partnership with Convoy of Hope to provide practical knowledge and skills for students called to volunteer in the area of international relief. This specific certificate focuses on international disaster relief including an understanding of the refugee population preparing students to go wherever God calls them.

Total Program Hours - 9 Credit Hours

Certificate Core- 9 Credit Hours

HRDV 3013 - REFUGEE & MIGRANT POPULATIONS

Examines the history, dynamics and impact of human migration with special attention given to effective strategies for aiding refugee and migrant populations. Topics include challenges these populations face and effective relief and development strategies.

Prerequisites & Notes

None

Credits: 3

HRDV 3033 - DISASTER SERVICES

This course presents the foundational principles and skills necessary to plan and conduct services for the four phases of disasters: Preparation, Mitigation, Response, and Recovery, in both domestic and international settings. Emphasis includes the coordination of services among governmental, non-governmental, field partners, and religious organizations.

Prerequisites & Notes

None

Credits: 3

HRDV 4043 - CARE & WELLNESS IN HUMANITARIAN CONTEXT

This course will provide students with the knowledge and skills to function from a state of integrated health in a humanitarian context. Emphasis will include ownership of personal wellness, collaboration for community wellness, and application for the wellness of those served. Topics include psychological first aid, evaluation, and interventions for physiological health, biblical frameworks for self-care and wellness, compassion fatigue, and interventions for personal and community health.

Prerequisites & Notes

None

Credits: 3

Certificate, Biblical Disaster Response (Site-based)

The certificate in Biblical Disaster Response was developed in partnership with Convoy of Hope to provide practical knowledge and skills for students called to volunteer in the area of disaster relief. This specific certificate focuses on both domestic and international disaster relief preparing students to go wherever God calls them.

Required Courses - 9 Credit Hours

THEO 3013 - THEOLOGY OF COMPASSION

Compassion for others, especially for those in need, is a fundamental tenet of biblical theology. Compassion for humankind was the motivation for Christ's mission to earth, as He mentions at the inauguration of his ministry in Luke 4: "The Spirit of the Lord is on me, because he has anointed me to proclaim good news to the poor. He has sent me to proclaim freedom for the prisoners and recovery of sight for the blind, to set the oppressed free, to proclaim the year of the Lord's favor." This course reviews the biblical foundation for compassion and traces the Church's theological interpretation and practical application of compassion throughout history.

Prerequisites & Notes

NULL

Credits: 3

HRDV 3033 - DISASTER SERVICES

This course presents the foundational principles and skills necessary to plan and conduct services for the four phases of disasters: Preparation, Mitigation, Response, and Recovery, in both domestic and international settings. Emphasis includes the coordination of services among governmental, non-governmental, field partners, and religious organizations.

Prerequisites & Notes

None

Credits: 3

HRDV 4003 - CHILDREN & YOUTH IN CRISIS

Children and youth are especially susceptible to the traumatic effects of natural and human-made disasters. Because of their higher level of innocence, minimal experience, and the vulnerable place they have in many societies, relief actions and strategies must identify actions and strategies as quickly as possible. In this course, students will identify stress symptoms and emotional suffering to help as much as is appropriate and then to direct them to qualified support specialists. This course is not intended for professional or trained counselors but for those on site immediately following natural or human caused disasters or who conduct outreaches where children and youth may be in crisis.

Prerequisites & Notes

None

Credits: 3

Total Program Hours - 9 Credit Hours

Bachelor of Science, Psychology: Industrial & Organizational (Site-based)

Bachelor of Science, Psychology: Industrial/Organizational Concentration Four Year Plan

The Industrial/Organizational concentration is designed both for students who would like to move directly into the workforce with a bachelor's degree as well as for those students who would like to pursue a graduate degree in Industrial/Organizational Psychology. The courses in this concentration focus on the application of psychology to the workplace and will pull from several different areas of psychology including cognitive, social, and behavioral. By completing this concentration students will also develop the critical reasoning skills that will be necessary to be successful in this field.

Potential Career Options:

- Human Resources Manager
- Staffing and Recruiting Manager
- Workforce Analyst
- Team Development Trainer or Manager
- Executive Coach
- Project Manager

Foundational Core- 34 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of

inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:
CORE 1111

Credits: 2

Worldview Formation- 9 credits

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:
CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credits

Discursive Inquiry- 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry- 4 Credit Hours

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

Quantitative Inquiry- 3 Credit Hours

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

Socio-Historical Inquiry-6 Credit Hours

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

Select One of the Following:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry- 3 Credit Hours

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 51 Credit Hours**PSYC 2003 - COMMUNICATION AND CAREERS IN PSYCHOLOGY**

This course is an introduction to communication in the field of psychology. Students will develop skills in information literacy, comprehension of peer-reviewed literature, synthesis of information, and use of proper APA standards.

Students will also develop their verbal presentation skills. Additionally, students will be introduced to the different career opportunities at both baccalaureate and graduate-degree levels as well as requirements and skills required for admissions into graduate school.

Prerequisites & Notes

PSYC 1133

Credits: 3

PSYC 2013 - RESEARCH METHODS IN PSYCHOLOGY

This course addresses the application of various research methods of inquiry in application to theory and practice for the purpose of knowledge building and the development of best practice. Emphasis is on developing general research skills that can be applied within any area of psychology. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice, and evaluation of theory. The focus is on the development of research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

Prerequisite: PSYC 2003

Corequisite: PSYC 2023

Credits: 3

PSYC 2023 - STATISTICAL METHODS

This course studies the application of statistical methods to existing data. Topics include organizing and presenting data, descriptive and inferential measures, and interpreting statistical information. Emphasis will be on sampling, probability, hypothesis testing, and appropriate application of statistical tests.

Prerequisites & Notes

Prerequisite: MATH 1213

Corequisite: PSYC 2013

Credits: 3

PSYC 2133 - THEORIES OF PERSONALITY

This course is an introduction to the study of personality formation. Major personality themes are critically examined. Students are introduced to the application of these theories in counseling and the treatment of mental illness.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

PSYC 3003 - ABNORMAL PSYCHOLOGY

This course is a study of the nature, causes, and treatment of abnormal behavior, including personality disorders, neuroses, psychoses, stress reactions, and other dysfunctions. Elements contributing to mental health and well-integrated personality are also considered.

Prerequisites & Notes

PSYC 1133 or PSYC 1233 , PSYC 2133

Credits: 3

PSYC 3023 - CULTURAL PSYCHOLOGY

This course provides students with an introduction to multicultural and cross-cultural psychology including its theories, research, and exploration of intercultural knowledge. The course examines the dynamics of cultural relevance related to psychological processes, abnormality, and treatment. The course implements exercises of self-awareness and engagement within other cultures.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 3433 - INTEGRATION SEMINAR PSYCH AND THEOL

This course is a study of the contemporary evangelical efforts to integrate psychology and theology, focusing on the value of an integrative approach to both disciplines. Topics include behavior, cognition, emotion, and motivation. Junior or senior level standing required.

Prerequisites & Notes

Prerequisites: PSYC 1133 or PSYC 1233 ; PSYC 2133

Credits: 3

PSYC 3733 - SOCIAL PSYCHOLOGY

This course is a survey of theories of interpersonal behavior and group dynamics emphasizing the influence of groups and group membership upon individual behavior. Topics include aggression, attitudes, attribution, conformity, altruism, communication, propaganda, morale, and other aspects of interpersonal relationships.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 4033 - PHYSIOLOGICAL PSYCHOLOGY

This course is a study of the physiological components of behavior. Topics include structure and function of the nervous system; theory of brain functions; and current problems, theories, and techniques in physiological psychology.

Prerequisites & Notes

PSYC 1133 or PSYC 1233; PSYC 2133; BIOL 1333, BIOL 133L

Credits: 3

PSYC 4083 - LEARNING AND COGNITION

This course is an introduction to the psychological study of learning and cognition. Topics examined will include classical conditioning, operant conditioning, observational learning, perception, attention, and memory. Traditional views as well as current trends will be discussed.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 4093 - PSYCHOLOGY CAPSTONE SENIOR SEMINAR

This capstone course will provide students the opportunity to critically reflect on and apply the theories and skills learned throughout their Psychology degree program. Students will articulate and include a capstone project related to their proposed career goals. Through this course students will demonstrate their understanding as well as faith integration through the production of a major paper/project and presentation.

Prerequisites & Notes

Prerequisite: Final semester senior, PSYC 4033 , PSYC 4083

Credits: 3

Industrial/Organizational Psychology Concentration

PSYC 2033 - INDUSTRIAL & ORGANIZATIONAL PSYC

This course includes an application of psychological principles to industry, business, and other organizations. Topics include organization of work, selection, training, motivation, job satisfaction, supervision, and decision-making.

Prerequisites & Notes

NULL

Credits: 3

PSYC 3063 - Attitudes and Motivation in the Wor

This course explores concepts and theories related to job attitudes and motivation in the workplace. Topics include motivational strategies, models of performance, and the impact of job satisfaction, work values, workplace environment, management style, and organizational commitment on employee attitudes and motivation.

Prerequisites & Notes

PSYC 2033

Credits: 3

PSYC 3073 - Group Dynamics in the Workplace

This course explores concepts and theories related to group dynamics and small group processes as they related to organizations. Topics include leadership, decision-making, stages of group development, group structure, group communication, team building, conflict resolution, and the intra-and inter-personal dynamics within small group

Prerequisites & Notes

PSYC 2033

Credits: 3

PSYC 4833 - TESTING AND MEASUREMENTS

This course is a study of the basic measurement theory and its practical application to problems of choosing, administering, and evaluating the results of tests. The more common aptitude, achievement, interest, intelligence, and personality tests will be considered.

Prerequisites & Notes

PSYC 2023 or MATH 2023

Credits: 3

Divine Design (Minor, Electives, Experiential Learning) 35 Credits

To meet the Divine Design requirement, student may earn credit hours in general elective courses, declare minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hour), PRAC 1003 (3 credit hour), PRAC 1004 (4 credit hour), and PMIN 2303 (3 credit hour) up to a total of 24 credit hours. General Electives are any college-level courses that do not satisfy the above program requirements. Student must complete the above program requirements, with remaining credit hours earned in Divine Design to meet the total program hours.

Total Program Hours- 120 Credit Hours

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count

towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

AND

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

OR

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

Area III, Natural Science and Mathematics - 11 Credit Hours

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Area IV, History, Social and Behavioral Sciences - 12 Credit Hours

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Bachelor of Science, Psychology: Pre-Counseling (Site-based)

Bachelor of Science, Psychology: Pre-Counseling Concentration (Online) Four-Year Plan

The pre-counseling concentration is designed for students who are planning to attend graduate school in order to pursue a career in counseling, marriage and family therapy, or guidance counseling. The courses in this concentration will provide additional education in the areas of counseling and research. Additionally, students will complete a Psychology Practicum course to provide in-person observation and exposure to the counseling environment.

Foundational Core- 34 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:
CORE 1111

Credits: 2

Worldview Formation- 9 credits

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:
CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credits

Discursive Inquiry- 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry- 4 Credit Hours

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

Quantitative Inquiry- 3 Credit Hours

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

Socio-Historical Inquiry-6 Credit Hours

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

Select One of the Following:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry- 3 Credit Hours

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 45 Credit Hours

PSYC 2003 - COMMUNICATION AND CAREERS IN PSYCHOLOGY

This course is an introduction to communication in the field of psychology. Students will develop skills in information literacy, comprehension of peer-reviewed literature, synthesis of information, and use of proper APA standards. Students will also develop their verbal presentation skills. Additionally, students will be introduced to the different career opportunities at both baccalaureate and graduate-degree levels as well as requirements and skills required for admissions into graduate school.

Prerequisites & Notes

PSYC 1133

Credits: 3

PSYC 2013 - RESEARCH METHODS IN PSYCHOLOGY

This course addresses the application of various research methods of inquiry in application to theory and practice for the purpose of knowledge building and the development of best practice. Emphasis is on developing general research skills that can be applied within any area of psychology. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice, and evaluation of theory. The focus is on the development of research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

Prerequisite: PSYC 2003

Corequisite: PSYC 2023

Credits: 3

PSYC 2023 - STATISTICAL METHODS

This course studies the application of statistical methods to existing data. Topics include organizing and presenting data, descriptive and inferential measures, and interpreting statistical information. Emphasis will be on sampling, probability, hypothesis testing, and appropriate application of statistical tests.

Prerequisites & Notes

Prerequisite: MATH 1213

Corequisite: PSYC 2013

Credits: 3

PSYC 2133 - THEORIES OF PERSONALITY

This course is an introduction to the study of personality formation. Major personality themes are critically examined. Students are introduced to the application of these theories in counseling and the treatment of mental illness.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

PSYC 3003 - ABNORMAL PSYCHOLOGY

This course is a study of the nature, causes, and treatment of abnormal behavior, including personality disorders, neuroses, psychoses, stress reactions, and other dysfunctions. Elements contributing to mental health and well-integrated personality are also considered.

Prerequisites & Notes

PSYC 1133 or PSYC 1233 , PSYC 2133

Credits: 3

PSYC 3023 - CULTURAL PSYCHOLOGY

This course provides students with an introduction to multicultural and cross-cultural psychology including its theories, research, and exploration of intercultural knowledge. The course examines the dynamics of cultural relevance related to psychological processes, abnormality, and treatment. The course implements exercises of self-awareness and engagement within other cultures.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 3433 - INTEGRATION SEMINAR PSYCH AND THEOL

This course is a study of the contemporary evangelical efforts to integrate psychology and theology, focusing on the value of an integrative approach to both disciplines. Topics include behavior, cognition, emotion, and motivation. Junior or senior level standing required.

Prerequisites & Notes

Prerequisites: PSYC 1133 or PSYC 1233 ; PSYC 2133

Credits: 3

PSYC 3733 - SOCIAL PSYCHOLOGY

This course is a survey of theories of interpersonal behavior and group dynamics emphasizing the influence of groups and group membership upon individual behavior. Topics include aggression, attitudes, attribution, conformity, altruism, communication, propaganda, morale, and other aspects of interpersonal relationships.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 4033 - PHYSIOLOGICAL PSYCHOLOGY

This course is a study of the physiological components of behavior. Topics include structure and function of the nervous system; theory of brain functions; and current problems, theories, and techniques in physiological psychology.

Prerequisites & Notes

PSYC 1133 or PSYC 1233; PSYC 2133; BIOL 1333, BIOL 133L

Credits: 3

PSYC 4083 - LEARNING AND COGNITION

This course is an introduction to the psychological study of learning and cognition. Topics examined will include classical conditioning, operant conditioning, observational learning, perception, attention, and memory. Traditional views as well as current trends will be discussed.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 4093 - PSYCHOLOGY CAPSTONE SENIOR SEMINAR

This capstone course will provide students the opportunity to critically reflect on and apply the theories and skills learned throughout their Psychology degree program. Students will articulate and include a capstone project related to their proposed career goals. Through this course students will demonstrate their understanding as well as faith integration through the production of a major paper/project and presentation.

Prerequisites & Notes

Prerequisite: Final semester senior, PSYC 4033 , PSYC 4083

Credits: 3

Pre-Counseling Concentration- 9 Credit Hours

PSYC 3533 - INTRODUCTION TO COUNSELING

This course is a study of various theoretical approaches to the practice of counseling and psychotherapy with normal and disturbed clients. Focus is on the psychoanalytic, cognitive, behavioral, and phenomenological approaches.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 3103 - MARITAL AND FAMILY THERAPY

This course is an overview of counseling approaches to family problems, including the family systems approach. Issue areas explored include communication, role expectations, and sexual dysfunction. Various counseling techniques related to marital maladjustment are explored. Principal approaches to marital therapy and family therapy are emphasized.

Prerequisites & Notes

PSYC 2133 , PSYC 2233

Credits: 3

PSYC 4043 - DIAGNOSIS, ASSESSMENT & CASE MGMT

This course is an introduction to the skills needed for client diagnosis, assessment, and case management that are currently used in the helping professions. The course will focus on identifying pertinent information for preliminary assessment of a presenting problem, goal setting and contracting, monitoring for progress, and documenting sensitive client data. Topics will include individual psycho-social assessments, and family assessments.

Prerequisites & Notes

PSYC 2133; PSYC 3003

Credits: 3

Divine Design (Major Specific Experiential Learning) 3 Credit Hours**PSYC 3053 - PSYCHOLOGY PRACTICUM**

This course provides students with practical service-learning experience in order to apply psychological principles learned throughout their program of study through volunteer experiences in a mental health, social service, educational psychology, or related setting under the supervision of a qualified in-service supervisor and a college supervisor. Placement must be approved by the course instructor.

Prerequisites & Notes

PSYC 2133

Credits: 3

Divine Design (Minor, Electives, Experiential Learning) 38 Credits

To meet the Divine Design requirement, student may earn credit hours in general elective courses, declare minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hour), PRAC 1003 (3 credit hour), PRAC 1004 (4 credit hour), and PMIN 2303 (3 credit hour) up to a total of 24 credit hours. General Electives are any

college-level courses that do not satisfy the above program requirements. Student must complete the above program requirements, with remaining credit hours earned in Divine Design to meet the total program hours.

Total Program Hours- 120 Credit Hours

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

AND

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Certificate, Advocacy in Global Context (Site Based)

The certificate in Advocacy in Global Contexts was developed in partnership with Convoy of Hope to provide practical knowledge and skills for students called to volunteer in the area of global advocacy for migrant, refugee, and other disenfranchised groups.

Certificate Core- 9 Credit Hours

HRDV 3013 - REFUGEE & MIGRANT POPULATIONS

Examines the history, dynamics and impact of human migration with special attention given to effective strategies for aiding refugee and migrant populations. Topics include challenges these populations face and effective relief and development strategies.

Prerequisites & Notes

None

Credits: 3

HRDV 3023 - CONTEXTUALIZED COMMUNICATION

The need to communicate across multiple cultures is an increasingly critical requirement in today's multicultural environment, where national boundaries provide minimal isolation and face-to-face communication is replaced by technological connections. Students' own philosophies and worldviews provide a foundation upon which techniques and approaches for communications are explored.

Prerequisites & Notes

None

Credits: 3

HRDV 4013 - AFFECTING CHANGE THROUGH ADVOCACY

Affecting Change through Advocacy offers students a biblical foundation and holistic approaches to assess and apply methods of advocacy, aligned with both the beneficiary and the intended outcome. Topics include responsible advocacy, spheres of influence, stages of effective action, all within a kingdom-centered framework of ethics.

Prerequisites & Notes

None

Credits: 3

Total Program Hours - 9 Credit Hours**Certificate, Global Perspectives of Relief (Site Based)**

The certificate in Global Perspectives of Relief was developed in partnership with Convoy of Hope to provide practical knowledge and skills for students called to volunteer in the area of international relief. This specific certificate focuses on international disaster relief including an understanding of the refugee population preparing students to go wherever God calls them.

Required Courses - 3 Credit Hours**HUSV 3093 - INTERNATIONAL DISASTER SERVICES**

International Disaster Services presents the foundational principles and skills necessary to plan and conduct services for the four phases of disaster: Mitigation, Preparation, Response, and Recovery. Emphasis is upon coordination of services between international governmental, non-governmental, and religious-based organizations.

Total Program Hours- 9 Credit Hours

Bachelor of Science, Psychology (Site-based)

Bachelor of Science, Psychology: 4-Year Plan

The Bachelor of Science in Psychology degree provides students with fundamentals in psychological and integration principles. Topics of study include personality, development, abnormal psychology, research methods, and more. Students will learn to incorporate their Christian faith into their work and prepare for paraprofessional fields that require a psychology or behavioral science degree. In addition, they will participate in supervised field experience and conduct and report empirical research in the field. This degree is also ideal for a student considering pursuing a master's degree in a helping profession such as counseling. This online program is a total of 123 credit hours: 56 credit hours for Foundational Core courses, and 41 credit hours of psychology major core courses, 9 credit hours of psychology electives, and 17 credit hours of general electives.

The Bachelor of Science in Psychology is designed for students who plan to enter more directly into the career world. The objectives of this program are expressed as follows:

1. To give students a basic foundation in psychological and integrational principles.
2. To assist students in the integration of sound psychology and their Christian faith.
3. To prepare students to serve where counseling and human relations are essential functions.
4. To prepare students for a number of paraprofessional fields requiring a psychology or behavioral science degree.
5. To prepare students for graduate programs necessary to enter their professions.

A minimum of a master's degree is required at the entry level into the field of professional psychology and counseling. The Bachelor of Science degree will prepare one for a number of paraprofessional areas.

Foundational Core- 34 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation- 9 credits

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credits

Discursive Inquiry- 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry- 4 Credit Hours

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 45 Credit Hours

PSYC 2003 - COMMUNICATION AND CAREERS IN PSYCHOLOGY

This course is an introduction to communication in the field of psychology. Students will develop skills in information literacy, comprehension of peer-reviewed literature, synthesis of information, and use of proper APA standards. Students will also develop their verbal presentation skills. Additionally, students will be introduced to the different career opportunities at both baccalaureate and graduate-degree levels as well as requirements and skills required for admissions into graduate school.

Prerequisites & Notes

PSYC 1133

Credits: 3

PSYC 2013 - RESEARCH METHODS IN PSYCHOLOGY

This course addresses the application of various research methods of inquiry in application to theory and practice for the purpose of knowledge building and the development of best practice. Emphasis is on developing general research skills that can be applied within any area of psychology. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice, and evaluation of theory. The focus is on the development of research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

Prerequisite: PSYC 2003

Corequisite: PSYC 2023

Credits: 3

PSYC 2023 - STATISTICAL METHODS

This course studies the application of statistical methods to existing data. Topics include organizing and presenting data, descriptive and inferential measures, and interpreting statistical information. Emphasis will be on sampling, probability, hypothesis testing, and appropriate application of statistical tests.

Prerequisites & Notes

Prerequisite: MATH 1213

Corequisite: PSYC 2013

Credits: 3

PSYC 2133 - THEORIES OF PERSONALITY

This course is an introduction to the study of personality formation. Major personality themes are critically examined. Students are introduced to the application of these theories in counseling and the treatment of mental illness.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

PSYC 3003 - ABNORMAL PSYCHOLOGY

This course is a study of the nature, causes, and treatment of abnormal behavior, including personality disorders, neuroses, psychoses, stress reactions, and other dysfunctions. Elements contributing to mental health and well-integrated personality are also considered.

Prerequisites & Notes

PSYC 1133 or PSYC 1233 , PSYC 2133

Credits: 3

PSYC 3023 - CULTURAL PSYCHOLOGY

This course provides students with an introduction to multicultural and cross-cultural psychology including its theories, research, and exploration of intercultural knowledge. The course examines the dynamics of cultural relevance related to psychological processes, abnormality, and treatment. The course implements exercises of self-awareness and engagement within other cultures.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 3433 - INTEGRATION SEMINAR PSYCH AND THEOL

This course is a study of the contemporary evangelical efforts to integrate psychology and theology, focusing on the value of an integrative approach to both disciplines. Topics include behavior, cognition, emotion, and motivation. Junior or senior level standing required.

Prerequisites & Notes

Prerequisites: PSYC 1133 or PSYC 1233 ; PSYC 2133

Credits: 3

PSYC 3733 - SOCIAL PSYCHOLOGY

This course is a survey of theories of interpersonal behavior and group dynamics emphasizing the influence of groups and group membership upon individual behavior. Topics include aggression, attitudes, attribution, conformity, altruism, communication, propaganda, morale, and other aspects of interpersonal relationships.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 4033 - PHYSIOLOGICAL PSYCHOLOGY

This course is a study of the physiological components of behavior. Topics include structure and function of the nervous system; theory of brain functions; and current problems, theories, and techniques in physiological psychology.

Prerequisites & Notes

PSYC 1133 or PSYC 1233; PSYC 2133; BIOL 1333, BIOL 133L

Credits: 3

PSYC 4083 - LEARNING AND COGNITION

This course is an introduction to the psychological study of learning and cognition. Topics examined will include classical conditioning, operant conditioning, observational learning, perception, attention, and memory. Traditional views as well as current trends will be discussed.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 4093 - PSYCHOLOGY CAPSTONE SENIOR SEMINAR

This capstone course will provide students the opportunity to critically reflect on and apply the theories and skills learned throughout their Psychology degree program. Students will articulate and include a capstone project related to their proposed career goals. Through this course students will demonstrate their understanding as well as faith integration through the production of a major paper/project and presentation.

Prerequisites & Notes

Prerequisite: Final semester senior, PSYC 4033 , PSYC 4083

Credits: 3

Psychology Electives: (Select 3 Courses)- 9 Credit Hours

PSYC 2033 - INDUSTRIAL & ORGANIZATIONAL PSYC

This course includes an application of psychological principles to industry, business, and other organizations. Topics include organization of work, selection, training, motivation, job satisfaction, supervision, and decision-making.

Prerequisites & Notes

NULL

Credits: 3

PSYC 2233 - MARRIAGE AND FAMILY

This course is a study of the major issues related to courtship, marriage, and family formation. Special attention is given to the social conditions influencing courtship, marriage, divorce, and family life. Topics include dating rituals,

gender differences, expectations, parenting, family dysfunction, family violence, and strategies for sound relating. The role of family counselors and therapists is also discussed.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

PSYC 3052 - FIELD EXPERIENCE IN PSYCHOLOGY

This course provides students with practical experience in a mental health, social service, educational psychology, or related setting under the supervision of a qualified in-service supervisor and a college supervisor. Placement must be approved by the course instructor.

Prerequisites & Notes

PSYC 2133

Credits: 2

PSYC 3063 - Attitudes and Motivation in the Wor

This course explores concepts and theories related to job attitudes and motivation in the workplace. Topics include motivational strategies, models of performance, and the impact of job satisfaction, work values, workplace environment, management style, and organizational commitment on employee attitudes and motivation.

Prerequisites & Notes

PSYC 2033

Credits: 3

PSYC 3073 - Group Dynamics in the Workplace

This course explores concepts and theories related to group dynamics and small group processes as they related to organizations. Topics include leadership, decision-making, stages of group development, group structure, group communication, team building, conflict resolution, and the intra-and inter-personal dynamics within small group

Prerequisites & Notes

PSYC 2033

Credits: 3

PSYC 3103 - MARITAL AND FAMILY THERAPY

This course is an overview of counseling approaches to family problems, including the family systems approach. Issue areas explored include communication, role expectations, and sexual dysfunction. Various counseling techniques related to marital maladjustment are explored. Principal approaches to marital therapy and family therapy are emphasized.

Prerequisites & Notes

PSYC 2133 , PSYC 2233

Credits: 3

PSYC 3131 - FIELD EXPERIENCE II

This course provides students with practical experience in a mental health, social service, educational psychology, or related setting under the supervision of a qualified in-service supervisor and a college supervisor. Placement must be approved by the course instructor.

Prerequisites & Notes

Prerequisites: PSYC 2133; PSYC 3052

Credits: 1

PSYC 3203 - HUMAN SEXUALITY

This course provides a comprehensive overview of the field of human sexuality, exploring the biological, psychological, sociological, and theological approaches to the study of human sexuality. Specifically, the course will address anatomy, physiology, and genetics in the development of gender identity and sexual function, the emotional factors affecting sexual experience, the nature and causes of sexual diseases and dysfunctions, the role of sexuality in relationships to others and to the self, and the moral and ethical themes related to the expression of sexuality.

Prerequisites & Notes

PSYC 2133 ; PSYC 2233

Credits: 3

PSYC 3333 - PSYCHOLOGY OF RELIGION

This course is a critical examination of the psychological research on the effects of religious experience on individual development and mental health. Historical developments, current trends, and major contemporary contributions to this area of study will be explored. There will be an emphasis on how the church can function to facilitate mental health.

Prerequisites & Notes

PSYC 2133 and BIBL 1113

Credits: 3

PSYC 3533 - INTRODUCTION TO COUNSELING

This course is a study of various theoretical approaches to the practice of counseling and psychotherapy with normal and disturbed clients. Focus is on the psychoanalytic, cognitive, behavioral, and phenomenological approaches.

Prerequisites & Notes

PSYC 2133

Credits: 3

PSYC 3553 - INTRO TO COUNSELING CHILDREN & YOUTH

In this course, students will explore issues, theories, and applications related to understand and helping children and adolescents with social or emotional problems. Students will learn to assess behavior and incorporate ethically and legally appropriate strategies to meet the needs of counseling children and adolescents.

Prerequisites & Notes

PSYC 3533

Credits: 3

PSYC 3633 - PROFESSIONAL, ETHICAL, LEGAL ISSUES

This course is an exploration of the development of professional self with emphasis on the changing ethical and legal context for practice. Approaches to counseling are explored with an emphasis on students' development of professional style. Students explore issues of professional and personal values and ethics, personality, values, and interests.

Prerequisites & Notes

NULL

Credits: 3

PSYC 3833 - SUBSTANCE ABUSE AND RECOVERY

This course is a study of the nature and causes of substance abuse and addiction. The psychological and social dynamics of addiction are explored with an emphasis on models of treatment and patterns of recovery and recidivism.

Prerequisites & Notes

NULL

Credits: 3

PSYC 4003 - SELECTED TOPICS

A seminar for investigation of specialized topics in psychology not addressed by other courses. Content is determined by the department to address special needs or interest. May be repeated for a maximum of six hours. The same topic may not be repeated.

Prerequisites & Notes

NULL

Credits: 3

PSYC 4013 - PSYCHOLOGY OF LEADERSHIP

The course will develop the student's communication and servant leadership skills through the joining of traditional theories and Christian based views of what it means to be an effective communicator and leader. Through the course the student will analyze leadership behaviors and communication styles from multiple perspectives and synthesize them into a personal philosophy of servant leadership applicable to both their personal and professional lives.

Prerequisites & Notes

NULL

Credits: 3

PSYC 4043 - DIAGNOSIS, ASSESSMENT & CASE MGMT

This course is an introduction to the skills needed for client diagnosis, assessment, and case management that are currently used in the helping professions. The course will focus on identifying pertinent information for preliminary assessment of a presenting problem, goal setting and contracting, monitoring for progress, and documenting sensitive client data. Topics will include individual psycho-social assessments, and family assessments.

Prerequisites & Notes

PSYC 2133; PSYC 3003

Credits: 3

PSYC 4063 - PERSONNEL PSYCHOLOGY

This course explores concepts and theories related to personnel psychology, which encompasses all aspects of personnel management from the time the employee is recruited through the end of their work with the organization. Topics included are workforce planning, recruitment, selection, placement, training, promotion, evaluation, retention, and counseling of employees.

Prerequisites & Notes

PSYC 2033

Credits: 3

PSYC 4073 - PSYCHOLOGY PRACTICUM

This course is a one-semester practical experience of 150 hours in a mental health, social service, educational psychology, or related setting under the supervision of a qualified in-service supervisor and a college supervisor. The course may be repeated once.

Prerequisites & Notes

PSYC 2133; Course Instructor approval required

Credits: 3

PSYC 4123 - CRISIS PSYCHOLOGICAL MANAGEMENT

The first few days through which individuals experience crisis are critical to their physical and psychological survivability. Support personnel must understand the foundational aspects of acute distress in both those experiencing crisis and those providing relief and support. Students are trained to identify stress symptoms and emotional suffering in order to assist as much as appropriate and then to direct individuals to qualified support specialists. This course is not intended for professional or trained counselors, but for those who are on site immediately following natural or human caused disasters. This course is cross-referenced with PMIN 4083.

Prerequisites & Notes

NULL

Credits: 3

PSYC 4153 - CHILDREN AND YOUTH CRISIS

Children and youth are especially susceptible to the traumatic effects of crises. Because of their higher level of innocence, minimal experience, and the vulnerable place they have in many societies, relief endeavors must identify actions and strategies as quickly as possible. Students identify stress symptoms and emotional suffering in order to help to the extent appropriate and then direct individuals to qualified support specialists. This course is not intended for professional or trained counselors, but for those who are on site immediately following crises.

Prerequisites & Notes

NULL

Credits: 3

PSYC 4833 - TESTING AND MEASUREMENTS

This course is a study of the basic measurement theory and its practical application to problems of choosing, administering, and evaluating the results of tests. The more common aptitude, achievement, interest, intelligence, and personality tests will be considered.

Prerequisites & Notes

PSYC 2023 or MATH 2023

Credits: 3

PSYC 4903 - CRISIS INTERVENTION

This course studies crisis intervention theories and strategies of intervention applied to various crises, such as posttraumatic stress disorder (PTSD), lethality, sexual assault, addiction, partner violence, and loss. Emphasis is on a six-step model of crisis intervention that informs and empowers the layperson or the helping professional.

Prerequisites & Notes

Prerequisite: PSYC 3052, PSYC 3443

Credits: 3

PSYC 4906 - PSYCHOLOGY INTERNSHIP

This course is a one-semester practical experience of 300 hours in a mental health, social service, educational psychology, or related setting under the supervision of a qualified in-service supervisor and a college supervisor.

Prerequisites & Notes

PSYC 2133 ; Course Instructor approval required

Credits: 6

PSYC 4913 - PSYCHOLOGICAL RESEARCH EXPERIENCE

This course is a practical experience in psychological research for one full semester, approved by the department chair and supervised by a principal investigator who provides continuous evaluation of the student's research.

Prerequisites & Notes

PSYC 1013, PSYC 2023, and Department Chair approval

Credits: 3

EDUC 2233 - EDUCATIONAL PSYCHOLOGY

This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.

Prerequisites & Notes

None

Credits: 3

SRMT 3203 - MENTAL HEALTH AND SPORT PSYCHOLOGY

This course is an introduction to the many facets of applied sport psychology, the mental aspects of sports, and the contemporary performance enhancement techniques utilized in sport psychology throughout the world. It includes the theory and practice of sport psychology with areas of the theoretical basis of mental aspects of training processes and competition, mental training techniques for psychomotor performance, and basic issues of performance psychology.

Prerequisites & Notes

SRMT 2103

Credits: 3

Divine Design (Minor, Electives, Experiential Learning) 41 Credits

To meet the Divine Design requirement, student may earn credit hours in general elective courses, declare minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 hr), PRAC 1002 (2 hrs), PRAC 1003 (3 hrs), PRAC 1004 (4 hrs), and PMIN 2303 (3 hrs) up to a total of 24 credit hours. General Electives are any college-level courses that do not satisfy the above program requirements. Student must complete the above program requirements, with remaining credit hours earned in Divine Design to meet the total program hours.

Total Program Hours- 120 Credit Hours

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

AND

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

OR

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

Area III, Natural Science and Mathematics - 11 Credit Hours

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Area IV, History, Social and Behavioral Sciences - 12 Credit Hours

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Bachelor of Science, Human Services: Crisis Assistance (Site-Based)

Bachelor of Science, Human Services: Crisis Assistance 4 Year Plan

The Crisis Assistance specialization will prepare human services practitioners to provide social services expertise and assistance to those seeking help in crisis/disasters both locally and globally.

*Note: Students taking courses online outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. State-specific requirements are specified in the SEU Catalog. Your Academic Advisor is available to help integrate these additional courses into your plan.

Foundational Core- 34 Credit Hours

SEU Foundations

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation- 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credit Hours

Discursive Inquiry- 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

NSCI 1044 - NUTRITION SCIENCE

This online course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 4

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 36 Credit Hours

HUSV 2013 - INTRODUCTION TO HUMAN SERVICES

An examination of the fundamental knowledge, skill and attitudinal base of the human services profession. Included are philosophy, value base, ethical standards, early history, professional roles and functions, client systems, purposes served, fields of practice, professional organizations, and the current status of Human Services. An introductory exposure to generalist human service practice is provided.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2043 - CASE MANAGEMENT AND INTERVENTION

This course gives students a foundation in case management competencies and intervention strategies.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2053 - HUMAN SERVICES DELIVERY

This course explores the different delivery systems and models used in human services. This course will examine how changes in public policy, administrative directives, and legal rulings impact service delivery. This course will also examine the impact that past political, social, and cultural changes have on the way services are delivered.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3033 - GROUP DYNAMICS

This course is a study of group dynamics, with particular attention to therapeutic group- process. The role of the leader, issue-specific or problem-specific group facilitation, and strategies for dealing with particular group-process issues will be emphasized. Participation in group-process is required of every student.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3063 - PROGRAM PLANNING AND EVALUATION

This course will examine the theory, process, and procedures of program planning and evaluation. This course will also provide students with the basic set of skills necessary to design, develop, and evaluate various human service programs.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3433 - HUMAN SERVICES AND FAITH INTEGRATION

The purpose of this course is to provide students with an opportunity to explore human services from a Christian world view that involves intentionally integrating faith and human services with an emphasis on spiritual and professional growth.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3533 - CONFLICT RESOLUTION IN HUMAN SRVCS

This course focuses on human interaction, conflict, and conflict resolution theories in the helping professions. This course also explores methods of conflict resolution associated with positive outcomes related to settling disputes and personal development

Prerequisites & Notes

NULL

Credits: 3

HUSV 3023 - HEALTH MANAGEMENT IN GLOBAL SETTINGS

Providing support through humanitarian outreaches can become physically, spiritually, mentally, and psychologically demanding on the caregivers. Preventative healthcare and self-care practices are critical, especially in the demanding environments often associated with humanitarian care. Students learn to monitor themselves and fellow relief participants to ensure sustained activities in a variety of settings.

Prerequisites & Notes

None

Credits: 3

HUSV 3043 - THE POOR AND SUFFERING

Students review the existence of and consideration for those who are poor and suffering in both domestic and international settings. Multiple views are presented, including political, social, geographical, climatic, biblical and religious. Various solutions are examined, including historical and contemporary, with an emphasis on programs' motivation and effectiveness. Approaching strategies from a community-based approach is a special focus of this course. This course is cross-referenced with PMIN-3043.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3053 - DOMESTIC DISASTER SERVICE

Domestic Disaster Services presents the foundational principles and skills necessary to plan and conduct services for the four phases of disasters: Mitigation, Preparation, Response, and Recovery. Emphasis is upon coordination of services between governmental, non-governmental, and faith-based organizations. This course is cross-referenced with PMIN 3053.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3093 - INTERNATIONAL DISASTER SERVICES

International Disaster Services presents the foundational principles and skills necessary to plan and conduct services for the four phases of disaster: Mitigation, Preparation, Response, and Recovery. Emphasis is upon coordination of services between international governmental, non-governmental, and religious-based organizations.

Prerequisites & Notes

NULL

Credits: 3

HUSV 4073 - REFUGEE & MIGRANT POPULATIONS

Populations of refugees and migrating groups undergo deep physiological, psychological, and economic challenges. Whether man-made or natural causes behind the disaster, those who experience these traumas are affected to varying degrees based on geography, language, age, gender, support structures, and socioeconomic dynamics. Students review the forces at work, current research, and individual and community-based approaches to serve these groups with compassion and effectiveness. This course is cross-referenced with PMIN 4073.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (Major Specific Experiential Learning)- 3 Credit Hours

HUSV 3073 - HUMAN SERVICES PRACTICUM AND FIELD EXPERIENCE I

This course allows students the opportunity to put theory, skills, and professional behavior into practice by working with an agency within the human services profession. Students will gain key knowledge, skills, and abilities by working within a field setting.

Prerequisites & Notes

Prerequisites: HUSV 2013 , HUSV 2053 , HUSV 2043 , HUSV 3333 , HUSV 3063 , HUSV 3033 , HUSV 4053 , HUSV 2433

Credits: 3

Divine Design (Minor, Electives, Experiential Learning) 47 Credits

To meet the Divine Design requirement, student may earn credit hours in general elective courses, declare minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hour), PRAC 1003 (3 credit hour), PRAC 1004 (4 credit hour), and PMIN 2303 (3 credit hour) up to a total of 24 credit hours. General Electives are any college-level courses that do not satisfy the above program requirements. Student must complete the above program requirements, with remaining credit hours earned in Divine Design to meet the total program hours.

Total Program Hours- 120 Credit Hours

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

AND

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

OR

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

Area III, Natural Science and Mathematics - 11 Credit Hours

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Area IV, History, Social and Behavioral Sciences - 12 Credit Hours

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Arkansas

Science

Select one course not taken in Foundational Core

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Social Sciences

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

Kentucky

Social/Behavioral Sciences

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

Credits: 3

Bachelor of Science, Human Services (Site-Based)

Bachelor of Science, Human Services (Online) Four-Year Course Plan

Program Description

The Bachelor of Science in Human Services is designed for students who seek an interdisciplinary education to assist them in careers that provide integrated services to individuals and families in need of assistance, or to prepare students in pursuing graduate studies in the area of human services or related fields.

The goal of this program is to prepare or enhance students' abilities in positions that seek to improve the quality of life for those who are served, remediation of problems, meeting basic human needs, and advocating change in the systems that affect the lives of those needing assistance.

*Note: Students taking courses online outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. State-specific requirements are specified in the SEU Catalog. Your Academic Advisor is available to help integrate these additional courses into your plan.

Foundational Core- 34 Credit Hours

SEU Foundations

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation- 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credit Hours

Discursive Inquiry- 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

NSCI 1044 - NUTRITION SCIENCE

This online course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 4

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry (6 credits) Select Two:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders,

and social behavior.

Prerequisites & Notes

NULL

Credits: 3

Select One of the Following:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 33 Credit Hours**HUSV 2013 - INTRODUCTION TO HUMAN SERVICES**

An examination of the fundamental knowledge, skill and attitudinal base of the human services profession. Included are philosophy, value base, ethical standards, early history, professional roles and functions, client systems, purposes served, fields of practice, professional organizations, and the current status of Human Services. An introductory exposure to generalist human service practice is provided.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2043 - CASE MANAGEMENT AND INTERVENTION

This course gives students a foundation in case management competencies and intervention strategies.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2053 - HUMAN SERVICES DELIVERY

This course explores the different delivery systems and models used in human services. This course will examine how changes in public policy, administrative directives, and legal rulings impact service delivery. This course will also examine the impact that past political, social, and cultural changes have on the way services are delivered.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2433 - HUMN SRVCES & DVLPMNT ACROSS LIFE-SPAN

This course will examine human development across the life-span from a human services perspective. The focus of the course will center around the various services available as they relate to the individual's life-span development from conception to death.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3033 - GROUP DYNAMICS

This course is a study of group dynamics, with particular attention to therapeutic group- process. The role of the leader, issue-specific or problem-specific group facilitation, and strategies for dealing with particular group-process issues will be emphasized. Participation in group-process is required of every student.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3063 - PROGRAM PLANNING AND EVALUATION

This course will examine the theory, process, and procedures of program planning and evaluation. This course will also provide students with the basic set of skills necessary to design, develop, and evaluate various human service programs.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3333 - UNDERSTANDING HUMAN DIVERSITY

This course examines the complex nature of culture and personal identity, explores populations at-risk, and encourages students to understand and appreciate diversity. Specific knowledge of individual cultures, awareness of the patterns of oppression experienced by those cultures, and skills relevant to developing a culturally competent approach to working with diverse people groups are addressed.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3533 - CONFLICT RESOLUTION IN HUMAN SRVCS

This course focuses on human interaction, conflict, and conflict resolution theories in the helping professions. This course also explores methods of conflict resolution associated with positive outcomes related to settling disputes and personal development

Prerequisites & Notes

NULL

Credits: 3

HUSV 3833 - MANAGEMENT IN HUMAN SERVICES

This course provides an introduction to management practices of human service programs, agencies, and organizations with an emphasis on program development.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3433 - HUMAN SERVICES AND FAITH INTEGRATION

The purpose of this course is to provide students with an opportunity to explore human services from a Christian world view that involves intentionally integrating faith and human services with an emphasis on spiritual and professional growth.

Prerequisites & Notes

NULL

Credits: 3

HUSV 4053 - RESEARCH METHODS

The application of the scientific method of inquiry to theory and practice for the purpose of knowledge building and the development of best practice. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice and evaluation of theory. The focus is on the development of social research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (Major Specific Experiential Learning)- 6 Credit Hours

HUSV 3073 - HUMAN SERVICES PRACTICUM AND FIELD EXPERIENCE I

This course allows students the opportunity to put theory, skills, and professional behavior into practice by working with an agency within the human services profession. Students will gain key knowledge, skills, and abilities by working within a field setting.

Prerequisites & Notes

Prerequisites: HUSV 2013 , HUSV 2053 , HUSV 2043 , HUSV 3333 , HUSV 3063 , HUSV 3033 , HUSV 4053 , HUSV 2433

Credits: 3

HUSV 3083 - HUMAN SERVICES PRACTICUM AND FIELD EXPERIENCE II

This course is a continuation of HUSV 3073. It provides students the opportunity to put theory, skills, and professional behavior into practice by working with an agency within the human services profession. Students will gain key knowledge, skills, and abilities by working within a field setting.

Prerequisites & Notes

Prerequisite: HUSV 3073

Credits: 3

Divine Design (Minor, Electives, Experiential Learning) 47 Credits

To meet the Divine Design requirement, student may earn credit hours in general elective courses, declare minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hour), PRAC 1003 (3 credit hour), PRAC 1004 (4 credit hour), and PMIN 2303 (3 credit hour) up to a total of 24 credit hours. General Electives are any college-level courses that do not satisfy the above program requirements. Student must complete the above program requirements, with remaining credit hours earned in Divine Design to meet the total program hours.

Total Program Hours- 120 Credit Hours

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

AND

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

OR

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

Area III, Natural Science and Mathematics - 11 Credit Hours

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Area IV, History, Social and Behavioral Sciences - 12 Credit Hours

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Minor, Criminal Justice (Site-Based)

Minor Core- 18 Credit Hours

CRIM 2203 - CRIMINAL JUSTICE SYSTEM

This course covers the origin, evolution, and daily operation of the criminal justice system in the United States. Relationships between law enforcement, the court system, and corrections are studied.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3203 - SOCIOLOGY OF POLICING

This course will cover the history, evolution and structure of policing in the United States. Popular innovations in policing and law enforcement will be emphasized. Special attention to conflicts and imperatives which define police officers' roles and the character of police work will be discussed along with careers and hiring practices by law enforcement agencies.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3303 - JUVENILE DELINQUENCY

This course covers the types of delinquency as well as supporting theories. Particular attention will be given to the role of family, school, and the peer group in promoting delinquency. The effects of social institutions on delinquency, prevention, and control are also studied. The juvenile justice system is compared to the adult system and the social consequences of delinquency are studied. This course will provide students with the tools to analyze and evaluate juvenile justice policies and programs.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3403 - AMERICAN CRIMINAL COURTS

This course examines the court system in the United States and provides an introduction to the many elements of the judicial process. Major topics include: the role of the courts, trial procedures, role of decision makers in the court system, the distinctions between civil and criminal systems, the alternatives available to the accused prior to trial proceedings, and public policy as it relates to the court system.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3603 - CORRECTIONS AND PUNISHMENT

This course is an introduction to the corrections system in the United States and will provide an overview of the history, current institutional practices, policies, and legal issues. There is an emphasis on contemporary conditions and alternatives to traditional responses to crime and an exploration of the principles and practices of correctional options afforded to offenders in various types of settings. Topics covered include incarceration, deterrence, rehabilitation, retribution, and system reform.

Prerequisites & Notes

CRIM 2203

Credits: 3

CRIM 2003 - CRIMINAL JUSTICE AND THE CHRISTIAN

This course will cover topics that pertain to both the fields of Criminal Justice and Christian Theology, requiring students to examine crime and punishment through the eyes of Jesus Christ. Topics will be predicated on current events, new developments, and the interests of criminal justice majors and professionals.

Prerequisites & Notes

NULL

Credits: 3

Total Hours Required - 18 Credit Hours

Bachelor of Arts, Humanitarian Relief & Development (Site-Based)

Bachelor of Arts, Humanitarian Relief & Development (4-year plan)

Foundational Core- 34 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation- 9 credits

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credits

Discursive Inquiry (6 credits)

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry (3 credits) Select One:**MATH 1313 - TOPICS IN MATHEMATICS**

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry (6 credits) Select Two:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 45 Credit Hours

THEO 3013 - THEOLOGY OF COMPASSION

Compassion for others, especially for those in need, is a fundamental tenet of biblical theology. Compassion for humankind was the motivation for Christ's mission to earth, as He mentions at the inauguration of his ministry in Luke 4: "The Spirit of the Lord is on me, because he has anointed me to proclaim good news to the poor. He has sent me to proclaim freedom for the prisoners and recovery of sight for the blind, to set the oppressed free, to proclaim the year of the Lord's favor." This course reviews the biblical foundation for compassion and traces the Church's theological interpretation and practical application of compassion throughout history.

Prerequisites & Notes

NULL

Credits: 3

PMIN 3073 - NEIGHBORLINESS ACROSS DIVIDING LINE

A study of the biblical call to neighborliness that encourages development of relationships across the historically divided lines of race and economics. Theological and cultural topics will be analyzed to understand how the Greatest Commandment – loving God and neighbors – can be practically pursued and expressed.

Prerequisites & Notes

NULL

Credits: 3

HRDV 3003 - MANAGEMENT OF RELIEF & DEVELOPMENT

Providing disaster and humanitarian relief is a complex process involving individuals from diverse backgrounds, locations, languages, preparation, involvement, and commitment. Leadership in these settings requires both skills in leading multifaceted projects, delegating responsibilities, inspiring volunteers, and managing funds. This course prepares students for leadership within the field of community relief and development.

Prerequisites & Notes

None

Credits: 3

HRDV 3013 - REFUGEE & MIGRANT POPULATIONS

Examines the history, dynamics and impact of human migration with special attention given to effective strategies for aiding refugee and migrant populations. Topics include challenges these populations face and effective relief and development strategies.

Prerequisites & Notes

None

Credits: 3

HRDV 3023 - CONTEXTUALIZED COMMUNICATION

The need to communicate across multiple cultures is an increasingly critical requirement in today's multicultural environment, where national boundaries provide minimal isolation and face-to-face communication is replaced by technological connections. Students' own philosophies and worldviews provide a foundation upon which techniques and approaches for communications are explored.

Prerequisites & Notes

None

Credits: 3

HRDV 3033 - DISASTER SERVICES

This course presents the foundational principles and skills necessary to plan and conduct services for the four phases of disasters: Preparation, Mitigation, Response, and Recovery, in both domestic and international settings. Emphasis includes the coordination of services among governmental, non-governmental, field partners, and religious organizations.

Prerequisites & Notes

None

Credits: 3

HRDV 3043 - HOLISTIC DEVELOPMENT

This course equips students with models that foster dignity rather than dependency and empowerment rather than entitlement. Students will learn how to partner with local churches and other stakeholders, assess community assets and needs, and formulate responsible approaches to community development. This introductory course on holistic development carefully builds a biblical view of poverty and a theology of responsible aid in the context of various real-world development topics. Students will also expand and deepen their understanding through service learning opportunities.

Prerequisites & Notes

None

Credits: 3

HRDV 3053 - APPLIED SUSTAINABILITY

Applied Sustainability prepares students to meet the destitute challenges of this world through compassion, cutting edge technology, sustainable processes, and financially viable methods. Students investigate approaches to the provision of clean water and adequate food resources to both the Least Developed Countries (LDC) and to people most impacted by physical and economic disasters.

Prerequisites & Notes

None

Credits: 3

HRDV 3063 - CONFLICT MANAGEMENT AND NEGOTIATION

Leadership of humanitarian programs requires the ability to successfully manage conflict in a variety of settings. This course investigates biblical conflict and reconciliation, the principles of mediation and negotiation, the role of power and culture, and characteristics of conflict competent leaders. In addition to the Bible, this course incorporates writings and videos from experts in the field to provide a well-rounded experience for students. Upon completion of this course, students will have the knowledge, skills, and abilities needed to address conflict with confidence - whether it be as a mediator or participant.

Prerequisites & Notes

None

Credits: 3

HRDV 4003 - CHILDREN & YOUTH IN CRISIS

Children and youth are especially susceptible to the traumatic effects of natural and human-made disasters. Because of their higher level of innocence, minimal experience, and the vulnerable place they have in many societies, relief actions and strategies must identify actions and strategies as quickly as possible. In this course, students will identify stress symptoms and emotional suffering to help as much as is appropriate and then to direct them to qualified support specialists. This course is not intended for professional or trained counselors but for those on site immediately following natural or human caused disasters or who conduct outreaches where children and youth may be in crisis.

Prerequisites & Notes

None

Credits: 3

HRDV 4013 - AFFECTING CHANGE THROUGH ADVOCACY

Affecting Change through Advocacy offers students a biblical foundation and holistic approaches to assess and apply methods of advocacy, aligned with both the beneficiary and the intended outcome. Topics include responsible advocacy, spheres of influence, stages of effective action, all within a kingdom-centered framework of ethics.

Prerequisites & Notes

None

Credits: 3

HRDV 4033 - HUM RELIEF & DEV PRACTICUM

The Humanitarian Compassion Practicum allows students to apply the theory and course-based learning to real-life situations through actual operation organizations and agencies. Students are responsible for procuring their practicum site, with the assistance of their academic advisor. Hope Education Network partners are available along with the university's own practicum partners.

Prerequisites & Notes

None

Credits: 3

HRDV 4043 - CARE & WELLNESS IN HUMANITARIAN CONTEXT

This course will provide students with the knowledge and skills to function from a state of integrated health in a humanitarian context. Emphasis will include ownership of personal wellness, collaboration for community wellness, and application for the wellness of those served. Topics include psychological first aid, evaluation, and interventions for physiological health, biblical frameworks for self-care and wellness, compassion fatigue, and interventions for personal and community health.

Prerequisites & Notes

None

Credits: 3

Divine Design (Minor, Electives, Experiential Learning) 41 Credits

To meet the Divine Design requirement, student may earn credit hours in general elective courses, declare minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hour), PRAC 1003 (3 credit hour), PRAC 1004 (4 credit hour), and PMIN 2303 (3 credit hour) up to a total of 24 credit hours. General Electives are any college-level courses that do not satisfy the above program requirements. Student must complete the above program requirements, with remaining credit hours earned in Divine Design to meet the total program hours.

Total Program Hours- 120 Credit Hours

Minor, Psychology

The Minor in Psychology provides students with a foundation in psychological concepts and skills related to human functioning.

Total Program Hours- 18 Credit Hours

Required - 12 Credit Hours

PSYC 2133 - THEORIES OF PERSONALITY

This course is an introduction to the study of personality formation. Major personality themes are critically examined. Students are introduced to the application of these theories in counseling and the treatment of mental illness.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

PSYC 2233 - MARRIAGE AND FAMILY

This course is a study of the major issues related to courtship, marriage, and family formation. Special attention is given to the social conditions influencing courtship, marriage, divorce, and family life. Topics include dating rituals, gender differences, expectations, parenting, family dysfunction, family violence, and strategies for sound relating. The role of family counselors and therapists is also discussed.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

PSYC 2333 - DEVELOPMENTAL PSYCHOLOGY

This course studies human growth and development. Major theories are critically examined with special attention to their differential application in the understanding of human development and behavior.

Prerequisites & Notes

Prerequisite: PSYC 1133 or PSYC 2133

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

PSYC 3003 - ABNORMAL PSYCHOLOGY

This course is a study of the nature, causes, and treatment of abnormal behavior, including personality disorders, neuroses, psychoses, stress reactions, and other dysfunctions. Elements contributing to mental health and well-integrated personality are also considered.

Prerequisites & Notes

PSYC 1133 or PSYC 1233 , PSYC 2133

Credits: 3

Psychology Electives- 6 Credit Hours

Select two PSYC 2xxx level or higher courses not already taken.

Other Programs**Bachelor of Science, Human Services (3/1) (Four Year Plan)****Year One****Fall Semester****CORE 1111 - COMMUNITY AND COLLEGE SUCCESS**

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

HUSV 2013 - INTRODUCTION TO HUMAN SERVICES

An examination of the fundamental knowledge, skill and attitudinal base of the human services profession. Included are philosophy, value base, ethical standards, early history, professional roles and functions, client systems, purposes served, fields of practice, professional organizations, and the current status of Human Services. An introductory exposure to generalist human service practice is provided.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

Spring Semester

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

HUSV 2053 - HUMAN SERVICES DELIVERY

This course explores the different delivery systems and models used in human services. This course will examine how changes in public policy, administrative directives, and legal rulings impact service delivery. This course will also examine the impact that past political, social, and cultural changes have on the way services are delivered.

Prerequisites & Notes

NULL

Credits: 3

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Summer Semester

HUSV 2043 - CASE MANAGEMENT AND INTERVENTION

This course gives students a foundation in case management competencies and intervention strategies.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

HUSV 3063 - PROGRAM PLANNING AND EVALUATION

This course will examine the theory, process, and procedures of program planning and evaluation. This course will also provide students with the basic set of skills necessary to design, develop, and evaluate various human service programs.

Prerequisites & Notes

NULL

Credits: 3

HUSV 3333 - UNDERSTANDING HUMAN DIVERSITY

This course examines the complex nature of culture and personal identity, explores populations at-risk, and encourages students to understand and appreciate diversity. Specific knowledge of individual cultures, awareness of the patterns of oppression experienced by those cultures, and skills relevant to developing a culturally competent approach to working with diverse people groups are addressed.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Socio-Historical Inquiry (3 credits) Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Summer Semester

HUSV 2433 - HUMN SRVCES & DVLPMNT ACRS LIFE-SPAN

This course will examine human development across the life-span from a human services perspective. The focus of the course will center around the various services available as they relate to the individual's life-span development from conception to death.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Year Three

Fall Semester

HUSV 3033 - GROUP DYNAMICS

This course is a study of group dynamics, with particular attention to therapeutic group- process. The role of the leader, issue-specific or problem-specific group facilitation, and strategies for dealing with particular group-process issues will be emphasized. Participation in group-process is required of every student.

Prerequisites & Notes

NULL

Credits: 3

HUSV 4053 - RESEARCH METHODS

The application of the scientific method of inquiry to theory and practice for the purpose of knowledge building and the development of best practice. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice and evaluation of theory. The focus is on the development of social research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Main Campus (Lakeland, FL)

Associate of Arts, General Education (Main Campus)

Associates of Arts, General Education, 2-Year Degree Plan

The Associate of Arts (AA) degree includes the core learning components and competencies commonly accepted as foundational for a four-year baccalaureate degree by many colleges and universities. The AA degree is designed for students who desire recognition for completing the two-year prescribed curriculum. Because many bachelor's degrees require specific prerequisites, students should verify how their AA degree and classes transfer into the intended degree. Graduates with the Associate of Arts degree will be able to:

- Demonstrate knowledge of the background, content, and themes of the biblical text
- Demonstrate oral communication skills through research, topical development, and style-specific presentations of focused material
- Demonstrate the ability to interpret, analyze, and evaluate statements, arguments, and evidence in order to construct well-supported, clearly articulated conclusions and positions
- Demonstrate problem-solving skills in a broad range of significant mathematics

Foundational Core- 25 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Habits of Inquiry- 22 Credit Hours

Discursive Inquiry- 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

or

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

or

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry (6 credits) Select Two:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

None

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

Divine Design - 35 Credit Hours

General Electives are any college-level courses that do not satisfy specific program requirements. To meet the Divine Design core requirements, students may declare minors, enroll in elective credit, and enjoy experiential learning like study abroad, internships, or practicum. Practicum course options include PRAC 1001 (1 hr), PRAC 1002 (2 hrs),

PRAC 1003 (3 hrs), PRAC 1004 (4 hrs). Students may earn up to 12 credit hours toward their degree program through experiential learning practicum.

Bachelor of Arts, Historical & Literary Studies

Bachelor of Arts, Historical & Literary Studies Four-Year Plan

Program Description

Students in the B.A. in Historical & Literary Studies hone the skills needed to interpret pressing political, social, and cultural issues of the past and present, such as global health and disease, social relations, and problems of racial prejudice and intolerance through the lens of one of our three discipline tracks: English, History, or Writing. In each track, students will engage with the foundational literature, research methods, and professional standards of their discipline through innovative course work and experiential learning opportunities, such as local and international internships, editorial experience, and publishing. Upon graduation, our students will have acquired a broad, college-level base of knowledge and skills for directly entering the workplace, and for providing a basis for graduate study in law, business, or other professions related to their selected track.

Program Objectives

Knowledge of Texts in Context

Graduates will demonstrate their A) cultural, B) historical and C) literary intersectional textual familiarity.

Performance of Analytic Methods

Graduates will apply interpretive skills in historical and literary texts from a variety of schools of thought regarding the purposes, practices, approaches, sources, and methods of research.

Writing and Communication

Graduates will curate written and spoken collections that A) respond to rhetorical situations, B) demonstrate academic research processes, C) illustrate clear and stylistic prose, and D) support ethical and empathetic discourse.

Faith Integration

Graduates will appraise how their faith is enmeshed with the discipline of language, culture, history, and literary studies in A) classroom and B) experiential learning environments.

Total Program Hours- 120 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

Credits: 4

Quantitative Inquiry - 3 Credit Hours; Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry- 6 Credit Hours; Select Two:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - 3 Credit Hours; Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 42 Credit Hours**Core- 9 Credit Hours****ENGL 3633 - AMERICAN LITERATURE**

A survey of prose and poetry with attention given to socio-political backgrounds and growth of American thought as expressed through selected authors from the colonial period to 1945.

Prerequisites & Notes

NULL

Credits: 3

ENGL 4323 - HISTORY OF THE ENGLISH LANGUAGE

This course is an in-depth study of the history and development of the English language.

Prerequisites & Notes

NULL

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

Research- 3 Credit Hours (select one)

ENGL 2503 - LITERARY AND CULTURAL STUDIES

This course introduces students to literary and cultural studies, particularly to the discipline specific ways of reading and writing about literary cultural texts that are expected of English and English and Intercultural Studies majors. Students will write interpretively about literary cultural texts while drawing on close textual analysis, cultural contexts, theoretical frameworks, scholarly criticism, and personal faith. Students will also become oriented to the English or English and Intercultural Studies major through an overview of the goals of these programs.

Prerequisites & Notes

NULL

Credits: 3

HIST 2913 - HISTORIOGRAPHY

This course is a study of the methods, philosophies, and literature underlying the practice of the discipline of history. Topics include the history of the discipline, the development of different schools of thought. research methods, and the issues currently being debated in the field.

Prerequisites & Notes

NULL

Credits: 3

Major Core Electives (Choose any ENGL or HIST Course 3000 Level or Above)- 30 Credit Hours

Divine Design (Major Specific Experiential Learning) 3 Credit Hours

ENGL 2553 - JOURNAL EDITING

This course focuses on the study and practice of editing various stages of expository, interpretive and argumentative texts from cross-disciplines. Students enrolling join the Oracle staff to support managing editors in the English Capstone Seminar. Through their editing efforts, Journal Editing students support the publication of Oracle in the spring semester of each year and perform writing tasks related to communications with faculty and student authors.

Prerequisites & Notes

NULL

Credits: 1-3 Variable Credit

ENGL 3203 - ENGLISH PRACTICUM

This course introduces students to several of the responsibilities associated with a career in English studies. Research, pedagogy, and instruction will be emphasized.

Prerequisites & Notes

NULL

Credits: 1-3 Variable Credit

HIST 3671 - APPLIED HISTORY

This course explores the many aspects of applied history. The focus will be participation in out-of-the classroom experiences. During the semester there will be a variety of events, some on campus, and others off campus. Special speakers, exhibits and field trips will form the core of the course. These experiences will demonstrate the various ways that history and historical study are applied in a variety of settings.

Prerequisites & Notes

NULL

Credits: 1-3 Variable Credit

HIST 3143 - HISTORY PRACTICUM

This course introduces students to several of the responsibilities associated with a career in History studies. Research, pedagogy, and instruction will be emphasized.

Prerequisites & Notes

None

Credits: 1-3

Divine Design- 41 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Bachelor of Arts, Historical & Literary Studies Four-Year Plan

Year One

Fall Semester

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Socio-Historical Inquiry (3 credits) Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

Quantitative Inquiry (3 credits) Select One:

Select a 2 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 2

LANG 1144 - ELEMENTARY SPANISH (A)

This is an elementary course designed for students who wish to develop the basic skills of speaking, listening to, reading, and writing Spanish. Students will learn beginning grammatical concepts, gain a strong vocabulary base, practice nuances of pronunciation, and explore the Hispanic/Spanish culture as reflected in different Spanish-speaking countries.

Prerequisites & Notes

NULL

Credits: 4

Natural Science with Lab (Select One):

NSCI 2433 - ANIMAL DIVERSITY

This course introduces foundational principles of zoology, including taxonomy, animal biology, architecture and ecology. Emphasis will be placed on the survey of invertebrate and vertebrate biodiversity.

Prerequisites & Notes

Corequisite: NSCI 243L

Credits: 3

NSCI 3333 - ECOLOGY

This course introduces foundational principles of ecology, the study of relationships between organisms and the surrounding environment. This course will provide students with a broader understanding of how the physical and chemical characteristics of the environment influence the distribution and abundance of various species of organisms in an ecosystem.

Prerequisites & Notes

Corequisite: NSCI 333L

Credits: 3

NSCI 2233 - ASTRONOMY

This is an introductory course in the astronomy of the solar system, astrophysics and constellations. This course level assumes no physics background.

Prerequisites & Notes

NULL

Credits: 3

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

NSCI 1433 - BOTANY

This course is an introductory course in plant anatomy, physiology and taxonomy. The history of mankind's medicinal use of plants and current updates will be covered.

Prerequisites & Notes

Corequisite: NSCI 143L

Credits: 3

CHEM 1213 - INTRO TO CHEMISTRY

This course is an introduction to basic concepts of general chemistry, introduction of periodic properties of elements and compounds, basic atomic-molecular structure, and properties of substances and reactions related to gas laws.

Prerequisites & Notes

Corequisite: CHEM 121L

Credits: 3

NSCI 1113 - INTRO TO PHYSICS

This is an introductory course designed for the student wishing to pursue a career in science and who lacks a high school background in this area. This is a mathematical investigation of physics and explores the basics of mechanics, motion, sound, electricity and magnetism. This course also meets general education requirements for non-science majors.

Prerequisites & Notes

NULL

Credits: 3

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

Socio-Historical Inquiry (3 credits) Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Bachelor of Fine Arts, Creative Writing

Program Description

The BFA in Creative Writing equips students with the practical and technical skills that form a foundation for creative and professional writing. It prepares students for careers in writing, while inspiring the creativity that is a necessary ingredient to success. Graduates of the BFA program will demonstrate a thorough knowledge of the writing process that can be adapted and applied in any career field. They will master the tools of the craft, as well as develop strategies for entering the workplace, publishing their creative work, and continuing to develop the art of Creative Writing.

Program Objectives

- Demonstrate a thorough knowledge of thematic development, description, and employment of literary devices suitable to the genre.
- Analyze selected texts to consider how they are structured, and read individual stories, books, or poems, analyzing them from a writer's point of view, considering tools of the craft.
- Analyze the literary market and develop strategies for publication.
- Apply revision and self-editing techniques to clarify and strengthen original writing.
- Demonstrate a mastery of the reading or recitation of literary texts in public space.
- Articulate how their faith influences and is reflected in their writing.

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - 3 Credit Hours; Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 42 Credit Hours

Writing- 3 Credit Hours

ENGL 3013 - CREATIVE WRITING

Study and practice in narrative, poetical, and dramatic writing. The course includes reading and discussing student work in groups and in conferences with the instructor. This course is cross-referenced with COMM 3013.

Prerequisites & Notes

NULL

Credits: 3

Writing- Advanced Genre Writing (12 Credit Hours)

(Poetry, Fiction, Nonfiction) up to four times (3 credit hours X 4 semesters)

ENGL 4143 - ADVANCED POETRY WRITING

This course provides advanced study and practice in writing poetry.

Prerequisites & Notes

ENGL 3013 CREATIVE WRITING

Credits: 3

ENGL 4153 - ADVANCED FICTION WRITING

This course provides advanced study and practice in writing fiction.

Prerequisites & Notes

ENGL 3013 CREATIVE WRITING

Credits: 3

ENGL 4163 - ADVANCED CREATIVE NONFICTION

This course provides advanced study and practice in writing creative nonfiction such as biography, memoir, historical narrative, literary journalism, and sports, travel, and nature writing.

Prerequisites & Notes

ENGL 3013 CREATIVE WRITING

Credits: 3

Literature- 15 Credit Hours

Any ENGL course above the 3000 level - Select Three

ENGL 3213 - MAJOR AUTHOR STUDY

A course designed to introduce students to the corpus of a major author's work as well as artistic, theological, and political works inspired by it.

Prerequisites & Notes

NULL

Credits: 3

ENGL 3633 - AMERICAN LITERATURE

A survey of prose and poetry with attention given to socio-political backgrounds and growth of American thought as expressed through selected authors from the colonial period to 1945.

Prerequisites & Notes

NULL

Credits: 3

ENGL 3833 - YOUNG ADULT LITERATURE

A critical study of literature for the adolescent reader with attention given to its role in the middle grades and secondary English studies.

Prerequisites & Notes

NULL

Credits: 3

ENGL 3843 - LATIN AMERICAN LITERATURE

This course is a survey of major Latin American writers from the colonial period to the modern era.

Prerequisites & Notes

NULL

Credits: 3

ENGL 3933 - AFRICAN AMERICAN LITERATURE

A survey of significant African-American writing from 1746 to the present, with attention given to social, political, and cultural contexts.

Prerequisites & Notes

NULL

Credits: 3

ENGL 4133 - INTRODUCTION TO SHAKESPEARE

A course designed to introduce students to Shakespeare's poetry, comedies, histories, tragedies, and romances by the study of selected works. One sophomore level or above course in literature required.

Prerequisites & Notes

NULL

Credits: 3

ENGL 4323 - HISTORY OF THE ENGLISH LANGUAGE

This course is an in-depth study of the history and development of the English language.

Prerequisites & Notes

NULL

Credits: 3

ENGL 4333 - WORLD LITERATURE

A study focusing on the classics of world literature, including the Old Testament, Homer's writings, the Greek and Roman tragedians and philosophers. A selection of primarily non-English writers from the time of the Old Testament to the present, requiring personal critical reaction and evaluation.

Prerequisites & Notes

NULL

Credits: 3

ENGL 4343 - NATIVE AMERICAN LIT & CULTURE

A survey of analysis of essays, poetry, fiction and basic history of Native Americans, with an emphasis on understanding different aspects of Native American thought and expression, especially in the changing contexts of their histories and tribal identities.

Prerequisites & Notes

NULL

Credits: 3

ENGL 4533 - CONTEMPORARY LITERATURE

This course is the study of recent American, British, and World literature, with an emphasis on the dimensions of cultural diversity. This course is intended to provide a critical introduction to the literary and cultural issues of literature since 1945 and to a representative selection of the major writers of the contemporary period.

Prerequisites & Notes

NULL

Credits: 3

ENGL 4633 - SPECIAL TOPICS IN LANGUAGE & LIT

This is a study of selected aspects of literature clustered around literary or methodological structures, common origin, or linguistic or topical foci. Possible clusters include national or regional literatures, ethnic literatures, genres, movements or schools in literature or linguistics, historical epochs, rhetoric, or research methods.

Prerequisites & Notes

NULL

Credits: 3

Major Core Elective- 12 Credit Hours

COMM 2153 - WRITING FOR THE MASS MEDIA

This course focuses on writing skills for the mass media, including print, broadcast, and online journalism as well as public relations and advertising. It includes instruction on interviewing, research, and copy editing for various media and story formats.

* Do not register for this course if you have taken DCOM 3333

Prerequisites & Notes

ENGL 1233 or ENGL 2113

Credits: 3

COMM 2323 - INTRODUCTION TO PUBLIC RELATIONS

This course provides an overview of public relations with emphasis on the tools, skills, and technology needed in the creation and exchange of messages in public and private organizations using print, broadcast, and electronic media.

* Do not register for this course if you have taken DCOM 2323

Prerequisites & Notes

None

Credits: 3

COMM 2533 - NARRATIVE STRUCTURE IN FILM

This course examines the characteristics of cinematic storytelling found in contemporary motion pictures, including the conventional three-act structure and its variations.

* Do not register for this course if you have taken DCOM 2533

Prerequisites & Notes

COMM 1803

Credits: 3

COMM 3323 - SOCIAL MEDIA STRATEGY & CONTENT

This course covers the strategies that guide social media planning and integration in public relations. The various tools that public relations practitioners use to identify and engage publics through social media are included.

Prerequisites & Notes

None

Credits: 3

COMM 3353 - NARRATIVE JOURNALISM

This course focuses on writing feature news stories, narrative journalism, and persuasive column writing.

Prerequisites & Notes

COMM 2153

Credits: 3

COMM 3363 - WRITING FOR PUBL RELATIONS & ADVERT

This course is designed to give practical experience in producing public relations and advertising campaigns, including press kits, press releases, and advertising copy.

Prerequisites & Notes

COMM 2323

Credits: 3

COMM 3613 - NEWS WRITING AND EDITING

This course provides students the opportunity to write and edit various types of news stories. Students learn about interviewing, taking accurate notes, editing for clarity and conciseness, and other considerations of news writing and editing.

Prerequisites & Notes

COMM 2153

Credits: 3

COMM 3723 - SCREENWRITING I

The course acquaints the student with the screenwriting process, and it includes the three-act structure, writing a proper treatment, character analysis, using proper formatting, screenplay protocol, basic story elements, and writing a compelling story. Students demonstrate their knowledge of scriptwriting by creating original scripts.

* Do not register for this course if you have taken DCOM 3723

Prerequisites & Notes

COMM 2533

Credits: 3

COMM 4183 - INTERNATIONAL VISUAL STORYTELLING

This study abroad course focuses on visual storytelling in an international context. Photographic and photojournalistic considerations specific to international reporting and travel photography are included.

* Do not register for this course if you have taken DCOM 4183

Prerequisites & Notes

None

Credits: 3

COMM 4453 - ADVANCED DIGITAL REPORTING

This course focuses on advanced reporting, research, interviewing, copy editing, and production skills for various digital storytelling formats, including photojournalism, investigative journalism, and online media.

Prerequisites & Notes

COMM 3613

Credits: 3

COMM 4743 - SCREENWRITING II

The course concentrates on advanced elements of story and screenwriting as well as advanced script analysis. Limited enrollment because of the amount of reading and critical analysis required.

* Do not register for this course if you have taken DCOM 4743

Prerequisites & Notes

COMM 3723

Credits: 3

ENGL 3333 - ADVANCED GRAMMAR

An examination of the major grammatical approaches to the English language with consideration of both theory and practical analysis.

Prerequisites & Notes

NULL

Credits: 3

ENGL 3433 - ADVANCED EXPOSITORY WRITING

In-depth study and practice in various aspects of expository writing, with attention given to stylistic features. Opportunities for both student and instructor responses to student writing will be provided. This course is cross-referenced with COMM 3433.

Prerequisites & Notes

NULL

Credits: 3

ENGL 4323 - HISTORY OF THE ENGLISH LANGUAGE

This course is an in-depth study of the history and development of the English language.

Prerequisites & Notes

NULL

Credits: 3

ENGL 4433 - ORAL INTERPRETATION

Examination of techniques involved in the recreation of literature for an audience with emphasis on individual interpretation and presentation of literary expression.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (Major Specific Experiential Learning)- 3 Credit Hours

ENGL 2553 - JOURNAL EDITING

This course focuses on the study and practice of editing various stages of expository, interpretive and argumentative texts from cross-disciplines. Students enrolling join the Oracle staff to support managing editors in the English Capstone Seminar. Through their editing efforts, Journal Editing students support the publication of Oracle in the spring semester of each year and perform writing tasks related to communications with faculty and student authors.

Prerequisites & Notes

NULL

Credits: 1-3 Variable Credit

ENGL 3203 - ENGLISH PRACTICUM

This course introduces students to several of the responsibilities associated with a career in English studies. Research, pedagogy, and instruction will be emphasized.

Prerequisites & Notes

NULL

Credits: 1-3 Variable Credit

Divine Design- 41 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Total Program Hours- 120 Credit Hours

Bachelor of Fine Arts, Creative Writing - 4-Year Degree Plan

Year One

Fall Semester

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Socio-Historical Inquiry (3 credits) Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:
CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Year Two

Fall Semester

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

LANG 1144 - ELEMENTARY SPANISH (A)

This is an elementary course designed for students who wish to develop the basic skills of speaking, listening to, reading, and writing Spanish. Students will learn beginning grammatical concepts, gain a strong vocabulary base, practice nuances of pronunciation, and explore the Hispanic/Spanish culture as reflected in different Spanish-speaking countries.

Prerequisites & Notes

NULL

Credits: 4

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

GENERAL ELECTIVE - 2 HR ELECTIVE

Select a 2 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 2

Socio-Historical Inquiry (3 credits) Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Bachelor of Science, General Studies

Bachelor of Science, General Studies (4-Year Plan)

Program Description

The BS in General Studies degree is designed to allow students autonomy and choice as to their preferred areas of academic focus. Especially created for students who want a solid foundation in the liberal arts, these programs allow for a student-centered approach to degree completion. Since students must take at least eighteen hours of upper-level courses in two distinct program tracks, the General Studies programs offer a customizable and flexible approach to degree completion.

Program Objectives

Demonstrate mastery of the Foundational Core competencies.

Exhibit content knowledge mastery in 2 areas of study.

Provide evidence of career readiness through field-based coursework.

Total Program Hours- 120 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Quantitative Inquiry - 3 Credit Hours; Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry- 6 Credit Hours; Select Two:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - 3 Credit Hours; Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

Divine Design- 50 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Bachelor of Science, General Studies (4-Year Plan)

Year One

FALL SEMESTER - 16 CREDIT HOURS

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to

live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

NULL

Credits: 4

OR

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry - Select One:**MATH 1313 - TOPICS IN MATHEMATICS**

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Year Two

FALL SEMESTER - 15 CREDIT HOURS

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Bachelor of Science, Political Science

Bachelor of Science, Political Science Four-Year Plan

Through the Political Science degree, students will assess the internal and external constructs of American government, international aid agencies, and non-profit organizations. With a 48 credit hour core requirement, students participate in courses that outline and explore the historical, theoretical, and practical aspects of politics.. Additionally, students will work in conjunction with an assigned faculty advisor to develop a six-hour internship experience. This requirement is designed to introduce students to the experiential side of politics.

This degree seeks to prepare and equip students for careers in the private and public sectors of politics, both domestically and internationally. Upon graduation, students will have specific knowledge in identifying judicial and constitutional principles, applied skills in writing policy proposals and legislative briefs, and employment experience through internship opportunities and professional networking.

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. POLS 3143 - THE AMERICAN PRESIDENCY

This course is an examination of the role and function of the president in the American system of government, beginning with the Constitutional powers and extending through the history of the presidency. Special attention is given to how the perception of the president's role has changed over time and how that changed perception fits within the Constitution's prescriptions for the office.

Prerequisites & Notes

NULL

Credits: 3

POLS 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

POLS 2423 - STATE AND LOCAL GOVERNMENT

This course is a study of the state constitutions, political parties, legislatures, executives, court systems, administrative systems, services, and financial problems in relation to city, county, and federal governments.

Prerequisites & Notes

NULL

Credits: 3

POLS 3053 - FOOD AND POLITICS

This course provides an overview of the politics and institutions that have shaped and continue to shape food production and consumption. This course will analyze the decisions individuals make about what to eat, and how society should manage food production and consumption. Food politics and policies have critical implications for the environment, public health, social justice, and political equality. Topics will include: agricultural subsidies, taxation, farming practices, food safety, labeling requirements, and nutrition guidelines.

Prerequisites & Notes

None

Credits: 3

POLS 3073 - NATIONAL SECURITY AND FOREIGN POLICY

This course provides an overview of the U.S. military and homeland defense structures, and their relation to foreign policies. This course reviews how each area of security works together with the other aspects of government. Topics include: current national security issues and historic events that shaped American foreign policies.

Prerequisites & Notes

None

Credits: 3

Divine Design (Major Specific Experiential Learning)- 6 Credit Hours

POLS 4166 - POLITICAL SCIENCE PRACTICUM

This course is intended as a practical application of what students have learned in previous core classes in the major. Students will work in conjunction with their faculty advisor to develop a six-hour practicum/internship experience in professional fields relating to political science.

Prerequisites & Notes

NULL

Credits: 6

Divine Design - 38 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Total Program Hours- 120 Credit Hours

Bachelor of Science, Undeclared

Total Program Hours- 120 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community

awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours; Select One with Lab:

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students

engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

OR

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

Quantitative Inquiry - 3 Credit Hours; Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry- 6 Credit Hours; Select Two:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - 3 Credit Hours; Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 32-45 Credit Hours

A major needs to be declared once 45 credit hours are earned.

Divine Design - 41-54 Credits

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Certificate, TESOL (Teach English to Speakers of Other Languages)**Program Description**

This program certifies that students who complete the designated course of study with letter grades of "C" or above are equipped with the necessary skills, knowledge, and experiences to successfully and competently teach English to speakers of other languages and assess their proficiency in comprehending and producing written and oral English.

Required - 12 Credit Hours

LANG 2153 - TESOL METHODS AND MATERIALS

This course provides students with a professional repertoire of theory- and research-based methods, materials, and current best practices for teaching English as a foreign or second language to juvenile and adult beginner, intermediate, and advanced proficiency students. This course is not applicable to FLDOE ESOL training requirements.

Prerequisites & Notes

NULL

Credits: 3

LANG 3043 - ASSESSMENT PRACTICES AND MATERIALS FOR TESOL

This course provides students with the theoretical and practical knowledge, skills, and tools for selecting, developing, implementing, and interpreting valid, reliable, and authentic measures of ESL/EFL proficiency in reading, writing, listening, and speaking English for purposes of ESL/EFL program and/or classroom placement, advancement, exit, and evaluation. This course is not applicable to FLDOE ESOL training requirements.

Prerequisites & Notes

NULL

Credits: 3

LANG 4004 - TESOL INTERNSHIP

This internship is required to earn the Certificate to Teach English to Speakers of Other Languages (TESOL) and will require the student to verify completion of 200 hours of supervised English language instruction in an English language school or classroom. A researched, reflective report must be completed by the end of the internship, along with a portfolio of the student's experience and an onsite supervisor's evaluation of the student's professional performance.

Prerequisites & Notes

NULL

Credits: 6

Total Hours Required - 12 Credit Hours

Minor, Applied Linguistics

Program Description:

The Applied Linguistics minor enables students to develop expertise in areas such as articulatory phonetics, second language acquisition, and syntax and morphology, which support professional preparation and advancement in TESOL and provide a strong foundation for graduate study in linguistics.

Minor Core- 18 Credit Hours

Study Abroad 9-12 to be taken in partnership with CanIL

LING-210 LANGUAGE & SOCIETY

LING-210 LANGUAGE & SOCIETY ONLINE VERSION

LING-230 ARTICULATORY PHONETICS

LING-330 PHONOLOGICAL ANALYSIS

LING-360 MORPHSYNTAX

LING-466 PRINCIPLES OF SOCIOLINGUISTIC SURVE

Main Campus Courses 9-12 Credit Hours

BIOT 1103 - BEGINNING HEBREW A

This course is a basic study in the grammar, syntax, and vocabulary of Biblical Hebrew, designed to prepare students for elementary translation.

Prerequisites & Notes

NULL

Credits: 3

CSDS 2033 - PHONETICS

This course is an in-depth study of the perception and production of speech sounds and their representations in the International Phonetic Alphabet (IPA) with emphasis on analyzing and transcribing phonemes at the word level and in connected speech for English and its various dialects and for speech sound disorders.

Prerequisites & Notes

NULL

Credits: 3

LANG 1544 - GREEK I (A)

Basic grammar and crucial vocabulary preparatory to advanced grammar and syntactical patterns in the Greek New Testament.

Prerequisites & Notes

NULL

Credits: 4

EDUC 4043 - APPLIED LINGUISTICS

This course is a practical approach to teaching English to speakers of other languages. The course includes topics such as general linguistics, language theory, principles of language acquisition, and techniques for teaching and assessing K-12 ELL students. Special attention is given to the linguistic components of English, namely phonology, morphology,

semantics, syntax, discourse, and pragmatics.

Prerequisites & Notes

None

Credits: 3

ENGL 3333 - ADVANCED GRAMMAR

An examination of the major grammatical approaches to the English language with consideration of both theory and practical analysis.

Prerequisites & Notes

NULL

Credits: 3

ENGL 4323 - HISTORY OF THE ENGLISH LANGUAGE

This course is an in-depth study of the history and development of the English language.

Prerequisites & Notes

NULL

Credits: 3

LANG 2153 - TESOL METHODS AND MATERIALS

This course provides students with a professional repertoire of theory- and research-based methods, materials, and current best practices for teaching English as a foreign or second language to juvenile and adult beginner, intermediate, and advanced proficiency students. This course is not applicable to FLDOE ESOL training requirements.

Prerequisites & Notes

NULL

Credits: 3

LANG 2001 - TESOL FIELD EXPERIENCE

This course provides students with supervised experience in teaching English to beginning, intermediate, and advanced ESL/EFL students including the application of best practices in providing corrective feedback, classroom management, and the administration and evaluation of appropriate placement and proficiency assessments. This course is not applicable to FLDOE ESOL training requirements.

Prerequisites & Notes

NULL

Credits: 1

LANG 3001 - TESOL FIELD EXPERIENCE

This course provides students with supervised experience in teaching English to beginning, intermediate, and advanced ESL/EFL students including the application of best practices in providing corrective feedback, classroom management, and the administration and evaluation of appropriate placement and proficiency assessments. This course is not applicable to FLDOE ESOL training requirements.

Prerequisites & Notes

NULL

Credits: 1

LANG 4011 - TESOL FIELD EXPERIENCE

This course provides students with supervised experience in teaching English to beginning, intermediate, and advanced ESL/EFL students including the application of best practices in providing corrective feedback, classroom management, and the administration and evaluation of appropriate placement and proficiency assessments. This course is not applicable to FLDOE ESOL training requirements.

Prerequisites & Notes

NULL

Credits: 1

Total Program - 18 Credit Hours

Minor, Creative Writing

TOTAL PROGRAM - 18 Credit Hours

Required - 6 Credit Hours

ENGL 3013 - CREATIVE WRITING

Study and practice in narrative, poetical, and dramatic writing. The course includes reading and discussing student work in groups and in conferences with the instructor. This course is cross-referenced with COMM 3013.

Prerequisites & Notes

NULL

Credits: 3

ENGL 4533 - CONTEMPORARY LITERATURE

This course is the study of recent American, British, and World literature, with an emphasis on the dimensions of cultural diversity. This course is intended to provide a critical introduction to the literary and cultural issues of literature since 1945 and to a representative selection of the major writers of the contemporary period.

Prerequisites & Notes

NULL

Credits: 3

Electives - 12 Credit Hours

Select four of the following:

COMM 2423 - WRITING FOR DIGITAL MEDIA

This course focuses on writing skills for digital media with an emphasis on media convergence and online journalism.

* Do not register for this course if you have taken DCOM 2423

Prerequisites & Notes

ENGL 1233 or ENGL 2113

Credits: 3

COMM 3363 - WRITING FOR PUBL RELATIONS & ADVERT

This course is designed to give practical experience in producing public relations and advertising campaigns, including press kits, press releases, and advertising copy.

Prerequisites & Notes

COMM 2323

Credits: 3

COMM 3723 - SCREENWRITING I

The course acquaints the student with the screenwriting process, and it includes the three-act structure, writing a proper treatment, character analysis, using proper formatting, screenplay protocol, basic story elements, and writing a compelling story. Students demonstrate their knowledge of scriptwriting by creating original scripts.

* Do not register for this course if you have taken DCOM 3723

Prerequisites & Notes

COMM 2533

Credits: 3

COMM 4743 - SCREENWRITING II

The course concentrates on advanced elements of story and screenwriting as well as advanced script analysis. Limited enrollment because of the amount of reading and critical analysis required.

* Do not register for this course if you have taken DCOM 4743

Prerequisites & Notes

COMM 3723

Credits: 3

ENGL 2553 - JOURNAL EDITING

This course focuses on the study and practice of editing various stages of expository, interpretive and argumentative texts from cross-disciplines. Students enrolling join the Oracle staff to support managing editors in the English Capstone Seminar. Through their editing efforts, Journal Editing students support the publication of Oracle in the spring semester of each year and perform writing tasks related to communications with faculty and student authors.

Prerequisites & Notes

NULL

Credits: 1-3 Variable Credit

ENGL 3333 - ADVANCED GRAMMAR

An examination of the major grammatical approaches to the English language with consideration of both theory and practical analysis.

Prerequisites & Notes

NULL

Credits: 3

ENGL 4143 - ADVANCED POETRY WRITING

This course provides advanced study and practice in writing poetry.

Prerequisites & Notes

ENGL 3013 CREATIVE WRITING

Credits: 3

ENGL 4153 - ADVANCED FICTION WRITING

This course provides advanced study and practice in writing fiction.

Prerequisites & Notes

ENGL 3013 CREATIVE WRITING

Credits: 3

ENGL 4163 - ADVANCED CREATIVE NONFICTION

This course provides advanced study and practice in writing creative nonfiction such as biography, memoir, historical narrative, literary journalism, and sports, travel, and nature writing.

Prerequisites & Notes

ENGL 3013 CREATIVE WRITING

Credits: 3

ENGL 4433 - ORAL INTERPRETATION

Examination of techniques involved in the recreation of literature for an audience with emphasis on individual interpretation and presentation of literary expression.

Prerequisites & Notes

NULL

Credits: 3

ENGL 4633 - SPECIAL TOPICS IN LANGUAGE & LIT

This is a study of selected aspects of literature clustered around literary or methodological structures, common origin, or linguistic or topical foci. Possible clusters include national or regional literatures, ethnic literatures, genres, movements or schools in literature or linguistics, historical epochs, rhetoric, or research methods.

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

or

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and

analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry (6 credits) Select Two:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

Divine Design - 35 Credit Hours

General Electives are any college-level courses that do not satisfy specific program requirements. To meet the Divine Design core requirements, students may declare minors, enroll in elective credit, and enjoy experiential learning like study abroad, internships, or practicum. Practicum course options include PRAC 1001 (1 hr), PRAC 1002 (2 hrs),

PRAC 1003 (3 hrs), PRAC 1004 (4 hrs). Students may earn up to 12 credit hours toward their degree program through experiential learning practicum.

Total Program: 60 Credit Hours

Online

Associate of Arts, General Education (Online, Site-Based & Dual Enrollment)

Associate of Arts, General Education Two-Year Course Plan

The Associate of Arts (AA) degree includes the core learning components and competencies commonly accepted as foundational for a four-year baccalaureate degree by many colleges and universities. The AA degree is designed for students who desire recognition for completing the two-year prescribed curriculum. Because many bachelor's degrees require specific prerequisites, students should verify how their AA degree and classes transfer into the intended degree. Graduates with the Associate of Arts degree will be able to:

Demonstrate basic knowledge of the biblical basis of Christian theology, the history of Christian traditions, and the various expressions of global Christianity.

- Articulate a biblically-based statement of Christian identity as it relates to theology, ethics, habits and practices, and vocation.
- Apply critical consideration of ethical principles and actions to their lived experiences as Christians.
- Demonstrate intellectual and practical fluency in the stewardship of God's creation, including their own health & wellness, personal & family finances, civic engagement, and the environment.
- Engage with diverse populations and belief systems.
- Demonstrate the ability to reason and develop evidence-based decisions using numerical information and to use relevant mathematical and logical methods to analyze and solve problems effectively.
- Demonstrate information literacy and critical thinking by locating and evaluating information that assists them in examining ideas and evidence before formulating an opinion or conclusion.
- Demonstrate effective written and oral communication with and response to varied audiences.
- Participate in the discourse of human cultures and their expression in the humanities (e.g. arts, history, literature).
- Evaluate the relationship between the Christian faith and the sciences (natural, behavioral, and social) and their approaches to understanding and resolving unanswered questions.

*Note: Students taking courses online outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. State-specific requirements are specified in the SEU Catalog. Your Academic Advisor is available to help integrate these additional courses into your plan.

Dual-enrolled students are limited to completing their Divine Design requirement through general elective courses only.

Total Program: 60 Credit Hours

Foundational Core- 25 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Habits of Inquiry- 22 Credit Hours

Discursive Inquiry- 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

or

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

or

Socio-Historical Inquiry (3 credits) Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester**CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION**

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value

equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Year Two

Fall Semester

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Bachelor of Science, General Studies (Online)

Bachelor of Science, General Studies (Online) Four-Year Plan

Program Description

The BS in General Studies degree is designed to allow students autonomy and choice as to their preferred areas of academic focus. Especially created for students who want a solid foundation in the liberal arts, these programs allow for a student-centered approach to degree completion. Since students must take at least eighteen hours of upper-level courses in two distinct program tracks, the General Studies programs offer a customizable and flexible approach to degree completion.

Program Objectives

Demonstrate mastery of the Foundational Core competencies.

Exhibit content knowledge mastery in 2 areas of study.

Provide evidence of career readiness through field-based coursework.

Total Program Hours- 120 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - Select One with Lab:

NSCI 1044 - NUTRITION SCIENCE

This online course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 4

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

Quantitative Inquiry - Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry- Select Two:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

Divine Design- 50 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

AND

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Socio-Historical Inquiry (3 credits) Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester - 15 Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Year Two

Fall Semester - 15 Hours

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Divine Design- 50 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), and PMIN 2303 (3 credit hours) up to a total of 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Montana

Montana requires 6 credit hours of natural science with a laboratory experience. Students may choose to take BIOL 1334 to complete the requirement or any other science course to meet the credit hour requirement.

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

Nevada

3 credit hours needed. The Socio-Historical requirement must be fulfilled by taking PPOL 2433 or by earning credit for one of the following combinations of classes from an accredited Nevada college: 1) HIST 100, 2) PCS 101, 3) HIST 101 and HIST 102, or 4) or HIST 101 and 217.

Ohio

Ohio students need an additional two credit hours in one or more of the following areas: Oral and Written Communication, Mathematics, Statistics and Logic, Arts, Humanities, Culture and Diversity, Natural Sciences, Technology and Innovation.

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

* if not already taken or 2 more credits to get to 36 hours

Oklahoma

In addition to the courses listed below, Oklahoma students need an additional 7 credit hours in one ore more of the following: History, Social Science, Behavioral Science, Humanities, Math, Natural Science, Language, or Fine Arts.

PPOL 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

Select One:

Choose one not already chosen for Foundational Core

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Other Programs

Associates of Arts, General Education, 2-Year Degree Plan

Year One

Fall Semester

ENGL 1133 - ENGLISH COMPOSITION I

Study and practice in the critical reading and effective writing of expository prose, with an emphasis on fluency and style.

Credits: 3

COMM 1433 - FUNDAMENTALS OF SPEECH

This course is a study in both theory and practice in the principles of effective speech development and presentation.

* Do not register for this course if you have taken DCOM 1433

Prerequisites & Notes

None

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Math Elective: (3 credit hours)

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1323 - EXPLORATION IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. Possible topics for this course are set theory, elementary number theory, history of mathematics, numbers and number systems, financial mathematics, systems of equations, and matrices.

Prerequisites & Notes

NULL

Credits: 3

MATH 1413 - PRECALCULUS

This course covers algebraic relations and functions, systems of equations, rational functions, polynomials, exponential functions and logarithms, trigonometric functions and their inverses, graphs, and identities. A placement exam is given at the beginning of each course. Students must demonstrate proficiency to remain in this course. A math score on the ACT of 21 or the SAT of 500 is required. Cost for items and materials provided by our Bookstore are charged as a fee attached to the course.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

History Elective: (3 credit hours)

HIST 1033 - WORLD CIVILIZATION TO 1600

A survey of world history from the beginning of civilization to 1600. Introduction to the origins and early development of individual civilizations. Stresses interdependency and interrelations among cultures, and compares social, political, and religious movements.

Prerequisites & Notes

NULL

Credits: 3

HIST 1043 - WORLD CIVILIZATION SINCE 1600

A survey of world history from 1600 to the present. Emphasis is placed on various nationalistic movements including the English, American, and French Revolutions; the rise of new nations; scientific expansion; changes in religious sects; world conflicts; and status of the world at the present.

Prerequisites & Notes

NULL

Credits: 3

HIST 2013 - AMERICAN HISTORY TO 1877

A survey of American history from discovery to 1877. Topics include the colonial period, the revolutionary era, the Constitution, Jeffersonianism, economic and territorial expansion, sectional tensions, the Civil War, and Reconstruction.

Prerequisites & Notes

NULL

Credits: 3

HIST 2023 - AMERICAN HISTORY 1877 TO THE PRESENT

A survey of American history from 1877 to the present. Topics include the New South, the New West, foreign affairs, industrialization, the Progressive Era, the World Wars, the Depression, the Cold War, and present issues.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester

ENGL 1233 - ENGLISH COMPOSITION II

This course includes study and practice in the critical reading and effective writing of argumentative and expository prose, with an emphasis on the documented paper. A research paper is required.

Prerequisites & Notes

ENGL 1133

Credits: 3

BINT 1533 - THE NEW TESTAMENT INTERPRETATION

This course serves as an introduction to the New Testament in the context of its first century environments. The course examines the teachings and interpretations of the New Testament as well as the role of the Scriptures in the Church.

Prerequisites & Notes

NULL

Credits: 3

BIOT 1433 - THE OLD TESTAMENT INTERPRETATION

The course serves as an introduction to Old Testament interpretation. It provides an elemental framework for interpreting the Old Testament by exploring its ancient Near Eastern contexts; discussing literary, thematic, and theological constructs; and demonstrating how it informs Christian thought and practice.

Prerequisites & Notes

NULL

Credits: 3

Behavioral Science Elective: (3 credit hours)

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

PSYC 1233 - PERSONAL AND SOCIAL ADJUSTMENT

This course is an introduction to human adjustments and the resulting forms of behavior. Emphasis is placed on the fundamental principles underlying normal behavior. This course helps students apply mental health principles to everyday living.

Prerequisites & Notes

NULL

Credits: 3

Year Two

Fall Semester

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

THEO 2123 - CHRISTIAN THOUGHT AND PRACTICE

This course surveys the history of Christian thought and practices. Doctrinal topics introduced in the course include the doctrines of God, Jesus Christ, the Holy Spirit, humanity, salvation, the church, scripture, and last things. The course explores the application of Christian practices and spiritual disciplines such as prayer, communion, baptism, and social responsibility to the students' community.

Prerequisites & Notes

NULL

Credits: 3

Humanities Elective: (3 credit hours)

ARTV 1503 - SURVEY OF WESTERN ART

This course introduces students to the fundamental elements of two- and three-dimensional Western art through reading, observation, and discussion. Students will learn the basic vocabulary related to the visual arts, learn to distinguish various genres and periods of art, and recognize and appreciate masterpieces of Western art. The role of art in history and society will be discussed and students will develop an enhanced appreciation for the value of art in their own lives.

Prerequisites & Notes

None

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

MUSC 1103 - HISTORY OF JAZZ

This course examines the most significant styles of American music in chronological order beginning with its roots and continuing through the present day.

Prerequisites & Notes

NONE

Credits: 3

MUSC 1223 - HIP HOP AND AMERICAN CULTURE

This course is an introduction to the popular music and cultural artform known as hip hop. Students in the course will examine hip hop's development, history, communication style, dance form, music, artistic process and its effect on American culture.

Prerequisites & Notes

NULL

Credits: 3

Natural Science & Lab:(4 credit hours)

Spring Semester

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Social Science Elective: (3 credit hours)

BUSI 2103 - MACROECONOMICS

This course will cover basic concepts of supply and demand, production possibilities, the circular flow concept and related topics of GDP, inflation, and employment/unemployment, fiscal and monetary policy, and the workings of the monetary system.

*Do not register for this course if you have taken BBUS 2103

Prerequisites & Notes

None

Credits: 3

POLS 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

POLS 4133 - CORNERSTONE IN POLITICAL SCIENCE

The purpose of this course is to connect students with major competencies in the field of political science. The competencies covered in this course are economics and financial literacy related to politics, governing versus campaigning, decorum of communication in politics, the art of compromise, and the sanctity of the right to vote. As a capstone course, students will demonstrate mastery of the competencies through coursework and experiential learning.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2233 - MARRIAGE AND FAMILY

This course is a study of the major issues related to courtship, marriage, and family formation. Special attention is given to the social conditions influencing courtship, marriage, divorce, and family life. Topics include dating rituals, gender differences, expectations, parenting, family dysfunction, family violence, and strategies for sound relating. The role of family counselors and therapists is also discussed.

Prerequisites & Notes

PSYC 1133 or PSYC 1233

Credits: 3

Literature Elective: (3 credit hours)

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

ENGL 2513 - BRITISH LITERATURE I

This course introduces students to British literature from Old English through the Neo-classical period. Students will develop skills in reading, writing about, and interpreting literary cultural texts while drawing on relevant cultural contexts, critical frameworks, and personal faith.

Prerequisites & Notes

NULL

Credits: 3

ENGL 2523 - BRITISH LITERATURE II

This course introduces students to British literature from Romanticism through the Contemporary period. Students will develop skills in reading, writing about, and interpreting literary cultural texts while drawing on relevant cultural contexts, critical frameworks, and personal faith.

Prerequisites & Notes

NULL

Credits: 3

ENGL 3633 - AMERICAN LITERATURE

A survey of prose and poetry with attention given to socio-political backgrounds and growth of American thought as expressed through selected authors from the colonial period to 1945.

Prerequisites & Notes

NULL

Credits: 3

ENGL 3933 - AFRICAN AMERICAN LITERATURE

A survey of significant African-American writing from 1746 to the present, with attention given to social, political, and cultural contexts.

Prerequisites & Notes

NULL

Credits: 3

ENGL 4343 - NATIVE AMERICAN LIT & CULTURE

A survey of analysis of essays, poetry, fiction and basic history of Native Americans, with an emphasis on understanding different aspects of Native American thought and expression, especially in the changing contexts of their histories and tribal identities.

Prerequisites & Notes

NULL

Credits: 3

Ethics Elective: (3 credit hours)

COMM 2733 - COMMUNICATION ETHICS

This course explores the benefits and difficulties associated with practicing ethics in human communication. Exploring practical issues through case studies and current events, this course will equip students to manage ethical dilemmas with an approach grounded in biblical principles and sound ethical theory.

Prerequisites & Notes

None

Credits: 3

THEO 3123 - INTRODUCTION OF ETHICS

This course examines the philosophical and theological principles and issues related to ethics. It addresses meta-ethical questions about the relationship between moral language and concepts and various metaphysical and post-metaphysical views; normative ethical theories; theological structures and implications of ethics; and contemporary ethical issues.

Prerequisites & Notes

NULL

Credits: 3

Bachelor of Arts, General Studies Four Year Plan

Year One

Fall Semester

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

Spring Semester

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Socio-Historical Inquiry - Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

SPRING SEMESTER - 15 CREDIT HOURS

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Natural-Scientific Inquiry(with Lab) Select One:

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

OR

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry - Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Second Year

FALL SEMESTER - 15 CREDIT HOURS

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

POLS 2113 - INTRODUCTION TO POLITICS

This course introduces students to the fundamental themes and enduring issues of political life. Topics includes the dominates sub-fields of the discipline: American politics, comparative politics, international relations, and political philosophy, as well as integration of the Christian faith.

Prerequisites & Notes

NULL

Credits: 3

POLS 2423 - STATE AND LOCAL GOVERNMENT

This course is a study of the state constitutions, political parties, legislatures, executives, court systems, administrative systems, services, and financial problems in relation to city, county, and federal governments.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Socio-Historical Inquiry - Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

SPRING SEMESTER - 15 CREDIT HOURS

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

POLS 2213 - Political Economy

This course examines the relationship between economics and different political systems. Special emphasis is placed on analyzing and discussing a variety of economic topics, their policy implications, and practical applications.

Credits: 3

POLS 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Third Year**FALL SEMESTER - 15 CREDIT HOURS****POLS 3213 - COMPARATIVE POLITICS**

This course is an introduction to comparative politics. It explores different forms of government and their impact on political, economic, and social systems. It further examines factors affecting political systems such as culture, demography, geography, history, and religion.

Prerequisites & Notes

NULL

Credits: 3

POLS 3123 - POLITICAL PHILOSOPHY

This course is an introduction to political philosophy. It explores major Western literature and thinkers on political thought. These include Plato, Aristotle, Aquinas, Machiavelli, Hobbes, Locke, Rousseau, Tocqueville, and Marx.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Major Core Elective - Select One:

BUSI 3103 - PRINCIPLES OF FINANCE

This course covers financial organization and the principles and practices of decision making involving acquiring and allocating capital, dividend policy, operating and financial leverage, financial markets and related topics.

Prerequisites & Notes

BUSI 2233

Credits: 3

HIST 3643 - CHRISTIANITY & POLITICS SINCE 1945

NULL

Prerequisites & Notes

NULL

Credits: 3

HIST 4733 - RONALD REAGAN & MOD AMER CONSERV

This course examines the roots of modern American conservatism and how Ronald Reagan fit into that movement. Intellectual and political leaders of this movement and Reagan's life and presidency will be analyzed.

Prerequisites & Notes

NULL

Credits: 3

PLAW 3013 - INTRODUCTION TO LEGAL THEORY

This course introduces students to the profession of law with emphasis on the distinction and relationship of theory and practice. Advice is offered to students on preparing for and choosing a law school. The course also provides practical advice on how to succeed in law school. Students will also be exposed to basic legal research and writing techniques.

Prerequisites & Notes

None

Credits: 3

PLAW 3433 - LEGAL RESEARCH & WRITING

This course is designed to teach students how to identify and analyze legal problems. Students will engage in legal research using primary and secondary sources. Upon completion of the legal analysis of a problem, students will prepare a written form that adheres to the conventions of the legal profession.

Prerequisites & Notes

None

Credits: 3

PLAW 4143 - LEGAL DRAFTING

This course is an introduction to purposes and uses of various legal document drafting formats. The primary focus is on creation of basic legal documents that meet appropriate professional standards.

Prerequisites & Notes

None

Credits: 3

PLAW 4443 - ADVANCED LEGAL RESEARCH & THEORY

This course emphasizes the use of advanced electronic legal research techniques and critical analysis of legal issues. Using a variety of hypothetical and factual situations, students will prepare effective written persuasive presentations in an acceptable legal format.

Prerequisites & Notes

None

Credits: 3

POLS 2403 - UNITED STATES CONSTITUTION

A study of the legal culture in the United States, including the British common law system, the origin of the U.S. Constitution, the amendments, and the landmark cases.

Prerequisites & Notes

NULL

Credits: 3

Main Campus (Lakeland, FL)

Bachelor of Social Work

Bachelor of Social Work - Four Year Plan

The BSW program is fully accredited by the Council on Social Work Education (CSWE). The Council on Social Work Education (CSWE) is the national body authorized to accredit the baccalaureate and graduate-level social work programs and to assure students receive a uniform quality professional educational experience.

CSWE promotes high-quality social work education through the accreditation of programs, annual conferences for social work faculty and practitioners, professional development activities, task force work on educational programming, and the publication of several journals.

Accreditation is very important in social work education. Most states require education from an accredited baccalaureate or master's program before being eligible for licensure as a social worker. In addition, only graduates from accredited social work programs are eligible to receive "advanced standing" in graduate-level programs.

Programs seeking accreditation must comply with the Educational Policy Accreditation and Accreditation Standards (EPAS). These standards define the structure of social work education, including foundational curriculum content areas, program governance, resources, faculty and student development, and program assessment. The Southeastern Social Work Program has adopted the nine competencies required of social work graduates and added a tenth competency that addresses the unique faith orientation of the program.

Programs:

1. Bachelor of Social Work
2. Bachelor of Social Work and Criminal Justice
3. Child Welfare Certificate

Program Description:

The Bachelor's degree in Social Work prepares students for basic generalist social work practice, while the Master's degree in Social Work prepares students for more advanced practice, such as providing mental health counseling, child and family therapy, administration, and community organizing. The BSW provides a foundational curriculum for the student who is preparing for graduate study. MSW programs provide opportunities for students who have earned a

BSW from an accredited program to enter graduate school with "advanced standing," shortening the course of study for the MSW.

The Bachelor's in Social Work Program at Southeastern University is designed to educate the professional entry-level social worker. This means that a student graduating from Southeastern University with a Bachelor in Social Work is prepared with the knowledge, skills, values, and ethics of the profession. The BSW graduate should be able to enter any social work setting as an employee and assume beginning social work responsibilities. The knowledge and skills students learn will empower them to promote, restore, maintain, and enhance the functioning of individuals, families, groups, organizations, and communities. The graduate will also be prepared to plan, formulate, and implement social welfare policies, services, resources, and programs.

Minimum Grade Requirements:

As part of requirements of our discipline-specific accrediting body, the Council on Social Work Education (CSWE), the undergraduate social work program requires a separate application process, in addition to declaring the social work major. Students typically apply to the social work program the Spring semester of their Sophomore year and must be admitted to the program in order to take Social Work Practice classes (SOWK 3133, 4023, 4123), Preparation for Field Education Seminar (SOWK 4011) or any Practicum course (SOWK 4114, 4124). In order to apply to the social work program, students need to:

1. Demonstrate proficiency in written language (Complete English Composition I and II with a minimum grade of C-)
2. Complete College Algebra and Life Science (or equivalent approved science credit with lab) with a minimum grade of D-
3. Complete a minimum of 40 credit hours
4. Be enrolled in or have completed SOWK 2123 and SOWK 2021 with a minimum grade of C-
5. Attain a minimum overall GPA of 2.5
6. Have no less than a "C" in any Social Work class
7. Submit a written application
8. Complete a minimum of 40 hours of volunteer work in a social service agency (completed as part of SOWK 2021)
9. Have two letters of recommendation from individuals such as a volunteer agency supervisor, minister, or other organizational setting where the student has been involved in direct contact with individuals seeking services
10. Submit a personal narrative including interests, strengths, and suitability for a career in social work

"Southeastern University's Bachelor of Social Work (BSW) program is accredited by the Council on Social Work Education (CSWE). The BSW program meets educational requirements to obtain an applicable level of professional licensure or certification in most states. Levels/types of licensure or certification vary. Additional general requirements may apply including practice experience, state-specific coursework and exams, applications, fees, background checks, etc.

****Each state board, agency, and or department has the ultimate authority and discretion to determine whether professional licensure or certification will be issued. Students who are interested in practicing in this state should contact the state board before enrolling in a program. For state-specific information on social work click [here](#).**"

Program Objectives:

Social Work Program Goals

The goals of the program are as follows:

1. To equip students to engage in the planned change process with systems of all sizes within a variety of fields and practice contexts.
2. To promote identification with the social work profession, commitment to social work values and the ability to apply social work ethical principles to guide professional practice.
3. To prepare students to become change agents who think critically about social issues and policies, and are committed to advancing social justice.
4. To encourage respect for human dignity and worth, and a commitment to strengths based practice with individuals, groups, and communities from diverse populations.
5. To create a learning context that fosters critical thinking, and enables students to apply theoretical frameworks and research to practice.
6. To prepare students to integrate faith and spirituality within social work practice with sensitivity to the diversity of settings and populations of practice.

Social Work Program Competencies

1. Demonstrate ethical and professional behavior
2. Advance Human Rights & Social, Racial, Economic, and Environmental Justice
3. Engage Anti-Racism, Diversity, Equity, and Inclusion (ADEI) in Practice Apply and communicate understanding of the importance of diversity and difference in shaping life experiences in practice at the micro, mezzo, and macro levels.
4. Engage in practice-informed research and research-informed practice
5. Engage in policy practice
6. Engages with individuals, families, groups, organizations, and communities
7. Assess with individuals, families, groups, organizations, and communities

8. Intervene with individuals, families, groups, organizations, and communities
9. Evaluate practice with individuals, families, groups, organizations, and communities
10. Integrate faith and social work practice in a way that embraces diversity and is consistent with both the Christian Faith and the NASW Code of Ethics.

Social Work as a Profession

Social Work is a very diverse profession, allowing the graduate to work in a broad array of settings with many different populations. Social workers may work in a wide variety of settings and fulfill a multiplicity of functions, roles, and responsibilities. A few examples of professional careers in social work include school social work, child welfare, employment counseling, hospital social work, substance abuse counseling, adoptions, mental health counseling, juvenile court work, community organizing, geriatric social work, program administration, and individual, family, and group counseling.

Some of the settings in which a social worker may find employment include:

Advocacy Programs	Employee Assistance Programs	Neighborhood Coalition Programs
Aging Services	Home Care Agencies	Schools
Children and Youth Services	Homeless Shelters	Head Start Programs
Churches	Hospices	Substance Abuse Programs
Community Action Centers	Hospitals	
Crisis Centers	Income Maintenance Programs	
Correctional Facilities	Industry	
Criminal Justice Agencies	Legal Services Agencies	
Domestic Violence Centers	Mental Health Services	

Total Program Hours- 120 Credit Hours

Foundational Core- 34 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation- 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credit Hours**Discursive Inquiry- 6 Credit Hours****ENGL 1113 - COLLEGE COMPOSITION**

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:**BIOL 1333 - ESSENTIALS OF HUMAN A & P**

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

Quantitative Inquiry- 3 Credit Hours

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

Socio-Historical Inquiry-6 Credit Hours

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 41 Credit Hours**SOWK 2013 - INTRO TO SOCIAL WORK**

This course is an examination of the fundamental knowledge, skill and attitudinal base of the social work profession. Included are philosophy, value base, ethical standards, early history, professional roles and functions, client systems,

purposes served, fields of practice, professional organizations, and the current status of Social Work. An introductory exposure to generalist social work practice is provided.

Prerequisites & Notes

Prerequisite: None

Corequisite: SOWK 2021

Credits: 3

SOWK 2053 - HUMAN BEHAVIOR & SOCIAL ENVIRON I

This course focuses on skill development in assessing "person-in-environment" throughout the life cycle, utilizing ecological systems thinking. It is a foundation social work course that is aimed at helping students acquire basic knowledge of human functioning from a broad perspective. It is a study of the interaction of biological, psychological, sociological, cultural, spiritual, and systemic influences on human functioning.

Prerequisites & Notes

NULL

Credits: 3

SOWK 2063 - HUMAN BEHAVIOR & SOCIAL ENVIRON II

This course is an examination of human behavior in the macro social environment. This course focuses on the interfacing of individuals and families with communities, organizations, and groups. Issues related to cultural diversity, social and economic justice, and populations at risk are examined, as well as values and ethics in social work practice in the macro social environment.

Prerequisites & Notes

NULL

Credits: 3

SOWK 3033 - UNDERSTANDING HUMAN DIVERSITY

This course examines the complex nature of culture and personal identity, explores populations at-risk, and encourages students to understand and appreciate diversity. Specific knowledge of individual cultures, awareness of the patterns of oppression experienced by those cultures, and skills relevant to developing a culturally competent approach to working with diverse people groups are addressed.

Prerequisites & Notes

None

Credits: 3

SOWK 3093 - SOCIAL WELFARE POLICY

This course is an examination of policy practice focusing on creation and analysis of social welfare policy. An analytical approach to contemporary social welfare policy and current social welfare programs is emphasized, as is the critique of major social welfare policies and programs. Influencing policy formation at administrative, legislative, and judicial levels, and exploring the values and ethics of America's social welfare system are included.

Prerequisites & Notes

SOWK 2013

Credits: 3

SOWK 3123 - BUILDING EFFECTIVE HELPING SKILLS

This course introduces students to the basic interpersonal skills utilized in the helping process such as client engagement, empathic listening, reflecting feeling and meaning, clarifying, identifying and exploring problems, confrontation, and helping clients develop strategies to accomplish their goals from a strengths based perspective.

Prerequisites & Notes

NULL

Credits: 3

SOWK 3133 - PRACTICE WITH INDIVIDUALS

This course is an examination of generalist social work practice, including practice skills related to the social work problem-solving process (relationship building, interviewing, contracting). It includes an exploration of social work ethics and values. Identification with the social work profession is encouraged. Social work with individuals and family systems is emphasized.

Prerequisites & Notes

SOWK 2013 , Admission to BSW Program

Credits: 3

SOWK 3413 - MENTAL HEALTH SYSTEMS & STRATEGIES

This social work course examines the concepts of "mental health" and "mental health disorders" from a risk and resilience framework. It studies the bio-psycho-social aspects of mental health challenges. The history of community mental health, as well as various aspects of assessment and service provision, will be studied. The role of the baccalaureate social worker in community and behavioral mental health will be explored using the generalist social work model.

Prerequisites & Notes

SOWK 2013

Credits: 3

SOWK 3303 - WRITING FOR SOCIAL WORK PRACTICE

This course prepares students to engage in effective written communication for generalist social work practice with systems of all sizes. Emphasis is placed on developing writing skills required to document services, develop assessments using ecosystems concepts, write reports for inter-professional communication, analyze problems, advocate for services, and utilize research to inform practice.

Prerequisites & Notes

ENGL 1113

Credits: 3

SOWK 4011 - PREPARATION FOR FIELD EDUCATION

This course introduces the purpose, requirements, and expectations of the field experience. Students review ethical responsibilities, professionalism, risk management, and culturally competent practice. Field site options are explored, agency interviews conducted, and agency placement is arranged by the end of the semester. This course also provides an orientation to web-based Intern Placement Tracking program, the BSW field manual and related forms, including drafting of a Practicum Learning Contract.

Prerequisites & Notes

Admission to the BSW Program

Credits: 2

SOWK 4023 - PRACTICE WITH FAMILIES & GROUPS

This course is a continuation of SOWK 3133. Social work practice theories, methods, skills and values relevant to generalist practice with families and groups are emphasized. Therapeutic models used with individuals, families, and groups are assessed. Focus is on group and family assessment and interventions.

Prerequisites & Notes

SOWK 2013 ; Admission to BSW Program

Credits: 3

SOWK 4053 - RESEARCH METHODS

This course deals with the application of the scientific method of inquiry in application to theory and practice for the purpose of knowledge building and the development of best practice. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice, and evaluation of theory. The focus is on the development of social research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

PSYC 1133

Credits: 3

SOWK 4123 - PRACTICE WITH COMMUNITIES & ORGS

This course examines generalist practice theories, knowledge, values, methods, and skills for work with and in organizations, communities, and large social systems with special emphasis on social work with groups, organizations, and communities.

Prerequisites & Notes

SOWK 2013 ; Admission to BSW Program

Credits: 3

SOWK 4223 - INTGRTG FAITH & SCL WRK THEORY/PAC

This course will prepare students to integrate their faith dynamically and ethically with social work practice. The course will explore how diverse spiritual traditions impact and define clients' experiences and address the importance of religion and spirituality as an integral aspect of addressing client needs. Students will be encouraged to develop spiritual practices to sustain their own callings and a personal understanding regarding how to integrate Christian thought, values, and principles with professional ethics and practice.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (Major Specific Experiential Learning)- 9 Credit Hours

SOWK 2021 - FIELD OBSERVATION

A course designed to provide students with exposure to various social service agencies and the populations they serve. Through observation, job shadowing, and supervised learning experiences, the student acquires knowledge about how social service agencies function, populations served, the roles and functions of social workers in the delivery of social services and how social problems are addressed at micro, mezzo, and macro levels. Students are required to serve a minimum of 40 hours for a one hour credit.

Prerequisites & Notes

Prerequisite: none; Corequisite: SOWK 2013

Credits: 1

SOWK 4114 - FIELD PRACTICUM & SEMINAR I

This practicum and seminar course provides students an educationally directed practicum, introducing the student to agency-based social work practice, as well as an opportunity to discuss practicum experiences with other students and to integrate theory with practice. The student completes 200 hours in a social service setting, engaging in direct social work practice, under the guidance of a professional social worker. The student begins to integrate theory and practice and demonstrates beginning social work practice behaviors, with the focus on professional growth and development. Students assess their field experiences, examine ethical issues, and demonstrate skills in understanding of agency structures and policies at the micro, mezzo, and macro levels.

Prerequisites & Notes

SOWK 4011 ; BSW Program Admission

Credits: 4

SOWK 4124 - PRACTICUM AND SEMINAR II

This course concentrates on practice related issues with a strengths based method of problem solving, providing students with an opportunity to discuss practicum experiences with other students, discuss issues related to practice and service delivery systems, integrate theory with practice, and apply research to practice. This course is a continuation of SOWK 4114, with the student completing an additional 200 hours in the same social work practicum agency. This course provides continued experience in generalist social work practice under the supervision of a professional social worker.

Prerequisites & Notes

SOWK 4114 , Admission to BSW Program

Credits: 4

Divine Design - 36 Credits

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Bachelor of Science, Social Work & Criminal Justice

Bachelors of Science, Social Work & Criminal Justice (Four Year-Plan)

Social workers play an important role in the criminal justice system. They help provide support for individuals and families throughout the legal process, including serving as client advocates and case managers in court, working in correctional facilities, and helping individuals maintain a reformed life after incarceration. Students with a desire to serve in this field should consider SEU's double major in social work and criminal justice.

You'll develop a solid understanding of the criminal justice system, including law enforcement, the courts, and corrections. You'll also get hands-on training in managing cases, observing and assisting clients, and completing paperwork through your field observations and internship. Following graduation, you'll be equipped to succeed and make a difference, whether you move directly into the job field or pursue additional studies at the graduate level.

The Bachelor of Social Work program at Southeastern University is accredited by the Council on Social Work Education (CSWE).

Students who complete this program are eligible to apply for our Advanced Standing MSW program.

- Specific benefits of this degree

- Students can strengthen their employability, particularly in today's environment, and earn advanced standing in pursuit of a Master of Social Work degree. Most importantly, this educational path allows students to complete their master's degree in less time with a significant cost savings.
- What makes this program unique, especially compared to similar programs at other institutions?
 - The commitment of faculty to their students and the integration of faith and spirituality with criminal justice/social work practice.
 - The double major in social work and criminal justice provides students an opportunity to obtain expertise in criminal justice, as well as social work, within the traditional 4-year time-frame due to the unique combination of courses within the double degree.
 - As students are required to meet all requirements of the social work major, coupled with criminal justice courses to complete the dual degree, students qualify for advanced standing in the Master of Social Work degree.
- List concentrations/tracks in program (if applicable) and include a brief description:
 - N/A
- Provide 4-10 possible careers that students may be able to pursue
 - Case worker in a variety of settings, such as Child Welfare, Child advocacy, Medical, Homeless shelters/agencies
 - Victim's advocate
 - Social Worker - Juvenile System
 - Social Worker - Adult Prison
 - Social Worker - Law Enforcement
 - Law Enforcement - variety of careers
 - Community Organizer
- Specific graduation requirements beyond classwork (internship/practicum hours, study abroad, thesis or capstone project, etc.)
 - 400-hour practicum in a social work/criminal justice setting
- Certifications that student qualifies for upon graduation (if applicable)
 - Child Welfare Certificate (if completing 2 additional child welfare courses and practicum in a child welfare setting)

- Any additional information that would encourage an incoming student to choose this degree
 - Students interested in law enforcement, court systems, and corrections who also desire to develop practical skills in engagement, assessment, intervention, and evaluation with individuals, families, groups, communities, and organizations would greatly benefit from this degree.

Career Ideas

- Conflict mediator
- Correctional counselor
- Diversion program manager
- Juvenile court liaison
- Mitigation/arbitration specialist
- Penologist
- Probation/parole officer
- Transitional case manager
- Victims advocate

SOWK 3183 - CHILD MALTREATMENT & CHILD WELFARE

This course provides a framework of knowledge, values, and skills necessary in the field of child welfare. Theory, research, and implications of child and adolescent maltreatment for child development and well-being are addressed. Course content is presented within the context of child welfare practice and social work with children and adolescents in public agencies and programs. Particular attention is given to federal and state child welfare statutes including Chapter 39, Florida statutes, the Child Maltreatment Index and the range of services provided by the Department of Children and Families and other agencies.

Prerequisites & Notes

NULL

Credits: 3

SOWK 3413 - MENTAL HEALTH SYSTEMS & STRATEGIES

This social work course examines the concepts of "mental health" and "mental health disorders" from a risk and resilience framework. It studies the bio-psycho-social aspects of mental health challenges. The history of community mental health, as well as various aspects of assessment and service provision, will be studied. The role of the baccalaureate social worker in community and behavioral mental health will be explored using the generalist social work model.

Prerequisites & Notes

SOWK 2013

Credits: 3

SOWK 3303 - WRITING FOR SOCIAL WORK PRACTICE

This course prepares students to engage in effective written communication for generalist social work practice with systems of all sizes. Emphasis is placed on developing writing skills required to document services, develop assessments using ecosystems concepts, write reports for inter-professional communication, analyze problems, advocate for services, and utilize research to inform practice.

Prerequisites & Notes

ENGL 1113

Credits: 3

SOWK 4011 - PREPARATION FOR FIELD EDUCATION

This course introduces the purpose, requirements, and expectations of the field experience. Students review ethical responsibilities, professionalism, risk management, and culturally competent practice. Field site options are explored, agency interviews conducted, and agency placement is arranged by the end of the semester. This course also provides

an orientation to web-based Intern Placement Tracking program, the BSW field manual and related forms, including drafting of a Practicum Learning Contract.

Prerequisites & Notes

Admission to the BSW Program

Credits: 2

SOWK 4023 - PRACTICE WITH FAMILIES & GROUPS

This course is a continuation of SOWK 3133. Social work practice theories, methods, skills and values relevant to generalist practice with families and groups are emphasized. Therapeutic models used with individuals, families, and groups are assessed. Focus is on group and family assessment and interventions.

Prerequisites & Notes

SOWK 2013 ; Admission to BSW Program

Credits: 3

SOWK 4053 - RESEARCH METHODS

This course deals with the application of the scientific method of inquiry in application to theory and practice for the purpose of knowledge building and the development of best practice. The content of this course includes research design, quantitative and qualitative research methodologies, systematic evaluation of practice, and evaluation of theory. The focus is on the development of social research and practice with individuals, groups, organizations, and communities.

Prerequisites & Notes

PSYC 1133

Credits: 3

SOWK 4123 - PRACTICE WITH COMMUNITIES & ORGS

This course examines generalist practice theories, knowledge, values, methods, and skills for work with and in organizations, communities, and large social systems with special emphasis on social work with groups, organizations, and communities.

Prerequisites & Notes

SOWK 2013 ; Admission to BSW Program

Credits: 3

SOWK 4223 - INTGRTG FAITH & SCL WRK THEORY/PAC

This course will prepare students to integrate their faith dynamically and ethically with social work practice. The course will explore how diverse spiritual traditions impact and define clients' experiences and address the importance of

religion and spirituality as an integral aspect of addressing client needs. Students will be encouraged to develop spiritual practices to sustain their own callings and a personal understanding regarding how to integrate Christian thought, values, and principles with professional ethics and practice.

NULL

Credits: 3

Criminal Justice- 27 Credit Hours

POLS 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

CRIM 2203 - CRIMINAL JUSTICE SYSTEM

This course covers the origin, evolution, and daily operation of the criminal justice system in the United States. Relationships between law enforcement, the court system, and corrections are studied.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3203 - SOCIOLOGY OF POLICING

This course will cover the history, evolution and structure of policing in the United States. Popular innovations in policing and law enforcement will be emphasized. Special attention to conflicts and imperatives which define police officers' roles and the character of police work will be discussed along with careers and hiring practices by law enforcement agencies.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3303 - JUVENILE DELINQUENCY

This course covers the types of delinquency as well as supporting theories. Particular attention will be given to the role of family, school, and the peer group in promoting delinquency. The effects of social institutions on delinquency, prevention, and control are also studied. The juvenile justice system is compared to the adult system and the social consequences of delinquency are studied. This course will provide students with the tools to analyze and evaluate juvenile justice policies and programs.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3403 - AMERICAN CRIMINAL COURTS

This course examines the court system in the United States and provides an introduction to the many elements of the judicial process. Major topics include: the role of the courts, trial procedures, role of decision makers in the court system, the distinctions between civil and criminal systems, the alternatives available to the accused prior to trial proceedings, and public policy as it relates to the court system.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

CRIM 3503 - ETHICS IN CRIMINAL JUSTICE

This course is an examination of the historical and philosophical background of the field of ethics, specifically professional ethics in the criminal justice system. The curriculum includes an examination of ethical theories and the relationship and ethical dilemmas faced by professionals within the criminal justice system.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3603 - CORRECTIONS AND PUNISHMENT

This course is an introduction to the corrections system in the United States and will provide an overview of the history, current institutional practices, policies, and legal issues. There is an emphasis on contemporary conditions and alternatives to traditional responses to crime and an exploration of the principles and practices of correctional options afforded to offenders in various types of settings. Topics covered include incarceration, deterrence, rehabilitation, retribution, and system reform.

Prerequisites & Notes

CRIM 2203

Credits: 3

CRIM 4203 - THEORY AND CRIMINAL JUSTICE

This course provides an analysis of how crime affects society. Prevention and control of criminal behavior are based on theoretical models. Several of these models are examined as they relate to the day-to-day functions of the police, courts, and corrections.

Prerequisites & Notes

CRIM 2203

Credits: 3

CRIM 4303 - CRIMINAL JUSTICE SENIOR SEMINAR

This course is designed as the capstone learning experience for all Criminal Justice majors. The course will integrate activities into a comprehensive understanding of the integrative nature of the criminal justice system. Emphasis is on policy evaluation, career options, and member training for a criminal justice agency.

Prerequisites & Notes

Prerequisite: CRIM 3603

Credits: 3

Divine Design (Major Specific Experiential Learning)- 9 Credit Hours

SOWK 2021 - FIELD OBSERVATION

A course designed to provide students with exposure to various social service agencies and the populations they serve. Through observation, job shadowing, and supervised learning experiences, the student acquires knowledge about how social service agencies function, populations served, the roles and functions of social workers in the delivery of social services and how social problems are addressed at micro, mezzo, and macro levels. Students are required to serve a minimum of 40 hours for a one hour credit.

Prerequisites & Notes

Prerequisite: none; Corequisite: SOWK 2013

Credits: 1

SOWK 4114 - FIELD PRACTICUM & SEMINAR I

This practicum and seminar course provides students an educationally directed practicum, introducing the student to agency-based social work practice, as well as an opportunity to discuss practicum experiences with other students and to integrate theory with practice. The student completes 200 hours in a social service setting, engaging in direct social work practice, under the guidance of a professional social worker. The student begins to integrate theory and practice and demonstrates beginning social work practice behaviors, with the focus on professional growth and development. Students assess their field experiences, examine ethical issues, and demonstrate skills in understanding of agency structures and policies at the micro, mezzo, and macro levels.

Prerequisites & Notes

SOWK 4011 ; BSW Program Admission

Credits: 4

SOWK 4124 - PRACTICUM AND SEMINAR II

This course concentrates on practice related issues with a strengths based method of problem solving, providing students with an opportunity to discuss practicum experiences with other students, discuss issues related to practice and service delivery systems, integrate theory with practice, and apply research to practice. This course is a continuation of SOWK 4114, with the student completing an additional 200 hours in the same social work practicum agency. This

course provides continued experience in generalist social work practice under the supervision of a professional social worker.

Prerequisites & Notes

SOWK 4114 , Admission to BSW Program

Credits: 4

Divine Design - 9 Credits

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Certificate, Child Welfare

This certificate opportunity is designed for Southeastern University undergraduate and graduate social work students who desire to advance their knowledge and skills in child welfare practice. Students must complete the following requirements to qualify upon graduation:

- Students must take the two-child welfare courses offered at Southeastern University and earn a B or higher in both classes. Course offered: Child Welfare Practice- SOWK 3083 and Child Maltreatment and Child Welfare- SOWK 3183
- Students must be placed in a child welfare-related field placement for their 400-hour practicum during their senior year.
- Students must complete the certificate request process to receive the certificate.

Required Course Descriptions:

Child Welfare Practice -SOWK 3083

Provides a framework of values, knowledge, and skills necessary to practice with vulnerable children and their families. The major focus is on social work in public child welfare in the State of Florida. The course utilizes an ecosystem perspective for understanding and assessing the special needs of at-risk children and families. Specific attention is on assessing families and children using the State of Florida's Child Welfare Practice Model and other family assessment instruments.

Child Maltreatment and Child Welfare- SOWK 3183

Provides students with knowledge and skills related to the theory, research, and implications of child and adolescent maltreatment for child development and well-being. Course content is presented within the context of child welfare

practice and social work with children and adolescents in public agencies and programs. Issues related to children, families, and communities are covered and attention is given to working with ethnic minorities, women, LGBTQ, and persons with disabilities. Particular attention will be given to federal and state child welfare statutes including Chapter 39, Florida statutes, the Florida Administrative Code, the Child Maltreatment Index, and the range of services provided by the Department of Children and Families and other agencies.

Practicum Courses/400-hour practicum in a (child welfare-related placement) - SOWK 4114 and 4124.

Students who complete these courses will be provided instruction based on the following criteria in child welfare practice:

- Multidimensional assessment (including risk, safety, and family functioning assessments)
- Interviewing techniques (with a special focus on child interviewing)
- Historical issues and federal responses in child welfare
- Current child welfare policy
- Child development and attachment
- Child maltreatment and circumstances surrounding maltreatment
- Intervention planning and referral process (with a special focus on case planning)

Required Field Placement Options:

Students must be placed in a child welfare-related field placement for their 450-hour practicum during their senior year. The following agencies qualify as a child welfare-related field placement setting:

- Catholic Charities (Adoptions Unit)
- Child Advocacy Center
- Children's Home Society
- Department of Children and Families
- Devereux
- Florida Baptist Children's Home
- Heartland for Children
- Gulf Coast Jewish Family & Community Services
- One Hope United

Field placements are primarily located within the Department of Children and Families and Community-based Care Agencies, however, other agencies (as listed above) may qualify if the following guidelines are met:

- The agency must have a child welfare focus
- Opportunity to work directly with clients
- Opportunity to work in all phases of the child welfare process
- Opportunity to conduct an evaluation of child welfare practice
- Agency can provide an MSW supervisor possessing child welfare practice skills acquired through a minimum of two years post-master's experience for graduate placements, and a BSW or MSW supervisor possessing child welfare practice skills acquired through a minimum of two years post-graduation experience for undergraduate placements.

Certificate Request Process:

Students must complete the following application process to receive the child welfare certificate:

- Students must submit a certificate request form- see appendix
- Students must provide one reference letter from a child welfare-related contact
- Students must provide proof of their completion of hours at their child placement agency (copy of signed weekly field supervision hours may count)

Program Learning Outcomes:

1. Students will receive the necessary skills to identify various forms of maltreatment and the surrounding circumstances.
2. Students will acquire interviewing and information gathering techniques to conduct appropriate risk and safety assessments.
3. Students will receive the necessary knowledge and skills to effectively assess, participate in intervention planning and provide appropriate referrals for children and families known to the child welfare system.
4. Students will receive direct practice experience with an agency in the child welfare field.
5. Students will receive a Certificate in Child Welfare

Total Hours Required- 14 Hours

SOWK 4124 - PRACTICUM AND SEMINAR II

This course concentrates on practice related issues with a strengths based method of problem solving, providing students with an opportunity to discuss practicum experiences with other students, discuss issues related to practice and service delivery systems, integrate theory with practice, and apply research to practice. This course is a continuation of SOWK 4114, with the student completing an additional 200 hours in the same social work practicum agency. This course provides continued experience in generalist social work practice under the supervision of a professional social worker.

Minor Core- 9 Credit Hours

SOWK 2013 - INTRO TO SOCIAL WORK

This course is an examination of the fundamental knowledge, skill and attitudinal base of the social work profession. Included are philosophy, value base, ethical standards, early history, professional roles and functions, client systems, purposes served, fields of practice, professional organizations, and the current status of Social Work. An introductory exposure to generalist social work practice is provided.

Prerequisites & Notes

Prerequisite: None

Corequisite: SOWK 2021

Credits: 3

SOWK 2053 - HUMAN BEHAVIOR & SOCIAL ENVIRON I

This course focuses on skill development in assessing "person-in-environment" throughout the life cycle, utilizing ecological systems thinking. It is a foundation social work course that is aimed at helping students acquire basic knowledge of human functioning from a broad perspective. It is a study of the interaction of biological, psychological, sociological, cultural, spiritual, and systemic influences on human functioning.

Prerequisites & Notes

NULL

Credits: 3

SOWK 3123 - BUILDING EFFECTIVE HELPING SKILLS

This course introduces students to the basic interpersonal skills utilized in the helping process such as client engagement, empathic listening, reflecting feeling and meaning, clarifying, identifying and exploring problems, confrontation, and helping clients develop strategies to accomplish their goals from a strengths based perspective.

Prerequisites & Notes

NULL

Credits: 3

Choose one of the following:

SOWK 2063 - HUMAN BEHAVIOR & SOCIAL ENVIRON II

This course is an examination of human behavior in the macro social environment. This course focuses on the interfacing of individuals and families with communities, organizations, and groups. Issues related to cultural diversity, social and economic justice, and populations at risk are examined, as well as values and ethics in social work practice in the macro social environment.

Prerequisites & Notes

NULL

Credits: 3

SOWK 3033 - UNDERSTANDING HUMAN DIVERSITY

This course examines the complex nature of culture and personal identity, explores populations at-risk, and encourages students to understand and appreciate diversity. Specific knowledge of individual cultures, awareness of the patterns of oppression experienced by those cultures, and skills relevant to developing a culturally competent approach to working with diverse people groups are addressed.

Prerequisites & Notes

None

Credits: 3

SOWK 3093 - SOCIAL WELFARE POLICY

This course is an examination of policy practice focusing on creation and analysis of social welfare policy. An analytical approach to contemporary social welfare policy and current social welfare programs is emphasized, as is the critique of major social welfare policies and programs. Influencing policy formation at administrative, legislative, and judicial levels, and exploring the values and ethics of America's social welfare system are included.

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

CRIM 2203 - CRIMINAL JUSTICE SYSTEM

This course covers the origin, evolution, and daily operation of the criminal justice system in the United States. Relationships between law enforcement, the court system, and corrections are studied.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Socio-Historical Inquiry (3 credits) Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

Spring Semester

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

GENERAL ELECTIVE - 2 HR ELECTIVE

Select a 2 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 2

Bachelor of Science, Criminal Justice (Four-Year Plan)

Year One

Fall Semester

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

CRIM 2203 - CRIMINAL JUSTICE SYSTEM

This course covers the origin, evolution, and daily operation of the criminal justice system in the United States. Relationships between law enforcement, the court system, and corrections are studied.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Socio-Historical Inquiry (3 credits) Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Year Two

Fall Semester

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CRIM 2523 - VICTIMOLOGY

This course introduces the field of victimology and examines the relationships between the victim and the offender, the victim and society, and the victim within the criminal justice system. Theoretical explanations for victimization, along with the evolution of the victims' rights movement are studied. Policies and procedures that have resulted from increased attention towards victims of crime will be reviewed and discussed as they pertain to practical application.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3403 - AMERICAN CRIMINAL COURTS

This course examines the court system in the United States and provides an introduction to the many elements of the judicial process. Major topics include: the role of the courts, trial procedures, role of decision makers in the court system, the distinctions between civil and criminal systems, the alternatives available to the accused prior to trial proceedings, and public policy as it relates to the court system.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

Socio-Historical Inquiry (3 credits) Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

CRIM 3203 - SOCIOLOGY OF POLICING

This course will cover the history, evolution and structure of policing in the United States. Popular innovations in policing and law enforcement will be emphasized. Special attention to conflicts and imperatives which define police officers' roles and the character of police work will be discussed along with careers and hiring practices by law enforcement agencies.

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Bachelors of Science, Social Work & Criminal Justice (Four Year-Plan)

Year One

Fall Semester

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

CRIM 2203 - CRIMINAL JUSTICE SYSTEM

This course covers the origin, evolution, and daily operation of the criminal justice system in the United States. Relationships between law enforcement, the court system, and corrections are studied.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Socio-Historical Inquiry (3 credits) Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

SOWK 2013 - INTRO TO SOCIAL WORK

This course is an examination of the fundamental knowledge, skill and attitudinal base of the social work profession. Included are philosophy, value base, ethical standards, early history, professional roles and functions, client systems, purposes served, fields of practice, professional organizations, and the current status of Social Work. An introductory exposure to generalist social work practice is provided.

Prerequisites & Notes

Prerequisite: None

Corequisite: SOWK 2021

Credits: 3

SOWK 2021 - FIELD OBSERVATION

A course designed to provide students with exposure to various social service agencies and the populations they serve. Through observation, job shadowing, and supervised learning experiences, the student acquires knowledge about how social service agencies function, populations served, the roles and functions of social workers in the delivery of social services and how social problems are addressed at micro, mezzo, and macro levels. Students are required to serve a minimum of 40 hours for a one hour credit.

Prerequisites & Notes

Prerequisite: none; Corequisite: SOWK 2013

Credits: 1

Year Two

Fall Semester

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

SOWK 2053 - HUMAN BEHAVIOR & SOCIAL ENVIRON I

This course focuses on skill development in assessing "person-in-environment" throughout the life cycle, utilizing ecological systems thinking. It is a foundation social work course that is aimed at helping students acquire basic knowledge of human functioning from a broad perspective. It is a study of the interaction of biological, psychological, sociological, cultural, spiritual, and systemic influences on human functioning.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3503 - ETHICS IN CRIMINAL JUSTICE

This course is an examination of the historical and philosophical background of the field of ethics, specifically professional ethics in the criminal justice system. The curriculum includes an examination of ethical theories and the relationship and ethical dilemmas faced by professionals within the criminal justice system.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3403 - AMERICAN CRIMINAL COURTS

This course examines the court system in the United States and provides an introduction to the many elements of the judicial process. Major topics include: the role of the courts, trial procedures, role of decision makers in the court system, the distinctions between civil and criminal systems, the alternatives available to the accused prior to trial proceedings, and public policy as it relates to the court system.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

Socio-Historical Inquiry (3 credits) Select One:

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

SOWK 2063 - HUMAN BEHAVIOR & SOCIAL ENVIRON II

This course is an examination of human behavior in the macro social environment. This course focuses on the interfacing of individuals and families with communities, organizations, and groups. Issues related to cultural diversity, social and economic justice, and populations at risk are examined, as well as values and ethics in social work practice in the macro social environment.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3303 - JUVENILE DELINQUENCY

This course covers the types of delinquency as well as supporting theories. Particular attention will be given to the role of family, school, and the peer group in promoting delinquency. The effects of social institutions on delinquency, prevention, and control are also studied. The juvenile justice system is compared to the adult system and the social consequences of delinquency are studied. This course will provide students with the tools to analyze and evaluate juvenile justice policies and programs.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

SOWK 3123 - BUILDING EFFECTIVE HELPING SKILLS

This course introduces students to the basic interpersonal skills utilized in the helping process such as client engagement, empathic listening, reflecting feeling and meaning, clarifying, identifying and exploring problems, confrontation, and helping clients develop strategies to accomplish their goals from a strengths based perspective.

Prerequisites & Notes

NULL

Credits: 3

CRIM 3203 - SOCIOLOGY OF POLICING

This course will cover the history, evolution and structure of policing in the United States. Popular innovations in policing and law enforcement will be emphasized. Special attention to conflicts and imperatives which define police officers' roles and the character of police work will be discussed along with careers and hiring practices by law enforcement agencies.

Prerequisites & Notes

Prerequisite: CRIM 2203

Credits: 3

Year Three**Fall Semester****CRIM 3603 - CORRECTIONS AND PUNISHMENT**

This course is an introduction to the corrections system in the United States and will provide an overview of the history, current institutional practices, policies, and legal issues. There is an emphasis on contemporary conditions and alternatives to traditional responses to crime and an exploration of the principles and practices of correctional options afforded to offenders in various types of settings. Topics covered include incarceration, deterrence, rehabilitation, retribution, and system reform.

Prerequisites & Notes

CRIM 2203

Credits: 3

SOWK 3033 - UNDERSTANDING HUMAN DIVERSITY

This course examines the complex nature of culture and personal identity, explores populations at-risk, and encourages students to understand and appreciate diversity. Specific knowledge of individual cultures, awareness of the patterns of

oppression experienced by those cultures, and skills relevant to developing a culturally competent approach to working with diverse people groups are addressed.

Prerequisites & Notes

None

Credits: 3

SOWK 3133 - PRACTICE WITH INDIVIDUALS

This course is an examination of generalist social work practice, including practice skills related to the social work problem-solving process (relationship building, interviewing, contracting). It includes an exploration of social work ethics and values. Identification with the social work profession is encouraged. Social work with individuals and family systems is emphasized.

Prerequisites & Notes

SOWK 2013 , Admission to BSW Program

Credits: 3

SOWK 3303 - WRITING FOR SOCIAL WORK PRACTICE

This course prepares students to engage in effective written communication for generalist social work practice with systems of all sizes. Emphasis is placed on developing writing skills required to document services, develop assessments using ecosystems concepts, write reports for inter-professional communication, analyze problems, advocate for services, and utilize research to inform practice.

Prerequisites & Notes

ENGL 1113

Credits: 3

Spring Semester

CRIM 4203 - THEORY AND CRIMINAL JUSTICE

This course provides an analysis of how crime affects society. Prevention and control of criminal behavior are based on theoretical models. Several of these models are examined as they relate to the day-to-day functions of the police, courts, and corrections.

Prerequisites & Notes

CRIM 2203

Credits: 3

POLS 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

SOWK 3413 - MENTAL HEALTH SYSTEMS & STRATEGIES

This social work course examines the concepts of "mental health" and "mental health disorders" from a risk and resilience framework. It studies the bio-psycho-social aspects of mental health challenges. The history of community mental health, as well as various aspects of assessment and service provision, will be studied. The role of the baccalaureate social worker in community and behavioral mental health will be explored using the generalist social work model.

Prerequisites & Notes

SOWK 2013

Credits: 3

SOWK 3093 - SOCIAL WELFARE POLICY

This course is an examination of policy practice focusing on creation and analysis of social welfare policy. An analytical approach to contemporary social welfare policy and current social welfare programs is emphasized, as is the critique of major social welfare policies and programs. Influencing policy formation at administrative, legislative, and judicial levels, and exploring the values and ethics of America's social welfare system are included.

Prerequisites & Notes

SOWK 2013

Credits: 3

SOWK 4011 - PREPARATION FOR FIELD EDUCATION

This course introduces the purpose, requirements, and expectations of the field experience. Students review ethical responsibilities, professionalism, risk management, and culturally competent practice. Field site options are explored, agency interviews conducted, and agency placement is arranged by the end of the semester. This course also provides an orientation to web-based Intern Placement Tracking program, the BSW field manual and related forms, including drafting of a Practicum Learning Contract.

Prerequisites & Notes

Admission to the BSW Program

Credits: 2

SOWK 4023 - PRACTICE WITH FAMILIES & GROUPS

This course is a continuation of SOWK 3133. Social work practice theories, methods, skills and values relevant to generalist practice with families and groups are emphasized. Therapeutic models used with individuals, families, and groups are assessed. Focus is on group and family assessment and interventions.

Prerequisites & Notes

SOWK 2013 ; Admission to BSW Program

Note: Cannot register for if PSYC 2343 or PSYC 2353 has already been taken

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Socio-Historical Inquiry - Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Year Three

FALL SEMESTER - 16 CREDIT HOURS

CSDS 3003 - MULTICULTURAL ASPECTS OF COMM.

This course will provide a framework designed to help students understand the relationship between culture and communication through both sociological and Biblical perspectives. Students will examine the impact these variables have on clinical service provision to clients from various cultural and linguistic backgrounds.

Prerequisites & Notes

NULL

Credits: 3

CSDS 3203 - AUDIOLOGY AND AURAL REHABILITATION

This course is an introduction to audiology and aural rehabilitation. Basic audiological evaluation, interpretation of evaluative data, and the impact of hearing disorders on all aspects of communication across the lifespan will be addressed.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

GENERAL ELECTIVE - 1 HR ELECTIVE

Select a 1 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 1

SPRING SEMESTER - 15 CREDIT HOURS

CSDS 3033 - LANGUAGE DISORDERS & INTERVENTIONS

This course focuses on oral and written language acquisition and development, as well as the nature of delayed or disordered language from birth to adolescence. Emphasis is placed on diagnosis and clinical management within the components of language, phonology, morphology, syntax, semantics, and pragmatics.

Prerequisites & Notes

NULL

Credits: 3

CSDS 3073 - FLUENCY & VOICE DISORDERS

This course explores typical and atypical development with oral fluency and voice disorders. The course explores causes of acquired fluency and voice disorders. Students will be introduced to treatments for fluency and voice disorders.

Prerequisites & Notes

NULL

Credits: 3

CSDS 3083 - FAITH INTEGRATION IN CSD

This course is designed to engage students in critical thought and reflection as they apply the tenets of their faith into the formation of thought and practice in their chosen vocation, including working with those with disabilities.

Prerequisites & Notes

NULL

Credits: 3

CSDS 4023 - CLINICAL METHODS

This course explores clinical procedures utilized within the field of communication sciences and disorders. Students will be instructed in clinical setting types, service delivery models, utilization of screening, diagnostic and therapeutic techniques, clinical writing and guided clinical observation.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Year Four

FALL SEMESTER - 15 CREDIT HOURS

CHEM 1213 - INTRO TO CHEMISTRY

This course is an introduction to basic concepts of general chemistry, introduction of periodic properties of elements and compounds, basic atomic-molecular structure, and properties of substances and reactions related to gas laws.

Prerequisites & Notes

Corequisite: CHEM 121L

Credits: 3

CSDS 4053 - NEUROLOGY OF COMM. DISORDERS

This course is an introduction to speech and language disorders resulting from disease and/or injury to the peripheral and central nervous system. Communication disorders such as aphasia, apraxia, dysarthria, dementia, and cognitive communication disorders will be discussed.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

SPRING SEMESTER - 15 CREDIT HOURS

CSDS 4033 - LANGUAGE & LITERACY

This course explores the influence of language disorders on the development of literacy. The course will apply knowledge of language disorders to the essential components of literacy (oral language, phonemic awareness, phonics, reading fluency, vocabulary, comprehension strategies, and written language).

Prerequisites & Notes

NULL

Credits: 3

CSDS 4043 - CLINICAL PRACTICUM

This course provides clinical research and field work within settings related to communication sciences and disorders. Placements will provide experiences in the implementation of preventative and therapeutic services supporting speech, language, and hearing. Settings vary.

Prerequisites & Notes

Prerequisite: Must be a senior and approval granted by the program coordinator.

Credits: 3

Bachelor of Science, Early Childhood Education

Bachelor of Science, Early Childhood Education Four Year Plan

The Bachelor of Science in Early Childhood Education at Southeastern University equips driven students to work with young children in academic settings (pre-kindergarten through 3rd grade). Through hands-on coursework and a student-teaching internship, you'll be prepared to earn several professional certificates, enabling you to teach in public or private/Christian school settings. These include the Florida Department of Education (FLDOE) professional certification in the subject area of pre-K/primary; FLDOE endorsements in both reading and English for speakers of other languages (ESOL); and certifications from the Florida League of Christian Schools (FLOCS) and Association of Christian Schools International (ACSI).

State Approval/Reciprocity

All teacher education programs have met requirements for Florida State Approved Programs.

Students who plan to teach in Florida schools must file an application with the Office of Teacher Certification for the State of Florida and complete the post-degree requirements for the teaching credential.

Students graduating from Florida state-approved teacher certification programs are currently eligible for initial certification to teach in all members of the National Association of State Directors of Teacher Education and Certification (NASDTEC), an interstate reciprocity contract allowing certified teachers to obtain teaching jobs in other states and territories. An applicant's eligibility for certification according to the interstate agreement contract will be determined after the application for a Florida teaching certificate is on file in the Teacher Certification Office. For more information on state-specific certification requirements [click here](#).

Total Program Hours- 120 Credit Hours

Foundational Core- 34 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation- 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work

together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credit Hours

Discursive Inquiry- 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry (6 credits):

EDUC 2233 - EDUCATIONAL PSYCHOLOGY

This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.

Prerequisites & Notes

None

Credits: 3

Choose one of the following:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 45 Credit Hours

EDUC 2143 - FOUNDATIONS OF EDUCATION & INSTRUCTIONAL DESIGN

This course is a study of the nature and character of American education and how it has been influenced by our social structure, social values, and history. The course includes an introduction to subject area competencies, professional skills and competencies, benchmarks for the pre-professional level of accomplished practices for teachers, and the Code of Ethics and Professional Conduct. Students will learn the principles of effective instructional design and

delivery in the PreK-12 setting and gain practice in writing Florida standards-based lesson plans that include differentiated instruction and assessment.

Prerequisites & Notes

None

Credits: 3

ECED 2433 - DEVELOPMENT OF THE YOUNG CHILD

This course provides an in-depth understanding of the development aspects of the young child from conception to age eight. The course also examines implications for curriculum.

Prerequisites & Notes

None

Credits: 3

EDUC 3713 - FAITH INTEGRATION IN EDUCATION

This course is designed to assist educators in effectively and legally integrating their Christian faith into school and classroom settings.

Prerequisites & Notes

None

Credits: 3

EDUC 3493 - LITERACY FOUNDATIONS 1: THE SCIENCE OF READING

This course is a study of scientific theory and effective approaches for reading instruction, focusing on reading as the interactive weaving of word recognition and language comprehension. The essential components of literacy are studied: oral language, phonological awareness, phonics, fluency, vocabulary, and comprehension. Characteristics of proficient readers, striving readers, and readers with dyslexia are examined along with practices for differentiating reading instruction.

Prerequisites & Notes

None

Credits: 3

EDUC 3353 - EMPOWERING ESOL TEACHERS

This course is an overview of curriculum, instructional methods and materials, testing and evaluation, and cross-cultural communication processes and linguistic principles as related to instructing English Language Learners (ELLs) in the PreK-12 classroom.

Prerequisites & Notes

None

Credits: 3

ESED 3113 - SURVEY OF THE EXCEPTIONAL LEARNER

This is a required course for certification in all Education programs, including Music Education. This is an introductory course that examines the history, characteristics, and issues in exceptional education. The course covers all areas of exceptionality and their manifestations from early childhood through adulthood. It is designed to provide students with a firm grounding in the foundations of special education and expose them to the reconstruction of the field, in order that they may better deal with new and ever-changing developments. In addition to classroom meetings, a minimum of 10 hours of observation/participation in a clinical setting is required. This course is recommended to be taken prior to any other Exceptional Student Education courses.

Prerequisites & Notes

None

Credits: 3

EDUC 3503 - INSTRUCTIONAL TECHNOLOGY

This course is designed to develop skills and techniques needed for the selection, utilization, and production of classroom instructional materials and for application and integration of educational technology and media to all areas of the curriculum, appropriate to PreK-12 students' developmental level.

Prerequisites & Notes

None

Credits: 3

EDUC 3233 - LITERACY FOUNDATIONS 2: LANGUAGE ARTS & LITERATURE

This course focuses on the educational levels and needs of all students, including exceptional, culturally and/or linguistically diverse, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and curriculum-based assessments are included. Use of test results in program planning is emphasized.

Prerequisites & Notes

None

Credits: 3

ECED 3173 - METHODS OF TEACHING PREK-3 MATH

In this course, emphasis is on teaching mathematics in PreK-3 classrooms through the use of appropriate methods, materials, and evaluation techniques. Current issues, strategies, and trends in mathematics are reviewed. Integrated field experiences are included.

Prerequisites & Notes

None

Credits: 3

EDUC 3423 - DIAGNOSIS, ASSESSMENT, & EVALUATION OF READING

This course highlights formal and informal means of evaluations with emphasis on diagnosing reading ability, prescribing for instruction, administering assessment, interpreting measurement terms and data, and maintaining records.

Prerequisites & Notes

EDUC 2143 and EDUC 3493

Credits: 3

EDUC 3133 - ASSESSMENT OF LEARNERS

This course focuses on the educational levels and needs of all students, including exceptional, culturally and/or linguistically diverse, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and curriculum-based assessments are included. Use of test results in program planning is emphasized.

Prerequisites & Notes

None

Credits: 3

EDUC 3523 - TEACHING LITERACY IN CONTENT AREAS

This course will provide students with strategies and tools for becoming a facilitating and reflective practitioner, teaching reading across content areas, and helping students discover that content area learning is made richer when reading, writing, speaking, and listening are taught together. Particular emphasis is placed on a balanced approach to reading, specific reading and comprehension strategies for content reading, the role of reflection in helping students to think critically, reading for diverse students, and the use of appropriate texts and media.

Prerequisites & Notes

None

Credits: 3

ECED 4123 - CLASSROOM & BEHAVIOR MANAGEMENT - EARLY CHILDHOOD

This course is designed to help in the identification of developmentally-appropriate models and strategies for guiding, disciplining, and managing children's behavior. Included are methods for developing intrinsic motivation in children and conflict resolution among children. During the course, students will identify environmental influences on the behaviors of young children from all cultures and familial situations by utilizing research-based best practices in education.

Prerequisites & Notes

None

Credits: 3

ECED 4423 - METHODS OF TEACHING PREK-3 SCIENCE

This course helps students master basic science concepts and skills represented in four domains: Science Knowledge, Science Process Skills and Creative Thinking, Attitudes and Values in Science, and Science Applications and Technology. The Florida Next Generation Standards for Science for grades PreK-3 form the core content for the course. Emphasis is placed on several methods and strategies for instruction, including direct instruction, concept

attainment, inquiry method, and project-based instruction. Scientific demonstrations and hands-on activities are included.

Prerequisites & Notes

None

Credits: 3

EDUC 4043 - APPLIED LINGUISTICS

This course is a practical approach to teaching English to speakers of other languages. The course includes topics such as general linguistics, language theory, principles of language acquisition, and techniques for teaching and assessing K-12 ELL students. Special attention is given to the linguistic components of English, namely phonology, morphology, semantics, syntax, discourse, and pragmatics.

Prerequisites & Notes

None

Credits: 3

Divine Design (Major Specific Experiential Learning)- 15 Credit Hours

ECED 2131 - FIELD STUDY I

In this course, students will be placed in a PreK-3 setting in area public and private schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe PreK-3 settings (approximately 30 hours) and participate in low-level classroom tasks. The College of Education will work cooperatively with schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the General Knowledge Test (GKT) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 3

ECED 3351 - FIELD STUDY 2

In this course, students will be placed in a PreK-3 setting to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the PreK-3 setting (approximately 45 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with area schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Professional Education Test (PEd) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

ECED 4221 - FIELD STUDY 3

In this course, students will be placed in a PreK-3 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the PreK-3 setting (approximately 60 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with local schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Subject Area Exam (SAE) for their major and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

ECED 4912 - STUDENT TEACHING

This course provides five seminar-style opportunities for student teachers to examine the experiences they are concurrently having in the full-time student internship in the PreK-3 setting. Seminars are designed to respond to the immediate needs of the student teachers and offer support, encouragement, and insights into the teaching process and profession. Guest speakers will play an important role in enriching the program and providing first-hand experiences from the classroom and administrative levels.

Prerequisites & Notes

Attempt all required portions of the FTCE

Credits: 12

Divine Design - 26 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Bachelor of Science, Early Childhood Education Four Year Plan

Year One

Fall Semester

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Creative-Aesthetic Inquiry (3 Credit Hours) - Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

EDUC 2143 - FOUNDATIONS OF EDUCATION & INSTRUCTIONAL DESIGN

This course is a study of the nature and character of American education and how it has been influenced by our social structure, social values, and history. The course includes an introduction to subject area competencies, professional skills and competencies, benchmarks for the pre-professional level of accomplished practices for teachers, and the Code of Ethics and Professional Conduct. Students will learn the principles of effective instructional design and delivery in the PreK-12 setting and gain practice in writing Florida standards-based lesson plans that include differentiated instruction and assessment.

Prerequisites & Notes

None

Credits: 3

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Year Two

Fall Semester

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

EDUC 3353 - EMPOWERING ESOL TEACHERS

This course is an overview of curriculum, instructional methods and materials, testing and evaluation, and cross-cultural communication processes and linguistic principles as related to instructing English Language Learners (ELLs) in the PreK-12 classroom.

Prerequisites & Notes

None

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

EDUC 3493 - LITERACY FOUNDATIONS 1: THE SCIENCE OF READING

This course is a study of scientific theory and effective approaches for reading instruction, focusing on reading as the interactive weaving of word recognition and language comprehension. The essential components of literacy are studied: oral language, phonological awareness, phonics, fluency, vocabulary, and comprehension. Characteristics of

proficient readers, striving readers, and readers with dyslexia are examined along with practices for differentiating reading instruction.

Prerequisites & Notes

None

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Spring Semester

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

EDUC 3233 - LITERACY FOUNDATIONS 2: LANGUAGE ARTS & LITERATURE

This course focuses on the educational levels and needs of all students, including exceptional, culturally and/or linguistically diverse, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and curriculum-based assessments are included. Use of test results in program planning is emphasized.

Prerequisites & Notes

None

Credits: 3

EDUC 3713 - FAITH INTEGRATION IN EDUCATION

This course is designed to assist educators in effectively and legally integrating their Christian faith into school and classroom settings.

Prerequisites & Notes

None

Credits: 3

ECED 3351 - FIELD STUDY 2

In this course, students will be placed in a PreK-3 setting to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the PreK-3 setting (approximately 45 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with area schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Professional Education Test (PEd) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Year Three

Fall Semester

ECED 4423 - METHODS OF TEACHING PREK-3 SCIENCE

This course helps students master basic science concepts and skills represented in four domains: Science Knowledge, Science Process Skills and Creative Thinking, Attitudes and Values in Science, and Science Applications and Technology. The Florida Next Generation Standards for Science for grades PreK-3 form the core content for the

course. Emphasis is placed on several methods and strategies for instruction, including direct instruction, concept attainment, inquiry method, and project-based instruction. Scientific demonstrations and hands-on activities are included.

Prerequisites & Notes

None

Credits: 3

EDUC 3133 - ASSESSMENT OF LEARNERS

This course focuses on the educational levels and needs of all students, including exceptional, culturally and/or linguistically diverse, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and curriculum-based assessments are included. Use of test results in program planning is emphasized.

Prerequisites & Notes

None

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

EDUC 3423 - DIAGNOSIS, ASSESSMENT, & EVALUATION OF READING

This course highlights formal and informal means of evaluations with emphasis on diagnosing reading ability, prescribing for instruction, administering assessment, interpreting measurement terms and data, and maintaining records.

Prerequisites & Notes

EDUC 2143 and EDUC 3493

Credits: 3

Spring Semester

ECED 3173 - METHODS OF TEACHING PREK-3 MATH

In this course, emphasis is on teaching mathematics in PreK-3 classrooms through the use of appropriate methods, materials, and evaluation techniques. Current issues, strategies, and trends in mathematics are reviewed. Integrated

field experiences are included.

Prerequisites & Notes

None

Credits: 3

ECED 4221 - FIELD STUDY 3

In this course, students will be placed in a PreK-3 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the PreK-3 setting (approximately 60 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with local schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Subject Area Exam (SAE) for their major and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

ESED 3113 - SURVEY OF THE EXCEPTIONAL LEARNER

This is a required course for certification in all Education programs, including Music Education. This is an introductory course that examines the history, characteristics, and issues in exceptional education. The course covers all areas of exceptionality and their manifestations from early childhood through adulthood. It is designed to provide students with a firm grounding in the foundations of special education and expose them to the reconstruction of the field, in order that they may better deal with new and ever-changing developments. In addition to classroom meetings, a minimum of 10 hours of observation/participation in a clinical setting is required. This course is recommended to be taken prior to any other Exceptional Student Education courses.

Prerequisites & Notes

None

Credits: 3

ECED 2433 - DEVELOPMENT OF THE YOUNG CHILD

This course provides an in-depth understanding of the development aspects of the young child from conception to age eight. The course also examines implications for curriculum.

Prerequisites & Notes

None

Credits: 3

GENERAL ELECTIVE - 2 HR ELECTIVE

Select a 2 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 2

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Year Four

Fall Semester

EDUC 4043 - APPLIED LINGUISTICS

This course is a practical approach to teaching English to speakers of other languages. The course includes topics such as general linguistics, language theory, principles of language acquisition, and techniques for teaching and assessing K-12 ELL students. Special attention is given to the linguistic components of English, namely phonology, morphology, semantics, syntax, discourse, and pragmatics.

Prerequisites & Notes

None

Credits: 3

EDUC 3523 - TEACHING LITERACY IN CONTENT AREAS

This course will provide students with strategies and tools for becoming a facilitating and reflective practitioner, teaching reading across content areas, and helping students discover that content area learning is made richer when reading, writing, speaking, and listening are taught together. Particular emphasis is placed on a balanced approach to reading, specific reading and comprehension strategies for content reading, the role of reflection in helping students to think critically, reading for diverse students, and the use of appropriate texts and media.

Prerequisites & Notes

None

Credits: 3

ECED 4123 - CLASSROOM & BEHAVIOR MANAGEMENT - EARLY CHILDHOOD

This course is designed to help in the identification of developmentally-appropriate models and strategies for guiding, disciplining, and managing children's behavior. Included are methods for developing intrinsic motivation in children and conflict resolution among children. During the course, students will identify environmental influences on the behaviors of young children from all cultures and familial situations by utilizing research-based best practices in education.

Prerequisites & Notes

None

Credits: 3

EDUC 3503 - INSTRUCTIONAL TECHNOLOGY

This course is designed to develop skills and techniques needed for the selection, utilization, and production of classroom instructional materials and for application and integration of educational technology and media to all areas of the curriculum, appropriate to PreK-12 students' developmental level.

Prerequisites & Notes

None

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Spring Semester

ECED 4912 - STUDENT TEACHING

This course provides five seminar-style opportunities for student teachers to examine the experiences they are concurrently having in the full-time student internship in the PreK-3 setting. Seminars are designed to respond to the immediate needs of the student teachers and offer support, encouragement, and insights into the teaching process and profession. Guest speakers will play an important role in enriching the program and providing first-hand experiences from the classroom and administrative levels.

Prerequisites & Notes

Attempt all required portions of the FTCE

Credits: 12

Bachelor of Science, Elementary Education

Bachelor of Science, Elementary Education Four-Year Plan

The Bachelor of Science in Elementary Education at Southeastern University equips students to manage, teach, and assess learners of different ages and learning styles. Through hands-on coursework, ongoing field studies, and a student-teaching internship, you'll be prepared to step into your career with confidence. You'll also gain a strong foundation of historical perspectives, theory, and teaching methods from professors with decades of experience in the classroom, who are committed to helping you navigate today's schools as a Christian professional.

Become state certified, as well as FLOCS- and ACSI-certified (national and international).

State Approval/Reciprocity

All teacher education programs have met requirements for Florida State Approved Programs.

Students who plan to teach in Florida schools must file an application with the Office of Teacher Certification for the State of Florida and complete the post-degree requirements for the teaching credential.

Students graduating from Florida state-approved teacher certification programs are currently eligible for initial certification to teach in all members of the National Association of State Directors of Teacher Education and Certification (NASDTEC), an interstate reciprocity contract allowing certified teachers to obtain teaching jobs in other states and territories. An applicant's eligibility for certification according to the interstate agreement contract will be determined after the application for a Florida teaching certificate is on file in the Teacher Certification Office. For more information on state-specific certification requirements [click here](#).

Total Program Hours- 120 Credit Hours

Foundational Core- 34 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:
CORE 1111

Credits: 2

Worldview Formation- 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credit Hours

Discursive Inquiry- 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry (6 credits):

EDUC 2233 - EDUCATIONAL PSYCHOLOGY

This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.

Prerequisites & Notes

None

Credits: 3

Choose one of the following:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 45 Credit Hours

EDUC 2143 - FOUNDATIONS OF EDUCATION & INSTRUCTIONAL DESIGN

This course is a study of the nature and character of American education and how it has been influenced by our social structure, social values, and history. The course includes an introduction to subject area competencies, professional skills and competencies, benchmarks for the pre-professional level of accomplished practices for teachers, and the Code of Ethics and Professional Conduct. Students will learn the principles of effective instructional design and delivery in the PreK-12 setting and gain practice in writing Florida standards-based lesson plans that include differentiated instruction and assessment.

Prerequisites & Notes

This course is designed to help students master basic science concepts and skills represented in four domains: Science Knowledge, Science Process Skills and Creative Thinking, Attitudes and Values in Science, and Science Applications and Technology. The Florida Next Generation Standards for grades K-6 form the core content for the course. Emphasis is placed on several methods and strategies for instruction, including direct instruction, concept attainment, inquiry method, and project-based instruction. Scientific demonstrations and hands-on activities are included.

Prerequisites & Notes

None

Credits: 3

ELED 4333 - CLASSROOM & BEHAVIOR MANAGEMENT - ELEMENTARY

This course is the study of models and strategies of behavior management appropriate for specific populations of students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, conflict resolution, culture, and demographics. The course includes methodology for managing a learning environment utilizing research-based best practices in education.

Prerequisites & Notes

None

Credits: 3

EDUC 4043 - APPLIED LINGUISTICS

This course is a practical approach to teaching English to speakers of other languages. The course includes topics such as general linguistics, language theory, principles of language acquisition, and techniques for teaching and assessing K-12 ELL students. Special attention is given to the linguistic components of English, namely phonology, morphology, semantics, syntax, discourse, and pragmatics.

Prerequisites & Notes

Divine Design (Major Specific Experiential Learning)- 15 Credit Hours

EDUC 2131 - FIELD STUDY 1

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe K-12 settings (approximately 30 hours) and participate in low-level classroom tasks. The College of Education will work cooperatively with schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the General Knowledge Test (GKT) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

EDUC 3351 - FIELD STUDY 2

In this course, students will be placed in a K-12 setting to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the K-12 setting (approximately 45 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with area schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Professional Education Test (PEd) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

EDUC 4221 - FIELD STUDY 3

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the K-12 setting (approximately 60 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with local schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Subject Area Exam (SAE) for their major and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

EDUC 4912 - STUDENT TEACHING

This course provides five seminar-style opportunities for student teachers to examine the experiences they are concurrently having in the full-time student internship in the PreK-12 setting. Seminars are designed to respond to the immediate needs of the student teachers and offer support, encouragement, and insights into the teaching process and profession. Guest speakers will play an important role in enriching the program and providing first-hand experiences from the classroom and administrative levels.

Prerequisites & Notes

Attempt all required portions of the FTCE

Credits: 12

Divine Design - 26 Credits

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums.

Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Bachelor of Science, Elementary Education Four-Year Plan

Year One

Fall Semester

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Select One of the Following - 3 Credit Hours

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

EDUC 2143 - FOUNDATIONS OF EDUCATION & INSTRUCTIONAL DESIGN

This course is a study of the nature and character of American education and how it has been influenced by our social structure, social values, and history. The course includes an introduction to subject area competencies, professional skills and competencies, benchmarks for the pre-professional level of accomplished practices for teachers, and the Code of Ethics and Professional Conduct. Students will learn the principles of effective instructional design and delivery in the PreK-12 setting and gain practice in writing Florida standards-based lesson plans that include differentiated instruction and assessment.

Prerequisites & Notes

None

Credits: 3

EDUC 2233 - EDUCATIONAL PSYCHOLOGY

This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.

Prerequisites & Notes

None

Credits: 3

EDUC 2131 - FIELD STUDY 1

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe K-12 settings (approximately 30 hours) and participate in low-level classroom tasks. The College of Education will work cooperatively with schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the General Knowledge Test (GKT) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Year Two

Fall Semester

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

EDUC 3493 - LITERACY FOUNDATIONS 1: THE SCIENCE OF READING

This course is a study of scientific theory and effective approaches for reading instruction, focusing on reading as the interactive weaving of word recognition and language comprehension. The essential components of literacy are studied: oral language, phonological awareness, phonics, fluency, vocabulary, and comprehension. Characteristics of proficient readers, striving readers, and readers with dyslexia are examined along with practices for differentiating reading instruction.

Prerequisites & Notes

None

Credits: 3

EDUC 3353 - EMPOWERING ESOL TEACHERS

This course is an overview of curriculum, instructional methods and materials, testing and evaluation, and cross-cultural communication processes and linguistic principles as related to instructing English Language Learners (ELLs) in the PreK-12 classroom.

Prerequisites & Notes

None

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Spring Semester

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

EDUC 3233 - LITERACY FOUNDATIONS 2: LANGUAGE ARTS & LITERATURE

This course focuses on the educational levels and needs of all students, including exceptional, culturally and/or linguistically diverse, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and curriculum-based assessments are included. Use of test results in program planning is emphasized.

Prerequisites & Notes

None

Credits: 3

EDUC 3713 - FAITH INTEGRATION IN EDUCATION

This course is designed to assist educators in effectively and legally integrating their Christian faith into school and classroom settings.

Prerequisites & Notes

None

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

EDUC 3351 - FIELD STUDY 2

In this course, students will be placed in a K-12 setting to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the K-12 setting (approximately 45 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with area schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Professional Education Test (PEd) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

Year Three

Fall Semester

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

ELED 4423 - METHODS OF TEACHING ELEMENTARY SCIENCE

This course is designed to help students master basic science concepts and skills represented in four domains: Science Knowledge, Science Process Skills and Creative Thinking, Attitudes and Values in Science, and Science Applications and Technology. The Florida Next Generation Standards for grades K-6 form the core content for the course. Emphasis is placed on several methods and strategies for instruction, including direct instruction, concept attainment, inquiry method, and project-based instruction. Scientific demonstrations and hands-on activities are included.

Prerequisites & Notes

None

Credits: 3

EDUC 3133 - ASSESSMENT OF LEARNERS

This course focuses on the educational levels and needs of all students, including exceptional, culturally and/or linguistically diverse, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and curriculum-based assessments are included. Use of test results in program planning is emphasized.

Prerequisites & Notes

None

Credits: 3

EDUC 3423 - DIAGNOSIS, ASSESSMENT, & EVALUATION OF READING

This course highlights formal and informal means of evaluations with emphasis on diagnosing reading ability, prescribing for instruction, administering assessment, interpreting measurement terms and data, and maintaining records.

Prerequisites & Notes

EDUC 2143 and EDUC 3493

Credits: 3

Spring Semester

ESED 3113 - SURVEY OF THE EXCEPTIONAL LEARNER

This is a required course for certification in all Education programs, including Music Education. This is an introductory course that examines the history, characteristics, and issues in exceptional education. The course covers all areas of exceptionality and their manifestations from early childhood through adulthood. It is designed to provide students with a firm grounding in the foundations of special education and expose them to the reconstruction of the field, in order that they may better deal with new and ever-changing developments. In addition to classroom meetings, a minimum of 10 hours of observation/participation in a clinical setting is required. This course is recommended to be taken prior to any other Exceptional Student Education courses.

Prerequisites & Notes

None

Credits: 3

ELED 3153 - METHODS OF TEACHING ELEMENTARY SOCIAL STUDIES

In this course, emphasis is placed on helping prospective teachers acquire background and skills in developing instructional methods, developmentally appropriate materials, content and evaluation procedures for teaching meaningful social studies to elementary students who bring a variety of cultural and instructional needs to the classroom.

Prerequisites & Notes

None

Credits: 3

ELED 3173 - METHODS OF TEACHING ELEMENTARY MATH

In this course, emphasis is on teaching mathematics in elementary schools through the use of appropriate methods, materials, and evaluation techniques. Current issues, strategies, and trends in mathematics are reviewed. Integrated field experiences are included.

Prerequisites & Notes

None

Credits: 3

EDUC 4221 - FIELD STUDY 3

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the K-12 setting (approximately 60 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with local schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Subject Area Exam (SAE) for their major and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Year Four

Fall Semester

ELED 4333 - CLASSROOM & BEHAVIOR MANAGEMENT - ELEMENTARY

This course is the study of models and strategies of behavior management appropriate for specific populations of students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, conflict resolution, culture, and demographics. The course includes methodology for managing a learning environment utilizing research-based best practices in education.

Prerequisites & Notes

None

Credits: 3

EDUC 4043 - APPLIED LINGUISTICS

This course is a practical approach to teaching English to speakers of other languages. The course includes topics such as general linguistics, language theory, principles of language acquisition, and techniques for teaching and assessing K-12 ELL students. Special attention is given to the linguistic components of English, namely phonology, morphology,

semantics, syntax, discourse, and pragmatics.

Prerequisites & Notes

None

Credits: 3

EDUC 3523 - TEACHING LITERACY IN CONTENT AREAS

This course will provide students with strategies and tools for becoming a facilitating and reflective practitioner, teaching reading across content areas, and helping students discover that content area learning is made richer when reading, writing, speaking, and listening are taught together. Particular emphasis is placed on a balanced approach to reading, specific reading and comprehension strategies for content reading, the role of reflection in helping students to think critically, reading for diverse students, and the use of appropriate texts and media.

Prerequisites & Notes

None

Credits: 3

EDUC 3503 - INSTRUCTIONAL TECHNOLOGY

This course is designed to develop skills and techniques needed for the selection, utilization, and production of classroom instructional materials and for application and integration of educational technology and media to all areas of the curriculum, appropriate to PreK-12 students' developmental level.

Prerequisites & Notes

None

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

EDUC 4912 - STUDENT TEACHING

This course provides five seminar-style opportunities for student teachers to examine the experiences they are concurrently having in the full-time student internship in the PreK-12 setting. Seminars are designed to respond to the immediate needs of the student teachers and offer support, encouragement, and insights into the teaching process and profession. Guest speakers will play an important role in enriching the program and providing first-hand experiences from the classroom and administrative levels.

Prerequisites & Notes

Attempt all required portions of the FTCE

Credits: 12

Bachelor of Science, Exceptional Student Education 4/1 (Undergrad/Masters)

Bachelor of Science & Masters of Education., Exceptional Student Education - 5 Year Plan

The Bachelor of Science/Master of Education in Exceptional Student Education (4+1) at Southeastern University equips students to become highly qualified and sought-after teachers in a variety of educational settings. Through the Florida state-approved 4+1 program, you'll graduate with both an undergraduate and graduate degree in education, become certified in multiple areas (exceptional student education, elementary education, and a secondary education content area of your choice), and acquire endorsements in several specialty areas (reading, autism, and English for Speakers of Other Languages). In addition to gaining four semesters of hands-on field experience, you'll learn research-based classroom techniques for teaching special-needs children with disabling conditions. Your final semester will be rounded out with full-time teaching in a local partner school, where you'll make valuable connections in the community and prepare to lead your own classroom.

Total Program Hours- 154 Credit Hours

Foundational Core- 34 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

EDUC 3713 - FAITH INTEGRATION IN EDUCATION

This course is designed to assist educators in effectively and legally integrating their Christian faith into school and classroom settings.

Prerequisites & Notes

None

Credits: 3

EDUC 3493 - LITERACY FOUNDATIONS 1: THE SCIENCE OF READING

This course is a study of scientific theory and effective approaches for reading instruction, focusing on reading as the interactive weaving of word recognition and language comprehension. The essential components of literacy are studied: oral language, phonological awareness, phonics, fluency, vocabulary, and comprehension. Characteristics of proficient readers, striving readers, and readers with dyslexia are examined along with practices for differentiating reading instruction.

Prerequisites & Notes

None

Credits: 3

EDUC 3353 - EMPOWERING ESOL TEACHERS

This course is an overview of curriculum, instructional methods and materials, testing and evaluation, and cross-cultural communication processes and linguistic principles as related to instructing English Language Learners (ELLs) in the PreK-12 classroom.

Prerequisites & Notes

None

Credits: 3

ESED 3113 - SURVEY OF THE EXCEPTIONAL LEARNER

This is a required course for certification in all Education programs, including Music Education. This is an introductory course that examines the history, characteristics, and issues in exceptional education. The course covers all areas of exceptionality and their manifestations from early childhood through adulthood. It is designed to provide students with a firm grounding in the foundations of special education and expose them to the reconstruction of the field, in order that they may better deal with new and ever-changing developments. In addition to classroom meetings, a minimum of 10 hours of observation/participation in a clinical setting is required. This course is recommended to be taken prior to any other Exceptional Student Education courses.

Prerequisites & Notes

None

Credits: 3

EDUC 3503 - INSTRUCTIONAL TECHNOLOGY

This course is designed to develop skills and techniques needed for the selection, utilization, and production of classroom instructional materials and for application and integration of educational technology and media to all areas of the curriculum, appropriate to PreK-12 students' developmental level.

Prerequisites & Notes

None

Credits: 3

EDUC 3233 - LITERACY FOUNDATIONS 2: LANGUAGE ARTS & LITERATURE

This course focuses on the educational levels and needs of all students, including exceptional, culturally and/or linguistically diverse, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and

curriculum-based assessments are included. Use of test results in program planning is emphasized.

Prerequisites & Notes

None

Credits: 3

ELED 3173 - METHODS OF TEACHING ELEMENTARY MATH

In this course, emphasis is on teaching mathematics in elementary schools through the use of appropriate methods, materials, and evaluation techniques. Current issues, strategies, and trends in mathematics are reviewed. Integrated field experiences are included.

Prerequisites & Notes

None

Credits: 3

EDUC 3423 - DIAGNOSIS, ASSESSMENT, & EVALUATION OF READING

This course highlights formal and informal means of evaluations with emphasis on diagnosing reading ability, prescribing for instruction, administering assessment, interpreting measurement terms and data, and maintaining records.

Prerequisites & Notes

EDUC 2143 and EDUC 3493

Credits: 3

EDUC 3523 - TEACHING LITERACY IN CONTENT AREAS

This course will provide students with strategies and tools for becoming a facilitating and reflective practitioner, teaching reading across content areas, and helping students discover that content area learning is made richer when reading, writing, speaking, and listening are taught together. Particular emphasis is placed on a balanced approach to reading, specific reading and comprehension strategies for content reading, the role of reflection in helping students to think critically, reading for diverse students, and the use of appropriate texts and media.

Prerequisites & Notes

None

Credits: 3

ELED 4423 - METHODS OF TEACHING ELEMENTARY SCIENCE

This course is designed to help students master basic science concepts and skills represented in four domains: Science Knowledge, Science Process Skills and Creative Thinking, Attitudes and Values in Science, and Science Applications and Technology. The Florida Next Generation Standards for grades K-6 form the core content for the course. Emphasis is placed on several methods and strategies for instruction, including direct instruction, concept attainment, inquiry method, and project-based instruction. Scientific demonstrations and hands-on activities are included.

Prerequisites & Notes

None

Credits: 3

ESED 4533 - CLASSROOM & BEHAVIOR MANAGEMENT - ESE

This course is the study of models and strategies of behavior management appropriate for specific populations of students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, conflict resolution, culture, and demographics. The course includes methodology for managing a learning environment utilizing research-based best practices in education.

Prerequisites & Notes

None

Credits: 3

EDUC 4043 - APPLIED LINGUISTICS

This course is a practical approach to teaching English to speakers of other languages. The course includes topics such as general linguistics, language theory, principles of language acquisition, and techniques for teaching and assessing K-12 ELL students. Special attention is given to the linguistic components of English, namely phonology, morphology, semantics, syntax, discourse, and pragmatics.

Prerequisites & Notes

None

Credits: 3

ELED 3153 - METHODS OF TEACHING ELEMENTARY SOCIAL STUDIES

In this course, emphasis is placed on helping prospective teachers acquire background and skills in developing instructional methods, developmentally appropriate materials, content and evaluation procedures for teaching meaningful social studies to elementary students who bring a variety of cultural and instructional needs to the classroom.

Prerequisites & Notes

None

Credits: 3

Middle Grades Content Area Courses (student chooses content area-fulfills state certification requirement) 9 Credit Hours:

English

EDUC 3653 - TEACHING ENGLISH IN SECONDARY SCHOOL

This course is a study of strategies, techniques, materials, technology, and current research used in the teaching of English concepts to secondary school students. Students will review the traditional and contemporary standards involved in teaching English at the secondary school level, develop an awareness of the professional resources

available for teachers, and prepare unit and lesson plans with related assessment procedures on a variety of topics.

Prerequisites & Notes

None

Credits: 3

EDUC 3663 - LITERATURE FOR SECONDARY TEACHERS

This course is a study of specific literature typically taught in secondary schools and aligned to the FLDOE competencies and skills and national/state/district-adopted content standards.

Prerequisites & Notes

None

Credits: 3

ENGL 3333 - ADVANCED GRAMMAR

An examination of the major grammatical approaches to the English language with consideration of both theory and practical analysis.

Prerequisites & Notes

NULL

Credits: 3

Math

EDUC 4373 - TEACHING MATH IN THE SECONDARY SCHOOL

The focus of this course is on unit planning, instructional methods, resource selection, and evaluation procedures. Modern techniques and methods of teaching mathematics in secondary school are presented with attention given to diverse learners and special learning needs. Application of theoretical understanding and skills is achieved through micro-teaching lessons.

Prerequisites & Notes

None

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Social Studies

EDUC 3243 - TEACHING SOCIAL SCIENCE IN SEC SCHOOL

This course is a study of strategies, techniques, materials, technology, and current research used in the teaching of social science concepts to secondary school students. Students will review the traditional and contemporary standards involved, develop an awareness of the professional resources available for teachers, and prepare unit lesson plans with related assessment procedures on a variety of topics. Emphasis is on effective teacher behaviors in areas of instructional organization and development, presentation of subject matter, and verbal/nonverbal communication.

Prerequisites & Notes

None

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

POLS 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

Science

EDUC 3143 - TEACHING BIOLOGY IN SECONDARY SCHOOL

This course is a study and utilization of the methods on teaching biology in secondary schools. Emphasis is on the use of appropriate strategies, materials, and evaluation techniques. Current issues, approaches, and trends in biology are reviewed.

Prerequisites & Notes

None

Credits: 3

NSCI 3333 - ECOLOGY

This course introduces foundational principles of ecology, the study of relationships between organisms and the surrounding environment. This course will provide students with a broader understanding of how the physical and chemical characteristics of the environment influence the distribution and abundance of various species of organisms in an ecosystem.

Prerequisites & Notes

Corequisite: NSCI 333L

Credits: 3

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

Divine Design (Major Specific Experiential Learning)- 4 Credit Hours

ESED 3111 - ESE FIELD STUDY 1

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This experience is designed to allow students multiple opportunities to observe the K-12 setting (approximately 30 hours) and participate in low-level classroom tasks. The College of Education will work cooperatively with area schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the General Knowledge Test (GKT) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

ESED 3211 - ESE FIELD STUDY 2

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This experience is designed to allow students multiple opportunities to observe the K-12 setting (approximately 45 hours) and participate in classroom tasks. The College of Education will work cooperatively with area schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Professional Education Test (PEd) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

ESED 4311 - ESE FIELD STUDY 3

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the K-12 setting (approximately 60 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with local schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the ESE Subject Area Exam (SAE) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

ESED 4411 - ESE FIELD STUDY 4

This course will allow students to be placed in an ESE Center School within Polk County Public Schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe at the Center School (60 hours) and participate in classroom tasks with students who have low-incidence disabilities including Severe and Multiple Disabilities and Autism Spectrum Disorders. As part of the course requirements, students must pass the Elementary Education Subject Area Exam (SAE) and a middle grades SAE of their choice (Math, Science, English, or Social Science) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

Divine Design - 28 Credit Hours

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Master's Courses- 34 Credit Hours

ESED 5633 - HIGH INCIDENCE DISABILITIES

This course focuses on students identified as having high incidence disabilities such as learning disability, attention deficit, and other related mild disabilities. Programming within the regular education setting is emphasized.

Prerequisites & Notes

None

Credits: 3

ESED 5613 - ASSESSMENT OF ESE LEARNERS

This course is designed to provide knowledge regarding assessment procedures, the assessment process (including pre-referral and referral), and protocols utilized in making decisions and judgments regarding individualized educational plans, placements, and programs for students in exceptional education. This introductory course assists students in basic knowledge regarding formal and informal assessment and in the interpretation of test scores.

Prerequisites & Notes

None

Credits: 3

ESED 5663 - AUTISM SPECTRUM DISORDERS

This course is designed to provide students with a broad overview of the area of Autism Spectrum Disorders. There is a particular emphasis on adaptations and modifications to the regular curricular materials, as well as techniques for teaching functional skills.

Prerequisites & Notes

ESED 3113

Credits: 3

ESED 5643 - INTELLECTUAL DISABILITIES & GIFTED

This course is designed to provide students with a broad overview of the areas of intellectual, and developmental disabilities. There is a particular emphasis on adaptations and modifications to the regular curricular materials, as well as techniques for teaching functional skills.

Prerequisites & Notes

ESED 3113

Credits: 3

ESED 5653 - EMOTIONAL & BEHAVIORAL DISORDERS

This course is designed to provide students with an overview of historical and theoretical perspectives on educating students with emotional and behavioral differences, to acquire knowledge regarding referral processes, assessment procedures and protocols utilized in making decisions and judgments regarding individualized educational plans,

placement and programs, to develop specialized instructional strategies and curriculum to use with the student with emotional disabilities and behavioral disorders, to develop a critical understanding of current practices in service delivery systems, and to examine professional issues and trends that impact the future of the field.

Prerequisites & Notes

ESED 3113

Credits: 3

ESED 5623 - TRANSITION

This course provides an overview of exceptionalities as manifested in the adolescent and young adult. Emphasis is placed on planning and programming for the transition of the exceptional adolescent from school to the adult community. Opportunities for the comprehensive study of characteristics, programs, assessment techniques, and strategies essential to meeting the needs of adolescents and adults with learning problems, will be provided. Special and unique problems of teenagers and young adults, curriculum models, materials, teaching strategies, and transition requirements for students with disabilities will be addressed.

Prerequisites & Notes

ESED 3113

Credits: 3

ESED 5533 - GIFTED EDUCATION

This course provides knowledge about students who are gifted in an educational setting. The course presents the characteristics of students who are gifted, including their emotional, academic, and social needs. An emphasis is placed on students with giftedness who are from special populations. The theories and practices of differentiating instruction for students who are gifted in heterogeneous and homogeneous groups will be analyzed.

Prerequisites & Notes

Graduate status

Credits: 3

ESED 5712 - ESE STUDENT TEACHING

This course is designed to provide opportunities for students teachers to examine the experiences they are having in student internship. Seminars are designed to respond to the immediate needs of the student teachers and offer support, encouragement and insights into the teaching process.

Prerequisites & Notes

Completed course work

Credits: 12

Bachelor of Science, Secondary Biology

Bachelor of Science, Secondary Biology Four-Year Plan

The Bachelor of Science in Secondary Education (Biology concentration) at Southeastern University equips students to design lessons, dissections, and other labs to deepen their students' interest in and understanding of living organisms. Through college-level science coursework and teaching field studies, you'll develop a deep understanding of scientific concepts from microscopic to macroscopic, preparing you to pass that knowledge onto your students. Upon graduation, you'll be prepared to become state certified, as well as FLOCS and ACSI-certified (national and international). Science teachers are currently in high demand, and some states, such as Florida, even offer programs to reimburse college tuition for students who enter the field.

State Approval/Reciprocity

All teacher education programs have met requirements for Florida State Approved Programs.

Students who plan to teach in Florida schools must file an application with the Office of Teacher Certification for the State of Florida and complete the post-degree requirements for the teaching credential.

Students graduating from Florida state-approved teacher certification programs are currently eligible for initial certification to teach in all members of the National Association of State Directors of Teacher Education and Certification (NASDTEC), an interstate reciprocity contract allowing certified teachers to obtain teaching jobs in other states and territories. An applicant's eligibility for certification according to the interstate agreement contract will be determined after the application for a Florida teaching certificate is on file in the Teacher Certification Office. For more information on state-specific certification requirements [click here](#).

Total Program Hours- 120 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Discursive Inquiry - 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry - 4 Credit Hours; Select One with Lab:

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

Quantitative Inquiry - 3 Credit Hours

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - 6 Credit Hours

EDUC 2233 - EDUCATIONAL PSYCHOLOGY

This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.

Prerequisites & Notes

None

Credits: 3

Choose One of the Following:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - 3 Credit Hours; Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core- 66-68 Credit Hours

EDUC 2143 - FOUNDATIONS OF EDUCATION & INSTRUCTIONAL DESIGN

This course is a study of the nature and character of American education and how it has been influenced by our social structure, social values, and history. The course includes an introduction to subject area competencies, professional skills and competencies, benchmarks for the pre-professional level of accomplished practices for teachers, and the Code of Ethics and Professional Conduct. Students will learn the principles of effective instructional design and delivery in the PreK-12 setting and gain practice in writing Florida standards-based lesson plans that include differentiated instruction and assessment.

Prerequisites & Notes

None

Credits: 3

EDUC 3713 - FAITH INTEGRATION IN EDUCATION

This course is designed to assist educators in effectively and legally integrating their Christian faith into school and classroom settings.

Prerequisites & Notes

None

Credits: 3

EDUC 3353 - EMPOWERING ESOL TEACHERS

This course is an overview of curriculum, instructional methods and materials, testing and evaluation, and cross-cultural communication processes and linguistic principles as related to instructing English Language Learners (ELLs) in the PreK-12 classroom.

Prerequisites & Notes

None

Credits: 3

ESED 3113 - SURVEY OF THE EXCEPTIONAL LEARNER

This is a required course for certification in all Education programs, including Music Education. This is an introductory course that examines the history, characteristics, and issues in exceptional education. The course covers all areas of exceptionality and their manifestations from early childhood through adulthood. It is designed to provide students with a firm grounding in the foundations of special education and expose them to the reconstruction of the field, in order that they may better deal with new and ever-changing developments. In addition to classroom meetings, a minimum of 10 hours of observation/participation in a clinical setting is required. This course is recommended to be taken prior to any other Exceptional Student Education courses.

Prerequisites & Notes

None

Credits: 3

EDUC 3503 - INSTRUCTIONAL TECHNOLOGY

This course is designed to develop skills and techniques needed for the selection, utilization, and production of classroom instructional materials and for application and integration of educational technology and media to all areas of the curriculum, appropriate to PreK-12 students' developmental level.

Prerequisites & Notes

None

Credits: 3

EDUC 3133 - ASSESSMENT OF LEARNERS

This course focuses on the educational levels and needs of all students, including exceptional, culturally and/or linguistically diverse, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and curriculum-based assessments are included. Use of test results in program planning is emphasized.

Prerequisites & Notes

None

Credits: 3

EDUC 3523 - TEACHING LITERACY IN CONTENT AREAS

This course will provide students with strategies and tools for becoming a facilitating and reflective practitioner, teaching reading across content areas, and helping students discover that content area learning is made richer when reading, writing, speaking, and listening are taught together. Particular emphasis is placed on a balanced approach to reading, specific reading and comprehension strategies for content reading, the role of reflection in helping students to

think critically, reading for diverse students, and the use of appropriate texts and media.

Prerequisites & Notes

None

Credits: 3

EDUC 4433 - CLASSROOM & BEHAVIOR MANAGEMENT - SECONDARY SCHOOL

This course is the study of models and strategies of behavior management appropriate for specific populations of students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, conflict resolution, culture, and demographics. The course includes methodology for managing a learning environment utilizing research-based best practices in education.

Prerequisites & Notes

None

Credits: 3

EDUC 3663 - LITERATURE FOR SECONDARY TEACHERS

This course is a study of specific literature typically taught in secondary schools and aligned to the FLDOE competencies and skills and national/state/district-adopted content standards.

Prerequisites & Notes

None

Credits: 3

EDUC 3143 - TEACHING BIOLOGY IN SECONDARY SCHOOL

This course is a study and utilization of the methods on teaching biology in secondary schools. Emphasis is on the use of appropriate strategies, materials, and evaluation techniques. Current issues, approaches, and trends in biology are reviewed.

Prerequisites & Notes

None

Credits: 3

Specialization Requirements (common to MG and HS)

(Per the Department of Education: 30 semester hours in science, to include a minimum of twenty-one (21) semester hours in biological science with associated laboratory experiences)

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite:BIOL 1233

Credits: 1

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:

BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

NSCI 2433 - ANIMAL DIVERSITY

This course introduces foundational principles of zoology, including taxonomy, animal biology, architecture and ecology. Emphasis will be placed on the survey of invertebrate and vertebrate biodiversity.

Prerequisites & Notes

Corequisite: NSCI 243L

Credits: 3

NSCI 243L - ANIMAL DIVERSITY LAB

This course is a laboratory to accompany NSCI 2433.

Prerequisites & Notes

Corequisite: NSCI 2433

Credits: 1

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

BIOL 2113 - BIOETHICS

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: **BIOL 1243 or BIOL 2183**

Credits: 3

BIOL 2533 - GENERAL GENETICS

This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243, BIOL 124L

Corequisite:

BIOL 253L

Credits: 3

BIOL 253L - GENERAL GENETICS LAB

This course is the laboratory to accompany BIOL 2533. It is designed as an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243

BIOL 124L

Corequisite:

BIOL 2533

Credits: 1

Choose 9 remaining hours for science:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

CHEM 1213 - INTRO TO CHEMISTRY

This course is an introduction to basic concepts of general chemistry, introduction of periodic properties of elements and compounds, basic atomic-molecular structure, and properties of substances and reactions related to gas laws.

Prerequisites & Notes

Corequisite: CHEM 121L

Credits: 3

CHEM 121L - INTRO TO CHEMISTRY LAB

This course is the laboratory course to accompany CHEM 1213.

Prerequisites & Notes

Corequisite: CHEM 1213

Credits: 1

NSCI 3333 - ECOLOGY

This course introduces foundational principles of ecology, the study of relationships between organisms and the surrounding environment. This course will provide students with a broader understanding of how the physical and chemical characteristics of the environment influence the distribution and abundance of various species of organisms in an ecosystem.

Prerequisites & Notes

Corequisite: NSCI 333L

Credits: 3

NSCI 333L - ECOLOGY LAB

This is a laboratory to accompany NSCI 3333. Students will discern the interconnectivity between and among various species of organisms through the conduct of actual laboratory and field surveys in various habitats applying critical analysis to explain ecological phenomena learned in lecture.

Prerequisites & Notes

Corequisite: NSCI 3333

Credits: 1

CHEM 1533 - GENERAL CHEMISTRY I

This course is a fundamentals of chemistry course with emphasis on mass and energy relationships in chemical changes, equilibrium, atomic and molecular structure, and descriptive chemistry of selected elements and compounds.

Prerequisites & Notes

Prerequisite: CHEM 1213 or MATH 1413 or a score of 36 or higher on the chemistry placement exam

Corequisite: CHEM 153L

Credits: 3

CHEM 153L - GENERAL CHEMISTRY I LAB

This is a laboratory to accompany CHEM 1533.

Prerequisites & Notes

NULL

Credits: 1

CHEM 1633 - GENERAL CHEMISTRY II

This course is a continuation of CHEM 1533 with an emphasis on chemical equilibria, kinetic rate laws, acids and bases, introductory thermodynamics, and nuclear chemical reactions.

Prerequisites & Notes

Prerequisites: CHEM 1533 and CHEM 153L

Corequisite: CHEM 163L

Credits: 3

CHEM 163L - GENERAL CHEMISTRY II LAB

This is a laboratory to accompany CHEM 1633.

Prerequisites & Notes

Corequisite: CHEM 1633

Credits: 1

CHEM 2133 - ORGANIC CHEMISTRY I

Organic Chemistry is the study of the structure and reactivity of carbon and its compounds. Compounds are grouped according to structure, using a functional group approach. Reactions are organized according to similarities in mechanism, with an emphasis on electron flow. This includes the chemistry of alkanes, alkenes, alkynes, halogenated hydrocarbons, free radicals, and alcohols. Infrared, NMR spectroscopy, and mass spectrometry are also covered.

Prerequisites & Notes

Prerequisite: CHEM 1633, CHEM 163L & MATH 2144

Corequisite: CHEM 213L

Credits: 3

CHEM 213L - ORGANIC CHEMISTRY I LAB

This laboratory is to accompany CHEM 2133. The laboratory work includes learning the basic techniques in recrystallization, sublimation, melting point determination, distillation, liquid/liquid extraction, thin layer chromatography, column chromatography, and molecular modeling software. Mastery of these basic techniques lays the foundation for carrying out a number of organic syntheses or natural product isolations. Students are provided with hands-on access to state-of-the-art instrumentation for the characterization of synthetic products or organic unknowns using standard analysis methods such as FT-IR, FT-NMR, UV/Vis spectroscopy, polarimetry, refractive index, gas chromatography, and other modern techniques of characterization.

Prerequisites & Notes

Prerequisite:

CHEM 1633

CHEM 163L

MATH 2144

Corequisite:

CHEM 2133

Credits: 2

PHYS 1113 - INTRO TO PHYSICS

This is an introductory course designed for the student wishing to pursue a career in science and who lacks a high school background in this area. This is a mathematical investigation of physics and explores the basics of mechanics, motion, sound, electricity and magnetism. This course also meets general education requirements for non-science majors.

Prerequisites & Notes

NULL

Credits: 3

PHYS 111L - INTRO TO PHYSICS LAB

This course is the laboratory course to accompany PHYS 1113.

Prerequisites & Notes

NULL

Credits: 1

PHYS 2533 - GENERAL PHYSICS I

This course is an introduction to the physics of mechanics, heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: MATH 1413 or math placement exam; Corequisite: PHYS 253L

Credits: 3

PHYS 253L - GENERAL PHYSICS I LAB

Laboratory to accompany PHYS 2533.

Prerequisites & Notes

NULL

Credits: 1

PHYS 2633 - GENERAL PHYSICS II

This course is the second semester of an introduction to the physics of heat, electricity, wave motion, and optics.

Prerequisites & Notes

Prerequisite: PHYS 2533

Credits: 3

PHYS 263L - GENERAL PHYSICS II LAB

Laboratory to accompany PHYS 2633.

Prerequisites & Notes

NULL

Credits: 1

NSCI 1433 - BOTANY

This course is an introductory course in plant anatomy, physiology and taxonomy. The history of mankind's medicinal use of plants and current updates will be covered.

Prerequisites & Notes

Corequisite: NSCI 143L

Credits: 3

NSCI 143L - BOTANY LAB

This course helps students apply what they have learned about plant anatomy, physiology and taxonomy through hands-on activities and field trips.

Prerequisites & Notes

Corequisite: NSCI 1433

Credits: 1

NSCI 2233 - ASTRONOMY

This is an introductory course in the astronomy of the solar system, astrophysics and constellations. This course level assumes no physics background.

Prerequisites & Notes

NULL

Credits: 3

NSCI 223L - ASTRONOMY LAB

This lab is to enhance the material learned in the accompanying lecture class, Astronomy.

Prerequisites & Notes

NULL

Credits: 1

Divine Design (Major Specific Experiential Learning)- 15 Credit Hours

EDUC 2131 - FIELD STUDY 1

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe K-12 settings (approximately 30 hours) and participate in low-level classroom tasks. The College of Education will work cooperatively with schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the General Knowledge Test (GKT) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

EDUC 3351 - FIELD STUDY 2

In this course, students will be placed in a K-12 setting to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the K-12 setting (approximately 45 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with area schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Professional Education Test (PEd) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

EDUC 4221 - FIELD STUDY 3

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the K-12 setting (approximately 60 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with local schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Subject Area Exam (SAE) for their major and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

EDUC 4912 - STUDENT TEACHING

This course provides five seminar-style opportunities for student teachers to examine the experiences they are concurrently having in the full-time student internship in the PreK-12 setting. Seminars are designed to respond to the immediate needs of the student teachers and offer support, encouragement, and insights into the teaching process and profession. Guest speakers will play an important role in enriching the program and providing first-hand experiences from the classroom and administrative levels.

Prerequisites & Notes

Attempt all required portions of the FTCE

Credits: 12

Divine Design - 3-5 Credits

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Bachelor of Science, Secondary Biology Four-Year Plan

Year One

Fall Semester

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

EDUC 2143 - FOUNDATIONS OF EDUCATION & INSTRUCTIONAL DESIGN

This course is a study of the nature and character of American education and how it has been influenced by our social structure, social values, and history. The course includes an introduction to subject area competencies, professional skills and competencies, benchmarks for the pre-professional level of accomplished practices for teachers, and the Code of Ethics and Professional Conduct. Students will learn the principles of effective instructional design and delivery in the PreK-12 setting and gain practice in writing Florida standards-based lesson plans that include differentiated instruction and assessment.

Prerequisites & Notes

None

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Socio-Historical Inquiry (3 credits) Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

EDUC 2131 - FIELD STUDY 1

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe K-12 settings (approximately 30 hours) and participate in low-level classroom tasks. The College of Education will work cooperatively with schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the General Knowledge Test (GKT) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

EDUC 2233 - EDUCATIONAL PSYCHOLOGY

This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.

Prerequisites & Notes

None

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Year Two

Fall Semester

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

EDUC 3353 - EMPOWERING ESOL TEACHERS

This course is an overview of curriculum, instructional methods and materials, testing and evaluation, and cross-cultural communication processes and linguistic principles as related to instructing English Language Learners (ELLs) in the PreK-12 classroom.

Prerequisites & Notes

None

Credits: 3

EDUC 3133 - ASSESSMENT OF LEARNERS

This course focuses on the educational levels and needs of all students, including exceptional, culturally and/or linguistically diverse, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and curriculum-based assessments are included. Use of test results in program planning is emphasized.

Prerequisites & Notes

None

Credits: 3

BIOL 2533 - GENERAL GENETICS

This course is an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243, BIOL 124L

Corequisite:

BIOL 253L

Credits: 3

BIOL 253L - GENERAL GENETICS LAB

This course is the laboratory to accompany BIOL 2533. It is designed as an introduction to genetics, including the fundamental concepts of Mendelian and molecular genetics.

Prerequisites & Notes

Prerequisite:

BIOL 1243

BIOL 124L

Corequisite:

BIOL 2533

Credits: 1

Science Requirement- Student Choice

Spring Semester

BIOL 1233 - BIOLOGY I

This course is an introduction to the structure and function of biological molecules, cell structure and function, and the cell cycle.

Prerequisites & Notes

Corequisite: BIOL 123L

Credits: 3

BIOL 123L - BIOLOGY I LAB

This course is the laboratory to accompany BIOL 1233.

Prerequisites & Notes

Corequisite: BIOL 1233

Credits: 1

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

EDUC 3351 - FIELD STUDY 2

In this course, students will be placed in a K-12 setting to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the K-12 setting (approximately 45 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with area schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Professional Education Test (PEd) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

EDUC 3713 - FAITH INTEGRATION IN EDUCATION

This course is designed to assist educators in effectively and legally integrating their Christian faith into school and classroom settings.

Prerequisites & Notes

None

Credits: 3

Science Requirement - Student Choice

Year Three

Fall Semester

BIOL 2113 - BIOETHICS

This course is designed to investigate the ethical issues pertaining to human life such as abortion, physician-assisted dying and suicide, the beginning and end of personhood, stem cell research, cloning, animal experimentation, genetic engineering, eugenics, and assisted reproductive technology procedures. Other matters pertaining to biological sciences and ethics can be included.

Prerequisites & Notes

Prerequisite: **BIOL 1243 or BIOL 2183**

Credits: 3

EDUC 4433 - CLASSROOM & BEHAVIOR MANAGEMENT - SECONDARY SCHOOL

This course is the study of models and strategies of behavior management appropriate for specific populations of students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, conflict resolution, culture, and demographics. The course includes methodology for managing a learning environment utilizing research-based best practices in education.

Prerequisites & Notes

None

Credits: 3

EDUC 3143 - TEACHING BIOLOGY IN SECONDARY SCHOOL

This course is a study and utilization of the methods on teaching biology in secondary schools. Emphasis is on the use of appropriate strategies, materials, and evaluation techniques. Current issues, approaches, and trends in biology are reviewed.

Prerequisites & Notes

None

Credits: 3

BIOL 1243 - BIOLOGY II

This course is an overview of cell structure, physiology, genetics, heredity, botany, zoology, and classification of living forms.

Prerequisites & Notes

Prerequisite:
BIOL 1233

BIOL 123L

Corequisite:

BIOL 124L

Credits: 3

BIOL 124L - BIOLOGY II LAB

This course is the laboratory to accompany BIOL 1243.

Prerequisites & Notes

Prerequisite:
BIOL 1233

BIOL 123L

Corequisite:

BIOL 1243

Credits: 1

Spring Semester

EDUC 3663 - LITERATURE FOR SECONDARY TEACHERS

This course is a study of specific literature typically taught in secondary schools and aligned to the FLDOE competencies and skills and national/state/district-adopted content standards.

Prerequisites & Notes

None

Credits: 3

EDUC 4221 - FIELD STUDY 3

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the K-12 setting (approximately 60 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with local schools to place students in

classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Subject Area Exam (SAE) for their major and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

BIOL 3223 - LIFE ORIGINS

This course is an introduction to modern biological theories of the origin of life compared with the creation model of life origins.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Science Requirement- Student Choice

Year Four

Fall Semester

EDUC 3523 - TEACHING LITERACY IN CONTENT AREAS

This course will provide students with strategies and tools for becoming a facilitating and reflective practitioner, teaching reading across content areas, and helping students discover that content area learning is made richer when reading, writing, speaking, and listening are taught together. Particular emphasis is placed on a balanced approach to reading, specific reading and comprehension strategies for content reading, the role of reflection in helping students to think critically, reading for diverse students, and the use of appropriate texts and media.

Prerequisites & Notes

None

Credits: 3

EDUC 3503 - INSTRUCTIONAL TECHNOLOGY

This course is designed to develop skills and techniques needed for the selection, utilization, and production of classroom instructional materials and for application and integration of educational technology and media to all areas of the curriculum, appropriate to PreK-12 students' developmental level.

Prerequisites & Notes

None

Credits: 3

ESED 3113 - SURVEY OF THE EXCEPTIONAL LEARNER

This is a required course for certification in all Education programs, including Music Education. This is an introductory course that examines the history, characteristics, and issues in exceptional education. The course covers all areas of exceptionality and their manifestations from early childhood through adulthood. It is designed to provide students with a firm grounding in the foundations of special education and expose them to the reconstruction of the field, in order that they may better deal with new and ever-changing developments. In addition to classroom meetings, a minimum of 10 hours of observation/participation in a clinical setting is required. This course is recommended to be taken prior to any other Exceptional Student Education courses.

Prerequisites & Notes

None

Credits: 3

NSCI 2433 - ANIMAL DIVERSITY

This course introduces foundational principles of zoology, including taxonomy, animal biology, architecture and ecology. Emphasis will be placed on the survey of invertebrate and vertebrate biodiversity.

Prerequisites & Notes

Corequisite: NSCI 243L

Credits: 3

NSCI 243L - ANIMAL DIVERSITY LAB

This course is a laboratory to accompany NSCI 2433.

Prerequisites & Notes

Corequisite: NSCI 2433

Credits: 1

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Spring Semester**EDUC 4912 - STUDENT TEACHING**

This course provides five seminar-style opportunities for student teachers to examine the experiences they are concurrently having in the full-time student internship in the PreK-12 setting. Seminars are designed to respond to the immediate needs of the student teachers and offer support, encouragement, and insights into the teaching process and profession. Guest speakers will play an important role in enriching the program and providing first-hand experiences from the classroom and administrative levels.

Prerequisites & Notes

Attempt all required portions of the FTCE

Credits: 12

Bachelor of Science, Secondary English (6-12)

Bachelor of Science, Secondary English Four-Year Plan

The Bachelor of Science in Secondary Education (English Concentration) at Southeastern University prepares graduates to teach 6th through 12th-grade students to become critical readers and effective writers, equipping them with knowledge of different cultures, empathy for others, and a critical perspective about themselves. Through hands-on coursework, you'll read classic British and American works along with contemporary and adolescent literature, gaining lecture and peer discussion techniques to teach these works and other relevant selections. Your degree will culminate in the completion of a semester-long student teaching internship, where you'll plan and teach the curriculum as well as manage and assess learners.

State Approval/Reciprocity

All teacher education programs have met requirements for Florida State Approved Programs.

Students who plan to teach in Florida schools must file an application with the Office of Teacher Certification for the State of Florida and complete the post-degree requirements for the teaching credential.

Students graduating from Florida state-approved teacher certification programs are currently eligible for initial certification to teach in all members of the National Association of State Directors of Teacher Education and Certification (NASDTEC), an interstate reciprocity contract allowing certified teachers to obtain teaching jobs in other states and territories. An applicant's eligibility for certification according to the interstate agreement contract will be determined after the application for a Florida teaching certificate is on file in the Teacher Certification Office. For more information on state-specific certification requirements [click here](#).

Total Program Hours- 120 Credit Hours

Foundational Core- 34 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation- 9 Credit Hours**BIBL 1113 - THE STORY OF SCRIPTURE**

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credit Hours

Discursive Inquiry- 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry (6 credits):

EDUC 2233 - EDUCATIONAL PSYCHOLOGY

This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.

Prerequisites & Notes

None

Credits: 3

Choose one of the following:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 57 Credit Hours

EDUC 2143 - FOUNDATIONS OF EDUCATION & INSTRUCTIONAL DESIGN

This course is a study of the nature and character of American education and how it has been influenced by our social structure, social values, and history. The course includes an introduction to subject area competencies, professional skills and competencies, benchmarks for the pre-professional level of accomplished practices for teachers, and the Code of Ethics and Professional Conduct. Students will learn the principles of effective instructional design and delivery in the PreK-12 setting and gain practice in writing Florida standards-based lesson plans that include differentiated instruction and assessment.

Prerequisites & Notes

None

Credits: 3

EDUC 3713 - FAITH INTEGRATION IN EDUCATION

This course is designed to assist educators in effectively and legally integrating their Christian faith into school and classroom settings.

Prerequisites & Notes

None

Credits: 3

EDUC 3493 - LITERACY FOUNDATIONS 1: THE SCIENCE OF READING

This course is a study of scientific theory and effective approaches for reading instruction, focusing on reading as the interactive weaving of word recognition and language comprehension. The essential components of literacy are studied: oral language, phonological awareness, phonics, fluency, vocabulary, and comprehension. Characteristics of proficient readers, striving readers, and readers with dyslexia are examined along with practices for differentiating reading instruction.

Prerequisites & Notes

None

Credits: 3

EDUC 3353 - EMPOWERING ESOL TEACHERS

This course is an overview of curriculum, instructional methods and materials, testing and evaluation, and cross-cultural communication processes and linguistic principles as related to instructing English Language Learners (ELLs) in the PreK-12 classroom.

Prerequisites & Notes

None

Credits: 3

ESED 3113 - SURVEY OF THE EXCEPTIONAL LEARNER

This is a required course for certification in all Education programs, including Music Education. This is an introductory course that examines the history, characteristics, and issues in exceptional education. The course covers all areas of exceptionality and their manifestations from early childhood through adulthood. It is designed to provide students with a firm grounding in the foundations of special education and expose them to the reconstruction of the field, in order that they may better deal with new and ever-changing developments. In addition to classroom meetings, a minimum of 10 hours of observation/participation in a clinical setting is required. This course is recommended to be taken prior to any other Exceptional Student Education courses.

Prerequisites & Notes

None

Credits: 3

EDUC 3503 - INSTRUCTIONAL TECHNOLOGY

This course is designed to develop skills and techniques needed for the selection, utilization, and production of classroom instructional materials and for application and integration of educational technology and media to all areas of the curriculum, appropriate to PreK-12 students' developmental level.

Prerequisites & Notes

None

Credits: 3

EDUC 3233 - LITERACY FOUNDATIONS 2: LANGUAGE ARTS & LITERATURE

This course focuses on the educational levels and needs of all students, including exceptional, culturally and/or linguistically diverse, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and curriculum-based assessments are included. Use of test results in program planning is emphasized.

Prerequisites & Notes

None

Credits: 3

EDUC 3133 - ASSESSMENT OF LEARNERS

This course focuses on the educational levels and needs of all students, including exceptional, culturally and/or linguistically diverse, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and curriculum-based assessments are included. Use of test results in program planning is emphasized.

Prerequisites & Notes

None

Credits: 3

EDUC 3523 - TEACHING LITERACY IN CONTENT AREAS

This course will provide students with strategies and tools for becoming a facilitating and reflective practitioner, teaching reading across content areas, and helping students discover that content area learning is made richer when reading, writing, speaking, and listening are taught together. Particular emphasis is placed on a balanced approach to reading, specific reading and comprehension strategies for content reading, the role of reflection in helping students to think critically, reading for diverse students, and the use of appropriate texts and media.

Prerequisites & Notes

None

Credits: 3

EDUC 4433 - CLASSROOM & BEHAVIOR MANAGEMENT - SECONDARY SCHOOL

This course is the study of models and strategies of behavior management appropriate for specific populations of students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, conflict resolution, culture, and demographics. The course includes methodology for managing a learning environment utilizing research-based best practices in education.

Prerequisites & Notes

None

Credits: 3

EDUC 3663 - LITERATURE FOR SECONDARY TEACHERS

This course is a study of specific literature typically taught in secondary schools and aligned to the FLDOE competencies and skills and national/state/district-adopted content standards.

Prerequisites & Notes

None

Credits: 3

EDUC 3653 - TEACHING ENGLISH IN SECONDARY SCHOOL

This course is a study of strategies, techniques, materials, technology, and current research used in the teaching of English concepts to secondary school students. Students will review the traditional and contemporary standards involved in teaching English at the secondary school level, develop an awareness of the professional resources available for teachers, and prepare unit and lesson plans with related assessment procedures on a variety of topics.

Prerequisites & Notes

None

Credits: 3

EDUC 4043 - APPLIED LINGUISTICS

This course is a practical approach to teaching English to speakers of other languages. The course includes topics such as general linguistics, language theory, principles of language acquisition, and techniques for teaching and assessing K-12 ELL students. Special attention is given to the linguistic components of English, namely phonology, morphology, semantics, syntax, discourse, and pragmatics.

Prerequisites & Notes

None

Credits: 3

EDUC 3423 - DIAGNOSIS, ASSESSMENT, & EVALUATION OF READING

This course highlights formal and informal means of evaluations with emphasis on diagnosing reading ability, prescribing for instruction, administering assessment, interpreting measurement terms and data, and maintaining records.

Prerequisites & Notes

EDUC 2143 and EDUC 3493

Credits: 3

Specialization Courses - 15 Credit Hours

ENGL 2513 - BRITISH LITERATURE I

This course introduces students to British literature from Old English through the Neo-classical period. Students will develop skills in reading, writing about, and interpreting literary cultural texts while drawing on relevant cultural contexts, critical frameworks, and personal faith.

Prerequisites & Notes

NULL

Credits: 3

ENGL 3333 - ADVANCED GRAMMAR

An examination of the major grammatical approaches to the English language with consideration of both theory and practical analysis.

Prerequisites & Notes

NULL

Credits: 3

ENGL 3433 - ADVANCED EXPOSITORY WRITING

In-depth study and practice in various aspects of expository writing, with attention given to stylistic features. Opportunities for both student and instructor responses to student writing will be provided. This course is cross-referenced with COMM 3433.

Prerequisites & Notes

NULL

Credits: 3

ENGL 3633 - AMERICAN LITERATURE

A survey of prose and poetry with attention given to socio-political backgrounds and growth of American thought as expressed through selected authors from the colonial period to 1945.

Prerequisites & Notes

NULL

Credits: 3

ENGL 4333 - WORLD LITERATURE

A study focusing on the classics of world literature, including the Old Testament, Homer's writings, the Greek and Roman tragedians and philosophers. A selection of primarily non-English writers from the time of the Old Testament to the present, requiring personal critical reaction and evaluation.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (Major Specific Experiential Learning)- 15 Credit Hours

EDUC 2131 - FIELD STUDY 1

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe K-12 settings (approximately 30 hours) and participate in low-level classroom tasks. The College of Education will work cooperatively with schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the General Knowledge Test (GKT) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

EDUC 3351 - FIELD STUDY 2

In this course, students will be placed in a K-12 setting to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the K-12 setting (approximately 45 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with area schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Professional Education Test (PEd) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

EDUC 4221 - FIELD STUDY 3

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the K-12 setting (approximately 60 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with local schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Subject Area Exam (SAE) for their major and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

EDUC 4912 - STUDENT TEACHING

This course provides five seminar-style opportunities for student teachers to examine the experiences they are concurrently having in the full-time student internship in the PreK-12 setting. Seminars are designed to respond to the

immediate needs of the student teachers and offer support, encouragement, and insights into the teaching process and profession. Guest speakers will play an important role in enriching the program and providing first-hand experiences from the classroom and administrative levels.

Prerequisites & Notes

Attempt all required portions of the FTCE

Credits: 12

Divine Design (Minor, Electives, Experiential Learning) 14 Credits

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Bachelor of Science, Secondary English Four-Year Plan

Year One

Fall Semester

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Creative-Aesthetic Inquiry (3 Credit Hours) - Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Socio-Historical Inquiry (3 credits) Select One:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

EDUC 2233 - EDUCATIONAL PSYCHOLOGY

This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.

Prerequisites & Notes

None

Credits: 3

EDUC 2143 - FOUNDATIONS OF EDUCATION & INSTRUCTIONAL DESIGN

This course is a study of the nature and character of American education and how it has been influenced by our social structure, social values, and history. The course includes an introduction to subject area competencies, professional skills and competencies, benchmarks for the pre-professional level of accomplished practices for teachers, and the Code of Ethics and Professional Conduct. Students will learn the principles of effective instructional design and delivery in the PreK-12 setting and gain practice in writing Florida standards-based lesson plans that include differentiated instruction and assessment.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

EDUC 4221 - FIELD STUDY 3

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the K-12 setting (approximately 60 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with local schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Subject Area Exam (SAE) for their major and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

Year Four

Fall Semester

EDUC 3503 - INSTRUCTIONAL TECHNOLOGY

This course is designed to develop skills and techniques needed for the selection, utilization, and production of classroom instructional materials and for application and integration of educational technology and media to all areas of the curriculum, appropriate to PreK-12 students' developmental level.

Prerequisites & Notes

None

Credits: 3

EDUC 3523 - TEACHING LITERACY IN CONTENT AREAS

This course will provide students with strategies and tools for becoming a facilitating and reflective practitioner, teaching reading across content areas, and helping students discover that content area learning is made richer when reading, writing, speaking, and listening are taught together. Particular emphasis is placed on a balanced approach to reading, specific reading and comprehension strategies for content reading, the role of reflection in helping students to think critically, reading for diverse students, and the use of appropriate texts and media.

Prerequisites & Notes

None

Credits: 3

EDUC 4433 - CLASSROOM & BEHAVIOR MANAGEMENT - SECONDARY SCHOOL

This course is the study of models and strategies of behavior management appropriate for specific populations of students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, conflict resolution, culture, and demographics. The course includes methodology for managing a learning environment utilizing research-based best practices in education.

Prerequisites & Notes

None

Credits: 3

EDUC 3653 - TEACHING ENGLISH IN SECONDARY SCHOOL

This course is a study of strategies, techniques, materials, technology, and current research used in the teaching of English concepts to secondary school students. Students will review the traditional and contemporary standards involved in teaching English at the secondary school level, develop an awareness of the professional resources available for teachers, and prepare unit and lesson plans with related assessment procedures on a variety of topics.

Prerequisites & Notes

None

Credits: 3

GENERAL ELECTIVE - 2 HR ELECTIVE

Select a 2 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 2

Spring Semester

EDUC 4912 - STUDENT TEACHING

This course provides five seminar-style opportunities for student teachers to examine the experiences they are concurrently having in the full-time student internship in the PreK-12 setting. Seminars are designed to respond to the immediate needs of the student teachers and offer support, encouragement, and insights into the teaching process and profession. Guest speakers will play an important role in enriching the program and providing first-hand experiences from the classroom and administrative levels.

Prerequisites & Notes

Attempt all required portions of the FTCE

Credits: 12

Bachelor of Science, Secondary Mathematics

Bachelor of Science, Secondary Mathematics Four-Year Plan (Odd Year)

Bachelor of Science, Secondary Mathematics Four-Year Plan (Even Year)

The Bachelor of Science in Secondary Education (Mathematics Concentration) at Southeastern University equips students with the skills and knowledge needed to instill a strong mathematical foundation in the next generation. The program begins with a thorough analysis of mathematical teaching methods, from fractions and algebra to calculus and trigonometry. You'll then gain a strong sense of the tools and attitudes needed to teach 6th through 12th-grade students. The degree culminates in the completion of a semester-long student teaching internship, where you'll plan and teach the curriculum as well as manage and assess learners.

State Approval/Reciprocity

All teacher education programs have met requirements for Florida State Approved Programs.

Students who plan to teach in Florida schools must file an application with the Office of Teacher Certification for the State of Florida and complete the post-degree requirements for the teaching credential.

Students graduating from Florida state-approved teacher certification programs are currently eligible for initial certification to teach in all members of the National Association of State Directors of Teacher Education and Certification (NASDTEC), an interstate reciprocity contract allowing certified teachers to obtain teaching jobs in other states and territories. An applicant's eligibility for certification according to the interstate agreement contract will be

determined after the application for a Florida teaching certificate is on file in the Teacher Certification Office. For more information on state-specific certification requirements [click here](#).

Total Program Hours- 120 Credit Hours

Foundational Core - 34 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation- 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credit Hours

Discursive Inquiry- 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry- 3 Credit Hours

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry (6 credits) Select one and EDUC 2233:

EDUC 2233 - EDUCATIONAL PSYCHOLOGY

This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.

Prerequisites & Notes

None

Credits: 3

3 hours needed. Choose one of the following:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 57 Credit Hours

EDUC 2143 - FOUNDATIONS OF EDUCATION & INSTRUCTIONAL DESIGN

This course is a study of the nature and character of American education and how it has been influenced by our social structure, social values, and history. The course includes an introduction to subject area competencies, professional skills and competencies, benchmarks for the pre-professional level of accomplished practices for teachers, and the Code of Ethics and Professional Conduct. Students will learn the principles of effective instructional design and delivery in the PreK-12 setting and gain practice in writing Florida standards-based lesson plans that include differentiated instruction and assessment.

Prerequisites & Notes

None

Credits: 3

EDUC 3713 - FAITH INTEGRATION IN EDUCATION

This course is designed to assist educators in effectively and legally integrating their Christian faith into school and classroom settings.

Prerequisites & Notes

None

Credits: 3

EDUC 3353 - EMPOWERING ESOL TEACHERS

This course is an overview of curriculum, instructional methods and materials, testing and evaluation, and cross-cultural communication processes and linguistic principles as related to instructing English Language Learners (ELLs) in the PreK-12 classroom.

Prerequisites & Notes

None

Credits: 3

ESED 3113 - SURVEY OF THE EXCEPTIONAL LEARNER

This is a required course for certification in all Education programs, including Music Education. This is an introductory course that examines the history, characteristics, and issues in exceptional education. The course covers all areas of exceptionality and their manifestations from early childhood through adulthood. It is designed to provide students with a firm grounding in the foundations of special education and expose them to the reconstruction of the field, in order that they may better deal with new and ever-changing developments. In addition to classroom meetings, a minimum of 10 hours of observation/participation in a clinical setting is required. This course is recommended to be taken prior to any other Exceptional Student Education courses.

Prerequisites & Notes

None

Credits: 3

EDUC 3503 - INSTRUCTIONAL TECHNOLOGY

This course is designed to develop skills and techniques needed for the selection, utilization, and production of classroom instructional materials and for application and integration of educational technology and media to all areas of the curriculum, appropriate to PreK-12 students' developmental level.

Prerequisites & Notes

None

Credits: 3

EDUC 3133 - ASSESSMENT OF LEARNERS

This course focuses on the educational levels and needs of all students, including exceptional, culturally and/or linguistically diverse, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and curriculum-based assessments are included. Use of test results in program planning is emphasized.

Prerequisites & Notes

None

Credits: 3

EDUC 3523 - TEACHING LITERACY IN CONTENT AREAS

This course will provide students with strategies and tools for becoming a facilitating and reflective practitioner, teaching reading across content areas, and helping students discover that content area learning is made richer when reading, writing, speaking, and listening are taught together. Particular emphasis is placed on a balanced approach to reading, specific reading and comprehension strategies for content reading, the role of reflection in helping students to think critically, reading for diverse students, and the use of appropriate texts and media.

Prerequisites & Notes

None

Credits: 3

EDUC 4433 - CLASSROOM & BEHAVIOR MANAGEMENT - SECONDARY SCHOOL

This course is the study of models and strategies of behavior management appropriate for specific populations of students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, conflict resolution, culture, and demographics. The course includes methodology for managing a learning environment utilizing research-based best practices in education.

Prerequisites & Notes

None

Credits: 3

EDUC 3663 - LITERATURE FOR SECONDARY TEACHERS

This course is a study of specific literature typically taught in secondary schools and aligned to the FLDOE competencies and skills and national/state/district-adopted content standards.

Prerequisites & Notes

None

Credits: 3

EDUC 4373 - TEACHING MATH IN THE SECONDARY SCHOOL

The focus of this course is on unit planning, instructional methods, resource selection, and evaluation procedures. Modern techniques and methods of teaching mathematics in secondary school are presented with attention given to diverse learners and special learning needs. Application of theoretical understanding and skills is achieved through micro-teaching lessons.

Prerequisites & Notes

None

Credits: 3

Specialization Requirements

Per the Department of Education: 30 semester hours in mathematics, including a minimum of six (6) semester hours in calculus with credit in geometry, probability and statistics, and linear or abstract algebra.

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

MATH 2113 - DISCRETE MATHEMATICS

MATH

Credits: 3

MATH 2133 - GEOMETRY

This course is a study of Euclidean geometry and Non-Euclidean geometries.

Prerequisites & Notes

NULL

Credits: 3

MATH 2144 - CALCULUS I

This course involves the study of limits and continuity, derivatives and applications.

Prerequisites & Notes

MATH 1413 or a Precalculus/Calculus course in high school

Credits: 4

MATH 2244 - CALCULUS II

This course involves the study of antiderivatives, definite integrals, logarithmic, exponential and trigonometric functions.

Prerequisites & Notes

NULL

Credits: 4

MATH 3234 - LINEAR ALGEBRA

This course is a study of vector spaces, transformations, matrices, eigenvalues, and systems of linear equations.

Prerequisites & Notes

NULL

Credits: 4

Math Electives - Select three:

Choose from any MATH prefix (see math advisor)

Divine Design (Major Specific Experiential Learning)- 15 Credit Hours**EDUC 2131 - FIELD STUDY 1**

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe K-12 settings (approximately 30 hours) and participate in low-level classroom tasks. The College of Education will work cooperatively with schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the General Knowledge Test (GKT) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

EDUC 3351 - FIELD STUDY 2

In this course, students will be placed in a K-12 setting to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the K-12 setting (approximately 45 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with area schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Professional Education Test (PEd) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Year Three

Fall Semester

EDUC 3133 - ASSESSMENT OF LEARNERS

This course focuses on the educational levels and needs of all students, including exceptional, culturally and/or linguistically diverse, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and curriculum-based assessments are included. Use of test results in program planning is emphasized.

Prerequisites & Notes

None

Credits: 3

MATH 3234 - LINEAR ALGEBRA

This course is a study of vector spaces, transformations, matrices, eigenvalues, and systems of linear equations.

Prerequisites & Notes

NULL

Credits: 4

MATH 3243 - HISTORY OF MATHEMATICS

This course surveys the history of mathematics from antiquity to modern mathematics, using assigned readings, problems, discussion, research topics and present results orally and in writing. Required for all mathematics majors, and those seeking to teach in middle or high school.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Spring Semester

EDUC 3663 - LITERATURE FOR SECONDARY TEACHERS

This course is a study of specific literature typically taught in secondary schools and aligned to the FLDOE competencies and skills and national/state/district-adopted content standards.

Prerequisites & Notes

None

Credits: 3

ESED 3113 - SURVEY OF THE EXCEPTIONAL LEARNER

This is a required course for certification in all Education programs, including Music Education. This is an introductory course that examines the history, characteristics, and issues in exceptional education. The course covers all areas of exceptionality and their manifestations from early childhood through adulthood. It is designed to provide students with a firm grounding in the foundations of special education and expose them to the reconstruction of the field, in order that they may better deal with new and ever-changing developments. In addition to classroom meetings, a minimum of 10 hours of observation/participation in a clinical setting is required. This course is recommended to be taken prior to any other Exceptional Student Education courses.

Prerequisites & Notes

None

Credits: 3

MATH 4133 - ABSTRACT ALGEBRA

This course is a study of set theory, relations and functions, equivalence relations, integers, mathematical induction, elementary number theory, groups, rings, fields, and polynomials.

Prerequisites & Notes

NULL

Credits: 3

GENERAL ELECTIVE - 2 HR ELECTIVE

Select a 2 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 2

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

EDUC 4221 - FIELD STUDY 3

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple

opportunities to observe and interact with teachers and students in the K-12 setting (approximately 60 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with local schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Subject Area Exam (SAE) for their major and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

Year Four

Fall Semester

EDUC 4433 - CLASSROOM & BEHAVIOR MANAGEMENT - SECONDARY SCHOOL

This course is the study of models and strategies of behavior management appropriate for specific populations of students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, conflict resolution, culture, and demographics. The course includes methodology for managing a learning environment utilizing research-based best practices in education.

Prerequisites & Notes

None

Credits: 3

EDUC 4373 - TEACHING MATH IN THE SECONDARY SCHOOL

The focus of this course is on unit planning, instructional methods, resource selection, and evaluation procedures. Modern techniques and methods of teaching mathematics in secondary school are presented with attention given to diverse learners and special learning needs. Application of theoretical understanding and skills is achieved through micro-teaching lessons.

Prerequisites & Notes

None

Credits: 3

EDUC 3503 - INSTRUCTIONAL TECHNOLOGY

This course is designed to develop skills and techniques needed for the selection, utilization, and production of classroom instructional materials and for application and integration of educational technology and media to all areas of the curriculum, appropriate to PreK-12 students' developmental level.

Prerequisites & Notes

None

Credits: 3

EDUC 3523 - TEACHING LITERACY IN CONTENT AREAS

This course will provide students with strategies and tools for becoming a facilitating and reflective practitioner, teaching reading across content areas, and helping students discover that content area learning is made richer when reading, writing, speaking, and listening are taught together. Particular emphasis is placed on a balanced approach to reading, specific reading and comprehension strategies for content reading, the role of reflection in helping students to think critically, reading for diverse students, and the use of appropriate texts and media.

Prerequisites & Notes

None

Credits: 3

Upper Division Math Elective- Select One:

MATH 3133 - NUMBER THEORY

This course is a study of number theory including Euclid's algorithm, prime numbers, greatest common divisors, common multiples, prime factorization, congruence, diophantine problems, and quadratic residues.

Prerequisites & Notes

NULL

Credits: 3

MATH 3044 - CALCULUS III

This course focuses on integration, polar coordinates, vectors in space, indeterminate forms and proper integrals.

Prerequisites & Notes

NULL

Credits: 4

Spring Semester

EDUC 4912 - STUDENT TEACHING

This course provides five seminar-style opportunities for student teachers to examine the experiences they are concurrently having in the full-time student internship in the PreK-12 setting. Seminars are designed to respond to the immediate needs of the student teachers and offer support, encouragement, and insights into the teaching process and profession. Guest speakers will play an important role in enriching the program and providing first-hand experiences from the classroom and administrative levels.

Prerequisites & Notes

Attempt all required portions of the FTCE

Credits: 12

Bachelor of Science, Secondary Social Sciences

Bachelor of Science, Secondary Social Science Education Four Year Plan

The Bachelor of Science in Secondary Education (Social Sciences concentration) at Southeastern University equips students with the skills and knowledge needed to instill an understanding and interest in history, cultural shifts, and current events in the next generation. You'll begin the program by building your exposure to relevant core curriculum with an in-depth study of history, government, economics, cultural anthropology, and other topics. You'll then gain valuable hands-on training in local middle and high school classrooms, where you'll observe experienced teachers, instruct students, and be mentored. Your degree will culminate in the completion of a semester-long student teaching internship, where you'll plan and teach the curriculum as well as manage and assess learners.

Total Program Hours- 120 Credit Hours

Foundational Core- 34 Credit Hours

SEU Foundations- 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation- 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry- 22 Credit Hours

Discursive Inquiry- 6 Credit Hours

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

or

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

or

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

or

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and

analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry (6 credits) Select Two:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

EDUC 2233 - EDUCATIONAL PSYCHOLOGY

This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.

Prerequisites & Notes

None

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 57 Credit Hours

EDUC 2143 - FOUNDATIONS OF EDUCATION & INSTRUCTIONAL DESIGN

This course is a study of the nature and character of American education and how it has been influenced by our social structure, social values, and history. The course includes an introduction to subject area competencies, professional skills and competencies, benchmarks for the pre-professional level of accomplished practices for teachers, and the Code of Ethics and Professional Conduct. Students will learn the principles of effective instructional design and delivery in the PreK-12 setting and gain practice in writing Florida standards-based lesson plans that include differentiated instruction and assessment.

Prerequisites & Notes

None

Credits: 3

EDUC 3713 - FAITH INTEGRATION IN EDUCATION

This course is designed to assist educators in effectively and legally integrating their Christian faith into school and classroom settings.

Prerequisites & Notes

None

Credits: 3

EDUC 3493 - LITERACY FOUNDATIONS 1: THE SCIENCE OF READING

This course is a study of scientific theory and effective approaches for reading instruction, focusing on reading as the interactive weaving of word recognition and language comprehension. The essential components of literacy are studied: oral language, phonological awareness, phonics, fluency, vocabulary, and comprehension. Characteristics of proficient readers, striving readers, and readers with dyslexia are examined along with practices for differentiating reading instruction.

Prerequisites & Notes

None

Credits: 3

EDUC 3353 - EMPOWERING ESOL TEACHERS

This course is an overview of curriculum, instructional methods and materials, testing and evaluation, and cross-cultural communication processes and linguistic principles as related to instructing English Language Learners (ELLs) in the PreK-12 classroom.

Prerequisites & Notes

None

Credits: 3

ESED 3113 - SURVEY OF THE EXCEPTIONAL LEARNER

This is a required course for certification in all Education programs, including Music Education. This is an introductory course that examines the history, characteristics, and issues in exceptional education. The course covers all areas of exceptionality and their manifestations from early childhood through adulthood. It is designed to provide students with a firm grounding in the foundations of special education and expose them to the reconstruction of the field, in order that they may better deal with new and ever-changing developments. In addition to classroom meetings, a minimum of 10 hours of observation/participation in a clinical setting is required. This course is recommended to be taken prior to any other Exceptional Student Education courses.

Prerequisites & Notes

None

Credits: 3

EDUC 3503 - INSTRUCTIONAL TECHNOLOGY

This course is designed to develop skills and techniques needed for the selection, utilization, and production of classroom instructional materials and for application and integration of educational technology and media to all areas of the curriculum, appropriate to PreK-12 students' developmental level.

Prerequisites & Notes

None

Credits: 3

EDUC 3133 - ASSESSMENT OF LEARNERS

This course focuses on the educational levels and needs of all students, including exceptional, culturally and/or linguistically diverse, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and curriculum-based assessments are included. Use of test results in program planning is emphasized.

Prerequisites & Notes

None

Credits: 3

EDUC 3523 - TEACHING LITERACY IN CONTENT AREAS

This course will provide students with strategies and tools for becoming a facilitating and reflective practitioner, teaching reading across content areas, and helping students discover that content area learning is made richer when reading, writing, speaking, and listening are taught together. Particular emphasis is placed on a balanced approach to reading, specific reading and comprehension strategies for content reading, the role of reflection in helping students to think critically, reading for diverse students, and the use of appropriate texts and media.

Prerequisites & Notes

None

Credits: 3

EDUC 4433 - CLASSROOM & BEHAVIOR MANAGEMENT - SECONDARY SCHOOL

This course is the study of models and strategies of behavior management appropriate for specific populations of students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, conflict resolution, culture, and demographics. The course includes methodology for managing a learning environment utilizing research-based best practices in education.

Prerequisites & Notes

None

Credits: 3

EDUC 3243 - TEACHING SOCIAL SCIENCE IN SEC SCHOOL

This course is a study of strategies, techniques, materials, technology, and current research used in the teaching of social science concepts to secondary school students. Students will review the traditional and contemporary standards involved, develop an awareness of the professional resources available for teachers, and prepare unit lesson plans with related assessment procedures on a variety of topics. Emphasis is on effective teacher behaviors in areas of instructional organization and development, presentation of subject matter, and verbal/nonverbal communication.

Prerequisites & Notes

None

Credits: 3

EDUC 3663 - LITERATURE FOR SECONDARY TEACHERS

This course is a study of specific literature typically taught in secondary schools and aligned to the FLDOE competencies and skills and national/state/district-adopted content standards.

Prerequisites & Notes

None

Credits: 3

Specialization Requirements - 24 hours: (24 from below + 3 HIST from CORE+ 3 PSYCH from CORE)

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

Public Policy: 3 hours needed- Choose one from the following:

POLS 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

POLS 2403 - UNITED STATES CONSTITUTION

A study of the legal culture in the United States, including the British common law system, the origin of the U.S. Constitution, the amendments, and the landmark cases.

Prerequisites & Notes

NULL

Credits: 3

Economics: 3 hours needed- Choose one from the following:

BUSI 2103 - MACROECONOMICS

This course will cover basic concepts of supply and demand, production possibilities, the circular flow concept and related topics of GDP, inflation, and employment/unemployment, fiscal and monetary policy, and the workings of the monetary system.

*Do not register for this course if you have taken BBUS 2103

Prerequisites & Notes

None

Credits: 3

BUSI 2203 - MICROECONOMICS

This survey course develops the concepts of individual economic units, such as households, firms, and industries. In this study, topics will include economic behaviors relating to spending, saving, investment, labor economics, and prices.

Prerequisites & Notes

None

Credits: 3

Cross-Cultural History: 6 hours needed- Choose two from the following:

HIST 4523 - THE CIVIL RIGHTS MOVEMENT

NULL

Prerequisites & Notes

NULL

Credits: 3

HIST 4533 - AFRICAN AMERICAN HISTORY

A survey of the African American experience including history and culture from the early 17th century through the present day. Emphasis is placed on the slave experience, the debate over abolitionism, emancipation, post-Civil War segregation, the Civil Rights movement, and the contributions of African Americans to science, politics, music, and literature.

Prerequisites & Notes

NULL

Credits: 3

HIST 4833 - LATIN AMERICAN HISTORY

A survey of the European impact upon the peoples of the Caribbean and Central and South America, and their development since the wars of liberation, together with the basic elements of present culture.

Prerequisites & Notes

NULL

Credits: 3

Upper-level History: 9 hours needed- Choose three from the following:

HIST 3123 - AMERICAN COLONIAL HISTORY

A study of the founding and development of Britain's North American colonies. Topics include Jamestown, the Pilgrims and Puritans, Quaker Pennsylvania, relations with the Native Americans, the Great Awakening, and the French and Indian War.

Prerequisites & Notes

NULL

Credits: 3

HIST 3353 - THE EMERGENCE OF MODERN AMERICA-WI 1877-1917

A study of the period 1877-1917 in American history. Topics include the effects of industrialization, the politics of the period, westward expansion, urbanization, the Social Gospel movement, Populism, the Spanish-American War, and Progressivism.

Prerequisites & Notes

NULL

Credits: 3

HIST 3373 - THE UNITED STATES, 1917-1945

A study of the period 1917-1945 in American history. Topics include the Wilson presidency, World War I, the decade of the 1920's, the Great Depression, Franklin Roosevelt's presidency, the New Deal, and World War II.

Prerequisites & Notes

NULL

Credits: 3

HIST 3383 - THE AMERICAN REPUBLIC, 1789-1848

This course is a study of the era that begins immediately after ratification of the Constitution and continues through the Mexican War of 1846-1848. Topics include presidential administrations and their policies from Washington to Polk, the challenges of the War of 1812, the emergence of slavery as a political issue, and the religious movements of the era.

Prerequisites & Notes

NULL

Credits: 3

HIST 3433 - THE CIVIL WAR ERA

A study of the era of the American Civil War. Topics include sectional tensions, the debates over slavery and states' rights, the coming of the war, the battles of the war, and Reconstruction.

Prerequisites & Notes

NULL

Credits: 3

HIST 3573 - THE UNITED STATES SINCE 1945

A study of the history of the United States since 1945. Topics include the Cold War, postwar cultural and intellectual trends, the turmoil of the 1960s, détente, the cultural shifts of the 1960s and 1970s, the conservative resurgence, and the U.S. in the twenty-first century.

Prerequisites & Notes

NULL

Credits: 3

HIST 4313 - THE AMERICAN REVOLUTION

A study of the era of the American Revolution from 1763 to the ratification of the Constitution. Topics include the causes of the Revolution, the events leading to war, the Revolutionary War, and the writing and ratification of the constitution.

Prerequisites & Notes

NULL

Credits: 3

Divine Design (Major Specific Experiential Learning)- 15 Credit Hours

EDUC 2131 - FIELD STUDY 1

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe K-12 settings (approximately 30 hours) and participate in low-level classroom tasks. The College of Education will work cooperatively with schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the General Knowledge Test (GKT) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

EDUC 3351 - FIELD STUDY 2

In this course, students will be placed in a K-12 setting to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the K-12 setting (approximately 45 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with area schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Professional Education Test (PEd) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

EDUC 4221 - FIELD STUDY 3

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the K-12 setting (approximately 60 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with local schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Subject Area Exam (SAE) for their major and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

EDUC 4912 - STUDENT TEACHING

This course provides five seminar-style opportunities for student teachers to examine the experiences they are concurrently having in the full-time student internship in the PreK-12 setting. Seminars are designed to respond to the immediate needs of the student teachers and offer support, encouragement, and insights into the teaching process and profession. Guest speakers will play an important role in enriching the program and providing first-hand experiences from the classroom and administrative levels.

Prerequisites & Notes

Attempt all required portions of the FTCE

Credits: 12

Divine Design - 14 Credits

To meet the Divine Design requirement, students may earn credit hours in general elective courses, declared minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hours), PRAC 1003 (3 credit hours), PRAC 1004 (4 credit hours), up to 24 credit hours. General Electives are any college-level course that does not satisfy the above program requirements. Students must complete the above program requirements with the remaining credit hours earned in the Divine Design to meet the total program hours.

Certificate, Adaptive Physical Education

With the opening of Southeastern University College of Education's lab school, Pathways School of Excellence (PSE), a unique opportunity is evident to further enhance the expertise of the candidates in our education degree programs. Because PSE will provide a full academic schedule, the students enrolled will be provided physical education as part of their day. To that end, the goal of this certificate is to provide the support for PSE students through active participation of our education candidates.

Total Hours Required - 12 Credit Hours

PEDU 4003 - DESIGN/CONTENT OF TEACHING P.E.

This course focuses on principles of successful teaching including lesson plans, motivating students, learning communities, class organization & management, assessment, various models of teaching, role & philosophy of the physical educator & curriculum for teaching physical education.

Prerequisites & Notes

NULL

Credits: 3

ESED 3113 - SURVEY OF THE EXCEPTIONAL LEARNER

This is a required course for certification in all Education programs, including Music Education. This is an introductory course that examines the history, characteristics, and issues in exceptional education. The course covers all areas of exceptionality and their manifestations from early childhood through adulthood. It is designed to provide students with a firm grounding in the foundations of special education and expose them to the reconstruction of the field, in order that they may better deal with new and ever-changing developments. In addition to classroom meetings, a minimum of 10 hours of observation/participation in a clinical setting is required. This course is recommended to be taken prior to any other Exceptional Student Education courses.

Prerequisites & Notes

None

Credits: 3

ESED 4533 - CLASSROOM & BEHAVIOR MANAGEMENT - ESE

This course is the study of models and strategies of behavior management appropriate for specific populations of students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, conflict resolution, culture, and demographics. The course includes methodology for managing a learning environment utilizing research-based best practices in education.

Prerequisites & Notes

None

Credits: 3

KINS 3123 - ADAPTIVE PHYSICAL EDUCATION

An analysis of the neuromuscular and perceptual motor development of individuals with limited abilities and a study of activities designed to improve their motor skills. An introduction to some special populations in the clinical setting will also be introduced.

Prerequisites & Notes

NULL

Credits: 3

In KINS 3123, students will be required to participate in a minimum of 30 hours of field experience. The course will delineate the requirements to be met.

Certificate, Deaf Studies

TOTAL PROGRAM - 15 Credit Hours

American Sign Language - 12 Credit Hours

Communication Sciences and Disorders - 3 Credit Hours

CSDS 4013 - DEAF PERSPECTIVES

This course studies the sociological issues concerning the deaf community's interactions with and among various people groups. Social and psychological meaning of deafness, deaf community, education of deaf children, sign languages, and historical trends are addressed.

Prerequisites & Notes

NULL

Credits: 3

Certificate, Serving Individuals with Disabilities

Total Hours Required - 13 Credit Hours

ESED 3143 - INTRODUCTION TO LANGUAGE DEVELOPMENT & COMMUNICATION DISORDERS

This course addresses language development, including identification and remediation of communication and language disorders. There is an emphasis on the impact of speech and language disorders on academic success and achievement. Further, students will be presented with an overview of alternative/augmentative modes of communication and development of curriculum in these areas.

Prerequisites & Notes

None

Credits: 3

ESED 3113 - SURVEY OF THE EXCEPTIONAL LEARNER

This is a required course for certification in all Education programs, including Music Education. This is an introductory course that examines the history, characteristics, and issues in exceptional education. The course covers all areas of exceptionality and their manifestations from early childhood through adulthood. It is designed to provide students with a firm grounding in the foundations of special education and expose them to the reconstruction of the field, in order that they may better deal with new and ever-changing developments. In addition to classroom meetings, a minimum of 10 hours of observation/participation in a clinical setting is required. This course is recommended to be taken prior to any

other Exceptional Student Education courses.

Prerequisites & Notes

None

Credits: 3

ESED 4533 - CLASSROOM & BEHAVIOR MANAGEMENT - ESE

This course is the study of models and strategies of behavior management appropriate for specific populations of students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, conflict resolution, culture, and demographics. The course includes methodology for managing a learning environment utilizing research-based best practices in education.

Prerequisites & Notes

None

Credits: 3

This course can be substituted for EDUC 4433.

EDUC 3133 - ASSESSMENT OF LEARNERS

This course focuses on the educational levels and needs of all students, including exceptional, culturally and/or linguistically diverse, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and curriculum-based assessments are included. Use of test results in program planning is emphasized.

Prerequisites & Notes

None

Credits: 3

ESED 3111 - ESE FIELD STUDY 1

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This experience is designed to allow students multiple opportunities to observe the K-12 setting (approximately 30 hours) and participate in low-level classroom tasks. The College of Education will work cooperatively with area schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the General Knowledge Test (GKT) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

Students will be required to participate in a minimum of 30 hours of field experience in an ESE placement. The course will delineate the requirements to be met. Those requirements will be added to a checklist, signed by the professor, with a log from the classroom teacher of the field placement, as an indicator of all requirements met.

Minor, Early Childhood Education

Early Childhood Education - 18 Credit Hours

ECED 2433 - DEVELOPMENT OF THE YOUNG CHILD

This course provides an in-depth understanding of the development aspects of the young child from conception to age eight. The course also examines implications for curriculum.

Prerequisites & Notes

None

Credits: 3

EDUC 3233 - LITERACY FOUNDATIONS 2: LANGUAGE ARTS & LITERATURE

This course focuses on the educational levels and needs of all students, including exceptional, culturally and/or linguistically diverse, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and curriculum-based assessments are included. Use of test results in program planning is emphasized.

Prerequisites & Notes

None

Credits: 3

EDUC 2233 - EDUCATIONAL PSYCHOLOGY

This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.

Prerequisites & Notes

None

Credits: 3

EDUC 2143 - FOUNDATIONS OF EDUCATION & INSTRUCTIONAL DESIGN

This course is a study of the nature and character of American education and how it has been influenced by our social structure, social values, and history. The course includes an introduction to subject area competencies, professional skills and competencies, benchmarks for the pre-professional level of accomplished practices for teachers, and the Code of Ethics and Professional Conduct. Students will learn the principles of effective instructional design and delivery in the PreK-12 setting and gain practice in writing Florida standards-based lesson plans that include differentiated instruction and assessment.

Prerequisites & Notes

None

Credits: 3

ECED 2131 - FIELD STUDY I

In this course, students will be placed in a PreK-3 setting in area public and private schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe PreK-3 settings (approximately 30 hours) and participate in low-level classroom tasks. The College of Education will work cooperatively with schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the General Knowledge Test (GKT) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 3

ECED 4123 - CLASSROOM & BEHAVIOR MANAGEMENT - EARLY CHILDHOOD

This course is designed to help in the identification of developmentally-appropriate models and strategies for guiding, disciplining, and managing children's behavior. Included are methods for developing intrinsic motivation in children and conflict resolution among children. During the course, students will identify environmental influences on the behaviors of young children from all cultures and familial situations by utilizing research-based best practices in education.

Prerequisites & Notes

None

Credits: 3

Minor, Elementary Education

If you are interested in a teaching certificate, please contact your faculty advisor.

TOTAL PROGRAM - 18

Minor Core - 12 Credit Hours

EDUC 2143 - FOUNDATIONS OF EDUCATION & INSTRUCTIONAL DESIGN

This course is a study of the nature and character of American education and how it has been influenced by our social structure, social values, and history. The course includes an introduction to subject area competencies, professional skills and competencies, benchmarks for the pre-professional level of accomplished practices for teachers, and the Code of Ethics and Professional Conduct. Students will learn the principles of effective instructional design and delivery in the PreK-12 setting and gain practice in writing Florida standards-based lesson plans that include differentiated instruction and assessment.

Prerequisites & Notes

None

Credits: 3

EDUC 2233 - EDUCATIONAL PSYCHOLOGY

This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.

Prerequisites & Notes

None

Credits: 3

EDUC 3023 - TRAUMA-INFORMED TEACHING

This course is a study of the impacts and types of trauma that affect K-12 students' well-being and classroom learning. Adverse Childhood Experiences (ACEs) studies and classroom strategies for mitigating the effects of childhood trauma are outlined. Focus is given to the review of trauma's impact on the K-12 student and how the teacher can create a trauma-informed classroom to proactively empathize and care for affected students.

Prerequisites & Notes

None

Credits: 3

ELED 4333 - CLASSROOM & BEHAVIOR MANAGEMENT - ELEMENTARY

This course is the study of models and strategies of behavior management appropriate for specific populations of students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, conflict resolution, culture, and demographics. The course includes methodology for managing a learning environment utilizing research-based best practices in education.

Prerequisites & Notes

None

Credits: 3

Minor Electives - Select Two:

EDUC 3493 - LITERACY FOUNDATIONS 1: THE SCIENCE OF READING

This course is a study of scientific theory and effective approaches for reading instruction, focusing on reading as the interactive weaving of word recognition and language comprehension. The essential components of literacy are studied: oral language, phonological awareness, phonics, fluency, vocabulary, and comprehension. Characteristics of proficient readers, striving readers, and readers with dyslexia are examined along with practices for differentiating reading instruction.

Prerequisites & Notes

None

Credits: 3

EDUC 3503 - INSTRUCTIONAL TECHNOLOGY

This course is designed to develop skills and techniques needed for the selection, utilization, and production of classroom instructional materials and for application and integration of educational technology and media to all areas of the curriculum, appropriate to PreK-12 students' developmental level.

Prerequisites & Notes

None

Credits: 3

ESED 3113 - SURVEY OF THE EXCEPTIONAL LEARNER

This is a required course for certification in all Education programs, including Music Education. This is an introductory course that examines the history, characteristics, and issues in exceptional education. The course covers all areas of exceptionality and their manifestations from early childhood through adulthood. It is designed to provide students with a firm grounding in the foundations of special education and expose them to the reconstruction of the field, in order that they may better deal with new and ever-changing developments. In addition to classroom meetings, a minimum of 10 hours of observation/participation in a clinical setting is required. This course is recommended to be taken prior to any other Exceptional Student Education courses.

Prerequisites & Notes

Credits: 3

GEDU 3023 - TRAUMA INFORMED TEACHING

This course is a study of the impacts and types of trauma that affect K-12 student well-being and classroom learning. Adverse Childhood Experiences (ACEs) studies and classroom strategies for mitigating the effects of childhood trauma are outlined. Focus given to the review of trauma's impact on the K-12 student and how the teacher can create a trauma-informed classroom to proactively empathize and care for affected students.

Prerequisites & Notes

None

Credits: 3

EDUC 4433 - CLASSROOM & BEHAVIOR MANAGEMENT - SECONDARY SCHOOL

This course is the study of models and strategies of behavior management appropriate for specific populations of students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, conflict resolution, culture, and demographics. The course includes methodology for managing a learning environment utilizing research-based best practices in education.

Prerequisites & Notes

None

Credits: 3

Electives - 3 Credit Hours

Select one of the following:

EDUC 3503 - INSTRUCTIONAL TECHNOLOGY

This course is designed to develop skills and techniques needed for the selection, utilization, and production of classroom instructional materials and for application and integration of educational technology and media to all areas of the curriculum, appropriate to PreK-12 students' developmental level.

Prerequisites & Notes

None

Credits: 3

EDUC 3523 - TEACHING LITERACY IN CONTENT AREAS

This course will provide students with strategies and tools for becoming a facilitating and reflective practitioner, teaching reading across content areas, and helping students discover that content area learning is made richer when reading, writing, speaking, and listening are taught together. Particular emphasis is placed on a balanced approach to reading, specific reading and comprehension strategies for content reading, the role of reflection in helping students to think critically, reading for diverse students, and the use of appropriate texts and media.

Prerequisites & Notes

None

Credits: 3

Methods Elective - 3 Credit Hours

Select one of the following methods courses, depending on your intended teaching discipline:

EDUC 3143 - TEACHING BIOLOGY IN SECONDARY SCHOOL

This course is a study and utilization of the methods on teaching biology in secondary schools. Emphasis is on the use of appropriate strategies, materials, and evaluation techniques. Current issues, approaches, and trends in biology are reviewed.

Prerequisites & Notes

None

Credits: 3

EDUC 3243 - TEACHING SOCIAL SCIENCE IN SEC SCHOOL

This course is a study of strategies, techniques, materials, technology, and current research used in the teaching of social science concepts to secondary school students. Students will review the traditional and contemporary standards involved, develop an awareness of the professional resources available for teachers, and prepare unit lesson plans with related assessment procedures on a variety of topics. Emphasis is on effective teacher behaviors in areas of instructional organization and development, presentation of subject matter, and verbal/nonverbal communication.

Prerequisites & Notes

None

Credits: 3

EDUC 3653 - TEACHING ENGLISH IN SECONDARY SCHOOL

This course is a study of strategies, techniques, materials, technology, and current research used in the teaching of English concepts to secondary school students. Students will review the traditional and contemporary standards involved in teaching English at the secondary school level, develop an awareness of the professional resources available for teachers, and prepare unit and lesson plans with related assessment procedures on a variety of topics.

Prerequisites & Notes

None

Credits: 3

EDUC 4373 - TEACHING MATH IN THE SECONDARY SCHOOL

The focus of this course is on unit planning, instructional methods, resource selection, and evaluation procedures. Modern techniques and methods of teaching mathematics in secondary school are presented with attention given to diverse learners and special learning needs. Application of theoretical understanding and skills is achieved through micro-teaching lessons.

Prerequisites & Notes

None

Credits: 3

TOTAL PROGRAM - 18 Credit Hours

Bachelor of Science & Masters of Education., Exceptional Student Education - 5 Year Plan

K-12, Elem. ED. K-6, Mid. Grades Content 5-9, with ESOL, Reading, Gifted, and Autism Endorsements

Year One

Fall Semester

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Creative-Aesthetic Inquiry (3 Credits) Select one:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Select One(1) of the Following - 3 Credit Hours

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Spring Semester

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will

focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

EDUC 2143 - FOUNDATIONS OF EDUCATION & INSTRUCTIONAL DESIGN

This course is a study of the nature and character of American education and how it has been influenced by our social structure, social values, and history. The course includes an introduction to subject area competencies, professional skills and competencies, benchmarks for the pre-professional level of accomplished practices for teachers, and the Code of Ethics and Professional Conduct. Students will learn the principles of effective instructional design and delivery in the PreK-12 setting and gain practice in writing Florida standards-based lesson plans that include differentiated instruction and assessment.

Prerequisites & Notes

None

Credits: 3

EDUC 2233 - EDUCATIONAL PSYCHOLOGY

This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.

Prerequisites & Notes

None

Credits: 3

ESED 3111 - ESE FIELD STUDY 1

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This experience is designed to allow students multiple opportunities to observe the K-12 setting (approximately 30 hours) and participate in low-level classroom tasks. The College of Education will work cooperatively with area schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the General Knowledge Test (GKT) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

Quantitative Inquiry (3 credits) Select One:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Year Two

Fall Semester

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

EDUC 3493 - LITERACY FOUNDATIONS 1: THE SCIENCE OF READING

This course is a study of scientific theory and effective approaches for reading instruction, focusing on reading as the interactive weaving of word recognition and language comprehension. The essential components of literacy are studied: oral language, phonological awareness, phonics, fluency, vocabulary, and comprehension. Characteristics of proficient readers, striving readers, and readers with dyslexia are examined along with practices for differentiating reading instruction.

Prerequisites & Notes

None

Credits: 3

EDUC 3353 - EMPOWERING ESOL TEACHERS

This course is an overview of curriculum, instructional methods and materials, testing and evaluation, and cross-cultural communication processes and linguistic principles as related to instructing English Language Learners (ELLs) in the PreK-12 classroom.

Prerequisites & Notes

None

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

Natural-Scientific Inquiry (4 credits) Select one:

NSCI 1023 - INTRO TO SCIENCE AND TECH

A course designed to develop the foundation for the scientific literacy necessary to understand technology's role in modern society. Basic scientific concepts underlying matter, energy, life and systems are introduced, and students engage in development of reasoning and problem-solving skills associated with scientific issues. The course is an introduction with applications to environmental science, human biology and health, physical and chemical principles, energy, earth science, and systems. Using an integration approach of the natural sciences allows the student to employ an understanding of science, technology and some current health problem areas in order to appraise alternative futures. Case studies and/or individual student projects will be used.

Prerequisites & Notes

Corequisite: NSCI 102L

Credits: 3

NSCI 102L - INTRO TO SCIENCE AND TECH LAB

Laboratory to accompany NSCI 1023.

Prerequisites & Notes

Corequisite: NSCI 1023

Credits: 1

OR

BIOL 1333 - ESSENTIALS OF HUMAN A & P

This course is a study of the structure, formation and function of the eleven human body systems. Concurrent enrollment in BIOL 133L is required. This course is required for Psychology majors and meets general education requirements for non-science majors only.

Prerequisites & Notes

Corequisite: BIOL 133L

Credits: 3

BIOL 133L - ESSENT OF ANATOMY & PHYSIOLOGY LAB

This course is a laboratory to accompany BIOL 1333.

Prerequisites & Notes

Corequisite: BIOL 1333

Credits: 1

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Spring Semester

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Select a 3 hr course to count toward your General Elective credit requirement. General Electives are any courses that do not satisfy any specific course requirements of your program and which you have not previously taken.

Credits: 3

EDUC 3233 - LITERACY FOUNDATIONS 2: LANGUAGE ARTS & LITERATURE

This course focuses on the educational levels and needs of all students, including exceptional, culturally and/or linguistically diverse, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and curriculum-based assessments are included. Use of test results in program planning is emphasized.

Prerequisites & Notes

None

Credits: 3

EDUC 3713 - FAITH INTEGRATION IN EDUCATION

This course is designed to assist educators in effectively and legally integrating their Christian faith into school and classroom settings.

Prerequisites & Notes

None

Credits: 3

ESED 3211 - ESE FIELD STUDY 2

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This experience is designed to allow students multiple opportunities to observe the K-12 setting (approximately 45 hours) and participate in classroom tasks. The College of Education will work cooperatively with area schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the Professional Education Test (PEd) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

Credits: 3

ELED 3173 - METHODS OF TEACHING ELEMENTARY MATH

In this course, emphasis is on teaching mathematics in elementary schools through the use of appropriate methods, materials, and evaluation techniques. Current issues, strategies, and trends in mathematics are reviewed. Integrated field experiences are included.

Prerequisites & Notes

None

Credits: 3

ESED 4311 - ESE FIELD STUDY 3

In this course, students will be placed in a K-12 setting in area schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the K-12 setting (approximately 60 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. The College of Education will work cooperatively with local schools to place students in classrooms according to the students' major/grade level preference. As part of the course requirements, students must pass the ESE Subject Area Exam (SAE) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

Year Four

Fall Semester

ESED 4533 - CLASSROOM & BEHAVIOR MANAGEMENT - ESE

This course is the study of models and strategies of behavior management appropriate for specific populations of students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, conflict resolution, culture, and demographics. The course includes methodology for managing a learning environment utilizing research-based best practices in education.

Prerequisites & Notes

None

Credits: 3

EDUC 3523 - TEACHING LITERACY IN CONTENT AREAS

This course will provide students with strategies and tools for becoming a facilitating and reflective practitioner, teaching reading across content areas, and helping students discover that content area learning is made richer when reading, writing, speaking, and listening are taught together. Particular emphasis is placed on a balanced approach to reading, specific reading and comprehension strategies for content reading, the role of reflection in helping students to think critically, reading for diverse students, and the use of appropriate texts and media.

Prerequisites & Notes

None

Credits: 3

EDUC 4043 - APPLIED LINGUISTICS

This course is a practical approach to teaching English to speakers of other languages. The course includes topics such as general linguistics, language theory, principles of language acquisition, and techniques for teaching and assessing K-12 ELL students. Special attention is given to the linguistic components of English, namely phonology, morphology, semantics, syntax, discourse, and pragmatics.

Prerequisites & Notes

None

Credits: 3

EDUC 3503 - INSTRUCTIONAL TECHNOLOGY

This course is designed to develop skills and techniques needed for the selection, utilization, and production of classroom instructional materials and for application and integration of educational technology and media to all areas of the curriculum, appropriate to PreK-12 students' developmental level.

Prerequisites & Notes

None

Credits: 3

GENERAL ELECTIVE - 3 HR ELECTIVE

Credits: 3

ELED 3153 - METHODS OF TEACHING ELEMENTARY SOCIAL STUDIES

In this course, emphasis is placed on helping prospective teachers acquire background and skills in developing instructional methods, developmentally appropriate materials, content and evaluation procedures for teaching meaningful social studies to elementary students who bring a variety of cultural and instructional needs to the classroom.

Prerequisites & Notes

None

Credits: 3

ESED 4411 - ESE FIELD STUDY 4

This course will allow students to be placed in an ESE Center School within Polk County Public Schools to complete tasks in the field that are directly tied to the Florida Educator Accomplished Practices (FEAPs). This course is designed to allow students multiple opportunities to observe at the Center School (60 hours) and participate in classroom tasks with students who have low-incidence disabilities including Severe and Multiple Disabilities and Autism Spectrum Disorders. As part of the course requirements, students must pass the Elementary Education Subject Area Exam (SAE) and a middle grades SAE of their choice (Math, Science, English, or Social Science) and provide documentation to the College of Education before the end of the course.

Prerequisites & Notes

None

Credits: 1

Master's Year

Summer Semester

ESED 5633 - HIGH INCIDENCE DISABILITIES

This course focuses on students identified as having high incidence disabilities such as learning disability, attention deficit, and other related mild disabilities. Programming within the regular education setting is emphasized.

Prerequisites & Notes

None

Credits: 3

ESED 5613 - ASSESSMENT OF ESE LEARNERS

This course is designed to provide knowledge regarding assessment procedures, the assessment process (including pre-referral and referral), and protocols utilized in making decisions and judgments regarding individualized educational plans, placements, and programs for students in exceptional education. This introductory course assists students in basic knowledge regarding formal and informal assessment and in the interpretation of test scores.

Prerequisites & Notes

None

Credits: 3

ESED 5663 - AUTISM SPECTRUM DISORDERS

This course is designed to provide students with a broad overview of the area of Autism Spectrum Disorders. There is a particular emphasis on adaptations and modifications to the regular curricular materials, as well as techniques for teaching functional skills.

Prerequisites & Notes

ESED 3113

Credits: 3

Fall Semester

ESED 5653 - EMOTIONAL & BEHAVIORAL DISORDERS

This course is designed to provide students with an overview of historical and theoretical perspectives on educating students with emotional and behavioral differences, to acquire knowledge regarding referral processes, assessment procedures and protocols utilized in making decisions and judgments regarding individualized educational plans, placement and programs, to develop specialized instructional strategies and curriculum to use with the student with emotional disabilities and behavioral disorders, to develop a critical understanding of current practices in service delivery systems, and to examine professional issues and trends that impact the future of the field.

Prerequisites & Notes

ESED 3113

Credits: 3

ESED 5643 - INTELLECTUAL DISABILITIES & GIFTED

This course is designed to provide students with a broad overview of the areas of intellectual, and developmental disabilities. There is a particular emphasis on adaptations and modifications to the regular curricular materials, as well as techniques for teaching functional skills.

Prerequisites & Notes

ESED 3113

Credits: 3

ESED 5623 - TRANSITION

This course provides an overview of exceptionalities as manifested in the adolescent and young adult. Emphasis is placed on planning and programming for the transition of the exceptional adolescent from school to the adult community. Opportunities for the comprehensive study of characteristics, programs, assessment techniques, and strategies essential to meeting the needs of adolescents and adults with learning problems, will be provided. Special and unique problems of teenagers and young adults, curriculum models, materials, teaching strategies, and transition requirements for students with disabilities will be addressed.

Prerequisites & Notes

ESED 3113

Credits: 3

ESED 5533 - GIFTED EDUCATION

This course provides knowledge about students who are gifted in an educational setting. The course presents the characteristics of students who are gifted, including their emotional, academic, and social needs. An emphasis is placed on students with giftedness who are from special populations. The theories and practices of differentiating instruction for students who are gifted in heterogeneous and homogeneous groups will be analyzed.

Prerequisites & Notes

Graduate status

Credits: 3

Spring Semester

ESED 5712 - ESE STUDENT TEACHING

This course is designed to provide opportunities for student teachers to examine the experiences they are having in student internship. Seminars are designed to respond to the immediate needs of the student teachers and offer support, encouragement and insights into the teaching process.

Prerequisites & Notes

Completed course work

Credits: 12

Minor, Classical Education

Total Program: 18 Credit Hours

Minor Core - 18 Credit Hours

EDUC 1103 - INTRODUCTION TO CLASSICAL EDUCATION

This course will provide students with an overview of Classical Christian Education in order to glean a foundational understanding of its roots, practices, goals, and key terms while pursuing the true, the good, and the beautiful.

Prerequisites & Notes

None

Credits: 3

EDUC 4103 - PIETY, WONDER, & MORAL IMAGINATION

A Classical education begins with wonder. This course initiates the Classical order of learning with a Gymnastic and Musical education. Students will learn how these are foundational to the development of a child's moral imagination and intellectual virtues through discussions, readings, and pedagogical practices.

Prerequisites & Notes

EDUC 1103 Introduction to Classical Education, EDUC 1203 Classical Education Philosophy, or EDUC 1303 Classical Education Practices

Credits: 3

EDUC 2203 - COMMUNICATING THE TRIVIUM

After a Gymnastic and Musical education, students begin a Liberal Arts education. This course surveys the first three of these arts known as the Trivium. Studying the "Language Arts" of Grammar, Dialectic, and Rhetoric together provides students ample opportunities to read classic works, discuss rich content, and practice classical pedagogy.

Prerequisites & Notes

EDUC 1103 Introduction to Classical Education, EDUC 1203 Classical Education Philosophy, or EDUC 1303 Classical Education Practices

AND

EDUC 4103 Piety, Wonder & Moral Imagination

Credits: 3

EDUC 2303 - VALUING THE QUADRIVIUM

This course is part two of the overview of the seven Liberal Arts and focuses on the Quadrivium, or the "Mathematical Arts" of arithmetic, geometry, music, and astronomy. Through discussion, the reading of classical texts, and opportunities to practice, students will develop an understanding of the foundational placement of these liberal arts in a Classical education.

Prerequisites & Notes

EDUC 1103 Introduction to Classical Education, EDUC 1203 Classical Education Philosophy, or EDUC 1303 Classical Education Practices

AND

EDUC 4103 Piety, Wonder, & Moral

AND

EDUC 2203 Communicating the Trivium

Credits: 3

EDUC 3203 - THE WONDER OF PHILOSOPHY & THEOLOGY

A Classical education begins and ends with wonder. It embodies the pursuit of truth, goodness, and beauty. It ponders: what is the purpose of education? Who is God? What does it mean to be human? This course walks students through philosophy (the love of wisdom) to Theology (the culmination and purpose of education.) Students will read essential texts and discuss the profound ideas through Socratic dialogue and other Classical practices.

Prerequisites & Notes

EDUC 1103 Introduction to Classical Education, EDUC 1203 Classical Education Philosophy, or EDUC 1303 Classical Education Practices

AND

EDUC 4103 Piety, Wonder, & Moral Imagination

AND

EDUC 2203 Communicating the Trivium

AND

EDUC 2303 Valuing the Quadrivium, or EDUC 2103 Harmonizing the 7 Liberal Arts

Credits: 3

EDUC 4203 - MENTORSHIP & THE GREAT BOOKS

Classical education is the cultivation of wisdom and virtue while pursuing the true, good, and beautiful in all of learning. In this final course students read some of the greatest literature ever written while demonstrating the tools of learning they have gleaned through this course of study to continue to teach themselves. Exhibiting self-governance, students meet regularly with a tutor to discuss the deep ideas within the text, respond with their own writing, and lead their classmates to contemplate the virtues within the text.

Prerequisites & Notes

EDUC 1103 Introduction to Classical Education, EDUC 1203 Classical Education Philosophy, or EDUC 1303 Classical Education Practices

AND

EDUC 4103 Piety, Wonder, & Moral Imagination

AND

EDUC 2203 Communicating the Trivium

AND

EDUC 2303 Valuing the Quadrivium, or EDUC 2103 Harmonizing the 7 Liberal Arts, EDUC 3303 The Wisdom of Education: Philosophy and EDUC 3103 The Telos of Education: Theology, or 3203 The Wonder of Philosophy & Theology

Credits: 3

Online

Bachelor of Science, Global Education Studies (Online)

Bachelor of Science, Global Education Four-Year Plan

As a global education major at Southeastern, you won't have to wait until you graduate and land a job to understand what it takes to be a teacher. Teaching is a hands-on ministry, and Southeastern believes that allowing you to practice your craft in real classrooms through ongoing field studies and student teaching is the best way to prepare you to manage, teach and assess learners of different ages and learning styles. In addition to your real-life training, you will gain a strong foundation of historical perspectives, theory and teaching methods from professors with decades of experience in the classroom. Our faculty is committed not only to equipping you with best practices and strategies but also to helping you navigate today's schools as a Christian professional.

*Note: Students taking courses online outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. State-specific requirements are specified in the SEU Catalog. Your Academic Advisor is available to help integrate these additional courses into your plan.

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Natural-Scientific Inquiry - Select One with Lab:

NSCI 1044 - NUTRITION SCIENCE

This online course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 4

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

Quantitative Inquiry - Select one:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - 6 Credit Hours

GEDU 2233 - EDUCATIONAL PSYCHOLOGY

This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.

Prerequisites & Notes

None

Credits: 3

Choose One of the Following:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 48 Credit Hours

GEDU 2003 - SURVEY OF GLOBAL EDUCATION

This course is a survey of global education trends and pedagogical practices. Emphasis is placed on students integrating into localized teaching systems and cultural awareness of challenges teachers may face teaching across global contexts.

Prerequisites & Notes

None

Credits: 3

GEDU 2013 - SURVEY OF TEACHING METHODS

This course offers a survey of current methods and techniques for teaching across disciplines. Emphasis is placed on K-8 pedagogy and best practices of teaching and learning.

Prerequisites & Notes

None

Credits: 3

GEDU 2143 - FOUNDATIONS OF EDUCATION & INSTRUCTIONAL DESIGN

This course is a study of the nature and character of American education and how it has been influenced by our social structure, social values, and history. The course includes an introduction to subject area competencies, professional skills and competencies, benchmarks for the pre-professional level of accomplished practices for teachers, and the expectations for ethical and professional behavior. Students will learn the principles of effective instructional design and delivery in the K-8 setting and gain practice in writing standards-based lesson plans that include differentiated instruction and assessment.

Prerequisites & Notes

None

Credits: 3

GEDU 3023 - TRAUMA INFORMED TEACHING

This course is a study of the impacts and types of trauma that affect K-12 student well-being and classroom learning. Adverse Childhood Experiences (ACEs) studies and classroom strategies for mitigating the effects of childhood trauma are outlined. Focus given to the review of trauma's impact on the K-12 student and how the teacher can create a trauma-informed classroom to proactively empathize and care for affected students.

Prerequisites & Notes

None

Credits: 3

GEDU 3113 - SURVEY OF THE EXCEPTIONAL LEARNER

This is a required course for all Education programs. This is an introductory course that examines the history, characteristics, and issues in exceptional education. The course covers all areas of exceptionality and their manifestations from early childhood through adulthood. It is designed to provide students with a firm grounding in the foundations of special education and exposes them to the reconstruction of the field, in order that they may better deal with new and ever-changing developments. In addition to classroom meetings, a minimum of 10 hours of observation/participation in a clinical setting is required. This course is a prerequisite for all other Exceptional Student Education courses.

Prerequisites & Notes

None

Credits: 3

GEDU 3133 - ASSESSMENT OF LEARNERS

This course focuses on the educational levels and needs of all students, including exceptional, culturally and/or linguistically diverse, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and curriculum-based assessments are included. Use of test results in program planning is emphasized.

Prerequisites & Notes

None

Credits: 3

GEDU 3143 - LANGUAGE DEVELOPMENT & COMMUNICATION DISORDERS

This course addresses language development, including identification and remediation of communication and language disorders. There is an emphasis on the impact of speech and language disorders on academic success and achievement. Further, students will be presented with an overview of alternative/augmentative modes of communication and development of curriculum in these areas.

Prerequisites & Notes

None

Credits: 3

GEDU 3233 - LITERACY FOUNDATIONS II: LANGUAGE ARTS & LITERATURE

This course investigates children's literature, emphasizing developmentally-appropriate instructional practices. Attention is placed on understanding psychological, social, emotional, and cognitive development as they correlate to motivating students to interact with literature.

Prerequisites & Notes

GEDU 3493

Credits: 3

GEDU 3353 - EMPOWERING ESOL TEACHERS

This course is an overview of curriculum, instructional methods and materials, testing and evaluation, and cross-cultural communication processes and linguistic principles as related to instructing English Language Learners (ELLs) in the K-8 classroom.

Prerequisites & Notes

None

Credits: 3

GEDU 3423 - DIAGNOSIS, ASSESSMENT, & EVALUATION OF READING

This course highlights formal and informal means of evaluations with emphasis on diagnosing reading ability, prescribing for instruction, administering assessment, interpreting measurement terms and data, and maintaining records.

Prerequisites & Notes

None

Credits: 3

GEDU 3493 - LITERACY FOUNDATIONS I: THE SCIENCE OF READING

This course is a study of scientific theory and effective approaches for reading instruction, focusing on reading as the interactive weaving of word recognition and language comprehension. The essential components of literacy are studied: oral language, phonological awareness, phonics, fluency, vocabulary, and comprehension. Characteristics of proficient readers, striving readers, and readers with dyslexia are examined along with practices for differentiating reading instruction.

Prerequisites & Notes

None

Credits: 3

GEDU 3503 - INSTRUCTIONAL TECHNOLOGY

This course is designed to develop skills and techniques needed for the selection, utilization, and production of classroom instructional materials and for application and integration of educational technology and media to all areas of the curriculum, appropriate to students' developmental level.

Prerequisites & Notes

None

Credits: 3

GEDU 3713 - INTEGRATION OF FAITH IN EDUCATION

This course is designed to assist educators in effectively and legally integrating their Christian faith into school and classroom settings.

Prerequisites & Notes

None

Credits: 3

GEDU 4043 - APPLIED LINGUISTICS

This course is a practical approach to teaching English to speakers of other languages. The course includes topics such as general linguistics, language theory, principles of language acquisition, and techniques for teaching and assessing K-12 ELL students. Special attention is given to the linguistic components of English, namely phonology, morphology, semantics, syntax, discourse, and pragmatics.

Prerequisites & Notes

None

Credits: 3

GEDU 4333 - CLASSROOM & BEHAVIOR MANAGEMENT

This course is the study of models and strategies of behavior management appropriate for specific populations of students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, conflict resolution, culture, and demographics. The course includes methodology for managing a learning environment utilizing research-based best practices in education.

Prerequisites & Notes

None

Credits: 3

GEDU 3523 - TEACHING LITERACY IN CONTENT AREA

This course will provide students with strategies and tools for becoming a facilitating and reflective practitioner, teaching reading across content areas, and helping students discover that content area learning is made richer when reading, writing, speaking, and listening are taught together. Particular emphasis is placed on a balanced approach to reading, specific reading and comprehension strategies for content reading, the role of reflection in helping students to think critically, reading for diverse students, and the use of appropriate texts and media.

Prerequisites & Notes

None

Credits: 3

Divine Design (Major Specific Experiential Learning) - 12 Credit Hours

GEDU 2141 - GLOBAL FIELD STUDY I

In this course, students will be placed in a K-8 setting to complete tasks in the field. This course is designed to allow students multiple opportunities to observe the K-8 setting (approximately 30 hours) and participate in low-level classroom tasks in the K-8 setting. Students will need to find placement in schools/classrooms according to the students' major/grade level preference.

Prerequisites & Notes

None

Credits: 1

GEDU 3001 - GLOBAL FIELD STUDY II

In this course, students will be placed in a K-8 setting to complete tasks in the field. This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the K-8 setting (approximately 45 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. Students will need to find placement in schools/classrooms according to the students' major/grade level preference.

Prerequisites & Notes

None

Credits: 1

GEDU 4001 - GLOBAL FIELD STUDY III

In this course, students will be placed in a K-8 setting to complete tasks in the field. This course is designed to allow students multiple opportunities to assume some of the responsibilities of teachers in the K-8 setting (approximately 60 hours) and participate in classroom tasks such as teaching lessons across the curriculum, analyzing and using data to drive lesson planning, parent communication, and classroom management implementation in the K-8 setting. Students will need to find placement in schools/classrooms according to the students' major/grade level preference.

Prerequisites & Notes

None

Credits: 1

GEDU 4009 - INTERNATIONAL STUDENT TEACHING

This course provides five seminar-style opportunities for student teachers to examine the experiences they are concurrently having in the full-time student internship in the K-8 setting. Seminars are designed to respond to the immediate needs of the student teachers and offer support, encouragement, and insights into the teaching process and profession. Guest speakers will play an important role in enriching the program and providing first-hand experiences from the classroom and administrative levels.

Prerequisites & Notes

Acceptance into Internship

Credits: 9

Divine Design (Minor, Electives, Experiential Learning) 26 Credits

General Electives are any college-level courses that do not satisfy specific program requirements. To meet the Divine Design core requirements, students may declare minors, enroll in elective credit, and enjoy experiential learning like study abroad, internships, or practicum. Practicum course options include PRAC 1001 (1 hr), PRAC 1002 (2 hrs), PRAC 1003 (3 hrs), PRAC 1004 (4 hrs). Students may earn up to 24 credit hours toward their degree program through experiential learning practicum.

Total Program Hours- 120 Credit Hours

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

AND

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Humanities - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Humanities

PMIN 2123 - CHRISTIAN SPIRITUALITY

This course empowers the student to evaluate spiritual growth and cultivate their personal relationship with God. The course provides an opportunity for students to practice classical Christian spiritual disciplines that nurture intimacy with God. Students will also become acquainted with various perspectives on spiritual life from the area of historical theology.

Prerequisites & Notes

NULL

Credits: 3

Maryland

Maryland students need an additional six credit hours in one or more of the following five areas: (i) Arts and humanities; (ii) English composition; (iii) Social and behavioral sciences; (iv) Mathematics; and (v) Biological and physical sciences.

Minnesota

Communication

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Natural Science

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

OR

NSCI 1043 - NUTRITION SCIENCE

This course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 3

NSCI 104L - NUTRITION SCIENCE LABORATORY

This course is to accompany NSCI 1043, Nutrition Science.

Prerequisites & Notes

NULL

Credits: 1

Social Science

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Montana

Montana requires 6 credit hours of natural science with a laboratory experience. Students may choose to take BIOL 1334 to complete the requirement or any other science course to meet the credit hour requirement.

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

Nevada

3 credit hours needed. The Socio-Historical requirement must be fulfilled by taking PPOL 2433 or by earning credit for one of the following combinations of classes from an accredited Nevada college: 1) HIST 100, 2) PCS 101, 3) HIST 101 and HIST 102, or 4) or HIST 101 and 217.

Ohio

Ohio students need an additional two credit hours in one or more of the following areas: Oral and Written Communication, Mathematics, Statistics and Logic, Arts, Humanities, Culture and Diversity, Natural Sciences, Technology and Innovation.

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

* if not already taken or 2 more credits to get to 36 hours

Oklahoma

In addition to the courses listed below, Oklahoma students need an additional 7 credit hours in one or more of the following: History, Social Science, Behavioral Science, Humanities, Math, Natural Science, Language, or Fine Arts.

PPOL 2413 - UNITED STATES GOVERNMENT

This course is an examination of American politics: the constitutional basis, organization, and function of our government.

Prerequisites & Notes

NULL

Credits: 3

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Minor, Elementary Education (Online)

Total Program - 18 Credit Hours

Minor Core - 12 Credit Hours

GEDU 2143 - FOUNDATIONS OF EDUCATION & INSTRUCTIONAL DESIGN

This course is a study of the nature and character of American education and how it has been influenced by our social structure, social values, and history. The course includes an introduction to subject area competencies, professional skills and competencies, benchmarks for the pre-professional level of accomplished practices for teachers, and the expectations for ethical and professional behavior. Students will learn the principles of effective instructional design and delivery in the K-8 setting and gain practice in writing standards-based lesson plans that include differentiated instruction and assessment.

Prerequisites & Notes

None

Credits: 3

GEDU 2233 - EDUCATIONAL PSYCHOLOGY

This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.

Prerequisites & Notes

None

Credits: 3

GEDU 3023 - TRAUMA INFORMED TEACHING

This course is a study of the impacts and types of trauma that affect K-12 student well-being and classroom learning. Adverse Childhood Experiences (ACEs) studies and classroom strategies for mitigating the effects of childhood trauma are outlined. Focus given to the review of trauma's impact on the K-12 student and how the teacher can create a trauma-informed classroom to proactively empathize and care for affected students.

Prerequisites & Notes

None

Credits: 3

GEDU 4333 - CLASSROOM & BEHAVIOR MANAGEMENT

This course is the study of models and strategies of behavior management appropriate for specific populations of students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, conflict resolution, culture, and demographics. The course includes methodology for managing a learning environment utilizing research-based best practices in education.

Prerequisites & Notes

None

Credits: 3

Minor Electives - Select Two:**GEDU 2013 - SURVEY OF TEACHING METHODS**

This course offers a survey of current methods and techniques for teaching across disciplines. Emphasis is placed on K-8 pedagogy and best practices of teaching and learning.

Prerequisites & Notes

None

Credits: 3

GEDU 3493 - LITERACY FOUNDATIONS I: THE SCIENCE OF READING

This course is a study of scientific theory and effective approaches for reading instruction, focusing on reading as the interactive weaving of word recognition and language comprehension. The essential components of literacy are studied: oral language, phonological awareness, phonics, fluency, vocabulary, and comprehension. Characteristics of proficient readers, striving readers, and readers with dyslexia are examined along with practices for differentiating reading instruction.

Prerequisites & Notes

None

Credits: 3

GEDU 3503 - INSTRUCTIONAL TECHNOLOGY

This course is designed to develop skills and techniques needed for the selection, utilization, and production of classroom instructional materials and for application and integration of educational technology and media to all areas of the curriculum, appropriate to students' developmental level.

Prerequisites & Notes

None

Credits: 3

Minor, Classical Education (Online)

Minor, Classical Education Plan (Online)

Total Program: 18-21 Credit Hours

Select One:

EDUC 1203 - CLASSICAL EDUCATION PHILOSOPHY

This introduction to Classical Education focuses on the foundations and ideology of this distinctive approach to education that has withstood the test of time

Prerequisites & Notes

None

Credits: 3

EDUC 1303 - CLASSICAL EDUCATION PRACTICES

This course focuses on the practices of Classical Christian Education that sets it apart from modern education. With an emphasis on pursuing the true, the good, and the beautiful, students experience classical pedagogy in an online environment.

Prerequisites & Notes

None

Credits: 3

Liberal Arts

EDUC 2103 - HARMONIZING THE 7 LIBERAL ARTS

The Liberal Arts (artes liberales) are comprised of the Trivium (Language Arts) and the Quadrivium (Mathematical Arts). Often misunderstood, this course gives students a clear, concise overview of these tools of learning designed to foster a spirit of inquiry and to make one free.

Prerequisites & Notes

EDUC 1103 Introduction to Classical Education, EDUC 1203 Classical Education Philosophy, or EDUC 1303 Classical Education Practices
AND

EDUC 4103 Piety, Wonder & Moral Imagination

Credits: 3

OR

EDUC 2203 - COMMUNICATING THE TRIVIUM

After a Gymnastic and Musical education, students begin a Liberal Arts education. This course surveys the first three of these arts known as the Trivium. Studying the "Language Arts" of Grammar, Dialectic, and Rhetoric together provides students ample opportunities to read classic works, discuss rich content, and practice classical pedagogy.

Prerequisites & Notes

EDUC 1103 Introduction to Classical Education, EDUC 1203 Classical Education Philosophy, or EDUC 1303 Classical Education Practices

AND

EDUC 4103 Piety, Wonder & Moral Imagination

Credits: 3

and

EDUC 2303 - VALUING THE QUADRIVIVUM

This course is part two of the overview of the seven Liberal Arts and focuses on the Quadrivium, or the "Mathematical Arts" of arithmetic, geometry, music, and astronomy. Through discussion, the reading of classical texts, and opportunities to practice, students will develop an understanding of the foundational placement of these liberal arts in a Classical education.

Prerequisites & Notes

EDUC 1103 Introduction to Classical Education, EDUC 1203 Classical Education Philosophy, or EDUC 1303 Classical Education Practices

AND

EDUC 4103 Piety, Wonder, & Moral

AND

EDUC 2203 Communicating the Trivium

Credits: 3

Minor Core

EDUC 4103 - PIETY, WONDER, & MORAL IMAGINATION

A Classical education begins with wonder. This course initiates the Classical order of learning with a Gymnastic and Musical education. Students will learn how these are foundational to the development of a child's moral imagination and intellectual virtues through discussions, readings, and pedagogical practices.

Prerequisites & Notes

EDUC 1103 Introduction to Classical Education, EDUC 1203 Classical Education Philosophy, or EDUC 1303 Classical Education Practices

Credits: 3

EDUC 3303 - THE WISDOM OF EDUCATION: PHILOSOPHY

The Ancients defined Philosophy as the love of wisdom. This study allows us to grapple with the world around us, ethics, and questions like: "What does it mean to be human? What is the role of the church in education? and What makes science, science?" After developing the tools of learning through the Liberal Arts, students pursue the unity of knowledge through the study of Moral, Natural and Divine Philosophy.

Prerequisites & Notes

EDUC 1103 Introduction to Classical Education, EDUC 1203 Classical Education Philosophy, or EDUC 1303 Classical Education Practices

AND

EDUC 4103 Piety, Wonder, & Moral Imagination

AND

EDUC 2203 Communicating the Trivium

AND

Valuing the Quadrivium, or EDUC 2103 Harmonizing the Seven Liberal Arts

Credits: 3

EDUC 3103 - THE TELOS OF EDUCATION; THEOLOGY

Medieval teachers called Theology "the queen of the sciences," providing us with a clue as to the significant placement of Theology as the culmination of the order of learning. Theology forms piety, unifies learning, informs philosophy, and unites all knowledge; it is the end and purpose of education.

Prerequisites & Notes

EDUC 1103 Introduction to Classical Education, EDUC 1203 Classical Education Philosophy, or EDUC 1303 Classical Education Practices

AND

EDUC 4103 Piety, Wonder, & Moral Imagination

AND

EDUC 2203 Communicating the Trivium

AND

EDUC 2303 Valuing the Quadrivium, or EDUC 2103 Harmonizing the 7 Liberal Arts

AND

EDUC 3303 The Wisdom of Education: Philosophy

Credits: 3

EDUC 4203 - MENTORSHIP & THE GREAT BOOKS

Classical education is the cultivation of wisdom and virtue while pursuing the true, good, and beautiful in all of learning. In this final course students read some of the greatest literature ever written while demonstrating the tools of learning they have gleaned through this course of study to continue to teach themselves. Exhibiting self-governance, students meet regularly with a tutor to discuss the deep ideas within the text, respond with their own writing, and lead their classmates to contemplate the virtues within the text.

Prerequisites & Notes

EDUC 1103 Introduction to Classical Education, EDUC 1203 Classical Education Philosophy, or EDUC 1303 Classical Education Practices
AND

EDUC 4103 Piety, Wonder, & Moral Imagination

AND

EDUC 2203 Communicating the Trivium

AND

EDUC 2303 Valuing the Quadrivium, or EDUC 2103 Harmonizing the 7 Liberal Arts, EDUC 3303 The Wisdom of Education: Philosophy and EDUC 3103 The Telos of Education: Theology, or 3203 The Wonder of Philosophy & Theology

Site-Based (Partnership)

Bachelor of Science, Global Education Studies (Site-based)

Bachelor of Science, Global Education Four-Year Plan

As a global education major at Southeastern, you won't have to wait until you graduate and land a job to understand what it takes to be a teacher. Teaching is a hands-on ministry, and Southeastern believes that allowing you to practice your craft in real classrooms through ongoing field studies and student teaching is the best way to prepare you to manage, teach and assess learners of different ages and learning styles. In addition to your real-life training, you will gain a strong foundation of historical perspectives, theory and teaching methods from professors with decades of experience in the classroom. Our faculty is committed not only to equipping you with best practices and strategies but also to helping you navigate today's schools as a Christian professional.

*Note: Students taking courses online outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. State-specific requirements are specified in the SEU Catalog. Your Academic Advisor is available to help integrate these additional courses into your plan.

Foundational Core - 34 Credit Hours

SEU Foundations - 3 Credit Hours

CORE 1111 - COMMUNITY AND COLLEGE SUCCESS

This course is an academic introduction to the Southeastern University community and the varied resources available focusing on whole-person success. The course focuses on the college experience, belonging, personal and community awareness, successfully navigating life transitions. Students will introspectively and collaboratively discover how to live and work according to God's call on their life.

Prerequisites & Notes

NULL

Credits: 1

CORE 1112 - DIVINE DESIGN AND MISSIONAL VOCATION

This course prepares students for success in professional, academic, and social settings through leadership development aligned to whole person self-actualization. Through this course, students will explore their Divine Design and the career most aligned to their unique giftings outlining a clear path to personal and professional success. The course will focus on career readiness concepts through an exploration of critical analysis of spirituality and society, modes of inquiry through a deep dive of paths of study at SEU, and real-world problems.

Prerequisites & Notes

Prerequisite:

CORE 1111

Credits: 2

Worldview Formation - 9 Credit Hours

BIBL 1113 - THE STORY OF SCRIPTURE

The Story of Scripture introduces students to the major themes and content of Scripture. Students will build their Biblical understanding of the relationship between the books of the Bible and what God is doing and revealing from Genesis to Revelation.

Credits: 3

THEO 1213 - LIVED THEOLOGY

This course introduces students to theology and the tenets of Christian thought and practice. Students will explore basic Christianity, spiritual practices, and holistic spiritual formation that will serve them in college and beyond.

Credits: 3

CORE 3113 - WORLDVIEW AND COMPLEX PROBLEMS SEMINAR

The Worldview and Complex Problems Seminar brings Christian worldview and modes of inquiry to bear on a contemporary problem in the world today. Offered topically, students will practice intellectual flexibility for application at the university and beyond. Students will engage in thought leadership and public discourse as they work together in approaching today's toughest issues from a Christian worldview using modes of inquiry offered through the disciplines of math, science, rhetoric, history, art, culture, social sciences, and theology. Topics vary by section.

Prerequisites & Notes

Prerequisite:

CORE 1112 or Junior Standing

Credits: 3

Habits of Inquiry - 22 Credit Hours

Natural-Scientific Inquiry - Select One with Lab:

NSCI 1044 - NUTRITION SCIENCE

This online course provides an overview of nutrition including nutrients, digestion and transport, different nutrition needs as related to life cycle, and how certain disease states affect nutrition status. Also included is interpretation of current USDA nutritional guidelines, and application of nutrition knowledge in the establishment of eating habits.

Prerequisites & Notes

NULL

Credits: 4

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

Quantitative Inquiry - Select one:

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Socio-Historical Inquiry - 6 Credit Hours

GEDU 2233 - EDUCATIONAL PSYCHOLOGY

This course is a study of student diversity, the principles and philosophy of human growth and development, motivation and learning theory, and how these are applied to teaching. Included are introductions to intelligence theories, cultural issues, instructional approaches, learning taxonomies, motivation, and different assessment tools.

Prerequisites & Notes

None

Credits: 3

Choose One of the Following:

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes

NULL

Credits: 3

Creative-Aesthetic Inquiry - Select One:

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

COMM 2433 - FILM APPRECIATION

This course is a survey of the historical, social/cultural, political, technical, and stylistic dimensions of film. Students will view and critically respond to films from a variety of periods and genres.

Prerequisites & Notes

None

Credits: 3

HUMS 2233 - INTRODUCTION TO HUMANITIES

This is an integrated course designed to increase the student's understanding and appreciation of the creative and expressive arts through the study of representative materials.

Prerequisites & Notes

NULL

Credits: 3

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

Major Core - 48 Credit Hours

GEDU 2003 - SURVEY OF GLOBAL EDUCATION

This course is a survey of global education trends and pedagogical practices. Emphasis is placed on students integrating into localized teaching systems and cultural awareness of challenges teachers may face teaching across global contexts.

Prerequisites & Notes

None

Credits: 3

GEDU 2013 - SURVEY OF TEACHING METHODS

This course offers a survey of current methods and techniques for teaching across disciplines. Emphasis is placed on K-8 pedagogy and best practices of teaching and learning.

Prerequisites & Notes

None

Credits: 3

GEDU 2143 - FOUNDATIONS OF EDUCATION & INSTRUCTIONAL DESIGN

This course is a study of the nature and character of American education and how it has been influenced by our social structure, social values, and history. The course includes an introduction to subject area competencies, professional skills and competencies, benchmarks for the pre-professional level of accomplished practices for teachers, and the expectations for ethical and professional behavior. Students will learn the principles of effective instructional design and delivery in the K-8 setting and gain practice in writing standards-based lesson plans that include differentiated instruction and assessment.

Prerequisites & Notes

None

Credits: 3

GEDU 3023 - TRAUMA INFORMED TEACHING

This course is a study of the impacts and types of trauma that affect K-12 student well-being and classroom learning. Adverse Childhood Experiences (ACEs) studies and classroom strategies for mitigating the effects of childhood trauma are outlined. Focus given to the review of trauma's impact on the K-12 student and how the teacher can create a trauma-informed classroom to proactively empathize and care for affected students.

Prerequisites & Notes

None

Credits: 3

GEDU 3113 - SURVEY OF THE EXCEPTIONAL LEARNER

This is a required course for all Education programs. This is an introductory course that examines the history, characteristics, and issues in exceptional education. The course covers all areas of exceptionality and their manifestations from early childhood through adulthood. It is designed to provide students with a firm grounding in the foundations of special education and exposes them to the reconstruction of the field, in order that they may better deal with new and ever-changing developments. In addition to classroom meetings, a minimum of 10 hours of observation/participation in a clinical setting is required. This course is a prerequisite for all other Exceptional Student Education courses.

Prerequisites & Notes

None

Credits: 3

GEDU 3133 - ASSESSMENT OF LEARNERS

This course focuses on the educational levels and needs of all students, including exceptional, culturally and/or linguistically diverse, and at-risk students. Standardized achievement tests, diagnostic/prescriptive tests, and curriculum-based assessments are included. Use of test results in program planning is emphasized.

Prerequisites & Notes

None

Credits: 3

GEDU 3143 - LANGUAGE DEVELOPMENT & COMMUNICATION DISORDERS

This course addresses language development, including identification and remediation of communication and language disorders. There is an emphasis on the impact of speech and language disorders on academic success and achievement. Further, students will be presented with an overview of alternative/augmentative modes of communication and development of curriculum in these areas.

Prerequisites & Notes

None

Credits: 3

GEDU 3233 - LITERACY FOUNDATIONS II: LANGUAGE ARTS & LITERATURE

This course investigates children's literature, emphasizing developmentally-appropriate instructional practices. Attention is placed on understanding psychological, social, emotional, and cognitive development as they correlate to motivating students to interact with literature.

Prerequisites & Notes

GEDU 3493

Credits: 3

GEDU 3353 - EMPOWERING ESOL TEACHERS

This course is an overview of curriculum, instructional methods and materials, testing and evaluation, and cross-cultural communication processes and linguistic principles as related to instructing English Language Learners (ELLs) in the K-8 classroom.

Prerequisites & Notes

None

Credits: 3

GEDU 3423 - DIAGNOSIS, ASSESSMENT, & EVALUATION OF READING

This course highlights formal and informal means of evaluations with emphasis on diagnosing reading ability, prescribing for instruction, administering assessment, interpreting measurement terms and data, and maintaining records.

Prerequisites & Notes

None

Credits: 3

GEDU 3493 - LITERACY FOUNDATIONS I: THE SCIENCE OF READING

This course is a study of scientific theory and effective approaches for reading instruction, focusing on reading as the interactive weaving of word recognition and language comprehension. The essential components of literacy are studied: oral language, phonological awareness, phonics, fluency, vocabulary, and comprehension. Characteristics of proficient readers, striving readers, and readers with dyslexia are examined along with practices for differentiating reading instruction.

Prerequisites & Notes

None

Credits: 3

GEDU 3503 - INSTRUCTIONAL TECHNOLOGY

This course is designed to develop skills and techniques needed for the selection, utilization, and production of classroom instructional materials and for application and integration of educational technology and media to all areas of the curriculum, appropriate to students' developmental level.

Prerequisites & Notes

None

Credits: 3

GEDU 3713 - INTEGRATION OF FAITH IN EDUCATION

This course is designed to assist educators in effectively and legally integrating their Christian faith into school and classroom settings.

Prerequisites & Notes

None

Credits: 3

GEDU 4043 - APPLIED LINGUISTICS

This course is a practical approach to teaching English to speakers of other languages. The course includes topics such as general linguistics, language theory, principles of language acquisition, and techniques for teaching and assessing K-12 ELL students. Special attention is given to the linguistic components of English, namely phonology, morphology, semantics, syntax, discourse, and pragmatics.

Prerequisites & Notes

None

Credits: 3

GEDU 4333 - CLASSROOM & BEHAVIOR MANAGEMENT

This course is the study of models and strategies of behavior management appropriate for specific populations of students in accordance with human development milestones. The course covers student attributes of behavior, including response to interventions, age-appropriate discipline, intrinsic versus extrinsic motivation, conflict resolution, culture, and demographics. The course includes methodology for managing a learning environment utilizing research-based best practices in education.

Prerequisites & Notes

None

Credits: 3

GEDU 3523 - TEACHING LITERACY IN CONTENT AREA

This course will provide students with strategies and tools for becoming a facilitating and reflective practitioner, teaching reading across content areas, and helping students discover that content area learning is made richer when reading, writing, speaking, and listening are taught together. Particular emphasis is placed on a balanced approach to reading, specific reading and comprehension strategies for content reading, the role of reflection in helping students to think critically, reading for diverse students, and the use of appropriate texts and media.

Prerequisites & Notes

None

Credits: 3

Divine Design (Major Specific Experiential Learning)- 12 Credit Hours

GEDU 2141 - GLOBAL FIELD STUDY I

In this course, students will be placed in a K-8 setting to complete tasks in the field. This course is designed to allow students multiple opportunities to observe the K-8 setting (approximately 30 hours) and participate in low-level classroom tasks in the K-8 setting. Students will need to find placement in schools/classrooms according to the students' major/grade level preference.

Prerequisites & Notes

None

Credits: 1

GEDU 3001 - GLOBAL FIELD STUDY II

In this course, students will be placed in a K-8 setting to complete tasks in the field. This course is designed to allow students multiple opportunities to observe and interact with teachers and students in the K-8 setting (approximately 45 hours) and participate in classroom tasks such as using data to drive lesson planning, parent communication, and classroom management planning. Students will need to find placement in schools/classrooms according to the students' major/grade level preference.

Prerequisites & Notes

None

Credits: 1

GEDU 4001 - GLOBAL FIELD STUDY III

In this course, students will be placed in a K-8 setting to complete tasks in the field. This course is designed to allow students multiple opportunities to assume some of the responsibilities of teachers in the K-8 setting (approximately 60 hours) and participate in classroom tasks such as teaching lessons across the curriculum, analyzing and using data to drive lesson planning, parent communication, and classroom management implementation in the K-8 setting. Students will need to find placement in schools/classrooms according to the students' major/grade level preference.

Prerequisites & Notes

None

Credits: 1

GEDU 4009 - INTERNATIONAL STUDENT TEACHING

This course provides five seminar-style opportunities for student teachers to examine the experiences they are concurrently having in the full-time student internship in the K-8 setting. Seminars are designed to respond to the immediate needs of the student teachers and offer support, encouragement, and insights into the teaching process and profession. Guest speakers will play an important role in enriching the program and providing first-hand experiences from the classroom and administrative levels.

Prerequisites & Notes

Acceptance into Internship

Credits: 9

Divine Design (Minor, Electives, Experiential Learning) 26 Credits

To meet the Divine Design requirement, student may earn credit hours in general elective courses, declare minors/certificates, or enjoy other experiential learning opportunities such as study abroad, internships, or practicums. Other practicum options include PRAC 1001 (1 credit hour), PRAC 1002 (2 credit hour), PRAC 1003 (3 credit hour), PRAC 1004 (4 credit hour), and PMIN 2303 (3 credit hour) up to a total of 24 credit hours. General Electives are any college-level courses that do not satisfy the above program requirements. Student must complete the above program requirements, with remaining credit hours earned in Divine Design to meet the total program hours.

Total Program Hours- 120 Credit Hours

Additional State Requirements for Online or Partner Site Students

*Note: Students taking courses online/at an SEU partner site outside of the State of Florida may be subject to additional Foundational Core requirements for degree completion. Some of these requirements are built into your Foundational Core listed above. Any of the requirements listed below that are not incorporated into the Foundational Core will count towards your Divine Design hours. State-specific requirements are also specified in the SEU Catalog. Please see your Degree Audit in JICS and work with your Academic Advisor to ensure these requirements are met.

Alabama

Area I, Written Composition - 6 Credit Hours

ENGL 2113 - PROFESSIONAL COMMUNICATION

Professional communication introduces students to communication found in real-world settings with an emphasis on clarity, organization, format, language, and audience, for both written and oral assignments.

Credits: 3

ENGL 1113 - COLLEGE COMPOSITION

This course covers the key skills and practices required for effective written communication at the college level. Students will build research and writing skills necessary to engage with critical issues, develop well-grounded arguments, and prepare students for future academic success.

Credits: 3

Area II, Humanities and Fine Arts - 12 Credit Hours

* In addition to Foundational Core Discursive Inquiry requirements

ENGL 2133 - INTRODUCTION TO LITERATURE

A course to introduce in-depth study of the poetry, fiction, and drama of American, English, and world literature.

Credits: 3

AND

ARTV 2023 - PHOTOGRAPHY

This is an introductory course to photography. Students learn how to properly compose, light, and focus on various subjects. Topics include digital photography techniques, photojournalism, photography ethics, as well as portrait, landscape, and event photography.

* Do not register for this course if you have taken DCOM 2023

Prerequisites & Notes

None

Credits: 3

OR

MUSC 1003 - MUSIC APPRECIATION

This course is designed to be an introduction to music: its history, sounds, forms, styles, dynamics, and beauty. Music from the Medieval period (450) through contemporary styles such as Jazz, Rock, and Non-Western Music is included.

Prerequisites & Notes

NULL

Credits: 3

Area III, Natural Science and Mathematics - 11 Credit Hours

BIOL 1334 - ESSENTIALS OF HUMAN A&P

This course is a study of the structure, formation, and function of the eleven human body systems. Includes lab.

Prerequisites & Notes

NULL

Credits: 4

MATH 1213 - COLLEGE ALGEBRA

In this course a systematic development of fundamental algebraic operations is stressed. Included in this development are systems of linear equations and inequalities; linear, quadratic, exponential and logarithmic functions; absolute value equations; radicals; conic sections.

Prerequisites & Notes

None

Credits: 3

MATH 1313 - TOPICS IN MATHEMATICS

This is a discrete mathematics course that demonstrates the beauty and utility of mathematics. The topics for this course are set theory, logic, financial mathematics, probability, elementary graph theory and voting theory.

Prerequisites & Notes

NULL

Credits: 3

MATH 2023 - INTRODUCTION TO PROBABILITY AND STATISTICS

This course is an introduction to the concepts and methods of probability and statistics. The course is designed for students interested in the application of probability and statistics in business and other social sciences. Topics include descriptive statistics, probability theory, random variables and probability distributions, sampling distributions, estimating population parameters, testing hypothesis about population parameters, correlation and regression, and analysis of variances.

Prerequisites & Notes

NULL

Credits: 3

Area IV, History, Social and Behavioral Sciences - 12 Credit Hours

HIST 2123 - CRITICAL ISSUES IN AMERICAN HISTORY

A survey of the political, social, economic, military, and cultural developments in America. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

HIST 2133 - CRITICAL ISSUES IN WORLD HISTORY

A survey of the political, social, economic, military, and cultural developments in civilizations throughout world history. Learn the elements of the study of history: the critical reading of sources, research skills, and differing historical methodologies.

Credits: 3

PSYC 1133 - INTRODUCTION TO PSYCHOLOGY

This course is an introduction to the field of psychology. Topics addressed are neuroscience and behavior, nature and nurture, consciousness, sensation and perception, learning, memory, intelligence, personality, psychological disorders, and social behavior.

Prerequisites & Notes

NULL

Credits: 3

SSCI 2133 - INTRODUCTION TO SOCIOLOGY

This course is a study of social organization with a focus on organizations, institutions, and social forces that contribute to the formation and self-definition of a society. The development of social norms, culture, belief systems, and stratification are considered. Emphasis is placed on exploring the existence and perpetuation of social problems.

Prerequisites & Notes
